21 PUBLIC ANNOUNCEMENT OF RESOLUTIONS PASSED IN CLOSED SESSION

22 CONCLUSION OF MEETING

After the conclusion of the Council Meeting, and if time permits, Councillors will be provided an opportunity to ask questions of staff.

MINUTES OF THE MEETING OF CITY OF PARRAMATTA COUNCIL HELD IN THE CLOISTER FUNCTION ROOMS, ST PATRICK'S CATHEDRAL 1 MARIST PLACE, PARRAMATTA ON MONDAY, 24 MAY 2021 AT 6.30PM

These are draft minutes and are subject to confirmation by Council at its next meeting. The confirmed minutes will replace this draft version on the website once confirmed.

PRESENT

The Lord Mayor, Councillor Bob Dwyer and Councillors Benjamin Barrak (6.33pm), Phil Bradley (6.31pm), Donna Davis (6.34pm), Pierre Esber, Michelle Garrard (Deputy Lord Mayor), Steven Issa, Andrew Jefferies (6.33pm), Sameer Pandey, Dr Patricia Proxiv, Bill Tyrrell (6.33pm), Andrew Wilson, Lorraine Wearne (6.33pm) and Martin Zaiter.

1. OPENING MEETING

The Lord Mayor, Councillor Bob Dwyer, opened the meeting at 6.31pm.

2. ACKNOWLEDGEMENT OF THE TRADITIONAL LAND OWNERS

The Lord Mayor, acknowledged the Burramattagal people of The Darug Nation as the traditional custodians of this land, and paid respect to their ancient culture and their elders past and present.

Note: Councillor Bradley arrived at 6:31pm during the acknowledgement of the Traditional Land Owners.

3. WEBCASTING ANNOUNCEMENT

The Lord Mayor, advised that this public meeting is being recorded and streamed live on the internet. The recording will also be archived and made available on Council's website.

The Lord Mayor further advised that all care will be taken to maintain privacy, however as a visitor in the public gallery, the public should be aware that their presence may be recorded.

4. OTHER RECORDING OF MEETING ANNOUNCEMENT

As per Council's Code of Meeting Practice, the recording of the Council Meeting by the public using any device, audio or video, is only permitted with Council permission. Recording a Council Meeting without permission may result in the individual being expelled from the Meeting.

5. CONFIRMATION OF MINUTES

SUBJECT: Minutes of the Council Meeting held on 10 May 2021

3227 RESOLVED (Esber/Wilson)

That the minutes be taken as read and be accepted as a true record of the Meeting.

6. APOLOGIES/REQUESTS FOR LEAVE OF ABSENCE/REMOTE ATTENDANCE

There were no Apologies/Requests for Leave of Absence/Remote Attendance made at this meeting.

Note:

1. **Councillor Barrak arrived at 6:33pm during apologies/requests for leave of absence/remote attendance.**
2. **Councillor Jefferies arrived at 6:33pm during apologies/requests for leave of absence/remote attendance.**
3. **Councillor Tyrrell arrived at 6:33pm during apologies/requests for leave of absence/remote attendance.**
4. **Councillor Wearne arrived at 6:33pm during apologies/requests for leave of absence/remote attendance.**

7. DECLARATIONS OF INTEREST

There were no Declarations of Interest made at this meeting.

8. MINUTES OF THE LORD MAYOR

8.1 SUBJECT Olympics Live Activation
 REFERENCE F2019/03630 - D08063001
 REPORT OF Lord Mayor, Councillor Bob Dwyer

3228 RESOLVED (Dwyer/Issa)

- (a) **That** Council officers investigate and table a report to the 28 June Council Meeting on the feasibility of the City of Parramatta hosting an Olympics Live site in the Parramatta CBD.
- (b) **That** the report detail costs associated with any proposed Olympics Live site activities for Council's consideration.
- (c) **Further, that** the report examine the feasibility of a partnership with the Sydney Olympic Park Authority to celebrate the Olympics.

Note: Councillor Davis arrived at 6:34pm during the Lord Mayoral Minute.

MATTER OF URGENCY

3229 RESOLVED (Garrard/Zaiter)

That a procedural motion be granted to allow consideration of a matter of urgency in relation to a local resident appearing on "The Celebrity Apprentice".

The Lord Mayor ruled the matter urgent.

3230 RESOLVED (Garrard/Zaiter)

That the Lord Mayor write to Mr Robert Shehadie in recognition of his appearance on “The Celebrity Apprentice”.

MATTER OF URGENCY

3231 RESOLVED (Prociv/Issa)

That a procedural motion be granted to allow consideration of a matter of urgency in relation to Wentworth Point.

The Lord Mayor ruled the matter urgent.

3232 RESOLVED (Prociv/Issa)

- (a) **That** Council request the appropriate Minister to conduct a risk assessment of the Wentworth Point area.
- (b) **Further, that** consideration be given to installing infrastructure that would allow accurate contract tracing in the event of a COVID-19 outbreak.

9. PUBLIC FORUM

9.1 SUBJECT PUBLIC FORUM: Item 17.1 - Post Exhibition - Finalisation of the Parramatta CBD Planning Proposal following consideration of submissions received during the public exhibition period

REFERENCE F2021/00521 - D08063576

Written public forum submissions were received for Item 17.1 – Post Exhibition – Finalisation of the Parramatta CBD Planning Proposal following consideration of submissions received during the public exhibition period.

Noting that Council’s Code of Meeting Practice only allows a maximum of three (3) public forums per meeting, the written public forum submissions were circulated to Councillors and made publicly available as part of Supplementary Agenda B to this Council Meeting.

10. PETITIONS

There were no petitions tabled at this meeting.

11. RESCISSION MOTIONS

There were no rescission motions submitted for this meeting.

PROCEDURAL MOTION

3233 RESOLVED (Tyrrell/Esber)

That Items 12.1, 12.2, 12.3, 14.1, 14.2, and 14.3 be resolved en bloc.

12. FAIR

12.1 SUBJECT FOR NOTATION: Investment Report for April 2021

REFERENCE F2021/00521 - D08040476

REPORT OF Tax and Treasury Accountant

3234 RESOLVED (Tyrrell/Esber)

That Council receive the Investment Report for April 2021.

12.2 SUBJECT FOR NOTATION: Minutes of the Aboriginal and Torres Strait Islander Advisory Committee Meetings

REFERENCE F2017/00358 - D08020700

REPORT OF Community Capacity Building Officer

3235 RESOLVED (Tyrrell/Esber)

(a) **That** Council note the minutes of the Aboriginal and Torres Strait Islander Advisory Committee Meetings held on 23 February and 23 March 2021.

(b) **That** Council note the resignation of two Advisory Committee members in January 2021.

(c) **That** Council note the Committee's endorsement of John Robertson and Bruce Gale continuing in the office of Chairperson and Deputy Chairperson respectively until dissolution of the Advisory Committee on 3 September 2021.

(d) **Further, that** Council note the Committee's resolution that members of the Aboriginal and Torres Strait Islander Advisory Committee request that Council organise a date as soon as possible for dedication of the Memorial to Indigenous Service Personnel before the election of a new Council.

12.3 SUBJECT FOR APPROVAL: Quarterly Budget Review - March 2021

REFERENCE F2019/04433 - D07809535

REPORT OF Commercial Manager

3236 RESOLVED (Tyrrell/Esber)

- (a) **That** Council adopt the March 2021 Quarterly Budget Review Statement (QBRS) and the Responsible Accounting Officer's report on the financial position of the Council (Attachment 1).
- (b) **Further, that** Council approve the revised budget for the 2020/21 financial year:
 - (i) an operating surplus of \$13.1m (Dec QR: -10.4m deficit)
 - (ii) capital revenue of \$51.6m (Dec QR: \$88.4m)
 - (iii) capital expenditure of \$156.5m (Dec QR: \$179.0m).

13. ACCESSIBLE

Nil

14. GREEN

14.1 SUBJECT FOR APPROVAL: Public Exhibition of the Draft Arthur Phillip Park Masterplan

REFERENCE F2021/00521 - D08021922

REPORT OF Place Manager

3237 RESOLVED (Tyrrell/Esber)

- (a) **That** the draft renewed Arthur Phillip Park masterplan be placed on public exhibition from 31 May to 25 June 2021 for community comment.
- (b) **That** temporary signage be installed across the masterplan area to notify the community of the public exhibition period and their opportunities to engage.
- (c) **Further, that** a report be submitted to Council upon the completion of the public exhibition period for consideration and assessment of the public submissions.

14.2 SUBJECT FOR APPROVAL: Public Exhibition of the Draft Binalong Park Masterplan

REFERENCE F2021/00521 - D08021927

REPORT OF Place Manager

3238 RESOLVED (Tyrrell/Esber)

- (a) **That** the draft Binalong Park masterplan be placed on public exhibition from 31 May to 25 June 2021 for community comment.
- (b) **That** temporary signage be installed across the masterplan area to notify the community of the public exhibition period and their opportunities to provide feedback.

- (c) **Further, that** a report be submitted to Council upon the completion of the public exhibition period for consideration and assessment of the public submissions.

14.3 SUBJECT FOR APPROVAL: Public Exhibition of the Draft Granville Square Masterplan

REFERENCE F2021/00521 - D07856512

REPORT OF Place Manager

3239 RESOLVED (Tyrrell/Esber)

(a) **That** the draft Granville Square Masterplan be placed on public exhibition for 30 days (4 weeks) from 26 May – 26 June 2021, in the City of Parramatta Library, Council Customer Service Centre, on Councils website and on a Participate Parramatta Project page.

(b) **That** temporary signage be placed along Good and Bridge Street Granville, as well as in close proximity to the Granville Train Station advising of the public exhibition period, and that appropriate community engagement activities (that are suitably COVID safe), are organised to support the consultation.

(c) **Further, that** a report be submitted to Council upon the completion of the public exhibition period for consideration and assessment of the public submissions and that this report identifies implementation opportunities.

15. WELCOMING

Nil

16. THRIVING

16.1 SUBJECT FOR APPROVAL: Public Exhibition of the Proposed Building Names for 5 Parramatta Square

REFERENCE F2021/00521 - D08009615

REPORT OF Place Manager

MOTION (Issa/Garrard)

(a) **That** Council approve the proposed names for 5 Parramatta Square building to be placed on public exhibition from Tuesday 25 May to Wednesday 16 June 2021.

(b) **That** community feedback on the proposed names be reported back to Council in July 2021.

- (c) **Further, that** the proposed names to be placed on public exhibition seeking community feedback is:

Proposed Name	Background / context
Civic Place or The Civic	Civic denotes a town and the people who live in it, a building for City of Parramatta's people. Site has a long history as the centre of Parramatta's civic infrastructure - Town Hall, built adjacent in 1883; Council relocating to this site in 1958 and former Parramatta Library added in 1964; becoming Civic Place. Pays tribute to the past while celebrating the building as a new commitment to Parramatta's civic future.

AMENDMENT (Davis/Bradley)

- (a) **That** Council approve the proposed names for 5 Parramatta Square building to be placed on public exhibition from Tuesday 25 May to Wednesday 16 June 2021.
- (b) **That** community feedback on the proposed names, as well as names proposed by the community, be reported back to Council in July 2021.
- (c) **Further, that** the proposed names to be placed on public exhibition seeking community feedback is:

Proposed Name	Background / context
The Banksia	Microscopic pollens of Banksia were found in archaeological digs in the nearby area. The deep reds/oranges of the roof are inspired by nature's use of colour as an attractor, attracting people to the building for learning, growth and exchange. The roof's distinctive form is also reminiscent of the openings in a Banksia pod.
Civic Place or The Civic	Civic denotes a town and the people who live in it, a building for City of Parramatta's people. Site has a long history as the centre of Parramatta's civic infrastructure - Town Hall, built adjacent in 1883; Council relocating to this site in 1958 and former Parramatta Library added in 1964; becoming Civic Place. Pays tribute to the past while celebrating the building as a new commitment to Parramatta's civic future.

The amendment moved by Councillor Davis and seconded by Councillor Bradley on being put was declared LOST.

The motion moved by Councillor Issa and seconded by Councillor Garrard on being put was declared CARRIED.

3240 RESOLVED (Issa/Garrard)

- (a) **That** Council approve the proposed names for 5 Parramatta Square building to be placed on public exhibition from Tuesday 25 May to Wednesday 16 June 2021.
- (b) **That** community feedback on the proposed names be reported back to Council in July 2021.
- (c) **Further, that** the proposed names to be placed on public exhibition seeking community feedback is:

Proposed Name	Background / context
Civic Place or The Civic	Civic denotes a town and the people who live in it, a building for City of Parramatta's people. Site has a long history as the centre of Parramatta's civic infrastructure - Town Hall, built adjacent in 1883; Council relocating to this site in 1958 and former Parramatta Library added in 1964; becoming Civic Place. Pays tribute to the past while celebrating the building as a new commitment to Parramatta's civic future.

16.2 SUBJECT FOR APPROVAL: Phillip Lane Activation Evaluation Report and Next Steps

REFERENCE F2021/00521 - D08028187

REPORT OF Place Manager

MOTION (Garrard/Zaiter)

- (a) **That** Council note the Phillip Lane Activation Evaluation Report at Attachment 1 prepared in response to a Lord Mayoral Minute endorsed at the 8 March 2021 Council Meeting.
- (b) **That** Council note that on 26 April 2021 a \$250,000 NSW state government 'Your High Street' grant was awarded to Council for the permanent embellishment of Phillip Lane.
- (c) **That** Council note that on 7 May 2021 the Phillip Lane Activation project was announced as a finalist in the NSW Local Government Awards in the 'Supporting Local Enterprise' category (to be announced on 3 June 2021).
- (d) **That** Council approve the next steps for the project to deliver future embellishment to Phillip Lane including improved laneway lighting with decorative elements, street art/murals on the rear façade of the buildings adjacent to Phillip Lane, and a means of restricting vehicular access at times of activation being a retractable bollard (or similar) at the entry of Phillip Lane.
- (e) **That** Council approve the works to be carried out on private land, including funding 50% of the total cost of the private works, to a

maximum dollar value of \$10,000 per rateable property for each of the 11 properties facing onto the laneway.

- (f) **That** Council delegate to the CEO the authority to negotiate, conclude terms and execute any agreements with adjacent landowners for any Council-funded works undertaken on private land that enable or support the activation of Phillip Lane.
- (g) **That** Council delegate to the CEO the authority to negotiate, conclude terms and execute any agreements with adjacent landowners for a Plan of Management for Phillip Lane to support future activation.
- (h) **Further, that** a report be presented to Council after the work have been carried out in accordance with Section 67(4) of the Local Government Act 1993.

AMENDMENT (Esber/Prociv)

That Council defer consideration of this matter to the next Council Meeting, and a Councillor Workshop be held prior to the meeting.

The amendment moved by Councillor Esber and seconded by Councillor Prociv on being put was declared CARRIED.

3241 RESOLVED (Esber/Prociv)

That Council defer consideration of this matter to the next Council Meeting, and a Councillor Workshop be held prior to the meeting.

The amendment then became the motion.

The motion moved by Councillor Esber and seconded by Councillor Prociv was subsequently WITHDRAWN.

3242 RESOLVED (Garrard/Zaiter)

- (a) **That** Council note the Phillip Lane Activation Evaluation Report at Attachment 1 prepared in response to a Lord Mayoral Minute endorsed at the 8 March 2021 Council Meeting.
- (b) **That** Council note that on 26 April 2021 a \$250,000 NSW state government 'Your High Street' grant was awarded to Council for the permanent embellishment of Phillip Lane.
- (c) **That** Council note that on 7 May 2021 the Phillip Lane Activation project was announced as a finalist in the NSW Local Government Awards in the 'Supporting Local Enterprise' category (to be announced on 3 June 2021).
- (d) **That** Council approve the next steps for the project to deliver future embellishment to Phillip Lane including improved laneway lighting with decorative elements, street art/murals on the rear façade of

the buildings adjacent to Phillip Lane, and a means of restricting vehicular access at times of activation being a retractable bollard (or similar) at the entry of Phillip Lane.

- (e) **That** Council approve the works to be carried out on private land, including funding 50% of the total cost of the private works, to a maximum dollar value of \$10,000 per rateable property for each of the 11 properties facing onto the laneway.
- (f) **That** Council delegate to the CEO the authority to negotiate, conclude terms and execute any agreements with adjacent landowners for any Council-funded works undertaken on private land that enable or support the activation of Phillip Lane.
- (g) **That** Council delegate to the CEO the authority to negotiate, conclude terms and execute any agreements with adjacent landowners for a Plan of Management for Phillip Lane to support future activation.
- (h) **Further, that** a report be presented to Council after the work have been carried out in accordance with Section 67(4) of the Local Government Act 1993.

17. INNOVATIVE

PROCEDURAL MOTION

3243 RESOLVED (Issa/Tyrrell)

That Council amend the order of business to consider Item 17.2 before Item 17.1.

17.2 SUBJECT LATE REPORT FOR APPROVAL: Outcomes of the exhibition of the Parramatta CBD Planning Proposal - Advice of the Local Planning Panel

REFERENCE F2020/02047 - D08048062

REPORT OF Team Leader –Land Use Planning

3244 RESOLVED (Issa/Tyrrell)

- (a) **That** Council note the advice of the Local Planning Panel received in relation to the report on the outcomes of the exhibition of the Parramatta CBD Planning Proposal (as provided in the minutes to their meeting at Attachment 1).
- (b) **That** Council approve consideration of the additional recommendation of the Local Planning Panel (LPP) with respect to car share controls, that:

“an additional subclause be included in Clause 7.3 (parking), requiring the provision of parking spaces for car share vehicles in each new development (via Decision Pathway 3 – Orange) in Table 3 of Attachment 16 of the LPP Report (‘Changes that have merit for further investigation (via Decision Pathway 3 – Orange)’).”

- DIVISION A division was called, the result being:
- AYES: Councillors Bradley, Dwyer, Esber, Garrard, Issa, Jefferies, Pandey, Prociv, Tyrrell and Zaiter
- NOES: Councillors Barrak, Davis, Wearne and Wilson
- 17.1 SUBJECT FOR APPROVAL: Post Exhibition - Finalisation of the Parramatta CBD Planning Proposal following consideration of submissions received during the public exhibition period
- REFERENCE F2020/02047 - D08026973
- REPORT OF Snr Project Officer Land Use; Team Leader –Land Use Planning
- MOTION (Issa/Tyrrell)
- (a) **That** Council note:
- (i) The submissions made in response to the public exhibition of the *Parramatta CBD Planning Proposal (CBD PP)*, summarised at Attachments 12 to 15 of the Local Planning Panel (**LPP**) Report;
 - (ii) The LPP Report at Attachment 1 to this report.
- (b) **That** Council:
- (i) Approve the requested changes to the CBD PP set out in Table 1 of Attachment 16 of the LPP Report (*‘Changes that are supported (via Decision Pathway 1 - Green)’*);
 - (ii) Note not making any of the requested changes to the CBD PP summarised in Table 2 of Attachment 16 of the LPP Report (*‘Changes that are not supported (via Decision Pathway 2 - Red)’*);
 - (iii) Approve further investigation of the requested changes to the CBD PP set out in Table 3 of Attachment 16 of the LPP Report (*‘Changes that have merit for further investigation (via Decision Pathway 3 - Orange)’*).
- (c) **That** Council note that on 27 April 2015 and on 25 November 2019, Council approved further investigation on a number of “Planning Investigation Areas” (PIAs) to consider amendment of the planning controls in those areas and known respectively as the Northern, North – East, Eastern and Southern PIAs (see Figure 3 in paragraph 33 of this report) and that no change is required to the PIAs in response to submissions received on the CBP PP.

- (d) **That** Council approve:
 - (i) The revised CBD PP (in Attachments 1 to 9 of the LPP Report); and
 - (ii) Forwarding the CBD PP to the Department of Planning, Industry and Environment (DPIE) for finalisation.

- (e) **That** Council note the application to DPIE, will also request the CBD PP amend *Parramatta Local Environmental Plan 2011* (PLEP 2011), in accordance with section 3.36 of the *Environmental Planning and Assessment Act 1979*.

- (f) **That** Council writes to the Secretary of DPIE seeking an exemption from the *State Environmental Planning Policy Amendment (Build-to-rent Housing) 2021* in the B3 Commercial Core zone as this is inconsistent with the employment objectives of the commercial core in the Parramatta CBD and also noting that there is adequate B4 Mixed Use zoned land in the Parramatta CBD to allow for build-to-rent housing and subdividable residential mixed use development.

- (g) **That** Council:
 - (i) Approve the preparation of a new Section 7.12 development contributions plan for the Parramatta CBD within 12 months; and
 - (ii) Note the plan will include a new contributions levy rate set higher than the current 3% rate, subject to feasibility testing of the levy rate.

- (h) **That** Council request DPIE not finalise the amendments to PLEP 2011 until:
 - (i) Council has exhibited and endorsed a new Section 7.12 development contributions plan for the Parramatta CBD; and
 - (ii) DPIE has amended clause 25K of the *Environmental Planning and Assessment Regulation 2000* to allow the higher Section 7.12 development contributions rate.

- (i) **Further, that** Council delegate authority to the Chief Executive Officer to make any minor amendments and corrections of a non-policy and administrative nature that may arise during the plan amendment process relating to the Parramatta CBD Planning Proposal (and supporting documentation), Draft PLEP 2011 Amendment Instrument and Draft PLEP 2011 Amendment Maps.

AMENDMENT (Wearne/Davis)

That Council defer consideration of this matter to the next Council Meeting.

The amendment moved by Councillor Wearne and seconded by Councillor Davis on being put was declared CARRIED.

3245 RESOLVED (Wearne/Davis)

That Council defer consideration of this matter to the next Council Meeting.

DIVISION A division was called, the result being:

AYES: Councillors Barrak, Bradley, Davis, Esber, Pandey, Prociv, Wearne and Wilson

NOES: Councillors Dwyer, Garrard, Issa, Jefferies, Tyrrell and Zaiter

The amendment then became the motion.

3246 RESOLVED (Esber/Prociv)

That the motion be put.

The motion moved by Councillor Wearne and seconded by Councillor Davis on being put was declared CARRIED.

3247 RESOLVED (Wearne/Davis)

That Council defer consideration of this matter to the next Council Meeting.

DIVISION A division was called, the result being:-

AYES: Councillors Barrak, Bradley, Davis, Esber, Pandey, Prociv, Wearne and Wilson

NOES: Councillors Dwyer, Garrard, Issa, Jefferies, Tyrrell and Zaiter

Note: Councillor Issa retired from the Meeting at 7:52pm after consideration of Item 17.1.

18. NOTICES OF MOTION

18.1 SUBJECT NOTICE OF MOTION: Re-naming of Olympic Park Wharf

REFERENCE F2021/00521 - D08047433

FROM Councillor Prociv

3248 RESOLVED (Prociv/Issa)

That Council write to Transport for NSW (TfNSW) requesting they commence the process, through the Geographical Names Board (GNB), of changing the name "Olympic Park Wharf" to "Wentworth Point Wharf".

Note:

1. Councillor Garrard left the Chamber at 7:52pm during consideration of Item 18.1.
2. Councillor Tyrrell left the Chamber at 7:52pm during consideration of Item 18.1.
3. Councillor Barrak left the Chamber at 7:53pm during consideration of Item 18.1.
4. Councillor Davis left the Chamber at 7:53pm and returned at 7:54pm during consideration of Item 18.1.

FROM Governance Manager

QUESTIONS TAKEN ON NOTICE FROM THE COUNCIL MEETING OF 10 May 2021

Item	Subject	Councillor	Question	Response	Executive Director
16.1	Draft CBD Parking Strategy	Prociw	If Council changed the 15 minute parking to 30 minute parking, how does that relate to the allowable time limits of disabled parking permits?	<p>Drivers with a disability who display their Mobility Parking Scheme (MPS) on their windscreen are entitled to the following concession within the City of Parramatta:</p> <ol style="list-style-type: none">a. Where the parking is limited by a sign less than 30 minutes, the driver may park in the spot for a maximum of thirty (30) minutes.b. Where the parking is limited by a sign for 30 minutes, the driver may park in the spot for two (2) hours.c. Where the parking is limited to a sign to more than 30 minutes, the driver may park in the spot for an unlimited time. <p>The MPS is lead by State Government and dictates the concessions available to drivers with a</p>	Executive Director, Property & Place

				disability as stated above.	
17.2	Draft Development Control Plan for the Telopea Precinct for Public Exhibition	Garrard	In 2019, Council resolved to place signs around the Dundas Community Centre advising that the City of Parramatta Council did not support the development. Can Council officers please advise where are the signs?	<p>Officers confirm that Council Action F2015/2009 from 11 February 2019 'Telopea Rezoning Site' was actioned with signs installed in the highest-traffic areas of Telopea: Waratah Shops and the train station. Please see attached photos from those locations.</p> <p>Council officers do not have any detail on what happened to the signs, when they were removed, or by whom.</p> <p>The Council Action did not specify a date for removal of the signs. As such, officers understand Council's intent is for the signs to remain in place until the conclusion of the current Council term.</p> <p>Council officers are in the process of having the signs reprinted and reinstated.</p>	Executive Director, City Planning & Design

Note:

1. **Councillor Wilson left the Chamber at 7:56pm after consideration of Item 19.1.**
2. **Councillor Barrak returned to the Chamber at 7:57pm after consideration of Item 19.1.**
3. **Councillor Davis left the Chamber at 7:58pm and returned at 7:59pm after consideration of Item 19.1.**
4. **Councillor Tyrrell returned to the Chamber at 7:58pm after during consideration of Item 19.1.**

20. CLOSED SESSION

Note: Prior to moving into Closed Session, the Lord Mayor invited members of the public gallery to make representations as to why any item had been included in Closed Session. No member of the gallery wished to make representations.

3249 RESOLVED (Esber/Tyrrell)

That members of the press and public be excluded from the meeting of the Closed Session and access to the correspondence and reports relating to the items considered during the course of the Closed Session be withheld. This action is taken in accordance with Section 10A(s) of the Local Government Act, 1993 as the items listed come within the following provisions:-

- 1 FOR NOTATION: Legal Status Report as at 30 April 2021. (D08039462) - *This report is confidential in accordance with section 10A (2) (g) of the Local Government Act 1993 as the report contains advice concerning litigation, or advice that would otherwise be privileged from production in legal proceedings on the ground of legal professional privilege.*
- 2 FOR APPROVAL: Select Tender 18/2020 Construction of a Pedestrian and Cyclist Bridge across Parramatta River at Alfred Street, Parramatta. (D07851339) - *This report is confidential in accordance with section 10A (2) (d) of the Local Government Act 1993 as the report contains commercial information of a confidential nature that would, if disclosed (i) prejudice the commercial position of the person who supplied it; or (ii) confer a commercial advantage on a competitor of the Council; or (iii) reveal a trade secret.*
- 3 Report of the CEO Performance Review Panel. (D08061619) - *This report is confidential in accordance with section 10A (2) (a) of the Local Government Act 1993 as the report contains personnel matters concerning particular individuals.*

Note: Councillor Garrard returned to the Chamber at 7:59pm after Council moved into Closed Session.

20.1 SUBJECT FOR NOTATION: Legal Status Report as at 30 April 2021

REFERENCE F2020/03849 - D08039462

REPORT OF Group Manager Legal Services

3250 RESOLVED (Esber/Wearne)

That Council note the Legal Status Report as at 30 April 2021.

Note: Councillor Wilson returned to the Chamber at 8:01pm after consideration of Item 20.1.

20.2 SUBJECT FOR APPROVAL: Select Tender 18/2020 Construction of a Pedestrian and Cyclist Bridge across Parramatta River at Alfred Street, Parramatta

REFERENCE F2020/02252 - D07851339

REPORT OF Manager Capital Projects

3251 RESOLVED (Esber/Tyrrell)

- (a) **That** Council approve appointment of the preferred tenderer for the construction of a pedestrian and cyclist bridge across the Parramatta River at Alfred Street, Parramatta for the contract sum as outlined in paragraph 21 of this report.
- (b) **That** all unsuccessful tenderers be advised of Council's decision in this matter.
- (c) **Further, that** Council delegate authority to the Chief Executive Officer to finalise and execute all necessary documents.

20.3 SUBJECT Report of the CEO Performance Review Panel

REFERENCE F2020/03849 - D08061619

REPORT OF Lord Mayor, Councillor Bob Dwyer

3252 RESOLVED (Esber/Wearne)

- (a) **That** Council note the Report of the Chief Executive Officer Performance Review Panel for the Period of December 2019 to December 2020.
- (b) **That** Council note the new Chief Executive Officer Performance Agreement for the period January 2021 to June 2022, signed on 17 May 2021.
- (c) **Further, that** the Chief Executive Officer Performance Review and all associated reports be treated as confidential.

PROCEDURAL MOTION

3253 RESOLVED (Esber/Tyrrell)

That the meeting resume into Open Session.

21. REPORTS OF RESOLUTIONS PASSED IN CLOSED SESSION

The Chief Executive Officer read out the resolutions for Items 20.1 and 20.2. The Lord Mayor read out the resolution for Item 20.3.

22. CONCLUSION OF MEETING

The meeting terminated at 8:31 pm.

THIS PAGE AND THE PRECEDING 16 PAGES ARE THE MINUTES OF THE ORDINARY COUNCIL MEETING HELD ON MONDAY, 24 MAY 2021 AND CONFIRMED ON TUESDAY, 15 JUNE 2021.

REPORT OF	Coordinator Internal Audit

PURPOSE:

The Audit Risk and Improvement Committee (ARIC) met on 25 February 2021 and this report provides a summary of the key discussion points of the meetings for Council's notation.

RECOMMENDATION

That Council notes the minutes of the Audit Risk and Improvement Committee meetings as provided at **Attachment 1**.

BACKGROUND

1. Council's Audit Risk and Improvement Committee (ARIC) comprises of members appointed by the Council. The members of the ARIC currently include two (2) Councillors and three (3) independent external members.
2. The Chief Executive Officer, Council's Auditors and other Council Director(s) and Manager(s) are invited to attend the ARIC meetings as observers. This approach is consistent with the Internal Audit Guidelines issued by the Office of Local Government (then Division of Local Government) in September 2010.
3. The ARIC meets five (5) times a year with four (4) ordinary meetings and one (1) special meeting to consider Council's audited Annual Financial Reports.
4. Under the ARIC's Charter, all meeting minutes are required to be reported to Council. This report provides both a full copy of the minutes and a summary of the key discussion points of the ARIC meeting held on 25 February 2021.
5. The ARIC meetings are currently held remotely in compliance with Office of Local Government (OLG) guidance on attendance by Councillors and others at committee meetings during the COVID-19 pandemic.

ISSUES/OPTIONS/CONSEQUENCES

6. The ARIC Annual Report for 2020 which was endorsed by the Committee out of session was tabled and noted at the meeting. The Committee provided their feed back on pending actions.
7. Matters arising and action items from minutes of previous meetings were presented.
8. The Director Property & Place provided updates on the Parramatta Square

projects which are 3PS, 4PS, 5 & 7PS, 6 & 8PS and the Public Domain, and an update on Parramatta Square risks and Aquatic and Leisure Centre status.

9. The interim MPAC chairperson provided an update on MPAC activities, which included the Aquatic and Leisure Centre tender process.
10. The Annual Statistical Report was presented. The statistics included:
 - a. The number and type of referrals that Council made to and received from external agencies.
 - b. The number and nature of compliments and complaints that Council received.
 - c. The number and nature of legal proceedings.
 - d. The number and nature of GIPA applications.
11. The Committee received and noted on the updated report of Council's involvement in current work to reassess and develop strategies for the management of James Hardie Asbestos Legacy sites in the City of Parramatta LGA.
12. The Internal Ombudsman provided an overview of the activities that were undertaken by the Internal Ombudsman Shared Service (IOSS) with City of Parramatta in the period from 25 September 2017 to 14 October 2020, including:
 - a. Summary of the complaints received, and advice provided
 - b. Summary of the investigations conducted
 - c. Education activities conducted
 - d. Probity advice provided
 - e. Policy review and development
 - f. Promotion and media activities
 - g. Code of conduct matters
 - h. Trends identified in matters reviewed or investigated
13. As requested at the previous ARIC meeting December 2020 YTD Finance Report which had been reviewed and approved by the Exec and Finance Committees was presented by the Chief Financial Officer and noted by the Committee

14. The Audit Office of NSW presented the Annual Engagement Plan from the Audit Office for the financial audit of Council's financial statements for the year ending 30 June 2021, which was noted by the Committee. The planning phase of annual audit will commence on 12 April 2021.
15. An update of the status of the 2020/2021 Internal Audit Program was provided to the Committee. Work in progress audits were:
- a. Complaints Management
 - b. Voluntary Planning Agreements
 - c. Procurement and Contract Management
 - d. Key Financial Systems Controls

An update was provided on the status of implementation of outstanding internal audit recommendations. As requested at the previous ARIC meeting the aging analysis of outstanding recommendations was updated to include both external and internal audit recommendations.

16. The Risk & Audit Manager provided an update to the ARIC members on Council's activities relating to Enterprise Risk Management
17. The Coordinator Internal Audit advised the Committee of the need to tender for the provision of internal audit services by an external provider as the contract with the current provider ends on 30 June 2021. ARIC members will be welcome to attend the Tender Evaluation Committee meetings as observers once dates have been finalised.
18. The Corporate Services Management Report presented to the Executive Team on 16 February 2021 was included for information purposes only.

1. Acknowledgment of Traditional Land Owners

The Chair acknowledged the traditional owners of the land of Parramatta.

2. Meeting Opening and Apologies

Nil

3. Declarations of Interest

There were no declarations of interest made at this meeting.

4. Minutes of Meetings held on 26 November 2020

The minutes of the 26 November 2020 were confirmed.

5. ARIC Annual Report

ARIC noted the tabled ARIC Annual Report 2020.

6. Matters Arising and Action Items from Minutes

ARIC provided their feedback on pending actions.

Action 40(a) & 41 – ICT Status Update

It was confirmed that CoP's Coordinator Internal Audit will be reviewing all ICT's long-term outstanding action items that have been recently closed to confirm that their closure was appropriate. This review will be provided to the ARIC at their meeting in May 2021.

Action 42 – IOSS Investigation – Code of Conduct

The CEO will brief the IOSS chair offline in a separate meeting.

Action 45 – Finance Committee / Quarterly Projection Reports

The attachment 4 was difficult to understand and Attachment 5 was not up to date.

Working with Children Check

Currently, Working with Children checks are maintained manually. An automated system through the HR system solutions will be implemented in the near future.

ARIC would like all the pending ICT action items be presented at May meeting. The Committee would like to finalise the action items before 4 August 2021 when Council goes into caretaker mode prior to the Council elections in September.

Recommendation:

1. The action items report should include owner of the action and the review dates of the action item.

Actions:

1. Mark Rugless, Head of IT, to provide ARIC with a briefing on the Cyber Security work program timeframe
2. Attachment 5 – Extreme and Significant Outstanding Audit Actions - to be updated and presented to ARIC at the next meeting.

7. Update on Parramatta Square

ARIC accepted and noted the report on Parramatta Square Projects.

Bryan Hynes presented an update on the status of the Parramatta Square project, with the following highlights:

3PS

- In Nov 2020, NAB issues an EOI to sub lease 5 floors (L9-13) with a total NLA of 14,500 sqm until 30 April 2032.

5PS

- A number of in-ground latent conditions have led to delays and additional costs.
- Delay circa 8 weeks. Current completion date still within strategic timeline of April 2022. Delay and costs agreed with Contractor.

- Current Contingency of \$2.6m remaining on project. The expectation is that further expenditure will be required to address finalisation of Security and Audio Visual design over and above current forecast.
- Basement structure in complete and above ground concrete structure works in progress. The full concrete structure and steel work will be completed by end of May 2021.
- A Councillor Advisory Group has been established to facilitate real time councillor feedback on developing design and business readiness planning.

6 & 8PS

- Construction of the 6 & 8PS basement car park is nearing completion.
- Concrete pour is up to L33 of the western core and the floor slab is up to L28.
- Installation of the façade panels is complete up to L17 and has commenced up to L21.

Public Domain

- 5PS forecourt / Digital Carpet concept currently being developed further. Media Architect has completed peer review of current scheme. A re-visioning workshop has been completed and updated concepts are being finalised ahead of a presentation to the 5/7 Parramatta Square Advisory Group.

Parramatta Square Risks – Extreme Significant

- Sydney Water have informed Council of an alleged breach of the 2007 Interface Agreement as a result of changes made to the traffic control plans, by Walkers' contractors
- 5PS interior is not confirmed in timely manner which will not allow it to be captured as part of builders contract

Aquatic and Leisure Centre Status

- Workshops organised for the Councillors and feedback will be compiled and recommendation to be presented at the Council meeting on 22 March 2021.
- Subject to Council's approval the project will commence on site in April. The project will remain on track to deliver in accordance with the program in Q2 2023.

8. Update on MPAC Activities

Gavin Zimmerle, ZSI Pty Ltd, Interim Chair of MPAC provided an update on MPAC Activities.

- Michael Filo has resigned as the MPAC Chair. The completion of Michael's term coincided with the review of MPAC Charter. MPAC is in the process of appointing a third member as per its Charter.
- MPAC has reviewed the tender process for the Aquatic and Leisure Centre and agrees with the choice of the preferred tenderer. MPAC believes Council conducted a fair process and will get reasonable value of money for the construction cost.
- MPAC had their quarterly meeting on 22 Feb 2021 where Council was presented with a detailed report on Parramatta Square Projects.

9. Annual Statistical Reporting

Elizabeth Renneberg (IOSS) gave a brief overview of Annual Statistical Reporting. Elizabeth explained that the Referrals were a combination of matters that are referred directly to Council or via the IOSS where:

- ICAC Referral to Council: matters that ICAC deemed were not serious or systemic in nature were not investigated These were referred back to Council to undertake an appropriate action that the Council thinks is fit.
- ICAC Section 11 Notification: allegations received directly by Council and referred to ICAC by the CEO (as required by the ICAC Act)
- Code of Conduct Referral to OLG: matters referred to the Office of Local Government such a pecuniary interest matters or other alleged breaches which could impact the integrity of the Code.
- Request to Lodge a Complaint is a Customer Service category that allows the public to lodge a complaint, which is then forwarded it to the relevant Council department for resolution.

ARIC discussed the complaints about Waste Contractors.

Actions:

3. Customer Service to review bundling of the two categories of Complaints – Request for an Internal Review & Request to Lodge a Complaint as it distracts the process of status of complaints and provide a response to ARIC.
4. Waste Services Team to explain ARIC
 - a. Are the number of Waste Contractor complaints are within the benchmark and industry tolerance?
 - b. Provide general briefing about performance of Waste Contractor and Council KPI's.

10. Internal Ombudsman Shared Service

ARIC received and noted the quarterly report from the IOSS.

Elizabeth Renneberg (IOSS) updated the Committee with the activities of IOSS.

- The split of activities for CoP by has remained largely consistent compared with previous quarters during the past calendar year. The highest monthly percentage of investigations as a percentage of total IOSS activities was during the months of Feb-April 2020 with 72% and the lowest was during the months of Nov – Dec 2020 with 51%.
- In terms of utilisation of services City of Parramatta has increased its use of the IOSS services to 27%, which is 2% higher than when last reported in November 2020.
- Since the last ARIC meeting, IOSS has brought a temporary Strategic Officer on board to assist with policy schedule reviews.
- In mid-February, IOSS held a shared governance and risk forum across the 3 Councils and is also commencing a forum relating to HR and IR in early April.
- Training was provided to Council's public interest disclosure officers who have obligations and responsibilities under the Public Interest Disclosure Act.
- A program is underway to explain the services of IOSS and the Public Interest Disclosure policy.

11. Update on James Hardie Legacy Program

The James Hardie Legacy Sites status update was taken as read.

12. Monthly Finance Report YTD December 2020

The Committee noted the Financial Performance Report YTD December 2020.

Michael Tzimoulas and Paul Perrett highlighted the key points:

- The revenue has been impacted by a drop in usage of the multilevel car parks due to COVID-19 pandemic but they are expected to improve in this year.
- Council's rate of return on investments have improved as equity markets return slowly.
- There are delays in costs such as maintenance costs.
- Council is forecasting an unrestricted cash deficit in line with full year budget.
- Finance Team is in the process of drafting the budget for 2021/22. There is a forecast of a decline in revenue affecting the cash position, and an increase in depreciation which will negatively impact Council's ability to budget a surplus in 2021-22.

13. Update from Audit Office

The Committee noted the Annual Engagement Plan from the Audit Office for the financial audit of Council's financial statements for the year ending 30 June 2021.

Nathan Carter provided a brief overview of the report. The scope and key issues in the engagement plan are:

- the audit of:
 - general purpose financial report;
 - special purpose financial statements; and
 - special schedule permissible income for general rates
- Revaluation of Infrastructure property, plan, and equipment (IPPE) – bridges and other structures;
- The assessment of issues and risks relating to major CAPEX projects such as Parramatta Square and Parramatta Light Rail will be the focus of Audit attention.
- Revenues and Leases standards.

Section 5 of the plan sets out the Audit timetable that was developed in conjunction with management and the ARIC meeting schedule.

It was noted that bridges and other structures are approximately 20% of the total IPPE class.

14. Report of Internal Audit Activities

Mark Griffiths updated the Committee on Internal Audit Activities.

The following internal audits are currently work in progress:

- Complaints Management – A draft report was provided to management on 15 February 2021.
- Voluntary Planning Agreements – Commenced in late September and currently awaiting key documentation from CoP Planning Department.
- Procurement and Contract Management (Trade and Facilities, Cleansing) – Commenced late January 2020. Interviews completed. Awaiting upon transaction data from Finance to undertake data analytics.
- Key Financial System Controls - Commenced late January 2020 with an expanded scope covering 5 key areas. Interviews all complete and detailed testing in progress. On track for completion by the end of Feb.

The Committee was updated on the outstanding external audit management letter recommendations. Council anticipates that most of these actions are complete but are waiting on confirmation from the Audit Office once the 2021/22 audit commences.

Recommendation:

Action Items and attachments related to the same be reported together.

15. Enterprise Risk Management Update

Bruce Ferguson updated the Committee that both Executive Team and wider Leadership team are engaged regularly to revisit and update the Strategic Risk Register, as well as Operational Risk Registers at the Business Unit Level.

16. Provision of Internal Audit Services by an External Provider

ARIC will be welcome to attend the Tender Evaluation Committee meetings as observers once dates have been finalised.

17. General Business

The Committee noted the tabled report from Corporate Services.

The Committee appreciated the report and highlighted extension of MyCareer mid-year performance reviews and overdue mandatory training.

Michael Tzimoulas provided the reasons due to which the Performance Reviews were extended and training were not completed focussing on completing both 100%. The Committee was satisfied with the response.

Next Meeting: 25 May 2021

Meeting Closed: 8:07pm

FAIR

ITEM NUMBER	12.2
SUBJECT	FOR APPROVAL: Council Policies for Adoption
REFERENCE	F2021/00521 - D07779097
REPORT OF	Governance Manager

PURPOSE:

The purpose of this report is to seek Council approval to adopt a range of policies that have recently been reviewed and considered by the Policy Advisory Committee.

RECOMMENDATION

That Council approve the following policies:

- Governance Framework (at Attachment 1);
- Fraud and Corruption Prevention Policy (at Attachment 2);
- Complaints Handling Policy (at Attachment 3);
- Gifts and Benefits Policy (at Attachment 4);
- Affixing the Council Seal Policy (at Attachment 5);
- Webcasting Policy (at Attachment 6);
- Business Ethics Policy (at Attachment 7);
- Public Interest Disclosures (at Attachment 8);
- Councillors Workshop & Briefing Policy (at Attachment 9);
- Legislative Compliance Policy (at Attachment 10).

BACKGROUND

1. Council, at its meeting of 27 February 2021, resolved to establish a Policy Advisory Committee (PAC) to review all or any associated policies of the Council. The policies that were listed for consideration at the Council Meeting of 22 February 2021 include:
 - Governance Framework;
 - Complaints Handling Policy;
 - Fraud & Corruption Prevention Policy;
 - Gifts and Benefits Policy;
 - Interaction between Councillors and Staff Policy;
 - Public Interest Disclosures Policy; and
 - Statement of Business Ethics.
2. The Webcasting Policy and Affixing the Council Seal Policy were reported to Council on 30 November 2020. Councillors requested further information and provided feedback at that Council Meeting and the policies were referred to the PAC for further consideration and recommendation for approval.

ISSUES/OPTIONS/CONSEQUENCES

3. The PAC has met on three occasions to review various policies. These meetings took place on 16 March, 22 April 2021 and 31 May 2021. The policies that were the subject of review at those meetings were:

Date	Policy
16 March 2021	Governance Framework

	Complaints Handling Policy Fraud & Corruption Prevention Policy Gifts and Benefits Policy
22 April 2021	Interaction between Councillors & Staff Policy Public Interest Disclosures Policy Business Ethics Policy Councillor Workshop & Briefing Policy Affixing the Council Seal Policy Webcasting Policy
31 May 2021	Public Interest Disclosures Policy Councillors Workshop & Briefing Policy Interaction between Councillor and Staff Policy Legislative Compliance Policy Councillor Facilities and Expenses Policy

4. The PAC have confirmed the following policies are ready for Council consideration and approval. A summary of the recommended policies and their changes are set out below:

Governance Framework

5. The Governance Framework has been revised to include the following:
- Update to the definition of good governance;
 - Removal of repetition details under Introduction and Governance Framework;
 - Update of management and oversight to align with Council's current organisation structure;
 - Clarification of decision making roles;
 - Inclusion of IOSS, ARIC and an updated list of Committees;
 - Strengthening of the ethical framework documentation;
 - Inclusion of remuneration for Councillors into the Governance Framework;
 - General formatting, grammatical and editing amendments, including layout of document, capitalization of Councillors, Council and Code.
6. A copy of the Governance Framework can be found at Attachment 1.

Complaints Handling Policy

7. The Complaints Handling Policy has been revised to include the following:
- Removal of repetition clauses and clarification provided under policy purpose;
 - Addition of provision of sufficient information and privacy concerns to align with privacy practices;
 - Clarification of what is a complaint;
 - Clarification of what is not a complaint;
 - Consistency applied to how Tier 1, Tier 2 and Tier 3 complaints will be managed;
 - Addition of provisions on how complaints involving children will be managed;
 - Inclusion of the IOSS to manage unreasonable complainant conduct;
 - General formatting, grammatical and editing amendments, including layout of document, capitalization of Councillors, Council and Code.

8. A copy of the Complaints Handling Policy can be found at Attachment 2.

Fraud & Corruption Prevention Policy

9. The Fraud & Corruption Prevention Policy has been revised to include the following:
- Strengthening of the policy purpose to demonstrate Council's commitment to zero tolerance on fraud and corrupt behaviour;
 - Update provided on how and who reports are to be made;
 - Addition of IOSS as PID Coordinator and Code of Conduct Complaints Coordinator;
 - Inclusion of relevant training provided to Councillors and staff;
 - Update to related documents and definitions;
 - General formatting, grammatical and editing amendments, including layout of document, capitalization of Councillors, Council and Code.
10. A copy of the Fraud & Corruption Prevention Policy can be found at Attachment 3.

Gifts and Benefits Policy

11. The Gifts and Benefits Policy has been revised to include the following:
- Update on how Council defines Council officials;
 - Inclusion of Code of Conduct on the basis for standards of expected behaviour;
 - Policy updated to align with the Code;
 - Inclusion of additional statement regarding gifts from suppliers, customers, etc to clarify perception of gifts in these circumstances;
 - Token value of gifts increased from \$50 to \$100 to align with the Code of Conduct;
 - Reference to include local clubs and changes to order of paragraphs on official ceremonial gifts and goodwill to align with the Code;
 - General formatting, grammatical and editing amendments, including layout of document, capitalization of Councillors, Council and Code.
12. A copy of the Gifts and Benefits Policy can be found at Attachment 4.

Affixing the Council Seal Policy (New Policy)

13. The Affixing the Council Seal Policy is reflective of clause 400 in the *Local Government (General) Regulation 2005*. This clause sets out:
- 13.1. That the Council Seal must be kept by the Lord Mayor or the Chief Executive Officer.
- 13.2. That the Council Seal may be affixed to a document only in the presence of
- (a) the Lord Mayor and the Chief Executive Officer, or
 - (b) at least one councillor (other than the Lord Mayor) and the Chief Executive Officer, or
 - (c) the Lord Mayor and at least one other councillor, or
 - (d) at least 2 councillors other than the Lord Mayor.

- 13.3. The affixing of the Council Seal to a document has no effect unless the persons who were present when the Council Seal was affixed (being persons referred to in clause 8.2) attest by their signatures that the Council Seal was affixed in their presence.
- 13.4. The Council Seal must not be affixed to a document unless the document relates to the business of Council and Council has resolved (by resolution specifically referring to the document) that the Council Seal be so affixed.
- 13.5. For the purposes of clause 8.4, a document in the nature of a reference or certificate of service for an employee of Council does not relate to the business of Council.
14. The adoption of an Affixing the Council Seal Policy provides a basis for Council and staff to remain legislatively compliant and aware of who and in what circumstances the Council Seal can be used.
15. A copy of the Affixing the Council Seal Policy can be found at Attachment 5.

Webcasting Policy (New Policy)

16. The Webcasting Policy is reflective of the Model Code of Meeting Practice 2018 mandatory provision that Council Meetings and any other Committee of Council which consists only of Councillors be webcast to the public and available on Council's website for a minimum of twelve (12) months.
17. The Webcasting Policy includes feedback from Councillors to provide that recordings of Council Meetings be made available for a minimum of two (2) years, but for the term of Council.
18. The Webcasting Policy ensures that Council is aware of its obligations to webcast these meetings and provides clear instruction on how this will occur, allowing Council and Council staff to remain compliant with this legislative requirement.
19. In the absence of a Webcasting Policy, it can be unclear for both staff and the public on which meetings webcasting is applicable and how recordings of such meetings will be made available.
20. At the Council Meeting of 30 November 2020, Councillors requested the following additional information which is provided below:
- a. Financial and technical implications of making Council meeting webcasts available on the website to the public;
 - b. Advice on how members of the public can receive webcasts that are not available on the website; and
 - c. The number of views that Council meeting webcasts have received over the last 24 months.

Financial and Technical Implications

21. Council has engaged an external provider (InterStream) to provide the equipment, store and manage webcasts of Council Meetings at a cost of \$31,585 per annum. This cost includes equipment hire and cloud based

storage of Council (and LPP) meeting webcasts. The terms of the agreement to supply webcasting hosting services include:

- a. Retention of webcasting recordings for up to four (4) years or as requested (from the date of the respective Council Meeting recording) (which is aligned to Council's policy);
 - b. A month to month basis;
 - c. The external provider to host the media (estimated up to 300GB/month);
 - d. The archived data storage infrastructure resides within Australia.
22. The cost is currently provided for within Council's existing operational budget. Webcasts of Council meetings are currently available from this website from 2017 to date.
23. An average size of the webcast files can be found in the table below:

Date / Year	# of Files	Total Size	Average Size
2017	22	6.9gb	330mb
2018	24	11.7gb	488mb
2019	29	10.9gb	379mb
2020	22	13.1gb	599mb

State Records Act 1998

24. The Guideline released by the Office of Local Government provides a 12 month minimum period for Councils to make available webcasts of Council Meetings on the website, to provide a consistent approach across the industry.
25. The draft Policy refers to the timing of webcasts being made available on Council's website. It does not refer to the retention of records under the State Records Act 1998 (State Records Act).
26. The retention of webcast recordings of Council and Committee meetings are captured by the State Records Act 1998 (State Records Act) which identifies webcast recordings as a '*record relating to administrative arrangements for meetings*' which allows Councils to retain webcast recordings until their administrative or reference use ceases. After this time, the record may be disposed.
27. Although the State Records Act does not prohibit Council's from disposing the webcast of Council Meetings, Council does not dispose of the record and will retain the record for a further five (5) years.

Public access to Council Meeting webcasts that are removed from the website

28. Council information, including webcasts of Council Meetings, can be made available under the Government Information (Public Access) Act 1993 (GIPA Act). In accordance with the GIPA Act, webcasts of Council Meetings may be provided under proactive release free of charge, following the normal GIPA application processes.

History of Council Meeting Webcast Views

29. The table below outlines statistical information on views of Council Meeting webcasts from May 2018 to November 2020:

	# of Views 18/19	# Council Meetings during period	Avg Time 18/19	Avg Views per webcast recording	# of Views 19/20	# Council Meetings during period	Avg Time 19/20	Avg Views per webcast recording	# of Views 20/21 YTD	# Council Meetings during period	Avg Time 20/21	Avg Views per webcast recording
Real time Council page views (ie, tune in on Monday evening)	3,950	31	2 mins 09	127	3,495	23	4 mins 57	152	1,806	12	5 mins 50	151
Archive views driven by Facebook	24		3 mins	1	27		0 mins 37	1	148		1 min 27	12
Archive views where user went directly to website to view	4,316		2 mins 27	139	1,888		2 mins 25	82	971		1 min 52	81
Archive views where user has found the content via Google Search	119		1 min 02	4	65		2 mins 09	3	36		4 mins 29	3
Total Views	8,409				5,475				2,961			

The above figures cannot differentiate between public or staff access to Council Meeting webcasts

Notes:

- Real Time Council page views = represents the total number of views of live streamed Council Meeting webcasts on a **Monday** night.
- Archive views driven by Facebook = represents views of the Council webcast attributable to Facebook promotion of Council Meetings. Most have low view times as the user may not have found what they were looking for.
- Archive views where user went directly to website to view = represents views of Council Meeting archived webcasts that people have navigated to on their own (not driven by promotion).
- Archive views where user has found the content via Google search = represents views of Council Meeting archived webcasts that people have come to via a Google search.

30. A copy of the Webcasting Policy can be found at Attachment 6.

Business Ethics Policy

31. The Business Ethics Policy has been revised to include the following:
- Inclusion of key business principles;
 - Updated to provide clear expectations to those businesses who work with Council;
 - Minor administrative updates to outline clear consequences of non-compliance;
 - Updated with current contact information;
 - Updated to reference sponsorships will be undertaken in accordance with Council's adopted Sponsorship and Donations Policy;
 - Updated to provide specific contact details of Council's public officer;
 - General formatting, grammatical and editing amendments, including layout of document, capitalization of Councillors, Council and Code.
32. The PAC recommended the name be changed to reflect a Policy.
33. A copy of the Business Ethics Policy can be found at Attachment 7.

Public Interest Disclosures Policy

34. The Public Interest Disclosures Policy has been revised to include the following:
- The Parramatta LPP, ARIC and other advisory committees;
 - Strengthened Council's commitment to zero tolerance on fraud and corrupt behaviour;
 - Council's support and encouragement for staff to report wrongdoings and outline the protections of the PID Act;
 - Clarity on what can be reported under the PID Act;
 - Clarity on what may be seen as a breach of the GIPA Act;
 - Clarity on the protections provided to disclosures made under the PID Act;
 - The current roles of key persons within Council responsible for PID;
 - When acknowledgements of PID disclosures will be made;
 - Current organisation structure
 - All relevant investigating authorities;
 - When acknowledgements of PID disclosures will be made;
 - General formatting, grammatical and editing amendments, including layout of document, capitalization of Councillors, Council and Code.
35. A copy of the Public Interest Disclosures Policy can be found at Attachment 8.

Councillors Workshop & Briefing Policy

36. The Councillors Workshop & Briefing Policy has been revised to include the following:
- Provisions on respect;
 - Provisions for declaring conflicts of interests;
 - Provisions for Chairing Workshops and Briefings;
 - Minimum number of Councillors for a quorum;
 - Provisions for remote attendance;
 - Provisions for catering;
 - Streamlined / simplified procedure on calling Workshops and Briefings.
37. A copy of the Councillors Workshop & Briefing Policy can be found at Attachment 9.

Legislative Compliance Policy

38. The Legislative Compliance Policy is a new policy that has been developed in response to the NSW Audit Office final management letter of 30 June 2018. The requirement for a policy was further reinforced by the Internal Audit Report – Legislative and Regulatory Compliance Report (May 2019) which stated:

"There is an absence of a formal Compliance Policy and Framework that document and guide Department Managers and their staff; with regard to the Council's expectations in the management of compliance obligations; this is despite the fact that Legislative and Regulatory Compliance is acknowledged as a Key Strategic Risk."

39. The report went on to recommend:

“R1. In line with better practice, a Compliance Policy and Framework document should be formalised and adopted by Council.”

40. The Policy has been developed to set in place Council’s commitment to a culture of compliance in line with the principles based on the Australian Standards AS/ISO 19600: 2015 Compliance Management Systems – Guidelines and Council’s Governance Framework.
41. A copy of the Legislative Compliance Policy can be found at Attachment 10.
42. Further reviews are being undertaken of the remaining policies listed above, and they will be presented to Council for consideration and approval prior to the end of the Council term.
43. Various Council business units are continuing to review and update policies and these policies will be brought to the PAC for consideration and recommendation to Council for approval in due course.

CONSULTATION & TIMING

Stakeholder Consultation

44. The following stakeholder consultation has been undertaken in relation to this matter:

Date	Stakeholder	Stakeholder Comment	Council Officer Response	Responsibility
21 May 2020 and 25 June 2020	In-house Legal	Minor drafting and comments provided for both policies	Drafting and comments addressed in final versions	Governance
	Communications Team	No changes received	N/A	Governance
3 September 2020	Leadership Team	Questions on ICT role in webcasting requirements and implications of webcasting policy on current committees were asked.	Questions were answered.	Governance
21 September 2020	Executive Team	Approval received from all ET	N/A	Governance

Councillor Consultation

45. The following Councillor consultation has been undertaken in relation to this matter:

Date	Councillor	Councillor Comment	Council Officer Response	Responsibility
30 November 2020	Council meeting feedback	Increase retention of webcasts of Council Meetings to a minimum of two	Incorporated into the Webcasting Policy	Governance

16 March 2021	from Councillors Policy Advisory Committee Meeting	(2) years, but for the term of Council Feedback on the various policies provided for report back to the next meeting	Comments and amendments have been incorporated into the policies	Governance
22 April 2021	Policy Advisory Committee Meeting	Feedback on the various policies provided and policies now recommended to be reported to Council for approval	Noted	Governance
31 May 2021	Policy Advisory Committee Meeting	Feedback on the various policies provided and policies now recommended to be reported to Council for approval	Noted	Governance

FINANCIAL IMPLICATION FOR COUNCIL

46. There are no financial implications for Council to approve new policies.

1. The Governance Framework

1.1. Governance Defined

Purpose

This Governance Framework has been prepared to ensure our compliance with all relevant legislation including the *Local Government Act 1993 (the Act)* and the pursuit of best practice as a democratic local government.

This Framework is an overview of the Governance program that has been put in place so that Council officials can meet their Governance responsibilities. It also enables our community and stakeholders to have an understanding of the Governance Framework and demonstrates how all people associated with City of Parramatta Council (Council) can participate.

What is Governance?

Governance is the act of governing. It encompasses all the relevant legislation, regulations, policies, procedures, guidance, systems, rules and processes for making and implementing decisions, that define expectations, delegates and grants powers or outlines expectations of performance. Governance is how Council ensures and enhances good Governance principles throughout our organisation, in order to maintain the trust and confidence of the community.

What is good Governance?

Good Governance relates to processes and behaviours essential for Council to achieve its intended purpose, and conforms by complying with all relevant laws, codes and directions while meeting community expectations of probity, accountability and transparency.

It impacts on all sectors of our community and the practice of good Governance is considered critical in ensuring that:

- Council meets its ethical and legal obligations
- Council establishes and maintains confidence and trust in carrying out its functions
- Council makes decisions that are consultative and are in the best interests of all stakeholders
- Council provides transparency and accountability for all its actions
- Council reviews and improves the services provided to the community.

It is defined by the following principles:

Good Governance is accountable:

Accountability is vital. Council has an obligation to report, explain and be answerable for the consequences of decisions we have made on behalf of our community.

Good Governance is transparent:

The Community and stakeholders should be able to follow and understand our decision-making process. This means they will be able to clearly see how and why a decision was made, what information, advice and consultation Council considered, and which legislative requirements (when relevant) Council followed.

Good Governance follows the rule of law:

This means that decisions are consistent with relevant legislation or common law and are within the powers of Council.

Good Governance is responsive

Council should always try to serve the needs of the entire community while balancing conflicting interests in an appropriate, timely and responsive manner.

Good Governance is equitable and inclusive

Our community's wellbeing derives from the community's satisfaction that Council has considered their interests in the decision-making process. This means that all groups, particularly the most vulnerable, should have opportunities to participate in the process.

Good Governance is effective, efficient and sustainable

Council should implement decisions and follow processes that make the best use of available staff, resources and time, to ensure the best possible results for our community.

Good Governance is participatory

Anyone affected by or interested in a decision, should have an opportunity to participate in the process for making that decision, whether this is by being provided with information, or consultation to provide them with opportunity to give their opinion or recommendations.

Why is good Governance important to the Council?

- It underpins the confidence that the community has in Council and its services
- It affects the quality of our outputs – goods, services and programs
- It is a value adding activity in that it affects the effectiveness and efficiency of goods, services, and programs
- It ensures that the Council meets its legislative responsibilities
- It is a strong reminder to the Council that it is ultimately accountable to the community it serves

Good Governance must be accompanied by a good Governance culture therefore making it necessary that the attitudes, values, beliefs and behaviours of Council's Leaders must support good Governance. This will result in the Council, the Chief Executive Officer, Employees and the Community being confident that our organisation is being run efficiently, is sustainable and is carrying out the objectives, policies and plans of Council.

1.2 Introduction

Local governments are experiencing increasing scrutiny of their operations and activities, creating a need for full and open disclosure of their Governance systems. We must consider the principles of key stakeholder rights, risk management, corporate reporting and disclosure to develop suitable Governance frameworks that ensure effective, transparent and sustainable administration of the Council's affairs.

The Audit Office of NSW Governance Framework

The Audit Office of NSW provides a strong framework which Council has chosen to adopt as its framework. The framework is set across 8 key principles and 17 components that underpins Good Governance and promotes public confidence.

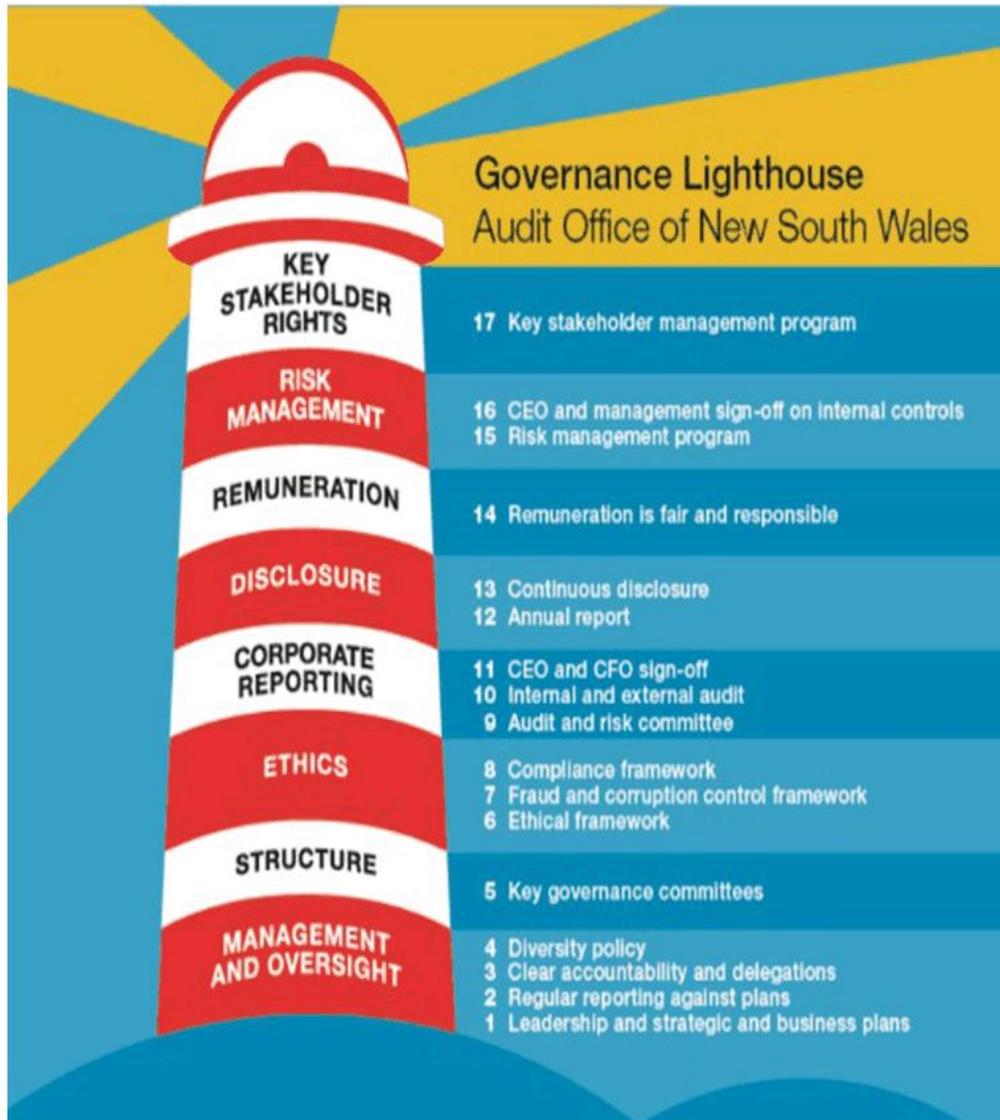

Figure 1

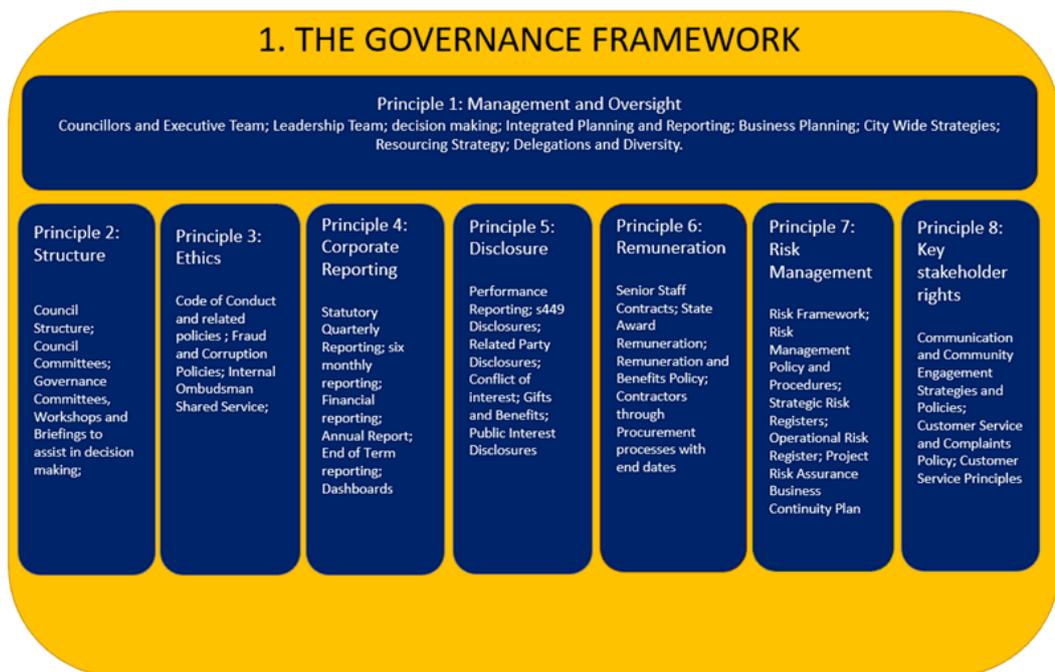

Governance Lighthouse - Audit Office of New South Wales

2. Our Governance Framework in Action

Council is a dynamic organisation providing many different services to residents of the Parramatta Local Government Area. It is important to view our day to day activities through the lens of good Governance by recognising different activities, policies, procedures and frameworks provide opportunity to demonstrate strong Governance and leadership in facilitating good decision making and management.

Governance should be recognised through the implementation of processes and procedures that demonstrate transparency and accountability. Governance is accompanied by a good Governance culture whereby attitudes, values, beliefs and behaviours of leaders must set the standard and be reflected in roles and responsibilities.

Council's Governance Framework is summarised in Figure 2 below:

2.1. Our Culture and Corporate Values

Good Governance is reflected in the values and behaviours of Council. Our corporate values guide our behaviours. All staff are encouraged to keep these values "front of mind" in all dealings with our customers, partners and their fellow workers.

Our Values	Our Behaviour
Integrity	We deliver on promises We act ethically We take responsibility for our actions and speak up respectfully
Customer Focus	We communicate openly with our customers We are responsive to customer needs and create new relationships as our City grows
Teamwork	We support the roles of leadership We collaborate within and across our teams We build effective partnerships with colleagues and our community to achieve our goals
Innovation	We build on our strengths We champion creative solutions We seek new and sustainable ways to deliver superior outcomes

2.2. City of Parramatta Governance Framework

Council's Governance Framework aims to provide proper and democratic government, to the residents, ratepayers, commercial, business, visitors and workers who interact with our Local Government Area.

The benefits to the organisation that derive from a robust Governance framework in local government includes:

- Providing clear guidelines for the role of the Council, Councillors and the CEO (General Manager), ensuring that all responsibilities are properly allocated and performance expectations are understood
- Assisting Council and the CEO (General Manager) in delivering good Governance
- Ensuring Council's legislative compliance obligations are met
- Setting robust and clear delegations
- Influencing processes that set clear guidelines for planning at all levels
- Acting as a point of reference for disputes
- Providing a guide for inductions for newly elected members and employees.

The Framework provides guidance on processes associated with decision making by which the City is directed, controlled and held to account. For the organisation to demonstrate good Governance, there needs to be a clear understanding about responsibility and accountability.

Principle 1: Management and Oversight

Leadership

Council is governed by fifteen (15) Councillors, including the Lord Mayor that represent the various wards of the Council. Currently, Council is divided into five (5) wards being Dundas, Epping, North Rocks, Parramatta and Rosehill. The role of the Lord Mayor is prescribed in Section 226 of the NSW Local Government Act 1993 (the Act). The Lord Mayor is elected by his / her peers and serves for a period of two (2) years. The role of the Councillors is prescribed in Section 232 of the Act and Councillors hold office for a period of four (4) years.

Section 335 of the Act recognises the functions and role of the General Manager. Within the City of Parramatta Council, the General Manager is known as the Chief Executive Officer (CEO). The CEO is employed under a performance based contract over an agreed period which ranges between 1 – 5 years. Other Senior Roles within Council are also subject to performance based contracts including the Executive Director, City Engagement and Experience, Executive Director, City Assets & Operations, Executive Director, Corporate Services, Executive Director, Community Services, Executive Director, Property & Place and Executive Director, City Planning & Design. These positions make up the Executive Team.

The principles of Section 8 of the Act provide guidance "to enable councils to carry out their functions in a way that facilitates local communities that are strong, healthy and prosperous".

As provided in the Act, the Guiding Principles for Councils are as follows:

1. Exercise of General Functions
 - a) Councils should provide strong and effective representation, leadership, planning and decision making,
 - b) Council should carry out functions in a way that provides the best possible value for residents and ratepayers,
 - c) Councils should plan strategically, using the integrated planning and reporting framework, for the provision of effective and efficient services and regulation to meet the diverse needs of the local community,
 - d) Councils should apply the integrated planning and reporting framework in carrying out their functions so as to achieve desired outcomes and continuous improvements,
 - e) Council should work co-operatively with other councils and the State Government to achieve desired outcomes for the local community.
 - f) Councils should manage lands and other assets so that current and future local community needs can be met in an affordable way
 - g) Councils should work with others to secure appropriate services for local community needs,
 - h) Councils should act fairly, ethically and without bias in the interests of the local community.
 - i) Councils should be responsible employers and provide a consultative and supportive working environment for staff.
2. Decision – making
 - a) Councils should engage in good decision making, with fair and reasonable decisions, in accordance with relevant legislation;
 - b) Councils should consider natural justice and procedural fairness principles;
 - c) Council decision-making should be transparent and decision-makers are to be accountable for decision and omissions;

- d) Councils should recognise the range of relevant stakeholders and the diverse local community needs and interests;
- e) Councils should consider social justice principles;
- f) Councils should consider the long term and cumulative effects of actions on future generations;
- g) Councils should consider the principles of ecologically sustainable development.

3. Community Participation

Councils should actively engage with their local communities, through a diverse range of engagement strategies and the use of the integrated planning and reporting framework which requires all NSW Councils to develop a Community Participation or Engagement Strategy.

Strategic and business plans

Council implements the Management and Oversight Governance Principle through its various plans, policies and delegations.

The main suite of strategic planning is included within the Integrated Planning and Reporting Framework. This legislated framework is designed to bring long term financial sustainability, asset management, community engagement and organisational planning together to better inform decision making and achieve the Community's desired outcomes.

The Community Strategic Plan is the highest strategic plan, developed by Council on behalf of the Community and its stakeholders. In response to the Community Strategic Plan, Council implements a Delivery Program and Operational Plan that aligns with all programs, projects and services to meet the needs identified by the Community.

Council's Delivery Program is supported by the Resourcing Strategy. It is through the Delivery Program that we identify those activities Council is responsible for. The Resourcing Strategy includes the Long Term Financial Plan, Asset Management Strategy, Information Technology (IT) Strategy and Workforce Strategy.

Council also has a number of other Plans and Strategies used to assist in the decision making process of Council including the Community Engagement Strategy, Culture and our City, Disability Inclusion Action Plan, Economic Development Plan, Environmental Sustainability Strategy, Reconciliation Action Plan, Socially Sustainable Parramatta Framework, Transport Planning, Parramatta Bike Plan, Parramatta Ways Walking Strategy and Integrated Transport Plan. Copies of all documents are provided on Council's Website.

Council endorses the Community Strategic Plan on behalf of the community and adopts the Delivery Program and Operational Plan. The CEO, Executive Team and Leadership Team are responsible for the implementation of the programs, projects and services within these Plans and are accountable to the Council and the Community.

Business Units are responsible for addressing resourcing requirement for the Operational Plan reflected in their Business Plans and staff work plans to ensure that projects, services, activities and programs are completed within agreed timeframes and budget.

Regular reporting against plans

Council conducts regular reporting on the performance of its plans which are public documents and available on the Council Website. Reporting includes quarterly reporting against the Budget and Operational Plan, six monthly reporting against the Delivery Program and the Annual Report which summarises both operational and statutory activities on a yearly basis. Further to this, at the end of each term of Council, the End of Term Report is tabled at the last meeting of the outgoing Council reporting on the outcomes of the Community Strategic Plan. Other than the Annual Report, all other Reporting documents are resolved by the elected Council and are publicly available. Further, the CEO and Executive Team undergo performance reviews and there is a clear division of responsibilities

between the CEO and the Elected Council.

Clear accountability and delegations

Council has many powers and duties which are governed by legislation. Council's Delegation Policy provides the principles by which delegations from the Council and CEO will be determined and enacted. These are exercised within the framework of legislation, policy and procedures. The policy is supported by the delegations register.

As outlined in the Delegations Policy, Council will delegate to the CEO those functions and powers it deems fit in accordance with Part 3, Section 377 of the Act. In turn the CEO then delegates to specified positions to undertake various duties and exercise powers in accordance with legislation. The Delegation of Authority is the mechanism by which Council enables officers to act on its behalf. The delegations register is reviewed within 12 months of every Local Government Election in accordance with s380 of the Act.

Council separates its regulatory and planning functions appropriately between the Corporate Services Directorate, City Assets & Operations Directorate and City Planning & Design Directorate.

Equal Employment Opportunity Policy

In accordance with s333 of the Act, Council must review the organisational structure within its first 12 months in office. Following the review, the organisational structure is adopted in accordance with legislative requirements, which then guides the roles and responsibilities across the organisation.

Council has a robust induction and on boarding framework that assists new starters transitioning into working with Council with a focus on standard operating policies, procedures and general knowledge areas.

Staff are provided with ongoing education and training opportunities to support their role in Council. Council also offers career development and performance management through its MyCareer performance management system.

Council has an Equal Employment Opportunity Policy and diversity is considered and reflected in all recruitment and selection processes amongst other areas of Council's business. Council employs a Diversity and Inclusion Consultant within the Human Resources Team who reports directly to the Chief People & Culture Officer.

Principle 2: Structure and Key Governance Committees

Council implements the structure Governance principle through its various meetings and decision making forums including Council Meetings, Committee Meetings, Workshops and Briefings.

As elected members, Councillors attend Council Meetings twice monthly with a set agenda and business paper. The management of the Council meetings is dictated by a Code of Meeting Practice which is reviewed, exhibited to the community and adopted by Council. The current Code provides guidelines on the meeting processes and rules for Council.

Council is also a member of the Internal Ombudsman Shared Service (IOSS), along with Cumberland and Inner West Councils. The IOSS provides residents, community members, ratepayers, local businesses, Council officials and other Council stakeholders with an "independent ear" regarding complaints about administrative conduct, unethical behaviour by Council, corrupt conduct, misconduct or maladministration. The service also assists Council with policy development and review and training in relation to good governance and administrative conduct.

Council facilitates a number of internal committees and Councillors are members of a number of internal and external committees (outlined below). All Committees have well-defined and clear terms of reference with identified Chairs who are independent of management. All Committees have detailed meeting procedures including the taking and subsequent adoption of minutes both at the meeting.

Council's internal committees include:

- 5/7 Parramatta Square Advisory Group
- Aboriginal and Torres Strait Islander Advisory Committee
- Access Advisory Committee
- Audit Risk and Improvement Committee
- Australia Day Awards Judging Panel
- Councillor Grants Committee
- Finance Committee
- Heritage Advisory Committee
- Local Planning Panel
- Major Projects Advisory Committee
- Parramatta Cycleways Advisory Committee
- Parramatta Floodplain Risk Management Committee
- Parramatta Light Rail Community and Business Advisory Committee
- Parramatta Smart City Connect Advisory Committee
- Parramatta Traffic Committee
- Parramatta Traffic Engineering Advisory Group
- Policy Advisory Committee
- Project Review Committee
- Riverside Theatres Advisory Board
- And any other Committee as resolved by Council from time to time.

Council's external committees include:

- Greater Western Sydney Local Land Service Local Government Advisory Group
- NSW Public Libraries Association
- Parramatta River Catchment Group
- Civic Risk Mutual
- Western Sydney Academy of Sport

Council's Audit, Risk and Improvement Committee (ARIC) is established to promote good corporate governance by providing independent objective assurance and assistance to Council on compliance, risk management, fraud control, financial management, governance, implementation of strategic plan, delivery program and strategies, service reviews and any other matters prescribed by the Regulations. The ARIC is independently Chaired and acts in accordance with its Charter, including review and endorsement of Council's internal audit program. The ARIC can speak directly with the Internal Audit Provider, and can do so without management present if desired. Council employs an Internal Audit Coordinator to oversee and coordinate Council's audit functions internally as a support to both the contracted Internal Auditor and the External Auditor. The Committee has full access to the information it requires. Council's External Auditors are the Audit Office of NSW.

Council holds workshops and briefings on different topics between Council meetings. These are designed to provide Council with information on matters of significant importance and interest that

assist in decision making.

The Executive Team meet with the Lord Mayor to assist in the management of strategic significant issues and representation relating to Council. The Executive Team meets as an independent group to ensure that they are achieving against organisational outcomes and advising the CEO as required. The Leadership Team (Executive Team and Business Unit Managers) hold a monthly meeting as an extended team for the purpose of shared management of operational matters. The Executive Team also hold weekly cascade meetings with their Business Unit Managers in relation to organisational and directorate issues. It is then the responsibility of the Business Unit Managers to cascade information to their extended teams.

Principle 3: Ethical Framework

Council implements the ethics Governance principle through the Code of Conduct Framework.

All key policies are considered and resolved by the elected Council and in some instances, subject to public exhibition prior to approval.

The Code of Conduct Framework includes:

- Code of Conduct (which includes Conflict of Interests) and the Procedures for the Administration of the Model Code of Conduct;
- Gifts and Benefits Declarations;
- Fraud and Corruption Policy;
- Complaints Handling Policy;
- Interaction Between Councillors and Staff;
- Statement of Business Ethics.

Other key policies include the Access to Information Policy, Privacy Management Plan and Councillor Expenses and Facilities Policy.

Any alleged breaches of these Policies are managed in accordance with the adopted Code of Conduct and the Procedures for the Administration of the Model Code of Conduct and the relevant Award Provisions.

Council's Internal Audit program has a critical role in ensuring compliance with relevant legislation and regulations.

Council's Complaints Policy refers to Tier 2 complaints as a reference point for a referral to the IOSS. Tier 2 reports deal directly with the internal review of complaints and/or complaint handling which may require further investigation of issues raised. The Internal Ombudsman undertakes the delegated functions of the Code of Conduct Complaints Coordinator and the Public Interest Disclosures Complaints Coordinator.

Council's Corporate Services Directorate Governance (Risk Management, Internal Audit, Investigations and Probity, Policy and Delegations) provide an overarching range of services that help Council to maintain its compliance obligations.

Principle 4: Corporate Reporting

Council adapts the Corporate Reporting principle through a number of channels including Quarterly Corporate Reports and Financial Reporting which are tabled at the February, May, August and November Meetings each year in line with the statutory requirement set down by the Office of Local Government (OLG). These provide information on the progress of Council against the Operational Plan and Delivery Program. The CEO and CFO sign off on the financial reports including the end of year statements. All reports are presented and adopted by Council and are provided to the Community via Councils Website.

Other Statutory Reporting includes the Annual Report which is provided to the OLG and the Information Commissioner each November and the End of Term Report, which is tabled at the last meeting of the outgoing Council reporting on the outcomes of the Community Strategic Plan.

Principle 5: Disclosure

Council implements the Disclosure principle through its annual reporting as outlined in its Integrated Planning & Reporting Framework which is publicly available. Council is committed to disclosing performance information openly through its reporting structures to the elected members at Council meetings. These include quarterly and six monthly reports aligned with the Delivery Program and Operational Plan and Quarterly Financial reviews.

Elected members and staff members must comply with the requirements for disclosure of interests as prescribed within the Act and the Code of Conduct. The responsibility rests on the individual to declare disclosures of interest including annual written returns, gifts and benefits, related party disclosures and conflicts of interest. Other registers kept and reported on include contracts register, secondary employment, investigations and privacy.

Council's Public Interest Disclosure Policy establishes an internal reporting system to encourage and facilitate the reporting of disclosures of corrupt conduct, maladministration, serious and substantial waste of public money, government information contravention or local government pecuniary interest contravention by Councillors and Staff. The policy lists the Public Interest Disclosure Officers, encourages staff to report wrongdoing and encourages Council to create an atmosphere where staff will be confident and comfortable to report any wrongdoing.

Principle 6: Remuneration

Councillors, as elected representatives, are remunerated for carrying out their official function. The remuneration of the Lord Mayor and Councillors is determined by the Local Government Remuneration Tribunal, reviewed on an annual basis.

Council implements the remuneration principle through senior staff contracts; the Local Government State Award; and the Council Consultative Committee. The CEO and Senior Officer's contracts are a standard contract in accordance with the OLG requirements as outlined in the Act and the processes associated with reviews, including reviews of remuneration operate in accordance with those provisions.

The CEO and Senior Staff are subject to performance based contracts - Staff are paid in accordance with the Local Government Award and Provisions and the City of Parramatta Salary Structure which aims to ensure that staff are appropriately remunerated and aware of the terms and conditions of their employment. Provisions for Contractors and Consultants are acquired through the procurement processes with end dates to contracts.

Principle 7: Risk Management

Council implements the risk management principle through Council's Risk Management Policy and Procedures. Council has a dedicated Risk and Audit Services Unit in the Governance Corporate Services Directorate. Council has an adopted Risk Management Strategy. Council's Strategic Risks cascade into the Operational Risk Register. Council aligns its internal audit plan to the risk framework and updates the Risk, Audit and Improvement Committee on any significant risks. Council's Risk Register is a 'living' record.

The Business Continuity Plan provides staff a plan to restore business operations in the event of an unscheduled business disruption to functions performed at Council. The plan provides strong guidance across key phases of a disaster including Emergency response, Crisis Management, Business Recovery and Business Resumption.

A document signed off by the CEO and CFO is incorporated into the relevant financial statements. Both Council Policies and Operational Policies are reviewed and endorsed by the Executive team prior to implementation.

Principle 8: Key Stakeholder Rights

Council implements the Key Stakeholder Rights principle through the Communications and Community Engagement Strategies, Policy and Staff Toolkit to guide consultation, research and engagement across the organisation which includes workshops, physical pop-ups, digital and social media platforms, online panels and surveys.

Council has developed a set of nine (9) principles that guide and shape our approach to all our community and stakeholder engagement activities. These are outlined in Council's Engagement Strategy include:

- Building relationships
- Right to be involved
- Clarity of purpose
- Accessible and inclusive
- Timely
- Tailored
- Coordinated
- Transparent
- Learning from practice

Community members have access to the contact details of their elected representatives and all information is provided on Council website and included in promotional materials distributed across the Local Government Area Community and Businesses. The community has the opportunity to attend Council meetings either in person or via the live streaming telecast of Council meetings.

Council has a Customer Service Policy and Complaints Handling Policy which provide guidance to members of the public and the management of interactions with Council. Council's commitment to our customers are captured in the Customer Service Policy and include:

- Provide the best possible services to our community by delivering on our promise and making it easy to do business with Council
- To deliver on the reasonable service expectations of our customers
- To guide customers and the organisation in dealing with Customer Requests to ensure the highest possible level of service and commitment is achieved.

Council's Service Principles include:

- Taking the time and use our initiative to understand and meet the customer's needs'
- Treat the customer with respect and courtesy
- Improve convenience and access by providing a range of service options
- Keep wait times to a minimum
- Give clear and accurate information
- Give consistent advice
- Provide service with a smile
- Listen to the customer's feedback
- Respond to complaints promptly

- Provide customers with feedback when their complaint is completed
- Work with the customer to continuously improve and provide the best advice and serviced.

DRAFT

Fraud and Corruption Prevention Policy

Contents

1. Scope
2. Purpose
3. Policy
- 3.4 Responsibilities
- 3.5 Reporting
- 3.6 Investigation
- 3.7 Training Education and Awareness
- 3.8 Conduct and Discipline
- 3.9 Related Resources (including Definitions)

1. Scope

This Policy applies to all Council Officials (Councillors, Administrators, members of staff of Council, Council Committee Members, Conduct Reviewers, Delegates of Council and volunteers) who perform functions on behalf of Council.

2. Purpose

Council has zero tolerance on any fraud or corrupt behaviour. Council is committed to the prevention, deterrence, detection and investigation of all forms of fraud and corrupt conduct. This Fraud and Corruption Prevention Policy forms a part of Council's Governance Framework, and ensures the appropriate mechanisms are in place to protect Council's public assets and finances, as well as the integrity, security and reputation of Council.

3. Policy

- 3.1 Council will not tolerate, fraud or corrupt conduct or misconduct by Council officials.
- 3.2 Council is committed to a culture of good governance and ethical behavior. In accepting its responsibility for good governance, Council will set the example for accountability, integrity and transparency in the provision of services to the community, and the management of Council as an organisation. For that reason,

Fraud and Corruption Prevention		
Owner: Risk and Audit Manager	Area: Corporate Services	POL No: 318
Date of Commencement: 2011	Approval Authority: Council	Date Approved: [Date]
Amendment 4	Date of Next Review: 2021	Review period: Annually

Council is committed to:

- Minimising the opportunities for fraud or corrupt conduct by Council officials;
 - Detecting, investigating and disciplining/prosecuting fraud or corrupt conduct;
 - Reporting fraud or corrupt conduct, including suspected fraud or corrupt conduct, to the Independent Commission Against Corruption (ICAC) in line with the obligations under the *ICAC Act* and the NSW Police, where appropriate; and
 - Encouraging and supporting the reporting of wrongdoing.
- 3.3 Preventing fraud or corrupt activity, and avoiding or managing conflicts of interests. This is addressed through implementing appropriate auditing systems to prevent, deter and identify corrupt activities. This approach is supported by the development and implementation of a Fraud and Corruption Prevention Plan.

3.4 Responsibilities

3.4.1 Chief Executive Officer

The Chief Executive Officer has ultimate responsibility for managing fraud and corruption risks in Council. In accordance with the *Independent Commission Against Corruption Act 1988* and Council's Code of Conduct and Procedures for the Administration of the Code of Conduct for Local Councils in NSW, the Chief Executive Officer is obliged to report any suspected or actual matter to the ICAC that they suspect on reasonable grounds, or may concern, corrupt conduct whether on the part of Council officials or any party with whom it conducts business. In cases of complaints against the Chief Executive Officer, the Lord Mayor or Administrator assumes these responsibilities.

In accordance with the *Public Interest Disclosures Act 1994*, other like reports must be made to the following external authorities:

- The NSW Ombudsman – for maladministration.
- The Law Enforcement Crime Commission (LECC) – for law enforcement misconduct.
- The Information Commissioner – for disclosures about government information contravention, the IPC or its staff.
- The Office of Local Government, Department of Premier and Cabinet – for serious and substantial waste in local government (reports about serious and substantial waste in State government agencies should be made to the Auditor General).
- The ICAC Inspector – for disclosures about the ICAC or its staff.

Fraud and Corruption Prevention		
Owner: Risk and Audit Manager	Area: Corporate Services	POL No: 318
Date of Commencement: 2011	Approval Authority: Council	Date Approved: [Date]
Amendment 4	Date of Next Review: 2021	Review period: Annually

3.4.2 Council officials

All Council officials have a responsibility and an obligation to:

- a) Report cases of suspected or actual fraud or corrupt conduct either through Council's internal reporting framework (as outlined in Council's Public Interest Disclosures (PID) Policy) or directly to the ICAC or relevant external authority.
- b) Behave honestly and in accordance with Council's Code of Conduct and other Council policies.
- c) Report behaviour that comprises an attempt or an inducement to engage in any fraud or corruption.
- d) Refrain from taking (or encouraging others to take) any action or engage in any conduct against any person who reports fraud, corruption, maladministration or serious and substantial waste that is detrimental to the interests of any such person.
- e) To the extent that they are reasonably capable of doing so, protect any person who reports fraud, corruption, maladministration or serious and substantial waste from any action or conduct that is detrimental to the interests of any such person if they become aware of the identity of a person who has made any such report in line with Council's Public Interest Disclosure Policy and the Code of Conduct.
- f) Effectively maintain and implement systems of internal control established to prevent or detect fraud or corruption.
- g) Undertake relevant training relating to the prevention, detection and investigation of fraud and corruption.
- h) Assist in investigations undertaken in respect of any suspected or reported fraud or corruption.

Fraud and Corruption Prevention

Date of Commencement: 2011	Approval Authority: Council	Date Approved: [Date]
Amendment 4	Date of Next Review: 2021	Review period: Annually

3.4.3 Management Staff

Council staff who hold the position of Chief Executive Officer, Executive Director, Director, Group Manager (including Chiefs), Manager or Team Leader have the following responsibilities, in addition to their responsibilities as Council staff stated elsewhere in this Policy:

- a) Take appropriate measures to ensure that their staff understand the standards of expected behaviour as outlined in the Guiding Principles, Council's Code of Conduct, and relevant policies and procedures
- b) Ensure that any suspected fraud or corruption, maladministration and serious and substantial wastage reported to them are referred to the Group Manager, Governance & Risk or the Chief Executive Officer without delay. If a report is received orally, they must take steps to record the report in writing.
- c) To the extent permitted by law, maintain the confidentiality of people making reports and the subject matter of those reports.
- d) Ensure that Council staff who have reported any suspected fraud or corruption, maladministration and serious and substantial waste in accordance with this Policy are not disadvantaged or suffer detrimental action.
- e) Take steps to identify and assess the risk of fraud or corruption occurring in their area of responsibility.
- f) Take steps to ensure to implement controls and detection systems to address any identified risks of fraud or corruption in their area of responsibility, and monitor the continued operation of those systems and controls.
- g) Demonstrate leadership in the area of ethics and fraud & corruption minimisation.
- h) Undertake regular reviews, audits and checks to detect irregularities.
- i) Use basic data mining tools to detect possible fraud and corruption.
- j) Ensure that all Council staff in their area of responsibility are aware of this Policy, and that this Policy is readily available for their inspection.

Fraud and Corruption Prevention		
Owner: Risk and Audit Manager	Area: Corporate Services	POL No: 318
Date of Commencement: 2011	Approval Authority: Council	Date Approved: [Date]
Amendment 4	Date of Next Review: 2021	Review period: Annually

- k) Take reasonable steps to require that Council contractors whose contracts they administer comply with this Policy to the extent that it is relevant to their contractual arrangements and adhere to the ethical standards described in this Policy.
- l) The implementation of systems and controls to minimise fraud or corruption together with the assessment of fraud or corruption risks must:
- be undertaken in consultation with the Executive Director Corporate Services; or Group Manager, Legal Services, and
 - comply with any directions or guidelines issued from time to time by the Chief Executive Officer, the Executive Director Corporate Services or Group Manager, Legal Services relating to any such assessments.

3.4.4 Council contractors, consultants and volunteers

Contractors, consultants, volunteers and any other people who perform public official functions on behalf of Council, are encouraged to support Council's commitment to preventing fraud and corruption through reporting suspicious behaviour in accordance with the Code of Conduct.

3.4.5 Internal Ombudsman

The Internal Ombudsman is Council's nominated Public Interest Disclosures Coordinator and Code of Conduct Complaints Coordinator. The CEO may also refer serious complaints to the Internal Ombudsman for investigation and action. The Internal Ombudsman can assist Councillors, Council staff and the general public with advice and guidance in relation to possible or suspected fraud and corruption.

3.4.6 External parties

All external parties who engage in business with Council must observe Council's Statement of Business Ethics and comply with Council

3.4.7 Residents and members of the public

Residents, customers and members of the public are encouraged to support Council's commitment to preventing and addressing fraud or corrupt conduct by reporting suspicious behaviour and suspected fraud and corruption to the Chief Executive Officer

Fraud and Corruption Prevention		
Owner: Risk and Audit Manager	Area: Corporate Services	POL No: 318
Date of Commencement: 2011	Approval Authority: Council	Date Approved: [Date]
Amendment 4	Date of Next Review: 2021	Review period: Annually

or other external authority.

3.5 Reporting

All Council officials have an obligation to report suspected fraud or corrupt conduct. Council's Public Interest Disclosure (PID) Policy provides guidance on how to report wrongdoing such as fraud and corrupt conduct. The PID Policy also outlines the relevant external authorities to report other types of wrongdoing.

Council's Code of Conduct and Complaints Handling Policy also provide mechanisms for members of the public to report suspected fraud and corruption.

All fraud and corruption will be reported by Council to the ICAC. Other external authorities will be notified of fraudulent or corrupt conduct as considered appropriate by the Group Manager, Governance & Risk, the Chief Executive Officer, or the Group Manager, Legal Services. Crimes committed against the Council will be reported to the Police.

3.6 Investigation

All reports of alleged fraud and corruption received by Council will be treated seriously by Council, investigated and reported to the ICAC, the NSW Police or relevant external agency.

3.7 Training Education and Awareness

3.7.1 Councillor and Council Staff Awareness

Fraud and corruption control is the responsibility of all staff.

Council will provide training and education to assist Councillors and Council staff in being able to identify and prevent fraud or corruption in accordance with this Policy.

Councillors and Council staff must participate in training and education provided by Council that is directed towards communicating to them that fraud or corruption is unacceptable.

Council will ensure relevant training is provided to Councillors and Council staff on an ongoing basis to advise them of the Code of Conduct, Public Interest Disclosure Policy and their responsibilities and obligations.

Fraud and Corruption Prevention		
Owner: Risk and Audit Manager	Area: Corporate Services	POL No: 318
Date of Commencement: 2011	Approval Authority: Council	Date Approved: [Date]
Amendment 4	Date of Next Review: 2021	Review period: Annually

Management staff must be proactive in identifying behaviours that could result in corruption, either actual or perceived.

3.7.2 Customer and Community Awareness

Council must promote awareness among the community, customers, contractors, suppliers and other third parties that fraud or corruption in any dealings with Council is unacceptable.

Management staff must assist third parties to report any suspected fraud or corruption.

3.8 Conduct and Discipline

Councillors and Council staff must carefully read, understand and observe the Code of Conduct.

Fraud or corruption is unacceptable and offenders will face disciplinary action in accordance with the Code of Conduct, Procedures for the Administration of the Code of Conduct for Local Councils in NSW and other Council policies

Council may seek criminal prosecution for any fraud or corruption.

Council may institute civil or administrative legal proceedings in respect of fraud or corruption as considered appropriate by the Chief Executive Officer.

4.3 Definitions

Corruption The dishonest or preferential use of power or position, a breach of public trust or the misuse of information or material acquired in the course of official functions. The *Independent Commission Against Corruption Act 1988* further defines corruption.

Corrupt conduct As defined in the Independent Commission Against Corruption Act 1988 NSW (ICAC Act):

"Is deliberate or intentional wrongdoing, not negligence or a mistake. It has to involve or affect an NSW public official or public sector organisation.

While it can take many forms, corrupt conduct occurs when:

- a public official improperly uses, or tries to improperly use, the knowledge, power or resources of their position for personal gain or the advantage of others
- a public official dishonestly exercises his or her official functions, or improperly exercises his or her official functions in a partial manner, breaches public trust or misuses information or material acquired during the course of his or her official functions
- a member of the public influences, or tries to influence, a public official to use his or her position in a way that affects the probity of the Public official's exercise of functions
- a member of the public engages in conduct that could involve one of the matters set out in section 8(2A) of the ICAC Act where such conduct impairs, or could impair, public confidence in public administration."

Council official An individual who carries out public official functions on behalf of Council or acts in the capacity of a public official. For the purpose of this Policy, employees, Councillors,

- members of Council committees and delegates of Council, contractors, consultants and other people who perform functions on behalf of Council such as volunteers and relevant external parties are Council officials.
- Fraud** Fraud is dishonest activity or a dishonest representation intended to result in financial or personal gain. Fraud includes, but is not limited to:
- theft of money or other property by employees or persons external to the department, where deception is used deliberate falsification, concealment or improper destruction of documentation, or use of falsified documentation;
 - improper use of information or position for personal gain;
 - theft of departmental property where deception is not used.
- Misconduct** Conduct by a Council official which constitutes a ground for disciplinary action whilst acting in their capacity as a Council official, where such conduct contravenes Council's Code of Conduct.
- Employees** Employees who perform public official functions on behalf of Council and include contractors, consultants and volunteers.

Complaints Handling Policy

Contents

1. Scope
2. Purpose
3. Policy
4. Related Documents

1. Scope

This Policy applies to members of the public who wish to lodge a complaint in regard to Council's services and performance. Furthermore, the Policy also applies to a Council Official (Councillors, Administrators, members of staff of Council, Council Committee members, Conduct Reviewers and Delegates of Council) who lives in the City of Parramatta local government area and wish to make a complaint in their private capacity.

Where relevant, a complaint regarding a Council Official will be considered in accordance with Council's Code of Conduct and the associated procedure.

2. Purpose

This Policy will facilitate a consistent, fair, transparent and equitable resolution to customer complaints made to Council.

This Policy:

- Provides a framework for managing complaints from the public in a fair and consistent manner, as a means of improving customer service in all areas of Council's operations;
- Ensures that issues which are the subject of complaints are addressed promptly and in a manner which, as far as possible, ensures that such issues will not be the subject of future complaints;
- Ensures that all complaints are investigated thoroughly; and
- Provides transparency and awareness to the community regarding Council's complaints policy and procedures

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

Through this Policy, Council will:

- Recognise the customers right to raise concerns about their dealings with Council;
- Establish a complaint management process that is open, consistent, fair and transparent, ensuring that all complaints are well documented and publicly available;
- Ensure complaints are dealt with professionally, within specified timeframes and complainants are kept informed;
- Improve public confidence that complaints will be dealt with and that relevant legislation, regulations and Council policies, including the Code of Conduct, will be enforced;
- Recognise the importance of complaints in providing feedback about Council's services and performance to ensure accountability and utilise such information to improve services and identify appropriate training needs; and
- Outline Council's approach to managing unreasonable complaint conduct.

This Policy forms part of Council's Code of Conduct framework and ensures the appropriate mechanisms are in place to protect the integrity, security and reputation of Council.

3. Policy

3.1 Complaint Management Framework

Council is committed to achieving best practice in delivering services to the community. To succeed, Council needs to ensure that any complaints received are dealt with courteously, investigated thoroughly through transparent processes, and resolved quickly and appropriately.

Council has followed the NSW Ombudsman's Guidelines and model approach to implementing a Complaint Management Framework and procedures that will allow Council to:

- Respond effectively and positively to complaints received; and
- Manage complaints in a manner that endeavours to provide satisfaction to complainants

The components of the Complaints Management Framework are:

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

3.2 Making a complaint

3.2.1 - How to make a complaint

It is Council’s preference that complaints are made in writing, in accordance with this Policy and its three-tier approach. Initially, a complaint is made in the first instance (the first tier) to Customer Contact Centre. If the complainant is not satisfied with the outcome, then the complainant can write to the Internal Ombudsman (the second tier) outlining their concerns about the handling of their complaint or the outcome of their complaint. If the complainant is not satisfied with the outcome at the second tier, than a further complaint may be sent to an external agency (the third tier).

In situations where complaints are made directly to Councillors rather than Council officers, Councillors are required to forward the complaint to the Chief Executive Officer to be dealt with in accordance with this Policy and procedures.

3.2.2 - Anonymous complaints

Where appropriate, Council will record anonymous complaints and act on them where the matter is of a serious nature, or where there is sufficient information provided at the time the complaint is lodged. For issues related to Council’s assets and services, an inspection or investigation will be carried out. For other issues, further investigation of anonymous complaints will be undertaken at the discretion of the responsible officer where sufficient information has been provided.

3.2.3 - Assistance in making a complaint

If a person prefers or needs another person or organisation to assist or represent

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

them in the making and/ or resolution of their complaint, Council will communicate with them through their representative if this is their wish. Anyone may assist/or represent a person wishing to make a complaint with their consent (e.g. advocate, family member, legal or community representative, member of Parliament, another organisation).

3.3 Facilitating complaints

3.3.1 - What is a complaint

A complaint is an expression of dissatisfaction made to or about Council's services and performance, the conduct of a Council official, or dissatisfaction with the handling of a complaint where a response or resolution is explicitly or implicitly expected or legally required. This includes dissatisfaction with the outcome of a decision, undue delay in a decision or action, level or quality of service, the failure to adhere to a policy or procedure, dissatisfaction with an administrative process or behaviour of Council official, which can be investigated and acted upon.

3.3.2 - What is not a complaint

A complaint covered by this Policy can be distinguished from:

- staff grievances [see Grievance Handling Policy];
- public interest disclosures made by our staff [see Public Interest Disclosures Policy];
- code of conduct complaints [see Code of Conduct];
- responses to requests for feedback about the standard of our service provision [see the definition of 'feedback' below];
- reports of problems or wrongdoing merely intended to bring a problem to our notice with no expectation of a response [see definition of 'feedback'];
- service requests [see definition of 'service request' below];
- requests for information [see Council's Access to Information Policy];
- Feedback - Opinions, comments and expressions of interest or concern, made directly or indirectly, explicitly or implicitly, to or about Council, about Council's services or complaint handling where a response is not explicitly or implicitly expected or legally required; and
- service requests - the definition of a service request includes:
 - requests for the provision of services and assistance

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

- requests for repairs to infrastructure or remove hazards
- requests for approval
- requests for action
- routine enquiries about the organisation's business
- reports of failure to comply with laws regulated by the organisation
- requests for explanation of policies, procedures and decisions.

A complaint is not:

- An expression of disagreement with a lawfully made decision by Council;
- An appeal or representation against a decision by Council, other than that made as the result of a complaint;
- The lodging of an appeal or objection in accordance with a statutory process, procedure or policy (e.g. Objections to a development application, submissions on an exhibited policy);
- A matter where the issue is outside Council's area of responsibility, or the responsibility of another authority or service provider;
- Reports of hazards (such as fallen trees) or damaged / faulty infrastructure (eg. reports of potholes); and
- The dissatisfaction in relation to a development application by a development applicant, or an objector to an application, with the determination made.

3.3.3 - Making a complaint

Complainants who wish to make a complaint to Council will:

- Be provided with information about our complaint handling process;
- Be provided with accessible ways to make complaints;
- Be listened to and treated with respect by staff and actively involved in the complaint process where possible and appropriate;
- Not be adversely affected because a complaint has been made by them or on their behalf; and
- Be provided with reasons for our decisions and any options for redress or review in a timely manner.

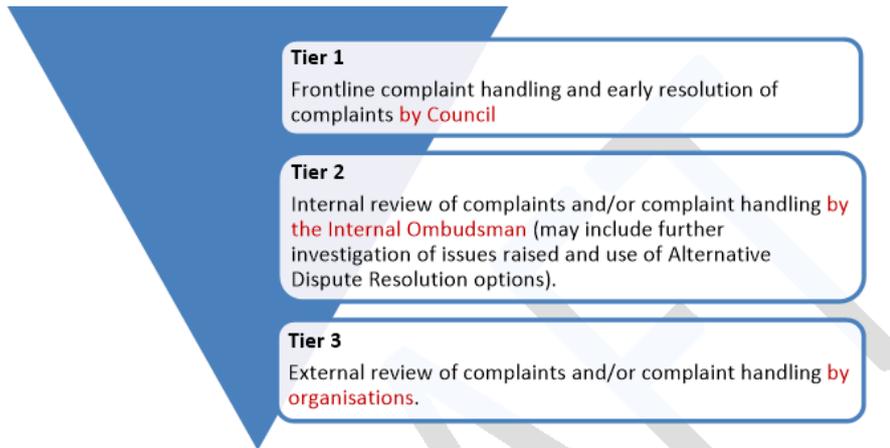

Making a complaint to Council is free.

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

3.4 Responding to complaints

Council has adopted a three-tier approach in responding to complaints.

Tier 1

Council aims to resolve complaints promptly, by the responsible section of Council. Wherever possible staff will be adequately equipped to respond to complaints, including being given appropriate authority, training and supervision. The first level of complaint handling will provide for the following:

- A prompt acknowledgement of the complaint and an explanation of the process;
- The expected timeframe for dealing with the complaint;
- The progress of the complaint and reasons for any delay; and
- An outcome.

Tier 2

Where a complaint is not resolved at Tier 1, the complainant may complain to the Internal Ombudsman Shared Service (IOSS), who will assess the complaint in line with its Governance Charter to determine whether it is a matter it will investigate. The complaint may then be investigated by the IOSS, or by an investigator appointed by the Internal Ombudsman. This second level of complaint handling

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

will provide for the following:

- A prompt acknowledgement of the complaint and an explanation of the complaints process;
- The expected time frame for dealing with the complaint;
- An assessment and possible investigation of the complaint and decision already made;
- The progress of the complaint and reasons for any delay; and
- An outcome (where a person not connected with the complaint reviews the matter and attempts to find an outcome acceptable to the relevant parties and provides reasons for our decision/s and any options for redress or review).

The IOSS provides complainants with an independent body to review complaints about Council's administrative conduct, unethical behaviour, misconduct or maladministration. Allegations made to the IOSS about corrupt conduct will be referred to the Independent Commission Against Corruption as required by law.

The IOSS can only investigate a complaint if it has been firstly reviewed or investigated in accordance with this Policy. Matters within the IOSS' jurisdiction include:

- All Council administrative processes;
- Delay / inaction in relation to a Council decision (but not the decision itself);
- Failure to comply with Council's policies, including the Code of Conduct; and
- Poor administration and unreasonableness.

In some circumstances in which the complaint is serious, the IOSS may commence its enquiries in relation to a complaint prior to it being investigated at Tier 1 level of this Policy. The CEO may also refer a complaint directly to the IOSS without having being investigated at Tier 1.

The IOSS is unable to investigate when:

- The complaint has not been considered at the first tier of this Policy (except when it involves a serious complaint);
- There is insufficient information provided about the complaint;
- The complaint does not relate to a Council function;
- The complainant had knowledge of the matter for more than three months without taking any action;
- The nature of the complaint requires that it is referred to an external

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

organisation such as the NSW Ombudsman, the Independent Commission against Corruption or the Office of Local Government;

- The complaint is of low priority or resources are not available; and
- The complaint is frivolous, vexatious, not made in good faith or concerning a trivial matter.

Investigating officers will address complaints with integrity in a fair and reasonable, equitable, objective and unbiased manner.

Where relevant, a complaint regarding a Council official will be reviewed in accordance with Council's Code of Conduct and the associated procedure.

Further information about the role of IOSS is available on Council's website.

Tier 3

Where a person making a complaint is dissatisfied with the outcome of Council's review of their complaint and the review conducted by the IOSS, they may seek an external review of the decision through an external body such as the NSW Ombudsman, Office of Local Government or the Independent Commission Against Corruption.

3.5 Managing complaints involving a Child

Council upholds and promotes the safety and wellbeing of children and young people in our community and Council recognises that Child Protection is everybody's business.

Complaints and allegations against Council officials, contractors and sub-contractors, work experience participants, volunteers, students on placement, facility hirers and leasees involving a child or young person will be handled by the IOSS in accordance with the relevant legislation, specifically the *Children's Guardian Act 2019*.

3.6 Managing the parties to a complaint

To ensure a consistent approach, Council's Customer Contact Centre will be responsible for managing complaints in accordance with this Policy, including complaints concerning Council's external service providers and/or its contractors.

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

Council will assess each complaint on its merits and involve people making complaints and/or their representative in the process as far as possible.

Council will protect the identity of people making complaints where this is practical and appropriate. Personal information that identifies individuals will only be disclosed or used by Council as permitted under Council's Privacy Management Plan, with an individual's consent or under any other relevant legislative requirement.

3.7 Complaints involving multiple parties

When similar complaints are made by related parties, Council will arrange communication with a single representative of the group with the consent of those involved.

Where a complaint involves multiple organisations, Council will work with the other organisation/s where possible, to ensure that communication with the person making a complaint and/or their representative is clear, consistent and coordinated.

Subject to privacy and confidentiality considerations, communication and information sharing between the parties will also be organised to facilitate a timely response to the complaint.

Where a complaint involves multiple areas within Council, responsibility for communicating with the person making the complaint and/or their representative will also be coordinated by Customer Contact Centre in accordance with this Policy.

Where Council services are contracted out, Council expects contracted service providers to have an accessible and comprehensive complaint management system and to comply with Council's Code of Conduct in the performance of their functions. Council takes complaints not only about the actions of our staff but also the actions of service providers.

3.8 Unreasonable Complainant Conduct

Council is committed to being accessible and responsive to all people who provide feedback or make complaints. At the same time, Council's success depends on:

- the ability to do its work and perform functions in the most effective and efficient way possible
- the health, safety and security of all staff
- the ability to allocate resources fairly across all the complaints it receives.

When people behave unreasonably in their dealings with Council, their conduct can significantly affect the progress and efficiency of Council's work. As a result, the Chief Executive Officer will take proactive and decisive action to manage any conduct that negatively and unreasonably affects Council staff, and will support all staff to do the same in accordance with this Policy.

Council uses the NSW Ombudsman's Managing Unreasonable Complainant Conduct Practice Manual as a guide for both identifying unreasonable conduct and establishing strategies to address that conduct.

Unreasonable Complainant Conduct (UCC) is any behaviour by a current or former complainant which, because of its nature or frequency raises substantial health, safety, resource or equity issues for the organisation, staff, other service users and complainants and includes the complainant themselves.

UCC can be divided into five categories of conduct:

a) **Unreasonable persistence**

Examples may include, without limitation, persisting with the complaint once all three tiers of complaint handling have been applied, reframing complaints in an attempt to have them reconsidered, demanding reviews without justification, or persisting in wanting to know where to go next when there are no further avenues.

b) **Unreasonable demands**

Examples may include, without limitation, insisting on demands that are unattainable, demanding an apology or compensation when such would be unreasonable in the circumstances, issuing instructions or demands about how a complaint ought to be handled, or making unreasonable demands on resources.

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

c) Unreasonable lack of cooperation

Examples may include, without limitation, presenting a large quantity of disorganized material, refusing to define the issues of a complaint, changing the complaint while it is in the process of being considered, or withholding information or presenting material in a selective manner.

d) Unreasonable behaviour

Examples may include, without limitation, displaying rude or confronting behaviour, making threats of self-harm or of harm to others, or sending rude, confronting or threatening letters.

e) Unreasonable arguments

Examples may include, without limitation, insisting on the importance of a matter which is trivial, holding irrational beliefs or seeing cause and effect where there is none, or presenting "conspiracy theories" unsupported by evidence.

When complainants behave in ways Council considers to be unreasonable complainant conduct, that is they:

- become aggressive and verbally abusive towards Council staff
- threaten harm and violence
- inundates Council offices with unnecessary and excessive phone calls and emails
- make inappropriate demands on Council's time and resources
- refuse to accept Council decisions and recommendations in relation to their complaints
- submit offensive comments through Council's social media.

Council may consider limiting or adapting the ways it interacts with and/or delivers services to complainants by placing restrictions around their interactions with Council staff. Such restrictions may include:

Type of contact:

Who they have contact with

What they can raise with us

Example of restriction:

Limiting a complainant to a sole contact person/staff member.

Restricting the subject matter of communications that Council will consider and respond to.

Owner: Customer Contact Centre Manager	Area: City Engagement & Experience	POL No: 216
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review period: Every 2 years

When they can have contact	Limiting a complainant's contact with Council to a particular time, day, or length of time, or curbing the frequency of their contact.
Where they can make contact	Limiting the locations where Council staff will conduct face-to-face interviews to secured facilities or areas of the office.
How they can make contact	Limiting or modifying the forms of contact that the complainant can have with Council. This can include modifying or limiting face-to-face interviews, telephone and written communications, prohibiting access to Council premises, contact through a representative only, taking no further action or terminating services altogether.

When using these restrictions, Council recognises that discretion will need to be used to adapt them to suit a complainant's personal circumstances, level of competency, literacy skills, and other relevant issues. In this regard, Council also recognises that a combination of strategies may need to be used in individual cases to ensure their appropriateness and efficacy.

Abusive or threatening complainant conduct limits Council's capacity to resolve a complainant's concerns and will not be tolerated. In any interaction with members of the community where personal abuse or vulgar language is used, the communication may be terminated immediately at the discretion of the subject employee. If face to face, the employee may walk away. If on a telephone, the employee may terminate the call. If in email, future e-mails from the sender may be blocked. If in correspondence, offending letters will be returned to the sender and not acted upon.

Where safe to do so, an employee will advise the complainant that they are terminating communication, and will not discuss the matter further, prior to terminating the communication.

If the employee feels threatened by the language or behaviour of the complainant, the police shall be notified.

Gifts and Benefits

Contents

1. Scope
2. Purpose
3. Policy
4. Related Resources
5. Definitions

1. Scope

This Policy applies to all Council Officials, including Councillors, Administrators, members of staff of Council, Council Committee members, Conduct Reviewers, Delegates of Council and volunteers having employee functions or acting in an employee capacity on behalf of Council.

2. Purpose

The Gifts and Benefits Policy provides guidance for appropriate actions in relation to offers of gifts, hospitality or benefits. This Policy also provides clarity around its provision under the Code of Conduct, and forms a central part of the City of Parramatta Council's (Council) Code of Conduct Framework and ensures the appropriate mechanisms are in place to protect the integrity, security and reputation of Council.

3. Policy

Council's Code of Conduct (the Code) outlines the standards of conduct expected of all Council officials. This Policy aims to ensure that Council performs its public functions fairly and impartially in accordance with the Code. Staff must be aware of their obligations under the Code, and should at all times adhere to them.

It is acknowledged that Council officials may at times be offered gifts, hospitality or benefits during the course of their duties; however, it is important to understand

Gifts and Benefits		
Owner: Governance Manager	Area: Corporate Services	POL No: 334
Date of Commencement: 2013	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

that the offering and or acceptance of such items may give the impression that Council has been unduly influenced in its decision making process, or is providing preferential treatment to individuals or organisations, giving rise to an actual, perceived or potential conflict of interest.

Council officials should never expect to get anything extra for doing what they are appointed to do. Council officials must not seek or accept any payment, gift or benefit intended or likely to influence them, or that could reasonably be perceived by an impartial observer as intended or likely to influence them:

- To act in a particular way (including making a particular decision)
- To fail to act in a particular circumstance
- To otherwise deviate from the proper exercise of official duties.
- To influence others from the proper exercise of official duties.

Council officials must avoid situations in which the appearance may be created that any person or organisation, through the provision of hospitality and other gifts or benefits of any kind, is securing or attempting to secure a favour from that Council official and Council.

Any offer or acceptance of a gift, hospitality or benefit of any value must be disclosed using the Gift and Benefit Disclosure Form and recorded in Council's Gifts and Benefits Register.

In accordance with the Code, you must not:

- Seek or accept a bribe or other improper inducement;
- Seek gift or benefits of any kind;
- Accept any gift or benefit that may create a sense of obligation on your part, or may be perceived to be intended or likely to influence you in carrying out your public duty;
- Accept any gift or benefit of more than token value, unless the gift or benefit cannot reasonably be refused or returned (if the gift or benefit cannot reasonably be refused or returned, it must be surrendered to the Council, unless the nature of the gift makes this impractical);
- Accept an offer of cash or cash-like gift (cash-like gifts include, but are not limited to, gift vouchers, credit cards, debit cards with credit on them,

Gifts and Benefits

prepayments such as phone or internet credit, lottery tickets, memberships or entitlements to discounts that are not available to the public or a broad class of persons) regardless of the amount;

- Participate in competitions for prizes where eligibility is based on Council being in, or entering into, a customer-supplier relationship with the competition organizer;
- Personally benefit from reward points programs when purchasing on behalf of Council.

In addition to the requirements in the Code of Conduct, the following applies:

- Immediate family members or relatives must not accept gifts, hospitality or benefits on your behalf.
- You must not use your position to influence others or take advantage of your status or position in the performance of your duties in order to obtain private benefit for yourself or somebody else.
- Any suspected bribery attempts, including the offer of cash or a cash-like gift, must be reported to the Chief Executive Officer immediately. The Chief Executive Officer will inform the Independent Commission Against Corruption (in accordance with the *Independent Commission Against Corruption Act 1988*) and the Police, if appropriate.

Councillors must also consider their disclosure obligations when completing their Disclosures of Interest and Other Matters Return required under the Code of Conduct, supported by section 440 of the *Local Government Act*. If the value or cumulative value of gifts, hospitality or benefits, from one donor should exceed the amount of \$500 in the return year, the Gifts Section of the Return Form must be completed by the recipient, in addition to the recipient making the declaration of such gifts or benefits in Council's Gifts and Benefits Register (please see Schedule 1 of the Code of Conduct for more information).

3.1 Token gifts, hospitality or benefits

Whilst the Code of Conduct allows the acceptance of gifts and benefits of token value, Council officials are encouraged **not** to accept gifts, hospitality or other benefits of any kind. Any offer and/or acceptance of a gift **of any kind** must be

Gifts and Benefits		
Owner: Governance Manager	Area: Corporate Services	POL No: 334
Date of Commencement: 2013	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

declared using Council's Gifts and Benefits Disclosure Form for recording in the Gifts and Benefits Register.

Additionally, Council officials should be aware of repeated offers of token gifts from the same source, which can cumulatively amount to more than token value, and indicate a deliberate intent to secure favorable treatment from Council. Repeated offers of gifts, hospitality or benefits can constitute an actual or perceived attempt to bribe a Council official, and must be refused and disclosed in the Gifts and Benefits Disclosure Form for recording in Council's Gifts and Benefits Register.

Where Council officials are concerned that the intent of an offer may be inappropriate, the gift, hospitality or benefit should not be accepted. Such circumstances may include offers of gifts from a supplier, a customer with a Council decision pending or any circumstances that would give rise to a perceived, possible or actual conflict of interest.

Token value for the purposes of this Policy is \$100 in value received in aggregate from a person or organization over a 12-month period.

3.2 Gifts, hospitality or benefits of more than token value

Gifts, hospitality or benefits of more than token value are those greater than \$100 (inclusive of GST) or a number of gifts and benefits received from the same person or organization over a 12-month period that in aggregate exceed \$100 (inclusive of GST) in value.

Wherever possible, Council officials are encouraged not to accept gifts, hospitality or other benefits of more than token value, however in instances where gifts are unable to be refused the gift will be disclosed and managed in accordance with the process outlined in this Policy.

3.3 Cultural considerations or official functions

Council officials often conduct official business with agencies and organisations, where gifts and hospitality are offered to express appreciation and good will. Every

Gifts and Benefits		
Owner: Governance Manager	Area: Corporate Services	POL No: 334
Date of Commencement: 2013	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

effort should be undertaken to ensure that gifts or benefits are refused with a proper explanation, courtesy and due regard to cultural sensitivities. In instances where such offers are unable to be refused or returned as it may be considered offensive or cause embarrassment; gifts must be reported using the Gifts and Benefit Disclosure Form and surrendered to Council for appropriate action, and legitimate invitations of hospitality will not be seen as a breach of this Policy or Code of Conduct.

As per Sections 6.9 & 6.10 of the Code of Conduct, some items regardless of their value are not considered to be of token or nominal value. These include, but are not limited to:

- tickets to major sporting events (such as international matches or matches in national sporting codes);
- corporate hospitality at a corporate facility at major sporting events;
- free or discounted products or services for personal use provided on terms that are not available to the general public;
- the frequent use of facilities such as gyms;
- use of holiday homes;
- artworks; and
- free or discounted travel.

These items, if offered, must be refused.

On occasion however, and as a demonstration of Council's recognition and support for the contributions that local clubs make to the community, the Mayor, Councillors and Chief Executive Officer or their delegate may attend local community and sporting events, including for professional and semi-professional level sporting teams for the purpose of performing their official function in accordance with Clause 6.2 of the Code of Conduct. This does not include invitations to functions and events hosted by suppliers or third parties.

Where conducting official business, the Lord Mayor or Administrator, Councillors and Chief Executive Officer or their delegate may attend work related functions to further the business interests of Council. This does not include an invitation to an event (such as sporting or otherwise), where a business conversation took place.

Gifts and Benefits		
Owner: Governance Manager	Area: Corporate Services	POL No: 334
Date of Commencement: 2013	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

Any legitimate invitation is in recognition of their official roles as Council officials. Attendance at such events will not be seen as a breach of this Policy or Code of Conduct, provided Council officials act in accordance with their responsibilities under the Code.

Official and Ceremonial Gifts and Goodwill

Organisations or individuals may offer official / ceremonial gifts of goodwill to the Council. In such circumstances it is reasonable for official representatives of the Council to accept official gifts on behalf of Council. Such gifts shall be considered the property of the Council and may be displayed in an appropriate and secure location for public viewing.

3.4 Accepting modest hospitality at work meetings

There is no requirement to declare receipt of modest hospitality that is provided by another agency or individual as part of normal work related activities including the provision of modest beverages and food at interviews, business meetings, conferences and seminars.

3.5 Accepting free or subsidised hospitality at work related social functions

Frequent social interactions that involve the provision of hospitality can undermine the professional nature of a relationship and could give rise to a future conflict of interest. Attendance at events in a representative capacity that involve official duties can be accepted, where attendance directly benefits the Council. Any event attended in an official capacity should be declared in the Gifts and Benefits Register. Attendance at events should be consistent with the functions and objectives of Council and benefit the Council as a whole.

3.6 Prizes and incentive schemes

Council officials must not enter competitions or receive incentives (such as additional frequent flyer points), gifts or prizes sponsored by persons or

Gifts and Benefits		
Owner: Governance Manager	Area: Corporate Services	POL No: 334
Date of Commencement: 2013	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

organisations that have business dealings with Council. Any prizes or incentives that may create a sense of obligation and affect their discretionary judgement as a Council official should be avoided. Instances where this occurs should be recorded in the Gifts and Benefits Register.

Receipt of an unexpected prize win, such as a lucky door prize or similar gift, while attending a function, conference or seminar in an official capacity should be disclosed in Council's Gifts and Benefits Register. All gifts and benefits given to Council officials in their official capacity are technically the property of Council and must be surrendered.

3.7 Gift, hospitality or benefit process

- All offers irrespective of whether they were rejected or accepted must be reported using Council's Gifts and Benefit Disclosure Form (see attached) for recording on the Gifts and Benefits Register.
- Offers that have been received will be actioned at the discretion of the Governance Manager, and may be disposed of, returned or redistributed.
- The Governance Manager will monitor the Gifts and Benefits Register and all Gift and Benefit Disclosure forms completed by Council officials.

3.8 Return and disposal of gifts or benefits of more than token value

If a gift or benefit of value is to be returned in person, this should preferably be done in the presence of a witness. Details of the circumstances and details of the nature and value of such gift or benefit must be entered into the Gifts and Benefits Register. Similarly, offers of hospitality that have more than a token value should be courteously refused and also included on the Gifts and Benefits Register.

If a gift or benefit is received by a Council official, which should not be accepted by the Council official and cannot reasonably be returned to the donor, the gift or benefit must be disposed of by Council in a transparent manner.

Gifts and Benefits		
Owner: Governance Manager	Area: Corporate Services	POL No: 334
Date of Commencement: 2013	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

Some options for the management of the gift or benefit include:

- a) sharing the gift amongst all staff (such as perishable items)
- b) donation to the Council Social Club (for non-perishable items or gifts of alcohol)
- c) the running of a raffle or an auction with the proceeds going to a charity.

The preferred method of disposal will be at the discretion of the Chief Executive Officer.

3.9 Restrictions on acceptance by certain Council officials

Council officials, who are involved in exercising regulatory and procurement processes, are prohibited under any circumstances to accept gifts, hospitality and benefits of any kind, where the staff are dealing with persons seeking a decision from Council, or who have sought a decision from Council.

Council officials who fall within this category include Town Planners, Development Assessment Officers, Compliance Officers such as Rangers and Parking Control Officers and staff who are involved in procurement and tendering (including the evaluation of tenders or other proposals), leasing functions or disposal of assets.

Any offer of a gift or benefit made by an external party in an actual or perceived attempt to bribe a Council official must be refused, and the offer disclosed in the Gifts and Benefits Disclosure Form and recorded in Council's Gifts Register.

3.10 Restrictions on Accepting travel and accommodation for work related functions

Any offer of free or subsidised travel and accommodation to attend a meeting or conference either as a participant or presenter must demonstrate a benefit to the Council. There cannot be a connection between the operation of the Council and

Gifts and Benefits		
Owner: Governance Manager	Area: Corporate Services	POL No: 334
Date of Commencement: 2013	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

the contractor offering the benefit. Chief Executive Officer approval must be sought prior to acceptance of the benefit and the acceptance registered in the Gifts and Benefits register.

3.11 Any Council official who is offered a bribe must refuse to accept the offer and immediately report the incident

The official must refuse to accept any gift or benefit that you the official believes is being offered as a bribe or inducement for the official to act in a particular way or make a particular decision. Council officials must report any such incident immediately to the Chief Executive Officer and the Chief Executive Officer is to report any incidents to the Lord Mayor. In some circumstances, it may be deemed appropriate to report the matter to police. The Chief Executive Officer has a legislative responsibility to report any possible corrupt conduct to the Independent Commission Against Corruption (ICAC) under the ICAC Act 1988 Section 11.

If an official becomes aware of another Council Official soliciting gifts or benefits or accepting bribes, the official must report the fact or suspicion to the Chief Executive Officer. Action taken will be in accordance with Council's Code of Conduct and Procedures for the Administration of the Model Code of Conduct.

3.12 Accepting gifts of money is strictly prohibited in all circumstances

Accepting offers of money or cash like gifts is never acceptable regardless of the circumstances. Such a gift would almost definitely be perceived as an attempt at bribery.

Gifts and Benefits		
Owner: Governance Manager	Area: Corporate Services	POL No: 334
Date of Commencement: 2013	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

3.13 Inadvertent acceptance of gifts of appreciation or gratitude above nominal value

In circumstances where a gift or benefit with a value greater than the nominal value is inadvertently accepted by Council officials and cannot easily be returned, it must immediately be declared. These circumstances could arise, for example, if a wrapped gift was received and not opened in the presence of the giver; gifts accepted for cultural, protocol or other reasons where returning the gift would be inappropriate; anonymous gifts; gifts that are delivered or received by mail; and gifts given in a public forum where attempts to refuse or return the gift would cause significant embarrassment or offence.

3.14 Giving gifts or benefits to other agencies or officials

There may be occasions when it is appropriate for Council officials to give gifts or benefits to individuals from other public or private bodies, such as a modest token of appreciation or a presentation of a gift for protocol reasons. Permission for the giving of gifts or benefits by Council officials must be obtained from the Chief Executive Officer.

3.15 Donations of complimentary tickets

On occasion, Council receives donations of complimentary tickets to local community or sporting events with the intention that they be distributed to the local community or disadvantaged groups. When complimentary tickets are received by Council officials they are to be immediately provided to the Chief Executive Officer who will determine distribution to community groups. The Lord Mayor and Chief Executive Officer will distribute those tickets as appropriate.

3.16 Breaches of this Policy

Any breaches of this Policy could constitute a possible act of misconduct, and may

AFFIXING THE COUNCIL SEAL POLICY

Contents

1. Scope.....	1
2. Purpose.....	1
3. Policy	1
4. Procedure	2
5. Definitions	2
6. History.....	2

1. Scope

This policy applies to all Council staff and Councillors.

2. Purpose

To identify when and how the Council Seal is to be affixed.

3. Policy

The affixing of the Council Seal is determined by clause 400 of the *Local Government (General) Regulation 2005*.

3.1 The Council Seal must be kept by the Lord Mayor or the Chief Executive Officer, as Council determines.

3.2 The Council Seal may be affixed to a document only in the presence of —

- (a) the Lord Mayor and the Chief Executive Officer, or
- (b) at least one councillor (other than the Lord Mayor) and the Chief Executive Officer, or
- (c) the Lord Mayor and at least one other councillor, or
- (d) at least 2 councillors other than the Lord Mayor.

3.3 The affixing of the Council Seal to a document has no effect unless the persons who were present when the Council Seal was affixed (being persons referred to in

CITY OF PARRAMATTA

clause 3.2) attest by their signatures that the Council Seal was affixed in their presence.

- 3.4 The Council Seal must not be affixed to a document unless the document relates to the business of Council and Council has resolved (by resolution specifically referring to the document) that the Council Seal be so affixed.
- 3.5 For the purposes of clause 3.4, a document in the nature of a reference or certificate of service for an employee of Council does not relate to the business of Council.

4. Procedure

- 4.1 If Council resolves to affix the Council Seal to a document, the resolution must specify the document that the Council Seal is to be affixed to.
- 4.2 When affixing the Council Seal one of the combination of persons in clause 400 *Local Government (General) Regulation 2005* must be present and attest to the affixing of the Council Seal by signature. The default persons to be present are the Lord Mayor and Chief Executive Officer.
- 4.3 The Council Seal is to be stored under lock.
- 4.4 The Council Seal must not be left unattended when removed for use.
- 4.5 The affixing of the Council Seal is to be documented in a Register.

5. Definitions

Council means City of Parramatta Council

Council Seal means the common seal of City of Parramatta Council

1. Scope	1
2. Purpose.....	1
3. Policy.....	2
4. Procedure.....	2
5. Definitions.....	4
6. History.....	4

1. Scope

This policy applies to all meetings of the Council or a Committee of Council (which comprise only of Councillors as members) are conducted in accordance with Council's Code of Meeting Practice.

This policy applies to all Councillors, Council employees, persons acting on behalf of Council and members of the public in the facilitation or attendance of meetings of Council or a Committee of Council.

This policy does not apply to any parts of a meeting closed to the public in accordance with Section 10A of the Local Government Act 1993.

2. Purpose

This policy outlines Council's commitment to comply with the requirement to webcast Council Meetings as prescribed by the Model Code of Meeting Practice for Local Councils in NSW and Guide to Webcasting Council and Committee Meetings, March 2020 issued by the Office of Local Government and how it will facilitate the recording and availability of all webcasts.

CITY OF PARRAMATTA

3. Policy

The City of Parramatta is committed to accessible, transparent and accountable decision making through the webcasting of all Council Meetings and Committee Meetings (which comprise only of Councillors as members). Webcasting of Council Meetings allows members of the public to watch or listen to the decision making process without having to physically attend a Council Meeting. Webcasting also promotes greater community confidence in the integrity of meeting practices, and the conduct of their elected representatives.

Where Council has resolved to close part of the Council Meeting to the public under Section 10A of the Local Government Act 1993, webcasting will cease for that portion of the proceedings and will resume upon the conclusion of the closed session.

Webcasts of Council Meetings are not an official record of the meeting and do not constitute the minutes of a meeting for the purposes of the Local Government Act 1993.

Statements, presentations and actions by individuals during meetings are not protected by privilege and may be subject to legal proceedings and potential liability. Council does not accept liability for any statements, presentations or actions by individuals during meetings that may be contrary to law or are defamatory or inappropriate.

Councillors and Council employees are bound by Council's Code of Conduct and Code of Meeting Practice and are expected to maintain the high standards of conduct and behavior required by these Codes.

Opinions expressed and statements made during a Council meeting are those of the individuals making them, and not those of Council. Unless set out in a resolution, Council does not endorse or support the views, opinions or information that may be expressed by individuals at Council or Committee Meetings and which may be contained in a webcast or recording of a Council or Committee Meeting.

4. Procedure

Type of Webcasting

- (a) Council Meetings and Committee Meetings (which comprise only of Councillors as members) will be webcast using audio-visual links.

Webcasting Policy		
Owner: Governance Manager	Area: Governance	POL No:
Date of Commencement:	Approval Authority: Council	Date Approved:
Amendment:	Date of Next Review:	Review: 1

Page 2 of 4

CITY OF PARRAMATTA

- (b) Council Meetings and Committee Meetings (which comprise only of Councillors as members) will be livestreamed and a recording made available after the meeting.

Timing

- (a) Council Meetings will be available live on Council's website.
 (b) Committee Meetings (which comprise only of Councillors as members) will be available on Council's website as soon as possible
 (c) A recording of a Council Meeting will be made available on Council's website within five (5) business days of the meeting being held.
 (d) Recordings of Council Meetings will be available on Council's website for a minimum of two (2) years, but for the term of Council.

Use of Webcast and Recordings

Access to webcasts of Council and Committee Meetings are available to view on Council's website for personal and non-commercial use. All webcasts of Council or Committee Meetings are subject to copyright under the Copyright Act 1968 and cannot be reused or reproduced in any way without the permission of Council.

Privacy

All efforts will be made to maintain members of the public's privacy by:

- (a) Pointing the webcasting camera away from the public gallery.
 (b) Having individual microphones for Councillors and any public microphones being turned off when not in use.
 (c) A public announcement being made at each Council Meeting to remind the public that the meeting is being livestreamed and recorded and although care is taken to maintain their privacy, their presence may be recorded.

Technical Risk Management

All efforts will be made to ensure webcasting of each Council Meeting occurs by:

- (a) Early set up and testing of equipment.
 (b) In the event equipment is non-functional prior to meeting, an alternative method is sought.
 (c) In the event equipment fails during meeting that any portion of recording available be made public and risk managed prior to next meeting.

Webcasting Policy

CITY OF PARRAMATTA

NOTE: Whilst Council will take all reasonable efforts to ensure webcasting is available for meetings, there may be situations where, due to technical difficulties beyond Council's control, webcasting or recordings of a meeting may not be available. Council takes no responsibility for and accepts no liability in the event that webcasting on Council's website is unavailable.

5. Definitions

Committee Meeting is a meeting of a committee consisting of only Councillors as members.

Council Meeting is a meeting that is administered under the Code of Meeting Practice.

Council is the City of Parramatta Council.

Webcasting is the process of delivering multimedia content via the internet in audio and/or visual format from a single content source to multiple listeners/viewers.

6. History

May 2020 – Policy was created.

Business Ethics Policy

Contents

1. Scope
2. Purpose
3. Policy – Business Ethics Principles
4. Associated documents
5. Definitions

1. Scope

This Business Ethics Policy provides guidance to all sectors of the community when conducting business with City of Parramatta Council (Council) and explains the mutual obligations and role of all parties. Business may include the supply of goods and services, use of contractors and consultants, assessment of development applications and other general dealings.

2. Purpose

The purpose of this Business Ethics Policy is to ensure all sectors of the community who conduct business with Council maintain the highest ethical business standards.

Council officials (Councillors, Administrators, members of staff of Council, Council Committee Members, Conduct Reviewers, Delegates of Council and volunteers) are required to comply with Council's Code of Conduct, policy, procedures and relevant legislation governing ethical behaviour. The same standard is expected of all individuals and organisations that deal with Council to reduce the risk of inappropriate business activities and actual, potential or perceived conflicts of interest occurring.

This Policy supports and compliments Council's Code of Conduct Framework, of which Council's Code of Conduct is a central component. The mechanisms in both this Policy and the Code of Conduct aim to protect Council's financial position, integrity and reputation of Council, and ensure that decision-making is made in a fair and ethical manner.

Business Ethics Policy		
Owner: Governance Manager	Area: Corporate Services	POL No: 313
Date of Commencement: 13 May 2019	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

3. Policy – Business Ethics Principles

Council has adopted a set of Corporate Values to guide the conduct of Council officials and provide a foundation in its approach to delivering services to the community.

3.1 Corporate Values

Customer Focus

We communicate openly with our customers, are responsive to their needs and create new relationships as our city grows

Innovation

We build on our strengths, champion creative solutions and seek new and sustainable ways to deliver superior outcomes

Integrity

We deliver on promises, act ethically, take responsibility for our actions, and speak up respectively. Integrity is the foundation on what everything is based.

Teamwork

We support the role of leadership, collaborate within and across our teams, build effective partnerships with colleagues and our community to achieve our goals

3.2 Key Business Principles

Council is committed to ethical business practices based on Council's Corporate Values and Code of Conduct. As part of this commitment, Council will ensure:

- Business dealings will be ethical and transparent and open to public scrutiny whenever possible.
- All Council decisions and considerations will be based on merit and made in a fair and impartial manner.
- potential conflicts of interest are managed ethically.

3.3 What You Can Expect From Council

Council will ensure that all its policies, procedures and practices relating to tendering, procurement, contracting, purchasing of goods or services, assessment of development applications, use of consultants and/or contractors, and engagement of strategic partners

Business Ethics Policy		
Owner: Governance Manager	Area: Corporate Services	POL No: 313
Date of Commencement: 13 May 2019	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

and sponsors are all consistent with best practice and the highest standards of ethical conduct.

Council officials are bound by Council's Code of Conduct and the policies contained within the Code of Conduct Framework.

The Code of Conduct Framework outlines that Council must act with fairness, transparency, have an accountability to the community, act with consistency and integrity in all its interactions with the community.

When conducting business with all sectors of the community, Council officials are accountable for their actions and are expected to exercise:

- Integrity
- Leadership
- Selflessness
- Impartiality
- Accountability
- Openness
- Honesty
- Respect.

To achieve probity, Council will consider and adhere to the following principles at all stages of the purchasing, tendering, contracting, partnership, sponsorship and development application processes:

- Clarity, transparency and consistency of process;
- Equity of access;
- Accountability
- Declared all actual and perceived conflicts of interest and ensure they are promptly and transparently managed;
- Obtaining best value for money for the community;
- Effectively and efficiently monitoring and evaluating performance for the benefit of the community receiving services and for feedback opportunities for the service provider;
- Seeking effective environmental and social outcomes.

All approvals, decisions and procurement activities will be clearly documented to enable transparent and effective governance across the organisation. Council will assess all applications objectively, considering all relevant and material factors in determining a decision on matters that come before the Council.

Business Ethics Policy		
Owner: Governance Manager	Area: Corporate Services	POL No: 313
Date of Commencement: 13 May 2019	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

Whilst Council's dealings will be transparent, accountable and open to public scrutiny wherever possible, there may be times when confidentiality will be required by Council. Similarly, Council will effectively manage intellectual property appropriately.

3.4 What Is Expected From You

We require all suppliers of goods and services, applicants, consultants, contactors, owners and applicants of development applications and all stakeholders undertaking business with Council to observe the following principles:

- Act ethically and honestly in all dealings with Council.
- Declare actual or perceived conflicts of interests as soon as you become aware of the conflict.
- Respect the obligations of Council Officials to abide with Council's Code of Conduct.
- Be aware and comply with legislation, Councils policies and procedures as they pertain to the business before Council, and the conditions set out in documents supplied by Council.
- Understand and comply with Council's procurement policies and procedures.
- Provide accurate, concise and reliable advice and information when required.
- Prevent the disclosure of confidential Council information.
- Refrain from engaging in any form of collusive practice including offering, Council Officials and delegates inducements or incentives, including gifts and benefits, designed to improperly influence the conduct of their business.
- Refrain from any action or contact that may be considered an attempt to influence a decision of Council Officials.
- Assist Council to prevent unethical practices in our business relationships.
- Maintain records of all dealings with Council.
- Refrain from discussing Council business or information in the media.

3.5 Consequences of Non-Compliance to this Policy

All stakeholders must comply with this Business Ethics Policy. Stakeholders should be aware of the consequences of not complying with Council's ethical requirements when doing business with Council and may include:

- Investigation, including referral of matters to relevant authorities (ICAC) and for criminal investigation (Police) where appropriate;
- Damage to reputation;
- Loss of future work or approval; and

Business Ethics Policy		
Owner: Governance Manager	Area: Corporate Services	POL No: 313
Date of Commencement: 13 May 2019	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

- Immediate termination of contract or order, at any stage.

Council officials who do not comply with this Policy will also be considered in breach of Council's Code of Conduct and subject to relevant disciplinary action.

3.6 Gifts and Benefits

Gifts, benefits or hospitality must not be received or given in connection with any prospective business dealings. Council Officials are not permitted to ask for any reward or incentive from external parties, and are expected to decline such offers of gifts and benefits during the course of their work.

Council Officials who are involved in exercising regulatory and procurement processes, are prohibited under any circumstances to accept gifts, hospitality and benefits of any kind (including lunches), where the staff are dealing with persons seeking a decision from Council, or who have sought a decision from Council within the previous 12 months.

In accordance with Council's *Gifts and Benefits Policy*, any offer or acceptance of a gift by Councillors or staff must be disclosed and recorded in Council's Gifts and Benefits Register.

3.7 Conflicts of interest

Council Officials are required to disclose, in writing, any actual, perceived or potential conflicts of interest, as well as provide Council with any other related disclosures that may be required. Council extends this requirement to any applicants, business partners, contractors and suppliers.

Conflicts of interest exist when it is likely that an individual may be influenced or perceived to be influenced by a personal interest in carrying out their public duty.

Conflicts of interest that lead to partial or biased decision making may constitute corrupt conduct and for Council officials, will be dealt with under Council's Code of Conduct.

Business Ethics Policy		
Owner: Governance Manager	Area: Corporate Services	POL No: 313
Date of Commencement: 13 May 2019	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

3.8 Privacy and Confidentially

Council has an obligation to protect the information collected about our customers and the community.

Council expects that customers will treat all information appropriately and all information collected must be used for the purpose it was provided.

Any confidential information should be treated as such and should not be revealed to persons other than those with a genuine need and authority. Suppliers handling private information on behalf of Council are expected to adhere to Council's Privacy Management Plan.

The *Government Information (Public Access) Act 2009* provides mechanisms for the public to gain access to Council's information, except in certain circumstances.

3.9 Intellectual Property

In business relationships with Council, all parties will respect each other's intellectual property rights and will formally negotiate any access, license or use of intellectual property.

Transfer of intellectual property will be addressed via contractual agreement.

3.10 Legislative and Policy Requirements

All legislative and policy requirements must be adhered to by staff, delegates, business associates and suppliers involved in the contracting or tendering for services or supplies, or other business relationships.

3.11 Development applications

In its formal role in determining a development application Council has to consider the matters prescribed in legislation in a way that is open and transparent and is seen to be fair to all parties involved.

Business Ethics Policy		
Owner: Governance Manager	Area: Corporate Services	POL No: 313
Date of Commencement: 13 May 2019	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

Council Officials are to ensure that no action, statement or communication with applicants, proponents or objectors conveys any suggestion of willingness to provide concessions or preferential treatment.

Council Officials should not be expected to offer support or otherwise for any party associated with the development application process. Council Officials involved in development applications will treat all aspects of the development application process in a professional and ethical manner.

Specific provisions of Council's *Code of Conduct* also refers to the consideration of development applications.

3.12 Council Resources

Council resources should only be used for Council purposes and in the public interest. Council Officials and customers doing business with Council are expected to be efficient, economical and ethical in their use and management of Council resources, including staff time.

3.13 Secondary or future employment of Council Officials

Council Officials have a duty to maintain public trust and confidence, and not to disclose confidential information obtained during the course of their employment, or use this information to facilitate future employment opportunities. Council Officials are required to obtain written approval from Council before entering any secondary employment arrangements. Senior staff are required to sign non-disclosure agreements when exiting employment from Council.

3.14 Contractors and subcontractors

All contracted and sub-contracted employees are expected to comply with this Policy. It is the responsibility of contractors to ensure sub-contractors they engage are aware of this Policy as they are equally bound by it.

Business Ethics Policy		
Owner: Governance Manager	Area: Corporate Services	POL No: 313
Date of Commencement: 13 May 2019	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

3.15 Reporting unethical behaviour (Public Interest Disclosure Policy)

Council is committed to promoting ethical behaviour. Reports of unethical behaviour, including fraud, corruption, maladministration or serious or substantial waste can be made to Council's:

- Public Interest Disclosures Coordinator (Internal Ombudsman) – (02) 8757 9044
- the Chief Executive Officer – (02) 9806 8110
- Council's Disclosures Officer – Level 2 or Level 3 Managers.

Reports of unethical or corrupt behaviour can also be made to:

- Independent Commission Against Corruption (ICAC) – 1800 463 909
- NSW Ombudsman – (02) 9286 1000
- Office of Local Government – (02) 4428 4100
- NSW Audit Office – (02) 9275 7100

Public officials reporting corrupt conduct, maladministration or waste can be protected by the Protected Disclosures Act 1994. This Act protects public officials who are disclosing corrupt conduct from reprisal or detrimental action and ensures disclosures are properly dealt with.

3.16 Lobbying

Lobbying is a normal, and in some circumstances an acceptable, part of the democratic process. However, lobbying that is not fair and undermines public confidence in impartial decision making falls outside the bounds of appropriate and lawful behavior.

The lobbying of Councillors and staff in certain situations is not permissible. These situations may include, but are not limited to: tender processes, engagement of services, development applications under assessment or a matter subject to legal action.

3.17 Attempts to influence Council decisions

Any action or contact that may be considered or perceived to be an attempt to influence a decision of Councillors or staff will constitute a breach of this Policy.

Any such attempt during a tender process will immediately disqualify the relevant tenderer or service provider. Councils tender documentation will contain statements prohibiting

Business Ethics Policy		
Owner: Governance Manager	Area: Corporate Services	POL No: 313
Date of Commencement: 13 May 2019	Approval Authority: Council	Date Approved: [Date]
Amendment: 4	Date of Next Review: 2024	Review period: Every 4 years

proponents from approaching Councillors and Council Staff not nominated as contact people during a tender process.

3.18 Use of Council equipment and resources and information

All Council equipment and resources should only be used for its proper official purpose. Equipment remains the property of Council at all times.

3.19 Communication

All communication between parties should be made in writing, in a clear and concise manner to minimize the risk of perception of inappropriate influence. All communications should be through the approved channels.

3.20 Workplace Health and Safety

Workplace health and safety is of paramount importance to Council. It is expected that all parties who do business with Council comply with legislative and procedural safety requirements.

3.21 Political Donations

The law requires that persons with a financial interest in, or who have made a submission in relation to a Development Application or a planning instrument, disclose certain information about political donations and other gifts that have been made to a Councillor or Council employees within the previous two years of the application or submission.

3.22 Sponsorships

All offers of sponsorship will be undertaken in accordance with Council's adopted Sponsorship and Donations Policy.

3.23 Cold Calling

Council officials will not

Public Interest Disclosure Policy

Contents

- Scope
- Purpose
- Policy
- Procedure
- Definitions

Scope

This Policy will apply to:

- Councillors;
- Council staff:
 - permanent employees, whether full-time or part-time;
 - temporary or casual employees;
 - consultants;
 - individual contractors working for City of Parramatta Council;
- employees of contractors providing services to City of Parramatta Council; and
- other people who perform Council official functions whose conduct and activities could be investigated by an investigating authority, including volunteers, the Parramatta Local Planning Panel, the Audit Risk and Improvement Committee and all other advisory Committees.

The Policy also applies to public officials of another Council or public authority who report wrongdoing relating to City of Parramatta Council.

Purpose

Council does not tolerate corrupt conduct, maladministration or serious waste of public money. The purpose of this Policy is to establish an internal reporting system for staff and Councillors to report wrongdoing without fear of reprisal. The Policy sets out who you can report wrongdoing to in City of Parramatta Council, what can be reported and how reports of wrongdoing will be dealt with by City of Parramatta Council.

This Policy is designed to compliment normal communication channels between supervisors and staff. Staff are encouraged to raise matters of concern at any time

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

with their supervisors, but also have the option of making a report about a public interest issue in accordance with this Policy and the Public Interest Disclosures Act 1994 (PID Act).

This Policy is just one in the suite of Council's complaint handling policies. Further relevant policies are:

- Complaints Handling Policy;
- Code of Conduct; and
- Fraud and Corruption Prevention Policy.

The internal reporting system established under this Policy is not intended to be used for staff grievances, which should be raised through the Grievance and Dispute Handling Policy. If a staff member makes a report under this Policy which is substantially a grievance, the matter will be referred to Human Resources to be dealt with in accordance with the Grievance and Dispute Handling Policy.

Policy

You should report any suspected wrongdoing within City of Parramatta Council, or any activities or incidents you see within Council that you believe are wrong. Council is committed to encouraging and supporting the reporting of wrongdoing and to protect those who make public interest disclosures from any adverse action as a result of their report and keeping confidential their identity where possible.

If you make a public interest disclosure in accordance with the PID Act, you will not be subject to any liability, and no action, claim or demand can be taken against you for having made the public interest disclosure. You will not have breached any confidentiality or secrecy obligations and you will have the defense of absolute privilege in defamation.

The PID Act protects reporters from detrimental action being taken against them because they have made, or are believed to have made, a public interest disclosure. It does not protect reporters from disciplinary or other management action where Council has reasonable grounds to take such action.

What can be reported?

Reports about five categories of serious misconduct:

- corrupt conduct;
- maladministration;

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

- serious and substantial waste of public money;
- government information contravention (a breach of the GIPA Act); and
- Local Government pecuniary interest contravention,

which otherwise meet the criteria of a public interest disclosure, will be dealt with under the PID Act and according to this Policy. Details about these types of conduct are outlined below. More information about what can be reported under the PID Act can be found in the NSW Ombudsman's Guideline B2 "What should be reported?".

All other wrongdoing or suspected wrongdoing should be reported and dealt with in line with the relevant policies. This might include:

- harassment or unlawful discrimination;
- practices that endanger the health or safety of staff or the public.

Even if these reports are not dealt with as public interest disclosures, City of Parramatta Council recognises such reports may raise important issues. We will respond to all reports and make every attempt to protect the staff member making the report from reprisal. For further information, see:

- Code of Conduct;
- Fraud and Corruption Prevention Po
- Grievance and Dispute Handling Policy;
- Complaints Handling Policy;
- Workplace Bullying & Harassment Policy;
- Work Health Safety Policy, Procedure and Statement;
- Drug and Alcohol Policy;
- Smoke Free Workplace Policy;
- Interaction Between Councillors And Staff; and
- Statement of Business Ethics.

Corrupt conduct

Corrupt conduct is the dishonest or partial exercise of official functions by a public official.

For example, this could include:

- the improper use of knowledge, power or position for personal gain or the advantage of others;
- acting dishonestly or unfairly, or breaching public trust;
- a Council official being influenced by a member of public to use their position in a way that is dishonest, biased or breaches public trust.

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

Maladministration

Maladministration is conduct that involves action or inaction of a serious nature that is contrary to law, unreasonable, unjust, oppressive or improperly discriminatory or based wholly or partly on improper motives.

For example, this could include:

- making a decision and/or taking action that is unlawful
- refusing to grant an approval for reasons that are not related to the merits of their application.

Serious and substantial waste of public money

Serious and substantial waste is the uneconomical, inefficient or ineffective use of resources that could result in losing or wasting public money.

For example, this could include:

- not following a competitive tendering process for a large scale contract
- having inadequate or no processes in place for a system involving large amounts of public funds.

Government information contravention (Breach of the GIPA Act)

A breach of the Government Information (Public Access) Act 2009 (GIPA Act) is a failure to properly fulfil functions under that Act.

For example, this could include:

- destroying, concealing or altering records to prevent them from being released;
- knowingly making decisions that are contrary to the legislation;
- intentionally overlooking documents that are clearly covered by an access application;
- directing another person to make a decision that is contrary to the legislation.

Local Government pecuniary interest contravention

A Local Government pecuniary interest contravention is a failure to comply with requirements under the *Local Government Act 1993* relating to the management of pecuniary interests. These include obligations to lodge disclosure of interests returns, disclose pecuniary interests at Council and Council committee meetings and leave the meeting while the matter is being discussed. A pecuniary interest is an interest

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

that a person has in a matter because of a reasonable likelihood or expectation of appreciable financial gain or loss to the person.

For example, this could include:

- a senior Council staff member recommending a family member for a Council contract and not declaring the relationship
- a Councillor participating in consideration of a DA for a property they or their family have an interest in.

Procedure

The role of Council Staff and Councillors

Staff and Councillors play an important role in contributing to a workplace where known or suspected wrongdoing is reported and dealt with appropriately. All Council staff and Councillors are obliged to:

- report all known or suspected wrongdoing and support those who have made reports of wrongdoing;
- if requested, assist those dealing with the report, including supplying information on request, cooperating with any investigation and maintaining confidentiality;
- treat any staff member or person dealing with a report of wrongdoing with courtesy and respect; and
- respect the rights of any person the subject of reports.

Staff and Councillors must not:

- make false or misleading reports of wrongdoing; and/or
- victimise or harass anyone who has made a report.

Additionally, the behaviour of all Council staff and Councillors involved in the internal reporting process must adhere to the City of Parramatta Council's Code of Conduct. A breach of the Code could result in disciplinary action.

Those persons who make disclosures in accordance with the PID Act will be protected from adverse actions as a result of their report.

The role of Council

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

City of Parramatta Council has a responsibility to establish and maintain a working environment that encourages staff and Councillors to report wrongdoing and supports them when they do. This includes keeping the identity of reporters confidential where practical and appropriate, and taking steps to protect reporters from reprisal and manage workplace conflict.

Council will assess all reports of wrongdoing it receives from staff and Councillors and deal with them appropriately. Once wrongdoing has been reported, Council takes 'ownership' of the matter. This means it is up to us to decide whether a report should be investigated, and if so, how it should be investigated and by whom. Council will deal with all reports of wrongdoing fairly and reasonably, and respect the rights of any person the subject of a report.

City of Parramatta Council must report on our obligations under the PID Act and statistical information about public interest disclosures in our annual report and to the NSW Ombudsman every six months.

To ensure Council complies with the PID Act and deals with all reports of wrongdoing properly, all staff and Councillors with roles outlined below and elsewhere in this Policy will receive training on their responsibilities.

Roles of key positions

1. Chief Executive Officer

The Chief Executive Officer (CEO) has ultimate responsibility for maintaining the internal reporting system and workplace reporting culture, and ensuring that City of Parramatta Council complies with the PID Act. The CEO can receive reports from staff and Councillors and has a responsibility to:

- assess reports received by or referred to them, to determine whether or not the report should be treated as a public interest disclosure, and to decide how the report will be dealt with;
- deal with reports made under the Council's code of conduct in accordance with Procedures for the Administration of the Model Code of Conduct for Local Councils in NSW;
- ensure there are strategies in place to support reporters, protect reporters from reprisal and manage workplace conflict that may arise in relation to a report;
- make decisions following any investigation or appoint an appropriate decision-maker;
- take appropriate remedial action where wrongdoing is substantiated or systemic problems are identified;

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

- refer actual or suspected corrupt conduct to the Independent Commission Against Corruption (ICAC);
- refer any evidence of a reprisal offence under section 20 of the PID Act to the Commissioner of Police or the ICAC; and
- attend relevant training, maintain an awareness of the *Public Interest Disclosure Act* and promote the PID Policy within Council to create an environment where staff are comfortable and confident to report wrongdoing.

2. Lord Mayor

The Lord Mayor can receive reports from staff and Councillors about the CEO.

Where the Lord Mayor receives such reports, the Lord Mayor has a responsibility to:

- assess the reports to determine whether or not they should be treated as a public interest disclosure, and to decide how they will be dealt with;
- deal with reports made under the Council's Code of Conduct in accordance with the Procedures for the Administration of the Model Code of Conduct for Local Councils in NSW;
- refer reports to an investigating authority, where appropriate;
- liaise with the Disclosures Coordinator to ensure there are strategies in place to support reporters, protect reporters from reprisal and manage workplace conflict that may arise in relation to a report;
- refer actual or suspected corrupt conduct to the ICAC;
- refer any evidence of a reprisal offence under section 20 of the PID Act to the Commissioner of Police or the ICAC; and
- attend relevant training, maintain an awareness of the *Public Interest Disclosure Act* and promote the PID Policy within Council to create an environment where staff are comfortable and confident to report wrongdoing.

3. Disclosures Coordinator

The Disclosures Coordinator has a central role in Council's internal reporting system. The Disclosures Coordinator can receive and assess reports, and is the primary point of contact in Council for the reporter. The Disclosures Coordinator has a responsibility to:

- assess reports to determine whether or not a report should be treated as a public interest disclosure, and to decide how each report will be dealt with (either under delegation or in consultation with the CEO);

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

- deal with reports made under the Council's code of conduct in accordance with Procedures for the Administration of the Model Code of Conduct for Local Councils in NSW;
- attend relevant training, maintain an awareness of the *Public Interest Disclosure Act* and promote the PID Policy within Council to create an environment where staff are comfortable and confident to report wrongdoing;
- coordinate Council's response to a report;
- acknowledge reports and provide updates and feedback to the reporter;
- assess whether it is possible and appropriate to keep the reporter's identity confidential;
- assess the risk of reprisal and workplace conflict related to or likely to arise out of a report, and develop strategies to manage any risk identified;
- where required, provide or coordinate support to staff involved in the reporting or investigation process, including protecting the interests of any officer the subject of a report;
- ensure Council complies with the PID Act; and
- provide six-monthly reports to the NSW Ombudsman in accordance with section 6CA of the PID Act.

4. Disclosures Officers

Disclosures Officers are additional points of contact within the internal reporting system. They can provide advice about the system and the internal reporting Policy, receive reports of wrongdoing and assist staff and Councillors to make reports.

Disclosures Officers have a responsibility to:

- document in writing any reports received verbally, and have the document signed and dated by the reporter;
- make arrangements to ensure reporters can make reports privately and discreetly when requested, if necessary away from the workplace;
- discuss with the reporter any concerns they may have about reprisal or workplace conflict;
- carry out preliminary assessment and forward reports to the disclosures coordinator or CEO for full assessment; and
- attend/deliver relevant training, maintain an awareness of the *Public Interest Disclosure Act* and promote the PID Policy within Council to create an environment where staff are comfortable and confident to report wrongdoing.

5. Supervisors and Line Managers

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

Supervisors and Line Managers play an important role in managing the immediate workplace of those involved in or affected by the internal reporting process. Supervisors and Line Managers should be aware of the internal reporting process (contained within this Policy) and are responsible for creating a local work environment where staff are comfortable and confident about reporting wrongdoing. They have a responsibility to:

- encourage staff to report known or suspected wrongdoing within the organisation and support staff when they do;
- identify reports made to them in the course of their work which could be public interest disclosures, and assist the staff member to make the report to an officer authorised to receive public interest disclosures under this Policy;
- implement local management strategies, in consultation with the disclosures coordinator, to minimise the risk of reprisal or workplace conflict in relation to a report; and
- notify the Disclosures Coordinator or CEO immediately if they believe a staff member is being subjected to reprisal as a result of reporting wrongdoing, or in the case of suspected reprisal by the CEO, notify the Lord Mayor.

Assessment of Reports

All reports will be promptly and thoroughly assessed to determine what action will be taken to deal with the report and whether or not the report will be treated as a public interest disclosure.

The *Public Interest Disclosures Act* requires that the disclosure is acknowledged within 45 days of its receipt and including providing a copy of this Policy. Council aims to acknowledge disclosures more promptly than is required in the legislation. Furthermore, the person who made the disclosure must be advised within six (6) months of the disclosure having been made of what action has been taken or is proposed to be taken in respect of the disclosure.

All disclosures must be referred by the CEO (or Lord Mayor if the disclosure is about the CEO) to the Disclosures Coordinator. The Disclosures Coordinator is responsible for assessing reports, in consultation with the CEO where appropriate. All reports will be assessed on the information available to the Disclosures Coordinator at the time. It is up to Disclosures Coordinator to decide whether an investigation should be carried out and how that investigation should be carried out. In assessing a report, Disclosures Coordinator may decide that the report should be referred elsewhere or that no action should be taken on the report.

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

All matters referred as a PID or assessed as a possible PID, including matters where no action has been taken, will be securely and confidentiality stored in the event of further reporting.

When will a report be treated as a Public Interest Disclosure?

Council will treat a report as a public interest disclosure if it meets the relevant criteria under the PID Act. These criteria are:

- the report must be about one of the following five categories of serious wrongdoing – corrupt conduct, maladministration, serious and substantial waste of public money, breach of the GIPA Act, or local government pecuniary interest contravention;
- the person making the disclosure must honestly believe on reasonable grounds that the information shows or tends to show wrongdoing;
- the report has to be made to either the CEO or, for reports about the CEO, the Lord Mayor, a position nominated in this Policy, an investigating authority or in limited circumstances to a Member of Parliament or journalist.

Reports by staff are not public interest disclosures if they:

- mostly question the merits of government policy;
- are made with the sole or substantial motive of avoiding dismissal or other disciplinary action.

Who can receive a report within Council?

Staff are encouraged to report general wrongdoing to their supervisor. However, the PID Act requires that for a report to be a public interest disclosure, it must be made to certain public officials defined in this Policy or any supporting procedures.

The following positions are the only people within Council who are authorised to receive a public interest disclosure. Any supervisor who receives a report that they believe may be a public interest disclosure is obliged to assist the staff member to make the report to one of the positions listed below. The broader responsibilities of these positions are outlined under Roles and Responsibilities.

If your report involves a Councillor, you should make it to the CEO. If your report relates to the CEO, you should make it to the Lord Mayor.

Contact List – please refer to Council's intranet site, Insite, for individual contact details.

Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

Who can receive a report outside of the City of Parramatta Council?

Staff and Councillors are encouraged to report wrongdoing within Council, but internal reporting is not your only option. In certain circumstances, you can also make a public interest disclosure to some external parties, as outlined below in Investigating Authorities and Members of Parliament and Journalists.

Investigating Authorities

The PID Act lists a number of investigating authorities in NSW that staff and Councillors can report wrongdoing to and the type of wrongdoing each authority can deal with. In certain circumstances, it may be preferable to make a report of wrongdoing to an investigating authority, for example a report about either the CEO or the Lord Mayor.

The relevant investigating authorities are the:

- Independent Commission Against Corruption (ICAC) – for reports about corrupt conduct;
- NSW Ombudsman – for reports about maladministration
- Information Commissioner – for disclosures about a breach of the GIPA Act
- Office of Local Government – for disclosures about local Councils
- Auditor-General of the NSW Audit Office – to report serious and substantial waste.

You should contact the relevant investigating authority for advice about how to make a disclosure to them. Contact details for each investigating authority are provided at the end of this Policy.

You should be aware that the investigating authority may well discuss any such reports with Council. We will make every effort to assist and cooperate with the investigating authority to ensure the matter is dealt with appropriately and there is a satisfactory outcome. We will also provide appropriate support, protections and assistance to staff or Councillors who report wrongdoing to an investigating authority, if we are made aware that this has occurred.

Members of Parliament or Journalists

There are only limited circumstances where reports to a Member of Parliament or a Journalist will have protections of the PID Act. To be covered under the PID Act,

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

staff reporting wrongdoing to a Member of Parliament (MP) or a journalist must have already made substantially the same report to one of the following:

- the CEO;
- a person nominated in this Policy, including the Lord Mayor for reports about the CEO; and
- an investigating authority.

Also, Council or the investigating authority that received your initial report must have either:

- decided not to investigate the matter;
- decided to investigate the matter, but not completed the investigation within six months of the original report;
- investigated the matter but not recommended any action as a result; or
- not told the person who made the report, within six months of the report being made, whether the matter will be investigated.

Most importantly – to be protected under the PID Act – if you report wrongdoing to an MP or a journalist, you will need to be able to prove that you have reasonable grounds for believing that the disclosure is substantially true and that it is in fact substantially true.

Other external reporting

If you report wrongdoing to a person or authority that is not listed above, or make a report to an MP or journalist without following the steps outlined above, you will not be protected under the PID Act. This may mean you will be in breach of legal obligations or our Code of Conduct – by, for example, disclosing confidential information.

For more information about reporting wrongdoing outside Council, contact the Disclosures Coordinator or the NSW Ombudsman's Public Interest Disclosures Unit. Their contact details are provided at the end of this Policy.

How to make a Report

You can report wrongdoing in writing or verbally. You are encouraged to make a report in writing as this can help to avoid any confusion or misinterpretation. Council's Public Interest Disclosure Internal Reporting Form (available on Insite) is also available for staff or Councillors to use to make a report.

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

If a report is made verbally, the person receiving the report will make a comprehensive record of the report and ask the person making the report to sign this record. The reporter should keep a copy of this record.

Can a report be anonymous?

There will be some situations where you may not want to identify yourself when you make a report. Although these reports will still be dealt with by the Council, it is best if you identify yourself. This allows us to provide you with any necessary protection and support, as well as feedback about what action is to be taken or has been taken to deal with the issues raised in the report, or the outcome of any investigation. It is important to realise that an anonymous disclosure may not prevent you from being identified by the subjects of the report or your colleagues. If we do not know who made the report, it is very difficult for us to prevent any reprisal should others identify you.

Feedback to staff who report wrongdoing

Staff and Councillors who report wrongdoing will be told what is happening in response to their report.

1. Acknowledgement

When you make a report, Council will contact you to confirm that your report has been received and to advise:

- the timeframe within which you will receive further updates; and
- the name and contact details of the people who can tell you what is happening or handle any concerns you may have.

After a decision is made about how your report will be dealt with, Council will send you an acknowledgment letter, providing:

- information about the action that will be taken in response to your report;
- the likely timeframes for any investigation or other action; and
- information about the internal and external resources or services available that you can access for support.

You will receive an acknowledgement within ten (10) working days from the date you make your report. We will also advise you if we decide to treat your report as a public interest disclosure and provide you with a copy of this Policy at that time, as required by the PID Act.

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

NB: If you make a report which meets the requirements of the PID Act but the report was made under a statutory or legal obligation or incidental to the performance of your day to day functions, you will not receive an acknowledgement letter or a copy of this Policy.

2. Progress updates

While your report is being dealt with, such as by investigation or making other enquiries, you will be given:

- information about the progress of the investigation or other enquiries and reasons for any delay
- advice of any decision by the Council not to proceed with the matter
- information about whether your identity needs to be disclosed for the purposes of investigating the matter or making enquiries, and an opportunity to talk about this beforehand.

3. Feedback

Once the matter has been finalised you will be given:

- enough information to show that adequate and appropriate action was taken and/or is proposed to be taken in response to your disclosure and any problem that was identified
- advice about whether you are likely to be called as a witness in any further matters, such as disciplinary or criminal proceedings.

Maintaining Confidentiality

Council realises reporters may want their identity, and the fact they have made a report, to remain confidential. This can help to prevent any action being taken against them for reporting wrongdoing, such as the release of confidential information.

Where possible and appropriate we will take steps to keep your identity, and the fact you have reported wrongdoing, confidential. We will discuss with you whether it is possible to keep your identity confidential.

If confidentiality cannot be maintained, we will develop a plan to support and protect you from reprisal in consultation with you.

If you report wrongdoing, it is important that you only discuss your report with those responsible for dealing with it. This will include the Disclosures Coordinator and the

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

CEO, or in the case of a report about the CEO, the Disclosures Coordinator and the Lord Mayor. The fewer people who know about your report, before and after you make it, the more likely it will be that we can protect you from any reprisal.

Any staff or Councillors involved in the investigation or handling of a report, including witnesses, are also required to maintain confidentiality and not disclose information about the process or allegations to any person except for those people responsible for handling the report.

Managing the risk of reprisal and workplace conflict

When a staff member or Councillor reports wrongdoing, Council will undertake a thorough risk assessment to identify the risk to you of detrimental action in reprisal for reporting, as well as indirect but related risks of workplace conflict or difficulties. The risk assessment will also identify strategies to deal with those risks and determine the level of protection and support that is appropriate.

Depending on the circumstances, Council may:

- relocate the reporter or the staff member who is the subject of the allegation within the current workplace
- transfer the reporter or the staff member who is the subject of the allegation to another position for which they are qualified
- grant the reporter or the staff member who is the subject of the allegation leave of absence during the investigation of the disclosure.

These courses of action are not punishment and will only be taken in consultation with the reporter. Council uses the NSW Ombudsman's Public Interest Disclosures Guideline C4 – Assessing Risk of Reprisals and Conflict as the basis of its risk assessment.

Protection against reprisals

Council will not tolerate any reprisal against staff or Councillors who report wrongdoing or are believed to have reported wrongdoing.

The PID Act provides protection for staff and Councillors who have made a public interest disclosure by imposing penalties on anyone who takes detrimental action against another person substantially in reprisal for that person making a public interest disclosure. These penalties also apply to cases where a person takes

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

detrimental action against another because they believe or suspect the other person has made or may have made a public interest disclosure, even if they did not.

Detrimental action means action causing, comprising or involving any of the following:

- injury, damage or loss;
- intimidation or harassment;
- discrimination, disadvantage or adverse treatment in relation to employment;
- dismissal from, or prejudice in, employment; and
- disciplinary proceedings.

A person who is found to have committed a reprisal offence may face criminal penalties such as imprisonment and/or fines, and may be required to pay the victim damages for any loss suffered as a result of the detrimental action. Taking detrimental action in reprisal is also a breach of the Council's Code of Conduct which may result in disciplinary action. In the case of Councillors, such disciplinary action may be taken under the misconduct provisions of the Local Government Act 1993.

It is important for staff and Councillors to understand the nature and limitations of the protection provided by the PID Act.

Responding to allegations of reprisal

If you believe that detrimental action has been or is being taken against you or someone else in reprisal for reporting wrongdoing, you should tell your supervisor, the Disclosures Coordinator or the CEO immediately. In the case of an allegation of reprisal by the CEO, you can report this to the Lord Mayor.

All supervisors and Disclosure Officers must notify the Disclosures Coordinator or the CEO if they suspect that reprisal against a staff member is occurring or has occurred, or if any such allegations are made to them. In the case of an allegation of reprisal by the CEO, the Lord Mayor can be notified.

If the City of Parramatta Council becomes aware of or suspects that reprisal is being, or has been taken, against a person who has made a disclosure, Council will:

- assess the allegation of reprisal to decide whether the report should be treated as a public interest disclosure and whether the matter warrants investigation or if other action should be taken to resolve the issue;

Name of Policy		
Owner: Risk & Audit Manager	Area: Corporate Services	POL No: 228
Date of Commencement: 2005	Approval Authority: Council	Date Approved: [Date]
Amendment: 5	Date of Next Review: 2022	Review: Every 2 years

- if the reprisal allegation warrants investigation, ensure this is conducted by a senior and experienced member of staff;
- if it is established that reprisal is occurring against someone who has made a report, take all steps possible to stop that activity and protect the reporter;
- take appropriate disciplinary action against anyone proven to have taken or threatened any action in reprisal for making a disclosure;
- refer any breach of Council's Code of Conduct (reprisal action) by a Councillor or the CEO to the Code of Conduct Complaints Coordinator (the Internal Ombudsman Shared Service) and depending on the nature of the complaint, to the Office of Local Government, and
- refer any evidence of an offence under section 20 of the PID Act to the ICAC or NSW Police Force.

If you allege reprisal, you will be kept informed of the progress and outcome of any investigation or other action taken in response to your allegation.

If you have reported wrongdoing and are experiencing reprisal which you believe is not being dealt with effectively, contact the Disclosures Coordinator (IOSS), the Office of Local Government, the Ombudsman or the ICAC (depending on the type of wrongdoing you reported). Contact details for these investigating authorities are included at the end of this Policy.

Protection against legal action

If you make a public interest disclosure in accordance with the PID Act, you will not be subject to any liability, and no action, claim or demand can be taken against you for having made the public interest disclosure. You will not have breached any confidentiality or secrecy obligations and you will have the defence of absolute privilege in defamation.

Support for those reporting wrongdoing

Council will make sure that staff who have reported wrongdoing, regardless of whether their report is treated as a public interest disclosure, are provided with access to any professional support they may need as a result of the reporting process – such as stress management or counselling services.

Access to support may also be available for other staff involved in the internal reporting process where appropriate. Reporters and other staff involved in the process can discuss their support options with the Disclosures Coordinator.

Sanctions for making false or misleading statements

It is important all staff and Councillors are aware that it is a criminal offence under the PID Act to wilfully make a false or misleading statement when reporting wrongdoing. The City of Parramatta Council will not support staff or Councillors who wilfully make false or misleading reports. Such conduct may also be a breach of the Code of Conduct resulting in disciplinary action. In the case of Councillors, disciplinary action may be taken under the misconduct provisions of the Local Government Act 1993.

The rights of persons the subject of a report

Council is committed to ensuring staff or Councillors who are the subject of a report of wrongdoing are treated fairly and reasonably. This includes keeping the identity of any person the subject of a report confidential, where this is practical and appropriate.

If you are the subject of the report, you will be advised of the allegations made against you at an appropriate time and before any adverse findings. At this time, you will be:

- advised of the details of the allegation
- advised of your rights and obligations under the relevant related policies and procedures
- kept informed about the progress of any investigation
- given a reasonable opportunity to respond to any allegation made against you
- told the outcome of any investigation, including any decision made about whether or not further action will be taken against you.

Where the reported allegations against the subject officer are clearly wrong, or have been investigated and unsubstantiated, the subject officer will be supported by Council. The fact of the allegations and any investigation will be kept confidential unless otherwise agreed to by the subject officer.

More information

Staff can seek advice and guidance from the Disclosures Coordinator (the IOSS on (02) 8757 9617) or at internalombudsman@cityofparramatta.nsw.gov.au and the NSW Ombudsman's website at www.ombo.nsw.gov.au.

Definitions

<i>Corrupt Conduct</i>	deliberate or intentional wrongdoing, not negligence or a mistake
<i>Disclosures Coordinator</i>	Council Officer responsible for managing Council's response to Public Interest Disclosures
<i>Disclosures Officers</i>	Council Officers trained to receive Public Interest Disclosures (ie, Any Level 2 or Level 3 Manager)
<i>ICAC</i>	Independent Commission Against Corruption
<i>Local Government Authority</i>	(a) A Council (b) A county Council within the meaning of the Local Government Act 1993
<i>Maladministration</i>	irregular and unauthorised use of public money or substantial mismanagement of public resources
<i>Pecuniary Interest</i>	private interests conflict with the duty to act in the public interest
<i>PID Act</i>	Public Interest Disclosures Act 1994
<i>Public Authority</i>	Any public authority whose conduct or activities may be investigated by an investigating authority, and includes (without limitation) each of the following: (a) a public service agency; (b) a state owned corporation and any subsidiary of a state owned corporation (c) a local government authority (d) the NSW Police Force and the Law Enforcement Conduct Commission (e) the Department of Parliamentary Services, the Department of Legislative Assembly and the Department of the Legislative Council
<i>Public interest disclosure</i>	That is, a disclosure of information that the person making the disclosure honestly believes, on reasonable grounds, shows or tends to show corrupt conduct, maladministration, serious and substantial waste of public money, government information contravention or local government pecuniary interest contravention, by Council, Councillors or staff or by another public authority or any of its officers. 'Public Interest Disclosure' is the new term for a protected disclosure.
<i>Public official</i>	An individual who is an employee of or otherwise in the service of a public authority

Councillors Workshops and Briefing Sessions Policy and Procedure

Contents

- Scope
- Purpose
- Policy
- Procedure
- Definitions

Scope

This Policy applies to Councillors and Council employees, including contract and casual employees engaged by Council, members of Council Committees and external parties.

Purpose

The purpose of Workshops and Briefing Sessions is to engage with Councillors, on matters of significant importance and interest.

The Workshops and Briefing Sessions allow the Lord Mayor, Councillors, Executive and Staff to:

- clarify issues, exchange information (including confidential) and to seek feedback/general direction on proposals
- provide a forum for discussion on initiatives and discuss options in determining Council's strategic corporate direction
- ensure effective communications and information flow between staff and Councillors
- provide a team building forum in which to develop trust and understanding between those attending the workshops or briefing.

Councillor Workshops and Briefing Sessions are often held prior to Council making a resolution in a Council Meeting. Workshops and Briefing Sessions are not decision-making forums but an opportunity to provide background information or context and present options that supports a resolution or action in Council. Information provided to these forums are confidential. Feedback obtained from Councillors at a Workshop or Briefing Session will help guide Council Officers in preparing reports or other documents

Name of Policy

CITY OF PARRAMATTA

seeking a decision by Council and ensure that all issues and views are properly canvassed in the report or other documents such as submissions.

Policy

Under the Local Government Act 1993, a Council can hold a Workshop or Briefing Session under its general powers as a body corporate. Workshops and Briefing Sessions are informal gatherings and can provide useful background information to Councillors on the business of Council. Councillor Workshops and Briefing Sessions may involve Councillors, Council staff and invited external participants.

Council Workshops and Briefings often provide Councillors with information that leads to forming a Council position on a particular item or issue. In a majority of cases the information presented is provided under the agreement and understanding that it requires the knowledge or feedback from Councillors before a final position can be provided to Council in the form of a report. The information provided in these forums is confidential.

Respect

Councillor Workshops and Briefings may be attended by external participants and Council staff, including a range of staff who are not listed under the Interaction Between Councillors and Staff Policy.

Councillors and staff are to observe the conduct obligations of the Code of Conduct, and to remain courteous, professional and respectful of all attendees. The Chair will call to order anyone who behaves in a manner contrary to the conduct obligations of the Code of Conduct, including the use of offence behaviour or language.

Confidentiality

Matters discussed in Council Workshops and Briefings are generally confidential in that they contain information that could provide an unfair or false representation of Council's position on a particular matter. Information provided as part of Workshops and Briefings that is marked confidential should be treated the same as matters held in the Confidential Agenda in Council. Photos or videos of presentations are not permitted. Confidential information distributed to an external party or media would be considered as a breach of Section 664* of the Local Government Act in that, Councillors must not, at any time, disclose materials classified as confidential in reports presented to our discussions held at Council.

CITY OF PARRAMATTA

Confidential items for the purpose of this policy relate to the same as per the Council Code of Meeting Practice:

- a) Information that would, if disclosed, confer a commercial advantage on a person with whom the council is conducting (or proposes to conduct) business
- b) Commercial information of a confidential nature that would, if disclosed:
 - I. Prejudice the commercial position of the person who supplied it, or
 - II. Confer a commercial advantage on a competitor of the council, or
 - III. Review a trade secret
- c) Information that would, if disclosed, prejudice the maintenance of law
- d) Matters affecting the security of the council, Councillors, council staff or council property
- e) Advice concerning litigation, or advice that would otherwise be privileged from production in legal proceedings on the ground of legal professional privilege.
- f) Alleged contraventions of any code of conduct requirements applicable under Section 440.

Conflicts of Interests

Councillors and staff are reminded of their obligations under the Code of Conduct. Conflicts of interests are to be managed in accordance with the Code. Councillors and staff are responsible for the identification, declaration and management of any interests. Forms will be made available at workshops to assist in declaring interests.

Chair

The Lord Mayor or in their absence, Deputy Lord Mayor, will Chair Workshops/Briefing Sessions.

In the absence of the Lord Mayor and Deputy Lord Mayor, the Chair will be selected from amongst the Councillors in attendance.

Quorum

Although Workshops and Briefing Sessions are not decision-making forums, attendance by Councillors at these sessions provide an opportunity for informal discussion on a matter prior to it being considered at a Council Meeting.

Name of Policy		
Owner: Manager Governance	Area: Governance	POL No: 381
Date of Commencement: 7/8/18	Approval Authority: Council	Date Approved:
Amendment 4	Date of Next Review: 2024	Review: 4 years

CITY OF PARRAMATTA

A quorum for the purposes of whether a Workshop or Briefing Session will proceed will be at least four Councillors.

Remote Attendance

Workshops and Briefing Sessions are held in the Level 12 Boardroom at 126 Church Street, Parramatta.

Due to COVID-19, the introduction of remote Workshops/Briefing Sessions provided Councillors with the flexibility to attend sessions, whilst juggling other work/personal commitments.

Attendance at Workshops/Briefing Sessions will continue to remain flexible, with provisions being made for in-person and remote attendance.

Catering

Light refreshments will be provided at Workshops/Briefing Sessions in accordance with Councillors' Expenses and Facilities Policy.

Procedure

Workshops and briefing sessions can be organised:

1. As a result of a resolution at a Council Meeting;
2. As approved by the Executive Team in consultation with the Lord Mayor.

The following table outlines the steps and responsibilities for organising Workshops and Briefing Sessions:

Step	Detail	Responsibility
1	Annual dates for Workshops and Briefing Sessions are set, calendar placeholder invites sent to Councillors and Executive Team, and dates entered into the Councillor Portal and on Council's intranet	Governance
2	Request sent to Governance for a Workshop or Briefing session	Facilitator
3	Date tentatively booked in the Workshop / Briefing Session schedule	Governance
4	Confirmation of Workshop / Briefing sessions	Executive Team
5	Complete Workshop / Briefing Session briefing note and send to Governance	Facilitator
6	Update calendar invite to "CONFIRMED" with details of the session. Attach briefing note and add any additional internal invitees	Governance
7	Send details of the confirmed Workshop / Briefing Session to external invitee	Facilitator
8	Prepare presentation material	Facilitator
9	Coordinate Councillor RSVPs for confirmed Workshop/Briefing Session	Governance
10	If confirmed number of Councillors is less than quorum, cancel session	Lord Mayor / CEO
11	Hold session and capture Councillor and staff attendance	Facilitator
12	Complete Outcome Summary and send to Governance	Facilitator
13	Upload Outcome Summary and any presentations / handouts to Councillor Portal	Governance

Legislative Compliance Policy

Contents

1. Scope
2. Purpose
3. Policy
4. Definitions
5. Related Resources

1. Scope

This policy applies to all Council Officials at the City of Parramatta Council and works in concert with our Governance Framework and the *City of Parramatta Legislative Compliance Procedure*.

2. Purpose

The purpose of this policy is to set in place Council's commitment to a culture of compliance in line with the principles based on the *Australian Standards AS/ISO 19600: 2015 Compliance Management Systems – Guidelines* and Council's Governance Framework to ensure:

1. That the Council complies with all applicable legislative requirements set by the NSW and Commonwealth Governments
2. That Council has in place a continual improvement system for legislative compliance as advocated by ISO 19600:2015 based around the principles of 'Plan-Do-Check-Act'.
3. Promotes a culture of good governance and compliance in line with Council's Governance Framework
4. Prevents, and where necessary, identifies and responds to breaches of laws, regulations, codes, policies and organisational procedures and standards occurring within the Council
5. Assists the Council in achieving the highest standards of governance, and
6. Has in place a Compliance Management System which allows for continuous review and improvement for all its business processes

3. Policy

3.1 Our compliance obligations

As a government agency, Council has a higher responsibility to identify and comply with its obligations in law, regulations, industrial and organisational standards, Ministerial Directives, Council policies and procedures, principles of good governance as established by our

Legislative Compliance Policy		
Owner: Governance	Area: Governance	POL No:
Date of Commencement:	Approval Authority: Council	Date Approved:
Amendment	Date of Next Review:	Review:

CITY OF PARRAMATTA

Governance Framework, accepted ethical standards, risk management, community expectations and Council's values.

Council also has an obligation to ensure that staff have a good understanding of their legislative responsibilities. IOSS (Internal Ombudsman Shared Service) in undertaking investigations has noted that Council '*needs to improve ...staff's understanding of legislative compliance within their roles at Council*'. In particular, they have recommended that Council should:

- (a) Provide a thorough training program for relevant staff on the importance and necessity of understanding and interpreting and applying legislation.
- (b) Running an awareness campaign for relevant staff to explain the role of Local Government Legal, and
- (c) Provide training in understanding and applying the Local Government Legal system product within Council to identify legislative changes and how they impact upon their business areas.

AS/ISO 19600:2015 places emphasis on compliance being 'embedded' in the culture of an organisation and that it is integrated with an organisation's financial, risk, quality, environmental health and safety management processes as well as its operational requirements and procedures. This policy is based upon the following general principles:

- Compliance obligations are identified and assessed for mitigation.
- Compliance and risk are managed at the operational level, with accountability through defined reporting structures.
- Staff training needs are identified and addressed.
- Behaviours that create and support compliance are encouraged and behaviours that compromise compliance are not tolerated.
- Controls exist to manage key compliance obligations, particularly through Council's Audit, Risk & Improvement Committee (ARIC) and actively work to achieve desired behaviours.
- Council is able to demonstrate its Compliance Management System through documentation and practice, and
- The Compliance Management System will be regularly reviewed and opportunities for improvement identified as part of Council's Audit Program`.

The consequences of Council breaching its compliance obligations can be either a minimal or a severe (civil and criminal) impact. Both have the ability to damage Council's reputation and foster a loss of confidence in the organisation.

CITY OF PARRAMATTA

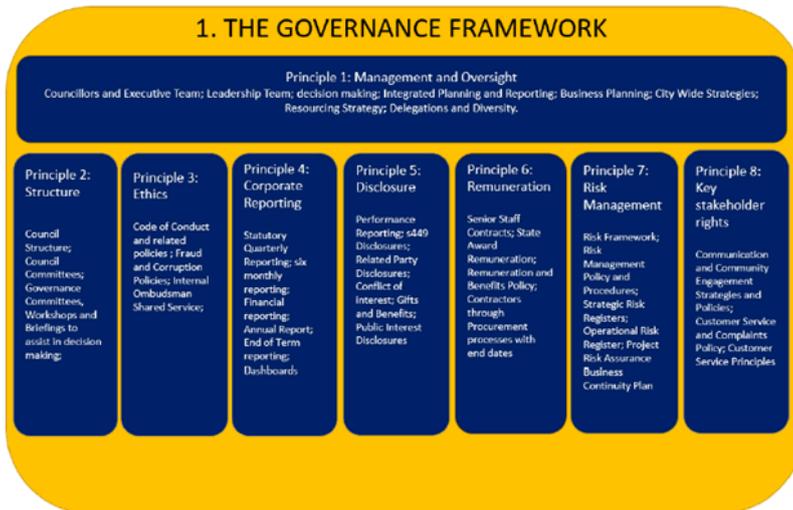

3.2 Our Governance Framework

Council has adopted a Governance Framework based on the Eight Governance Principles recommended by the Audit Office of NSW. The Framework is set across eight key principles and 17 components that underpin the achievement of good governance within the organisation. These principles are:

- Principle 1: Management & Oversight
- Principle 2: Structure
- Principle 3: Ethics
- Principle 4: Corporate Reporting
- Principle 5: Disclosure
- Principle 6: Remuneration
- Principle 7: Risk Management
- Principle 8: Key Stakeholder Rights

Figure 1 below summarises how the City of Parramatta meets these Eight Key Principles via a range of governance mechanisms. Our Governance Framework notes, 'Governance should be enduring and not something referred to when things are tough. It should be recognised through the implementation of processes and procedures that demonstrate transparency and accountability that is accompanied by a good governance culture whereby attitudes, values, beliefs and behaviours of leaders must set the standard and be reflected in roles and responsibilities.' (City of Parramatta Governance Framework p.4)

3.3 The relationship between our Governance Framework and this Legislative Compliance Policy

Council's Legislative Compliance Policy has been developed to complement and work in concert with our Governance Framework. The Governance Framework sets out the principles we aspire to assist in achieving good governance whilst the Legislative Compliance Policy and Procedure sets out our continual improvement system to ensure on-going compliance within our activities to allow us to live up to these broad good governance principles. Figure 2 below sets out how this relationship works.

Figure 2: The relationship between our Governance Framework and the Legislative Compliance Policy

Legislative Compliance Policy		
Owner: Governance	Area: Governance	POL No:
Date of Commencement:	Approval Authority: Council	Date Approved:
Amendment	Date of Next Review:	Review:

CITY OF PARRAMATTA

This Legislative Compliance Policy and its Procedure is structured around four key components consisting of:

- Establishing clear roles and responsibilities
- Determining and implementing compliance
- Dealing with non-compliance, and
- Ongoing compliance improvement, monitoring and oversight

3.4 Establishing clear roles and responsibilities

Legislative compliance is a function that does not apply to specific areas, but rather applies across the entire organisation. Everyone has particular responsibilities to ensure we achieve organisation-wide legislative compliance. The sub-sections below set out the specific responsibilities which apply across the various areas of Council's organisational structure.

3.4.1 All Staff

All staff need to be aware of their delegations and the legislative requirements that apply to their position and be conscientious and responsive in seeking to comply with relevant legislation and standards which apply to their positions.

3.4.2 The Executive Team (ET)

The ET (including the CEO) is required to lead by example by 'setting the tone from the top' by demonstrating their active commitment to a positive compliance culture within Council.

3.4.3 The Manager Governance shall maintain the *Legislative Compliance Obligations Register* and the *Non-Compliance Register* as well as be responsible for reviewing the Legislative Compliance Policy and Procedure on a regular basis.

3.4.4 The Manager Risk & Audit is responsible for conducting compliance control effectiveness checks through administering the Council's internal audit program.

3.4.5 The Audit, Risk & Improvement Committee (ARIC)

The Audit, Risk & Improvement Committee (ARIC) is responsible for providing independent assurance and assistance to Council on risk management, control, governance, and external accountability responsibilities. The Committee sets Council's annual internal audit program as proposed by the Manager Risk & Audit.

Legislative Compliance Policy		
Owner: Governance	Area: Governance	POL No:
Date of Commencement:	Approval Authority: Council	Date Approved:
Amendment	Date of Next Review:	Review:

CITY OF PARRAMATTA

3.4.6 Managers and Supervisors

Managers and supervisors are responsible for coordinating compliance and assigning responsibility across the staff in their branches. They have an important leadership role in compliance and should demonstratively abide with compliance requirements including under legislation, policies and procedures.

3.4.7 Other Council Officials

Other Council Officials, such as contractors, consultants, suppliers, community groups and volunteers, are expected to adequately manage and meet compliance requirements when working for and behalf of Council or whenever they are on Council premises.

3.5 Determining and implementing compliance

Council must comply with legislation (and delegated statutory instruments including associated regulations) as well as Council codes, policies, procedures, guidelines, delegations or practices that either the elected Council (Governing Body) or the CEO and Executive Team (ET) have adopted as being appropriate standards for administering and delivering Council's functions and services.

3.5.1 Core legislation and compliance standards

As a multi-functional organisation, Council operates under the provisions of a wide range of legislation. A list of core legislation under which the City of Parramatta conducts its activities is provided in Appendix 2 of the Procedure.

Coupled with this Council must also comply with:

- Relevant Ministerial Directions;
- Local Environmental Plans and development control plans;
- Development consents and construction certificates;
- Mandatory codes;
- Binding contracts (including grants);
- Departmental or commissioner guidelines;
- Notices and orders;
- Court orders and judgments;
- Licences and permits; and
- Resolutions of the Council.

Legislative Compliance Policy		
Owner: Governance	Area: Governance	POL No:
Date of Commencement:	Approval Authority: Council	Date Approved:
Amendment	Date of Next Review:	Review:

CITY OF PARRAMATTA

Also Council's compliance standards are informed by: Standards (ISO and/or Australian/New Zealand standards); Model policies and guidance documents published by organisations such as the Office of Local Government, Independent Commission Against Corruption, the Office of the Information & Privacy Commissioner or the NSW Audit Office; and Council values, principles and ethics (such as good governance, accountability and transparency).

As required, the above may be further communicated through Council policies and/or procedures to support compliance by Council officials.

NOTE: Triggers for updates can include:

- Changes to legislation or other compliance sources;
- Changes to Council's organisational structure;
- Changes or additions to Council services;
- Reviews, reports or audits highlighting non-compliance or recommending improved compliance; and
- Third-party changes requiring compliance review, such as changes to procurement aggregators or key external government agencies.

Changed requirements should be assessed and prioritised against Council's Risk Management Strategy.

3.5.2 Compliance processes and structures

Council will have appropriate processes and structures to ensure that legislative requirements are integrated into its operations. Most compliance administration and management, including policy development, occurs within the respective Directorates and their sections. This structure relies on the expertise of the respective managers to ensure that their staff are appropriately trained and supported. This includes ensuring staff are provided with up-to-date policies and procedures and clearly defined delegations and authorisations.

3.5.3 Policy Register and Council's Document Framework

Transparent, appropriate and achievable policies are central to compliance. The Policy Register, including version management, adoption, records and responsibility allocation is managed centrally through Governance. Although the authoring and management responsibility for policy is decentralised, the approval of policies is centralised through the elected Council and ET.

Legislative Compliance Policy		
Owner: Governance	Area: Governance	POL No:
Date of Commencement:	Approval Authority: Council	Date Approved:
Amendment	Date of Next Review:	Review:

CITY OF PARRAMATTA

All policies and some corporate procedures must be submitted via Governance to assist with quality control, consultation, implementation and adoption advice. Staff should refer to Council's *Document Framework* as per **Appendix 1** of this policy.

3.5.6 Registers

Council maintains a number of registers that support its legislative compliance. Appendix 3 in the *Legislative Compliance Procedure* sets out the registers which support Council's legislative compliance requirements.

3.6 Dealing with Non-compliance

Council may become aware of non-compliance through one or more methods, including but not limited to the following:

- Staff report, notification, grievance or public interest disclosure. This may originate from staff involved or related to the non-compliance, including self-reports, or from staff in a role-related function, such as those in an external enforcement role (see below), a governance or compliance-related role, or audit role;
- Customer service requests, feedback or complaints from members of the public or Councillors, which may result in review of service provision and related documentation;
- Council vendor report of non-compliance;
- Internal or external audit reports or other identification of systemic anomalies;
- Investigations by, or requests for information from the Internal Ombudsman Shared Service (IOSS), other agencies, including the: NSW Ombudsman; SafeWork NSW; Environmental Protection Agency; NSW Police; Independent Commission Against Corruption (ICAC); Information & Privacy Commission; and/or Office of Local Government (OLG).

Any of the above may provide direct information regarding a non-compliance matter, or indirect information by triggering a review of a service provided or associated documentation, which may reveal non-compliance. Systemic non-compliance matters may reveal multiple non-compliance matters requiring separate management. The *City of Parramatta Legislative Compliance Procedure* sets out the processes for reporting non-compliance within the Council.

3.7 Compliance improvement, monitoring and oversight

3.7.1 Developing and supporting a compliance culture

Legislative Compliance Policy		
Owner: Governance	Area: Governance	POL No:
Date of Commencement:	Approval Authority: Council	Date Approved:
Amendment	Date of Next Review:	Review:

CITY OF PARRAMATTA

Council is committed to an organisational culture in which quality compliance and governance processes are positively valued and promoted. Council acknowledges that embedding compliance values will help develop a self-regulating organisation with fewer non-compliance events and results in good outcomes for both the Council and community as well as strong reputational capital for the organisation.

3.7.2 Improving Council's compliance

Improvements to compliance may include but are not limited to:

- Providing training to staff in understanding and implementing legislation;
- Providing information to staff to allow them to understand the broad scope of legislation which applies to their role;
- Advising staff of delegations and ensuring delegations are published, widely available and regularly reviewed;
- Timely corrective action to address non-compliances;
- Updating information and training provided to staff;
- Updating policies and processes to ensure that they are actionable and supportive of compliance; and/or
- Adapting reporting lines or structures.

3.7.3 Council's Risk Management Strategy

Council's compliance controls are assessed and control effectiveness is monitored through Council's Risk Management Strategy and internal audit program. Council is subject to both internal and external audits, the outcomes of which are reported to the ARIC and ET and key staff as required.

An annual internal audit program is developed by the Manager Risk and Audit in association with the Audit Risk & Improvement Committee (ARIC).

4.0 Definitions

ARIC

Audit, Risk and Improvement Committee

Code of Conduct

The current Code of Conduct as adopted by the City of Parramatta Council.

Compliance

Legislative Compliance Policy

FAIR

ITEM NUMBER	12.3
SUBJECT	FOR APPROVAL: 2021 Community Grants
REFERENCE	F2021/00521 - D07981436
REPORT OF	Community Grants Officer

PURPOSE:

To seek Council's endorsement of the proposed funding allocations under the 2021 City of Parramatta Community Grants annual round.

RECOMMENDATION

- (a) **That** Council adopts the expenditure recommended by the Councillor Grants Committee for the 2020-2021 Community Grants as summarised in Attachment 3.
- (b) **That** Council endorses a creative skills development grant offer of \$12,000 being made to one unsuccessful applicant in the Creative Fellowship category identified in Attachment 3 and delegates authority to the Director Parramatta Artist Studios to disburse funds to those who meet the requirements detailed in paragraph 12 of this report.
- (c) **That** Council notes the status of grants made in the quarterly Community Grants program and Parramatta Representative Sports Grant as summarised in Attachment 2.
- (d) **That** \$40,000 of unallocated funds from the 2021 Community Grants budget be rolled over to the 2021/2022 Financial Year Community Grants budget, with at least \$10,000 being allocated to the Representative Sports Grant program.
- (e) **Further, that** Council notes that a further report will follow with the results of the review of the Sport and Recreation Grants and Representative Sports Grant categories.

BACKGROUND

1. Applications for the 2021 annual round of the City of Parramatta Council's Community Grants opened on 1 February 2021 and closed at 4pm on 22 February 2021. The application and assessment period were conducted within the requirements of the City of Parramatta Grants and Donations Policy, adopted in December 2016.
2. At its meetings of 18 December 2017 and 8 April 2019, Council established a Councillor Grants Committee to oversee the grants assessment process and to expedite the consideration of grants prior to the May Council meeting. The members of the current Councillor Grants Committee are Deputy Lord Mayor Councillor M Garrard and Councillors P Bradley, Dr P Prociv, S Pandey, B Tyrrell, L Wearne and M Zaiter.
3. The total pool of funds available for the 2021 Community Grants Program is \$490,000. This includes \$40,000 allocated to the Small Grants Fund and

\$30,000 to the Sport and Recreation Fund, which are allocated through a separate quarterly process. This total pool also includes \$20,000 through the Representative Sports Grant, which is assessed through a separate process as applications are received.

4. As resolved by Council at its meeting of 17 December 2018, the following grant categories were offered in the annual round of the 2021 Community Grants Program:

Category	Funding pool	Funding cap	Time frame
Community Capacity Building Grants	\$225,000	\$10,000 Additional funds can be applied for to a limit of \$20,000	Annual round
Growing Social Enterprise Grants	\$75,000	\$25,000	Annual round
Creative Project Leveraging Fund	\$60,000	\$20,000	Annual round
Parramatta's Heritage and Stories Research Fund	\$20,000	\$5,000	Annual round
Creative Fellowship Fund	\$20,000	One Fellow	Annual round
Categories not in the annual round			
Small Grants Fund	\$40,000	\$2,000	Quarterly round
Parramatta Sport & Recreation Grants	\$30,000	\$2,000	Quarterly round
Parramatta Representative Sport Grants (50% of participant expenses up to cap)	\$20,000	\$1,000	Open all year

5. Council received a total of fifty-three eligible applications in the annual application round, with the total amount of funding sought across all categories being \$787,101.73. All applications are listed in **Attachment 1**.
6. Across the 2020/21 Financial Year, in the quarterly Small Grants programs and Representative Sport Grants, Council has received thirty-one applications for funds. Eleven of these applications have been funded through the established delegation to the Executive Director Community Services. A further fourteen applications from the last quarter are pending assessment. The successful grant recipients are detailed in **Attachment 2**.
7. At its meeting of 30 November 2021, Council resolved for a review to be conducted into the Sport and Recreation Grant and Representative Sports Grant categories.

ISSUES/OPTIONS/CONSEQUENCES

8. All grant applications received had their eligibility determined and were then assessed by category-specific assessment panels. Panel members have been drawn from the Community Capacity Building, City Animation, Cultural Heritage and Visitor Services, and Recreation Programs and Facilities teams as well as external social enterprise experts. Recommendations for funding as determined by these panels are provided in **Attachment 3**.

9. All applications were presented to the Councillor Grants Committee at its meetings on 4 May 2021 and 24 May 2021. Upon the review of the Councillor Grants Committee, they have recommended thirty applications, representing a total disbursement of \$385,725.26. These amendments and associated conditions are reflected in Attachment 3.
10. In making these recommendations, unallocated funds in the Community Capacity Building and Cultural Heritage and Stories categories have been made available for additional recommendations in other categories.
11. In addition, the Councillor Grants Committee recommended that remaining unallocated funds be made available to one highly rated, yet unsuccessful applicant in the Creative Fellowship Fund. It is proposed that the same mechanism used in 2019 for an opportunity to assist local artists be utilised in order to protect the uniqueness and prestige of the one individual awarded the Creative Fellowship.
12. It is, therefore, recommended that Councillors endorse an offer of \$12,000 being made to the applicant in the Creative Fellowship for the purpose of funding a defined creative skills development activity to develop their professional creative practice. The applicant receiving this offer will need to submit a skill development proposal as part of their acceptance of the funding offer, which will be reviewed by the category's assessment panel. It is proposed that the Director of the Parramatta Artist Studios be delegated to confirm that the requirements of this offer have been met before funds are disbursed. This process will ensure sound oversight of this valuable funding opportunity within a reasonable timeframe prior to the end of financial year. It is recommended that receiving this \$12,000 creative skills development grant not affect recipients' eligibility to apply for the Creative Fellowship in future years.
13. The Community Capacity Building team will continue its Grants Support and Monitoring Program to ensure the best possible outcomes from funded projects and across the whole grants program. Each recipient is allocated a Support Person from the Community Capacity Building, City Animation, Cultural Heritage and Visitor Services, or the Recreation Programs and Services teams to ensure there is ongoing communication and collaboration between successful applicants and Council. Equally, unsuccessful applicants are also assigned a Support Person to provide feedback and identify other funding opportunities.
14. The monitoring program requires grant recipients to provide a progress report either at 6 months or halfway through their project. This is in addition to a written final report and a financial acquittal report at the completion of the project. Acquittal reports provide feedback on the outcomes achieved in the project.
15. At its meeting of 24 May 2021, the Councillor Grants Committee discussed the review of the Sport and Recreation Grant and Representative Sports Grant categories. A further report will be forthcoming on the outcome of this review with recommended changes for future years. With an unallocated budget remaining in this financial year's budget, the Committee has noted a desire to allocate at least \$10,000 to the Representative Sports Grant category.

CONSULTATION & TIMING

16. As previously indicated, the Council meeting of 17 December 2018 resolved to establish a Councillor Grants Committee to oversee the grants process and to expedite the consideration of grants prior to being presented at the May/June Council meeting.
17. The 2021 annual round of the City of Parramatta Community Grants was administered as per the Grants and Donations Policy, which ensures grants programs follow best principles of grant-making and are delivered in an efficient and ethical manner.
18. Applications for the 2021 round of the City of Parramatta Community Grants opened on 1 February 2021 and closed at 4pm on 22 February 2021.
19. Potential applicants were supported by the Community Capacity Building team, who promoted the grants through numerous networks and advertising. The team also held online information sessions and in January and February 2021.
20. All grant categories were supported by cross unit promotion and advertisement strategies, including:
 - a. Email promotion to community contacts and subscribed newsletters notifying of available funding opportunities. This includes Council networks plus the 1,647 subscribers on the Active Parramatta list, and the 2,419 contacts on the Community Connective Funding e-News.
 - b. City of Parramatta Council's Community Grants webpage, providing information on upcoming grant rounds.
 - c. Council's social media channels on Facebook and LinkedIn.

Stakeholder Consultation

21. The following stakeholder consultation has been undertaken in relation to this matter:

Date	Stakeholder	Stakeholder Comment	Council Officer Response	Responsibility
January 2021- March 2021	Potential applicants	Information sessions held and questions asked about grants process	Support provided as requested and as appropriate	Community Grants Officer
March 2021	Finance Team	Two members from the Finance team conducted financial due diligence of the supporting documents provided by applicants. The outcome of these reviews	Recommendations of the Councillor Grants Committee took the results of due diligence checks into consideration.	Community Grants Officer

		was provided to the Councillor Grants Committee.		
--	--	--	--	--

Councillor Consultation

22. On 30 March 2021, reports for each funding category in the annual grant round was sent to the Councillor Grants Committee via email and through an upload to the Councillor iPad network. Reports included the following information:

Category-wide Information	Number of applications received, amount of money requested, applications recommended, and amount of money allocated.
Application Information	Applicant name, project title, total amount requested, brief project description and organisation description.
Assessment Information	Final ranking and score, assessment panel comment, conditions if funded, project locality, and alignment with City of Parramatta's priorities. Results of financial due diligence also shared.
Average Application Score	The assessment panel's average score under each assessment criteria.

23. The following Councillor consultation has been undertaken in relation to this matter:

Date	Councillor	Councillor Comment	Council Officer Response	Responsibility
4 May 2021	Clrs Garrard, Bradley, Pandey, Prociv, Tyrrell and Wearne. Apology noted by Clr Zaiter	Questions of specific applications taken on notice. Each category's recommendations discussed and confirmed, subject to questions on notice feedback.	Undertook to respond to questions by 24 May 2021.	Group Manager Social and Community Services
24 May 2021	Clrs Garrard, Bradley, Pandey, Prociv, Tyrrell and Wearne. Apology noted by Clr Zaiter	Responses to follow-up actions reviewed and recommendation confirmed. Request for unallocated funds to be held over. Review of sport focused categories	Finalised recommendations to be reported to Council. Officers will provide follow-up advice on sports focused categories prior to a Council Report being	Group Manager Social and Community Services

		discussed in detail. \$10,000 of unallocated funds from this year will benefit the representative category in the next year.	presented to Council.	
--	--	--	-----------------------	--

24. A presentation ceremony to award grants to successful recipients will be arranged in consultation with the Lord Mayor and Councillor support staff. Invitations will be sent to successful recipients once arrangements have been made. It is anticipated that this event will be in the first two weeks of July 2021, subject to Covid-19 government health orders. All Councillors are invited to attend.

LEGAL IMPLICATIONS FOR COUNCIL

25. There are no legal implications as a result of this report. As per the Grants and Donations Policy, all recipients need to sign a Funding Agreement prior to funds being distributed. Funding Agreements include requirements around reporting and consequences for non-compliance.

FINANCIAL IMPLICATIONS FOR COUNCIL

26. The Councillor Grants Committee considered the amount of unallocated funds remaining in the 2020/2021 budget. The Committee has recommended that \$40,000 be carried over to the Community Grants budget in 2021/2022. The Committee has noted that at least \$10,000 of this should be allocated to the Representative Sports Grants category. This will be further discussed in a future Council report.

FAIR

ITEM NUMBER	12.4
SUBJECT	FOR APPROVAL: Major Projects Advisory Committee (MPAC) Membership
REFERENCE	F2014/00413 - D08036731
REPORT OF	Business Governance Officer

PURPOSE:

To extend the membership of a current Major Projects Advisory Committee (MPAC) member.

To open an expression of interest for the appointment of the vacant position in the Major Projects Advisory Committee (MPAC) and to appoint an Evaluation Panel.

RECOMMENDATION

- (a) **That** Council extend the membership of Gavin Zimmerle until 1 September 2024.
- (b) **That** Council approve an expression of interest for the appointment of the vacant position in the Major Projects Advisory Committee (MPAC).
- (c) **That** Council approve the appointment of an evaluation panel to assess the expressions of interest, consisting of:
- 1 The Chief Executive Officer (CEO)
 - 2 Executive Director Property & Place
 - 3 Acting Chair of MPAC, Gavin Zimmerle
 - 4 Group Manager Property Development
 - 5 Executive Director Community Services (Independent)
- (d) **Further, that** a report be submitted to Council upon the completion of the expression of interest period for consideration of the Evaluation Panel's recommendations.

BACKGROUND

1. Council, in 2012, established a Major Projects Advisory Committee (MPAC).
2. MPAC is an advisory committee that provides Council independent assurance in relation to risk identification and risk management (as a property owner and not a statutory authority) for any critical, significant or major property projects involving Council that are referred to MPAC by Council or the Chief Executive Officer (being "Major Projects").
3. Current members are:

Member	Membership valid to:
Gavin Zimmerle	1 September 2021
Charles Fortin	1 August 2022

4. The resignation of Michael Filo in late 2020 has resulted in a vacancy.

ISSUES/OPTIONS/CONSEQUENCES

5. The MPAC Charter (**Attachment 1**) stipulates that membership comprise of a minimum of three (3) independent external members (MPAC Members) and the composition of members will be made up of the following relevant qualifications and expertise:
- Property development and land economics;
 - Commercial arrangements between public and private sectors, preferably in property development or major assets; and
 - Risk management in property development
6. The MPAC Charter stipulates that new MPAC members are to be appointed by Council following an expression of interest process.
7. The MPAC Charter stipulates Council is to convene a committee who will be responsible for coordinating the selection process, conducting interviews, and recommending a preferred candidate. The committee may include the current Chair of MPAC or any other MPAC member delegated by the CEO.
8. New MPAC Members may be appointed for an initial period not exceeding three (3) years after which time they will be eligible for extension or re-appointment, provided that the MPAC Members provide details of their qualifications and experience so that those details can be considered by Council to ensure they remain relevant to Council's requirements.
9. Existing MPAC members may receive an extension of their membership or be re-appointed. Council may choose to conduct an expression of interest to extend or re-appoint an existing member. If Council chooses to conduct an expression of interest for the position of the existing member, the member must partake in the expression of interest to be considered for reappointment.
10. It is recommended that Gavin Zimmerle's membership be directly extended for a further period of three (3) years without an expression of interest process being conducted to allow for continuity and a smooth transition of the administration of MPAC.
11. Mr Zimmerle is a qualified lawyer and senior property executive with over 20 years' experience in real estate advisory, site acquisition and disposals, residential development, strategy, risk mitigation and law. Mr Zimmerle's experience demonstrates he has qualifications or expertise in all three categories required by the MPAC Charter to be eligible as a member.
12. It is recommended that an expression of interest be undertaken for the vacant position in line with the anticipated timeframe below, to provide sufficient time for Council and staff to undertake a transparent and collaborative process:

Item	Detail	Date
1	EOI Release Date	17 June 2021
2	EOI Closing Date	2 July 2021
3	Evaluation of EOIs	5 to 9 July 2021
4	Conduct Interviews	w/c 14 July 2021
5	EOI evaluation report completed, and recommendation made	20 July 2021

6	Council report recommending appointment	9 August 2021
7	Contract starts	1 September 2021

13. It is recommended that an Evaluation Panel be comprised for the assessment of members to MPAC, to review and conduct necessary interviews of the relevant professionals. The Evaluation Panel is proposed to comprise of the following:
- a. The Chief Executive Officer (CEO)
 - b. Executive Directory Property & Place
 - c. Acting Chair of MPAC, Gavin Zimmerle
 - d. Group Manager Property Development
 - e. Executive Director Community Services (Independent)
14. A report recommending the appointment of members to MPAC will be presented to Council for endorsement following the assessment process.

CITY OF PARRAMATTA COUNCIL MAJOR PROJECTS ADVISORY COMMITTEE CHARTER

1 Introduction

- 1.1 In July 2010, Council adopted the Property Development and Investment Policy 2010 (**PDI policy**) to (amongst other things) guide the identification of development opportunities involving Council-owned land to contribute towards Council's long-term financial sustainability. Long-term financial sustainability is critical to Council's ability to perform its statutory functions.
- 1.2 On 12 November 2012, Council resolved to establish a Major Projects Advisory Committee (**MPAC**) to assist Council with risk management and decision making in connection with property development activities involving Council owned or controlled land.
- 1.3 This Charter outlines the objectives, authority, composition, responsibility, reporting obligations, and administrative arrangements of the MPAC.

2 Objective

- 2.1 The objective of the MPAC is to provide Council independent assurance in relation to risk identification and risk management (as a property owner and not a statutory authority) for any critical, significant or major property projects involving Council that are referred to MPAC by Council or the Chief Executive Officer (being "**Major Projects**").
- 2.2 In providing this assurance, the MPAC will consider the benefit to Council, and in particular the rate payers, of each project.

3 Authority

- 3.1 In carrying out its responsibilities, the MPAC must at all times recognise that responsibility for the management of Council rests with the Council and Council's Chief Executive Officer as provided in the *Local Government Act 1993*.
- 3.2 For the avoidance of doubt, the MPAC will report to Council's Chief Executive Officer in carrying out the objectives set out in clause 2 of this charter.
- 3.3 The MPAC acknowledges and agrees:

- (a) it has no executive powers and cannot make decisions on behalf of Council; and
- (b) neither the MPAC, nor any of the individual members constituting MPAC, can direct or influence how Council officers undertake their duties.

3.4 Requests for information by the MPAC and responses to such requests must be made through the Chair of the MPAC to the Chief Executive Officer (or its delegates).

4. MPAC Composition

4.1 The MPAC will be comprised of a minimum of at least three (3) independent external members (**MPAC Members**).

4.2 MPAC Membership will be made up of a composition of members with the following relevant qualifications and expertise:

- (a) Property development and land economics;
- (b) Commercial arrangements between public and private sectors, preferably in property development or major assets; and
- (c) Risk management in property development.

4.3 New MPAC Members will be appointed by Council following an expression of interest process to be administered by the Chief Executive Officer. In selecting new MPAC Members, Council will convene a committee which may include the Chair of MPAC (or any other MPAC member delegated by the CEO), who will be responsible for coordinating the selection process, conducting interviews, and recommending a preferred candidate(s). The committee in making its recommendation(s) to Council will be required to provide details of the qualifications and experience of all the candidate(s) considered and the basis for their recommendations.

4.4 The MPAC Members may be appointed for an initial period not exceeding three (3) years after which time they will be eligible for extension or re-appointment, provided that the MPAC Members provide details of their qualifications and experience so that those details can be considered by Council to ensure they remain relevant to Council's requirements. The MPAC Members acknowledge that at any time they are being considered for re-appointment or extension Council may also run an expression of interest process (as referred to in clause 4.3 of this charter) and the MPAC Member must participate in the selection process referred to in clause 4.3 of this charter to be eligible for re-appointment or extension.

4.5 To the extent possible, the appointment and/or re-appointment of MPAC Members will commence at least three (3) months before the end date of their respective term and be staggered so that the end date of the terms of no more than two (2) MPAC Members will occur simultaneously.

4.6 MPAC appointments (either new or re-appointment) are to be approved by Council.

5 Roles and Responsibilities

5.1 The role of the MPAC is to carry out the objectives set out in clause 2 of this charter.

5.2 The responsibilities of the Chair of MPAC include:

- (a) To chair MPAC meetings;
- (b) Request external advice to allow the MPAC to meet its responsibilities (with the approval of the Chief Executive Officer);
- (c) Receive information requests and responses from MPAC Members and Council officers;
- (d) Request secretarial/administrative support on behalf of the MPAC (with the approval of the Chief Executive Officer and Executive Director, Property and Place);
- (e) Prepare annual reports for the Council in accordance with the requirements of the MPAC Charter;
- (f) Attend and provide a quarterly update of MPAC's activities to the Audit Risk and Improvement Committee;
- (g) Attend the monthly/bi-monthly PDG Property Projects Workshop and assist Council in decision making as required by the Executive Director, Property and Place and/or Chief Executive Officer;
- (h) Consider the frequency of MPAC meetings; and
- (i) Receive resignations from MPAC Members and without delay, inform the Chief Executive Officer and the remaining MPAC Members of any resignations.

5.3 The responsibilities of the MPAC Members include:

- (a) carry out any activities requested by Council and/or the Chief Executive Officer; and
- (b) meet with Council representatives and other MPAC Members as/when required.

5.4 The responsibilities of the MPAC in the performance of its role include (without limitation):

- (a) Assuring Council that there is **effective management of risks** associated with matters that are referred to MPAC under clause 2.1 of this charter;
- (b) Assuring Council that prudent **commercial risk management practices** are followed in connection with matters that are referred to MPAC under clause 2.1 of this charter;
- (c) Assuring Council that adequate **legal compliance practices and procedures** are followed in connection with matters that are referred to MPAC under clause 2.1 of this charter; and
- (d) Assuring Council in respect of any other matter or issue which Council or the Chief Executive Officer has asked the MPAC to review.

5.4 The MPAC acknowledges that:

- (a) in carrying out the performance of its role it will, upon request by the Chief Executive Officer or the Executive Director, Property and Place, be required to prepare reports which summarise MPAC's observations and recommendations; and
- (b) such reports may be used as supporting documentation to any relevant Council report seeking a decision in respect of Major Projects.

6 Reporting

- 6.1 The Executive Director, Property and Place will identify and provide to MPAC a quarterly report which sets out project dashboards and risk registers for all major projects managed by the Property Development Group. MPAC Members will be required to attend (in person or via remote means as agreed to by the Chief Executive Officer) a quarterly meeting in which they will be allowed to ask questions to discharge their duties.
- 6.2 All reports generated by the MPAC will be addressed to the Chief Executive Officer.
- 6.2 Council may provide secretarial support for the MPAC in the form of administrative assistance to convene meetings, taking of minutes at meetings and such other administrative assistance reasonably requested by the Chair in consultation with Council's Chief Executive Officer and Executive Director, Property and Place.
- 6.3 Minutes of each MPAC quarterly meeting must be tabled at the next quarterly meeting for confirmation. Minutes that have been confirmed must be circulated to all Councillors as soon as practicable as part of the next monthly PDG Workshop.
- 6.4 Each MPAC Member must, at the commencement of each meeting of the MPAC, make any declaration of any conflicts of interest.
- 6.4 On or around October of each year, the Chair (in consultation with the other MPAC Members) must prepare an annual report addressed to the Chief Executive Officer with a copy to the Executive Director, Property and Place which:
 - (a) Summarises the work performed by the MPAC to discharge its duties over the past financial year;
 - (b) Details the number of meetings held during the year and the attendance of each member over the past financial year; and
 - (c) Includes such other information that the MPAC thinks fit having regard to its duties.

A copy of this annual report will be provided to Council's Audit, Risk and Improvement Committee, and the Chair may be required to provide a briefing to Council's Audit, Risk and Improvement Committee. A copy of this annual report will also be reported to Council.

- 6.5 The MPAC, through the Chief Executive Officer or their delegate, may report to Council any matter relevant to its duties that are considered to be of sufficient importance to do so.

7 Administration

- 7.1 The Chair of MPAC may, with the approval of the Chief Executive Officer or the Executive Director, Property and Place:

- (a) hold meetings to review the Major Projects identified in clause 2 and provide assurance on matters as required (with or without representatives from Council); and
 - (b) hold ad hoc meetings of the MPAC following a reasonable request from an MPAC Member or request under a Council resolution. A minimum of three (3) days' notice must be provided in the event of an ad hoc meeting.
- 7.2 The Executive Director, Property and Place will be responsible for circulating the meeting agenda and associated documentation to MPAC Members no later than five (5) working days before each meeting with Council representatives. The agenda and associated documentation will be marked as confidential and reflect the Objectives (clause 2) and Responsibilities (clause 5) of the MPAC.
- 7.3 A quorum for a meeting will be at least 2 MPAC Members or where there are more than 4 MPAC Members, a quorum will be at least a majority of the MPAC Members entitled to attend that meeting.
- 7.4 The MPAC acknowledges that the administration of the MPAC is underpinned by the guiding principles of the following documents:
- (a) Property Development and Investment Policy;
 - (b) MPAC Charter;
 - (c) MPAC Services Agreement signed by MPAC Members;
 - (d) PDG Property Projects Workshop – Terms of Reference;
 - (e) Guidelines for Probity in Public Sector Projects ICAC; and
 - (f) Council Code of Conduct – Policy and Procedure,
- which may be amended from time to time.
- 7.5 MPAC Members must abide by Council's Code of Conduct and relevant policies adopted by Council. MPAC Members must declare and manage any conflicts of interest in a manner consistent with the Code of Conduct adopted by Council. For completeness, declarations of interest will be an agenda item at each MPAC meeting.
- 7.6 Subject to any inconsistencies in the requirements of Council's Code of Conduct which will prevail over clause 7.6, MPAC Members must follow the process set out in Schedule 1 of this charter in relation to conflicts of interest.
- 7.7 MPAC Members must keep all discussions during meetings confidential. No MPAC Member can make public comments regarding the activities of the MPAC without the prior approval of the Chief Executive Officer.

8 Termination of Membership

- 8.1 The MPAC Members acknowledge and agree that their membership of the MPAC can be brought to an end in the following ways:

- (a) The expiry of the period for which the relevant MPAC Member was appointed;
- (b) The resignation of a MPAC Member by written notice to the Chair (who must without delay inform the Chief Executive Officer and remaining MPAC Member of the resignation). If the Chair resigns, written notice must be provided to the Chief Executive Officer;
- (c) The loss of relevant qualifications relied upon for the initial appointment to MPAC;
- (d) The removal of an MPAC Member by Council resolution; or
- (e) If a Committee Member:
 - Has been absent from three (3) consecutive meetings without having given reasons acceptable to the Chair; or
 - Has been absent from at least half of the meetings of the MPAC held during the immediately preceding year without having given to the Chair acceptable reasons for the MPAC Member's absences; or
- (f) The Council deciding to dissolve the MPAC for any reason.

9 Chair Appointment and Annual Review of MPAC

- 9.1 The Chair of the MPAC will be nominated and appointed from one of the MPAC Members by the Chief Executive Officer. The role of the Chair may be reviewed on an annual basis by the Chief Executive Officer.
- 9.2 The Chair, in consultation with Council's Chief Executive Officer and the other MPAC Members, may initiate a review of the MPAC annually.

10 Charter Review

- 10.1 Council may review the continuing relevance of this charter on an annual basis. Where changes are deemed necessary, they will be submitted to Council for approval and will be notified to the MPAC as soon as practicable after such Council resolution.

Schedule 1 - Conflicts of Interest

1. MPAC Members must avoid or appropriately manage any conflict of interests to ensure that the objectives of the MPAC (set out in clause 2.1) are met. The onus will be on MPAC Members to identify and take the appropriate action to manage the conflict in favour of the MPAC Member's role as a MPAC Member.
2. A conflict of interest will exist where a reasonable and informed person would perceive that a MPAC Member could be influenced by a private interest (either pecuniary or non-pecuniary) or other public role when carrying out its role as a MPAC Member.
3. Generally, a non-pecuniary conflict of interest will be significant where a matter does not raise a pecuniary interest but it involves:
 - a. A relationship between a MPAC Member and another person that is particularly close, for example, parent, grandparent, brother, sister, uncle, aunt, nephew, niece, descendant or adopted child of the person or the person's spouse, current or former spouse or partner, de facto or other person living in the same household;
 - b. Other relationships that are particularly close, such as friendships and business relationships. Closeness is defined by the nature of the friendship or business relationship, the frequency of contact and the duration of the friendship or relationship; or
 - c. An affiliation between the MPAC Member and an organisation, sporting body, club, corporation or association that is particularly strong.
4. Where a conflict of interest exists, the MPAC Member which is affected by the conflict of interest (**Conflicted Member**) must fully disclose their interest in writing to the other MPAC Members and Council's Chief Executive Officer as soon as practicable (**Conflict Notice**).
5. In the Conflict Notice, the Conflicted Member must propose whether the conflict will be managed by the Conflicted Member by:
 - a. Removing the source of the conflict, by relinquishing or divesting the interest that creates the conflict; or
 - b. Having no involvement with the MPAC in respect of the matter, by absenting themselves from any meeting or discussion, and not taking part in any discussions, debate or voting on the issue.
6. Notwithstanding paragraph 5, if the Conflicted Member has a non-pecuniary interest which it reasonably considers is not significant and does not require further action, in the Conflict Notice the Conflicted Member must provide an explanation as to why the conflict of that non-pecuniary interest does not require further action in the circumstances.
7. Where a Conflicted Member has given a Conflict Notice, the MPAC must hold a meeting as soon as practicable. The Conflicted Member is not entitled to attend that part of the meeting which relates to its conflict. At the meeting, the MPAC Members must determine whether the conflict is significant. If the conflict is found to be significant then the MPAC must resolve that the conflict must be managed in accordance with paragraph 5(b). The MPAC may accept, (with or without conditions) or reject, any proposal set out in the

Conflict Notice issued by the Conflicted Member. The Chair of MPAC must report the outcome of all conflicts under this clause to the Chief Executive Officer.

MAJOR PROJECTS ADVISORY COMMITTEE**

SERVICES AGREEMENT

CITY OF PARRAMATTA COUNCIL

and

SUPPLIER SPECIFIED IN THE SCHEDULE

THIS SERVICES AGREEMENT made on

Between:

CITY OF PARRAMATTA COUNCIL (ABN 49 907 174 773) of 126 Church Street,
Parramatta, NSW 2150 (Council)

and

THE SUPPLIER SPECIFIED IN THE SCHEDULE (Supplier)

BACKGROUND

A. Council wishes to engage the Supplier to perform the Services.

OPERATIVE PROVISIONS

1 PURPOSE, DEFINITIONS AND INTERPRETATION

1.1 **Purpose** – The purpose of this Agreement is to formally record the agreement reached between the parties regarding the performance of the Services.

1.2 **Definitions** - In this Agreement, unless the context otherwise requires:

Agreed Work Order means a work order agreed by the parties in writing.

Agreement means this document and includes all schedule and annexures to it.

Business Day means a day on which banks are open for business in Sydney excluding a Saturday, Sunday or public holiday in Sydney.

Code of Conduct means the code of conduct adopted by Council from time to time.

Confidential Information means includes information that:

- (a) is by its nature confidential;
- (b) is communicated by Council to the Supplier as confidential; or
- (c) the Supplier knows or ought to know is confidential; and includes:
 - (i) the content and subject matter of this Agreement;
 - (ii) particulars of the Services;
 - (iii) the financial, business and commercial information of Council;
 - (iv) any material which relates to the affairs of a third party; and
 - (v) information relating to the policies, strategies, practices and procedures of Council.

Fees means the fees payable to the Supplier for the Services set out in Schedule as varied from time to time under this Agreement and, if applicable, confirmed in an Agreed Work Order.

GST means the tax imposed or assessed by the GST Act, and its related legislation and includes any similar or substitute tax introduced in the future and, where used in the context of GST, the phrases *consideration*, *input tax credit* and *taxable supply* have the respective meanings given to those terms by the GST Act.

GST Act means the *A New Tax System (Goods & Services Tax) Act 1999* as amended from time to time.

Index Number means:

- (a) the consumer price index (all groups) for Sydney published from time to time by the Australian Bureau of Statistics; or
- (b) if the Index Number no longer exists, it means an index that Council decides reflects changes in the cost of living.

EOI means the expression of interest issued by Council.

Loss means loss, liability, damage, expense or cost of any kind, including personal injury, death, economic loss, loss of or damage to property and loss in relation to any claim, including legal costs and disbursements.

Personal Information means information about an individual as defined in the *Privacy and Personal Information Protection Act 1998* (NSW).

Proposal means the response submitted by the Supplier to the EOI, particulars of which are set out in the Schedule, and any supplementary or other information or responses submitted by the Supplier to Council in connection with the EOI or the negotiation of this Agreement.

Quarter means each consecutive period of three months (or part of it) ending on the respective last days of March, June, September and December.

Schedule means the schedule to this Agreement.

Services means the Scope of Work described in the Schedule and to be provided under this Agreement.

Supplier means the supplier specified in the Schedule and includes the Supplier's Representative.

Supplier's Representative means an individual nominated as the Supplier's Representative and whom the Supplier has contracted to provide the Services.

Term means the term of this Agreement set out in the Schedule.

Termination Date means the date on which any valid notice of termination takes effect.

- 1.3 **Interpretation** - In this Agreement, headings and bold type are for convenience only and do not affect the interpretation of this Agreement and:
- (a) words importing the singular include the plural and vice versa;
 - (b) other parts of speech and grammatical forms of a word or phrase defined in this Agreement have a corresponding meaning;
 - (c) an expression importing a natural person includes any company, partnership, joint venture, association, corporation or other body corporate and any government agency;
 - (d) a reference to a statute, regulation, proclamation, ordinance or by-law includes all statutes, regulations, proclamations, ordinances or by-laws amending, consolidating or
 - (e) replacing it, whether passed by the same or another government agency (with legal power to do so), and a reference to a statute includes all regulations, proclamations, ordinances and by-laws issued under that statute;
 - (f) a reference to any notice, claim, demand, consent, agreement, approval, authorisation, specification, direction, appointment, or waiver being given or made by a party to this Agreement is a reference to its being given or made in writing, and the expression **notice** includes any of the foregoing;
 - (g) a reference to a party includes that party's successors and permitted assigns; and
 - (h) a reference to A\$ and \$ means the lawful currency of Australia.
- 1.4 **EOI definitions** – Words or expressions defined in the EOI have the same meaning when used in this Agreement unless the context otherwise requires.
- 1.5 **Including** - In this Agreement, the expressions **including**, and **particularly** and similar expressions do not imply any limitations.
- 1.6 **Consent** - Where this Agreement requires the consent, approval or permission of Council, such consent may be given or withheld, as the case may be, in the absolute discretion of Council and subject to such conditions Council may impose in its absolute discretion.
- 2 REPRESENTATIVE**
- 2.1 **Appointment** - Council appoint as it's representatives the person(s) named in the Schedule, or such other person as they may nominate and notify to each other from time to time.
- 2.2 **Communication** - The Supplier must communicate directly with Council's representative in relation to any matters within the authority of Council's representative. An instruction given to the Supplier's representative is deemed to be given to the Supplier.

- 2.3 **Availability** - The Supplier must ensure that the Supplier's representative is available to attend on and provide advice to Council and Council's representative at all reasonable times from the date of this Agreement until this Agreement terminates.

3 TERM OF AGREEMENT

- 3.1 **Term** - This Agreement begins on the date of this Agreement and continues for the Term unless earlier terminated for default or at convenience in accordance with this Agreement.

4 PERFORMANCE OF SERVICES

- 4.1 **Commencement and completion** - Unless Council instructs otherwise in writing, the Supplier must commence the Services on the date of this Agreement.
- 4.2 **Standard** - The Supplier must perform the Services with the degree of professional skill, care and diligence expected of a competent professional supplier experienced in carrying out the same services or services of a similar size, scope and nature to the Services.
- 4.3 **Delivery requirements** - Without limiting clause 4.2, the Supplier must supply the Services in accordance with:
- (a) the provisions of this Agreement;
 - (b) all applicable laws;
 - (c) the Code of Conduct as provided by Council to the Supplier from time to time;
 - (d) any guidelines or statements issued by Council from time to time concerning business ethics which have been made available to the Supplier; and
 - (e) all applicable industry standards and guidelines.

5 FEES

- 5.1 **Fees** - Council must pay the Fees in accordance with this Agreement. For the avoidance of doubt, the parties agree that the Fees payable for the Services provided in respect of the term of this Agreement, is the amount set out in the Schedule. The Supplier agrees that Base Fees are fixed fees and include any traveling time and out of pocket costs.
- 5.2 **No Fees for breach** - Council is obliged to pay the Fees only for Services rendered in accordance with this Agreement. Without prejudice to any other rights which Council may have, if Council considers, acting reasonably, that Services have not been rendered in accordance with this Agreement, or if Council rejects any or part of the Services, Council may withhold any money payable or recover any money paid to the Supplier for the Services.
- 5.3 **Invoices** - The Supplier may render invoices to Council for the payment of Fees calculated in accordance with this Agreement.

- 5.4 **Invoice content** - The Supplier must ensure that each invoice constitutes a tax invoice for GST purposes and contains the following:
- (a) details of the matter or project described in the Agreed Work Order;
 - (b) the amount claimed in the tax invoice is due for payment and correctly calculated in Australian dollars; and
 - (c) any other requirements advised to the Supplier by Council in writing.
- 5.5 **Further information** - The Supplier must promptly provide any further details in regard to an invoices that are requested by Council.
- 6 GST**
- 6.1 **Taxable supply** - If a party to this Agreement makes a supply under or in connection with this Agreement and is liable by law to pay GST on that supply, the consideration otherwise payable by the recipient of the supply will be increased by an amount equal to the GST paid or payable by the party making the supply.
- 6.2 **Reimbursable expense** - If this Agreement requires a party to pay for, reimburse or contribute to any expense, loss or outgoing (*reimbursable expense*) suffered or incurred by another party, the amount required to be paid, reimbursed or contributed by the first party is the amount of the reimbursable expense net of any input tax credit or reduced input tax credit to which the other party is entitled in respect of the reimbursable expense.
- 6.3 **Indemnified cost** - If a party to this Agreement has the benefit of an indemnity for a cost, expense, loss or outgoing (*indemnified cost*) under this Agreement, the indemnity is for the indemnified cost net of any input tax credit or reduced input tax credit to which that party is entitled in respect of the indemnified cost.
- 6.4 **Tax invoices** - Each party agrees to do all things, including providing compliant tax invoices and other documentation that may be necessary or desirable to enable or assist the other party to claim any input tax credit, set-off, rebate or refund in relation to any amount of GST paid or payable in respect of any supply under this Agreement.
- 6.5 **GST exclusive** - Subject to the operation of this clause 6, all amounts stated in this Agreement are GST exclusive.
- 7 SERVICES SUSPENSION**
- 7.1 **Suspension** - Council may immediately suspend the performance of any or all of the Services at any time and for any reason by giving notice to the Supplier (whether or not the Supplier has committed default under this Agreement or otherwise). On receipt of a notice of suspension the Supplier must:
- (a) stop work as specified in the notice;
 - (b) take all available steps to minimise loss resulting from that suspension; and
 - (c) continue work on any part of the Services not affected by the notice.
- 7.2 **Resumption** - If Council suspends any of the Services under this clause, Council may at any time give the Supplier a notice requiring the Supplier to resume

performing the suspended Services. The Supplier must resume performing those Services as soon as practicable after the date of the notice, and in any event no later than 5 Business Days.

- 7.3 **Payment and suspension** - If Council requires suspension of any of the Services under this clause, then provided that the Supplier has complied with its obligations and the Services have been delivered as required under this Agreement:
- (a) Council must pay all Fees due and payable for Services rendered before the effective date of suspension; and
 - (b) Council must meet the additional reasonable costs incurred by the Supplier and directly attributable to the suspension but Council shall not be required to compensate the Supplier for loss of profit or other costs, expenses or overheads incurred by the Supplier in deploying or re-deploying its resources prior to, during or after any period of suspension.
- 7.4 **Limitation on Period of Suspension** – One or more suspensions individually or in aggregate may only extend for a total period of 2 months within any 12 month period.

8 RECORDS, INSPECTION, QUALITY ASSESSMENT AND AUDIT

- 8.1 **Records** - The Supplier must prepare and maintain accurate and proper records and accounts to document the provision of Services and all transactions conducted pursuant to this Agreement. All records must be kept by the Supplier for a period of not less than 7 years after termination of this Agreement or the completion of the Agreed Work Order to which the relevant Services relate.
- 8.2 **Access** – No later than 5 Business Days after a request by Council, the Supplier must give Council access to and copies of any records and financial information relevant to the Services as may be reasonably requested by Council.
- 8.3 **Quality assurance** - During the Term, the Supplier must co-operate with any quality assurance assessment officer appointed by Council to monitor or assess the performance of the Supplier. The Supplier must give any such officer access to its premises, books, records and personnel as if the officer was the Council.
- 8.4 **Audit cooperation** - The Supplier must co-operate in full with Council and its internal and external auditors, inspectors, regulators and contractors as it may designate from time to time, in the performance of audits under this clause.

9 CONFIDENTIALITY

- 9.1 **No disclosure** - The Supplier must not disclose to a third party without Council's prior written consent (which will not be withheld if the disclosure is otherwise required by law), any Confidential Information which is:
- (a) supplied or made available by Council to the Supplier in relation to the Services; or
 - (b) brought into existence by the Supplier in performing or for the purpose of performing the Services.

- 9.2 **Precautions** - The Supplier must take or cause to be taken all precautions necessary to maintain secrecy and confidentiality and prevent disclosure of Confidential Information.
- 9.3 **No publication** - The Supplier must not advertise, publish or release to the public:
- (a) Confidential Information; or
 - (b) other information concerning this Agreement, the Services or a project to which they relate, or Council's operations,
- without Council's prior written consent. Council will not withhold its consent if the information is legally required to be produced.
- 9.4 **Permitted Disclosure** - The Supplier will be authorised to disclose to third parties its engagement to supply Services to Council where this is necessary and such disclosure is limited to the existence of the Service Agreement and does not otherwise involve any breach of the confidentiality provisions in this Agreement.

10 PRIVACY

- 10.1 **Privacy** - The Supplier must at all times comply with all relevant privacy legislation and must comply with any directions given by Council in relation to privacy matters. Without limiting the foregoing, the Supplier must:
- (a) use Personal Information collected by it or to which it is privy as a consequence of performing its obligations under this Agreement only for the purposes of compliance with this Agreement; and
 - (b) not disclose Personal Information collected by it or to which it is privy as a consequence of performing its obligations under this Agreement to any third party without the prior written consent of the individual and Council.

11 NO SUBCONTRACTING OR ASSIGNMENT

- 11.1 **No assignment** - The Services performed under this Agreement must be carried out by the Supplier. The Supplier must not may assign, novate, or otherwise transfer all or any part of its rights or liabilities under this Agreement.

12 TERMINATION

- 12.1 **Termination grounds** - Council may at its option terminate this Agreement or an Agreed Work Order or both by giving 14 days written notice to the Supplier, if:
- (a) the Supplier becomes bankrupt;
 - (b) the Supplier, in the reasonable opinion of Council, has a conflict of interest in the performance of this Agreement or has breached any of the provisions of this Agreement relating to probity;
 - (c) in the reasonable opinion of Council, the Supplier is unable or unwilling to perform all of its obligations under this Agreement;
 - (d) the Supplier commits a breach of this Agreement that, in the opinion of Council, cannot be rectified;

- (e) the Supplier's Representative is unable or unwilling to perform all of the obligations of the Supplier under this Agreement;
 - (f) the Supplier is in breach of this Agreement and has failed to rectify the breach to the satisfaction of Council within 10 Business Days following a notice to do so by Council; or
 - (g) within any period of 12 months during the Term, Council issues 3 or more notices under the clause 12.1(e).
- 12.2 **Termination without reason** - Council may at any time issue a notice to terminate this Agreement (whether or not the Supplier is in default) at its convenience and in its absolute discretion by giving a minimum of 3 months' notice to the Supplier. The Supplier is not entitled to reimbursement of any costs, expenses or loss incurred as a consequence of termination (including loss of anticipated profits) under this clause 12.2.
- 12.3 **No rights affected** - Termination of this Agreement does not affect any of Council's other rights or remedies.
- 12.4 **Rights continue** - All warranties, releases, exclusions of liability, indemnities, terms with respect to Confidential Information, publicity and privacy on the part of a party in this Agreement will remain valid and binding upon that party following termination of this Agreement and any other obligations which are expressed to or, by their nature, would be intended by the parties to survive expiry or termination of this Agreement, will accordingly survive expiry or termination of this Agreement and are enforceable at any time at law or in equity.
- 13 PROBITY**
- 13.1 **Intention** - This clause is intended to prevent corrupt conduct on the part of the Supplier and its agents, employees and sub-contractors.
- 13.2 **Code of Conduct** - The Supplier must acquaint itself and comply with the following codes, insofar as they are relevant and apply to this Agreement:
- (a) the Code of Conduct (that Council may amend from time to time without notice to the Supplier); and
 - (b) Council's other codes and policies relating to governance and business ethics (that the Supplier can request at any time).
- 13.3 **Conflicts of interest** - The Supplier must:
- (a) use reasonable endeavours to ensure that conflict of interest do not arise in the performance of the Services; and
 - (b) if conflicts of interest do arise, immediately disclose them to Council and manage those conflicts of interest in a way that demonstrates good governance.
- 13.4 **No corrupt activities** - The Supplier must not engage in any corrupt, collusive or anticompetitive conduct and warrants to the Council that:
- (a) it has not engaged in such activities; and

- (b) will not conduct or permit such activities to occur in connection with the delivery of the Services.

14 INDEMNITY AND RELEASE

- (a) **Indemnity** – Council shall indemnify and keep indemnified the Supplier (in its capacity as a member of the Major Projects Advisory Committee (MPAC)) in respect of all claims or demands made against the Supplier by a third party in connection with the Supplier's position on the MPAC but excluding claims, demands, payments or costs arising from or relating to any fraud, dishonesty or other impropriety on the part of the Supplier.
- (b) **Release** – Council agrees that the Supplier is engaged as a member of MPAC to provide independent advice based on the review of third party professional work, to the Council, who may choose to make a decision based on the advice or without regard to the advice. Council warrants that it will not hold the Supplier liable for Council's decisions based on the Supplier's or MPAC's advice and releases the Supplier from all liability, loss, costs and expenses suffered by Council as a result of the Supplier's or MPAC'S advice.

15 LEGAL ADVICE

- 15.1 The Supplier as a member of MPAC may seek independent legal advice at its own cost where the Supplier believes such advice is required to meet its responsibilities under the Services Agreement.
- 15.2 The Supplier will advise Council of its intention to seek advice and the nature of the advice sought prior to seeking such advice.

16 NOTICES

- 16.1 **Address** - A notice or other communication under this Agreement (*notice*) must be delivered by hand or sent by pre-paid post or fax to a party at the address or the fax number for that party listed in the Schedule or as otherwise specified by a party by notice.
- 16.2 **Email** – A notice may be given by way of email.
- 16.3 **Registered post** - A notice sent by post is regarded as given and received on the second Business Day following the date of postage.
- 16.4 **Fax** – Not Used
- 16.5 **Time of delivery** - A notice delivered or received other than on a Business Day or after 4.00pm (recipient's time) is regarded as received at 9.00am on the following Business Day and a notice delivered or received before 9.00am (recipient's time) is regarded as received at 9.00am.

17 GENERAL

- 17.1 **Governing law** - This Agreement is governed by the law in force in New South Wales. Each party irrevocably submits to the non-exclusive jurisdiction of courts exercising jurisdiction in New South Wales and courts of appeal from them in respect of any proceedings arising out of or in connection with this Agreement.
- 17.2 **Severable** - Every phrase, sentence, paragraph and clause in this Agreement is severable the one from the other notwithstanding the manner in which they may be linked together or grouped grammatically and if any phrase, sentence, paragraph or clause is found to be defective or unenforceable for any reason whatsoever the remaining phrases, sentences, paragraphs or clauses as the case may be, shall be of full force and effect and continue to be of full force and effect.
- 17.3 **Written waiver** - No party will be deemed to have waived any right or remedy under this Agreement unless that party has done so by written notice to the other party.
- 17.4 **Variation** - A variation of any term of this Agreement must be in writing and signed by the parties.
- 17.5 **Full effect** - Each party must, at its own expense, do all things and execute all documents necessary to give full effect to this Agreement and the transactions contemplated by it.
- 17.6 **Counterparts** - This Agreement may be executed in any number of counterparts.
- 17.7 **Independent contractor** - The Supplier is engaged as an independent contractor of Council. The Supplier must not (and must ensure that its personnel do not) represent to any person that they are employees, agents or partners of Council. Nothing in this Agreement:
- (a) constitutes the parties as principal and agent or partners; or
 - (b) gives a party authority to bind any other party in any way.

18 INSURANCE

- 18.1 The Supplier must at its own cost, prior to commencing the Services:
- (a) take out and maintain professional indemnity insurance for an amount not less than \$10 million with a reputable insurer (or for such other lesser amount as agreed by Council), which must be maintained until seven (7) years following the earlier of the termination of this Agreement or the completion of the Services; and
 - (b) provide to Council evidence in the form of certificates of currency which confirms the Supplier is complying with clause 18.1(a) at all times throughout the term of this Agreement.

15 JUNE 2021

15.1 FOR APPROVAL: Little India Business Reference Group Update..... 200

WELCOMING

ITEM NUMBER	15.1
SUBJECT	FOR APPROVAL: Little India Business Reference Group Update
REFERENCE	F2021/00521 - D08040388
REPORT OF	Acting Group Manager, City Experience

PURPOSE:

To provide an update on the outcomes of the Little India Reference Group including provision of meeting minutes.

RECOMMENDATION

- (a) **That** the minutes of the Little India Reference Group meetings be noted.
- (b) **That** Council endorse the updated Terms of Reference, including updating the maximum number of members to eleven (11).
- (c) **That** Council endorse the continuation of the Harris Park Business Reference Group for a further six (6) month period.
- (d) **That** Council approve the use of Little India to a defined trading area of Marion St, Wigram St and Station St East in Harris Park, for both Local Businesses and Council Officers to run limited promotional and marketing activity relating to the defined trading area.
 - i. Council will provide guidelines for this purpose.
 - ii. Council will review the success of the use of Little India after 6 months and provide Council with an update and further recommendation.
- (e) **Further, that** Council review the implementation of the Reference Group after 12 months' of operation and provide Council with an update and further recommendation.

BACKGROUND

1. At the Council meeting of 13 July 2020, Council resolved:
 - (a) ***That Council support the establishment of the Little India Harris Park Reference Group (Reference Group) to position Harris Park as a destination of choice with a unique food and cultural offering to deliver economic, cultural and marketing benefits to local businesses and the City of Parramatta.***
 - (b) ***That the Reference Group be established as an informal committee, independent of Council, with leadership and secretariat support provided by Council through Council's City Engagement and Experience Directorate.***
 - (c) ***That the composition of the Reference Group includes one representative (being the President) from each formally established and active Harris Park business association (up to 4 representatives), the Lord Mayor,***

Councillor Pandey or Councillor Tyrrell as the Councillor representative, up to three (3) Rosehill Ward Councillor representatives, and up to two (2) Council Officer representatives.

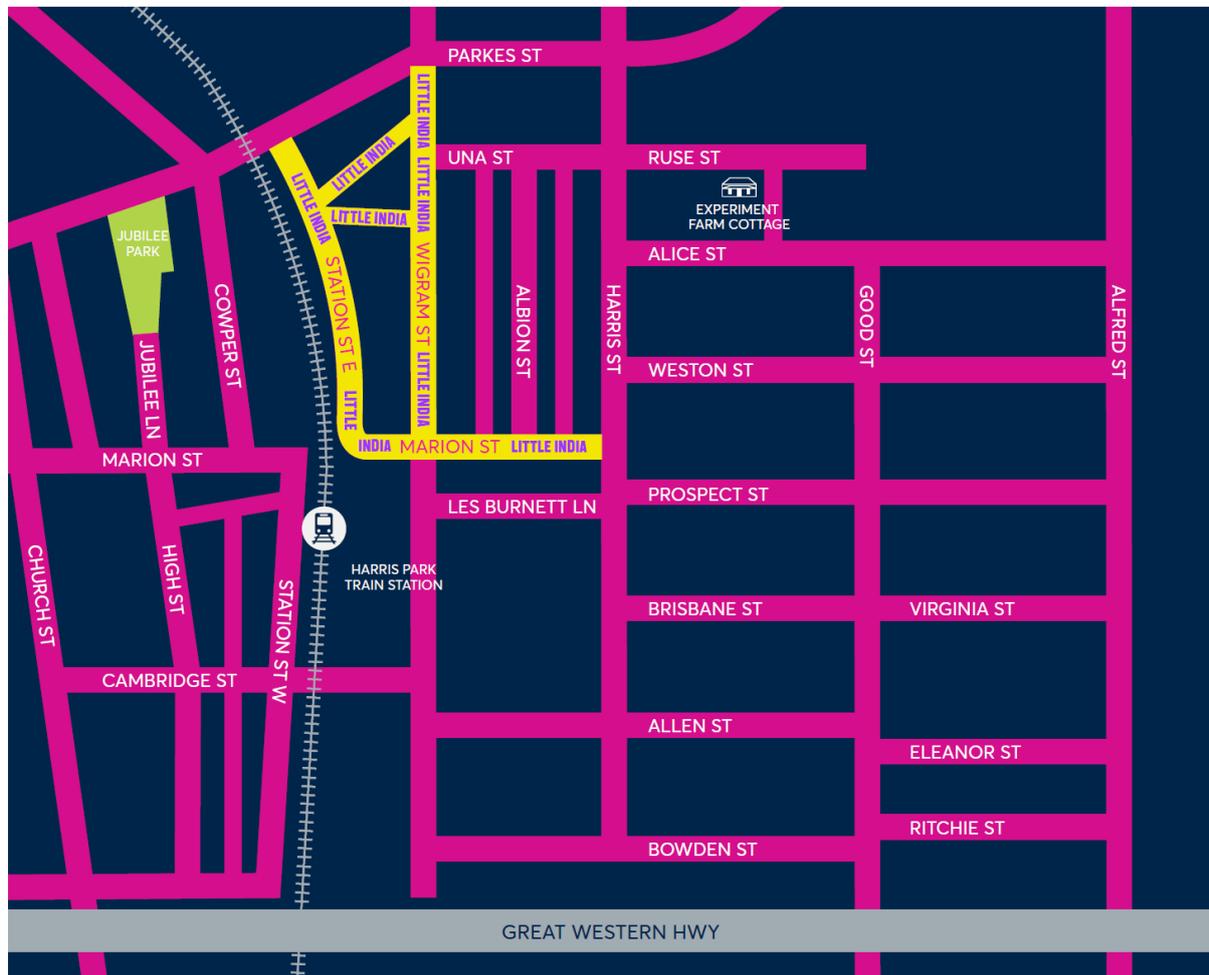

- (d) **That** Council endorse the Terms of Reference for the Reference Group outlined in Attachment 1 of this report.
- (e) **That** following the establishment of the Reference Group, all future Little India Harris Park destination programs and projects to be delivered in Harris Park, such as destination marketing campaigns and programs, community events and festivals, precinct activation initiatives, and business to business programs, are considered and endorsed by the Reference Group, to ensure a coordinated approach to the positioning of Harris Park as a unique destination to be known as "Little India", in the City of Parramatta.
- (f) **Further, that** the minutes of the Reference Group be reported to Council within six (6) months.
2. In the first 6 months of operation, three (3) Reference Group meetings have taken place. Minutes are provided in Attachment 1 to 3 of this Report. Meetings were held on the following dates:
- a. 13 October 2020
 - b. 24 November 2020 (meeting repeated on 8 December 2020)
 - c. 30 March 2021
3. The Reference Groups' membership was endorsed at the Council meeting of 13 July 2020. At the Reference Group meeting of 13 October 2020, it was moved that one additional external representative be allowable and the maximum total of members increase to eleven (11). Consequently, amendments have been made to the Membership section of the Terms of Reference, with the updated document provided in Attachment 4 of this Report for endorsement.
4. The current Reference Group membership includes:
- a) Up to five (5) External Representatives:
 - (i) Harris Park Business Forum, Mahesh Raj
 - (ii) Harris Park Community Centre, Patrick Soosay
 - (iii) Little India Australia, Gurmeet Tuli
 - (iv) Little India Harris Park Business Association, Sanjay Deshwal
 - (v) Parramatta Chamber of Commerce, Schon Condon / Roy Halabi
 - b) The Lord Mayor or his delegated Councillor representative:
 - (i) Cr Bob Dwyer, Lord Mayor, or
 - (ii) Cr Bill Tyrrell or Cr Sameer Pandey
 - c) Up to three (3) Rosehill Ward Councillors:
 - (i) Cr Steven Issa
 - (ii) Cr Patricia Procriv
 - (iii) Cr Andrew Wilson
 - d) Two (2) Council Officer representatives.

ISSUES/OPTIONS/CONSEQUENCES

5. At the Reference Group meetings, a number of Council-led initiatives were discussed including the Go Local campaign, Gift Card initiative and Community Events Grants. Reference Group members were encouraged to distribute information about these initiatives to encourage local business participation.
 6. As an outcome of the Reference Group meetings, the use of the name Little India to promote Harris Park was discussed and it was agreed that Council consult with Harris Park businesses and community directly to provide feedback regarding the 'Little India' proposal from Thursday 4 March 2021 until 9am on Tuesday 23 March 2021.
 7. Forty (40) businesses were consulted face-to-face and community feedback was provided via three (3) methods including an online survey, a quick poll and a comments board, hosted on Council's engagement platform 'Participate Parramatta'.
 8. During the consultation period 521 online surveys were completed, 23 votes were received on the quick poll and the project page on Participate Parramatta was viewed 3,060 times by 1,798 people.
 9. The consultation was specifically targeted the suburb of Harris Park however our analysis shows that responses were from a range of suburbs across Sydney with the majority being received from suburbs within the Parramatta LGA, followed by neighbouring LGA's such the Hills, Blacktown, Liverpool, Camden and Campbelltown.
 10. The consultation was widely promoted including:
 - a) All Harris Park properties notified via letterbox drop (approx. 2,400)
 - b) A social media campaign targeting Harris Park reached 4,103 people
 - c) Via the 40 businesses consulted face-to-face
 - d) Posters distributed to businesses and placed on street poles in the Harris Park town centre
 - e) The Harris Park Reference Group were notified
 11. Key findings from the community via the online survey include:
 - a) 67% supported the name 'Little India' to promote all of Harris Park
 - a) 17% supported the name to be used to promote only Wigram Street
 - b) 16% did not support the name 'Little India' being used
 12. Key findings from the business consultation include:
 - a) 58% supported the name 'Little India' to promote all of Harris Park
 - b) 23% supported the name 'Little India' to promote only Wigram Street
 - c) 18% did not support the name 'Little India' being used
 - d) 3% were unsure
 13. A quick poll was also provided with the results indicating the majority of people supported the proposal (62%).
 14. While the survey and poll were in favour of the proposal for "Little India" to be used to promote the whole of Harris Park, there were a proportion of people who shared concern over its use for the whole suburb as it did not recognise the multiculturalism and heritage of the area.
-

15. Taking into account the consultation and community feedback, it is recommended that the use of “Little India” should be limited to a defined trading area of Marion Street, Wigram Street and Station Street East where the related businesses operate.

16. The following map defines this area:

17. In order to use the term “Little India” to promote Marion Street, Wigram Street and Station Street East in Harris Park, Council will provide businesses a strict communication and campaign framework to ensure its appropriate use, consistency of application and protect the City Brand equity.

18. Specific guidelines will be developed to provide all visual identity components such as but not limited to fonts, colour palette, grids and templates and icons; taglines and copy themes that addresses the core message of the initiative; and the hierarchy of the City Brand which will endorse the entire campaign.

19. Council may use existing street poles in Harris Park to promote “Little India”. It is proposed that branded street banners be produced and installed at times when the street poles are not in use for other events or initiatives.

20. By promoting this defined precinct as “Little India” Council will deliver a coordinated approach to driving Little India at Harris Park as a destination as articulated in the City of Parramatta Destination Management Plan and as a key focus area for the Parramatta Night City Framework. It also provides a

coordinated approach to cultural events and festivals run in Harris Park and contributes to delivering one of the 3 key communications pillars of the City Brand Strategy - *Fascinating Mosaic*.

CONSULTATION & TIMING

Stakeholder Consultation

21. The following stakeholder consultation has been undertaken in relation to this matter:

Date	Stakeholder	Stakeholder Comment	Council Officer Response	Responsibility
March 2021	Local Business and Community	As outlined in points 5-13 of this Report.	Response to consultation was strong and provided clear findings.	City Engagement and Experience
13/10/20 24/11/20 (8/12/20) 30/03/21	Members at Reference Group meetings	As per minutes attached to this Report	N/A	City Engagement and Experience

Councillor Consultation

22. The following Councillor consultation has been undertaken in relation to this matter:

Date	Councillor	Councillor Comment	Council Officer Response	Responsibility
13 July 2020	Council meeting	Resolution #2812	Proceeded to establish the Reference Group membership and meetings	City Engagement and Experience

Little India Harris Park Reference Group TERMS OF REFERENCE

~~June 2021~~ June 2020

1. Primary Purpose

1.1 To partner with City of Parramatta Council in the establishment of the Little India Harris Park Tourism Reference Group (Reference Group) to position Harris Park as the 'Little India' precinct in greater Sydney.

1.2 To partner with City of Parramatta Council to deliver economic, marketing and cultural benefits for local Harris Park business, the Harris Park community, and the broader City of Parramatta community.

1.3 To drive visitation, increase spend and length of stay in the Little India Harris Park precinct by the local community, visitors and tourists.

2. Roles and Responsibilities

2.1 To provide advice, input and feedback to Council on the needs, issues and interests of the Harris Park business community as they relate to Council business and responsibilities.

2.2 To work collaboratively in developing strategies to address these needs, issues and interests that Council could include in current and future work plans.

2.3 To provide a forum for Harris Park businesses and Harris Park community members to raise and address issues and needs.

2.4 To report back to individuals, organisations and networks on Council's role, responsibilities and decisions relating to Harris Park business development, marketing programs and cultural offerings.

2.5 To liaise with Harris Park businesses, and the broader Harris Park community, to identify and represent issues affecting these communities.

2.6 To work with Council to develop and promote appropriate business programs, marketing programs, and cultural offerings in the Little India Harris Park precinct.

3. Membership

3.1 There will be a maximum of up to ~~eleventen~~ (10) Reference Group members.

3.2 Membership will comprise of up to ~~fiveour~~ (5) external representatives; up to ~~three~~ (3) ~~City of Parramatta Rosehill Ward~~ Councillor representatives, in addition to the Lord Mayor or ~~one~~ (1) ~~Lord Mayor delegatedhis Councillor representative~~ delegate, and two (2) Council Officer representatives.

3.3 Either the Lord Mayor or his/her delegated City of Parramatta Councillor representative will act as Chair of the Reference Group.

3.4 Applications for non-Council Reference Group representation will be sought through an invited Expression of Interest (EOI) process.

3.5 Reference Group members will be appointed for a maximum two-year (24-month) term.

3.6 Reference Group membership is in a voluntary capacity only with no financial remuneration.

3.5 Applicants must demonstrate skills and capacity to contribute to the Reference Group.

3.4 Applicants must be:

3.3.1 A representative (at President level or equivalent) of an active and registered Harris Park business association.

3.3.2 An individual or representative of a local community organisation with a demonstrated commitment to the Harris Park community.

5. Observers

5.1 Non-members of the Reference Group are able to attend with the permission of the convenor and Chairperson of the Reference Group.

5.2 Observers are able to participate in discussions or commentary however they must identify themselves as Observers at the beginning of the meeting; are not able to propose recommendations and will have no voting rights.

6. Frequency of Meetings

6.1 The Reference Group will initially meet monthly for the first three (3) months during the establishment phase of the Reference Group on a nominated date and time.

6.2 Following the establishment phase, the Reference Group will meet quarterly each year on a nominated date and time.

6.3 Reference Group meetings will be ninety (90) minutes in duration.

7. Reference Group Planning

7.1 All members of the Reference Group are required to attend all three (3) meetings during the establishment phase.

7.2 Following the establishment phase, all members of the Reference are required to attend a minimum of (3) quarterly meetings per year (12 month period).

7.2 At the beginning of the Reference Group's term and then at the beginning of each financial year, members will work with the Reference Group convenor to evaluate their work over the preceding year; develop a plan for the year ahead including their identified priorities and indicators of their effectiveness as a Reference Group member.

End.

- 16.2 FOR APPROVAL: 6&8 Parramatta Square - Part Closure of Darcy Street,
Parramatta 247

THRIVING

ITEM NUMBER	16.1
SUBJECT	FOR APPROVAL: Better Neighbourhood Program 21/22 and 22/23
REFERENCE	F2021/00521 - D08055394
REPORT OF	Senior Project Officer Place Services

PURPOSE:

This report seeks endorsement for the projects to be delivered under the Better Neighbourhood Program in the 2021/22 and 2022/23 financial years. The report also presents the results of the 2020/21 Centres Review that have informed the proposed allocation of funding under the Better Neighbourhood Program.

RECOMMENDATION

- (a) **That** Council approve the final list of projects for delivery within the approved budget for the Better Neighbourhood Program (BNP) in the 2021/22 and 2022/23 financial years (**Attachment 1**).
- (b) **That** for centres where public domain is under private ownership, Council approve works to be carried out on private land for existing and proposed projects initiated under the BNP, including funding 30% of the total cost of the private works, to a maximum dollar value of \$20,000 per rateable property, in alignment with the financial contribution model and maximum financial contribution threshold in Council's endorsed Retail Frontage Improvement Program.
- (c) **That** Council delegate authority to the Chief Executive Officer (CEO) to negotiate, finalise and execute agreements with private property owners for existing and proposed projects initiated under the BNP generally in accordance with the financial model set out in Recommendation (b).
- (d) **That** Council delegate authority to the Chief Executive Officer (CEO) to negotiate, finalise and execute agreements with private property owners for existing and proposed projects initiated under the BNP for a proposed public funding contribution greater than the financial model set out in Recommendation (b), including up to 100% of public funding for works on private land in the following circumstances:
 - 1 When works are proposed for three or more rateable properties at a single centre; or
 - 2 For the installation of creative artworks; or
 - 3 For works that improve disability access; or
 - 4 When the private property owner(s) undertakes shopfront improvement works or commit to providing increased maintenance generally equivalent in cost of works to the financial model set out in Recommendation (b); or
 - 5 For works on private land that constitute less than 10% of the overall cost of works; or
 - 6 For works that are in the public interest, as evidenced by outcomes of site-specific community consultation.

- (e) **Further, that** a report be presented to Council in accordance with Section 67(4) of the Local Government Act 1993 at the conclusion of the 2021-2023 Better Neighbourhood Program as outlined in Paragraph 15.

BACKGROUND

1. The **Better Neighbourhood Program** is a long-running and successful Council program that focuses on delivering capital upgrade improvements at local centres outside of the Parramatta CBD. The BNP commenced in 1999 and delivers improvements to centres to enhance the safety, vitality and economic prosperity of the area.
2. The biennial **Centres Review** provides Council with a bespoke, data-centric approach to placemaking and the management of centres through a clear evidence-based model underpinned by quantitative and qualitative datasets. This model continues to act as the primary mechanism to inform funding prioritisation for future works under the BNP as it distils the current and projected needs of existing and future communities across the LGA.
3. The 2020/21 **Centres Review** commenced in November 2020 and comprised three components;
 - a. A **Community Voice Survey** sought community input to evaluate the importance, frequency of use and perception of Council's 51 local and neighbourhood centres
 - b. A comprehensive **field audit** of each centre conducted between 15 February 2021 - 30 April 2021 to identify, assess and document the existing built and natural character of each place; and
 - c. An **asset condition assessment** to geospatially identify and comment on the state of assets within the public domain over time. These assets include, but are not limited to, street furniture, drinking fountains, garbage bins, kerb ramps, car parks, amenities units (toilets) etc.

In addition to the aforementioned methods of primary data collection, the 2020/21 Centres Review also utilised closed-source data (Council's ArcGIS portal) and open-source data (Transport for NSW timetabling) to enhance the multi-criteria analysis that enables Council to rank each Centre for funding prioritisation under the BNP.

4. The summarised **Centres Review** results table is provided in **Attachment 2**.
5. The Place Services team routinely engages with landowners and business owners to consider holistic improvements to local centres under the BNP. Each local centre is different, including some where the public domain is under private or shared ownership.
6. Any agreement for upgrade of works on private land is required to comply with Section 67 of the Local Government Act 1993, which states that Council is

required to charge an 'approved fee' for works undertaken on private land, as outlined in Council's Fees and Charges. At present, Council's Fees and Charges do not list an 'approved fee' for common works completed within a BNP project, including, but not limited to upgrades to paving and installation of street furniture. Moreover, a listing within Council's Fees and Charges is not appropriate for the BNP, as it limits the ability to provide bespoke outcomes tailored to each centre and developed as part of a local placemaking process.

7. In the alternative, a Council Resolution that lists the proposed fee to be charged is required before the works are carried out. This is what we are seeking under Recommendation (b) to (d).
8. The proposed fee to be charged is modelled off the terms of Council's endorsed Retail Frontage Improvement Program (i.e. 30% of the cost of works up to a maximum \$20k) as this is considered the most relevant adopted policy/program applying to the issue. Further, recommendation (d) lists further circumstances where a greater proportion of public funding may be appropriate, including scenarios where there may be difficulty obtaining agreement of various stakeholders, or where it may be within the public interest to do so.
9. In endorsing the terms set out in Recommendation (b), (c) and (d) which seeks to allow for the negotiation of terms with private landowners under one resolution to cover all current and future Better Neighbourhood Program projects, Council will be able to more rapidly deliver BNP projects. Consultation will continue to occur with Ward Councillors in regular briefings.

ISSUES/OPTIONS/CONSEQUENCES

10. On 13 March 2017, Council endorsed a revised Centres Review methodology and criteria to prioritise centres and neighbourhoods for BNP funding. That report noted that the criteria for the Centres Review will be iterative and updated when required. The 2020/21 Centres Review saw the creation of three (3) additional criteria to allow for a more thorough analysis of the data and to better reflect the overall character, condition and importance of each Centre. The additional criteria are as follows:
 - a. Public Domain Condition
 - b. Street Activity, and
 - c. Visitation
11. The full set of criteria used for the 2020/21 Centres Review multi-criteria analysis is provided in **Attachment 3**.
12. A summary of the data is presented in the results table (**Attachment 2**) and includes comments on the rationale for which centres have been selected for funding.
13. **Attachment 1** lists the proposed BNP projects for 2021/22 and 2022/23 financial years following ward Councillor consultation and identifies the proposed scope for identified projects. This scope is subject to refinement

following further community consultation and validation of the needs of each centre, pursuant to Council's routine place-making practice.

14. The proposed project list includes capital upgrade works, as well as activations and economic development opportunities. These projects will be delivered in partnership with relevant Council Directorates and in line with Council's endorsed strategies and programs.
15. If work is carried out on private land it is a requirement of section 67(4) *Local Government Act 1993* that a report of work is given at the next meeting of council specifying:
 - the person for whom the work was carried out
 - the nature of the work
 - the type and quantity of materials used
 - the charge made for those materials
 - the total of the number of hours taken by each person who carried out the work
 - the total amount charged for carrying out the work (including the charge made for materials)
 - the reason for carrying out the work.

It is proposed that a report of work is received by Council at the conclusion of the 2021– 2023 Better Neighbourhood Program to outline all works on private land that occurred as a part of the program.

CONSULTATION & TIMING

Stakeholder Consultation

16. As part of the biennial **Centres Review**, City of Parramatta conducted a study on the value of the 51 local and neighbourhood centres within the LGA. The **Community Voice Survey** serves as an important source for community sentiment data and ensures Council continues to deliver projects in line with community expectation and need.
17. To support participation in the Community Voice Survey, community members could have their say for a period of four (4) weeks from 8 February to 8 March 2021 via the following engagement activities:

Date	Engagement Activity	Summary of engagement	Engagement reach
08.02.21 – 08.03.21	Participate Parramatta engagement portal	The project was featured on the platform during the consultation period, resulting in 4,866 views during the consultation period. The page included the following: <ul style="list-style-type: none"> • Project background 	<ul style="list-style-type: none"> • 4,866 page views

		<ul style="list-style-type: none"> • Online survey link (via button) • Social map providing locations of the centres • Gallery of local centres up for review • Contact details for the Place Services Project team 	
Survey Shaper	The Community Voice Survey was hosted on the research platform Survey Shaper.		<ul style="list-style-type: none"> • 4,077 survey starts • 1,318 survey participants • 4,264 survey responses sharing feedback on Council's 51 local and neighbourhood centres • 973 participants who opted into the gift card draw
Social media channels	The opportunity to provide feedback was presented to 53,153 social media followers and reached approximately 35,578 people, cumulating in 2,649 clicks through to the project page.		<ul style="list-style-type: none"> • 10 engagements from an organic post via the Participate Parramatta Page • 14 engagements from an organic post via the Active Parramatta Page • 2,792 engagements from a paid campaign via City of Parramatta Facebook page • 100 engagements from an organic post via the City of Parramatta Facebook page • 24 engagements from an organic post via the City of Parramatta Twitter page

			<ul style="list-style-type: none"> 251 engagements from an organic post via the City of Parramatta Instagram page.
Electronic Direct Mails (EDM)	<p>Via four (4) EDM's, over 72,200 received notification of the opportunity to give feedback. The EDM's included:</p> <ul style="list-style-type: none"> Participate Parramatta Research Panel announcement ePulse Newsletter Community Connective Newsletter Parramatta Open Space and Recreation Newsletter 		<ul style="list-style-type: none"> 3,691 unique opens from the City Engagement: Panel 8,071 unique opens from the ePulse Newsletter 457 unique opens from the Community Connective 1,228 unique opens from the Parramatta Open Space and Recreation Newsletter
A3 Corflute Signs	60 'Have Your Say' corflute signs were printed and installed within Council's Centres with a QR code to direct participants to the survey.		The QR code on the posters generated 385 scans.

18. It is important to note that this engagement was live during the COVID-19 pandemic. As a result, no face-to-face engagement opportunities were provided. Nevertheless, the participation of 1,318 individual respondents is one of the larger response rates for recent Council consultation activities.
19. A summary of stakeholder consultation findings from the Community Voice Survey is captured in **Attachment 4**.
20. Consultation with Council's Legal Services department was also undertaken, as evidenced in the table below:

Date	Stakeholder	Stakeholder Comment	Council Officer Response	Responsibility
21.04.21 10.05.21 26.05.21 (All correspondence via email)	Legal Services	No suggested changes to the wording of the proposed resolution, Recommendation (c) to (e).	Noted, Place Services to proceed with resolution for 14.06.21 Council Report.	Place Services

Councillor Consultation

21. The following Councillor consultation has been undertaken in relation to this matter:

Date	Councillor	Councillor Comment	Council Officer Response	Responsibility
18.05.21 6:00pm – 7:30pm	North Rocks Ward Councillors	Councillors expressed support for proposed works within North Rocks Ward.	Place Services to proceed with identified projects as line items for delivery within Council's Better Neighbourhood Program for 2021/22 and 2022/23 financial years.	Place Services
19.05.21 4:00pm – 5:20pm	Dundas Ward Councillors (Cr Esber and Cr Garrard)	Councillors expressed support for proposed works within Dundas Ward.	Place Services to proceed with identified projects as line items for delivery within Council's Better Neighbourhood Program for 2021/22 and 2022/23 financial years.	Place Services
20.05.21 5:00pm – 6:00pm	Parramatta Ward Councillors	Councillors expressed support for proposed works within Parramatta Ward.	Place Services to proceed with identified projects as line items for delivery within Council's Better Neighbourhood Program for 2021/22 and 2022/23 financial years.	Place Services
20.05.21 via email	Rosehill Ward Councillors	No response received.	Place Services to proceed with identified projects as line items for delivery within Council's Better Neighbourhood Program for 2021/22 and 2022/23 financial years.	Place Services
25.05.21 3:30pm – 4:30pm	Epping Ward Councillors (Cr Tyrrell and Cr Weane)	Councillors generally supportive of the use of BNP funds for streetscape	Place Services to allocate the entire Epping Ward portion of BNP funding to the planning and delivery of short and medium	Place Services

		upgrades and an activation program within Epping Town Centre.	term activation and capital upgrades in the Epping Town Centre.	
--	--	---	---	--

LEGAL IMPLICATIONS FOR COUNCIL

22. If resolved, Place Services will not be required to seek separate resolutions of the full Council each time works are proposed on private land. This will ensure Council is compliant with Section 67 of the LG Act.
23. In addition, Place Services will be required to detail all agreements made in a report to Council when seeking endorsement of the 2023/24-2024/25 Better Neighbourhood Program.

FINANCIAL IMPLICATIONS FOR COUNCIL

24. A total funding amount of \$3,200,000 has been allocated under the BNP over the next two financial years. This includes CAPEX of \$400,000 in the exhibited draft FY 2021/22 budget and a further \$2,800,000 CAPEX in the FY 2022/23 budget.
25. The allocated budget for Year 1 and Year 2 of the BNP differs from the previously adopted Delivery Program (2018-2021) Operational Plan and Budget 2020-21 (July 2020) which had allocated \$800,000 for FY21/22 and \$2,400,000 for FY22/23. The total budget of \$3,200,000 for this program remains the same, however, it has been rephased in line with the anticipated delivery of Year 1 works.
26. The BNP is budgeted capital expenditure sourced from general revenue.
27. The funding allocation will see a smaller expenditure in Year 1 to accommodate for consultation and the development of concept and detailed design documentation. The remaining budget will be spent in the second year of the program, allowing for the construction of proposed capital works.
28. The table below summarises the financial impacts on the budget arising from approval of this report.

Attachment 3 – 2020/21 Centres Review Criteria

1. **Condition of Centre**

Divide the total of all 'Condition' criteria by the number of criteria to determine an average /5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Last Capital Upgrade	Years since last capital investment	5+ years	<5 years	<5 years
	Type of Upgrade	Minor OR major investment within Centre or surrounds	Minor investment valued <\$200,000 or upgrade NOT in Centre	Upgrade was directly in center AND >\$200,000 in value
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Future Potential	Opportunity description	High need/opportunity for major capital upgrade works to improve the use, function and vitality of the centre OR high opportunity/need for works exists despite the presence of alternative funding sources.	Moderate need for major works OR minor capital works can be accommodated within centre OR centre can be supported through adjacent upgrades - connecting centres or open space upgrades.	Centre is either impacted by other projects/likely redevelopment etc. or has limited future potential (due to recent Major upgrade with no/little room for further works).
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Asset Condition	Place Services' Operation Liaison Officers (OLOs) allocate a condition score (e.g. Dangerous, Poor, Average, Good, Very Good) for each asset within a Centre.	If the sum of 'Dangerous', 'Poor' and 'Average' assets is <50% of all assets within the Centre.	If 'Good' assets account for >25% but <100% of all assets within the Centre.	If 'Very Good' assets account for >25% of all assets within the Centre.
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile	Investment somewhat required / worthwhile	Investment not required / worthwhile
Public Domain Condition	Condition Description	Poor (5)	Average (3)	Very Good (2) Excellent (1)
	Public Domain Design (Is there a buffer from traffic?)	No (1)	Yes (0.5)	
	Public Domain Treatment	Variegated Surfaces (2)	Concrete (1) Asphalt (1) Pebblecrete (1) Brick (1)	Granite or natural stone pavers (0.5)
	Landscaping condition	Unkempt (1)	Well maintained (0.5)	
TOTAL				/5
<p>Note: The Public Domain Condition criterion is a new addition in 2020/21 and utilises data from on-site inspections to identify the design characteristics of the public domain, the quality of the hardscaping treatment and its material finish as well as the landscaping condition of softworks that may feature within the centre. Added as a subset of 'Condition', this criterion helps determine the suitability of changes to the public domain as part of future capital works within a Centre.</p>				

2. **Vibrancy**

Divide the total of all 'Vibrancy' criteria by the number of criteria to determine an average /5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Vacancy	Vacant shop fronts will be counted and scoring will be based on the number of vacancies as a percentage of the total number of shopfronts.	Moderate to high vacancies (i.e. >15%)	Some vacancies (>0% to 15%)	No vacancies (0%)
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile	Investment somewhat required / worthwhile	Investment not required / worthwhile
Outdoor Dining Site inspection to determine current availability and potential	Presence of outdoor dining?	Yes (1)		No (0)
	Potential for more or improved outdoor dining?	Yes (1)		No (0)
	Quality of existing outdoor dining provision	Low/None (2)	Medium (1)	High (0)
	Available area & ability to support outdoor dining	Lots of appropriate retail (1)	Some appropriate retail (0.5)	None (0)
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile	Investment somewhat required / worthwhile	Investment not required / worthwhile
Street Activity	Level of street activity	Low Activity - no activation witnessed (3)	Moderate activity - at least one instance of activation type as per the Street Activity Policy (2)	High activity - 3 or more instances of activation as per the Street Activity Policy, or one type of activation across a large portion of the centre (1)
	Are there underutilised spaces within the centre?	Yes (1)		No (0)
	Can street activation or further street activation be accommodated?	Yes (1)		No (-1)
TOTAL				/5
<p>Note: The Street Activity criterion is a new addition in 2020/21 added as a subset of 'Vibrancy' and measures the presence and frequency of street activity types (as per Council's Street Activity Policy) within the public domain of the Centres across the LGA. The spatial arrangement of the public domain is an important consideration within this criterion, including whether there are underutilised spaces to allow for street activation or further street activation to be accommodated. This criterion gauges whether there is an appropriate level of activity in our streets to enhance the experience of residents, visitors and workers.</p>				

3. Place

Divide the total of all 'Place' criteria by the number of criteria to determine an average /5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Land Use	Count of the number of land uses within the immediate vicinity of the centre	Close proximity of multiple land uses (6+ land uses)	More than 1 land use within or near the centre (2 - 5 land uses)	Low variability of land use (<2 land use only)
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Public Domain Area	Calculation of the size of the public domain within the centre as a portion of total lot size.	Large amount of public domain (>50%)	Moderate amount of public domain (25-50%)	None or small amount of public domain (0-25%)
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Future Development Potential	Does the land use zoning immediately surrounding the Centre allow for potential development?	Potential for significant development (R4 surrounding retail core)	Potential for moderate development (SP2 or B2-6 surrounding retail core)	No development projected (R2-3 surrounding retail core only)
TOTAL				/5

4. Connectivity

Divide the total of all 'Connectivity' criteria by the number of criteria to determine an average /5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Density	Level of density within a 'walkable' zone. Calculated based on population size within a 500m radius (5 min walk) of the centre.	High population density (> 3,000 people)	Medium population density (1,500 – 3000 people)	Low population density (<1,500 people)
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile	Investment somewhat required / worthwhile	Investment not required / worthwhile
Access & Mobility Site inspection to ascertain the presence of disabled parking and accessible kerb ramps	Presence of accessibility kerbs?	No (1)		Yes (0)
	Are there observable issues?	Yes (1) NA (1) – only applicable if 'No' accessibility kerbs present.		No (0)
	Identify ramp issues from the list (None, Narrow, Steep grade, Cracks, Uneven surface, Trip hazard, NA)	If multiple issues identified (2)	If no accessibility kerbs present, NA (1.5)	If accessibility kerbs present with no issues identified (1)
	Presence of accessible parking spots	No (1)		Yes (0)
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Public Transport	Desktop research to identify the number of transport options available within walking distance of the centre and the frequency of those services.	Limited connectivity (No options within 10 min walk OR infrequent services)	Moderately connected (At least 1 mode within 10 min walk with regular service)	Well connected (At least 2 modes within 10 min walk with regular service)
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile	Investment somewhat required / worthwhile	Investment not required / worthwhile
Shade Site inspection to determine level of shade cover within the centre and its immediate surrounds	Level of shade provided within the Centre	Limited (3)	Moderate (2)	Well Shaded (1)
	Do shopfront awnings provide continuous shelter?	No (1)		Yes (0)
	Extent of canopy cover in the public domain	Limited shade (1) No street trees present (1) Other (1)	Mature canopy cover present (0.5) Trees will provide canopy cover over time (0.5)	
TOTAL				/5

5. Community Voice

Divide the total of all 'Community Voice' criteria by the number of criteria to determine an average /5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Net Promoter Score	Community perception score when asked – "how likely is it on a scale of 0 to 10 that you would recommend this Centre to a friend of neighbour?"	Poorly rated by local community (Average Net Promoter Score 0-6)	Moderately rated by local community (Average Net Promoter Score 7-8)	Highly rated by local community (Average Net Promoter Score 9-10)
TOTAL				/5

Criterion	Description	Proposed Scoring		
		Investment required / worthwhile (5)	Investment somewhat required / worthwhile (3)	Investment not required / worthwhile (1)
Visitation	The frequency at which patrons visit the identified centre, measured as the sum of 'daily', 'few times a week' and 'once a week' as a portion of total visitation activity.	High level of visitation (frequency of weekly visitation account >50%)`	Moderate level of visitation (frequency of weekly visitation account <25% but <50%)`	Low level of visitation (frequency of weekly visitation account <25%)`
TOTAL				/5

Note: The Visitation criterion is a new addition in 2020/21 and leverages findings from the Community Voice Survey to distil the frequency residents, visitors and workers visit each of the 51 Centres across the LGA. When users frequent a centre more regularly, there is a higher demand on the assets and therefore the rate at which an asset will deteriorate or require maintenance will be greater than a centre with fewer users. Added as a subset of 'Community Voice', this criterion assists in determining the demand users place on a Centre's assets.

6. Cumulative Score

Add the total of average scores to determine a cumulative total /25. Centres with a high cumulative total are those considered to be the 'lowest performing' and therefore the highest priority for funding in the next BNP cycle.

Condition /5	Vibrancy /5	Place /5	Connectivity /5	Community Voice /5
TOTAL				/25

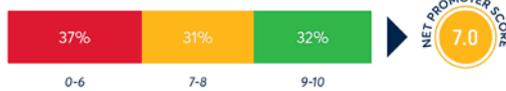

Attachment 4: Summary of participant feedback for each of the 51 Centres reviewed in the Community Voice Survey

ALBERT STREET SHOPS
49-53 ALBERT STREET,
NORTH PARRAMATTA

Participants are most likely to visit this centre
A FEW TIMES A WEEK (28%)

- | | |
|--|---|
| <p>The most frequently selected reasons for visiting include:</p> <ol style="list-style-type: none"> 1 Convenience 2 Location 3 To access particular stores or services | <p>The top three (3) improvements participants would most like to see:</p> <ol style="list-style-type: none"> 1 Toilets 2 Street activities or temporary centre activations 3 Public art |

THRIVING

ITEM NUMBER	16.2
SUBJECT	FOR APPROVAL: 6&8 Parramatta Square - Part Closure of Darcy Street, Parramatta
REFERENCE	F2021/00521 - D08064738
REPORT OF	Development Manager

PURPOSE:

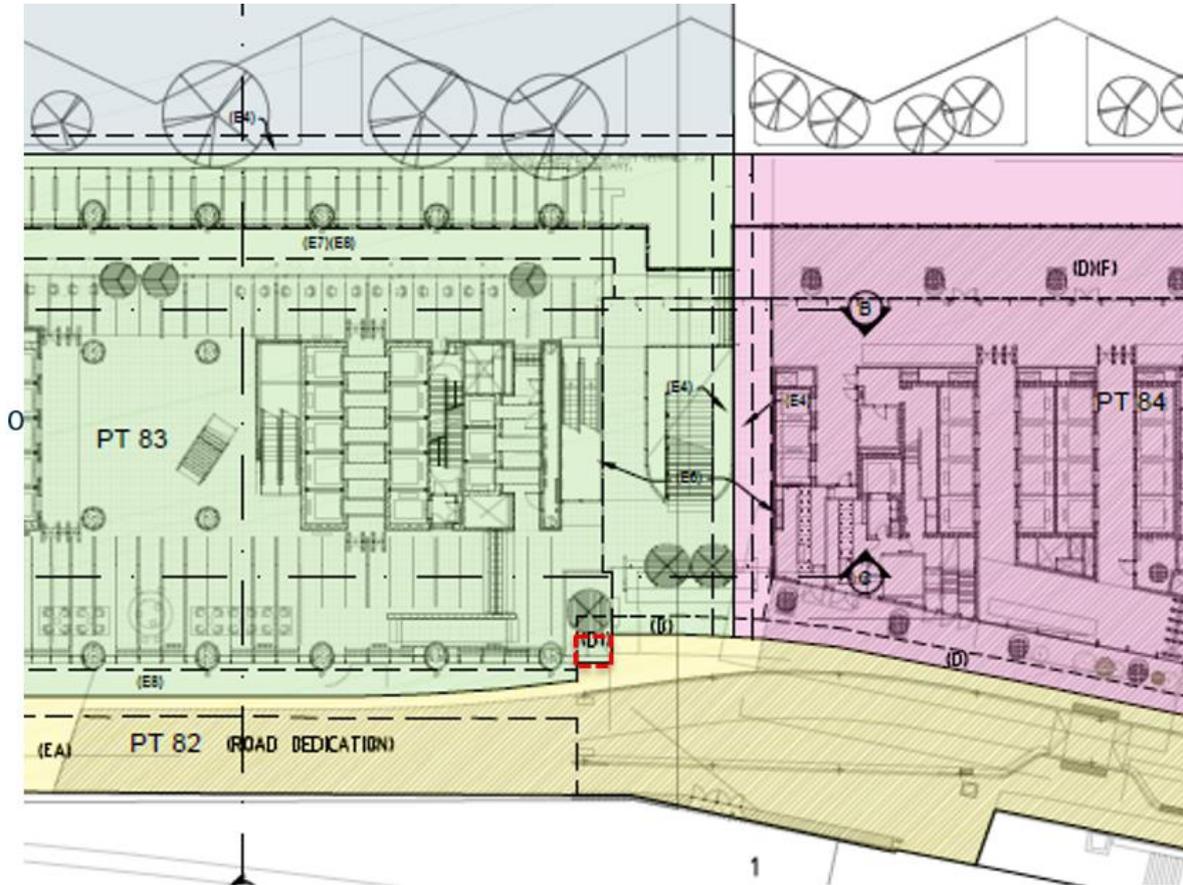

To close part of Darcy Street, Parramatta to allow for the orderly development of 6 & 8 Parramatta Square.

RECOMMENDATION

- (a) **That** Council approve permanently closing part of Darcy Street, Parramatta, shown as Lot 131 coloured blue on **Attachment 1**, in accordance with Part 4 Division 3 of the Roads Act 1993.
- (b) **That** Council approve to classify the portion of Darcy Street being closed, shown as Lot 131 coloured blue on **Attachment 1**, as operational upon formal gazettal of the road closure.
- (c) **Further, that** Council delegate authority to the Chief Executive Officer to sign all documentation, including but not limited to land owner's consent, in connection with this matter.

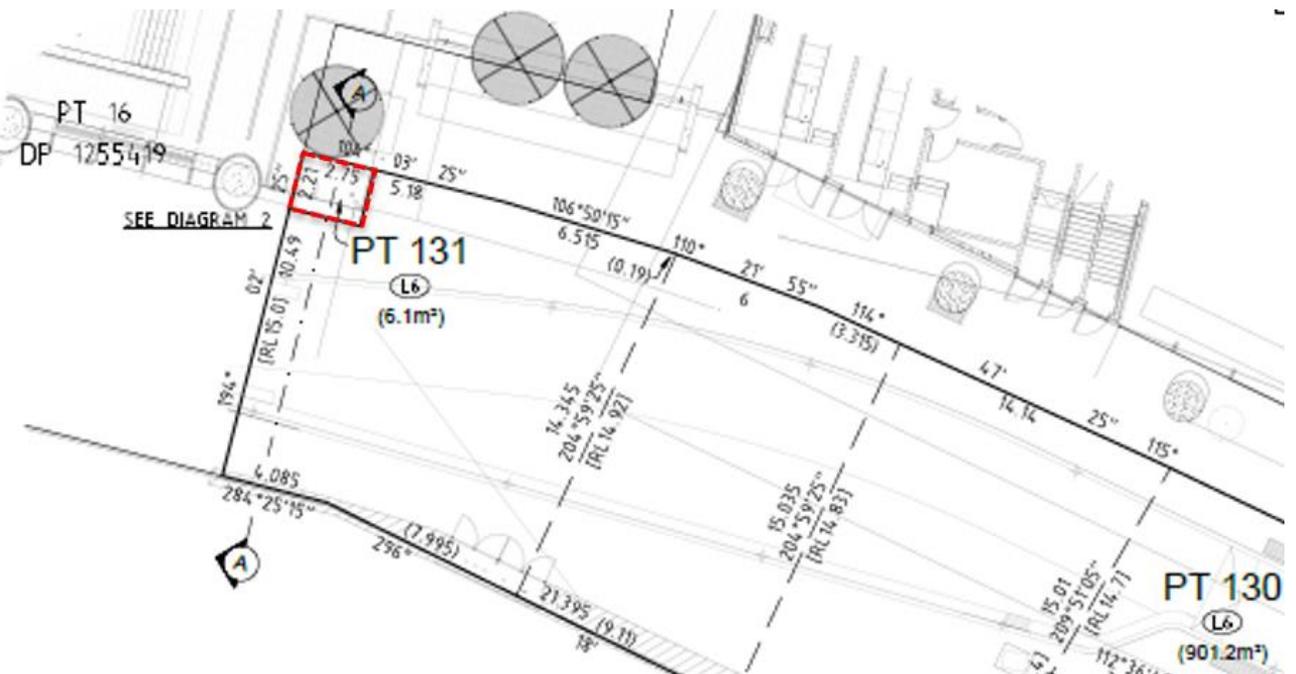

BACKGROUND

1. On 17 December 2018, Walker Corporation (Walker) obtained consent under DA/47/2018 for the 6&8 PS commercial tower (6&8 PS DA). This included a portion of the 6&8 PS building - the Darcy Street pedestrian entry and foyer, that would overlap with the future 4PS Easement for Access.
2. On 24 July 2019, Walker obtained consent under DA/246/2019 for the 4PS stratum subdivision. This subdivision included an Easement for Access for the 4PS portion of the Darcy Street northern footpath that extended by a few metres into the adjoining 6&8 PS site. The 4PS portion of Darcy Street was dedicated as public road as part of the 4PS stratum subdivision.
3. On 16 February 2021, Walker obtained consent under DA/652/2020 for the 6&8 PS stratum subdivision. This included an area labelled 'D1' that removed the portion of the 4PS Easement for Access that overlapped with the approved 6&8 PS building.
4. Walker have submitted Road Closure Survey Plans that define Lot 131 as the portion of Darcy Street that was dedicated as public road under the 4PS stratum subdivision (DA/246/2019) that overlaps with the approved 6&8 PS stratum subdivision (DA/652/2020).
5. The road closure of Lot 131 is required to adjust the boundary between Darcy Street and the 6&8 PS development so that it is in accordance with the approved building plans and approved stratum subdivision.

DA/652/2020 - 6&8 PS Stratum Subdivision - Upper Ground Level / Darcy Street - Lot 131 in red

6. Lot 131 is defined within the Road Closure Survey Plans at
 - a. Upper Ground as 6.1 sqm (2.75m x 2.21m);
 - b. Podium 1 as 5.5 sqm (2.81m x 2.285m); and
 - c. Podium 2 and above as 2.5 sqm (2.49m x 1.29m).

6&8 PS Subdivision Certificate Application - Upper Ground Level / Darcy Street - Lot 131 in red

ISSUES/OPTIONS/CONSEQUENCES

7. The impact on pedestrian amenity along the Darcy Street northern footpath has been considered by the Consent Authority in its assessment and approval of DA/47/2018 for the 6&8 PS tower. The proposed creation of Lot 131 and subsequent boundary adjustment is in accordance with the Notice of Determination for DA/47/2018 and the approved plans for the 6&8 PS tower.
8. The proposed boundary adjustment is in accordance with the Notice of Determination for DA/652/2020 and the approved plans for the 6&8 PS stratum subdivision.

CONSULTATION & TIMING

Stakeholder Consultation

9. The following stakeholder consultation has been undertaken in relation to this matter:

Date	Stakeholder	Stakeholder Comment	Council Officer Response	Responsibility
May 2021	Property Security and Asset Services	Road Closure survey plans are in order for submission to NSW Land Registry Services (LRS).	Noted	Maurice Higgins
Feb 2021	Consent Authority	Consent Authority has approved DA/652/2020 for the 6&8 PS stratum subdivision.	Noted	Myfanwy McNally

Councillor Consultation

10. The following Councillor consultation has been undertaken in relation to this matter:

Date	Councillor	Councillor Comment	Council Officer Response	Responsibility
Nil				

LEGAL IMPLICATIONS FOR COUNCIL

11. Boundary adjustments are contemplated in the 8PS PDA under clauses 22.12 and 22.13. The creation of Lot 131 is in accordance with Clause 22.12 and will allow Walker to consolidate the various 6&8 PS parcels into a single 6&8 PS

developer lot upon completion.

FINANCIAL IMPLICATIONS FOR COUNCIL

12. The 6&8 PS development is covered under Council's existing Project Development Agreement (8PS PDA) with Walker (refer D07431635). The proposed road closure of Lot 131 is not forecast to have a further financial impact on Council.
13. Any fees and costs associated with the subdivision certificate application - including legal and survey, will be borne by Walker as the applicant.
14. The table below summarises the financial impacts on the budget arising from approval of this report.

ITEM NUMBER	17.1
SUBJECT	FOR NOTATION: Minutes of the 5/7 Parramatta Square Advisory Group Meeting held on 6 May 2021
REFERENCE	F2021/00521 - D08042554
REPORT OF	Business Governance Officer

PURPOSE:

To inform Council of key discussion points from the 5/7 Parramatta Square Advisory Group Meeting held on 6 May 2021.

RECOMMENDATION

That Council receive and note the minutes of the 5/7 Parramatta Square Advisory Group meeting held on 6 May 2021.

BACKGROUND

1. Council's 5/7 Parramatta Square Advisory Group (Advisory Group) meets every month currently comprises seven (7) members. The purpose of the Advisory Group is to guide the continued progress of the current design, construction, and business readiness activities of 5 and 7 Parramatta Square.
2. Council receives reports detailing the minutes of Advisory Group meetings, to keep Council informed of the advice of the Advisory Group. The Advisory Group will provide recommendations to Council separately on matters that require Council resolution.
3. This report summarises key discussion points of this meeting for Council's information. The minutes of the meeting are provided at **Attachment 1**.

KEY DISCUSSION POINTS

4. The key points discussed at the meeting are summarised below.

5PS Building Naming Project

5. The process and objectives of naming 5PS was presented to the Advisory Group. The Advisory Group discussed names and recommend that two names being 'Civic Place' and 'The Banksia' be presented to Councillors at a workshop.

5PS Forecourt & Building Lighting

6. Options for lighting, column design and window glass for the façade of the building were presented to the Advisory Group. The Advisory Group recommended that the window glass design use coloured frits for the modesty panel and the option of the higher portion of the glass using white frits be explored.

7. Forecourt artwork was presented to the Advisory Group being a ground-based artwork representing the Parramatta River. The Advisory Group recommended that there are less trees and request that an overlay of the river map in the pavement be presented to the Group.

7 Parramatta Square Design Update (Capex & Opex)

8. Three options for the Parramatta Town Hall were presented to the Advisory Group (1. Cosmetic upgrade, 2. Full upgrade no Southern Annexe, 3. Full upgrade and Southern Annexe. Options for interior and exterior of Jubilee Hall was also presented. The Advisory Group recommended that Council proceed with option 3.

5PS Council Chamber Audio Presentation

9. A BOSCH audio device was presented to the Advisory Group. The Advisory Group recommend the audio-visual solution include a screen fixed in the joinery for each Councillor that presents the meeting minutes.

LEGAL IMPLICATIONS FOR COUNCIL

10. There are no legal implications for Council associated with this report.

FINANCIAL IMPLICATIONS FOR COUNCIL

11. There are no financial implications for Council associated with noting the minutes of the Advisory Group meeting. All budget implications associated with the delivery of the 5 and 7 Parramatta Square project are subject to separate reports.

1. 5PS Building Naming Project

Presented by Eva Farlow

The objectives and process undertaken to name 5 Parramatta Square with an objective deadline of 26 July 2021 was presented.

Shortlisted names were presented to Working Group for discussion.

Risk of not naming the building was also discussed by staff.

The Working Group provided the following feedback and comments:

- What are we trying to achieve by naming 5PS?

Response: the place is of significance and therefore should be named, in choosing a name several thematics were considered as well as precedents.

- Parramatta Town Hall was another name suggested by members being that in the British context the town hall is what historically housed Council Chambers.
- Concern was raised regarding the difficulty of pronouncing the Aboriginal names shortlisted.
- Discussion was had regarding a dual naming similar to Inner Wests Marrickville library. The Working Group were split on whether this would be suitable. The Working Group requested information on what the place was used for and called in Indigenous history to

be able to consider this option

- Discussions were had about naming the building after a person such as Sir James Martin or David Borger. The Working Group considered previous resolutions showing a preference not to name the building after a person and did not pursue this as an option.
- The name Civic Place and The Banksia were considered by the Working Group.

Outcome: The Working Group recommend two options being Civic Place and The Banksia be presented to a Councillor Workshop prior to Council approval.

2. 5PS Forecourt & Building Lighting

Presented by Bruce Ramus and Richard Does

Illuminated soffit was suggested for the façade lighting and example pictures were presented.

Column design was presented to the Working Group as having digital screens that can be programmed and be used for wayfinding or thematics.

Window frits (being an applied pattern on glass) was presented as the preferred option for the façade windows with coloured elements to assist in transition of lower coloured lighting and coloured roof. The pattern on the glass would appear in a wave pattern.

The Working Group provided the following comments and feedback:

- What would the digital column screens look like if they were turned off?
Response: They would be black screens, however if maintained and budgeted for properly screen should not be turned off.
- Do the digital screens emit heat and how would this be managed if so?
Response: Screens will emit minimal heat however would have an air gap between the screen and the column dissipate heat. If this is not possible then a mechanical cooling system could be installed.
- Are the digital screens cornered or wrapped screens?
Response: The screens could be either however the ones we have suggested are cornered.
- Questions were raised as to whether the window frits had to be red as presented or whether it could be white and colour could be altered using lights.
Response: This is possible however if the frits is not coloured it would be largely ineffective during the day. Presenters recommended that the coloured frits remains for the modesty panel of the window and white frits can be explored as an option for the higher portion of the glass.
- What is the cost of a frit and if it is comparable to marble or brass why are we not using those as options?
Response: window frits are cheaper than a screen, marble or brass.
- Can a person inside the building see the square clearly.
Response: Yes

- What is the cost of a window frits?
Response: Taken on notice.
- What is the lifespan of the digital screens on columns?
Response: 10+ years. Technology can fail and to maintain the life of the screens an operational and maintenance budget will need to be allocated to keep them functioning.
- What will the columns look like without a digital screen?
Response: A pewter colour.

Outcome: The Working Group recommend that the option of having a red window frits applied to the modesty layer and the higher layer be a white frit adjustable by light be explored.

Forecourt artwork was presented to the Working Group. The artwork design was based on the Parramatta River and gathering places. It is recommended that it is an interactive floor which responds when standing on it.

Artwork is based solely on the ground and does not have any vertical aspects so as not to affect the library.

The Working Group provided the following comments and feedback:

- That the river map be etched or outlined into the pavement and the digital carpet on top to make it clearer what the abstract represents.
- That there be less trees.

Outcome: The Working Group recommend removal of some trees.

Outcome: The Working Group request an overlay of the river and removal of trees be presented to them prior to going to Council for approval.

3. 7 Parramatta Square Design Update (Capex & Opex)

Presented by Boz Lukin, Ashley Cooke and Richard Does

Three options were presented regarding Parramatta Town Hall.

- Option 1 – Cosmetic Upgrade
- Option 2 – Full Upgrade no Southern Annexe
- Option 3 – Full Upgrade and Southern Annexe

Options for interior an exterior of Jubilee Hall was presented.

Costs of each option was presented.

The Working Group provided the following comments and feedback:

- Concerns were raised that heritage aspects were not the focus in Option 3.
- Is he heritage significance preserved when enclosing the frontage in the manner proposed?
Response: Yes.

Outcome: Option 3 preferred outcome ie. Incorporation of southern annexe and maximise Town Hall commercial potential, enabling activation of northern laneway and Parramatta Square frontages of Town Hall.

Outcome: Forecast cashflow of property reserve to be provided incorporating additional \$10m required to deliver Option 3.

Outcome: Current Option 3 timeline for completion is October 2022. Programme to be explored to target early completion of southern annexe in line with opening of 5PS and public domain, and contain any construction works within town hall and northern lane.

4. 5PS Council Chamber Audio Presentation

Presented by David Holmes

The recommended BOSCH device was presented to the group.

The Working Group provided the following comments and feedback:

- Is electronic voting system equivalent to a show of hands legislatively?
Response: Yes, if the voting system is presented clearly.
- What is the cost of the system?
Response: Taken on notice
- Members thought the technology was dated.
- Members asked whether there was a solution that meant they would have a tablet or screen at each Councillor desk that also displayed the live minutes.

Outcome: The Working Group recommend a screen fixed in the joinery for each Councillor that presents meeting minutes.

5. Future Meetings

It was discussed that future meetings were to be held on a Thursday in future months.

Meeting closed: 8.20pm

Next Committee meeting: TBC

INNOVATIVE

ITEM NUMBER	17.2
SUBJECT	FOR NOTATION: Minutes of the Smart City Advisory Committee Meeting held on 4 May 2021
REFERENCE	F2017/00685 - D08045680
REPORT OF	Project Officer

PURPOSE:

To provide Council with the minutes of the Smart City Advisory Committee meeting held on Tuesday 4 May 2021 and highlight any recommendations made by the Committee to Council.

RECOMMENDATION

- (a) **That** Council note the minutes of the Smart City Advisory Committee meeting held on 4 May 2021 (provided at **Attachment 1**).
- (b) **Further, that** Council note that the Committee supports the University of Technology Sydney in submitting an Expression of Interest to the Smart Places Acceleration Program.

BACKGROUND

1. The Smart City Advisory Committee meeting took place on 4 May 2021. Under the terms of reference of the Smart City Advisory Committee, it is a requirement that the meeting minutes are reported to Council.
2. This report summaries the agenda and includes the minutes of the meeting (**Attachment 1**).

ISSUES/OPTIONS/CONSEQUENCES

3. The Committee were provided with a presentation from the University of Technology Sydney regarding a proposed Smart Places Acceleration Program initiative that aims to develop a planning tool to model local temperature variations to predict the impact of different variables over time.
4. The Committee supported the proposal from the University of Technology Sydney in submitting an Expression of Interest to the Program, including naming City of Parramatta as a potential partner. Submitting an EOI does not commit Council to any projects or expenditure at this stage. Further approval will be sought if the proposal progresses past the EOI stage.
5. The Committee was provided with an update on the NSW Smart Places Strategy including the Smart Places Acceleration Program and the Greater Parramatta Smart Cities Plan.
6. The Committee were advised that two EOIs are proposed to be submitted to the NSW Smart Places Acceleration Program initially for the Smart Planning Approvals and Integrated Smart Parking initiatives. Submitting an EOI does not

commit Council to any budget expenditure, it simply opens an opportunity to develop a future business case.

7. It was noted that the Greater Parramatta Smart Cities Plan is being developed by the Department of Planning, Industry and Environment. The Committee requested the Department of Planning, Industry and Environment provide a presentation on the development of the Plan at the next Smart City Advisory Committee meeting.
8. The Committee received an update on the ICT Program. The Committee requested to be provided with an update on the Pathway software upgrade at the next Smart City Advisory Committee meeting.
9. The CEO proposed extending the scope of the Smart City Advisory Committee to provide centralised advice on Council's delivery of digital innovation projects. A governance proposal will be presented at the next Smart City Advisory Committee meeting for the Committee's consideration.

CONSULTATION & TIMING

Stakeholder Consultation

10. The following stakeholder consultation has been undertaken in relation to this matter:

Date	Stakeholder	Stakeholder Comment	Council Officer Response	Responsibility
N/A	N/A	N/A	N/A	N/A

Councillor Consultation

11. The following Councillor consultation has been undertaken in relation to this matter:

Date	Councillor	Councillor Comment	Council Officer Response	Responsibility
N/A	N/A	N/A	N/A	N/A

LEGAL IMPLICATIONS FOR COUNCIL

12. There are no legal implications for Council associated with this report.

FINANCIAL IMPLICATIONS FOR COUNCIL

13. There are currently no budgetary implications for Council for the Smart Places Acceleration Program as part of the expression of interest process. If any of the proposed initiatives progress to the next stage of business case development then resourcing and any budgetary implications would then need to be considered through the Project Review Committee, Council's budget or quarterly review process prior to the submission of any business case.
14. The table below summarises the financial impacts on the budget arising from approval of this report.

	FY 20/21	FY 21/22	FY 22/23	FY 23/24

REFERENCE MATERIAL

MINUTES

Meeting Name	Smart City Advisory Committee	
Date	Tuesday 4 May 2021	5:00 PM
Venue	Level 12 Boardroom/Online via Zoom	
Attendees	Councillor Steven Issa (Chair) Ben Meek (member) Lauren Jewell (member) Lakshmi Logathassan (member) Geoff King (Convenor) Brett Newman	Su Cram Ashlyn Kishore Mark Rugless Melissa McIsaac (secretariat) Andrew Tovey (UTS) – item 3 Kerryn Wilmot (UTS) – item 3
Apologies	Councillor Sameer Pandey	
Chaired by	Councillor Steven Issa	

1. Welcome & Acknowledgment of the traditional land owners

The Meeting commenced at 5:03pm. Councillor Issa acknowledged the traditional owners of the land and welcomed everyone to the Smart City Advisory Committee meeting and introductions were made.

Councillor Sameer Pandey was an apology for this meeting.

2. Conflicts of Interest

There were no disclosures of pecuniary/non-pecuniary interest.

There were no directorship disclosures.

3. Presentation from University of Technology Sydney (UTS): Proposed Smart Places Acceleration Program partnership initiative

The Committee were provided with a presentation from the Institute for Sustainable Futures at the University of Technology Sydney (UTS) regarding a proposed Smart Places Acceleration Program initiative. Western Sydney University (WSU) and property developer EG have also been named as partners in this proposed initiative.

The proposed initiative seeks to leverage the existing work that has been done in Melrose Park, to establish a prototype for a development site in North Rocks. It was explained that the aim of the initiative is to use the data retrieved from the sensors to model temperature conditions in areas where there are no sensors, therefore creating a planning tool which may be able to predict the impact of different variables.

UTS is preparing an EOI for funding through the Smart Places Acceleration Program, and it is intended to seek the support of the Department of Planning, Industry, and Environment (DPIE) as the project's required State Government partner.

The Committee considered the proposal and stressed the importance of avoiding fragmentation between environmental sensing projects. UTS clarified that the objective of the project is that the model can be expanded to incorporate other environmental data sets once the initial prototype is functional. The Committee suggested that UTS consider the Department of Customer Service as a State Government partner as they are also working on digital twin initiatives.

UTS confirmed that the minimum contribution by Council to be named as a partner will be to provide access to the Melrose Park sensor data.

The Committee supported the proposal from the University of Technology Sydney in submitting an Expression of Interest for the Smart Places Acceleration Program, including naming City of Parramatta as a partner and providing UTS with access to the Melrose Park sensor data.

It was noted that the EOI does not commit Council to any budget and that the next step following the EOI is to develop a business case for funding.

Councillor Issa left meeting at 5:08pm and returned at 5:15pm during discussion of Item 3.

4. Update on Smart Places Acceleration Program and Greater Parramatta Smart Cities Plan

The Committee received an update on the NSW Smart Places Strategy, including the Smart Places Acceleration Program and Greater Parramatta Smart Cities Plan.

Smart Places Acceleration Program

The Committee noted that the Program is facilitated by \$45 million in funding under the Digital Restart Fund, over three years. The Program was established to meet Action 8 of the NSW Smart Places Strategy.

It was noted that the Council is currently at Step 2 of the process, Expressions of Interest. The Committee were advised that the selection criteria has changed, with a new question regarding how proposals participate in delivering on replicability, interoperability, consistent architecture, open data, and/or support for NSW foundational policy.

It is proposed to submit two Expressions of Interest initially to the Program – Smart Planning Approvals and Integrated Smart Parking.

Greater Parramatta Smart Cities Plan

The Committee noted that the development of this Plan is to address Action 12 of the NSW Smart Places Strategy which is to invest in Smart Places programs to build in connected technology and infrastructure in areas undergoing large scale redevelopment or renewal, including Greater Parramatta and the Olympic Peninsula.

The Committee were advised that development of the Plan is being led by the Department of Planning, Industry, and Environment, and an update will be provided at the next meeting.

The Committee requested for the Department of Planning, Industry, and Environment to provide an update on the development of the Greater Parramatta Smart Cities Plan at the next meeting.

5. ICT Update

The Committee received an update on the ICT program, noting that projects in the following areas are in progress:

- Cyber security
- Applications
- Integration of applications
- End User Devices
- Records

The Committee were advised that most of Council's systems should be upgraded to the latest versions by September.

Councillor Issa raised concern as to ensuring there is an integrated project management approach between the development of Council's ICT strategy, 5/7 Parramatta Square Committee, and discussions regarding the future workplace. The Committee further requested to be provided with an update on the outcomes of aligning Council's ICT initiatives.

The Committee also requested to be provided with an update on the Pathway software upgrade as a tool for improving customer service delivery at Council.

Brett Newman joined meet at 6:08pm during discussion of Item 5.

6. Update from SCAC Members

The Committee were requested to raise other matters of interest:

- Councillor Issa encouraged the Committee to read about and watch the recording from the Australian Financial Review's Government Services Summit 2021. The virtual event featured presentations by Government Ministers from across the country and provided insight into the direction of the State and Federal Governments.
- Lauren Jewell notified the Committee that she will be attending the Australasian Placemaking Symposium in July regarding digital placemaking, and will report back on the event at the following meeting.

7. General Business

The Committee received updates on the following Smart City initiatives:

- Real Time Environmental Monitoring: Data integration has been completed for sensors in Melrose Park and Doyle Ground. Procurement is being finalised for the network to improve coverage across the LGA.
- Smart City Hub (Parramatta Square): An updated Briefing Note and Business Case are being prepared for the Project Review Committee.
- Melrose Park Smart Planning for Climate Responsive Neighbourhoods: All 8 project milestones of this Smart Cities and Suburbs project are complete.
- Storybox Parramatta: This project is also completed and has been handed over. Councillor Issa congratulated Council officers on the positive feedback received.

Councillor Issa requested an update on Council's Digitising Heritage initiative at the next meeting.

Brett Newman, CEO of City of Parramatta, joined the meeting to propose extending the scope of the Smart City Advisory Committee. The CEO highlighted the potential for the Committee to serve as a forum for more-broadly considered projects aimed at generating innovation and identified the need to better-align the organisation's delivery of innovation projects. The CEO proposed that the Committee could provide centralised advice on Council's delivery of innovation projects. It was suggested that the Terms of Reference for the Committee would be more focused on key priorities and innovation that would improve the experience of the City.

The Committee was supportive of giving consideration to reviewing and expanding the Committee's scope to include innovation more broadly. The Committee requested to be presented with additional details regarding any proposed changes to the Committee's Terms of Reference.

The CEO advised that a formal proposal will be presented at the next meeting for the Committee's consideration. The Committee requested to be provided with any briefing materials one week in advance of the meeting.

The next meeting will be held on Tuesday, 29 June at 5pm.

The meeting closed at 6:31pm.

INNOVATIVE

ITEM NUMBER	17.3
SUBJECT	FOR APPROVAL: Post Gateway - Draft Development Control Plan and Draft Planning Agreement for 85-91 Thomas Street, Parramatta
REFERENCE	RZ/11/2016 - D08012633
REPORT OF	Project Officer Land Use
APPLICANT:	Think Planners Pty Ltd
LANDOWNER:	Century 888 Pty Ltd

DEVELOPMENT APPLICATIONS CONSIDERED BY SYDNEY CENTRAL CITY PLANNING PANEL: Nil**PURPOSE:**

The purpose of this report is:

- To seek Council's endorsement of a draft amendment to the Morton Street Precinct section of the Parramatta Development Control Plan and a draft Planning Agreement for land at 85-91 Thomas Street, Parramatta for public exhibition in conjunction with the Planning Proposal endorsed by Council on 9 June 2020

RECOMMENDATION

- That** Council endorse the draft amendments to Part 4.1.9 Morton Street Precinct, Parramatta DCP 2011, introducing new site-specific controls for the land at 85-91 Thomas Street, Parramatta, as provided at **Attachment 1**, for the purpose of public exhibition.
- That** Council authorise the Chief Executive Officer to commence the legal drafting of a Planning Agreement in accordance with the Letter of Offer as provided in **Attachment 2**, and terms outlined in this report on behalf of Council for the purpose of public exhibition.
- That** the draft amendment to Part 4.1.9, Parramatta DCP 2011 and draft Planning Agreement be placed on public exhibition concurrently with the updated Planning Proposal in **Attachment 3**, for a period of 28 days as required by the Gateway Determination in **Attachment 4** and that a report be provided to Council on the outcomes of the public exhibition.
- Further, that** Council delegate authority to the Chief Executive Officer to correct any minor inconsistencies or anomalies of an administrative nature relating to the draft site-specific Development Control Plan and draft Planning Agreement documentation that may arise during the drafting and exhibition process.

TIMELINE

SITE DESCRIPTION

1. The site at 85-91 Thomas Street, Parramatta is subject to *Parramatta Local Environmental Plan (PLEP) 2011*. It includes four (4) properties on the southern side of Thomas Street with a total site area of 6,321sqm as shown in **Figure 1**. At the rear of No.87 Thomas Street, there is a land parcel known as 87A Thomas Street which is already publicly owned Crown land and available for public open space. The 4 lots which form the subject site each contain a single dwelling house, all of which are owned by Century 888 Pty Ltd (the landowner). The legal descriptions of the properties are listed below:

- Lot 13 DP 1239 known as No. 85 Thomas Street
- Lot 142 DP 537053 known as No. 87 Thomas Street
- Lot 15 DP 1239 known as No. 89 Thomas Street
- Lot 16 DP 1239 known as No. 91 Thomas Street

Figure 1: Subject site at 85-91 Thomas Street, Parramatta

PLANNING PROPOSAL MATTERS

2. In June 2016, the applicant lodged an initial Planning Proposal seeking to increase the maximum floor space ratio (FSR) and maximum height of buildings (HOB) control to accommodate approximately 164 dwellings. The planning controls applicable at the time permitted approximately 59 dwellings and was based on the FSR which applied to the entire site area.

3. Whilst Council was undertaking the initial assessment of the Planning Proposal, a Council-led amendment known as Parramatta LEP 2011 – Amendment No.20 came into force on 28 July 2017. This LEP amendment reduced the developability of the site and placed a land acquisition burden on Council as detailed below.
 - 1,296sqm of land at No.85 now zoned RE1 – Public Recreation and reserved for acquisition for local open space, and
 - 1,200sqm of land at Nos.89-91 currently zoned R4 now identified for natural resources biodiversity provisions (see **Figure 2**).

Figure 2: Mapping of undevelopable land introduced by PLEP 2011 – Amendment No.20

4. The Planning Proposal was subsequently revised and it sought to recoup the GFA lost as a result of Amendment No.20 and to redistribute it into a taller built form within the remaining 3,825sqm developable site area. This facilitates a 6-storey residential flat building development across 2 buildings comprising of approximately 59 dwellings and 61 vehicular parking spaces. The revised Planning Proposal was reported to Council on 9 June 2020. At this meeting Council endorsed the Planning Proposal for submission to the Department of Planning, Industry and Environment (DPIE) for Gateway determination. Details of the endorsed Planning Proposal are shown in **Table 1** below.

Table 1: Planning Proposal for 85-91 Thomas Street, Parramatta

Parramatta LEP 2011	LEP Controls for site prior to Amendment 20 Until 28 July 2017	Current LEP Controls Since 28 July 2017	Current Planning Proposal
Zoning	R4 – High Density Residential (6,321sqm)	Part R4 High Density Residential (5,025sqm),	R4 High Density Residential (3,825sqm – developable land),

		Part RE1 Public Recreation (1,296sqm)	RE1 Public Recreation (2,496sqm – land dedication area)
Maximum Building Height (HOB)	11 metres (3 storeys)	11 metres (3 storeys) (R4 land only)	22 metres (6 storeys) (R4 land only), No HOB control for existing and proposed RE1 land.
Maximum Floor Space Ratio (FSR)	0.8:1 (entire site area)	0.8:1 (R4 land only)	1.3:1 (R4 land only), No FSR control for existing and proposed RE1 land.
Maximum Gross Floor Area (GFA)	5,057sqm (based on the total site area)	4,020sqm (based on R4 High Density Residential only)	4,973sqm (based on developable site area)
FSR on Developable Portion 3,825sqm	1.32:1	1.05:1	1.3:1
Other Planning Controls	Foreshore Building Line, Acid Sulfate Soils, Heritage	Foreshore Building Line, Acid Sulfate Soils, Heritage, Land Reserved for Acquisition, Natural Resources – Biodiversity, Natural Resources – Riparian Lands and Waterways	
Maximum dwelling yield*	59 dwellings	47 dwellings	59 dwellings

* Dwelling Calculation = (Maximum GFA / 85sqm for high density dwellings)

5. On 18 August 2020, DPIE issued a Gateway Determination for the Planning Proposal, including conditions that must be completed prior to public exhibition. Council Officers have updated the Planning Proposal to reflect the Gateway Determination conditions for the purpose of public exhibition. A summary of the conditions and Council response is shown below in **Table 2**.

Table 2: Summary of Gateway Determination and Conditions for public exhibition purposes

DPIE Gateway Determination (Attachment 3)	Council Response in Updated PP (Attachment 4)
Condition 1a. Update the explanation of provisions to outline the intended outcomes regarding the proposed changes to the minimum lot sizes	Part 2 of the PP has been updated to explain that the minimum lot size map will be amended and apply to the proposed 3,825sqm of R4 land only, and be removed from the proposed RE1 land
Condition 1b. Outline a suitable mechanism to ensure that land to be zoned RE1 Public Recreation has an appropriate acquiring authority identified. This may be by way of a planning agreement finalised prior to the making of the LEP; and	Part 2.1 of the PP is updated to reflect the Planning Agreement Offer of 2,496sqm of land dedication. This land will be dedicated to council at nil cost. The legal drafting will specify that execution and registration on title occurs prior to making of LEP amendment. The land dedication can occur prior to issue of Construction Certificate as required by DA conditions.
Condition 1c. Update Part 4.2 to ensure text identifies the intent of the proposal	Part 4.2 of the PP is updated to state there will be no net increase in GFA compared to PLEP 2011 as applied to the site prior to Amendment No.20 before 28 July 2017. The proposal redistributes residential GFA lost under Amendment 20 into a taller building form with an increased FSR to reflect the reduced developable area. There will also be

	dedication of Natural Resources - Biodiversity and RE1 zoned LRA land.
--	--

6. There are no changes to the proposed dwelling yield, or relevant built form controls such as height, as a result of the Gateway Determination conditions.

DRAFT DEVELOPMENT CONTROL PLAN

7. When Council endorsed the Planning Proposal for a Gateway Determination in June 2020, Council also resolved that a site-specific Development Control Plan (DCP) be prepared and reported to Council prior to public exhibition. This resolution ensures that the detailed urban design analysis on streetscape, floor space ratio, building height, building separation and setbacks, deep soil, overshadowing and privacy is incorporated into the draft planning controls for this site.
8. There are existing precinct-based DCP controls for the subject site in Part 4.1.9 – Morton Street Precinct in Parramatta Development Control Plan 2011 (PDCP 2011). The Morton Street DCP was adopted by Council on 27 August 2007 and currently applies the Area 3 – Morton Street East (refer to **Figure 3** below) controls to future development on the subject site.
9. Council officers recommend incorporating site-specific DCP controls as part of a draft amendment to the Morton Street section of DCP 2011 as shown in **Attachment 1**. The draft amendment proposes to include a new “Area 5 – 85-91 Thomas Street” as shown in **Figure 3** below. This section will include specific controls in relation to:
- Building height and massing
 - Streetscape, building setbacks and separation
 - Deep soil, landscaping and future open space
 - Ecology and river foreshore

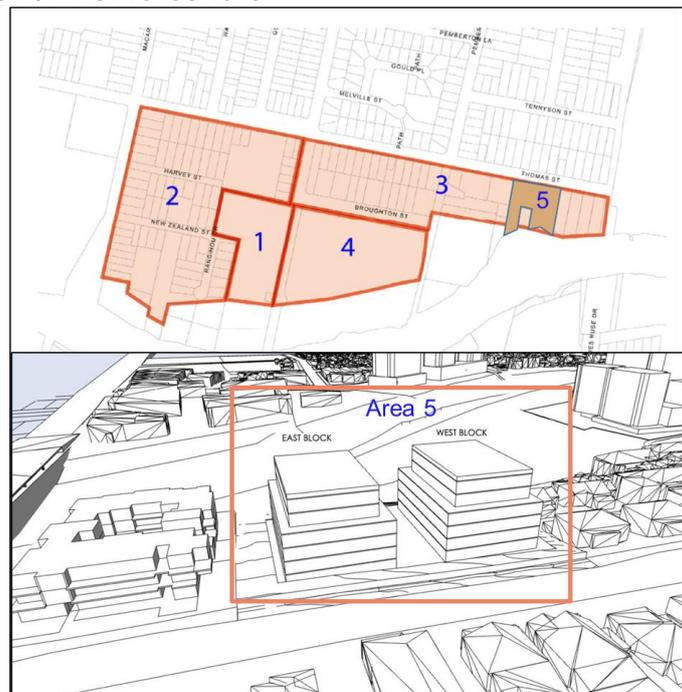

Figure 3: Map of Morton Street Precinct DCP and Indicative Building Envelope for Area 5

10. The indicative building envelope shown in **Figure 3** illustrates the endorsed Planning Proposal and will facilitate two 6-storey residential flat buildings equal

to approximately 59 apartment dwellings, which is an equivalent density to what the planning controls could allow on the site prior to Amendment 20.

11. It is considered that the building envelopes appropriately distribute the residential floorspace generated from the undevelopable land in a sensitive manner. Building footprints have been reduced with additional height resulting in greater setbacks and separation distances in improve built form transition to neighbouring development.
12. Following Council endorsement of the Planning Proposal’s associated reference design in June 2020 only minor changes to the building envelope have been made. Minor adjustments were made to require upper level setbacks to improve amenity, as well as greater provision for deep soil planting within the side boundaries by ensuring that basement car parking does not encroach into this area. **Figures 4 & 5** show the indicative building envelope in plan and elevation view.

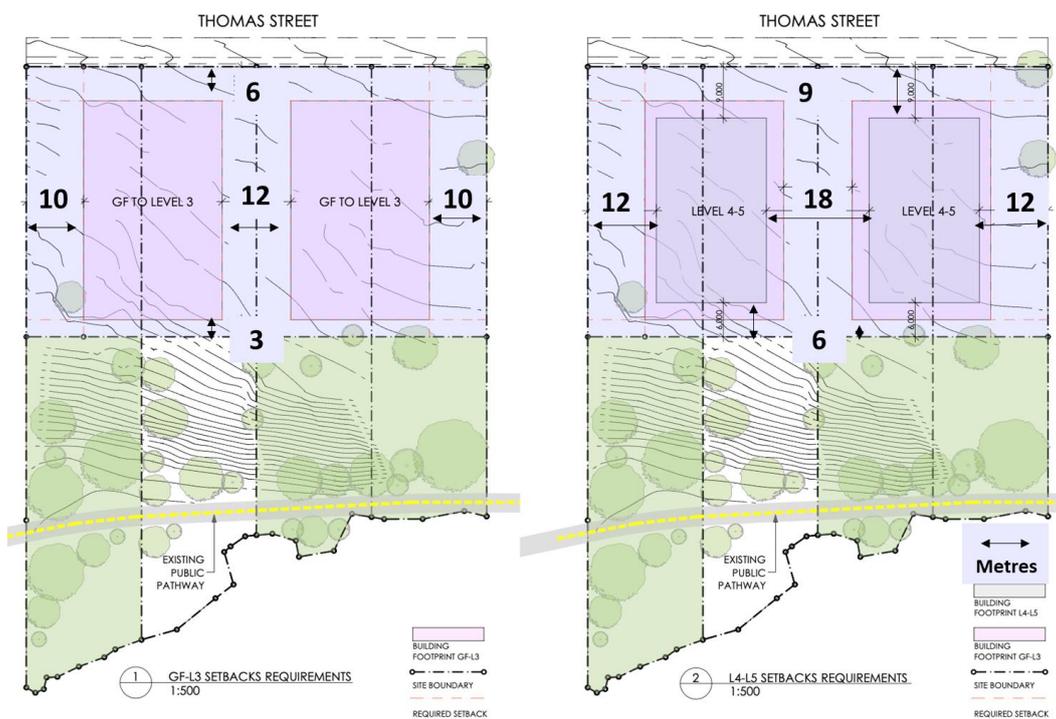

Figure 4: Plan view of setback and separation controls in Area 5, Morton Street DCP

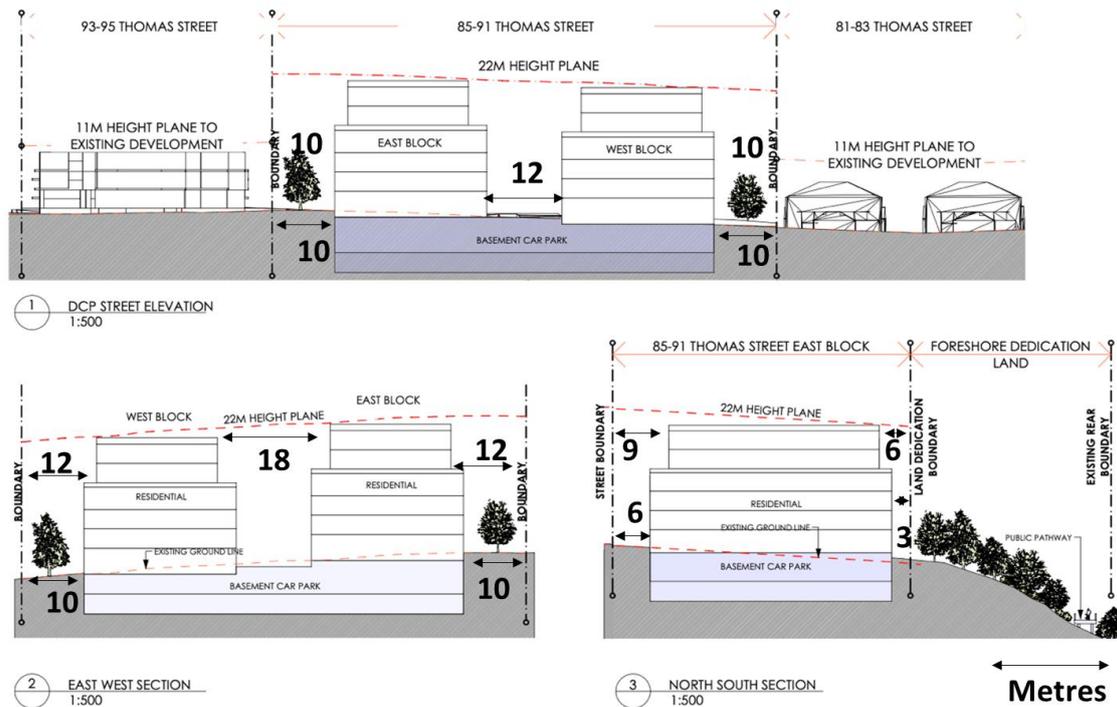

Figure 5: Elevation view of setback and separation controls in Area 5, Morton Street DCP

13. The setback and separation distances shown in Figure 4.1.9.3(a), Figure 4.1.9.15 and Figure 4.1.9.16 of **Attachment 1** in the draft DCP exceed the minimum requirements of the Apartment Design Guide and Parramatta DCP 2011. The draft DCP also contains controls that require basement carparking access to be located within the building envelope. These site-specific provisions aim to provide a landscaped setting that minimises overshadowing and provides greater privacy to adjoining properties.
14. Saltmarshes and wetlands are located in close proximity to the site and are protected by the LEP controls relating to the Foreshore Building Line, Natural Resources – Biodiversity and local heritage listing of Parramatta River (Wetlands). To further protect these ecological areas, the draft DCP includes ecology and foreshore controls so stormwater run-off, overshadowing and lighting causes minimal disturbance to local flora and fauna within the nearby riparian corridor along the river.
15. The draft site-specific DCP has been prepared in accordance with the urban design, traffic and open space advice provided to date. Council officers are satisfied that the site-specific controls in the Draft Amendment to Morton Street DCP for “Area 5 – 85-91 Thomas Street” will ensure that the increase in HOB and FSR facilitated by the Planning Proposal can be properly managed and future development appropriately considers its surrounding context.

DRAFT PLANNING AGREEMENT

16. The applicant submitted a Letter of Offer to enter into a Planning Agreement with Council on 8 March 2021 in support of the Planning Proposal for the site. Together, they inform the changes to planning controls to enable a residential flat building on the developable site area (3,825sqm) and land dedication for the remaining undevelopable site area (2,496sqm). The scenario regarding the land dedication through a Planning Agreement was flagged with Council on 9 June 2020 and was endorsed by Council at this meeting. The submitted Letter

of Offer (included in **Attachment 2**) is consistent with this Resolution of Council.

Letter of Offer

17. The Draft Planning Agreement Offer includes 2,496sqm (approximately 0.25 hectares) of open space and ecologically sensitive land dedicated to Council at nil cost (see Figure 6). This allows Council to make the river foreshore land publicly accessible via a low acquisition cost pathway and offer better protection of the biodiversity land. The proposed land dedication reflects the intended use of the site by clearly delineating the developable portion of the site from the portion of the site that is currently zoned open space or has been identified as having ecological value. The land dedication is provided on the basis that there is no decrease in GFA compared to the planning controls in place when the Planning Proposal was lodged on 6 June 2016. The land dedication is mapped in the PLEP 2011 and comprises of two parts:
 - i. 1,296sqm of land at No.85 now zoned RE1 – Public Recreation and shown as land reserved for acquisition for local open space, and
 - ii. 1,200sqm of land at Nos.89-91 currently zoned R4 now identified for natural resources - biodiversity provisions

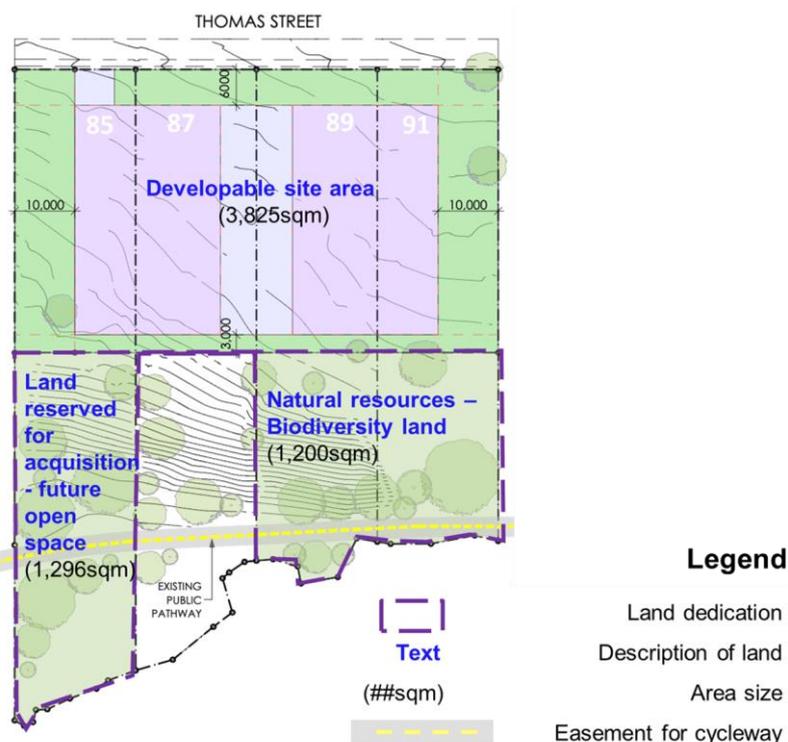

Figure 6: Description of 2,496sqm of land dedication in Draft Planning Agreement

18. The Draft Planning Agreement Offer also provides Council with the mechanism to acquire land identified for future open space (which is currently zoned RE1 but is unfunded) and biodiversity at nil financial cost.
19. The development potential of the land to be dedicated under the planning controls in place prior to Amendment 20 is being extracted and redistributed onto the developable site area as part of the Planning Proposal. The land dedication offer has not changed since Council endorsed the Planning Proposal and Planning Agreement Offer on 9 June 2020.

20. A land value uplift assessment has not been undertaken as the planning proposal is only seeking to recoup the residential density potential which may have been able to be achieved under the planning controls in place on the site when the Planning Proposal was lodged. The Draft Planning Agreement Offer moves away from a value capture approach and towards an infrastructure needs approach as required by the Planning Agreements Practice Note (DPIE, February 2021). Council's City Planning and Property Development Group are satisfied that the Draft Planning Agreement does not require a land value uplift assessment given the nominal uplift being sought by the Planning Proposal and that the undevelopable land is being dedicated at no cost.
21. Under Council's Planning Agreements Policy, planning proposals outside the CBD seeking uplift in density need to be supported by a planning agreement that is valued at 50% of the resulting land value uplift. At the 9 June 2020 Council Meeting, Council endorsed the officer recommendation which varies the planning agreements policy in this instance and set the parameters for negotiating this land dedication offer. The draft Letter of Offer is consistent with Council's previous resolution and it is therefore recommended that the draft Planning Agreement be exhibited with the draft Planning Proposal and draft DCP.
22. The Planning Agreement should be executed and registered on the land title prior to finalisation of the Planning Proposal post-exhibition.

CURRENT DEVELOPMENT APPLICATION

23. On 19 April 2021, the applicant lodged a Development Application which proposes demolition of existing structures (4 dwelling houses), tree removal and construction of two x 7 storey boarding house buildings consisting of 237 boarding rooms with 118 basement parking spaces and land dedication at the rear (DA/312/2021). The application was recently publicly exhibited from 28 April 2021 to 26 May 2021.
24. Boarding houses are a permissible use within the R4 – High Density Residential zone area under the current and proposed planning controls for the site. Boarding house developments must also satisfy other more detailed controls such as State Environmental Planning Policy (Affordable Rental Housing) 2009 and Parramatta DCP 2011 (Part 2, Part 3, Part 5.1 for Boarding Houses).
25. The DA is being considered as part of a separate assessment process which is currently underway in accordance with the currently applicable planning controls. The updated Planning Proposal, Draft DCP and Planning Agreement will become matters for consideration for any subsequent DAs that are submitted after the Planning Proposal and DCP have been placed on public exhibition.

CONSULTATION & TIMING

26. Pending Council's resolution on this matter, the Planning Proposal, draft DCP and draft Planning Agreement will be publicly exhibited with the Planning Proposal. The exhibition will be conducted in accordance with the Gateway determination and the requirements of the *Environmental Planning and*

Assessment Act 1979. The outcome of the public exhibition will then be reported to Council.

Stakeholder Consultation

27. The following stakeholder consultation has been undertaken in relation to this matter:

Date	Stakeholder	Stakeholder Comment	Council Officer Response	Responsibility
28 September 2020 / 6 October 2020	City Design	Review of initial Draft DCP	Include description and objectives for new "Area 5" section on the subject site within Part 4.1.9 – Morton Street Precinct. Figures and controls must be amended.	City Planning/ City Design
29 September 2020 / 5 March 2021	Natural Resources & Open Space	Include Ecology & River Foreshore controls. Estimate maintenance costs of the proposed land dedication also provided.	Applicant to include Ecology & River Foreshore controls so no significant impact from lighting, stormwater run-off or overshadowing impacts the nearby saltmarsh and mangrove communities.	City Planning
24 March 2021 / 29 March 2021	Property Development Group	No objections raised to the items in the VPA offer. A value uplift assessment is not required in this instance due to impacts of PLEP – Amendment No.20 on developability.	PLEP 2011 – Amendment 20 identifies 2,496sqm as open space and ecologically sensitive land. Dedicating 1,296sqm land at No.85 extinguishes Council's acquisition burden for local open space. Dedicating 1,200sqm land at No.89 & 91 provides the public protection of environmentally sensitive biodiversity land.	City Planning/ Property Development Group
20 April 2021/ 5 May 2021	Development Assessment	Status of DA/312/2021 for a 7-storey boarding house under current controls	DA scheme varies from the Planning Proposal scheme in relation to density, parking, setback and separation distances. Boarding houses are permitted in the	City Planning

			zone. The DA will be assessed as part of a separate assessment process which is currently underway.	
13 May 2021	Finance	The monetary and CAPEX contributions are not included in the current adopted four-year budget and if resolved, will be included within the budget process or as part of quarterly review.	The transfer of the land assets will remove Council's obligation under the existing zoning regime to acquire the asset (estimated fair value of \$1.3m in April 2020). Maintenance of the land assets is not included in the current adopted budget and is estimated at about \$5,000 per year which is immaterial compared to revenue to be generated by redevelopment under the proposed planning controls.	City Planning/ Finance

Councillor Consultation

28. The following Councillor consultation has been undertaken in relation to this matter:

Date	Councillor Comment	Council Officer Response	Responsibility
9 June 2020	Council endorsed the Planning Proposal to request a Gateway Determination and that a site-specific DCP be prepared and VPA be negotiated in accordance with the 2,496sqm of land dedication proposed.	The Planning Proposal has not changed following Gateway Determination however minor refinements to the reference scheme has been made as part of preparing the Draft DCP. The DCP & VPA have been prepared and negotiated in accordance with the resolution.	City Planning

LEGAL IMPLICATIONS FOR COUNCIL

29. The Gateway Determination at **Attachment 4** requires Council to exhibit the Planning Proposal, Draft DCP and Draft Planning Agreement for a minimum of 28 days.

30. The drafting of the Planning Agreement will be by both parties in accordance with the recommendation of this report. The costs associated with the drafting of the Planning Agreement and explanatory note will be at the cost of the applicant which is in accordance with Council's Planning Agreements Policy.

FINANCIAL IMPLICATIONS FOR COUNCIL

31. The proposed Planning Agreement negotiated will involve the applicant dedicating 2,496sqm of land at nil cost to Council. A portion of this land is already subject to an unencumbered public access easement for the Parramatta Valley Cycleway. The costs and maintenance of this cycleway are already accounted for by the operational budget of Council.
32. The land dedication comprises of 1,296sqm identified for local acquisition and 1,200sqm for natural resources biodiversity. The transfer of these items in the planning agreement will remove Council's obligation under the existing zoning regime to acquire the asset (estimated fair value of \$1.3m in April 2020). Council's Property Development Group have advised that land dedication as part of the Draft Planning Agreement allows for the most cost-effective acquisition pathway to transfer this asset into Council ownership. This land will be in addition to the Section 7.11 and 7.12 contributions payable at the time the development proceeds.
33. Maintenance of the 0.25 hectares of land dedication is estimated at about \$5,000 per year. This maintenance cost is not included in the current adopted budget. This amount is immaterial compared to revenue to be generated by redevelopment under the proposed planning controls. Council's Natural Resources & Assets Team have advised that transferring this asset into Council ownership as part of the Draft Planning Agreement offers better protection for future open space & biodiversity land along the river foreshore.
34. The financial impacts to the budget, as set out in this section, will be included in the next Quarterly Budget Review for endorsement by Council. The table below represents the estimated timing of the additional contribution to be received if Council resolves to approve this report.

	FY 20/21	FY 21/22	FY 22/23	FY 23/24
Operating Result				
Capital contribution (non-cash)		\$1,300,000		
External Costs				
Internal Costs		(\$5,000)	(\$5,000)	(\$5,000)
Depreciation				
Other				
Total Operating Result		\$1,295,000	(\$5,000)	(\$5,000)
Funding Source		General Revenue	General Revenue	General Revenue
CAPEX				
CAPEX				
External				
Internal				
Other				
Total CAPEX		NIL	NIL	NIL
Funding Source				

35. The costs associated with the preparation, exhibition and finalisation of the Planning Proposal, draft DCP and draft Planning Agreement are internal resources and consultancy costs. The developer will reimburse any consultancy costs relating to the Planning Agreement, which will then result in nil cost to Council for this item.

CONCLUSION

36. It is recommended that Council endorse the Draft Development Control Plan and Draft Planning Agreement Offer for 85-91 Thomas Street, Parramatta and that the Chief Executive Officer be authorised to prepare the legal drafting in accordance with the Letter of Offer provided in **Attachment 2** on behalf of Council for the purpose of public exhibition.
37. If endorsed, the draft DCP and draft Planning Agreement will be publicly exhibited concurrently with the Planning Proposal for 85-91 Thomas Street, Parramatta for a minimum of 28 days. A further report will be prepared for Council on the outcome of the public exhibition period.

DRAFT AMENDMENTS TO THE PARRAMATTA DEVELOPMENT CONTROL PLAN 2011

Amendments shown in blue.

Section 4.1 Town and Neighbourhood Centres

4.1.9 Morton Street Precinct

4.1.9 Design Controls

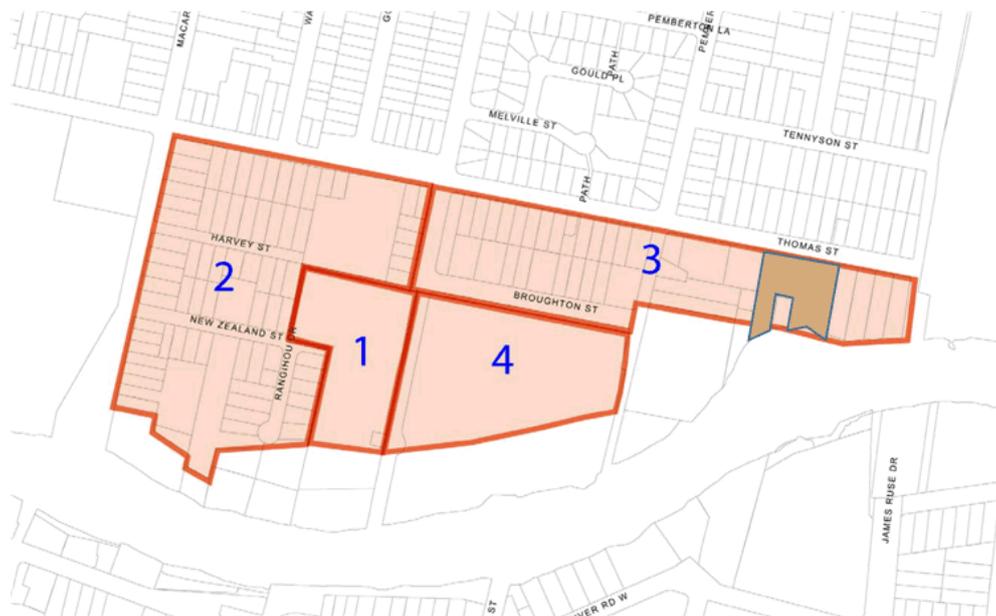

Area 1 – Riverfront

Area 2 - Morton Street – West

Area 3 - Morton Street – East

Area 4 - No. 2 Morton Street

Area 5 – 85-91 Thomas Street

Area 5 site specific controls provide for generous side setbacks to create separation to adjoining residential properties, and incorporates rear setbacks intended to create a landscape separation to the Parramatta River.

Indicative Building Envelopes

(insert) C.4 Development in Area 5 must be in accordance with the indicative building envelopes as shown in Figure 4.1.9.3(a). Development must provide an appropriate design

response to protect the amenity of adjoining residential sites and enable a rear landscape area that separates development on the site from the Parramatta River foreshore.

Building Form

(renumber C.5 and alter to state)

The built form controls correlate with the indicative building envelopes shown in Figure 4.1.9.3 and Figure 4.1.9.3(a). The design of buildings must comply with the relevant standards for each building type.

Update Figure 4.1.9.3 Indicative Building Envelopes on page 4.1-54 with a text box stating:

“Unique controls for 85-91 Thomas Street provided in Figure 4.1.9.3(a)”

Figure 4.1.9.3 Indicative Building Envelopes

Insert new Figure 4.1.9.3(a) Indicative Building Envelopes for Area 5

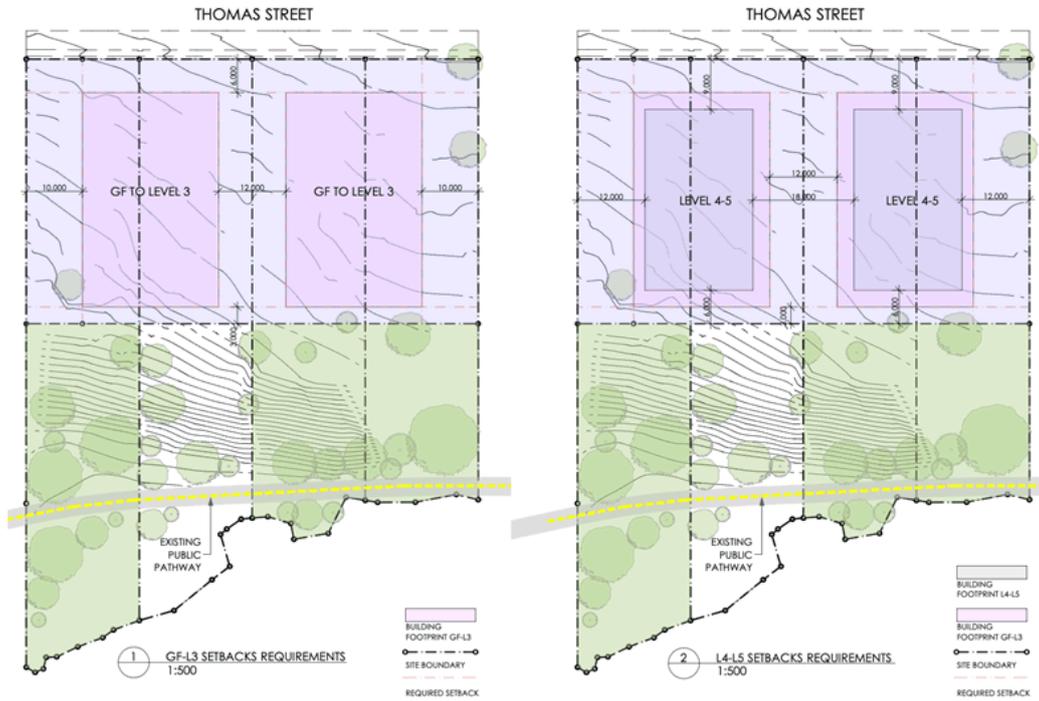

Figure 4.1.9.3(a) Area 5 Indicative Building Envelopes

Insert New Section

Urban Design in Area 5 (85-91 Thomas Street)

- C?? Buildings should provide a 4 storey base with a recessed upper 2 storeys, providing a maximum 6 storey form. Refer to figures 4.1.9.14 and 4.1.9.15.
- C?? Buildings should be designed to create streetscapes that are characterised by:
 - a. clearly defined edges, and
 - b. architectural treatments that are interesting and relate to the design and human scale of existing buildings.
- C?? Generous setbacks should be provided to ensure built form is in a landscaped setting.
- C?? Opportunities for views to Parramatta CBD and Parramatta River are to be realised in the design of new buildings.

- C.?? Buildings fronting the off-road pedestrian network are to be designed to provide for casual surveillance.
- C?? Buildings fronting the proposed public open space area along the riverfront are to be modulated to create interest as viewed from the river and foreshores.
- C.20 Where development is proposed that requires the management of flood impacts, the following urban design considerations apply:

Insert New Figures 4.1.9.14 and 4.1.9.15

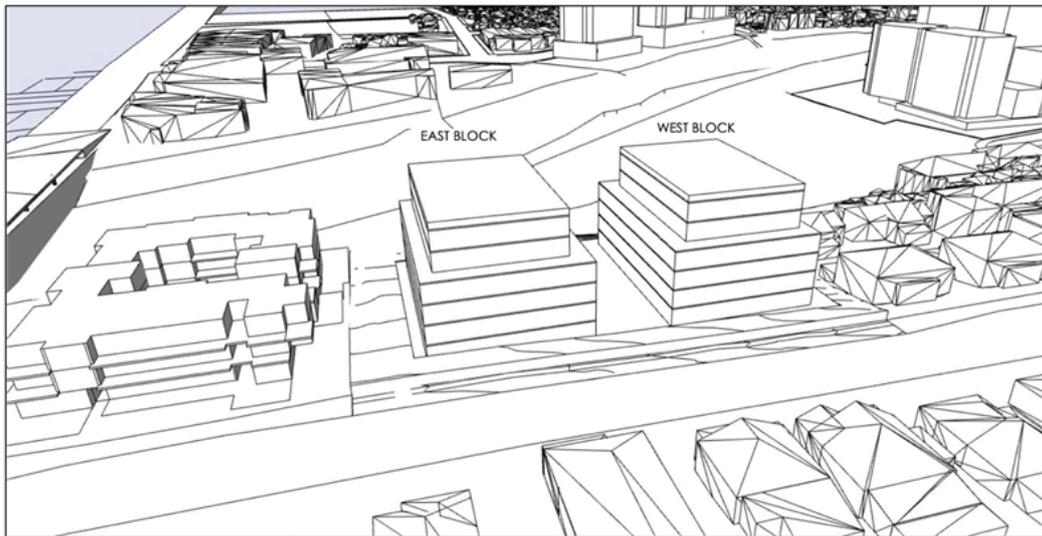

Figure 4.1.9.14 Area 5 Recessed Levels 5 & 6

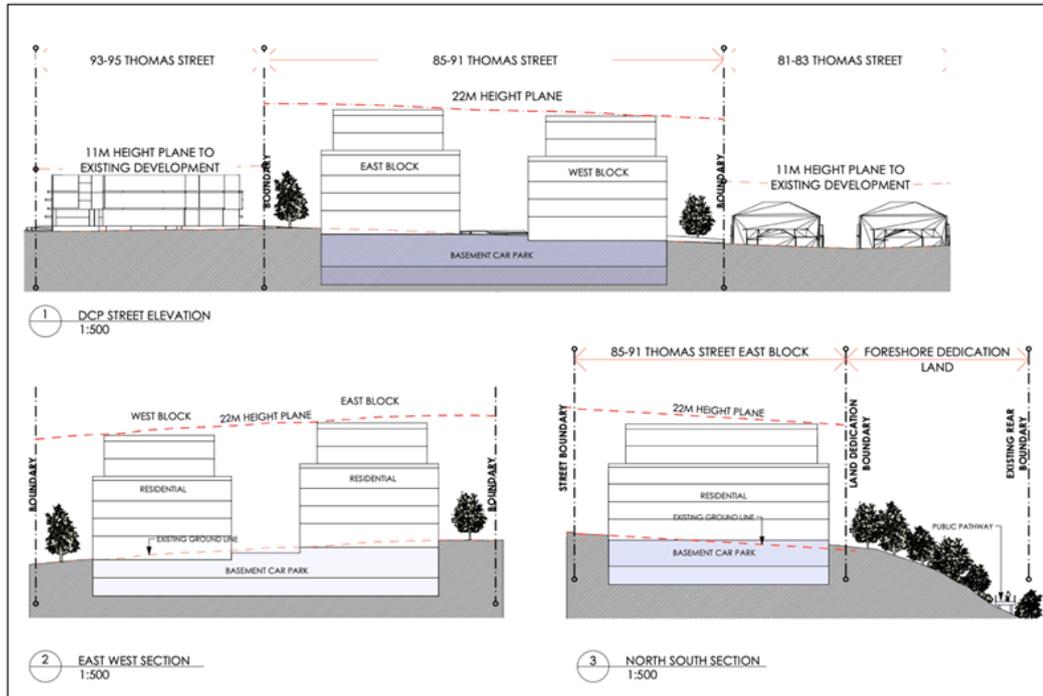

Figure 4.1.9.15 Sections

Insert New Section

Development within Area 5

- C.?? Entrances to buildings are to be clearly defined and well lit.
- C.?? Vehicular crossings are to be minimised to reduce disruption of pedestrian flow and safety.
- C.?? Deep soil zones along the front, side and rear boundaries should be provided to allow for a landscape setting. Refer to Figure 4.1.9.16.

Insert new figure 4.1.9.16

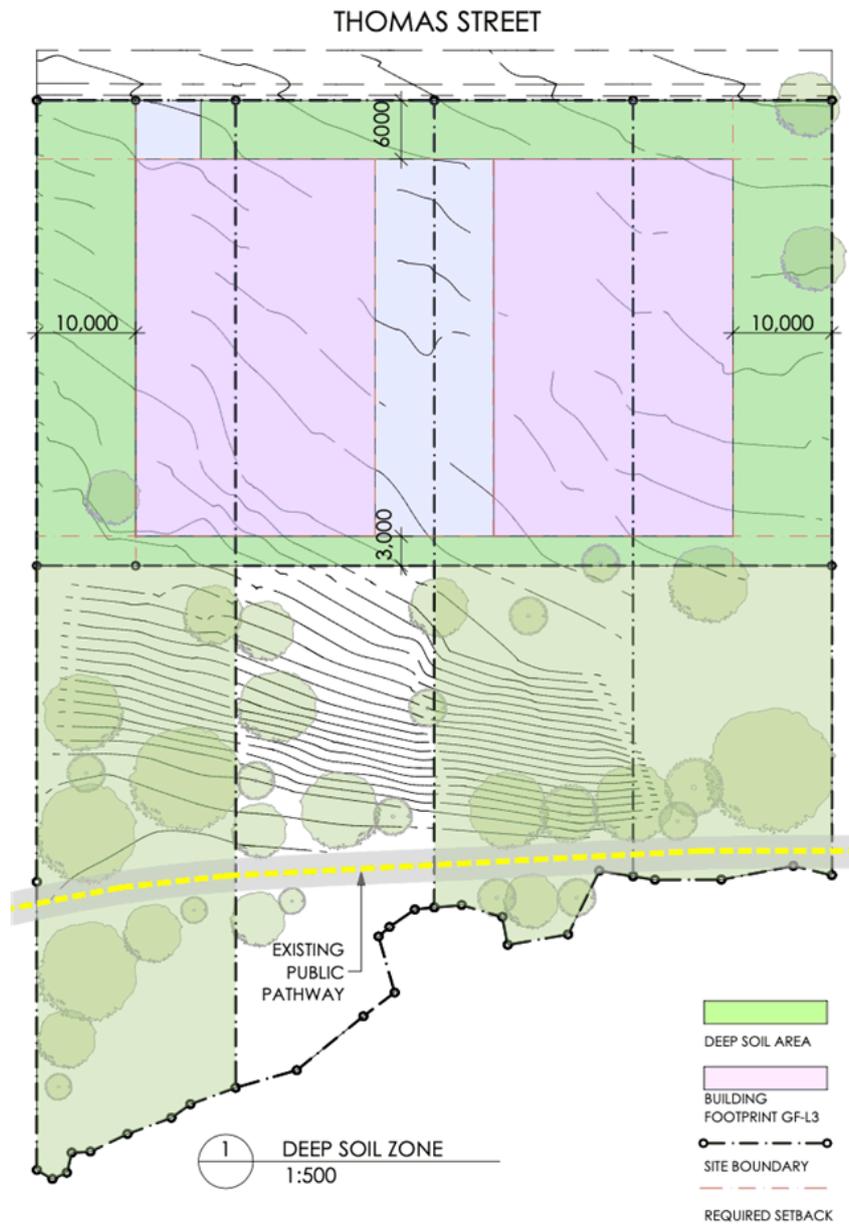

Figure 4.1.9.16 Area 5 Deep Soil Zone

Insert New Section within Area 5

Ecology and River Foreshore

C1 - Development is to demonstrate no significant impact to saltmarsh and mangrove ecological communities as a result of stormwater run-off or overshadowing

C2 - Lighting is to be designed to minimise light spill into the ecologically sensitive river riparian corridor to prevent disturbance to nocturnal fauna

8 March 2021

Chief Executive Officer
City of Parramatta Council
PO Box 32
Parramatta NSW 2124

Dear Sir/Madam

Planning Agreement Offer

Century 888 Pty Ltd offers to enter into a Planning Agreement with Council under section 7.4 of the *Environmental Planning and Assessment Act 1979* in connection with Planning Proposal 85-91 Thomas Street, Parramatta [RZ/11/2016].

Century 888 Pty Ltd accepts the terms as generally set out in the Council's Planning Agreement template and in the following table:

Item	Terms
Parties	City of Parramatta Council Century 888 Pty Ltd
Land	<ul style="list-style-type: none"> Lot 13 DP 1239 known as No. 85 Thomas Street Lot 142 DP 537053 known as No. 87 Thomas Street Lot 15 DP 1239 known as No. 89 Thomas Street Lot 16 DP 1239 known as No. 91 Thomas Street
Planning Proposal / Development Application	<p>RZ/11/2016 seeks to amend the Parramatta Local Environmental Plan 2011 in relation to the land by:</p> <ul style="list-style-type: none"> Maintaining the R4 – High Density Residential zone for the developable part of the site (3,825sqm) and extending the RE1 – Public Recreation zone for the undevelopable land affected by the Natural Resources - Biodiversity control, Increasing the maximum Building Height (HOB) control from 11 metres to 22 metres across the R4 zoned part of the site, and removing the HOB control from the undevelopable land, Increasing the Floor Space Ratio (FSR) control from 0.8:1 to 1.3:1 across the R4 zoned part of the site, and removing the FSR control from the undevelopable land, Removing No.85 Thomas Street from the Land Reserved for Acquisition Map, subject to agreement being reached regarding the Planning Agreement
Monetary Contribution	Nil
Works	Nil

NLS\NLS\67228044\1

Item	Terms
Dedication of Land	The 2496sqm of land to be dedicated to Council must be subdivided from any development lots prior to the issuing of a Construction Certificate for development on the site. The transaction of land dedication and subdivision will be made at nil cost to Council.
Other Public Benefits	Dedication of open space shown as part of Parramatta LEP 2011 – Amendment No.20
Application of section 7.11, 7.12 and 7.24	Remain application
Registration	The developer is required to register the Planning Agreement under the <i>Real Property Act 1900</i> at the developer's expense in accordance with section 7.6 of the Environmental Planning and Assessment Act 1979.
Dispute Resolution	The Council will require a planning agreement to provide for mediation of disputes between the parties to the agreement, at their own cost, before the parties may exercise any other legal rights in relation to the dispute in accordance with section 5.14 of Councils Planning Agreements Policy 2018.
Security	The dedication of the land can only occur once lots are created, as part of a development application process. The dedication of the land will be triggered as a condition of consent prior to the issue of a Construction Certificate and offset contributions as part of this development consent.
Restrictions on Issue of Certificates	Yes. The dedication of land will be triggered as a condition of consent prior to the issue of a Construction Certificate.
Other Terms	Nil
Costs	Century 888 Pty Ltd agrees to pay Council's reasonable costs of and incidental to the negotiation, preparation and entering into the agreement, as well as administration and enforcement of the planning agreement in accordance with the terms set out in the template planning agreement.

Yours faithfully

Century 888 Pty Ltd

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

INTRODUCTION

This Planning Proposal explains the intended effect of, and justification for, the proposed amendment to *Parramatta Local Environmental Plan 2011*. It has been prepared in accordance with Section 55 of the *Environmental Planning and Assessment Act 1979* and the Department of Planning and Environment (DP&E) guides, 'A Guide to Preparing Local Environment Plans' (August 2016) and 'A Guide to Preparing Planning Proposals' (August 2016) and 'Guidance for merged councils on planning functions' (May 2016).

Background and context

On 6 June 2016, Council received a Planning proposal application from Think Planners which sought to amend the planning controls applicable to the site at 85-91 Thomas Street, Parramatta under Parramatta Local Environmental Plan 2011 (PLEP 2011). The land at 85-91 Thomas Street includes 4 Torrens title land parcels that are shown below and legally described as follows:

- Lot 13 DP 1239, known as No. 85 Thomas Street
- Lot 142 DP 537053 known as No. 87 Thomas Street
- Lot 15 DP 1239 known as No. 89 Thomas Street
- Lot 16 DP 1239 known as No 91 Thomas Street

Figure 1 – Sites at 85-91 Thomas Street subject to the planning proposal

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Under *Parramatta Local Environmental Plan 2011* the site:

- is zoned part R4 – High Density Residential, part RE1 – Public Recreation
- has a minimum Lot Size of 550 sqm;
- has a maximum Building Height of 11 metres;
- has a maximum Floor Space Ratio (FSR) of 0.8:1;
- has a land acquisition for local open space applying to 1,296sqm of privately owned RE1 zoned land at No.85;
- 30m wide Foreshore Building Line
- Acid Sulfate Soils,
- Heritage,
- Land Reserved for Acquisition,
- Natural Resources – Biodiversity,
- Natural Resources – Riparian Lands and Waterways

An extract of each the above maps is provided in Part 4 – Mapping; specifically, Section 4.1 Existing controls.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

PART 1 – OBJECTIVES OR INTENDED OUTCOMES

The objective of this Planning Proposal is to adjust the land use zoning, building height and floor space ratio on the site at 85-91 Thomas Street to accommodate a residential flat building development within the developable portion of the site. In order to accommodate the gross floor area of 0.8:1 across the privately owned site, there will be an adjustment in land use zoning boundaries, increase in maximum building height and maximum floor space ratio for the proposed R4 land.

The owners of the subject site (Century 888 Pty Ltd) authorised ThinkPlanners to submit the original Planning Proposal in June 2016 to coordinate the matters relating to the subject site and this rezoning application.

The Planning Proposal intends to deliver the following outcomes for the site:

- Accommodate high-density residential development up to 4,973sqm outside the undevelopable portions of the site
- Locate the building envelope and mass the Gross Floor Area within the developable portion of the site,
- Accommodate similar amount of GFA on the site as permitted by the planning controls prior to *Parramatta LEP 2011 – Amendment No.20 Review*
- Dedicate land identified for acquisition, public open space and natural resources.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

PART 2 – EXPLANATION OF PROVISIONS

This planning proposal seeks to amend *Parramatta LEP 2011 (PLEP 2011)* in relation to the zoning and height controls.

In order to achieve the desired objectives the following amendments to the *PLEP 2011* would need to be made:

1. Amend the **Land Zoning Map** to maintain the R4 – High Density Residential zone for the developable part of the site (3,825sqm) and extending the RE1 – Public Recreation zone for the undevelopable land affected by the Natural Resources - Biodiversity controls. (Sheet LZN_[010]).
2. Amend the maximum building height in the **Height of Buildings Map** (Sheet HOB_010) from 11 metres to 22 metres that equates to 6 storeys for the proposed R4 land within the developable area of the site. Removing the Height of Buildings control for the proposed RE1 land.
3. Amend the maximum floor space ratio in the **Floor Space Ratio Map** (Sheet FSR_010) from 0.8:1 to 1.3:1 for the proposed R4 land within the developable area of the site. Removing the Floor Space Ratio control for the proposed RE1 land.
4. Amend the **Minimum Lot Size Map** (Sheet LSZ_010) to retain the existing minimum lot size of 550sqm for the proposed R4 zoned land and remove the Minimum Lot Size control for the 1,200sqm of undevelopable land at the rear affected by the proposed extension of the RE1 zone and existing Natural Resources – Biodiversity control.
5. Remove the land reserved for acquisition which applies to the 1,296sqm of land at the rear of No.85 Thomas should this land be dedicated to Council as part of an executed Planning Agreement

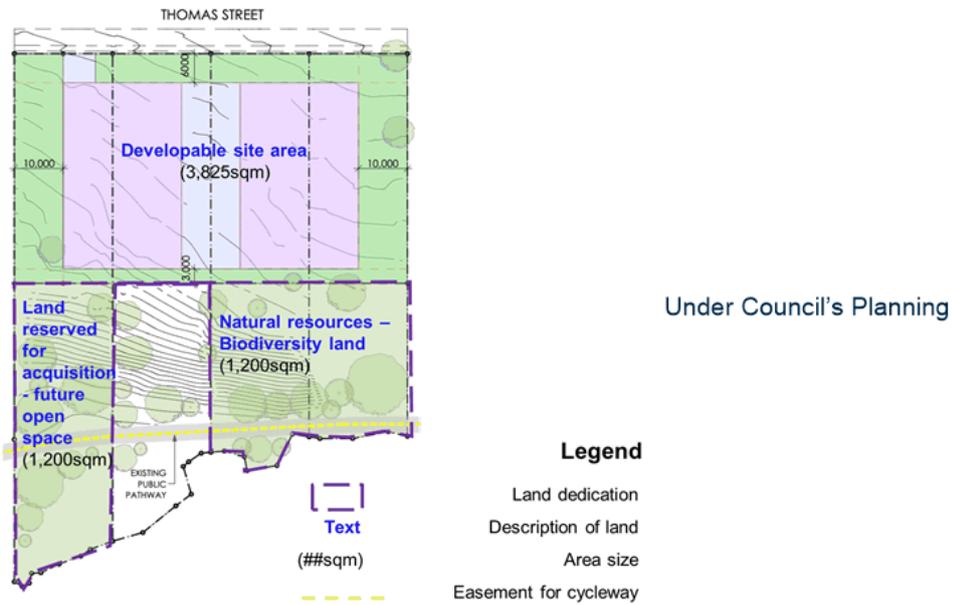

2.1. Other relevant matters

2.1.1. Voluntary Planning Agreement

The subject site and proposed development uplift being sought lends itself to the provision of public benefits, consistent with Council's Planning Agreements policy. The proponent expressed interest into entering a Voluntary Planning Agreement consistent with the policy. The applicant submitted an updated Letter of Offer on 8 March 2021 to reflect the detailed terms of the Planning Agreement and gateway assessment of the Planning Proposal. The applicant is currently proposing the following VPA item:

- Dedication of 2,496sqm of privately owned land to Council within the undevelopable part of the site at the south which comprises of:
- 1,296sqm of privately owned land zoned RE1 and identified for land acquisition for open space at No.85 Thomas Street,
- 1,200sqm of privately owned land identified under the Natural Resources – Biodiversity map and proposed for RE1 zoning as part of this Planning Proposal.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Under Council's Planning

Agreements Policy, planning proposals outside the Parramatta CBD seeking uplift in density need to be supported by a planning agreement that is valued at 50% of the resulting land value uplift. It is acknowledged that the gazettal of Amendment 20 reduced the development potential on the site and the planning proposal is only seeking to recoup the density potential it may have been able to achieve under the planning controls in place prior to this amendment. Based on an acceptance of this approach, it is not considered necessary to seek a planning agreement achieving 50% land value uplift, as there is effectively no increase in overall development potential of the site. It is also acknowledged that the site may not have been able to achieve the full density potential under the previous planning controls due to the constrained nature of the southern portion of the site, however the previous controls did allow development on this part of the site and the gazettal of Amendment 20 removed that potential.

In addition, the Planning Agreement is proposing to dedicate land that is identified for acquisition under PLEP 2011 free of cost, thereby removing an acquisition burden on Council. Without the Planning Proposal and associated Planning Agreement, Council would ultimately be required to purchase the land from the owner. The Planning Agreement is also proposing to dedicate the undevelopable portion of the R4 High Density Residential zoned land to Council free of cost. This land is intended to provide a contiguous vegetation buffer along the rear of the site with the adjacent RE1 Public Recreation land. It is therefore recommended that this portion of the R4 High Density Residential zoned be rezoned to RE1 Public Recreation to match the adjoining land and to properly reflect its intended use.

The proposed mechanism for the land dedication has been negotiated with the applicant, Councils Planners, Property and Operations teams. The VPA will be drafted so that execution of the agreement and registration on title occurs prior to making of the future LEP amendment. The land dedication can occur prior to issue of Construction Certificate as required by a DA conditions of consent. It is recommended that Council authorise the CEO to prepare the legal drafting of the agreement for the purposes of public exhibition..

2.1.2. Draft Development Control Plan

Given the nature of redevelopment proposed on the site, a site-specific Development Control Plan (DCP) will be required to support any future development on the site. The

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

site-specific DCP would amend the existing Part 4.1.9 of the Morton Street Precinct, Parramatta DCP 2011 to guide the redevelopment of the site through a new 'Area 5', which will have regard to the local context and detailed design requirement for the site.

This new section will be informed by new DCP controls in relation to:

- Building height and massing
- Streetscape, building setbacks and separation
- Deep soil, landscaping and future open space,
- Ecology and river foreshore

Both the draft Voluntary Planning Agreement and draft Development Control Plan will be exhibited concurrently as part of the public exhibition stage following Gateway Determination.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

PART 3 – JUSTIFICATION

This part describes the reasons for the proposed outcomes and development standards in the planning proposal.

3.1 Section A - Need for the planning proposal

This section establishes the need for a planning proposal in achieving the key outcome and objectives. The set questions address the strategic origins of the proposal and whether amending the LEP is the best mechanism to achieve the aims on the proposal.

3.1.1. Is the planning proposal a result of an endorsed local strategic planning statement, strategic study or report?

Yes, the Planning Proposal responds to the State Government’s initiatives for growth in the Greater Sydney Commission’s Greater Parramatta and Olympic Peninsula (GPOP) area and Department of Planning Industry and Environment’s (DPIE) draft Greater Parramatta Growth Area which is in close proximity to the site. The GPOP area is an approximate area which will broadly experience significant growth and change over the next 20 years (see Figure 2).

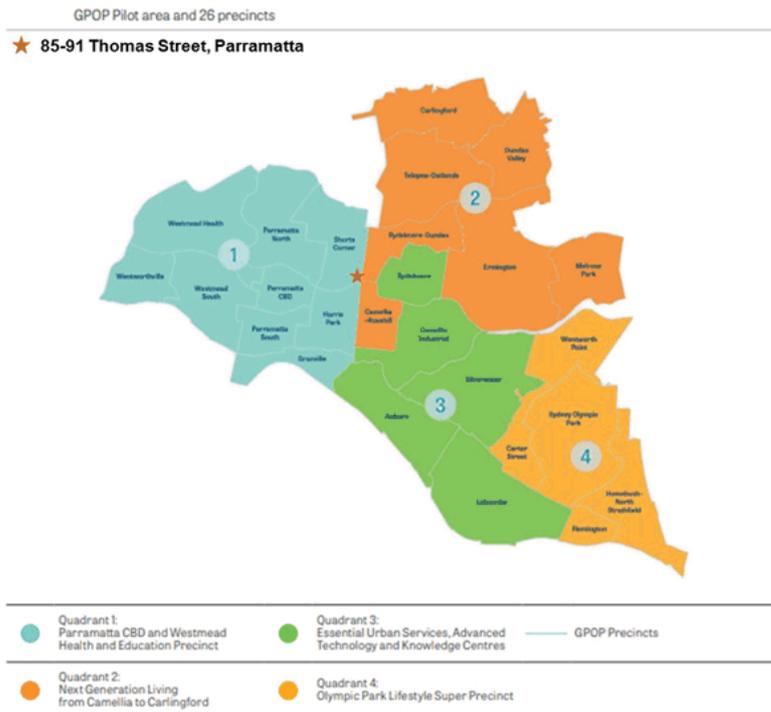

Figure 2– Subject site within GPOP

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

3.1.2. Is the Planning Proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

Redevelopment of the site for the site under the Planning Proposal reinstates the amount of permissible high-density floor space permitted on the site when the Planning Proposal was lodged in June 2016, and prior to *Parramatta LEP 2011 – Amendment No.20 Review of Land Reserved for Acquisition* which was gazette on 28 July 2017. This amendment rezoned R4 land at No.85 Thomas Street to RE1 – public recreation with a Land Acquisition affection for local open space. No.89 and No.91 were also affected by Amendment No.20 which identified 1,200sqm of R4 land for Natural Resources controls, making this portion of the site undevelopable, but able to be used for calculating FSR.

Figure 3 - Zoning of site prior to PLEP 2011 Amendment No.20

Prior to this amendment, 5,057sqm of GFA was permitted under 0.8:1 FSR across the site. The current planning controls allow a maximum of 4,020sqm of GFA is permitted. The Planning Proposal proposed changes in land use zoning boundaries to reflect the developable portions of the site, increase in maximum building height and increase maximum floor space ratio controls. These changes could accommodate approximately 4,973sqm of GFA across the developable site area, which is a lower GFA than what was permissible on the site when the PP was lodged. It also allows for the undevelopable portion of the site to be dedicated for public recreation and natural resources land.

The redevelopment would see 55-59 apartment dwellings accommodated on the site, which is equal to or lower than what was permissible on the site when the Planning proposal was lodged. A change in building height provides opportunities for the previously permissible floor space provision to be accommodated on the site.

3.2. Section B – Relationship to strategic planning framework

This section assesses the relevance of the Planning Proposal to the directions outlined in key strategic planning policy documents. Questions in this section consider state and local government plans including the NSW Government's Plan for Growing Sydney and subregional strategy, State Environmental Planning Policies, local strategic and community plans and applicable Ministerial Directions.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

3.2.1. Will the planning proposal give effect to the objectives and actions of the applicable regional, or district plan or strategy (including any exhibited draft plans or strategies)?

A Metropolis of Three Cities

In March 2018, the NSW Government released the *Greater Sydney Region Plan: A Metropolis of Three Cities* (“the GSRP”) a 20 year plan which outlines a three-city vision for metropolitan Sydney for to the year 2036.

The GSRP is structured under four themes: Infrastructure and Collaboration, Liveability, Productivity and Sustainability. Within these themes are 10 directions that each contain Potential Indicators and, generally, a suite of objective/s supported by a Strategy or Strategies. Those objectives and or strategies relevant to this planning proposal are discussed below.

Infrastructure and Collaboration

An assessment of the planning proposal’s consistency with the GSRP’s relevant Infrastructure and Collaboration objectives is provided in Table 3a, below.

Table 3a – Consistency of planning proposal with relevant GSRP Actions – Infrastructure and Collaboration

Infrastructure and Collaboration Direction	Relevant Objective	Comment
A city supported by infrastructure	O1: Infrastructure supports the three cities	The Region Plan highlights that the Central River City is undergoing a rebuilding program in a high-growth environment, which required existing infrastructure to be optimised. Redevelopment of the existing R4 zoned site in close proximity to James Ruse Drive and Parramatta Valley Cycleway to accommodate a maximum of 6-storey development hopes to maximise the 4,973sqm GFA, which is slightly below the GFA previously permissible on the site prior to PLEP 2011 – Amendment No.20 when the Planning Proposal was lodged. A VPA will also be negotiated aside this Planning Proposal once the strategic parameters and planning controls have been set.
	O2: Infrastructure aligns with forecast growth – growth infrastructure compact	
	O3: Infrastructure adapts to meet future need	
	O4: Infrastructure use is optimised	

Liveability

An assessment of the planning proposal’s consistency with the GSRP’s relevant Liveability objectives is provided in Table 3b, below.

Table 3b – Consistency of planning proposal with relevant GSRP Actions – Liveability

Liveability Direction	Relevant Objective	Comment
A city for people	O6: Services and infrastructure meet communities’ changing needs	The Planning Proposal hopes to optimise land identified for future public open space and existing natural resources (biodiversity & riparian lands and waterways). The
	O7: Communities are healthy, resilient and socially connected	

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

	<p>O8: Greater Sydney's communities are culturally rich with diverse neighbourhoods</p>	<p>PP allocates GFA under a change to zone boundaries for high-density and public recreation land use zones to reflect the developable site area, and increases to maximum HOB and FSR controls to accommodate 4,972sqm, which is slightly below the GFA which could be accommodated on the site when the PP was lodged, prior to PLEP 2011 – Amendment No.20.</p>
	<p>O9: Greater Sydney celebrates the arts and supports creative industries and innovation</p>	
<p>Housing the city</p>	<p>O10: Greater housing supply</p>	<p>The subject site is situated outside Council's already identified growth precincts and currently zoned high-density residential . The PP proposes to accommodate 59 apartment dwellings under an increase in height up to 22m and increase in FSR across the developable portion up to 1.3:1. The PP also removes HOB, FSR and LRA controls for the area identified for land dedication. The reference design accommodates 4,973sqm of high-density residential GFA, which is below what could have been achieved when the PP was lodged.</p>
	<p>O11: Housing is more diverse and affordable</p>	<p>Given the site is already zoned R4 – High Density Residential where residential flat buildings are already permitted, and that the Planning Proposal is not seeking a significant uplift over and above what the site could previously achieve, the Planning Proposal is considered to be consistent with this objective and Council's LSPS in this instance.</p> <p>It is anticipated that City of Parramatta is expected to meet and potentially exceed its housing targets set by the Greater Sydney Commission, thus the change in planning controls must be justified in accordance with other Liveability Directions.</p>
<p>A city of great places</p>	<p>O12: Great places that bring people together</p>	<p>The site is situated in close proximity to the Parramatta River, Western Sydney University and the periphery of Parramatta CBD which provide opportunities to future residents for employment, education and recreation.</p>
	<p>O13: Environmental heritage is identified, conserved and enhanced</p>	<p>Parts of the site are identified for natural resources-biodiversity, natural resources – riparian lands and waterways and environmental heritage I1- Wetlands Parramatta River. Future development on the site will be located away from these sensitive environmental areas.</p>

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Productivity

An assessment of the planning proposal's consistency with the GSRP's relevant Productivity objectives is provided in Table 3c, below.

Table 3c – Consistency of planning proposal with relevant GSRP Actions – Productivity

Productivity Direction	Relevant Objective	Comment
A well connected city	O14: The plan integrates land use and transport creates walkable and 30 minute cities	The site is located in close proximity to James Ruse Drive, Parramatta Valley Cycleway which connect to Parramatta CBD nearby. The increase in building height to accommodate high-density residential dwellings supports integrating land use with walkable 30min cities to the Central River City of Parramatta.
	O15: The Eastern, GOP and Western Economic Corridors are better connected and more competitive	The subject site is located within the Shorts Corner precinct of GOP. This precinct is not identified for growth as part of Phase 1 or Phase 2 of the Place-based Infrastructure Compact. The PP does not see an increase in residential GFA above what was previously permitted on the site at lodgement of the PP.
Jobs and skills for the city	O19: Greater Parramatta is stronger and better connected	This Planning Proposal is generally consistent with the vision under O19 of the region plan. An increase in building height allows for the GFA previously available under the zoning prior to 28 July 2017 to be massed within a 6-storey built form.
	O21: Internationally competitive health, education, research and innovation precincts	The Planning Proposal does not seek to allow for employment floor space. The application adjusts the area boundaries affected by R4 – High Density Residential and RE1 – Public Recreation to reflect the developable areas of the site and land dedication.
	O22: Investment and business activity in centres	
	O23: Industrial and urban services land is planned, retained and managed	
O24: Economic sectors are targeted for success		

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Sustainability

An assessment of the planning proposal's consistency with the GSRP's relevant Sustainability objectives is provided in Table 3d, below.

Table 3d – Consistency of planning proposal with relevant GSRP Actions – Sustainability

Sustainability Direction	Relevant Objective	Comment	
A city in its landscape	O25: The coast and waterways are protected and healthier	<p>The subject site included planning affections from Natural Resources – Riparian Lands and Waterways & Biodiversity and the Foreshore Building Line along the southern portion of the site. The reference design locates the future building envelope outside the affected areas on the elevated topography at the north of the site. The southern portion of the site would be rezoned RE1 and dedicated to Council.</p> <p>Concerns were raised in the initial assessment regarding the coastal mangroves and saltmarshes. Department of Primary Industries indicated in November 2017 that <i>“does not see any reason for potential shading issues on mangrove and saltmarsh species to prevent the lodgement of this development, as proposed”</i></p>	
	O27: Biodiversity is protected, urban bushland and remnant vegetation is enhanced		
	O28: Scenic and cultural landscapes are protected		The proposal is situated in close proximity to Parramatta River. A substantial setback is proposed for future development that locates the building out of the Foreshore Building Line, Natural Resources affectation and heritage area.
	O29: Environmental, social and economic values in rural areas are protected and enhanced		N/A
	O30: Urban tree canopy cover is increased		Deep soil areas are proposed for the front and side setbacks. A site specific DCP proposed to accommodate urban tree canopy cover on the site to enhance the streetscape and improve privacy between neighbouring properties.
	O31: Public open space is accessible, protected and enhanced		The subject site includes an acquisition for local open space on No.85 Thomas Street. The subject site is also subject to an easement for the Parramatta Valley Cycleway along the southern edge of the site.
	O32: The Green grid links Parks, open spaces, bushland and walking and cycling paths		The subject site already includes elements of the green grid along the southern portion of the site within the natural resourced affected land where the Parramatta Valley cycleway is located.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

An efficient city	O33: A low-carbon city contributes to net-zero emissions by 2050 and mitigates climate change	The proposal does not include sustainability initiatives such as recycled water, sustainable building materials, photovoltaics. Should the proposal proceed, initiatives towards net-zero emission by 2050, methods of recycling construction and ongoing waste should be investigated as part of the Development Application stage. Further consideration should be given to council's environmental sustainability strategy when delivering the proposal.
	O34: Energy and water flows are captured, used and re-used	
	O35: More waste is re-used and recycled to support the development of a circular economy	
A resilient city	O36: People and places adapt to climate change and future shocks and stresses	The proposal does include some flood affected land. However, the proposed building is located away from the land impacted by natural hazards.
	O37: Exposure to natural and urban hazards is reduced	
	O38: Heatwaves and extreme heat are managed	

Implementation

An assessment of the planning proposal’s consistency with the GSRP’s relevant Implementation objectives is provided in Table 3d, below.

Table 3d – Consistency of planning proposal with relevant GSRP Actions – Implementation

Implementation Direction	Relevant Objective	Comment
Implementation	O39: A collaborative approach to city planning	The proposal is responding to in depth consultation between Council, the applicant and Department of Primary Industries.

Central City District Plan

In March 2018, the NSW Government released *Central City District Plan* which outlines a 20 year plan for the Central City District which comprises The Hills, Blacktown, Cumberland and Parramatta local government areas.

Taking its lead from the GSRP, the *Central City District Plan* (“CCDP”) is also structured under four themes relating to Infrastructure and Collaboration, Liveability, Productivity and Sustainability. Within these themes are Planning Priorities that are each supported by corresponding Actions. Those Planning Priorities and Actions relevant to this planning proposal are discussed below.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Infrastructure and Collaboration

An assessment of the planning proposal’s consistency with the CCDP’s relevant Infrastructure and Collaboration Priorities and Actions is provided in Table 4a, below.

Table 4a – Consistency of planning proposal with relevant CCDP Actions – Infrastructure and Collaboration

Infrastructure and Collaboration Direction	Planning Priority/Action	Comment
<p>A city supported by infrastructure</p> <p>O1: Infrastructure supports the three cities</p> <p>O2: Infrastructure aligns with forecast growth – growth infrastructure compact</p> <p>O3: Infrastructure adapts to meet future need</p> <p>O4: Infrastructure use is optimised</p>	<p>PP C1: Planning for a city supported by infrastructure</p> <ul style="list-style-type: none"> • A1: Prioritise infrastructure investments to support the vision of <i>A metropolis</i> • A2: Sequence growth across the three cities to promote north-south and east-west connections • A3: Align forecast growth with infrastructure • A4: Sequence infrastructure provision using a place based approach • A5: Consider the adaptability of infrastructure and its potential shared use when preparing infrastructure strategies and plans • A6: Maximise the utility of existing infrastructure assets and consider strategies to influence behaviour changes to reduce the demand for new infrastructure, supporting the development of adaptive and flexible regulations to allow decentralised utilities 	<p>The site located on Thomas Street is in close proximity to the James Ruse Drive regional route and Parramatta Valley Cycleway. The site may be easily accessed via car, bus or bicycle. The proposal arranges the currently permissible high-density residential use within the northern half of the subject site in hope to utilise the existing assets at the south for natural resources and public open space.</p>
<p>O5: Benefits of growth realized by collaboration of governments, community and business</p>	<p>PP C2: Working through collaboration</p> <ul style="list-style-type: none"> • A7: Identify prioritise and delivery collaboration areas 	

Liveability

An assessment of the planning proposal’s consistency with the CCDP’s relevant Liveability Priorities and Actions is provided in Table 4b, below.

Table 4b – Consistency of planning proposal with relevant CCDP Actions – Liveability

Liveability Direction	Planning Priority/Action	Comment
-----------------------	--------------------------	---------

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

<p>A city for people O6: Services and infrastructure meet communities' changing needs</p>	<p>PP C3: Provide services and social infrastructure to meet people's changing needs</p> <ul style="list-style-type: none"> • A8: Deliver social infrastructure that reflects the need of the community now and in the future • A9: Optimise the use of available public land for social infrastructure 	<p>As part of the proposal, the application proposed to dedicate 1,296sqm land at No.85 Thomas Street for public open space as identified in the land reserved for acquisition map and 1,200sqm of land at No.89 and 91 Thomas Street identified for Natural Resources – Riparian Lands and Waterways & Biodiversity for council ownership.</p>
<p>O7: Communities are healthy, resilient and socially connected O8: Greater Sydney's communities are culturally rich with diverse neighbourhoods O9: Greater Sydney celebrates the arts and supports creative industries and innovation</p>	<p>PP C4: Working through collaboration</p> <ul style="list-style-type: none"> • A10: Deliver healthy, safe and inclusive places for people of all ages and abilities that support active, resilient and socially connected communities by (a-d). • A11: Incorporate cultural and linguistic diversity in strategic planning and engagement. • A12: Consider the local infrastructure implications of areas that accommodate large migrant and refugee populations. • A13: Strengthen the economic self-determination of Aboriginal communities by engagement and consultation with Local Aboriginal Land Council's. • A14: Facilitate opportunities for creative and artistic expression and participation, wherever feasible with a minimum regulatory burden including (a-c). • A15: Strengthen social connections within and between communities through better understanding of the nature of social networks and supporting infrastructure in local places 	<p>The initial application has been referred to the former Department of Primary Industries for comment on the sensitive ecology areas to the south as identified in the Natural Resources and Heritage Map. The input from state government agencies has assisted in preparing a supportable scheme.</p> <p>Council's LEP Amendment No.20 relating to Land Reserved for Acquisition has also affected the application identifying parts of the site for public recreation and natural resources biodiversity/riparian lands and waterways. This impacted the developable of the R4 zoned site. This Planning Proposal hopes to facilitate development in accordance with the intentions of the controls of the site.</p>
<p>Housing the city O10: Greater housing supply O11: Housing is more diverse and affordable</p>	<p>PP C5: Providing housing supply, choice and affordability, with access to jobs, services and public transport</p> <ul style="list-style-type: none"> • A16: Prepare local or district housing strategies that address housing targets [abridged version] • A17: Prepare Affordable Rental housing Target Schemes 	<p>City of Parramatta is expected to meet and potentially exceed its housing targets set by the Greater Sydney Commission, thus the change in planning controls cannot be justified under O10 which proposes to increase the supply of housing.</p> <p>A Planning Proposal increasing the maximum building height provides an opportunity for the applicant to obtain Gross Floor Area (GFA) for high-density residential uses from the undevelopable land zoned R4 and, and in this exceptional</p>

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

		<p>circumstance the privately owned RE1 portion rezoned by a Council let proposal.</p> <p>No affordable housing is included in the planning proposal at this stage. The proposal could investigate potential to include future affordable housing stock on the site under Council's Affordable Housing Policy.</p>
<p>A city of great places O12: Great places that bring people together O13: Environmental heritage is identified, conserved and enhanced</p>	<p>PP C6: Creating and renewing great places and local centres, and respecting the District's heritage</p> <ul style="list-style-type: none"> • A18: Using a place-based and collaborative approach throughout planning, design, development and management deliver great places by (a-e) • A19: Identify, conserve and enhance environmental heritage by (a-c) • A20: Use place-based planning to support the role of centres as a focus for connected neighbourhoods • A21: In Collaboration Areas, Planned Precincts and planning for centres (a-d) • A22: Use flexible and innovative approaches to revitalise high streets in decline. 	<p>The site reference scheme proposed a design that masses the building envelope within the developable portion of the site in the northern half of the site. It provides separation between the development and existing environmental constraints such as the open space acquisition, natural resources area and Parramatta River.</p>

Productivity

An assessment of the planning proposal's consistency with the CCDP's relevant Productivity Priorities and Actions is provided in Table 4c, below.

Table 4c – Consistency of planning proposal with relevant CCDP Actions – Productivity

Productivity Direction	Planning Priority/Action	Comment
<p>A well-connected city O19: Greater Parramatta is stronger and better connected</p>	<p>PP C7: Growing a stronger and more competitive Greater Parramatta</p> <ul style="list-style-type: none"> • A23: Strengthen the economic competitiveness of Greater Parramatta and grow its vibrancy [abridged] • A24: Revitalise Hawkesbury Road so that it becomes the civic, transport, commercial and community heart of Westmead • A25: Support the emergency services transport, including helicopter access • A26: Prioritise infrastructure investment [abridged] • A27: Manage car parking and identify smart traffic management strategies 	<p>The existing R4 zoned site is located in close proximity to the Parramatta CBD and intends to deliver additional high-density residential dwellings in close proximity to the employment generating uses in Parramatta CBD.</p> <p>Redevelopment for high-density residential uses on the site is subject to significant environmental and topographic restraints to the southern portion of the site. The Planning Proposal, site-specific DCP and draft VPA endeavour to address the highly restrained environmental condition of the site within an R4 zoning in close proximity to Parramatta CBD.</p>

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

	<ul style="list-style-type: none"> • A28: Investigate opportunities for renewal of Westmead East as a mixed use precinct 	
<p>Jobs and skills for the city</p> <p>O15: The Eastern, GOP and Western Economic Corridors are better connected and more competitive</p>	<p>PP C8: Delivering a more connected and competitive GOP Economic Corridor</p> <ul style="list-style-type: none"> • A28: Investigate opportunities for renewal of Westmead East as a mixed use precinct PPC8 • A29: Prioritise public transport investment to deliver the 30-minute city objective for strategic centres along the GOP Economic Corridor • A30: Prioritise transport investments that enhance access to the GOP between centres within GOP 	<p>The proposal maintains the existing R4 – High Density Residential zone for the subject site across the developable area at the northern portion of the site along the street, and extends the existing RE1 – Public Recreation use across the undeveloped site area which is proposed for land dedication. The site is located within the GOP corridor and in a location near local bus routes, regional highways and local cycleways that supports the 30-minute city.</p>
<p>O14: The plan integrates land use and transport creates walkable and 30 minute cities</p>	<p>PP C9: Delivering integrated land use and transport planning and a 30-minute city</p> <ul style="list-style-type: none"> • A32: Integrate land use and transport plans to deliver a 30-minute city • A33: Investigate, plan and protect future transport and infrastructure corridors • A34: Support innovative approaches to the operation of business, educational and institutional establishments to improve the performance of the transport network • A35: Optimise the efficiency and effectiveness of the freight handling and logistics network by (a-d) • A36: Protect transport corridors as appropriate, including the Western Sydney Freight Line, North South train link from Schofields to WS Airport as well as Outer Sydney Orbital and Bells Line of Road-Castlereagh connections 	
<p>O23: Industrial and urban services land is planned, retained and managed</p>	<p>PP C10: Growing investment, business opportunities and jobs in strategic centres</p> <ul style="list-style-type: none"> • A37: Provide access to jobs, goods and services in centres [abridged] • A38: Create new centres in accordance with the principles for Greater Sydney’s centres • A39: Prioritise strategic land use and infrastructure plans for growing centres, particularly those with capacity for additional floorspace 	<p>The Planning Proposal would locate additional housing in close proximity to the Parramatta CBD. It is anticipated that additional housing will grow investment and business opportunities for everyday retail and commercial uses at the site and is therefore consistent with PP C10.</p>

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

O23: Industrial and urban services land is planned, retained and managed	PP C11: Maximising opportunities to attract advanced manufacturing and innovation in industrial and urban services land	N/A
O24: Economic sectors are targeted for success	PP C12: Supporting growth of targeted industry sectors	N/A

Sustainability

An assessment of the planning proposal's consistency with the CCDP's relevant Productivity Priorities and Actions is provided in Table 4d, below.

Table 4d – Consistency of planning proposal with relevant CCDP Actions – Sustainability

Sustainability Direction	Planning Priority/Action	Comment
A city in its landscape O25: The coast and waterways are protected and healthier	PP C13: Protecting and improving the health and enjoyment of the District's Waterways <ul style="list-style-type: none"> • A60: Protect environmentally sensitive areas of waterways • A61: Enhance sustainability and liveability by improving and managing access to waterways and foreshores for recreation, tourism, cultural events and water based transport • A62: Improve the health of catchments and waterways through a risk based approach to managing the cumulative impacts of development including coordinated monitoring of outcomes • A63: Work towards reinstating more natural conditions in highly modified urban waterways 	The proposal is situated adjacent to Parramatta River. A substantial setback is proposed for future development that locates the building out of the Foreshore Building Line, Natural Resources affectation and heritage area. The reference design proposed positions future development outside the affected areas on the elevated topography at the north of the site.
O26: The coast and waterways are protected and healthier	PP C14: Creating a Parkland City urban structure and identity, with South Creek as a defining spatial element <ul style="list-style-type: none"> • A64: Implement South Creek Corridor Project and use the design principles for South Creek to deliver a cool and green Western Parkland City 	The subject site is adjacent to the Parramatta River and impacted by the Coastal Management SEPP 2018. The Foreshore Building Line in the LEP also affects the subject site.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

<p>O27: Biodiversity is protected, urban bushland and remnant vegetation is enhanced</p> <p>O28: Scenic and cultural landscapes are protected</p>	<p>PP C15: Protecting and enhancing bushland, biodiversity and scenic and cultural landscapes</p> <ul style="list-style-type: none"> • A65: Protect and enhance biodiversity by (a-c) [abridged] • A66: Identify and protect scenic and cultural landscapes • A67: Enhance and protect views of scenic and cultural landscapes from the public realm 	<p>The subject site includes urban bushland which is classified as Natural Resources – Riparian Lands and Waterways. This has been taken into consideration when preparing the reference design for the planning proposal, which includes both developable and undevelopable portions to the site.</p>
<p>O30: Urban tree canopy cover is increased</p> <p>O32: The Green grid links Parks, open spaces, bushland and walking and cycling paths</p>	<p>PP C16: PP C16: Increasing urban tree canopy cover and delivering Green grid connections</p> <ul style="list-style-type: none"> • A68: Expand urban tree canopy in the public realm • A69: progressively refine the detailed design and delivery of (a-c) [abridged] • A70: Create Greater Sydney green Grid connections to the Western Sydney Parklands 	<p>The subject site already includes urban tree canopy within the southern portion of the site. This area is anticipated to be maintained as existing as part of the planning proposal.</p> <p>Deep soil areas are proposed for the front and side setbacks. A site specific DCP proposed to accommodate urban tree canopy cover on the site to enhance the streetscape and improve privacy between neighbouring properties.</p>
<p>O31: Public open space is accessible, protected and enhanced</p>	<p>PP C17: Delivering high quality open space</p> <ul style="list-style-type: none"> • A71: Maximise the use of existing open space and protect, enhance and expand public open space by (a-g) [abridged] 	<p>The subject site includes an acquisition for local open space on No.85 Thomas Street. The subject site is also subject to an easement for the Parramatta Valley Cycleway along the southern edge of the site. The easement will be maintained as part of the future development.</p> <p>The Planning Agreement Offer also includes land dedication for the existing RE1 land affected by a land acquisition (1,296sqm) and natural resources biodiversity land (1,200sqm).</p>
<p>An efficient city</p> <p>O33: A low-carbon city contributes to net-zero emissions by 2050 and mitigates climate change</p> <p>O34: Energy and water flows are captured, used and re-used</p> <p>O35: More waste is re-used and recycled to support the development of a circular economy</p>	<p>PP C19: Reducing carbon emissions and managing energy, water and waste efficiently</p> <ul style="list-style-type: none"> • A75: Support initiatives that contribute to the aspirational objectives of achieving net-zero emissions by 2050 • A76: Support precinct-based initiatives to increase renewable energy generation and energy and water efficiency • A77: Protect existing and identify new locations for waste recycling and management 	<p>The proposal does not include sustainability initiatives such as recycled water, sustainable building materials, photovoltaics. Should the proposal proceed, initiatives towards net-zero emission by 2050, methods of recycling construction and ongoing waste should be investigated as part of the Development Application stage. Further consideration should be given to council's environmental sustainability strategy when delivering the proposal.</p>

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

	<ul style="list-style-type: none"> • A78: Support innovative solutions to reduce the volume of waste and reduce waste transport requirements • A79: Encourage the preparation of low carbon, high efficiency strategies to reduce emissions, optimise the use of water, reduce waste and optimising car parking provisions where an increase in total floor in 100,000sqm 	
<p>O36: People and places adapt to climate change and future shocks and stresses</p> <p>O37: Exposure to natural and urban hazards is reduced</p> <p>O38: Heatwaves and extreme heat are managed</p>	<p>PP C20: Adapting to the impacts of urban and natural hazards and climate change</p> <ul style="list-style-type: none"> • A81: Support initiatives that respond to the impacts of climate change • A82: Avoid locating new urban development in areas exposed to natural and urban hazards and consider options to limit the intensification of development in existing areas most exposed to hazards • A83: Mitigate the urban heat island effect and reduce the vulnerability to extreme heat • A84: Respond to the direction for managing flood risk in Hawkesbury-Nepean Valley • A85: Consider strategies and measures to manage flash flooding and safe evacuation when planning for growth in Parramatta CBD 	<p>The proposal does include some flood affected land. However, the proposed building envelope in the reference design is located away from the land impacted by natural hazards.</p>

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

3.2.1. Will the planning proposal give effect to a council's endorsed local strategic planning statement, or another endorsed local strategy or strategic plan?

The following local strategic planning documents are relevant to the planning proposal.

Parramatta 2038 Community Strategic Plan

Parramatta 2038 is a long term Community Strategic Plan for the City of Parramatta and it links to the long-term future of Sydney. The plan formalises several big and transformational ideas for the City and the region. The planning proposal is considered to meet the strategies and key objectives identified in the plan including:

- 3.4 Provide green spaces for recreation, relaxation and enjoyment
- 6.1 Engage in strategic planning and implement innovative solutions to manage the growth of our city

Parramatta Local Strategic Planning Statement

The LSPS sets out the long-term vision for land use planning in a council's local government area (LGA) and responds to broader priorities identified in the District Plans and integrates with a Council's Community Strategic Plan. The LSPS will provide greater weight to strategic planning in the broader plan making process and any new planning proposal must justify any inconsistency with this framework.

The Planning Proposal is assessed against the broad directions of the LSPS as shown below in Table 5.

Table 5: LSPS Assessment

Broad Directions of LSPS	Comment
1. Focus employment growth in the Parramatta Metropolitan Centre (Parramatta CBD) and Strategic Centres of Epping and Sydney Olympic Park and Westmead Innovation Precinct	N/A
2. Housing growth is focused in identified Growth Precincts	The site is not within an already identified housing growth precinct in Council's LSPS, Council's LHS or the GOPP Place-based infrastructure compact. The site is already zoned R4 – High Density Residential. Prior to Parramatta LEP 2011 – Amendment No.20, the entire 6,321sqm of privately owned land had a 0.8:1 FSR allowing up to 5057sqm of GFA . This Planning Proposal redistributes that previously available floorspace within the developable portion of the site (3,825sqm) in an increased height limit of 22m and increase FSR of 1.3:1 applying to the R4 land.
3. Preserve and enhance the low-scale character and identity of suburban City of Parramatta suburbs outside of the GOPP area	Residential flat buildings are already a permissible use on the subject site. The planning proposal does not propose to change the R4 zoning of the developable portion of the site. The reference design provides substantial setbacks exceeding what would be required by the Apartment Design Guide to better protect the amenity and privacy of adjoin R4 zoned sites, some which still include single dwelling houses

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

	(north of Thomas St). There additional setbacks allow for deep soil and urban tree canopy cover.
4. Stage Housing Release with infrastructure delivery.	The site is situated within the "Shorts Corner" precinct, which is not identified as an area for prioritised growth in the short to medium term. Notwithstanding, the Planning Proposal does not propose a significant increase in GFA compared to what was achievable on the site prior to the recent rezoning under Parramatta LEP 2011 – Amendment 20 that introduced RE1 zoning, land acquisition and biodiversity controls on the site. Therefore it is considered by Council officers that the Planning Proposal should proceed despite the recommendation of the draft PIC
5. Housing Diversity underpins any future changes to planning controls	Given the site is already zoned R4 – High Density Residential and that the Planning Proposal is not seeking a significant uplift over and above what the site could previously achieve, the Planning Proposal is considered to be consistent with the LSPS in this instance.
6. The majority of employment lands are protected to ensure no net loss of jobs or employment lands	N/A
7. Neighbourhoods, places and development are well-balanced, connected and sustainable	No affordable housing is included in the planning proposal at this stage. Council's Affordable Housing Policy provides opportunities to work towards well-balanced and sustainable development.
8. Protection of the environment, including providing for sustainable development	The subject site has an existing easement for the Parramatta Valley cycleway along the southern portion of the site to assist in providing Green grid and River foreshore connections. The site also includes a 30m Foreshore Building Line, within that area includes Natural Resources – Biodiversity and Natural Resources – Riparian Lands and Waterways affectations. There is also a land acquisition affectation at the No.85 Thomas Street site for privately owned land currently zoned RE1. Opportunity to designate privately owned RE1 land undevelopable land to public open space and land affected by Natural Resources Riparian Lands & Waterways and Biodiversity will be negotiated as part of a future VPA.

Parramatta Local Housing Strategy

Council is also required to prepare a Local Housing Strategy (LHS) in accordance with the Central City District Plan. The LHS will convey the type and location of new housing in the City of Parramatta LGA. It will consider supply and demand for housing, local land use opportunities and constraints, demographic factors and appropriate building typologies to support a mix of housing.

Table 6: Draft LHS Assessment

Key Findings of Draft LHS	Comment
Finalise Parramatta CBD Planning Proposal and Granville (South) Planning Proposal	The subject site is located outside the Parramatta CBD and Granville Precinct. As mentioned

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

(Parramatta Road Urban Transformation Strategy).	previously, the increase in building height allows the landowner to accommodate the 4,973sqm of apartment dwelling floorspace permissible on the site prior to 28 July 2017 when Parramatta LEP 2011 – Amendment No.20 was gazette.
Implement Westmead Innovation District Master Plan.	N/A
Continue housing delivery in already zoned precincts and their related site-specific planning proposals.	The subject site is already zoned R4 and does not lead to additional high-density residential floor space outside the already identified growth precincts than that currently permissible by the site area and FSR prior to 28 July 2017.
Investigate more medium density, low-rise housing types (terraces and townhouses) in suitable locations.	Residential flat buildings are already a permissible use on the subject site. The planning proposal does not propose to change the R4 zoning of the developable portion of the site and terraces and townhouses cannot be mandated for the site.
Pursue an Affordable Housing Scheme for new Growth Precinct Planning Proposals.	No affordable housing is included in the planning proposal at this stage. The proposal could investigate potential to include future affordable housing stock on the site under Council's Affordable Housing Policy.
Complete structure plan and design guidelines for all Growth Precincts.	The site is outside the identified structure plan areas for growth precincts. The application currently proposes a scale of development that does not trigger the need to prepare precinct wide analysis from high-density residential zone land in the nearby area bound by James Ruse Drive, Parramatta River, Macarthur Street and Victoria Road.

Both the LSPS and LHS will be used in the future to set a strategic framework for future housing and guide the planning in this area, across the LGA and are likely to come into effect in 2020. Given that the site has existing R4 zoning, the LSPS and LHS are unlikely to preclude redevelopment for high-density residential uses such as apartments on the site. Council officers recommend that the Planning Proposal be updated following Gateway Determination and prior to public exhibition to reflect the final Local Housing Strategy as endorsed by Council in mid 2020.

3.2.2. Is the planning proposal consistent with the applicable State Environmental Planning Policies?

The following State Environmental Planning Policies (SEPPs) are of relevance to the site (refer to Table 5 below).

Table 5 – Consistency of planning proposal with relevant SEPPs

State Environmental Planning Policies (SEPPs)	Consistency: Yes = ✓ No = x N/A = Not applicable	Comment
SEPP No 1 Development Standards	N/A	SEPP 1 does not apply to Parramatta LEP 2011

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

SEPP 4 – Development Without Consent and Miscellaneous Exempt and Complying Development	N/A	This SEPP is not applicable to the subject land under Clause 1.9 of the Parramatta LEP 2011.
SEPP 6 – Number of Storeys in a Building	N/A	Standard instrument definitions apply.
SEPP 33 – Hazardous and Offensive Development	x	This SEPP is not applicable to the subject land under Clause 1.9 of the Parramatta LEP 2011.
SEPP No 55 Remediation of Land	x	This SEPP is not applicable to the subject land under Clause 1.9 of the Parramatta LEP 2011.
SEPP 60 – Exempt and Complying Development	N/A	This SEPP is not applicable to the subject land under Clause 1.9 of the Parramatta LEP 2011.
SEPP 64 – Advertising and Signage	N/A	Not relevant to proposed amendment. May be relevant to future DAs.
SEPP No 65 Design Quality of Residential Flat Development	✓	Detailed compliance with SEPP 65 will be demonstrated at the time of making a development application for the site facilitated by this Planning Proposal. During the design development phase, detailed testing of SEPP 65 and the Residential Flat Design Code was carried out and the indicative scheme is capable of demonstrating compliance with the SEPP.
SEPP No.70 Affordable Housing (Revised Schemes)	N/A	Not relevant to proposed amendment.
SEPP (Affordable Rental Housing) 2009	N/A	Not relevant to proposed amendment.
SEPP (BASIX) 2004	N/A	Detailed compliance with SEPP (BASIX) will be demonstrated at the time of making a development application for the site facilitated by this Planning Proposal.
SEPP (Exempt and Complying Development Codes) 2008	✓	May apply to future development of the site.
SEPP (Infrastructure) 2007	x	May apply to future development of the site.
Sydney Regional Environmental Plan No 18– Public Transport Corridors	N/A	This SEPP is not applicable to the subject land under Clause 1.9 of the <i>Parramatta LEP 2011</i> .
Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005	N/A	The proposed development is not located directly on the Sydney Harbour Catchment foreshore. Any potential impacts as a result of development on the site, such as stormwater runoff, will be considered and addressed appropriately at DA stage.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

SEPP (Urban Renewal) 2010	x	N/A
SEPP Coastal Management	✓	<p>This applies to this site as it adjoins 'Coastal Wetlands' and is located within the 100m buffer zone of the Mean High Water Mark of the Parramatta River. The Coastal</p> <p>SEPP gives effect to the objectives of the Coastal Management Act 2016, defining the four coastal</p> <p>management areas as per the Act through detailed mapping and specific assessment criteria for each</p> <p>coastal management area as outlined in the attached Fact Sheet. Councils must consider these criteria when assessing proposals for development that fall within one or more of the mapped areas</p>

3.2.3. Is the planning proposal consistent with applicable Ministerial Directions (s.9.1 directions)

In accordance with Clause 9.1 of the *EP&A Act 1979* the Minister issues directions for the relevant planning authorities to follow when preparing planning proposals for new LEPs. The directions are listed under the following categories:

- Employment and resources
- Environment and heritage
- Housing, infrastructure and urban development
- Hazard and risk
- Housing, Infrastructure and Urban Development
- Local plan making

The following directions are considered relevant to the subject Planning Proposal.

Table 6 – Consistency of planning proposal with relevant Section 9.1 Directions

Relevant Direction	Comment	Compliance
1. Employment and Resources		
2. Environment and Heritage		
Direction 2.2 – Coastal Management	The subject site is located within the coastal zone as identified by the SEPP and Coastal Management Act. The planning proposal does not intensify the land use towards the southern portion of the site as this is proposed for land dedication to Council. This will provide better consistency with this SEPP.	Yes
Direction 2.3 - Heritage Conservation	The subject site contains part of I1 – Coastal Wetlands, Parramatta River. Council is satisfied that the planning proposal maintains the integrity of the item can be maintained under the proposed indicative massing within the developable portion of the site.	Yes
3. Housing, Infrastructure and Urban Development		

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Direction 3.1 - Residential Zones	The Planning Proposal is consistent with this direction, in that it: <ul style="list-style-type: none"> • facilitates additional housing in close proximity to the Parramatta City Centre that is currently not provided on the site • provides residential development in an existing urban area that will be fully serviced by existing infrastructure • does not reduce the permissible residential density of land, but does reduce the amount of residential land. 	Yes
Direction 3.4 - Integrating Land Use and Transport	The Planning Proposal is consistent with this direction, in that it: <ul style="list-style-type: none"> • will provide new dwellings in close proximity to existing bus and bicycle transport links • will enable residents to walk or cycle to work if employed in the Parramatta City Centre or utilise the heavy rail service. • will maintain and provide additional commercial premises in proximity to existing transport links • makes more efficient use of space and infrastructure by increasing densities on an underutilised site. 	Yes
4. Hazard and Risk		
Direction 4.1 - Acid Sulfate Soils	The site is identified as Class 5 on the Acid Sulfate Soils and part Class 2 on the Map in Parramatta Local Environmental Plan 2011. Acid sulfate soils are generally not found in Class 5 areas. However, this will be addressed further at the development application stage. Buildings will not be located in the Class 2 area.	Yes
Direction 4.3 - Flood Prone Land	Any potential impacts as a result of development on the site, such as stormwater runoff, will be considered and addressed appropriately at DA stage. This will also include any design detail required to ensure compliance with Council's water management controls within the Parramatta DCP 2011.	Yes
5. Local Plan Making		
Direction 6.1 - Approval and Referral Requirements	The Planning Proposal does not introduce any provisions that require any additional concurrence, consultation or referral.	Yes
Direction 6.2 – Reserving Land for Public Purposes	The subject site includes a land reserved for acquisition affectation on No.85 Thomas Street. This portion of land is already zoned RE1 and proposed to be dedicated to Council as part of the Planning Proposal process. Future development under the reference design does not proposed high-density residential development within this portion of the site.	Yes
Direction 6.3 - Site Specific Provisions	The Planning Proposal does not introduce any site specific provisions.	Yes
6. Metropolitan Planning		
Direction 7.1 - Implementation of A Plan for Growing Sydney	This direction works towards ensuring planning proposals are consistent with the metropolitan region plan. In doing so, an assessment of the planning	Yes

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

	proposal has been carried out with regards to the GSC's A Metropolis of Three Cities. This has been included above as part of the relationship to strategic planning framework under Section B.	
Direction 7.5 – Implementation of Greater Parramatta Priority Growth Area Interim Land Use and Infrastructure Implementation Plan	<p>The Planning Proposal is not located within the Greater Parramatta Priority Growth Area Interim Land Use and Infrastructure Implementation Plan although is located within close proximity of the area.</p> <p>The subject site is located within the Shorts Corner precinct of GPOP. This precinct is not identified for growth as part of Phase 1 or Phase 2 of the Place-based Infrastructure Compact.</p>	Yes

3.3. Section C – Environmental, social and economic impact

This section considers the potential environmental, social and economic impacts which may result from the Planning Proposal.

3.3.1. Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

Yes, the subject site identifies 1,200sqm of land at the southern part of No.89 and 91 Thomas Street be identified as part of the Natural Resources – Biodiversity and Natural Resources – Riparian Lands and Waterways. This land remains zoned R4 with maximum building height and floor space ratios still applying to the land but is undevelopable for high-density residential purposes. The affectation of the site consequent to on 28 July 2017, Parramatta LEP 2011 – Amendment No.20.

Figure 4 & 5- Subject site and land affectation by Natural Resources – Riparian Lands and Waterways (left) and Biodiversity (right)

3.3.2. Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?

Heritage

The subject site is affected by the heritage associated with the Parramatta River Wetlands (Item 1 – Schedule 5, Environmental Heritage). This item is located within the undevelopable portion of the site and relates principally to the adjacent Parramatta River. Should the Planning Proposal proceed, land identified as part of heritage will be dedicated to Council ownership.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Figure 6 - Heritage affection on subject site by I1 – Parramatta River

The current Planning Proposal proposes that the building envelope is located outside the area affected by Heritage in hope to resolve the heritage and ecological concerns. The Planning Proposal will be referred again to Heritage regarding the heritage and wetland matters as part of a public exhibition associated with a Gateway Determination should the Planning Proposal proceed.

Ecology

Adjacent to the site also includes coastal mangroves and saltmarshes. The Planning Proposal was referred to the former Department of Primary Industries in 2017 seeking comment regarding potential shading impacts to marine vegetation such as the mangroves and saltmarsh to the south of the site. On 15 May 2017, Primary Industries recommended a precautionary approach regarding the ongoing long-term impacts to both the mangroves and saltmarsh. The applicant then provided a revised report which allowed Primary Industries to complete a further assessment. Primary Industry clarified on 9 November 2017 that there "does not see any reason for potential shading issues on mangrove and saltmarsh species to prevent the lodgement of this development, as currently proposed, as a Planning Proposal.

Former concepts for the planning proposal that proposed an increase in GFA for the site raised concerns for Council's Natural Resources and Open Space team. Caution was raised as an increase in density for the site could set a planning precedent for planning controls to change for the wider precinct which would result cumulative overshadowing impact to the mangroves and salt-marshes. Whilst the Planning Proposal still seeks an increase in height and may increase overshadowing to this ecology, Council officers consider this risk as resolved it satisfies as the planning precedent issue is resolved and an increase in density for this site in isolation (no net-increase in floor-space compared to 2016 controls) is satisfactory.

Flooding

The site is located adjacent to the Parramatta River and includes a steep topography upwards towards Thomas street. The northern part of the site is relatively flat above RL-12. Land towards the south of the site identified for potential land dedication to Council is more susceptible to flooding impacts.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Any potential impacts as a result of development on the site, such as stormwater runoff, will be considered and addressed appropriately at DA stage. This will also include any design detail required to ensure compliance with Council's water management controls within the Parramatta DCP 2011.

Urban Design

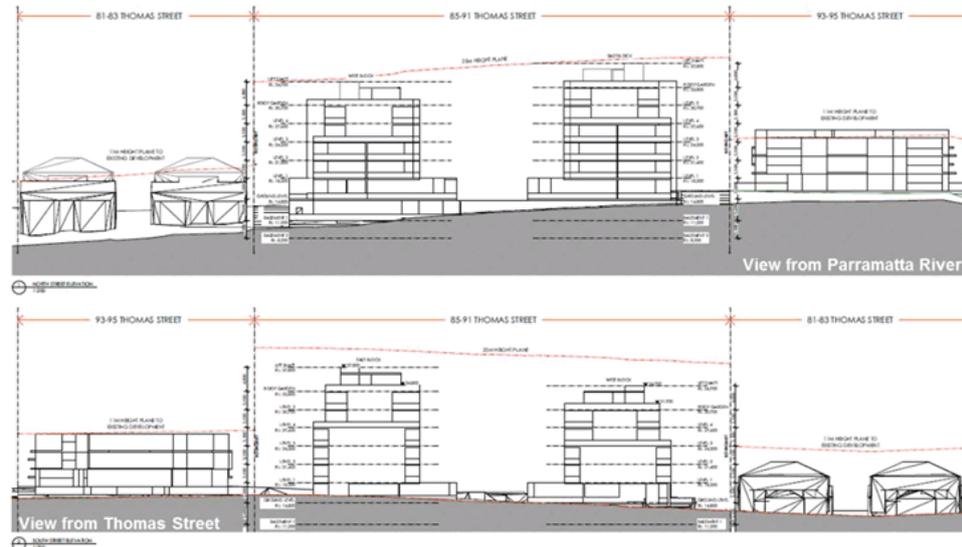

Figure 7- Reference Design for subject site (Source: PTI Architecture)

On 4 February 2020, the applicant provided Council a revised reference design for the Planning Proposal for 85-91 Thomas Street, Parramatta. The applicant's reference design proposes a 25-metre Maximum Building Height which could accommodate approximately 7 storeys. Council's Planning and Design units have maintained their recommendation that there is strategic merit in increasing the height to a maximum of 6 storeys to accommodate a similar amount of high-density residential floor-space permissible on the site at lodgement of the Planning Proposal.

Floor Space Ratio

The current scheme submitted by the applicant generates 4,994sqm of GFA for high-density residential purposes. This amount is 953sqm greater than what the current planning controls allow. It is also 63sqm less than the GFA permissible on the site at lodgement in June 2016 where a 0.8:1 FSR control applying to the entire site area (i.e. 5,057sqm of GFA). The Planning Proposal aims to amend the maximum Building Height and Floor Space Ratio controls to accommodate no-net increase in high-density residential GFA compared to what was previously permissible under Development Application controls on the site at lodgement of the application. Therefore the dwelling yield, while increasing compared to the current controls, will be the same when compared to the planning controls which applied to the site when the Planning Proposal was lodged with Council.

Building Height

The existing building height control allows for high-density residential development of maximum 3-storeys to be accommodated on the site. The adjoining property at 93-95 Thomas Street demonstrates a recent example of what could be developed under the existing planning controls (DA/630/2012). This neighbouring development is able to comfortably achieve the current maximum FSR within the existing building height as it does not need to respond to the

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

topographic constraints and foreshore building line evident on the subject site, which significantly reduces the developable area of the subject site.

The applicant's Planning Proposal proposes a 25-metre Maximum Building Height which could accommodate approximately 7 storeys. This height limit is considered excessive given the reference design proposes only 6-storey development on the site. Figure 8 and 9 show that a 22m height plan can accommodate the reference design and reasonably achieve a 6-storey development despite the sloping topography. The 6-storey height is supportable with a 4-storey street wall, additional setbacks for 5th & 6th storeys and separation to adjacent development. The reference design accommodates a 3.3m variation between the proposed ground level at Thomas Street (RL 14.5m) and lower ground level at the rear (RL 11.2m). This maintains a 4-storey form at street level and no more than 6-storeys across the site.

Part 3.1 of the Parramatta DCP 2011 provides a preliminary building envelope guide recommends a 20m height limit for 6-storey residential flat buildings, with this assessment taking into consideration the sloping topography of the site to inform an appropriate building height. The applicant has revised their concept design to a building envelope of maximum 6-storeys, however still proposes a maximum building height of 25 metres. This height limit is considered onerous for a 6-storey development on the site, with a revised increase in height up to 22m for approximately 6 storeys for the following reasons:

- i. It represents a 10% variation from 20m in the DCP Preliminary Building Envelope recommendation for 6-storey residential flat buildings,
- ii. It is double the existing HOB control which would allow the currently permissible high-density residential floorspace on the southern half of the site (located in the foreshore building line) to be massed in a taller built form,
- iii. It accommodates the 3.3m variation between the proposed ground level at Thomas Street (RL 14.5m) and lower ground level at the rear (RL 11.2m). This maintains a 4-storey form at street level and no more than 6-storeys across the site.
- iv. Rooftop gardens above a 6th storey to inform a 25 metres HOB are not certain and could lead to a 7th storey being accommodated.

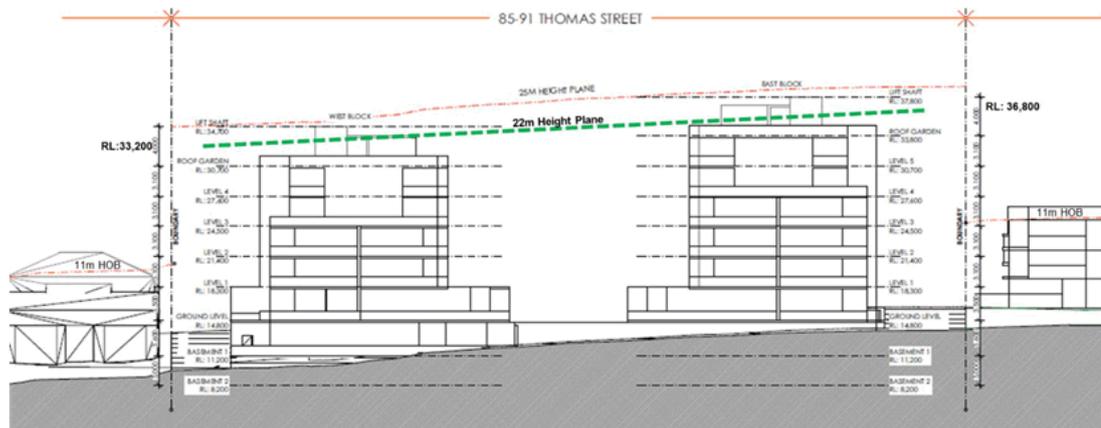

Figure 8 – Section facing north from Parramatta River with adjacent properties (Source: PTI Architecture)

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

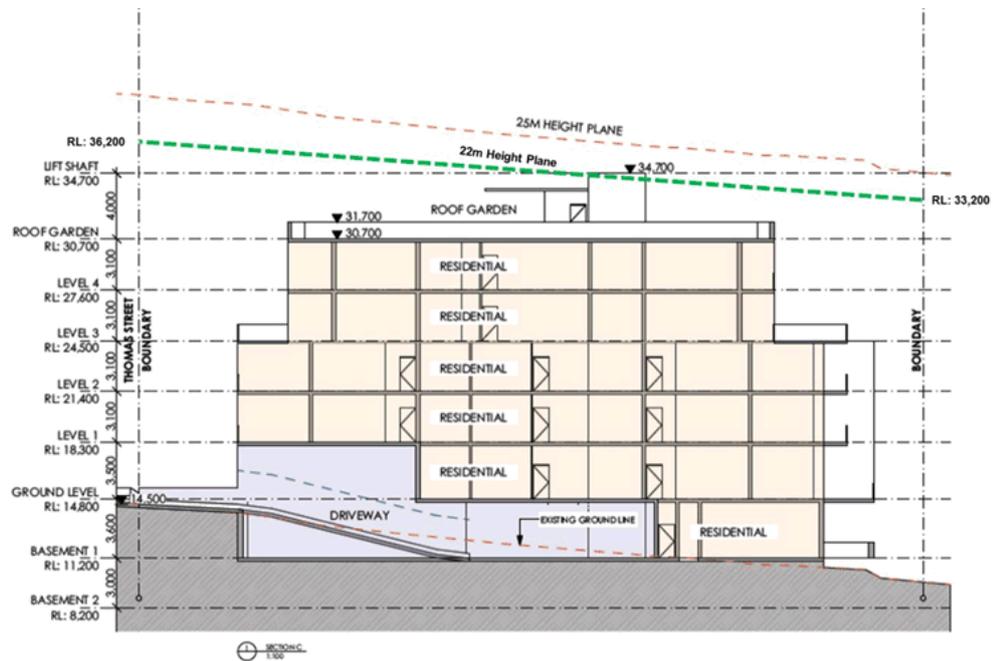

Figure 9– Section facing east from adjacent townhouse development (Source: PTI Architecture)

Building Separation & Setbacks

Given the potential increase in building height on the subject site, it is important to carefully manage privacy and amenity impacts on the adjacent properties, particularly the adjacent townhouse development located near the boundary at 81-83 Thomas Street and single dwelling houses on the northern side of Thomas Street.

The Apartment Design Guide and SEPP 65 set the minimum standards for building separation and setbacks for any residential flat building development on the site. Currently, the ADG would require a minimum of 9 metres separation between habitable and non-habitable rooms for buildings up to 4 storeys, and minimum of 12 metres for buildings 5 to 8 storeys. The reference design included as part of this planning proposal seeks to provide:

- Street setback of 6 metres up to 4-storeys, 9 metre setback up to 6-storeys, 10 metre for rooftop
- Side setback of 10 metres up to 4-storeys, 12 metre setback up to 6-storeys, 13 metre for rooftop.
- Minimum 12 metre building separation between west and east block apartment buildings,
- Rear setback of 3 metres to edge of developable portion of site and foreshore building line,

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Figure 10 – Ground Floor Setbacks for developable site area

Figure 11 – Level 5 and 6 Setbacks developable site area

Deep soil areas and tree plantings within 6 metres of the front and side property boundary will be required to further improve the relationship of the site with neighbouring buildings. This hopes to provide a satisfactory interface with adjacent properties and satisfy concerns relating to privacy and amenity. The setbacks proposed under the reference design are supportable by Council officers in addressing the privacy and amenity of neighbouring and future residents. These setback standards will be reinforced by a proposed site-specific DCP.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

Future development on the site proposes to amalgamate the 4 lots subject to the Planning Proposal. Amalgamation of the sites is supported if the proposed development addresses the scale of adjacent development (such as the townhouses, existing apartment building and single dwellings) and rhythm of the surrounding subdivision pattern with adequate building separation and setbacks exceeding the Apartment Design Guide requirements. Previous concept designs demonstrated a singular elongated row building, driveway and basement entry outside the building envelope, building within the foreshore building line, no additional setback for floors above 4-storeys, are not supported due to their adverse impacts on neighbouring properties and surrounding streetscape. The modulation of the façade will be supported by landscaping and further design detail at Development Application stage as guided by the site specific DCP. The current concept design includes two apartment blocks spaced evenly across the 4 lots, with additional front and side setbacks for Level 5 and 6 which provide a transitioning scale and separation to the scale of development and is supportable (see Figure 11).

Figure 11 – Indicative streetscape

3.3.3. How has the planning proposal adequately addressed any social and economic effects?

Council and State Government does not identify Thomas Street, and this part of Parramatta (Short's Corner) as a growth precinct in accordance with Council's Draft Local Housing Strategy and GSC's Draft Place-based Infrastructure Compact. No major rezonings are required in this precinct for housing are likely to be made by City of Parramatta to meet the 5 year and 20 year housing targets. Any new proposals for new precincts must be justified under strategic planning objectives other than housing supply.

The Planning Proposal, draft site-specific Development Control Plan and draft Planning Agreement are informed by 2,496sqm of land dedication proposed which relates to the southern part of the site. Some of this land is identified for biodiversity and riparian lands (1,200sqm) and some for local open space (1,296sqm). Land dedication is supported in principle as part of the planning proposa.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

3.4. Section D – State and Commonwealth Interests

3.4.1. Is there adequate public infrastructure for the planning proposal?

On 7 November 2019, the GSC released the draft Place-based Infrastructure Compact (PIC) for the Greater Parramatta and Olympic Peninsula (GPOP) area. Specifically, the PIC outlines a draft-sequencing plan to support GPOP and growth in certain precincts in order to inform capital investment plans and budget processes of NSW Government agencies. The site is situated within the “Shorts Corner” precinct, which is not included as part of Phase 1 or Phase 2 areas and therefore not identified for growth within the GPOP (see page 45 and 47, PIC). This makes an increase in density above the 0.8:1 FSR across the whole site area difficult to support.

The Planning Proposal is being facilitated so the applicant may accommodate the 4,655sqm of intended GFA for the subject site as intended by the R4 zoning of the site. It decants the GFA from land zoned R4 outside the Foreshore Building Line, Natural Resources area and Land Reserved for Acquisition which makes most of the undevelopable land. Should the applicant intend to dedicate the 2,496sqm of undevelopable land to Council, the Floor Space Ratio for the site would increase from 0.8:1 to 1.2:1 FSR. Council officers support the massing of GFA within a 6-storey dual building envelope, requiring an increase in maximum HOB from 11m to 22m. Floor Space Ratio and Maximum Building Heights will be removed from the undevelopable portion of the land which is proposed for RE1 zoning.

There is likely to be a modest land value uplift given that no additional floor-space is proposed as part of the application. A base-value for the land is also difficult to identify given the 1,296sqm portion at No.85 Thomas Street was zoned R4 at lodgement, and RE1 at pre-Gateway reporting stage.

The VPA also provides a no-cost pathway for Council to become owners of the RE1 land. This removes the acquisition burden and potentially greater cost for Council to acquire the land from the landowner. It is uncertain whether that this offer is consistent with Council’s Planning Agreement’s Policy which seeks to capture 50% of the value uplift for sites outside of the Parramatta CBD. The dedication of the RE1 land is considered a supportable public benefit that outweighs the cost of assessing and completing a peer-review process of a valuation report for a planning proposal that does not propose additional high-density residential floorspace. The land value uplift process is considered an unreasonable expectation for this application and the VPA offer is acceptable in principle only.

3.4.2. What are the views of State and Commonwealth public authorities consulted in accordance with the gateway determination?

Consultation with the State and Commonwealth public authorities will be undertaken once the gateway determination has been issued.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

PART 4 – MAPPING

This section contains the mapping for this planning proposal in accordance with the DP&E's guidelines on LEPs and Planning Proposals. **Existing controls**

This section illustrates the current *PLEP 2011* controls which apply to the site.

Figure 21 above illustrates Minimum Lot Size of 550sqm on the subject site.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

4.2 Proposed controls

The proposed controls seek to recoup the developability achievable on the site prior to the notification of Parramatta LEP 2011 – Amendment No.20 on 28 July 2017 which resulted in 2,496sqm of land at the rear of the site being identified as undevelopable land. The proposed controls seek to amend the planning controls so the same amount of GFA achievable prior to Amendment No.20 may be achieved. The figures in this section illustrate the proposed changes to zoning, maximum building height, floor space ratio, minimum lot size and land reserve for acquisition mapping for the subject site to achieve this. No other changes are proposed as part of the Planning Proposal.

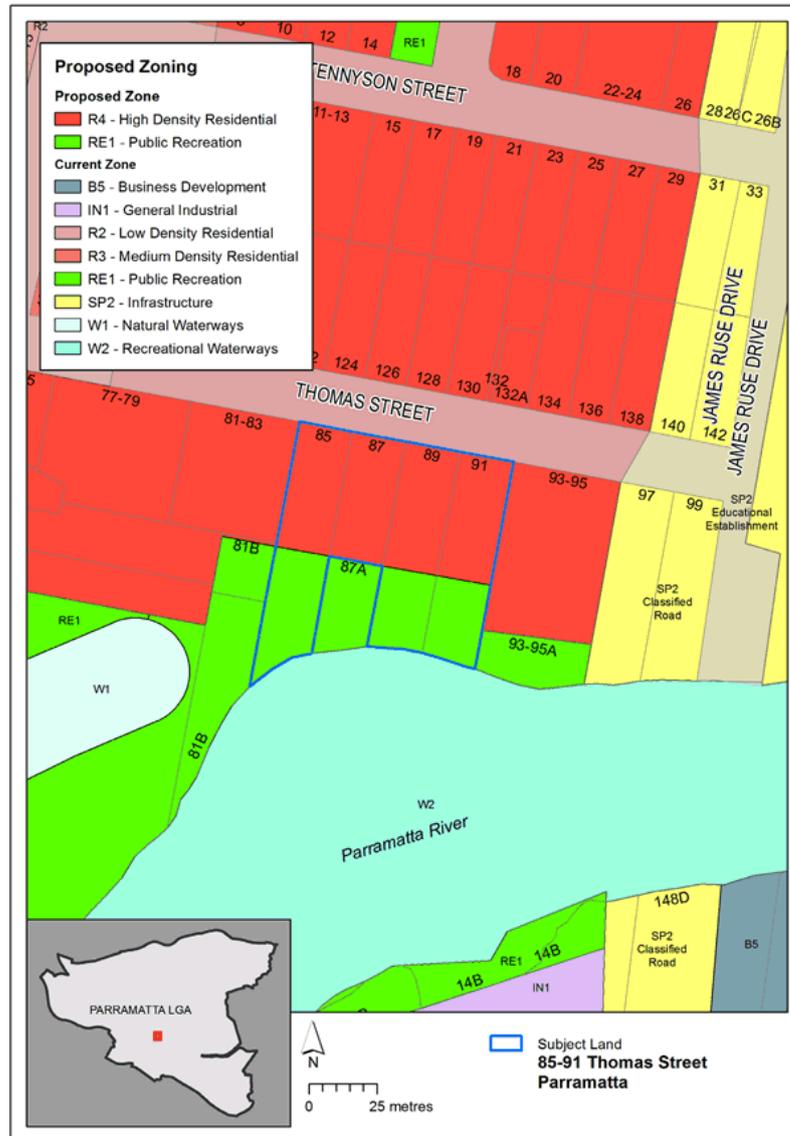

Figure 22 – Proposed amendment to the Parramatta LEP 2011 Land Use Zoning Map

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

PART 5 – COMMUNITY CONSULTATION

The planning proposal (as revised to comply with the Gateway determination) is to be publicly available for community consultation.

Public exhibition is likely to include:

- newspaper advertisement;
- display on the Council's web-site; and
- written notification to adjoining landowners.

The gateway determination will specify the level of public consultation that must be undertaken in relation to the planning proposal including those with government agencies.

Consistent with sections 3.34(4) and 3.34(8) of the *EP&A Act 1979*, where community consultation is required, an instrument cannot be made unless the community has been given an opportunity to make submissions and the submissions have been considered.

PLANNING PROPOSAL – 85-91 Thomas Street, Parramatta

PART 6 – PROJECT TIMELINE

Once the planning proposal has been referred to the Minister for review of the Gateway Determination and received a Gateway determination, the anticipated project timeline will be further refined, including at each major milestone throughout the planning proposal's process.

Table 7 below outlines the anticipated timeframe for the completion of the planning proposal.

Table 7 – Anticipated timeframe to planning proposal process

MILESTONE	ANTICIPATED TIMEFRAME
Report to LPP on the assessment of the PP	April 2020
Report to Council on the assessment of the PP	May 2020
Referral to Minister for review of Gateway determination	June 2020
Date of issue of the Gateway determination	August 2020
Date of issue or revised Gateway determination (if relevant)	
Commencement and completion dates for public exhibition period	July/August 2021
Commencement and completion dates for government agency notification	July/August 2021
Consideration of submissions	September 2021
Consideration of planning proposal post exhibition and associated report to Council	November/December 2021
Submission to the Department to finalise the LEP	December 2021
Notification of instrument	January 2022

Gateway Determination

Planning proposal (Department Ref: PP_2020_COPAR_005_00): To rezone land and amend development controls at 85-91 Thomas Street, Parramatta.

I, the Acting Director, Central (GPOP) at the Department of Planning, Industry and Environment, as delegate of the Minister for Planning and Public Spaces, have determined under section 3.34(2) of the *Environmental Planning and Assessment Act 1979* (the Act) that an amendment to the Parramatta Local Environmental Plan (LEP) 2011 to rezone land and amend development controls at 85-91 Thomas Street, Parramatta should proceed subject to the following conditions:

1. Prior to community consultation, Council is to amend the planning proposal to:
 - a. update the explanation of provisions to outline the intended outcomes regarding the proposed changes to the minimum lot sizes;
 - b. outline a suitable mechanism to ensure that land to be zoned RE1 Public Recreation has an appropriate acquiring authority identified. This maybe by way of a planning agreement finalised prior to the making of the LEP; and
 - c. update Part 4.2 to ensure text identifies the intent of the proposal.
2. Public exhibition is required under section 3.34(2)(c) and schedule 1 clause 4 of the Act as follows:
 - (a) the planning proposal must be made publicly available for a minimum of **28 days**; and
 - (b) the planning proposal authority must comply with the notice requirements for public exhibition of planning proposals and the specifications for material that must be made publicly available along with planning proposals as identified in section 6.5.2 of *A guide to preparing local environmental plans* (Department of Planning and Environment, 2018).
3. Consultation is required with the following public authorities/organisations under section 3.34(2)(d) of the Act and/or to comply with the requirements of relevant section 9.1 Directions:
 - Transport for NSW;
 - Department of Planning, Industry and Environment – Energy, Environment and Science; and
 - NSW Heritage.

Each public authority/organisation is to be provided with a copy of the planning proposal and any relevant supporting material and given at least 21 days to comment on the proposal.

4. A public hearing is not required to be held into the matter by any person or body under section 3.34(2)(e) of the Act. This does not discharge Council from any obligation it may otherwise have to conduct a public hearing (for example, in response to a submission or if reclassifying land).
5. Prior to finalisation, the planning proposal is to be updated to address consistency with Section 9.1 Direction 6.3 Reserving land for public purposes.
6. The planning proposal authority is authorised as the local plan-making authority to exercise the functions under section 3.36(2) of the Act subject to the following:
 - (a) the planning proposal authority has satisfied all the conditions of the Gateway determination;
 - (b) the planning proposal is consistent with section 9.1 Directions or the Secretary has agreed that any inconsistencies are justified; and
 - (c) there are no outstanding written objections from public authorities.
7. The time frame for completing the LEP is to be **12 months** following the date of the Gateway determination.

Dated 18th day of August 2020.

INNOVATIVE

ITEM NUMBER	17.4
SUBJECT	FOR APPROVAL: Post Exhibition - Outcomes of two Planning Proposals and three DCP amendments for various matters in Epping
REFERENCE	F2021/00521 - D08025044
REPORT OF	Team Leader Land Use Planning
PREVIOUS ITEMS	18.5 - FOR APPROVAL: Gateway Request: Planning Proposal - 2-8 & 1-7 Rosebank Avenue, Epping - Council - 08 Oct 2019 6:30pm 14.5 - Epping Town Centre Traffic Study and other Epping Planning Review Matters - Council - 09 Jul 2018 6.30pm 11.3 - Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2 - Council - 14 Aug 2017 6:00pm 18.6 - FOR APPROVAL: Gateway Request: Planning Proposal - Various properties in Rockleigh Way, Pembroke and Essex Streets, Epping - Council - 08 Oct 2019 6:30pm

PURPOSE:

For Council to consider the post-exhibition outcomes for Planning Proposals for East Epping and Rosebank Avenue, Epping, and draft amendments to the Hornsby Development Control Plan (DCP) 2013 for various matters in Epping. To seek Council's endorsement to:

- forward the Planning Proposals to the Department of Planning, Industry and Environment (DPIE) for finalisation; and
- finalise the amendments to the Hornsby DCP.

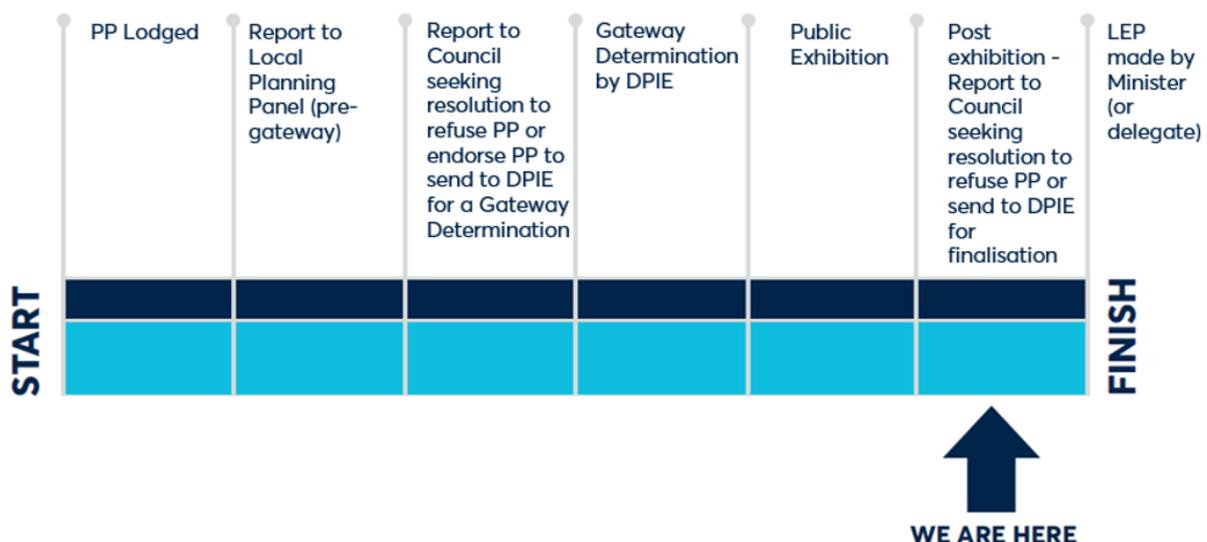

RECOMMENDATION

- (a) **That** Council receives and notes the submissions received during the public exhibition of the East Epping and Rosebank Avenue Planning Proposals and the draft amendments to the Hornsby Development Control Plan 2013 which are summarised at **Attachment 2**.
- (b) **That** Council endorse for finalisation the planning proposal relating to the following various properties in East Epping (provided at **Attachment 3**) which seeks to amend *Hornsby Local Environmental Plan 2013* as follows:
- For sites 2 to 24 Rockleigh Way, 3 to 7 and 4 to 8 Brenda Way, and 5A Essex Street:
 - Amend the zoning from R4 High Density Residential to R3 Medium Density Residential.
 - Amend the maximum building height from 17.5 metres to 11 metres.
 - Apply a maximum Floor Space Ratio (FSR) of 0.6:1, noting there is no existing FSR control for the sites.
 - For sites at 1 to 31 Rockleigh Way:
 - Amend the maximum building height from 12 metres to 11 metres.
 - Apply an FSR of 0.6:1, noting there is no existing FSR control for the sites.

- iii. For sites at 21-29 Essex Street:
 - Amend the maximum building height from 17.5 metres to 11 metres.
 - Apply an FSR of 0.8:1, noting there is no existing FSR control for the sites.
 - iv. For sites at 23 to 23A Pembroke Street:
 - Amend the zoning from R3 Medium Density Residential to R4 High Density Residential.
 - Amend the maximum building height from 12 metres to 11 metres.
 - Apply an FSR of 0.8:1, noting there is no existing FSR control for the sites.
- (c) **That** Council endorse for finalisation the planning proposal for 1-7 and 2-8 Rosebank Avenue, Epping (provided at **Attachment 4**) which seeks to amend *Hornsby Local Environmental Plan 2013* as follows:
- i. Remove the Heritage Conservation Area notation (as it applies to these properties).
 - ii. Amend the zone from R2 Low Density Residential to R4 High Density Residential.
 - iii. Amend the maximum building height from 8.5m to 11m.
 - iv. Apply a maximum FSR to 0.8:1, noting there is no existing FSR control for the sites.
- (d) **That** Council forward the East Epping and Rosebank Avenue Planning Proposals to the Department of Planning, Industry and Environment for finalisation.
- (e) **That** Council endorse for finalisation the exhibited amendments to the Hornsby Development Control Plan 2013 which seek to introduce a provision to facilitate widening of the Forest Grove/Essex Street pedestrian link in the event of redevelopment (provided at **Attachment 5**) and that the amendments come into effect 6 weeks from the date of the public notice of Council's decision to allow sufficient time to liaise with Hornsby Council.
- (f) **That** Council endorse for finalisation amendments to the Hornsby Development Control Plan 2013 which seek to introduce minor corrections to the Epping Town Centre car parking provisions, subject to the amendment which clarifies that the controls apply to the City of Parramatta local government area (provided at **Attachment 6**) and that the amendments come into effect 6 weeks from the date of the public notice of Council's decision to allow sufficient time to liaise with Hornsby Council.
- (g) That Council introduce design controls to support the Rosebank Avenue Planning Proposal to encourage an improved heritage interface with associated setbacks and planting (provided at **Attachment 7**), subject to the inclusion of the following amendments:-
- i. introducing an additional control relating to location of balconies on, and requiring screening of, upper level balconies for new development on 5 and 7 Rosebank Avenue;
 - ii. introducing an additional control limiting balcony intrusions into setbacks Rosebank Avenue; and

- iii. introducing an additional control that require the protection of existing street trees in Rosebank Avenue;
with the controls to come into effect upon finalisation of the Rosebank Avenue Planning Proposal.
- (h) **That** Council authorises the Chief Executive Officer to make any minor amendments and corrections of a non-policy and administrative nature that may arise during the plan amendment process relating to the Planning Proposals and the Hornsby Development Control Plan 2013, including minor amendments which differentiate the controls that apply to the City of Parramatta Council and Hornsby Council local government areas.
- (i) **Further**, that Council note the advice of the Local Planning Panel (provided at **Attachment 1**) is consistent with the Council officer’s recommendation.

PLANNING PROPOSAL TIMELINE

BACKGROUND

1. On 14 March 2014, the (then) Department of Planning and Environment (Department) finalised the Epping Urban Activation Precinct amendments to the Hornsby and Parramatta Local Environmental Plans via State Environmental Planning Policy (Epping Town Centre) 2013. The planning controls provided for capacity for approximately 10,000 additional dwellings, a revitalised commercial and retail core adjacent to a major transport hub and established four new Heritage Conservation Areas, including the East Epping and the Rosebank Avenue Heritage Conservation Areas.
2. In December 2016, the Epping Planning Review was commenced by the City of Parramatta Council. The scope of the review was to address the unintended consequences of the planning control amendments brought into effect in March 2014 as well as allowing Council to manage current (formal and preliminary) Planning Proposals seeking additional growth within the Town Centre. It also allowed the City of Parramatta Council to progress matters considered by the former Hornsby Shire Council, including heritage matters.

3. On 9 July 2018, a report was presented to Council on the findings of Stage 1 of the Epping Planning Review. At this meeting the Council resolved (in part) to prepare planning proposals for the following properties in order to address the adverse impacts of high-density development on adjoining Heritage Conservation Areas (HCAs):

- a) Relating to properties adjoining the East Epping Heritage Conservation Area:

“That a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments as follows:-

- (i) *Rockleigh Park Precinct; controls consistent with the recommendations in the body of this report*
- (ii) *In the Norfolk, Pembroke, Essex Street area the planning controls be retained (including the Heritage Conservation Area notation) for 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke (ie retain the existing R2 Low Density Residential zoning and the existing Height of Building controls of 8.5m) and instead amend the controls for the following sites as follows:-*

- *21, 23, 25, 27 and 29 Essex Street amend the zoning from R4 High Density Residential to R3 Medium Density Residential with maximum height permitted on these sites to be amended from 17.5m to 11m (to allow for apartment building development no greater than 3 storeys on these sites); and*
- *The height of building control for 23, 23A Pembroke be reduced from 12m to 11m with the existing zoning of Residential R3 Medium Density Residential to be retained for these two sites;*

and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.”

- (b) Relating to Properties at 2-8 and 1-7 Rosebank Avenue:

That *a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments for 2 - 8 Rosebank Ave and 1 - 7 Rosebank Ave as follows:*

- (i) *Remove the Heritage Conservation Area notation from these sites;*
- (ii) *Rezone the sites from Residential R2 Low Density Residential to R3 Medium Density Residential; and*
- (iii) *Amend the permitted height of building for these sites from 8.5m to 11m (to allow for apartment building development no greater than 3 storeys on these sites).*

All other sites in Rosebank Avenue should retain their existing planning controls including the Heritage Conservation Area notation and that the Planning Proposal and associated material shall be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal

4. In line with the Council resolution of 9 July 2018, Council has prepared and subsequently endorsed planning proposals to address heritage interface issues for various properties in East Epping (in Rockleigh Way, Essex and Pembroke Streets) and Rosebank Avenue, Epping. The Planning Proposals have received Gateway Determinations from the DPIE and subsequently been placed on public exhibition. **Table 1** provides a summary of the relevant milestones relating to the Planning Proposals and proposed amendments to the Hornsby DCP 2013.

Table 1: Summary Table of Decisions

Matter	Date	Milestone
East Epping Planning Proposal	17 September 2019	Local Planning Panel advised that the Planning Proposal to be forwarded to DPIE for Gateway Determination
	8 October 2019	Council resolved that the Planning Proposal to be forwarded to DPIE for Gateway Determination
	10 January 2020	Gateway Determination issued by DPIE
	9 June 2020 Council Meeting	Council consider amendments to the Planning Proposal following Gateway Determination and consistency with the Harmonisation Planning Proposal
	3 August 2020	Gateway amendment issued by DPIE
	19 August to 25 September 2020	Public Exhibition of Planning Proposal
	19 May 2021	Gateway Amendment issued by DPIE granting extension to report and submit the Planning Proposal for finalisation
Rosebank Avenue Planning Proposal	17 September 2019	Local Planning Panel advised that the Planning Proposal to be forwarded to DPIE for Gateway Determination
	8 October 2019	Council resolved that the Planning Proposal to be forwarded to DPIE for Gateway Determination
	10 January 2020	Gateway Determination issued by DPIE
	12 March 2020	Council Officers sought formal request to amend to remove Condition 1 of Gateway Determination which related to a reduction in height than that sought. This is detailed in paragraphs 49 to 51 below.
	30 March 2020	Gateway Determination with amendment issued by DPIE
	19 August to 25 September 2020	Public Exhibition of Planning Proposal
	19 May 2021	Gateway Amendment issued by DPIE granting extension to report and submit the Planning Proposal for finalisation
Draft Amendments to the Hornsby DCP 2013	9 June 2020 Council Meeting	Council resolved to place the draft DCP amendments on public exhibition. These amendments relate to pedestrian link between Forest Grove and Essex St; controls to support the Rosebank Avenue Planning Proposal; and minor amendments to car parking controls.
	19 August to 25 September 2020	Public Exhibition of Draft DCP Amendments

5. Following the public exhibition period, this matter was reported to the Local Planning Panel on 18 May 2021. The Panel's advice is that the Planning Proposals be reported to Council in accordance with the Council Officer

recommendation included in the Local Planning Panel report (refer to **Attachment 1**).

PLANNING PROPOSALS

East Epping Planning Proposal

6. This planning proposal aims to manage the impacts of development adjacent to the East Epping Heritage Conservation Area by reducing the maximum height of building controls for properties along Essex Street and Pembroke Street and to amend the planning controls in order to prevent the development of residential flat buildings in Rockleigh Park Precinct. The Planning Proposal for East Epping is found at **Attachment 2**.
7. **Table 2** below summarises the existing controls under the *Hornsby Local Environmental Plan (LEP) 2013* that apply to the subject properties and the proposed controls as contained in the East Epping Planning Proposal.

Table 2: East Epping Planning Proposal - Summary of current planning controls and proposed amendments

Subject sites	Hornsby LEP 2013 – current controls	Planning Proposal - proposed controls
1 to 31 Rockleigh Way (northern part of Rockleigh Park precinct)	<ul style="list-style-type: none"> R3 Medium Density Residential Maximum building height of 12 metres; and No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> (No changes to land use zoning) Maximum building height of 11 metres; and Maximum floor space ratio of 0.6:1
2 to 24 Rockleigh Way, 3 to 7 and 4 to 8 Brenda Way, and 5A Essex St (southern part of Rockleigh Park precinct)	<ul style="list-style-type: none"> Zoned R4 High Density Residential; maximum building height of 17.5 metres; and No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> R3 Medium Density Residential Maximum building height of 11 metres; and Maximum floor space ratio of 0.6:1
21-29 Essex Street	<ul style="list-style-type: none"> Zoned R4 High Density Residential; Maximum height of buildings of 17.5 metres; and No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> Maximum building height of 11 metres; and Maximum floor space ratio of 0.8:1
23-23A Pembroke Street	<ul style="list-style-type: none"> Zoned R3 Medium Density Residential; Maximum building height of 12 metres; and No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> R4 High Density Residential Maximum building height of 11 metres; and Maximum floor space ratio of 0.8:1

8. The proposed controls contained in the East Epping Planning Proposal have been prepared to be consistent with Council's Harmonisation Planning Proposal (the proposal to consolidate into one LEP a set of controls that will replace the current 5 LEPs that apply across the LGA) as follows:

- i. Application of a 11 metre height limit to R3 Medium Density zoned land across the LGA; and
 - ii. Application of a FSR in those R4 High Density Residential and R3 Medium Density zoned land, where Hornsby LEP 2013 does not nominate a FSR.
9. Further, it is noted that there is a transitional issue that impacts on the planning proposal as it seeks to rezone the Rockleigh Park Precinct from R4 High Density Residential to R3 Medium Density Residential under Hornsby LEP 2013. Currently residential flat buildings are permissible in both of these zones. Under the Harmonisation Planning Proposal, endorsed by Council, this precinct will remain zoned R3 Medium Density Residential however residential flat buildings will not be permitted, instead, townhouses will be the highest density residential form permitted. The Rockleigh Park Precinct is a transition area. As can be seen in Figure 1 below the area immediately to the east is R2 Low Density Residential Zoned land. A set of controls that ultimately limits this transition area to town house rather than apartment building development is considered the most appropriate transition.
10. **Figures 1 to 5** below illustrate the proposed amendments to the land use zoning, height of buildings and floor space ratio as part of the East Epping Planning Proposal.

Figure 1 East Epping Planning Proposal - Current land use zoning applying to sites adjacent the Epping East HCA

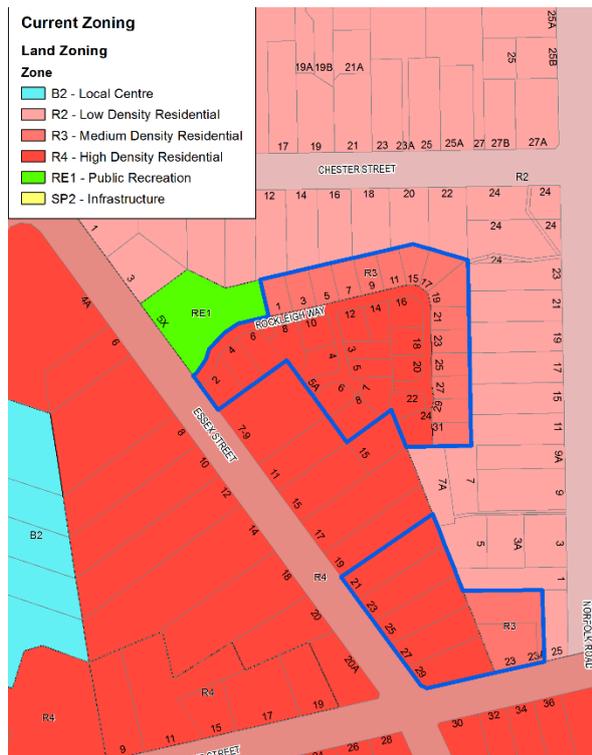

Figure 2 East Epping Planning Proposal - Proposed amendments to the land use zoning

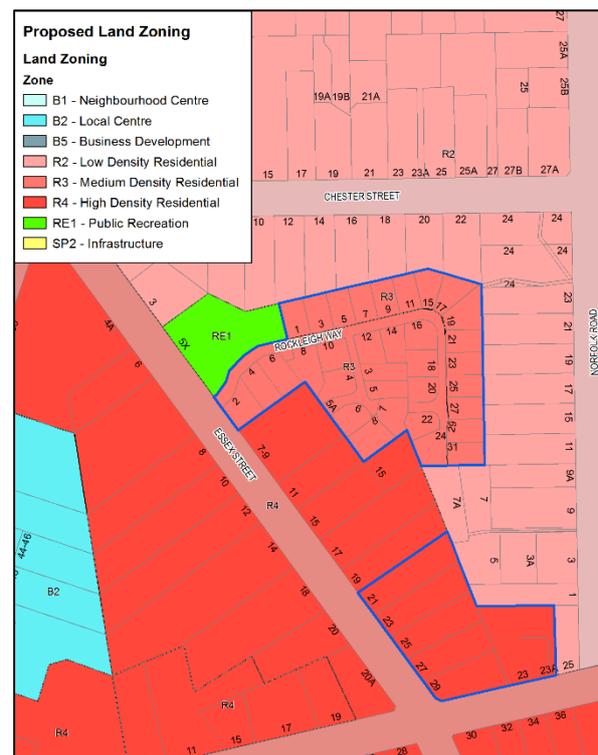

Figure 3 East Epping Planning Proposal - Current height of buildings

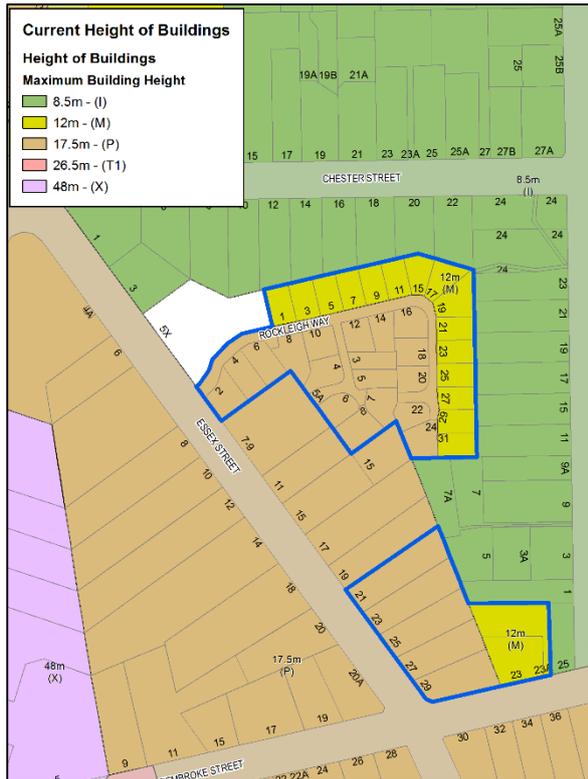

Figure 4 East Epping Planning Proposal - Proposed amendments to the height of buildings

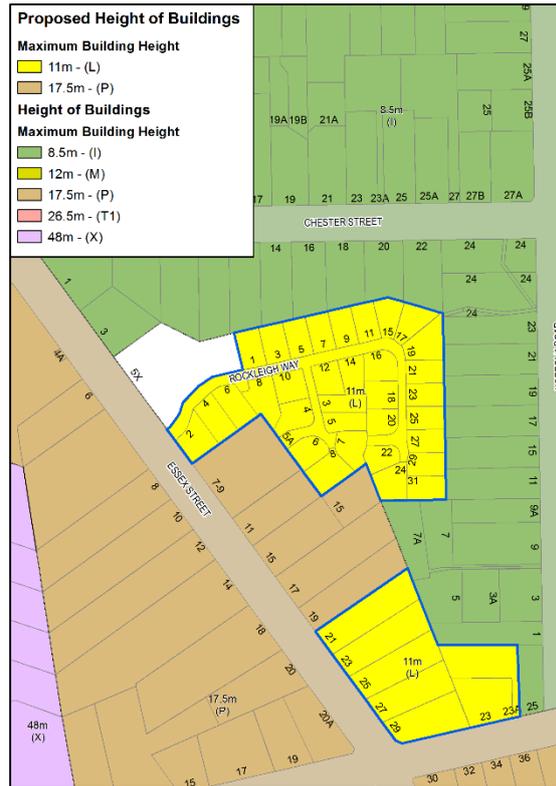

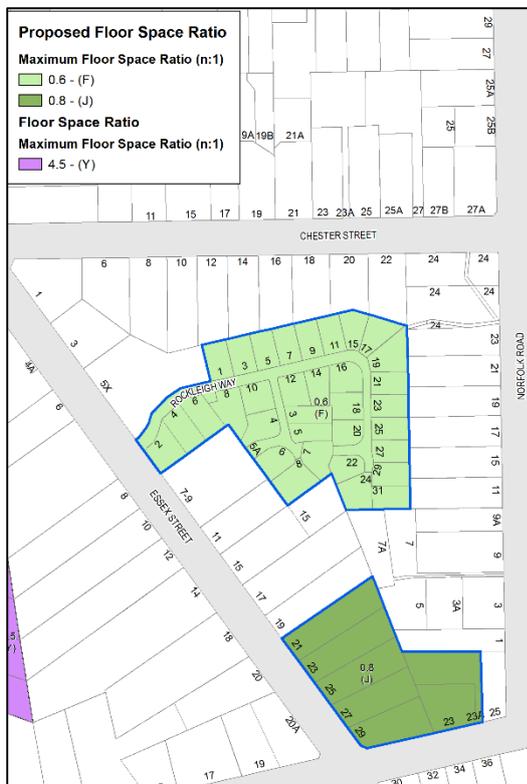

Figure 5 East Epping Planning Proposal – Proposed amendment to floor space ratio

Planning Proposal at 2-8 and 1-7 Rosebank Avenue, Epping

11. The planning proposal aims to address the adverse impacts of adjacent high density residential development and allow a more sympathetic transition to the

Rosebank Avenue Heritage Conservation Area. In order to achieve the desired objectives the following amendments to the Hornsby LEP 2013 would need to be made as they relate to land at 2 – 8 and 1 – 7 Rosebank Avenue, Epping:

- a) Amend the Land Zoning Map from R2 Low Density Residential to R4 High Density Residential;
- b) Amend the Maximum Height of Buildings Map from 8.5 metres to 11 metres;
- c) Apply a Floor Space Ratio of 0.8:1 (noting that no FSR currently applies); and
- d) Remove the Rosebank Heritage Conservation Area notation.

The Planning Proposal for Rosebank Avenue is found at **Attachment 3**.

12. **Figures 6 to 10** below illustrate the proposed amendments to the land use zoning, height of buildings, floor space ratio and heritage conservation area as part of the Rosebank Avenue Planning Proposal.

Figure 6: Existing R2 Low Density Residential Zoning (subject sites outlined in blue)

Figure 6: Existing Maximum Height of Building of 8.5 metres (subject sites outlined in blue)

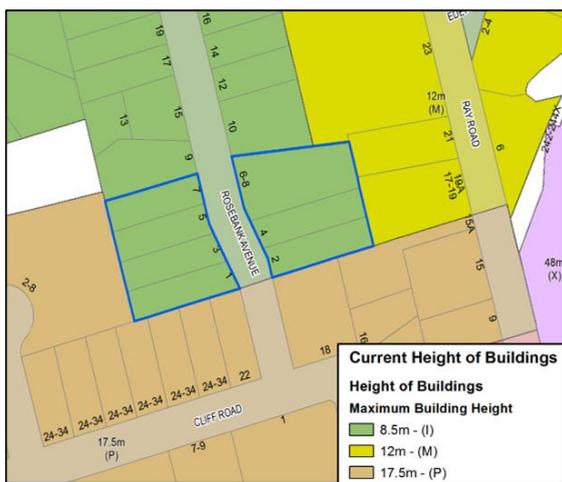

Figure 7: Proposed amendment to Land Use Zoning to R4 High Density Residential Development (subject sites outlined in blue)

Figure 7: Proposed amendment to Maximum Height of Buildings to 11 metres (subject sites outlined in blue)

Figure 8: Proposed amendment to Maximum Floor Space Ratio Map, applying 0.8:1 FSR noting no current FSR (subject sites outlined in blue)

Figure 9: Current Heritage Conservation Area and heritage items (subject sites outlined in blue)

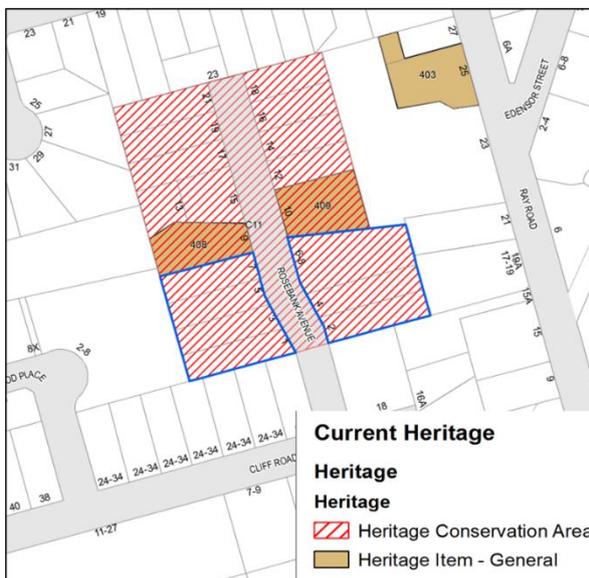

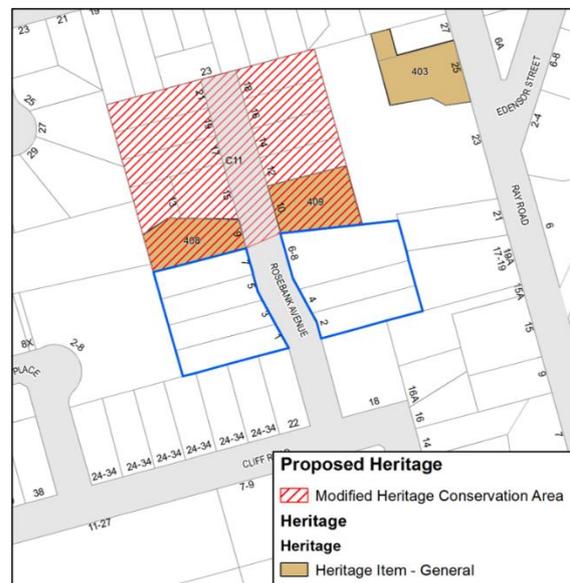

Figure 10: Proposed amendment to the Rosebank Avenue Conservation Area (subject sites outlined in blue)

DRAFT AMENDMENTS TO HORNSBY DEVELOPMENT CONTROL PLAN 2013

13. The following draft amendments are proposed to the Hornsby Development Control Plan (Hornsby DCP 2013):
 - a) Insert a provision to facilitate widening of the Forest Grove/Essex Street pedestrian link in the event of redevelopment;
 - b) Design controls to support the Rosebank Avenue Planning Proposal; and
 - c) Minor corrections to the Epping Town Centre car parking provisions (no policy implications).

14. Each of the draft DCP amendments are described in turn below and are found at **Attachments 5, 6 and 7** of this Report. If endorsed by Council, the amendments will be published on Council’s website and be formally made to the Hornsby DCP 2013.

Forest Grove/ Essex Street Pedestrian Link

15. The amendments to Section 3 of the Hornsby DCP 2013 are presented in **Attachment 5** and include amendment to the relevant DCP figures containing the Forrest Grove/Essex Street Precinct to reflect the location of the existing pedestrian link and inserting supporting text “future widening of the pedestrian link to 3 metres, to allow for public domain improvements including seating and planting.” This amendment was first pursued in response to a Council resolution of 9 July 2018 and Council endorsed the Draft DCP for exhibition containing this change on 10 February 2020.

Figure 11: Existing Pedestrian link (shown in red) between properties 60 and 60A and 58 Essex Street and 19 and 15-17 Forest Grove

16. If redevelopment potential was realised in the long term, the widening would occur through land dedication from redevelopment of either side of the link, and would require between 0.75 metres and 0.6 metres width of dedication per property. This is not considered onerous for future high-density development, as it could be included within the setback area.

DCP controls to support the Rosebank Avenue Planning Proposal

17. A Gateway Determination was received from the Department of Planning, Industry and Environment on 10 January 2020. However, Condition 1 of the Gateway Determination reduced the proposed height of 11 metres (three storeys) to the existing height of 8.5 metres (two storeys) for 5, 7 and 6-8 Rosebank Avenue. Council Officers assessed the impact of Condition 1 and considered that it would potentially undermine the objectives of the planning proposal of delivering residential flat buildings. Subsequently, Council Officers wrote to the DPIE to ask that they consider amending Condition 1 and that alternative design controls (i.e. DCP controls) could be put in place to respect the interface with existing streetscape and heritage item.
18. An alteration to the Gateway Determination was issued by DPIE on 30 March 2020, revising Condition 1 to maintain the proposed 11 metres height (three storeys), however supporting DCP controls to respond to the adjoining heritage conservation area, as follows:

“Prior to public exhibition, amend the planning proposal to outline a suitable planning mechanism to ensure transition of height and scale to the adjoining land to the north and retain streetscape values. This may include the requirement to prepare a Development Control Plan that comes into force once the planning proposal is finalised.”

19. In accordance with Condition 1 of the Gateway Determination and Council resolution of 8 October 2019, draft amendments to Sections 3 and 9 of the Hornsby DCP are proposed for Rosebank Avenue are found at **Attachment 7**, and described as follows:
 - i. Provision of minimum setbacks at ground level and first and second levels which are designed to ensure a sympathetic transition to the adjoining heritage item and heritage conservation area as shown at **Figures 12 and 13** below.
 - ii. That the side setback will be designed to allow for trees to be retained and planted to maintain the landscape amenity and setting of adjoining heritage items and heritage conservation areas.
 - iii. Amendments to Section 3 to reduce the extent of the Rosebank Avenue Heritage Conservation Area.

Figure 12 Setback Controls for properties 1-3 and 5-7 Rosebank Avenue

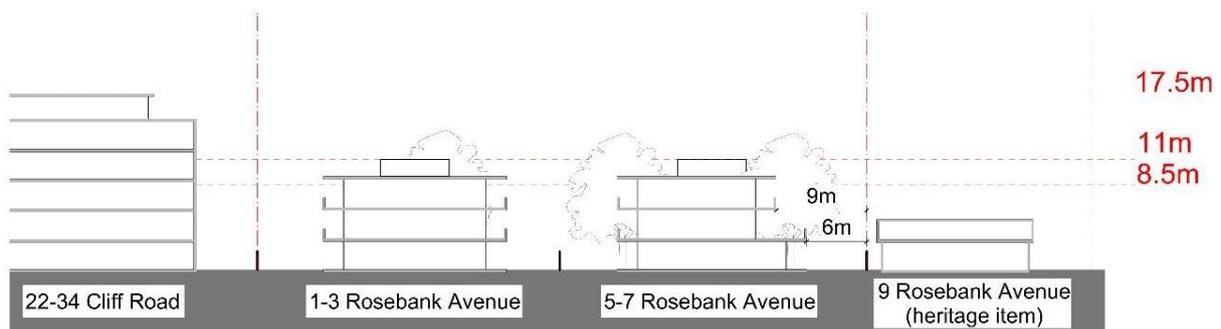

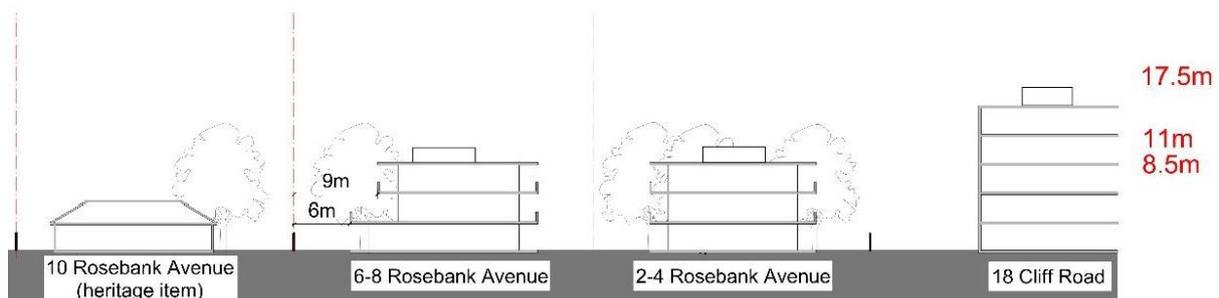

Figure 13 Setback Controls for properties 2-4 and 6-8 Rosebank Avenue

Car Parking Epping Town Centre - minor corrections

20. Council Officers have raised issues in relation to minor errors in Section 1C.2.1 Transport and Parking relating to car parking rates for Epping Town Centre. These minor errors are leading to some confusion as the application of car parking rates for Epping Town Centre (in Table 1C2.1(e) versus car parking

rates for the rest of Hornsby LGA (outlined in 1C.2.1(d)). The proposed amendments are detailed in **Attachment 6**.

21. Therefore, the proposed amendments to the Hornsby DCP 2013 are administrative in order to clarify the application of car parking rates, will not amend any car parking rates and aim to be consistent with the approach taken in Section 4.1 of the Parramatta DCP 2011 which relates to the part of the of Epping Town Centre west of the rail line.

PUBLIC EXHIBITION

22. The Rosebank Avenue and East Epping Planning Proposals and draft DCP amendments were publicly exhibited between 19 August and 25 September 2020. Supporting documentation including Gateway Determinations and amendments, Council minutes and reports and Planning Proposal and appendices were part of the exhibition package. It is noted that the Planning Proposal relating to Variation to Clause 4.6 Development Standards for FSR relating to residential accommodation in the Epping Town Centre was also placed on public exhibition during this time but this has previously been reported to the Panel and Council separately.
23. Public exhibition included:
 - Letters to all landowners and occupiers within the Epping Town Centre.
 - Letters to Hornsby Council, Transport for NSW and NSW Heritage (as required by the Gateway determination).
 - Exhibition materials placed on Council's website and in hard copy at Council's Customer Contact Centre at 126 Church Street, Parramatta and Epping Library.
24. Forty submissions were received during the public exhibition period. This included three from public agencies and 37 from community members. A summary of all submissions and Council officer responses is provided at **Attachment 1**. A summary of the key issues raised in submissions and Council officer responses are provided below.

KEY ISSUES RAISED IN SUBMISSIONS

East Epping Planning Proposal

Summary

25. A total of 22 submissions were received relating to the East Epping Planning Proposal. In summary:
 - Two (2) landowners within the Planning Proposal area which are summarised and detailed in **Attachment 2**;
 - Seventeen (17) community members outside of the area subject to the Planning Proposal which are summarised and detailed in **Attachment 2**;
 - Hornsby Council, Transport for NSW and Heritage NSW raised no objection to the Planning Proposal and Heritage NSW acknowledged that the rezoning of Rockleigh Park and the amendments to planning controls adjacent to the East Epping HCA are considered to have positive heritage outcomes.

Building height changes and associated impacts

26. During the exhibition period, numerous submissions raised concerns regarding the proposed changes to controls for the areas adjoining/transitioning to the East Epping Heritage Conservation Area. Submissions questioned the need to reduce the building heights, with others noting the reductions are not enough and the impacts of interface issues of solar access, privacy issues, screening, and noise will remain.
27. The objective of the East Epping Planning Proposal is to provide a more consistent and appropriate built form transition for land adjoining the HCA through reductions in the permitted building heights. The planning proposal aims to reduce current height controls as follows:
 - a) 5A and 21-29 Essex Street - it is proposed to reduce the height of buildings from 17.5 metres to 11 metres.
 - b) 23-23A Pembroke Street - it is proposed to reduce the height of buildings from 12 metres to 11 metres.
 - c) 2-24 Rockleigh Park, 3-7 and 4-8 Brenda Way - it is proposed to reduce the height of buildings from 17.5 metres to 9 metres.
28. It is considered that the proposed reduction in height is the most appropriate response to the transition from high density residential areas to the adjacent heritage conservation areas. A reduction in building height will ensure that any future redevelopment of the site can provide a more appropriate interface to the heritage conservation area that is currently enabled by the current controls.
29. Furthermore any future development applications on these sites will need to be assessed against the Hornsby DCP 2013 and the NSW Apartment Design Guide (ADG) to ensure that amenity impacts are suitably managed, including any impacts on adjoining neighbour solar access, privacy and outlook are minimised through adequate building separation and landscaping.

Traffic and parking

30. Concerns were raised over the potential traffic impact which may result from the proposed change in zoning for 23 and 23A Pembroke Street from R3 Medium Density Residential to R4 High Density Residential. The submission highlighted existing traffic problems exacerbated by the Epping Public School adjacent to the site.
31. The effective permissible density on 23 and 23A Pembroke Street is unchanged by the Planning Proposal. The proposed land use zoning under the Planning Proposal from a R3 Medium Density zoning to a R4 High Density zoning ensures that residential flat buildings remain permissible on these properties. This is because the R3 Medium Density Residential Zone in the Hornsby LEP 2013 currently permits residential flat buildings with development consent, it is the intention of Council through the harmonisation of its planning controls, to restrict residential flat buildings to the R4 High Density Residential Zone. A R4 High Density Residential Zone in this location would ensure a straightforward translation of land use zone upon a newly consolidated Parramatta LEP whilst achieving the intended purpose of reducing the maximum height limit for residential flat buildings on these subject properties.

32. The Epping Planning Review acknowledged that traffic congestion issues have arisen since the NSW Government's rezoning in 2014 and the unprecedented rate of development within the Epping Town Centre. The Epping Town Centre Traffic Study undertaken in 2017 concluded that traffic will continue to deteriorate, even with potential local and State road improvements in place. Council is progressing a series of other actions to assist with addressing traffic issues in the Epping town centre, including implementing a range of local and State road improvement works and other planning controls.

Consistency with surrounding heritage controls

33. Various submissions identify concerns with the changes to the zoning for land within the East Epping Planning Proposal, namely along Pembroke Street. Concerns over changes to zoning leading to increased density and the possible interface impact on the adjoining property at 25 Pembroke Street which remains within the East Epping Heritage Conservation Area. Submissions note that the zoning is inconsistent with other properties within the East Epping Heritage Conservation Area and adjacent land.
34. It is noted that land within the East Epping Heritage Conservation Area already adjoins R4 zoned land. The intended outcome of the Planning Proposal is to provide a more consistent and appropriate built form transition. In achieving this a stepped built form interface was considered by Council as the best means of achieving the intended objective of the Planning Proposal. Further, and as noted above, residential flat buildings will remain a permitted use at Essex and Pembroke Streets, however at a reduced height (or scale).

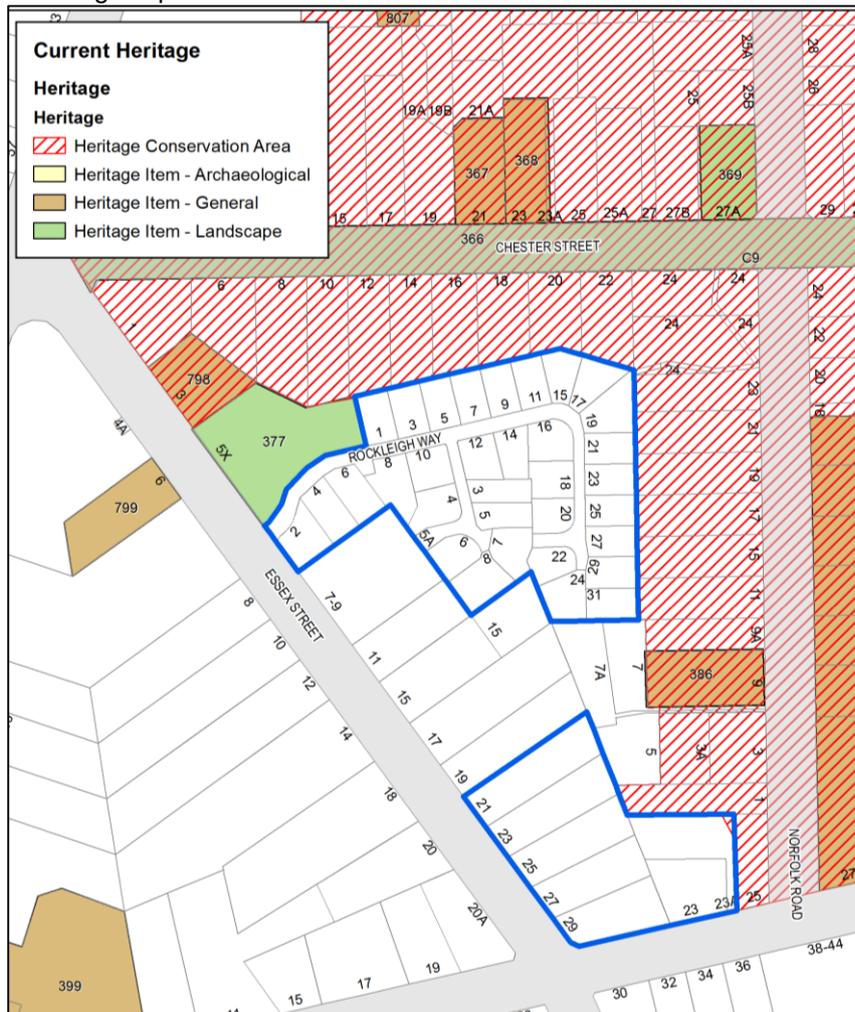

Landowner submission – impact on property value and inconsistent treatment

35. A submission from a property owner within the Planning Proposal area objected to the East Epping Planning Proposal on the grounds of a decrease in immediate land value resulting from the reduction in building height. The submission argues that it is an inequitable treatment of surrounding properties - citing examples at 7-9, 10, 15-19 and 22-26 Essex Street and 1-7, 2-4 and 9-11 Crandon Road.
36. Council accept that the Planning Proposal will reduce residential capacity. The purpose of the Planning Proposal is to address transitional issues arising from NSW Government rezoning of the Epping Town Centre in 2014 and impacts on adjacent heritage conservation areas.
37. In relation to the issues raised in relation to inequitable and inconsistent height limits. The properties cited by the submitter listed all have a maximum building height of 17.5m under the Hornsby LEP 2013. The reason the cited properties have not been included in the Planning Proposal are as follows:
- i. Properties at 10, 22-26 Essex Street and 1-7, 9-11 and 2-4 Crandon Road are not at the 'interface' (or adjoining) the East Epping HCA, and their inclusion in the Planning Proposal would not specifically meet the purpose which is to address issues of development interface with Heritage Conservation Areas (HCA). Refer **Figure 18** for the location of the Essex Street properties and the East Epping HCA.
 - ii. At the time Council resolved at its meeting on 9 July 2018 to prepare a Planning Proposal relating to various properties in East Epping, 7-9 Essex

Street had a development approval (approved by Hornsby Council on 11 March 2015 reference DA/1110/2014) for the construction of a 5 storey residential flat building, and therefore the development (now constructed) realised the planning controls relating to the site.

- iii. In relation to 15-19 Essex Street a pre-lodgment application was submitted with Council for the construction of a 6 storey residential flat building. It is noted that the subsequent development application (reference DA/546/2018) lodged with Council was subject to an appeal to the NSW Land and Environment Court and subsequently refused.

Figure 18: East Epping Heritage Conservation Area and the properties subject to the East Epping Planning Proposal

Submissions in relation to the Planning Proposal and Draft DCP Amendments for Rosebank Avenue, Epping

Summary

- 38. A total of 20 submissions were received in relation to the Rosebank Avenue Planning Proposal and associated draft DCP controls. In summary:
 - Two (2) landowners within the Planning Proposal area were in supportive of the proposed controls;
 - Five (5) landowners of Rosebank Ave (but outside of the area subject to the Planning Proposal) object to the Planning Proposal based on various

reasons which are summarised and addressed below and detailed in **Attachment 2**;

- Ten (10) community members (and the Epping Civic Trust) objected based on various reasons which are summarised and addressed below and detailed in **Attachment 2**; and
- Hornsby Council, Transport for NSW and Heritage NSW raised no objection to the Planning Proposal or draft DCP amendments. Heritage NSW acknowledged this was a local matter and recommended that the design controls be considered so as to not further impact on adjoining heritage items or HCA.

39. Although the majority of submissions objected to the proposal, it is noted these were from owners living in Rosebank Avenue (but outside the Planning Proposal area) or a community member. Specifically, the submissions of support were received from landowners subject to the Planning Proposal, who are currently experiencing the amenity impacts caused by the adjacent high density development.

Density and associated traffic impacts

40. Submissions raised concerns over further increase in development intensity, and the resultant traffic impact. Some submissions believe that there will be adverse impact from additional vehicles on the intersection performance of Cliff Road and Carlingford Road, and the Carlingford Road intersections with Ray/Rawson Street, and Beecroft Road.
41. The planning controls proposed under the Planning Proposal may result in approximately 67 units being accommodated over the sites, resulting in overall addition of 60 dwellings. On balance, this is considered reasonable to increase density in this location to address the severe amenity impacts currently experienced by residents. In addition, land where density is proposed to be increased is located appropriately 400 metres and 650 metres respectively from the Epping Town Centre and high frequency public transport infrastructure.
42. Regarding the submissions on traffic impacts, the Epping Planning Review acknowledged that traffic congestion issues have arisen since the NSW Government's rezoning in 2014 and the unprecedented rate of development within the Epping Town Centre. The Epping Town Centre Traffic Study undertaken in 2017 concluded that traffic will continue to deteriorate, even with potential local and State road improvements in place. Council is progressing a series of other actions that Council to assist with addressing traffic issues in the Epping town centre, including implementing a range of local road improvement works, advocating for NSW Government road improvements, and other planning measures including:
- A planning proposal to 'switch off' Clause 4.6 variations which seek increased density on residential within the Town Centre.
 - Amendments to car parking rates in the DCP.
 - Advocating to the State Government for road and intersection improvements.

Impact on Heritage

43. Submissions received noted that the reduction of the heritage conservation area is inconsistent with Ministerial Direction Heritage Conservation and the recommendations of the Epping Town Centre (East) Heritage Review 2017 and requested that the Heritage Conservation Area be retained.
44. The Planning Proposal acknowledges that it is not consistent with Direction 2.3 - Heritage Conservation. The planning proposal is considered appropriate as it will help to resolve interface issues and community concerns. In addition, the area of the HCA to be retained reflects the heritage values recognised in the Statement of Significance for the HCA and will retain a highly intact interwar streetscape.
45. During the Epping Planning Review, extensive feedback was received from landowners and the community on the Rosebank Avenue Heritage Conservation Area and the options presented to mitigate the interface issues from the adjoining development. It noted that the submissions were divided in opinion as to how the interface issue should be managed.
46. On 9 July 2018, a report was presented updating Council on the implications for the findings of the Epping Planning Review, including further assessment work undertaken for Rosebank Avenue HCA. In summary, the Council report stated that interface issues represent a failure of the planning system which has created a current land use conflict. They are a result of the Priority Precinct process and subsequent development application decisions. The current situation where 5 to 6 storey buildings overlook and encroach on the backyards of single dwellings is considered unacceptable. As part of this report, Council Officers undertook further urban design testing of higher residential densities such as manor homes or 3 storey residential flat buildings to replace existing detached dwelling development in the Rosebank Avenue HCA and other heritage interface areas.
47. In conclusion, Council accepted that there are severe interface issues occurring in the southern half of the Rosebank Avenue Heritage Conservation Area. Following consideration by Council it resolved to retain the northern part of the conservation area but to remove the southern part and to rezone this area for higher density residential development.
48. The Epping Town Centre (East) Heritage Review 2017 concluded Rosebank Avenue HCA to have maintained the significance and intactness established in previous studies and was recommended to be retained in full. However, the Review did not fully address the land use conflicts occurring at the interface at the rear some of these properties and strong community concerns raised in the Epping Planning Review.

Amendment of proposed building height as part of the Gateway Determination

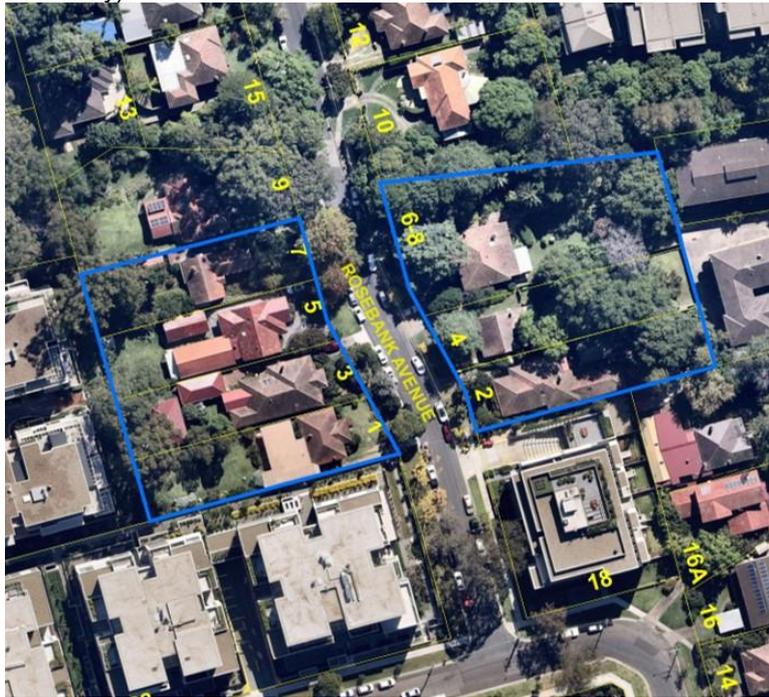

49. Submissions received during the exhibition period raised concern that the original Gateway Determination issued by DPIE had been amended, which had required under Condition 1 to reduce building heights for 5, 7 and 6 to 8 Rosebank Avenue from a maximum of 11 metres to a maximum of 8.5 metres.
50. Following this Council Officers formally requested DPIE for this condition to be amended amendment for the following reasons:

- i. Reducing the height of buildings on these sites will reduce incentives for amalgamation for a residential flat building and may result in delivery of multi-unit dwellings (town houses), which would likely result in reduced setbacks, greater site coverage and potential additional tree loss (compared to a residential flat building).
 - ii. The planning proposal is supported by draft DCP controls with any new residential flat building being required to be setback to the boundary 6 metres at ground level and 9 metres at the second and third storeys. This would create a stepped built form interface appropriate transition between it and the Heritage Conservation Area.
51. DPIE then subsequently issued an alteration on 30 March 2020 requesting that Council “*prior to public exhibition, amend the planning proposal to outline a suitable planning mechanism to ensure transition of height and scale to the adjoining land to the north and retain streetscape values. This may include the requirement to prepare a Development Control Plan that comes into force once the planning proposal is finalised.*” Council has prepared a Draft DCP for the Rosebank Avenue planning proposal which supports this proposal.

Issues raised by 9 Rosebank Avenue

52. During the public exhibition period, the owners of 9 Rosebank Avenue requested the following issues be addressed:
- A greater ground level setback within the Draft DCP for any new development from the boundary of 9 Rosebank Ave to reduce any adverse impact of privacy and heritage.
 - That the proposed FSR be reduced from 0.8:1 to 0.6:1 on the grounds of reducing traffic generation, reduce building form and impact on heritage item and potential to increase front setback to view 9 Rosebank Avenue.
 - Potential inclusion in the Planning Proposal as the creek line forms a natural boundary and that the proposal will have a detrimental impact on the heritage item.
 - They also requested an onsite meeting with Ward Councillors and Council staff.
53. The property is listed as a locally significant item under Schedule 5 of the Hornsby LEP 2013. **Figure 14** shows an aerial image showing the location of 9 Rosebank Avenue in relation to the property and Planning Proposal boundaries.

Figure 14: Aerial image of properties at Rosebank Avenue (blue outline indicating planning proposal boundary)

- 54. In response to the landowner’s request, on 16 December 2020, Council staff and local Councillors met the owners on site at 9 Rosebank Avenue to discuss the Planning Proposal and the landowners concerns.
- 55. Following the request to increase setbacks by the landowner, Council’s Urban Designers undertook built form testing to understand the implications of increasing setbacks and reducing FSR (referred to as ‘Option B’). The testing found that a 9 metre ground setback (increased from 6 metres) and 12 metre upper level setback (increased from 9 metres) between 5-7 Rosebank Ave and the boundary of 9 Rosebank Ave would result in a reduction of the achievable FSR on 5 and 7 Rosebank Avenue from the proposed 0.8:1 to between 0.6:1 to 0.65:1 (refer **Figures 15 and 16**). In terms of development yield, it is estimated that this would reduce the potential number of apartment units from 15 units to 12 units.

Figure 15 - Option B Section showing proposed built form transition to heritage item (note increased distance of setbacks between 5-7 Rosebank Ave to 9 Rosebank Ave as compared to Figure 12)

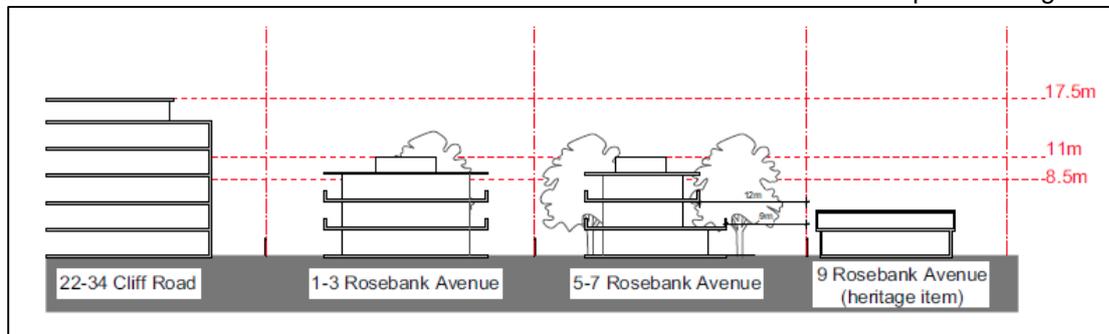

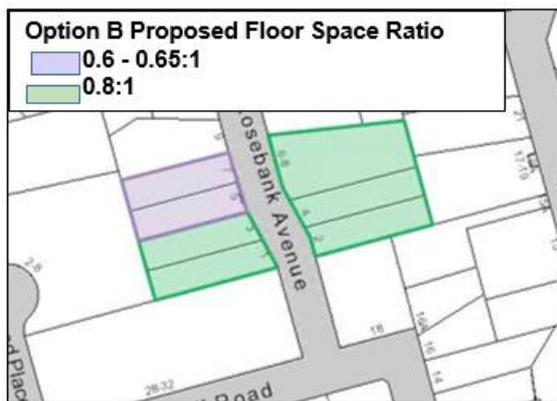

Figure 16 - Option B reduction in proposed floor space ratio of 0.6-0.65:1 for 5 & 7 Rosebank Avenue

56. On 28 January 2021, Council Officers addressed letters to the landowners of 5 and 7 Rosebank Avenue to give them an opportunity to respond to 'Option B' as these are the landowners that would be impacted with a reduced setback compared to the FSR that was placed on exhibition. On 18 February 2021 Council staff meet with the owners of 5 and 7 Rosebank Avenue to explain the proposed Option B and give them a further opportunity to respond. Subsequently the owners of 5 Rosebank Avenue submitted a formal response and, in summary, raised the following concerns in relation to this option:
- i. It is inequitable to have a different FSR than those proposed for adjoining properties;
 - ii. A dual occupancy or dwelling house could be constructed with a 1.5 metre setback to the side boundary, with greater impacts than what is proposed.
 - iii. The five and six storey developments are already impacting the character of the area.
 - iv. The boundary between 9 and 7 Rosebank Avenue is brick and the main orientation of the dwelling house at 9 Rosebank Avenue is east and west, therefore will not be impacted by privacy.
 - v. The heritage study relating to the 9 Rosebank Ave listing does not reference a separation or sense of place that should be preserved, rather a reference to the dwelling's character and architectural style.
 - vi. A reduced setback and FSR will impact on development viability at 5 and 7 Rosebank Avenue.
57. Council Officers have considered the issues raised by both landowners and provide the following response and recommendations.
58. Reducing the proposed FSR (density) may reduce the incentive for land amalgamation for the purposes of constructing a residential flat building, thereby leading to unintended consequences, such as redevelopment for uses other than residential flat buildings such as townhouses or multi-unit dwellings. Given the site-specific controls relating to greater setback provisions have been drafted to apply to residential flat buildings, should redevelopment occur for other uses these controls would not apply, thus reducing opportunities for deep soil planting and appropriate transition to the heritage conservation area.

59. Although an increased front setback would provide an opportunity to view the heritage item at 9 Rosebank Avenue, it would have the related effect of reducing the rear setback which is very important to maintain amenity, separation between the existing high density residential development and provision of landscaping and mature trees.
60. In relation to issues raised of privacy and overlooking, it is considered that an increase in setbacks would not achieve any greater privacy or outlook concerns. It is likely that any future residential flat building (refer Figure 17) would contain 3 units per level and the potential for balconies to be located north facing. The balconies of ground floor units, which is proposed to be setback 6 metres from the boundary, would not directly impact on overlooking and privacy. Any future upper level unit balconies would be setback 9 metres from the boundary and would look onto the roof top of 9 Rosebank Avenue and those balconies positioned in the north west corner could overlook the open space of 9 Rosebank Avenue. It is considered that proposed ground level setback of 6 metres, which allows for planting of mature trees and landscaping is the most appropriate method of providing adequate privacy and managing overlooking impacts.

Figure 17: Likely amalgamation pattern and residential flat buildings as a result of the proposed planning controls.

61. Notwithstanding the above, it is recommended that several additional DCP provisions be included to further minimise overlooking and privacy impacts as follows:
- i. new development located at 5 and 7 Rosebank Avenue, shall minimise the number of balconies facing northward. Those balconies facing west and north shall provide appropriate screening to minimise overlooking.
 - ii. That balconies cannot protrude in the front, rear and side setbacks.
- If endorsed by Council, these controls will be incorporated in the final DCP.
62. In relation to the issue of including 9 Rosebank Avenue, a locally listed item, within the Planning Proposal the following Council response is provided:
- i. The boundary of the Planning Proposal was based on the adverse impact from adjacent high density development. As shown on **Figure 14**, to the rear of 9 Rosebank Avenue is the Kent Street Reserve and diagonally opposite are the apartments at 2-8 Hazelwood Place, therefore it was not

- originally included as it is not directly adjacent to the high density development and a heritage listed item.
- ii. The heritage listing of the property commenced in the Hornsby Shire LEP 1994, based on the recommendation of the Hornsby Shire 1993 Heritage Study.
 - iii. The Item's heritage inventory sheet states that it is a "*good example of a Late Twentieth Century Tudor style house. Virtually unaltered and in good condition*". Its significance is based on criteria aesthetic, and it is a rare and representative example. The Inventory sheet can be found here <http://hscenquiry.hornsby.nsw.gov.au/pages/xc.track.heritage/heritage.aspx?pid=322970>
 - iv. The most recent heritage study undertaken, namely the Epping Town Centre (East) Heritage Review (2017) was commissioned by City of Parramatta Council as part of the Epping Planning Review. The Study supports the retention of the heritage listings in Rosebank Avenue and Rosebank Ave HCA status based on the fact that all properties within the Rosebank HCA (except for 13 Rosebank Avenue) date to the original subdivision of the Avenue as part of the Rosegrove Estate and all maintain their original Inter War period character (except for 5 & 21 Rosebank Avenue). The Review is found here <https://www.cityofparramatta.nsw.gov.au/sites/council/files/inline-files/1-%20Epping%20Town%20Centre%20%28East%29%20Heritage%20Study.pdf>
63. Therefore based on the level of significance, the length of time the item at 9 Rosebank Avenue has been listed and two supporting studies, Council Officers consider that it is unlikely that a delisting of the item through a Planning Proposal process would be supported by DPIE. Rather, appropriate built form controls which support an improved interface with new development is the best course of action recommended by Council Officers.
64. On balance, Council concludes the proposed building height and FSR are justified to support the intended effect of the planning proposal. Site specific DCP controls are proposed to further manage the built form transition and interface with the HCA of any future development.

Impacts on existing trees

65. Two submissions raised concerns over the potential impact on existing trees, including street trees, which contribute to the overall amenity of the street.
66. It is recognised that there are high amenity street trees currently in Rosebank Avenue. Therefore, to encourage their protection, it is proposed to include in the DCP controls, which support this Planning Proposal "Street trees along Rosebank Avenue shall be retained and not be adversely impacted as part of any new development." If endorsed by Council, this control will be incorporated in the final DCP.

Development Control Plan Amendments amending pedestrian link between Epping Road and Forest Grove

67. One submission was received in relation to these draft amendments requesting that the proposed seating in the laneway is not practical and would rather tree planting.
68. The proposed widening of the pedestrian link to 3 metres is intended to allow for public domain improvements including seating and planting. Seating is proposed to be balanced with planting through the provision of the increased width.

Development Control Plan Amendments to parking provisions in Epping Town Centre

69. Two submissions were received in relation to the draft DCP amendment relating to car parking.
70. One submission was concerned about the removal of parking rates relating to seniors housing. It is noted that parking rates for this type of development are contained within the *State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004*. It was not necessary to include this in the DCP.
71. Additionally, a concern was raised over the proposed amendments to wording to change from 'should' to 'must', and implies a lack of flexibility for applicants to justify variations. The submission relates to the following amendment:
"Car parking ~~should~~ must be provided on site in accordance with the ~~minimum~~ parking rates in Tables 1C.2.1(e) (d) and (e)."
72. It is Council's intention to provide greater clarity around the need to provide adequate onsite parking to facilitate proposed development. It is noted that DCPs support the planning controls within Local Environmental Plans. DCPs allow flexibility to applicants to provide alternative design solutions to meet identified objectives or outcomes and have these alternatives considered on merit.
73. Following public exhibition, Hornsby Council made Council Officers aware that proposed amendments as currently drafted would inadvertently apply to the Hornsby LGA. This is not the intention of the amendment, Therefore, it is proposed to annotate Section 1C.2.1 Transport and Parking so it is clear which controls apply to those sites within the City of Parramatta LGA (refer **Attachment 7**).

Other Submissions

Rose Street Precinct

74. Several submissions specifically identified development interface issues between development along Maida Road and the Rose Street Precinct, calling for changes in planning controls to be implemented. Specifically, submissions noted that Stage 1 of the Epping Planning Review identified the need for changes to planning controls in this precinct. Council considered the outcomes of Stage 1 of the Epping Planning Review at its meeting on 9 July 2018 and resolved that no further action be taken to amend the planning controls that apply to the Rose Street Precinct until a drainage analysis detailing the implications of the

redevelopment of the Rose Street Precinct sites is completed and reported to Council.

75. City of Parramatta Council has copies of the historical drainage and flooding information for Epping from the former Hornsby Council. This data lacks sufficient detail to properly assess the impact of possible future development. Council is currently compiling updated flood modelling for the pre-amalgamated area to enable a proper understanding of the site's hydrology. It is from this work that more detailed drainage information in relation to the Rose Street Precinct will be available and more informed decisions may be made in relation to any future rezoning.

PARRAMATTA LOCAL PLANNING PANEL

76. Council resolved on 14 May 2018 to refer Planning Proposals to the Local Planning Panel where a submission has been received during the public exhibition process, which requests that the Planning Proposal be amended. The Panel provides advice to Council on whether the Planning Proposal should be amended and whether or not to forward it to the Department of Planning, Industry and Environment for finalisation.
77. The Local Planning Panel considered this matter at its meeting on 18 May 2021. In issuing its advice to Council, the Panel supported the findings found in the assessment report and endorsed the reasons for recommendation contained in that report so that the Planning Proposal can be finalised (refer to Local Planning Panel Report and minute at **Attachment 1**).

CONSULTATION & TIMING

Stakeholder Consultation

78. The following stakeholder consultation has been undertaken in relation to this matter:

Date	Stakeholder	Stakeholder Comment	Council Officer Response	Responsibility
19 August and 25 September 2021	Public Exhibition - letters to owner/occupiers within 800m radius of Epping Railway Station.	Refer Attachment 2 for Submission Table	Refer Attachment 2 for Submission table	City Planning and Design

Councillor Consultation

79. The following Councillor consultation has been undertaken in relation to this matter:

Date	Councillor	Councillor Comment	Council Officer Response	Responsibility

11 May 2021	Councillor Tyrell & Davis	Feedback relating to Rosebank Ave in relation to issue of multi-unit development (under reduced FSR and height); status of 15-19 Essex Street development application and widening of Forest Grove – Essex St pedestrian link to date.	Response circulated via email to Councillors on 26 May 2021.	City Planning and Design
-------------	---------------------------	--	--	--------------------------

LEGAL IMPLICATIONS FOR COUNCIL

80. There are no legal implications required to be considered in preparing this report to Council.

FINANCIAL IMPLICATIONS FOR COUNCIL

81. Any work to progress the finalisation of the Planning Proposal would be prepared by Council Officers and therefore within the existing City Planning budget.
82. In the event of the finalisation of the planning proposals and amendments to the Hornsby LEP 2013 are made, development contributions may be made as part of any development. However the timing payment of development contributions related to any development is unknown (as it is unclear when development applications would be lodged, and what the details of the development would be) and difficult to estimate at this stage of the process.
83. The level of developer contributions paid could increase marginally from the residential flat building development permitted to be approved as part of the Rosebank Avenue Planning Proposal. The level of developer contributions could decrease marginally if the development permitted is approved as part of the East Epping Planning Proposal. However the reduction in contributions received is likely to be outweighed by the benefits the community would otherwise gain by expending these additional funds on local infrastructure, and so Council Officers consider that this impact is appropriate and consistent with Council's strategic direction for the Epping Town Centre.

CONCLUSION AND NEXT STEPS

84. Council Officers recommend that the Rosebank Avenue and East Epping Planning Proposals (as exhibited) be endorsed as exhibited, and they be referred to the Department of Planning, Industry and Environment for finalisation.
85. Council Officers recommend that the Council support the Council Officer recommendation to finalise the DCP amendments relating to:
- Forest Grove – Essex St Pedestrian link;
 - Minor changes to the controls relating to car parking within Epping Town Centre with an amendment to differentiate between the controls applying to City of Paramatta LGA and Hornsby LGA; and
 - Rosebank Avenue with minor additions to the controls relating to location of balconies, screening of upper level balconies, limit balcony intrusions into setbacks and protection of existing street trees.
86. In accordance with the *Environmental Planning and Assessment Regulation 2000* a DCP comes into effect on the date that notice of the council's decision to approve the plan is published on its website, or on a later date specified in the notice.
87. Council Officers recommend that in relation to the Draft DCP Amendments relating to Forest Grove – Essex Street pedestrian link and minor amendments relating to car parking the notice states that the DCP amendments will come into effect within 6 weeks from the date of the public notice of Council's decision, in order to allow sufficient time to liaise with Hornsby Council on the amendments.
88. Council Officers recommend that the notice relating to the Rosebank Avenue DCP amendments state that they will come into effect when the Planning Proposal for Rosebank Avenue is finalised.

EXTRACT OF MINUTES OF THE LOCAL PLANNING PANEL HELD IN THE LEVEL 10 BOARDROOM, 126 CHURCH STREET, PARRAMATTA ON TUESDAY, 18 MAY 2021 AT 3:30PM

PRESENT

David Lloyd QC (Chair), Tony Reed, David Ryan, Warrick McLean

ACKNOWLEDGEMENT TO TRADITIONAL LAND OWNERS

The Chairperson, acknowledged the Burrumattagal Clan of The Darug, the traditional land owners of Parramatta and paid respect to the elders both past and present.

WEBCASTING ANNOUNCEMENT

The Chairperson advised that the public meeting is being recorded. The recording will be archived and made available on Council's website.

APOLOGIES

There were no apologies made to this Local Planning Panel.

DECLARATIONS OF INTEREST

David Ryan declared a perceived interest in Item 6.1 (Post-exhibition: Outcome of public exhibition of two planning proposals and three DCP amendments for various matters in Epping), being that his employer City Plan Strategy and Development are a related company to City Plan Heritage, who prepared heritage reports appended to the Report for this Item. He took no part in the consideration and determination of Item 6.1.

REPORT OF Team Leader Land Use Planning

David Ryan declared a perceived interest in Item 6.1, being that his employer City Plan Strategy and Development are a related company to City Plan Heritage, who prepared heritage reports appended to the Report for this Item. He took no part in the consideration and determination of Item 6.1.

The Panel considered the matter listed at Item 6.1 and attachments to Item 6.1.

PUBLIC FORUM

- Janet McGarry, on behalf of the Epping Civic Trust, spoke against the recommendation at Item 6.1.

DETERMINATION

The Parramatta Local Planning Panel recommends the following to Council:

- (a) **That** Council receives and notes the submissions made during the public exhibition of the East Epping and Rosebank Avenue Planning Proposals and the draft amendments to the Hornsby Development Control Plan 2013 which are summarised at **Attachment 1**.
- (b) **That** Council endorse for finalisation the planning proposal relating to the following various properties in East Epping (provided at **Attachment 2**) which seeks to amend *Hornsby Local Environmental Plan 2013* as follows:
- For sites 2 to 24 Rockleigh Way, 3 to 7 and 4 to 8 Brenda Way, and 5A Essex Street:
 - Amend the zoning from R4 High Density Residential to R3 Medium Density Residential.
 - Amend the maximum building height from 17.5 metres to 11 metres.
 - Apply a maximum Floor Space Ratio (FSR) of 0.6:1, noting there is no existing FSR control for the sites.
 - For sites at 1 to 31 Rockleigh Way:
 - Amend the maximum building height from 12 metres to 11 metres.
 - Apply an FSR of 0.6:1, noting there is no existing FSR control for the sites.
 - For sites at 21-29 Essex Street:
 - Amend the maximum building height from 17.5 metres to 11 metres.
 - Apply an FSR of 0.8:1, noting there is no existing FSR control for the sites.
 - For sites at 23 to 23A Pembroke Street:
 - Amend the zoning from R3 Medium Density Residential to R4 High Density Residential.
 - Amend the maximum building height from 12 metres to 11 metres.
 - Apply an FSR of 0.8:1, noting there is no existing FSR control for the sites.
- (c) **That** Council endorse for finalisation the planning proposal for 1-7 and 2-8 Rosebank Avenue, Epping (provided at **Attachment 3**) which seeks to amend *Hornsby Local Environmental Plan 2013* as follows:
- Remove the Heritage Conservation Area notation (as it applies to these properties).

Local Planning Panel 18 May 2021

Item 6.1

- ii. Amend the zone from R2 Low Density Residential to R4 High Density Residential.
 - iii. Amend the maximum building height from 8.5m to 11m.
 - iv. Apply a maximum FSR to 0.8:1, noting there is no existing FSR control for the sites.
- (d) **That** Council forward the East Epping and Rosebank Avenue Planning Proposals to the Department of Planning, Industry and Environment for finalisation.
- (e) **That** Council endorse for finalisation the exhibited amendments to the Hornsby Development Control Plan 2013 which sought to :
- i. To introduce a provision to facilitate widening of the Forest Grove/Essex Street pedestrian link in the event of redevelopment (provided at **Attachment 4**).
 - ii. That Council endorse for finalisation the amendment to the Development Control Plan 2013 to make minor corrections to the Epping Town Centre car parking provisions (provided at **Attachment 5**).
 - iii. Introduce design controls to support the Rosebank Avenue planning proposal to encourage an improved heritage interface with associated setbacks and planting (provided at **Attachment 6**), subject to the inclusion of the following amendments:-
 - introducing an additional control relating to location of balconies on, and requiring screening of, upper level balconies for new development on 5 and 7 Rosebank Avenue;
 - introducing an additional control limiting balcony intrusions into setbacks Rosebank Avenue; and
 - introducing an additional control that require the protection of existing street trees in Rosebank Avenue.
- (f) **Further, that** Council authorises the Chief Executive Officer to make any minor amendments and corrections of a non-policy and administrative nature that may arise during the plan amendment process relating to the Planning Proposal.

The Panel decision was unanimous.

REASONS FOR DECISION

The Panel supports the findings contained in the assessment report and endorses the reasons for recommendation contained in that report.

The meeting terminated at 3:44 pm.

RECOMMENDATION	

The Local Planning Panel consider the following Council Officer recommendations:

- (a) **That** Council receives and notes the submissions made during the public exhibition of the East Epping and Rosebank Avenue Planning Proposals and the draft amendments to the Hornsby Development Control Plan 2013 which are summarised at **Attachment 1**.
- (b) **That** Council endorse for finalisation the planning proposal relating to the following various properties in East Epping (provided at **Attachment 2**) which seeks to amend *Hornsby Local Environmental Plan 2013* as follows:
- i. For sites 2 to 24 Rockleigh Way, 3 to 7 and 4 to 8 Brenda Way, and 5A Essex Street:
 - Amend the zoning from R4 High Density Residential to R3 Medium Density Residential.
 - Amend the maximum building height from 17.5 metres to 11 metres.
 - Apply a maximum Floor Space Ratio (FSR) of 0.6:1, noting there is no existing FSR control for the sites.
 - ii. For sites at 1 to 31 Rockleigh Way:
 - Amend the maximum building height from 12 metres to 11 metres.
 - Apply an FSR of 0.6:1, noting there is no existing FSR control for the sites.
 - iii. For sites at 21-29 Essex Street:
 - Amend the maximum building height from 17.5 metres to 11 metres.
 - Apply an FSR of 0.8:1, noting there is no existing FSR control for the sites.
 - iv. For sites at 23 to 23A Pembroke Street:
 - Amend the zoning from R3 Medium Density Residential to R4 High Density Residential.
 - Amend the maximum building height from 12 metres to 11 metres.
 - Apply an FSR of 0.8:1, noting there is no existing FSR control for the sites.

Local Planning Panel 18 May 2021

Item 6.1

- (c) **That** Council endorse for finalisation the planning proposal for 1-7 and 2-8 Rosebank Avenue, Epping (provided at **Attachment 3**) which seeks to amend *Hornsby Local Environmental Plan 2013* as follows:
- i. Remove the Heritage Conservation Area notation (as it applies to these properties).
 - ii. Amend the zone from R2 Low Density Residential to R4 High Density Residential.
 - iii. Amend the maximum building height from 8.5m to 11m.
 - iv. Apply a maximum FSR to 0.8:1, noting there is no existing FSR control for the sites.
- (d) **That** Council forward the East Epping and Rosebank Avenue Planning Proposals to the Department of Planning, Industry and Environment for finalisation.
- (e) **That** Council endorse for finalisation the exhibited amendments to the Hornsby Development Control Plan 2013 which sought to :
- i. To introduce a provision to facilitate widening of the Forest Grove/Essex Street pedestrian link in the event of redevelopment (provided at **Attachment 4**).
 - ii. That Council endorse for finalisation the amendment to the Development Control Plan 2013 to make minor corrections to the Epping Town Centre car parking provisions (provided at **Attachment 5**).
 - iii. Introduce design controls to support the Rosebank Avenue planning proposal to encourage an improved heritage interface with associated setbacks and planting (provided at **Attachment 6**), subject to the inclusion of the following amendments:-
 - introducing an additional control relating to location of balconies on, and requiring screening of, upper level balconies for new development on 5 and 7 Rosebank Avenue;
 - introducing an additional control limiting balcony intrusions into setbacks Rosebank Avenue; and
 - introducing an additional control that require the protection of existing street trees in Rosebank Avenue.
- (f) **Further, that** Council authorises the Chief Executive Officer to make any minor amendments and corrections of a non-policy and administrative nature that may arise during the plan amendment process relating to the Planning Proposal.

Local Planning Panel 18 May 2021

Item 6.1

PLANNING PROPOSAL TIMELINE**BACKGROUND**

1. The Planning Proposals for Rosebank Avenue and various properties in East Epping are the progression of the Epping Planning Review undertaken by Council in 2017 and 2018, specifically addressing issues of high density development interface with Heritage Conservation Areas.
2. On 14 March 2014, the (then) Department of Planning and Environment (Department) finalised the Epping Urban Activation Precinct amendments to the Hornsby and Parramatta Local Environmental Plans via State Environmental Planning Policy (Epping Town Centre) 2013 ("the SEPP Amendment"). The SEPP Amendment provides capacity for approximately 10,000 additional dwellings and a revitalised commercial and retail core adjacent to a major transport hub. The new planning controls also established four new Heritage Conservation Areas, including the East Epping and the Rosebank Avenue Heritage Conservation Areas.
3. In December 2016, the Epping Planning Review was commenced by the City of Parramatta Council. The scope of the review was to address the unintended consequences of the planning control amendments brought into effect in March 2014 as well as allowing Council to manage current (formal and preliminary) Planning Proposals seeking additional growth within the Town Centre. It also allowed the City of Parramatta Council to progress matters considered by the former Hornsby Shire Council, including heritage matters.
4. On 9 July 2018, a report was presented to Council on the findings of Stage 1 of the Epping Planning Review. At this meeting the Council resolved (in part) to prepare planning proposals for the following properties in order to address the adverse impacts of high-density development on adjoining Heritage Conservation Areas (HCAs):
 - a) Relating to properties adjoining the East Epping Heritage Conservation Area:

Local Planning Panel 18 May 2021

Item 6.1

“That a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments as follows:-

- (i) Rockleigh Park Precinct; controls consistent with the recommendations in the body of this report*
- (ii) In the Norfolk, Pembroke, Essex Street area the planning controls be retained (including the Heritage Conservation Area notation) for 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke (ie retain the existing R2 Low Density Residential zoning and the existing Height of Building controls of 8.5m) and instead amend the controls for the following sites as follows:-*
 - 21, 23, 25, 27 and 29 Essex Street amend the zoning from R4 High Density Residential to R3 Medium Density Residential with maximum height permitted on these sites to be amended from 17.5m to 11m (to allow for apartment building development no greater than 3 storeys on these sites); and*
 - The height of building control for 23, 23A Pembroke be reduced from 12m to 11m with the existing zoning of Residential R3 Medium Density Residential to be retained for these two sites;*

and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.”

- (b) Relating to Properties at 2-8 and 1-7 Rosebank Avenue:**

That a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments for 2 - 8 Rosebank Ave and 1 - 7 Rosebank Ave as follows:

- (i) Remove the Heritage Conservation Area notation from these sites;*
- (ii) Rezone the sites from Residential R2 Low Density Residential to R3 Medium Density Residential; and*
- (iii) Amend the permitted height of building for these sites from 8.5m to 11m (to allow for apartment building development no greater than 3 storeys on these sites).*

All other sites in Rosebank Avenue should retain their existing planning controls including the Heritage Conservation Area notation and that the Planning Proposal and associated material shall be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal

5. In line with the Council resolution of 9 July 2018, Council has prepared and endorsed planning proposals to address heritage interface issues for properties at Rockleigh Way, Essex and Pembroke Streets and Rosebank Avenue, Epping. The Planning Proposals have received Gateway Determinations from the DPIE and subsequently been placed on public exhibition. **Table 1** provides a summary of the relevant milestones relating to the Planning Proposals and proposed amendments to the Hornsby DCP 2013.

Local Planning Panel 18 May 2021

Item 6.1

Table 1: Summary Table of Decisions

Matter	Date	Milestone
Rosebank Avenue Planning Proposal	17 September 2019	Local Planning Panel advised that the Planning Proposal to be forwarded to DPIE for Gateway Determination
	8 October 2019	Council resolved that the Planning Proposal to be forwarded to DPIE for Gateway Determination
	10 January 2020	Gateway Determination issued by DPIE
	12 March 2020	Council Officers sought formal request to amend to remove Condition 1 of Gateway Determination which related to a reduction in height than that sought. This is detailed in paragraphs 49 to 51 below.
	30 March 2020	Gateway Determination with amendment issued by DPIE
	19 August to 25 September 2020	Public Exhibition of Planning Proposal
East Epping Planning Proposal	17 September 2019	Local Planning Panel advised that the Planning Proposal to be forwarded to DPIE for Gateway Determination
	8 October 2019	Council resolved that the Planning Proposal to be forwarded to DPIE for Gateway Determination.
	10 January 2020	Gateway Determination issued by DPIE
	9 June 2020 Council Meeting	Council consider amendments to the Planning Proposal following Gateway Determination and consistency with the Harmonisation Planning Proposal
	3 August 2020	Gateway amendment issued by DPIE
	19 August to 25 September 2020	Public Exhibition of Planning Proposal
Draft Amendments to the Hornsby DCP 2013	9 June 2020 Council Meeting	Council resolved to place the draft DCP amendments on public exhibition. These amendments relate to pedestrian link between Forest Grove and Essex St; controls to support the Rosebank Avenue Planning Proposal; and minor amendments to car parking controls.
	19 August to 25 September 2020	Public Exhibition of Draft DCP Amendments

PLANNING PROPOSALS

East Epping Planning Proposal

- This planning proposal aims to manage the impacts of development adjacent to the East Epping Heritage Conservation Area by reducing the maximum height of building controls for properties along Essex Street and Pembroke Street and to amend the planning controls in order to prevent the development of residential flat buildings in Rockleigh Park Precinct.
- Table 2** below summarises the existing controls under the *Hornsby Local Environmental Plan (LEP) 2013* that apply to the subject properties and the proposed controls as contained in the East Epping planning proposal.

Local Planning Panel 18 May 2021

Item 6.1

Table 2: East Epping Planning Proposal - Summary of current planning controls and proposed amendments

Subject sites	Hornsby LEP 2013 – current controls	Planning Proposal - proposed controls
1 to 31 Rockleigh Way (northern part of Rockleigh Park precinct)	<ul style="list-style-type: none"> R3 Medium Density Residential Maximum building height of 12 metres; and No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> (No changes to land use zoning) Maximum building height of 11 metres; and Maximum floor space ratio of 0.6:1
2 to 24 Rockleigh Way, 3 to 7 and 4 to 8 Brenda Way, and 5A Essex St (southern part of Rockleigh Park precinct)	<ul style="list-style-type: none"> Zoned R4 High Density Residential; maximum building height of 17.5 metres; and No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> R3 Medium Density Residential Maximum building height of 11 metres; and Maximum floor space ratio of 0.6:1
21-29 Essex Street	<ul style="list-style-type: none"> Zoned R4 High Density Residential; Maximum height of buildings of 17.5 metres; and No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> Maximum building height of 11 metres; and Maximum floor space ratio of 0.8:1
23-23A Pembroke Street	<ul style="list-style-type: none"> Zoned R3 Medium Density Residential; Maximum building height of 12 metres; and No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> R4 High Density Residential Maximum building height of 11 metres; and Maximum floor space ratio of 0.8:1

8. The proposed controls contained in the East Epping Planning Proposal have been prepared to be consistent with Council's Harmonisation Planning Proposal (the proposal to consolidate into one LEP a set of controls that will replace the current 5 LEPs that apply across the LGA) as follows:
- Application of a 11 metre height limit to R3 Medium Density zoned land across the LGA; and
 - Application of a FSR in those R4 High Density Residential and R3 Medium Density zoned land, where Hornsby LEP 2013 does not nominate a FSR.
9. Further, it is noted that there is a transitional issue that impacts on the planning proposal as it seeks to rezone the Rockleigh Park Precinct from R4 High Density Residential to R3 Medium Density Residential under Hornsby LEP 2013. Currently residential flat buildings are permissible in both of these zones. Under the Harmonisation Planning Proposal, endorsed by Council, this precinct will remain zoned R3 Medium Density Residential however residential flat buildings will not be permitted, instead, townhouses will be the highest density residential form permitted. The Rockleigh Park Precinct is a transition area. As can be seen in Figure 1 below the area immediately to the east is R2 Low Density Residential Zoned land. A set of controls that ultimately limits this transition area to town house rather than apartment building development is considered the most appropriate transition.

Local Planning Panel 18 May 2021

Item 6.1

10. **Figures 1 to 5** below illustrate the proposed amendments to the land use zoning, height of buildings and floor space ratio as part of the East Epping Planning Proposal.

Figure 1 East Epping Planning Proposal - Current land use zoning applying to sites adjacent the Epping East HCA

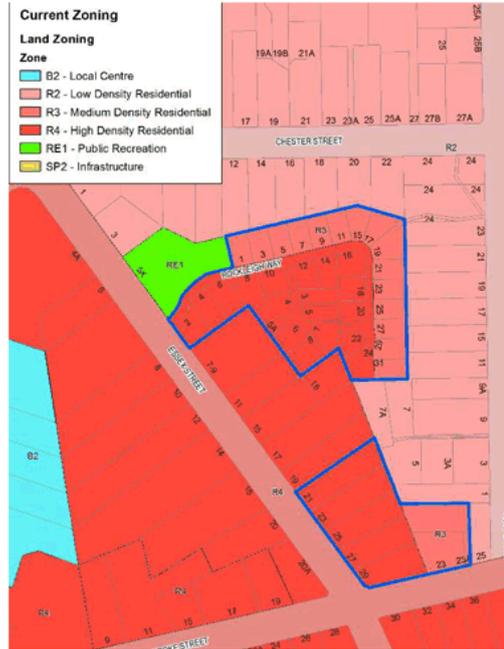

Figure 2 East Epping Planning Proposal - Proposed amendments to the land use zoning

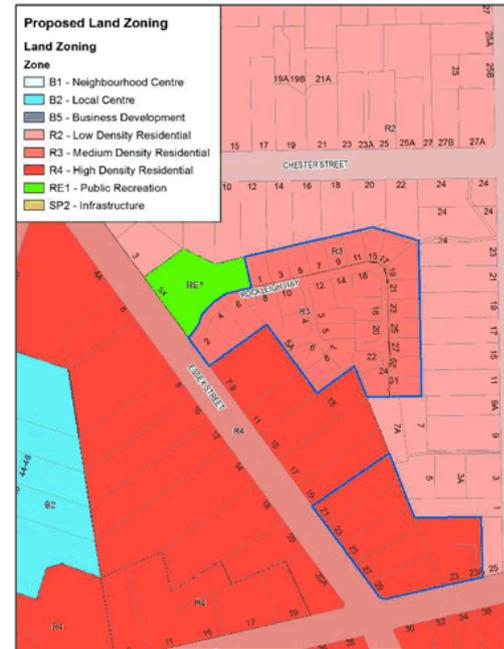

Figure 3 East Epping Planning Proposal - Current height of buildings

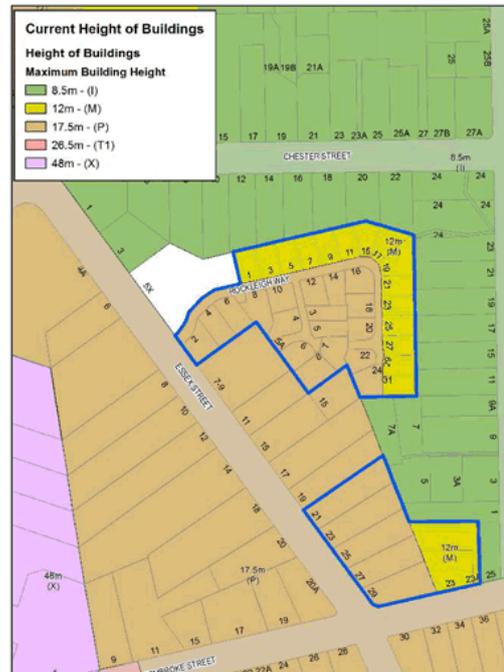

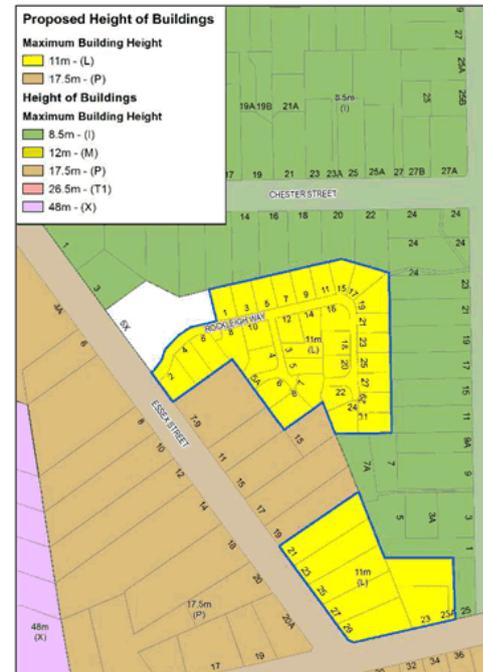

Figure 4 East Epping Planning Proposal - Proposed amendments to the height of buildings

Local Planning Panel 18 May 2021

Item 6.1

Figure 5 East Epping Planning Proposal –
Proposed amendment to floor space ratio

Planning proposal at 2-8 and 1-7 Rosebank Avenue, Epping

11. The planning proposal aims to address the adverse impacts of adjacent high density residential development and allow a more sympathetic transition to the Rosebank Avenue Heritage Conservation Area. In order to achieve the desired objectives the following amendments to the Hornsby LEP 2013 would need to be made as they relate to land at 2 – 8 and 1 – 7 Rosebank Avenue, Epping:
 - i. Amend the Land Zoning Map from R2 Low Density Residential to R4 High Density Residential.
 - ii. Amend the Maximum Height of Buildings Map from 8.5 metres to 11 metres.
 - iii. Apply a Floor Space Ratio of 0.8:1 (noting that no FSR currently applies); and
 - iv. Remove the Rosebank Heritage Conservation Area notation.
12. **Figures 6 to 10** below illustrates the proposed amendments to the land use zoning, height of buildings, floor space ratio and heritage conservation area as part of the Rosebank Avenue Planning Proposal.

Local Planning Panel 18 May 2021

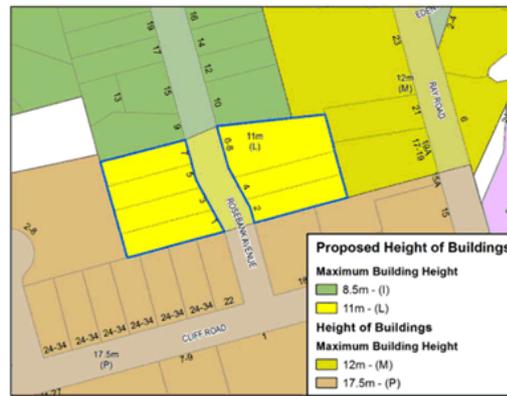

Figure 8: Proposed amendment to Maximum Floor Space Ratio Map, applying 0.8:1 FSR noting no current FSR (subject sites outlined in blue)

Local Planning Panel 18 May 2021

Item 6.1

Figure 9: Current Heritage Conservation Area and heritage items (subject sites outlined in blue)

Figure 10: Proposed amendment to the Rosebank Avenue Conservation Area (subject sites outlined in blue)

DRAFT AMENDMENTS TO HORNSBY DEVELOPMENT CONTROL PLAN 2013

13. The following draft amendments are proposed to the Hornsby Development Control Plan (Hornsby DCP 2013):
 - i. Insert a provision to facilitate widening of the Forest Grove/Essex Street pedestrian link in the event of redevelopment;
 - ii. Design controls to support the Rosebank Avenue Planning Proposal; and
 - iii. Minor corrections to the Epping Town Centre car parking provisions (no policy implications).

14. Each of the draft DCP amendments are described in turn below and are found at **Attachments 4, 5 and 6** of this Report. If endorsed by Council, the amendments will published on Council’s website and be formally made to the Hornsby DCP 2013.

Forest Grove/ Essex Street Pedestrian Link

15. The amendments to Section 3 of the Hornsby DCP 2013 are presented in **Attachment 2** and include amendment to the relevant DCP figures containing the Forrest Grove/ Essex Street Precinct to reflect the location of the existing pedestrian link and inserting supporting text “future widening of the pedestrian link to 3 metres, to allow for public domain improvements including seating and planting.” This amendment was first pursued in response to a Council resolution of 9 July 2018 and Council endorsed the Draft DCP for exhibition containing this change on 10 February 2020.

Local Planning Panel 18 May 2021

Item 6.1

- i. Provision of minimum setbacks at ground level and first and second levels which are designed to ensure a sympathetic transition to the adjoining heritage item and heritage conservation area as shown at **Figures 12 and 13** below.
- ii. That the side setback will be designed to allow for trees to be retained and planted to maintain the landscape amenity and setting of adjoining heritage items and heritage conservation areas.
- iii. Amendments to Section 3 to reduce the extent of the Rosebank Avenue Heritage Conservation Area.

Figure 12 Setback Controls for properties 1-3 and 5-7 Rosebank Avenue

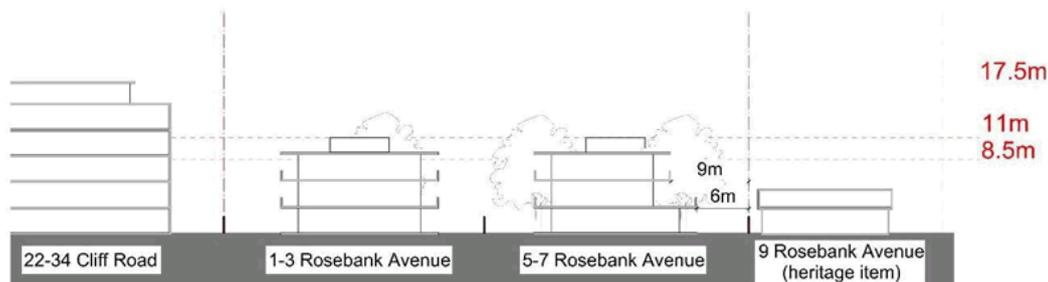

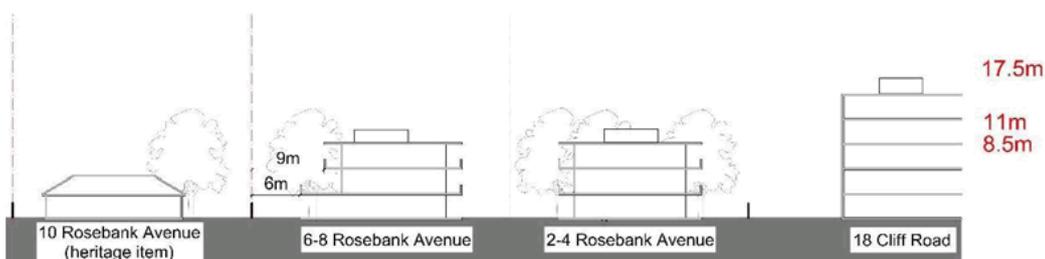

Figure 13 Setback Controls for properties 2-4 and 6-8 Rosebank Avenue

Car Parking Epping Town Centre - minor corrections

20. Council Officers have raised issues in relation to minor errors in Section 1C.2.1 Transport and Parking relating to car parking rates for Epping Town Centre. These minor errors are leading to some confusion as the application of car parking rates for Epping Town Centre (in Table 1C2.1(e) versus car parking rates for the rest of Hornsby LGA (outlined in 1C.2.1(d)). The proposed amendments are detailed in **Attachment 5**.
21. Therefore, the proposed amendments to the Hornsby DCP 2013 are administrative in order to clarify the application of car parking rates, will not amend any car parking rates and aim to be consistent with the approach taken in Section 4.1 of the Parramatta DCP 2011 which relates to the part of the of Epping Town Centre west of the rail line.

PUBLIC EXHIBITION

22. The Rosebank Avenue and East Epping Planning Proposals and draft DCP amendments were publicly exhibited between 19 August and 25 September 2020. Supporting documentation including Gateway Determinations and

Local Planning Panel 18 May 2021

Item 6.1

amendments, Council minutes and reports and Planning Proposal and appendices were part of the exhibition package. It is noted that the Planning Proposal relating to Variation to Clause 4.6 Development Standards for FSR relating to residential accommodation in the Epping Town Centre was also placed on public exhibition during this time but this has previously been reported to the Panel and Council separately.

23. Public exhibition included:

- Letters to all landowners and occupiers within the Epping Town Centre.
- Letters to Hornsby Council, Transport for NSW and NSW Heritage (as required by the Gateway determination).
- Exhibition materials placed on Council's website and in hard copy at Council's Customer Contact Centre at 126 Church Street, Parramatta and Epping Library.

24. Forty submissions were received during the public exhibition period. This included three from public agencies and 37 from community members. A summary of all submissions and Council officer responses is provided at **Attachment 1**. A summary of the key issues raised in submissions and Council officer responses in are provided below.

KEY ISSUES RAISED IN SUBMISSIONS

East Epping Planning Proposal

Summary

25. A total of 22 submissions were received relating to the East Epping Planning Proposal. In summary:
- Two (2) landowners within the Planning Proposal area which are summarised and detailed in **Attachment 1**;
 - Seventeen (17) community members outside of the area subject to the Planning Proposal which are summarised and detailed in **Attachment 1**;
 - Hornsby Council, Transport for NSW and Heritage NSW raised no objection to the Planning Proposal and Heritage NSW acknowledged that the rezoning of Rockleigh Park and the amendments to planning controls adjacent to the East Epping HCA are considered to have positive heritage outcomes.

Building height changes and associated impacts

26. During the exhibition period, numerous submissions raised concerns regarding the proposed changes to controls for the areas adjoining/transitioning to the East Epping Heritage Conservation Area. Submissions questioned the need to reduce the building heights, with others noting the reductions are not enough and the impacts of interface issue of solar access, privacy issues, screening, and noise will remain.
27. The objective of the East Epping Planning Proposal is to provide a more consistent and appropriate built form transition for land adjoining the HCA through reductions in the permitted building heights. The planning proposal aims to reduce current height controls as follows:

Local Planning Panel 18 May 2021

Item 6.1

- i. 5A and 21-29 Essex Street - it is proposed to reduce the height of buildings from 17.5 metres to 11 metres.
 - ii. 23-23A Pembroke Street - it is proposed to reduce the height of buildings from 12 metres to 11 metres.
 - iii. 2-24 Rockleigh Park, 3-7 and 4-8 Brenda Way - it is proposed to reduce the height of buildings from 17.5 metres to 9 metres.
28. It is considered that the proposed reduction in height is the most appropriate response to the transition from high density residential areas to the adjacent heritage conservation areas. A reduction in building height will ensure that any future redevelopment of the site can provide a more appropriate interface to the heritage conservation area that is currently enabled by the current controls.
29. Furthermore any future development applications on these sites will need to be assessed against the Hornsby DCP 2013 and the NSW Apartment Design Guide (ADG) to ensure that amenity impacts are suitably managed, including any impacts on adjoining neighbour solar access, privacy and outlook are minimised through adequate building separation and landscaping.

Traffic and parking

30. Concerns were raised over the potential traffic impact which may result from the proposed change in zoning for 23 and 23A Pembroke Street from R3 Medium Density Residential to R4 High Density Residential. The submission highlighted existing traffic problems exacerbated by the Epping Public School adjacent to the site.
31. The effective permissible density on 23 and 23A Pembroke Street is unchanged by the Planning Proposal. The proposed land use zoning under the Planning Proposal from a R3 Medium Density zoning to a R4 High Density zoning ensures that residential flat buildings remain permissible on these properties. This is because the R3 Medium Density Residential Zone in the Hornsby LEP 2013 currently permits residential flat buildings with development consent, it is the intention of Council through the harmonisation of its planning controls, to restrict residential flat buildings to the R4 High Density Residential Zone. A R4 High Density Residential Zone in this location would ensure a straightforward translation of land use zone upon a newly consolidated Parramatta LEP whilst achieving the intended purpose of reducing the maximum height limit for residential flat buildings on these subject properties.
32. The Epping Planning Review acknowledged that traffic congestion issues have arisen since the NSW Government's rezoning in 2014 and the unprecedented rate of development within the Epping Town Centre. The Epping Town Centre Traffic Study undertaken in 2017 concluded that traffic will continue to deteriorate, even with potential local and State road improvements in place. Council is progressing a series of other actions to assist with addressing traffic issues in the Epping town centre, including implementing a range of local and State road improvement works and other planning controls.

Consistency with surrounding heritage controls

33. Various submissions identify concerns with the changes to the zoning for land within the East Epping Planning Proposal, namely along Pembroke Street.

Local Planning Panel 18 May 2021

Item 6.1

Concerns over changes to zoning leading to increased density and the possible interface impact on the adjoining property at 25 Pembroke Street which remains within the East Epping Heritage Conservation Area. Submissions note that the zoning is inconsistent with other properties within the East Epping Heritage Conservation Area and adjacent land.

34. It is noted that land within the East Epping Heritage Conservation Area already adjoins R4 zoned land. The intended outcome of the Planning Proposal is to provide a more consistent and appropriate built form transition. In achieving this a stepped built form interface was considered by Council as the best means of achieving the intended objective of the Planning Proposal. Further, and as noted above, residential flat buildings will remain a permitted use at Essex and Pembroke Streets, however at a reduced height (or scale).

Landowner submission – impact on property value and inconsistent treatment

35. A submission from a property owner within the Planning Proposal area objected to the East Epping Planning Proposal on the grounds of a decrease in immediate land value resulting from the reduction in building height. The submission argues that it is an inequitable treatment of surrounding properties - citing examples at 7-9, 10, 15-19 and 22-26 Essex Street and 1-7, 2-4 and 9-11 Crandon Road.
36. Council accept that the Planning Proposal will reduce residential capacity. The purpose of the Planning Proposal is to address transitional issues arising from NSW Government rezoning of the Epping Town Centre in 2014 and impacts on adjacent heritage conservation areas.
37. In relation to the issues raised in relation to inequitable and inconsistent height limits. The properties cited by the submitter listed all have a maximum building height of 17.5m under the Hornsby LEP 2013. The reason the cited properties have not been included in the Planning Proposal are as follows:
- i. Properties at 10, 22-26 Essex Street and 1-7, 9-11 and 2-4 Crandon Road are not at the 'interface' (or adjoining) the East Epping HCA, and their inclusion in the Planning Proposal would not specifically meet the purpose which is to address issues of development interface with Heritage Conservation Areas (HCA). Refer **Figure 18** for the location of the Essex Street properties and the East Epping HCA.
 - ii. At the time Council resolved at its meeting on 9 July 2018 to prepare a Planning Proposal relating to various properties in East Epping, 7-9 Essex Street had a development approval (approved by Hornsby Council on 11 March 2015 reference DA/1110/2014) for the construction of a 5 storey residential flat building, and therefore the development (now constructed) realised the planning controls relating to the site.
 - iii. In relation to 15-19 Essex Street a pre-lodgment application was submitted with Council for the construction of a 6 storey residential flat building. It is noted that the subsequent development application (reference DA/546/2018) lodged with Council was subject to an appeal to the NSW Land and Environment Court and subsequently refused.

Figure 18: East Epping Heritage Conservation Area and the properties subject to the East Epping Planning Proposal

Local Planning Panel 18 May 2021

Item 6.1

Submissions in relation to the Planning Proposal and Draft DCP Amendments for Rosebank Avenue, Epping

Summary

38. A total of 20 submissions were received in relation to the Rosebank Avenue Planning Proposal and associated draft DCP controls. In summary:
- Two (2) landowners within the Planning Proposal area were in supportive of the proposed controls;
 - Five (5) landowners of Rosebank Ave (but outside of the area subject to the Planning Proposal) object to the Planning Proposal based on various reasons which are summarised and addressed below and detailed in **Attachment 1**;
 - Ten (10) community members (and the Epping Civic Trust) objected based on various reasons which are summarised and addressed below and detailed in **Attachment 1**; and
 - Hornsby Council, Transport for NSW and Heritage NSW raised no objection to the Planning Proposal or draft DCP amendments. Heritage NSW acknowledge this was a local matter and recommended that the design controls be considered so as to not further impact on adjoining heritage items or HCA.
39. Although the majority of submissions objected to the proposal, it is noted these were from owners living in Rosebank Avenue (but outside the Planning

Local Planning Panel 18 May 2021

Item 6.1

Proposal area) or a community member. Specifically, the submissions of support were received from landowners subject to the Planning Proposal, who are currently experiencing the amenity impacts caused by the adjacent high density development.

Density and associated traffic impacts

40. Submissions raised concerns over further increase in development intensity, and the resultant traffic impact. Some submissions believe that there will be adverse impact from additional vehicles on the intersection performance of Cliff Road and Carlingford Road, and the Carlingford Road intersections with Ray/Rawson Street, and Beecroft Road.
41. The planning controls proposed under the Planning Proposal may result in approximately 67 units being accommodated over the sites, resulting in overall addition of 60 dwellings. On balance, this is considered reasonable to increase density in this location to address the severe amenity impacts currently experienced by residents. In addition, land where density is proposed to be increased is located appropriately 400 metres and 650 metres respectively from the Epping Town Centre and high frequency public transport infrastructure.
42. Regarding the submissions on traffic impacts, the Epping Planning Review acknowledged that traffic congestion issues have arisen since the NSW Government's rezoning in 2014 and the unprecedented rate of development within the Epping Town Centre. The Epping Town Centre Traffic Study undertaken in 2017 concluded that traffic will continue to deteriorate, even with potential local and State road improvements in place. Council is progressing a series of other actions that Council to assist with addressing traffic issues in the Epping town centre, including implementing a range of local road improvement works, advocating for NSW Government road improvements, and other planning measures including:
 - A planning proposal to 'switch off' Clause 4.6 variations which seek increased density on residential within the Town Centre.
 - Amendments to car parking rates in the DCP.
 - Advocating to the State Government for road and intersection improvements.

Impact on Heritage

43. Submissions received noted that the reduction of the heritage conservation area is inconsistent with Ministerial Direction Heritage Conservation and the recommendations of the Epping Town Centre (East) Heritage Review 2017 and requested that the Heritage Conservation Area be retained.
44. The Planning Proposal acknowledges that it is not consistent with Direction 2.3 - Heritage Conservation. The planning proposal is considered appropriate as it will help to resolve interface issues and community concerns. In addition, the area of the HCA to be retained reflects the heritage values recognised in the Statement of Significance for the HCA and will retain a highly intact interwar streetscape.
45. During the Epping Planning Review, extensive feedback was received from landowners and the community on the Rosebank Avenue Heritage

Local Planning Panel 18 May 2021

Item 6.1

Conservation Area and the options presented to mitigate the interface issues from the adjoining development. It noted that the submissions were divided in opinion as to how the interface issue should be managed.

46. On 9 July 2018, a report was presented updating Council on the implications for the findings of the Epping Planning Review, including further assessment work undertaken for Rosebank Avenue HCA. In summary, the Council report stated that interface issues represent a failure of the planning system which has created a current land use conflict. They are a result of the Priority Precinct process and subsequent development application decisions. The current situation where 5 to 6 storey buildings overlook and encroach on the backyards of single dwellings is considered unacceptable. As part of this report, Council Officers undertook further urban design testing of higher residential densities such as manor homes or 3 storey residential flat buildings to replace existing detached dwelling development in the Rosebank Avenue HCA and other heritage interface areas.
47. In conclusion, Council accepted that there are severe interface issues occurring in the southern half of the Rosebank Avenue Heritage Conservation Area. Following consideration by Council it resolved to retain the northern part of the conservation area but to remove the southern part and to rezone this area for higher density residential development.
48. The Epping Town Centre (East) Heritage Review 2017 concluded Rosebank Avenue HCA to have maintained the significance and intactness established in previous studies and was recommended to be retained in full. However, the Review did not fully address the land use conflicts occurring at the interface at the rear some of these properties and strong community concerns raised in the Epping Planning Review.

Amendment of proposed building height as part of the Gateway Determination

49. Submissions received during the exhibition period raised concern that the original Gateway Determination issued by DPIE had been amended, which had required under Condition 1 to reduce building heights for 5, 7 and 6 to 8 Rosebank Avenue from a maximum of 11 metres to a maximum of 8.5 metres.
50. Following this Council Officers formally requested DPIE for this condition to be amended amendment for the following reasons:
 - i. Reducing the height of buildings on these sites will reduce incentives for amalgamation for a residential flat building and may result in delivery of multi-unit dwellings (town houses), which would likely result in reduced setbacks, greater site coverage and potential additional tree loss (compared to a residential flat building).
 - ii. The planning proposal is supported by draft DCP controls with any new residential flat building being required to be setback to the boundary 6 metres at ground level and 9 metres at the second and third storeys. This would create a stepped built form interface appropriate transition between it and the Heritage Conservation Area.
51. DPIE then subsequently issued an alteration on 30 March 2020 requesting that Council *“prior to public exhibition, amend the planning proposal to outline a suitable planning mechanism to ensure transition of height and scale to the*

Local Planning Panel 18 May 2021

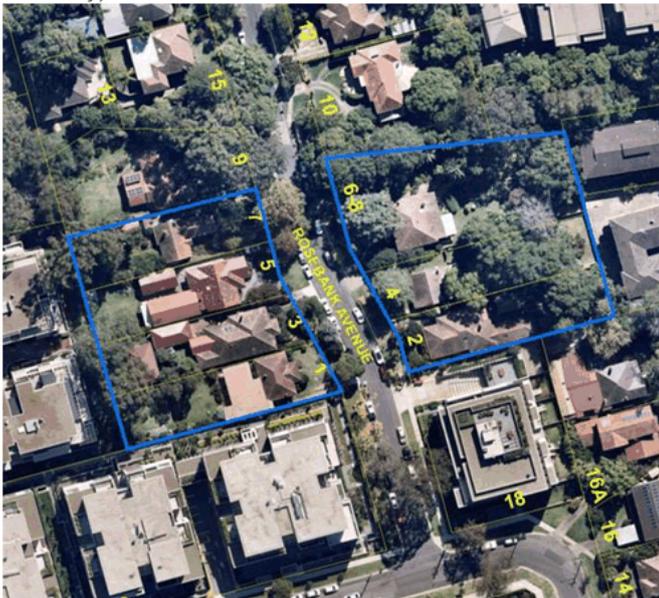

Item 6.1

adjoining land to the north and retain streetscape values. This may include the requirement to prepare a Development Control Plan that comes into force once the planning proposal is finalised.” Council has prepared a Draft DCP for the Rosebank Avenue planning proposal which supports this proposal.

Issues raised by 9 Rosebank Avenue

52. During the public exhibition period, the owners of 9 Rosebank Avenue requested the following issues be addressed:
- A greater ground level setback within the Draft DCP for any new development from the boundary of 9 Rosebank Ave to reduce any adverse impact of privacy and heritage.
 - That the proposed FSR be reduced from 0.8:1 to 0.6:1 on the grounds of reducing traffic generation, reduce building form and impact on heritage item and potential to increase front setback to view 9 Rosebank Avenue.
 - Potential inclusion in the Planning Proposal as the creek line forms a natural boundary and that the proposal will have a detrimental impact on the heritage item.
 - They also requested an onsite meeting with Ward Councillors and Council staff.
53. The property is listed as a locally significant item under Schedule 5 of the Hornsby LEP 2013. **Figure 14** shows an aerial image showing the location of 9 Rosebank Avenue in relation to the property and Planning Proposal boundaries.

Figure 14: Aerial image of properties at Rosebank Avenue (blue outline indicating planning proposal boundary)

54. In response to the landowner's request, on 16 December 2020, Council staff and Councillors met the owners on site at 9 Rosebank Avenue to discuss the Planning Proposal and the landowners concerns.
55. Following the request to increase setbacks by the landowner, Council's Urban Designers undertook built form testing to understand the implications of

Local Planning Panel 18 May 2021

Item 6.1

increasing setbacks and reducing FSR (referred to as 'Option B'). The testing found that a 9 metre ground setback (increased from 6 metres) and 12 metre upper level setback (increased from 9 metre) between 5-7 Rosebank Ave and the boundary of 9 Rosebank Ave would result in a reduction of the achievable FSR on 5 and 7 Rosebank Avenue from the proposed 0.8:1 to 0.6:1 to 0.65:1 (refer **Figures 15 and 16**). In terms of development yield, it is estimated that this would reduce the potential number of apartment units from 15 units to 12 units.

Figure 15 - Option B Section showing proposed built form transition to heritage item (note increased distance of setbacks between 5-7 Rosebank Ave to 9 Rosebank Ave as compared to Figure 12)

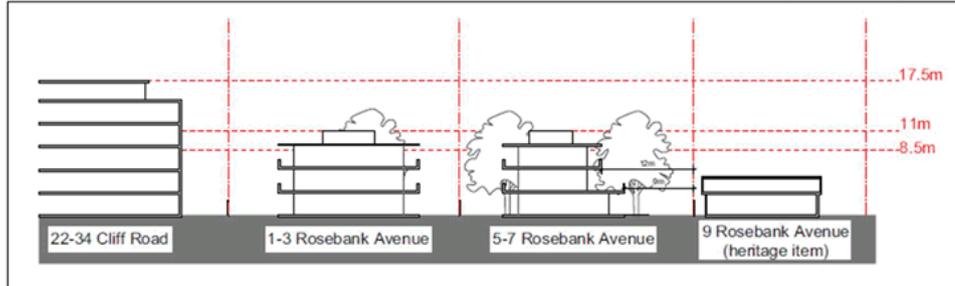

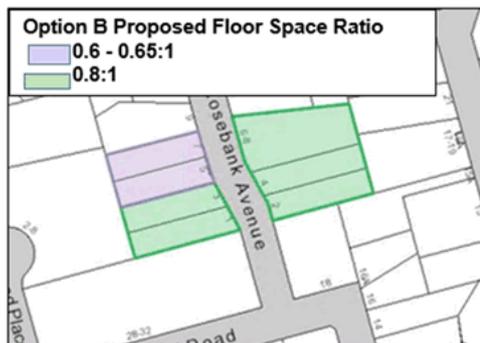

Figure 16 - Option B reduction in proposed floor space ratio of 0.6-0.65:1 for 5 & 7 Rosebank Avenue

56. On 28 January 2021, Council Officers addressed letters to the landowners of 5 and 7 Rosebank Avenue to give them an opportunity to respond to 'Option B' as these are the landowners that would be impacted with a reduced setback compared to the FSR that was placed on exhibition. On 18 February 2021 Council staff meet with the owners of 5 and 7 Rosebank Avenue to explain the proposed Option B and give them a further opportunity to respond. Subsequently the owners of 5 Rosebank Avenue submitted a formal response and, in summary, raised the following concerns in relation to this option:
- i. It is inequitable to have a different FSR than those proposed for adjoining properties;
 - ii. A dual occupancy or dwelling house could be constructed with a 1.5 metre setback to the side boundary, with greater impacts than what is proposed.
 - iii. The five and six storey developments are already impacting the character of the area.

Local Planning Panel 18 May 2021

Item 6.1

- iv. The boundary between 9 and 7 Rosebank Avenue is brick and the main orientation of the dwelling house at 9 Rosebank Avenue is east and west, therefore will not be impacted by privacy.
 - v. The heritage study relating to the 9 Rosebank Ave listing does not reference a separation or sense of place that should be preserved, rather a reference to the dwelling's character and architectural style.
 - vi. A reduced setback and FSR will impact on development viability at 5 and 7 Rosebank Avenue.
57. Council Officers have considered the issues raised by both landowners and provide the following response and recommendations.
58. Reducing the proposed FSR (density) may reduce the incentive for land amalgamation for the purposes of constructing a residential flat building, thereby leading to unintended consequences, such as redevelopment for uses other than residential flat buildings such as townhouses or multi-unit dwellings. Given the site-specific controls relating to greater setback provisions have been drafted to apply to residential flat buildings, should redevelopment occur for other uses these controls would not apply, thus reducing opportunities for deep soil planting and appropriate transition to the heritage conservation area.
59. Although an increased front setback would provide an opportunity to view the heritage item at 9 Rosebank Avenue, it would have the related effect of reducing the rear setback which is very important to maintain amenity, separation between the existing high density residential development and provision of landscaping and mature trees.
60. In relation to issues raised of privacy and overlooking, it is considered that an increase in setbacks would not achieve any greater privacy or outlook concerns. It is likely that any future residential flat building (**refer Figure 17**) would contain 3 units per level and the potential for balconies to be located north facing. The balconies of ground floor units, which is proposed to be setback 6 metres from the boundary, would not directly impact on overlooking and privacy. Any future upper level unit balconies would be setback 9 metres from the boundary and would look onto the roof top of 9 Rosebank Avenue and those balconies positioned in the north west corner could overlook the open space of 9 Rosebank Avenue. It is considered that proposed ground level setback of 6 metres, which allows for planting of mature trees and landscaping is the most appropriate method of providing adequate privacy and managing overlooking impacts.

Local Planning Panel 18 May 2021

Item 6.1

Figure 17: Likely amalgamation pattern and residential flat buildings as a result of the proposed planning controls.

61. Notwithstanding the above, it is recommended that several additional DCP provisions be included to further minimise overlooking and privacy impacts as follows:
- i. new development located at 5 and 7 Rosebank Avenue, shall minimise the number of balconies facing northward. Those balconies facing west and north shall provide appropriate screening to minimise overlooking.
 - ii. That balconies cannot protrude in the front, rear and side setbacks.
- If endorsed by Council, these controls will be incorporated in the final DCP.
62. In relation to the issue of including 9 Rosebank Avenue, a locally listed item, within the Planning Proposal the following Council response is provided:
- i. The boundary of the Planning Proposal was based on the adverse impact from adjacent high density development. As shown on **Figure 14**, to the rear of 9 Rosebank Avenue is the Kent Street Reserve and diagonally opposite are the apartments at 2-8 Hazelwood Place, therefore it was not originally included as it is not directly adjacent to the high density development and a heritage listed item.
 - ii. The heritage listing of the property commenced in the Hornsby Shire LEP 1994, based on the recommendation of the Hornsby Shire 1993 Heritage Study.
 - iii. The Item's heritage inventory sheet states that it is a "good example of a Late Twentieth Century Tudor style house. Virtually unaltered and in good condition". Its significance is based on criteria aesthetic, and it is a rare and representative example. The Inventory sheet can be found here <http://hscenquiry.hornsby.nsw.gov.au/pages/xc.track.heritage/heritage.aspx?pid=322970>
 - iv. The most recent heritage study undertaken, namely the Epping Town Centre (East) Heritage Review (2017) was commissioned by City of Parramatta Council as part of the Epping Planning Review. The Study supports the retention of the heritage listings in Rosebank Avenue and Rosebank Ave HCA status based on the fact that all properties within the Rosebank HCA (except for 13 Rosebank Avenue) date to the original subdivision of the Avenue as part of the Rosegrove Estate and all maintain their original Inter War period character (except for 5 & 21 Rosebank Avenue). The Review is found here

Local Planning Panel 18 May 2021

Item 6.1

<https://www.cityofparramatta.nsw.gov.au/sites/council/files/inline-files/1-%20Epping%20Town%20Centre%20%28East%29%20Heritage%20Study.pdf>

63. Therefore based on the level of significance, the length of time the item at 9 Rosebank Avenue has been listed and two supporting studies, Council Officers consider that it is unlikely that a delisting of the item through a Planning Proposal process would be supported by DPIE. Rather, appropriate built form controls which support an improved interface with new development is the best course of action recommended by Council Officers.
64. On balance, Council concludes the proposed building height and FSR are justified to support the intended effect of the planning proposal. Site specific DCP controls are proposed to further manage the built form transition and interface with the HCA of any future development.

Impacts on existing trees

65. Two submissions raised concerns over the potential impact on existing trees, including street trees, which contribute to the overall amenity of the street.
66. It is recognised that there are high amenity street trees currently in Rosebank Avenue. Therefore, to encourage their protection, it is proposed to include in the DCP controls, which support this Planning Proposal "Street trees along Rosebank Avenue shall be retained and not be adversely impacted as part of any new development." If endorsed by Council, this control will be incorporated in the final DCP.

Development Control Plan Amendments amending pedestrian link between Epping Road and Forest Grove

67. One submission was received in relation to these draft amendments requesting that the proposed seating in the laneway is not practical and would rather tree planting.
68. The proposed widening of the pedestrian link to 3 metres is intended to allow for public domain improvements including seating and planting. Seating is proposed to be balanced with planting through the provision of the increased width.

Development Control Plan Amendments to parking provisions in Epping Town Centre

69. Two submissions were received in relation to the draft DCP amendment relating to car parking.
70. One submission was concerned about the removal of parking rates relating to seniors housing. It is noted that parking rates for this type of development are contained within the *State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004*. It was not necessary to include this in the DCP.

Local Planning Panel 18 May 2021

Item 6.1

71. Additionally, a concern was raised over the proposed amendments to wording to change from 'should' to 'must', and implies a lack of flexibility for applicants to justify variations. The submission relates to the following amendment:
"Car parking should must be provided on site in accordance with the minimum parking rates in Tables 1C.2.1(e) (d) and (e)."
72. It is Council's intention to provide greater clarity around the need to provide adequate onsite parking to facilitate proposed development. It is noted that DCPs support the planning controls within Local Environmental Plans. DCPs allow flexibility to applicants to provide alternative design solutions to meet identified objectives or outcomes and have these alternatives considered on merit.

Other Submissions

Rose Street Precinct

73. Several submissions specifically identified development interface issues between development along Maida Road and the Rose Street Precinct, calling for changes in planning controls to be implemented. Specifically, submissions noted that Stage 1 of the Epping Planning Review identified the need for changes to planning controls in this precinct. Council considered the outcomes of Stage 1 of the Epping Planning Review at its meeting on 9 July 2018 and resolved that no further action be taken to amend the planning controls that apply to the Rose Street Precinct until a drainage analysis detailing the implications of the redevelopment of the Rose Street Precinct sites is completed and reported to Council.
74. City of Parramatta Council has copies of the historical drainage and flooding information for Epping from the former Hornsby Council. This data lacks sufficient detail to properly assess the impact of possible future development. Council is currently compiling updated flood modelling for the pre-amalgamated area to enable a proper understanding of the site's hydrology. It is from this work that more detailed drainage information in relation to the Rose Street Precinct will be available and more informed decisions may be made in relation to any future rezoning.

FINANCIAL IMPLICATIONS FOR COUNCIL

75. Any work to progress the finalisation of the Planning Proposal would be prepared by Council Officers and therefore within the existing City Planning budget. The level of developer contributions paid could increase marginally from the residential flat building development permitted to be approved as part of the Rosebank Avenue Planning Proposal.
76. The level of developer contributions could decrease marginally if the development permitted is approved as part of the East Epping Planning Proposal. However the reduction in contributions received is likely to be outweighed by the benefits the community would otherwise gain by expending these additional funds on local infrastructure, and so Council Officers consider that this impact is appropriate and consistent with Council's strategic direction for the Epping Town Centre.

Local Planning Panel 18 May 2021

Item 6.1

CONCLUSION AND NEXT STEPS

77. Council Officers recommend that the Local Planning Panel support the Council Officer recommendation that the Rosebank Avenue and East Epping Planning Proposals (as exhibited) and they be referred to the Department of Planning, Industry and Environment for finalisation.
78. Council Officers recommend that the Local Planning Panel support the Council Officer recommendation to finalise the DCP amendments relating to:
- i. Forest Grove – Essex St Pedestrian link;
 - ii. Car parking within Epping Town Centre; and
 - iii. Rosebank Avenue with minor additions to the controls relating to location of balconies, screening of upper level balconies, limit balcony intrusions into setbacks and protection of existing street trees.
79. Following Local Planning Panel consideration of the recommendations of this report, the outcomes of the exhibition period for the Planning Proposals and Draft DCP amendments will be reported to Council at an upcoming Council meeting along with the Panel's advice.

Attachment A – Submission Table

The following tables summarise the submissions received and Council Officers' responses:

- Table 1 – relates to the Planning Proposal for East Epping (page 1)
- Table 2 – relates to the Planning Proposal and associated Draft DCP Amendments for Rosebank Avenue (Page 14)
- Table 3 – relates to the Draft DCP Amendments for car parking (page 29)
- Table 4 – relates to the Draft DCP Amendments for Forest Grove pedestrian link (page 30)

Table 1 - Planning Proposal for various properties in East Epping

Submission	Submission Summary	Council Officer Response
Agency Submissions		
Transport for NSW	TfNSW has no objections to the Planning Proposal.	Noted.
Heritage NSW	<p>The planning proposals and DCP amendments will not have a direct physical or visual impact on any heritage items listed on the State Heritage Register. However, we do note that the planning proposals and DCP amendments have impacts on heritage conservation areas (HCA) listed under Council's Local Environmental Plans (LEP), including:</p> <ul style="list-style-type: none"> • Rezoning Rockleigh Park from R4 High Density Residential to R3 Medium Density Residential • Amendments to planning controls adjoining the East Epping HCA, to allow for more sensitive transition between the HCA and planned development. <p>The rezoning of Rockleigh Park and the amendments to planning controls adjacent to the East Epping</p>	Noted. Council is satisfied with the interface and transition the planning proposal will facilitate, noting the potential for future impacts was a key consideration shaping the proposed changes to the planning controls. Any future developments in these areas which may impact on locally listed heritage items or the Heritage Conservation Area (HCA) will be a key consideration at the time of assessment.

Submission	Submission Summary	Council Officer Response
	<p>HCA are considered to have positive heritage outcomes. As these HCAs are listed under Council's LEP, Council is the consent authority, and the assessment and consideration of any impacts rests with Council. As such, Council should be satisfied that sufficient justification and all necessary due diligence, assessments and notifications have been undertaken prior to finalisation of the planning proposals.</p> <p>Should the planning proposals be supported, Council should give consideration to the design of any future development for sites adjoining the HCAs and heritage items to minimise any further impacts from development.</p>	
<p>Hornsby Council</p>	<p>The Epping Town Centre Heritage Review 2013 recommended that the East Epping and Rosebank Avenue HCAs be listed in accordance with current boundaries and the adjoining residential intensification precincts be limited to three storeys, along with the implementation of several development controls for interface areas, including minimum setbacks, reduced heights and density, and landscaping. Accordingly, Council resolved to forward a submission generally supporting the findings of the heritage report and the progression of the Epping Town Centre Urban Activation Precinct (UAP) in accordance with the recommendations of the review.</p> <p>Ultimately, DPE proceeded with permitting five storey developments on land adjoining the East Epping and Rosebank Avenue HCAs in the final</p>	<p>Noted. The intended effect of the planning proposal is to provide a more consistent and appropriate built form transition from the high density residential areas to the adjacent Heritage Conservation Areas. The proposed amendments have considered the potential for impacts which may result from future detailed development applications, and consider these impacts are able to be suitable managed through design.</p> <p>Noted. The intended effect of this Planning Proposal is to address transition of scale issues which currently existing with the Epping Town Centre. Overall, this planning proposal includes provisions which reduce the permissible residential density of land. The reduction in density is of minor scale and thus of minor significance of traffic conditions.</p>

Submission	Submission Summary	Council Officer Response
	<p>Epping Town Centre UAP Plan, leading to the interface and transition issues which are now sought to be rectified.</p> <p>Hornsby Shire Council undertook traffic studies that informed the Epping Town Centre Study 2011, highlighting several traffic and infrastructure issues related to the intensification of the Epping precinct. Council wrote to the (then) Minister for Planning and Infrastructure supporting the identification of funding for road and intersection upgrades within the Epping Town Centre and seeking confirmation regarding the scope of the infrastructure to be delivered and associated timeframe. Further, Council raised concerns in a submission to DPE stating that the progression of the Epping Town Centre UAP Plan should not occur until design details of the proposed upgrades by the RMS had been finalised.</p> <p>In response, DPE rejected delaying the commencement of the Epping Town Centre UAP Plan noting that proposed road upgrades were in advanced stages and would be completed in due course.</p>	
Community Submissions		
Community	<p>The controls facilitated by the planning proposal will lead to poor amenity outcomes and allow for development that is not in line with local character due to increased and inconsistent height controls.</p>	<p>The intended effect of the Planning Proposal is to address existing built form transitional issues from high density residential areas to adjacent heritage conservation areas. The Planning Proposal aims to reduce current height controls as follows:</p> <ul style="list-style-type: none"> - 5A and 21-29 Essex Street it is proposed to reduce the height of buildings from 17.5 metres to 11 metres.

Submission	Submission Summary	Council Officer Response
		<ul style="list-style-type: none"> - 23-23A Pembroke Street it is proposed to reduce the height of buildings from 12 metres to 11 metres. - 2-24 Rockleigh Park, 3-7 and 4-8 Brenda Way it is proposed to reduce the height of buildings from 17.5 metres to 9 metres. <p>Residential flat buildings will remain a permitted use at Essex and Pembroke Streets, however at a reduced height (or scale).</p>
Community	<p>The proposal will reduce residential capacity and reduce revenue from council rates which is directed to supporting local infrastructure and services.</p> <p>Loss in land value from the proposal will reduce land tax revenue for the government.</p>	<p>Council accept that the Planning Proposal will reduce residential capacity, however the reduction is minor in the context of the increased density already developed and permitted in the areas surrounding Epping Town Centre.</p> <p>Council accept that the Planning Proposal will reduce residential capacity, however the reduction is minor. The purpose of the Planning Proposal is to address transitional issues arising from NSW Government rezoning of the Epping Town Centre in 2014 and impacts on adjacent heritage conservation areas. The economic impact on NSW Government in relation to land tax revenue is not a relevant consideration of the planning proposal and the proposal was endorsed for exhibition by the DPIE which is a State Government agency who raised no concerns with this issue.</p>
Community	<p>The proposed height at 23 - 23A Pembroke is too high in comparison with surrounding properties. The associated DCP should set controls should restrict windows above ground level at the rear of 23-23A Pembroke Street.</p>	<p>The Planning Proposal proposes to reduce the heights for 23-23A Pembroke Street from 12 metres to 11 metres, effectively permitting a potential for a 3-storey residential flat building. Adjoining lands to the east of this Planning Proposal along Pembroke Street currently have a maximum building height of 8.5 metres. Lands adjacent to the west of this Planning Proposal along Pembroke Street currently have a maximum building height of 17.5 metres. Land subject to this Planning Proposal (21-29 Essex St) is proposed to have maximum building height reduced from 17.5m to 11m, thereby providing for an effective transition of scale away from the Epping Town Centre and higher density development.</p>

Submission	Submission Summary	Council Officer Response
		It is noted that any future development applications on these sites will need to comply with the applicable planning controls prescribed in documents such as the Hornsby DCP 2013 and the NSW Apartment Design Guide (ADG) to ensure that impacts on adjoining neighbour's privacy and outlook are minimised through adequate building separation and landscaping.
Community	The proposed development will not provide a suitable interface with adjoining properties. It does not deal with interface issue of solar access, privacy issues, screening, and noise.	The intended effect of this Planning Proposal is to provide a more consistent and appropriate built form transition to the East Epping HCA. Any future development applications on these sites will need to be assessed against the Hornsby DCP 2013 and the NSW Apartment Design Guide (ADG) to ensure that amenity impacts are suitably managed, to ensure that impacts on adjoining neighbour's solar access, privacy and outlook are minimised through adequate building separation and landscaping.
Community	The proposed height of the development should be more consistent with the Epping Planning Review to reduce the impact of height and scale of the buildings on surrounding residents. A streetscape with large street trees and similar height dwellings would be an attractive zone interface.	<p>The intended effect of the Planning Proposal is to provide a more consistent and appropriate built form transition to the East Epping HCA. The Planning Proposal proposes to reduce the heights for 23-23A Pembroke Street from 12 metres to 11 metres, effectively permitting a potential for a 3-storey residential flat building.</p> <p>Adjoining lands to the east of this Planning Proposal along Pembroke Street currently have a maximum building height of 8.5 metres. Lands adjacent to the west of this Planning Proposal along Pembroke Street currently have a maximum building height of 17.5 metres. Land subject to this Planning Proposal (21-29 Essex St) is proposed to have maximum building height reduced from 17.5m to 11m, thereby providing for an effective transition of scale away from the Epping Town Centre and higher density development.</p> <p>Key development controls such as the Hornsby DCP 2013 and NSW Apartment Design Guidelines will ensure that amenity impacts are suitably managed, to ensure that impacts on adjoining neighbour's solar access,</p>

Submission	Submission Summary	Council Officer Response
		privacy and outlook are minimised through adequate building separation and landscaping.
Community	There has been a decade of rezoning recommendations and continuing uncertainty with various unsatisfactory zoning and DCP amendments in the Epping area	The Planning Proposal is a progression of the Epping Planning Review undertaken by Council in 2017 and 2018. The scope of the Epping Planning Review was to address the unintended consequences of the planning control amendments brought into effect by Department of Planning, including issues of development interface with Heritage Conservation Areas.
Community	<p>The corner store at the intersection of Norfolk Road and Pembroke Street is a heritage item and nearby development should respect it, not overwhelm it. Object to any rezoning of the subject land.</p> <p>Concern about local traffic congestion due to the removal of the right turning lane on Langston Place, the overdevelopment of Epping Town Centre. Key intersections such as the Essex Street lights and the roundabouts at the intersection of Essex Street/Pembroke Street and at the intersection of Norfolk Road and Chester Street as congested. Allowing even more intensive development on Pembroke Street will only exacerbate the situation.</p>	<p>The corner store is located at 25 Pembroke Street and is located within the East Epping Heritage Conservation Area. The intended effect of the Planning Proposal is to address existing built form transitional issues from high density residential areas to adjacent heritage conservation areas. The Planning Proposal reduce current height controls at the properties directly adjacent to the corner store at 23-23A Pembroke Street it is proposed to reduce the height of buildings from 12 metres to 11 metres (3 storey residential flat buildings).</p> <p>The Epping Planning Review acknowledged that traffic congestion issues have arisen since the NSW Government's rezoning in 2014 and unprecedented rate of development within the Epping Town Centre. The Epping Town Centre Traffic Study undertaken in 2017 concluded that traffic will continue to deteriorate, even with potential local and State road improvements in place. Council is progressing a series of other actions to assist with addressing traffic issues in the Epping town centre, including implementing a range of local and State road improvement works and other planning controls. Any future development applications will consider matters relating to traffic impacts, vehicular access arrangements, and vegetation management be in accordance with the controls and standards set out in the Hornsby LEP 2013 and Hornsby DCP 2013.</p>

Submission	Submission Summary	Council Officer Response
Community	1 Essex Street has been omitted from the proposed rezoning.	1 Essex Street is located within the East Epping Heritage Conservation Area. Properties within the HCA are not included in this Planning Proposal, rather the Planning Proposal seeks to amend planning controls on those properties directly adjacent to the HCA.
Epping Civic Trust	<p>The rezoning at 23-23A Pembroke Street would lead to poor heritage interface including the heritage item at 25 Pembroke Street. Increased FSR on this site should not exceed the rate proposed for Rockleigh Way.</p> <p>If the site was redeveloped and had higher density, there would be very poor traffic outcomes as this site access is onto a very high traffic part of Pembroke Street and is impacted by the 700+ primary age children that need to access the neighbouring Epping Public School.</p> <p>The proposed development would extend higher density development further down Pembroke Street and would impact the current streetscape</p>	<p>The intended effect of this Planning Proposal is to provide a more consistent and appropriate built form transition to the East Epping HCA. The Planning Proposal aims to reduce current height controls at 23-23A Pembroke Street to reduce the height of buildings from 12 metres to 11 metres. Additionally, it is proposed that a maximum FSR control of 0.8:1 will apply to this site. By creating a better transition in built form from land to the west and east of the site, the changes will result in an improved interface with 25 Pembroke Street. Any future detailed development application will need to be supported by a Heritage Impact Assessment, which will need to consider the adjacent Heritage Conservation Area in the design, ensuring that any proposal impact on this HCA. Key development controls such as the Hornsby DCP 2013 and NSW Apartment Design Guidelines will ensure that impacts are suitably managed, to ensure that impacts on adjoining neighbour's solar access, privacy and outlook are minimised through adequate building separation and landscaping.</p> <p>The Epping Planning Review acknowledged that traffic congestion issues have arisen since the NSW Government's rezoning in 2014 and unprecedented rate of development within the Epping Town Centre. The Epping Town Centre Traffic Study undertaken in 2017 concluded that traffic will continue to deteriorate, even with potential local and State road improvements in place. Council is progressing a series of other actions that Council to assist with addressing traffic issues in the Epping town centre, including implementing a range of local and State road improvement works and other planning controls, including:</p> <ul style="list-style-type: none"> - A planning proposal to 'switch off' Clause 4.6 variations which seek increased density on residential within the Town Centre. - Amendments to car parking rates in the DCP.

Submission	Submission Summary	Council Officer Response
		<p>- Advocating to the State Government for road and intersection improvements.</p> <p>Residential flat buildings will remain a permitted use at Essex and Pembroke Streets, however at a reduced height (or scale).</p>
Community	<p>The proposed rezoning of 23 and 23A Pembroke Street will lead to a poor interface with the remaining properties within the East Epping Heritage Conservation Area, namely 9 Norfolk Road.</p> <p>The proposed development will lead to an increase in traffic which is a danger to children at Epping Public School, and a loss of local character.</p>	<p>As noted in the Epping Town Centre (East) Heritage Review commissioned and endorsed by Council as part of the Epping Planning Review, the proposal will result in an improved interface to the East Epping HCA through the introduction of a more appropriate transition of scale.</p> <p>As detailed above, the intended effect of the Planning Proposal is to address existing built form transitional issues from high density residential areas to adjacent heritage conservation areas. The Planning Proposal aims to reduce current height controls. Residential flat buildings will remain a permitted use at Essex and Pembroke Streets, however at a reduced height (or scale). It is intended that the outcomes of the Planning Proposal will in fact improve the interface with 9 Norfolk Road by virtue of the reduced zoning and maximum allowed building height of land to the west and south.</p> <p>Overall, this planning proposal includes provisions which reduce the permissible residential density of land. The reduction in density is of minor scale and thus of minor significance of traffic conditions.</p>
Community	<p>The rezoning would increase development in an area where there are already infrastructure issues (traffic, primary and high school places, pedestrian access) and interrupt the existing streetscape unnecessarily.</p>	<p>Residential flat buildings will remain a permitted use at Essex and Pembroke Streets, however at a reduced height (or scale) by virtue of the proposed changes to density and building heights.</p> <p>It is the responsibility for the NSW Government to plan for the future need schools' infrastructure.</p>
Community	<p>This proposal should not be implemented due to the following:</p>	<p>Council endorsed the preparation of a Planning Proposal which included properties at 23-23A Pembroke Street at its meeting on 9 July 2018, including</p>

Submission	Submission Summary	Council Officer Response
	<ul style="list-style-type: none"> - Consistency with the Council resolution at the which was to retain the R3 zoning for 23-23A Pembroke Street, Epping. The change to the zoning seems to have been initiated by Council officers at a later date. While I was aware of the approval on 9 July 2018 it is only during this Exhibition that I have identified this significant change to rezone to R4. - Gives a poor transition to HCA and impacts heritage item at 25 Pembroke Street. - Allows for undesirable height increase through amalgamation with Essex Street developments. - Safety risk to students at Epping public school through dangerous vehicle access arrangements. - Traffic congestion. - Market is already oversaturated with apartments. - Density is too high. - Loss of mature trees. <p>There is reference on page 18 to achieving SEPP (Urban Renewal) 2010 through the PP stimulating renewal within the nominated precinct of Granville. I presume this is a typo.</p>	<p>the controls proposed as per the Gateway Determination of 10 January 2020, including:</p> <ul style="list-style-type: none"> - Reduce the height of buildings from 12 metres to 11 metres. - Change the zoning from R3 to R4. - Apply a maximum FSR control of 0.8:1. <p>This Planning Proposal is a result of this Council resolution. The intended effect of the Planning Proposal is to address existing built form transitional issues from high density residential areas to adjacent heritage conservation areas. By creating consistency in built form from land to the west and east of the site, the changes will result in an improved interface with 25 Pembroke Street.</p> <p>Overall, this planning proposal includes provisions which reduce the permissible residential density of land. The reduction in density is of minor scale and thus of minor significance of traffic conditions.</p> <p>Residential flat buildings will remain a permitted use at Essex and Pembroke Streets, however at a reduced height (or scale).</p> <p>The Epping Planning Review acknowledged that traffic congestion issues have arisen since the NSW Government's rezoning in 2014 and unprecedented rate of development within the Epping Town Centre. The Epping Town Centre Traffic Study undertaken in 2017 concluded that traffic will continue to deteriorate, even with potential local and State road improvements in place. Council is progressing a series of other actions to assist with addressing traffic issues in the Epping town centre, including implementing a range of local and State road improvement works and other planning controls. Any future development applications will consider matters relating to traffic impacts, vehicular access arrangements, and vegetation management be in accordance with the controls and standards set out in the Hornsby LEP 2013 and Hornsby DCP 2013.</p>

Submission	Submission Summary	Council Officer Response
		There is reference on page 18 to achieving SEPP (Urban Renewal) 2010 in relation to Granville is an error and will be amended.
Community	The proposed development will lead to additional traffic in an already congested area leading to potential accidents involving children from Epping Primary School.	The Planning Proposal results in a slight reduction in height, therefore density. Any future development applications will consider matters relating to traffic impacts and vehicular access arrangements in accordance with the controls and standards set out in the Hornsby LEP 2013 and Hornsby DCP 2013.
Community	The proposal will have an irreversible impact if removing part of the East Epping HCA, namely at the corner of Pembroke Street and Norfolk Road, specifically No. 25 Pembroke Street.	At its meeting of 9 July 2020 Council resolved that there would be no change to the current heritage overlay which applies to 25 Pembroke Street noting it forms part of the East Epping Heritage Conservation Area. Rather this planning proposal seeks to make amendments to development controls which provide a more appropriate interface with properties to the west of 25 Pembroke Street.
Community	Rezoning of 23 & 23A Pembroke needs to be reconsidered.	As part of the 2014 rezoning by the NSW Government, the properties at 23 and 23A Pembroke Street were 'up zoned' to allow for residential flat buildings. This Planning Proposal proposes to reduce the heights for 23-23A Pembroke Street from 12 metres to 11 metres, effectively reducing the height of a potential for a 3-storey residential flat building.
Landowner (within the Planning Proposal area)	<p>I strongly oppose to the proposal of reducing the maximum height from 17 metres to 11 metres and applying maximum floor space ration of 0.6:1.</p> <p>In equitable treatment of Essex Street and the height limits, citing examples at 7-9 Essex St, 10 Essex St, 15-19 Essex St, 22-26 Essex St and 1-7 Crandon Road and 9-11 Crandon Road and 2-4 Crandon Road.</p> <p>The proposal would ruin the local character of Essex Street.</p>	<p>In relation to the issues raised in relation to nearby properties and inequitable and inconsistent height limits. The properties listed have a maximum building height of 17.5m under the Hornsby LEP 2013. The purpose of the Planning Proposal is to specifically address issues of development interface with Heritage Conservation Areas. The reason the cited properties have not been included in the Planning Proposal are as follows:</p> <ul style="list-style-type: none"> Properties at 10, 22-26 Essex Street and 1-7, 9-11 and 2-4 Crandon Road are not at the 'interface' (or adjoining) the East Epping HCA, and their inclusion in the Planning Proposal would not specifically meet the purpose which is to address issues of development interface with

Submission	Submission Summary	Council Officer Response
	<p>The proposal would reduce future accommodation capacity and as a result reduce Council rate revenue for local services and infrastructure.</p> <p>The proposal will negatively impact land value resulting in lower government tax revenue.</p>	<p>Heritage Conservation Areas (HCA). Refer Figure 18 for the location of the Essex Street properties and the East Epping HCA.</p> <ul style="list-style-type: none"> • At the time Council resolved at its meeting on 9 July 2018 to prepare a Planning Proposal relating to various properties in East Epping, 7-9 Essex Street had a development approval (approved by Hornsby Council on 11 March 2015 reference DA/1110/2014) for the construction of a 5 storey residential flat building, and therefore the development (now constructed) realised the planning controls relating to the site. • In relation to 15-19 Essex Street a pre-lodgment application was submitted with Council for the construction of a 6 storey residential flat building. It is noted that the subsequent development application (reference DA/546/2018) lodged with Council was subject to an appeal to the NSW Land and Environment Court and subsequently refused. <p>Council accept that the Planning Proposal will reduce residential capacity. The purpose of the Planning Proposal is to address transitional issues arising from NSW Government rezoning of the Epping Town Centre in 2014 and impacts on adjacent heritage conservation areas. The economic impact on NSW Government in relation to land tax revenue is not a relevant consideration of the planning proposal.</p>
Community	Enquiry relating to what can be built on land at Norfolk Road North Epping.	Further information and contact details for Council's Development Advisory Team was passed onto this enquiry.
Community (Various)	<p><i>The following submissions relate to the Rose Street Precinct and have been combined for the purpose of a consistent response.</i></p> <ul style="list-style-type: none"> - The proposed development does not provide scope for suitable screen planting to mitigate privacy and acoustic issues along Rose street - Council's Heritage Consultant for the Epping Planning Review recommended that the Rose 	The Rose Street Precinct does not form part of this Planning Proposal. Council resolved at its meeting on 9 July 2018 that no further action be taken to amend the Planning Controls that apply to the Rose Street Precinct until a drainage analysis detailing the implications of the redevelopment of the Rose Street Precinct Sites is completed and reported to Council.

Submission	Submission Summary	Council Officer Response
	<p>Street Precinct have residential flat development of the same height as Maida Road given the topography and there is no historical significance.</p> <ul style="list-style-type: none"> - Maida Road development not consistent with the Hornsby DCP. The height of the development is over what is prescribed in the DCP which will lead to a loss of amenity (solar access, privacy & noise). - It is recommended that Rose St Precinct is zoned to R4 as Rosebank Ave has been for a more consistent approach. - The north side of Briggs Rd should be rezoned to the same level as the south side of Maida Road. Due to the topography, it would provide a good transition to the R2 zone to the south of Brigg Road. - The Maida Road 4 storey development is not fair in regard to interface of zoning from R3 to single-level housing due to privacy issues. Rose Street precinct should be accepted as a Medium to High Density Residential Zone. - The proposal will lead to Detrimental North-South Interface Orientation with R2 Zone to the South and subsequent significant loss of solar access. - The Epping Planning Review recommended for apartment development to extend into the Rose St Precinct, but this has not occurred. The result will be a loss of privacy, poor interface outcomes, issues with solar access, no room for screening trees and noise issues. 	

Submission	Submission Summary	Council Officer Response
Community	Rose Street Precinct has similar or worse interface issues and should also be rezoned accordingly.	As detailed above, Council has considered several areas in Epping, including Rose Street, and its interface with existing development. In relation to Rose Street Precinct the issue of topography and drainage was raised in relation to any rezoning / redevelopment option and, as such, Council resolved at its meeting on 9 July 2018 <i>"That no further action be taken to amend the Planning Controls that apply to the Rose Street Precinct until a drainage analysis detailing the implications of the redevelopment of the Rose Street Precinct Sites is completed and reported to Council."</i>

Table 2 - Planning Proposal for 1-7 and 2-8 Rosebank Avenue and Draft DCP Amendments relating to Rosebank Avenue

Submission no.	Submission Summary	Council Officer Response
Agency Submissions		
Transport for NSW	TfNSW has no objections to the Planning Proposal.	Noted.
Heritage NSW	<p>The planning proposals and DCP amendments will not have a direct physical or visual impact on any heritage items listed on the State Heritage Register. However, we do note that the planning proposals and DCP amendments have impacts on heritage conservation areas (HCA) listed under Council's Local Environmental Plans (LEP), including:</p> <ul style="list-style-type: none"> • Removal of part of the Rosebank Avenue HCA. • It is recommended that the Council consider the impact on the heritage significance of Rosebank Avenue HCA by the proposed partial removal to allow development. In addition, the overshadowing and visual impacts on all the abovementioned HCAs and the individual Local heritage items within them from potential future development permitted by these planning proposals should also be considered. • Should the planning proposals be supported, Council should give consideration to the design of any future development for sites adjoining the HCAs and heritage items to minimise any further impacts from development. 	<p>The southern part of the HCA faces serious interface issues cause by developments up to a height of 5 storeys adjacent to the HCA. The developments have caused significant resident concern in relation to their privacy and amenity. Arising from these concerns the planning proposal proposes to remove the conservation area listing from properties in the southern part of Rosebank Avenue.</p> <p>The planning proposal is considered appropriate as it will help to resolve interface issues.</p> <p>In addition, the area of the HCA to be retained reflects the heritage values recognised in the Statement of Significance for the HCA and will retain a highly intact interwar streetscape. A bridge over the creek providing evidence of the early character of the area is within the retained area of the HCA.</p> <p>The Draft DCP amendments have been publicly exhibited with the Planning Proposal to support the proposed controls and ensure sympathetic transition to the adjoining heritage items and heritage conservation area. Proposed controls include building setbacks, landscaping and tree retention. These are discussed in detail in the body of the report</p>
Hornsby Council	The Epping Town Centre Heritage Review 2013 recommended that the East Epping and Rosebank	In December 2016, the Epping Planning Review was commenced by City of Parramatta Council. The scope of the review was to address the unintended

Submission no.	Submission Summary	Council Officer Response
	<p>Avenue HCAs be listed in accordance with current boundaries and the adjoining residential intensification precincts be limited to three storeys, along with the implementation of several development controls for interface areas, including minimum setbacks, reduced heights and density, and landscaping. Accordingly, Council resolved to forward a submission generally supporting the findings of the heritage report and the progression of the Epping Town Centre UAP in accordance with the recommendations of the review.</p> <p>Ultimately, DPE proceeded with permitting five storey developments on land adjoining the East Epping and Rosebank Avenue HCAs in the final Epping Town Centre UAP Plan, leading to the interface and transition issues which are now sought to be rectified.</p>	<p>consequences of the planning control amendments brought into effect of DPE as well as allowing Council to manage current Planning Proposals seeking additional growth within the Town Centre. It also allowed Council to progress matters considered by the former Hornsby Shire Council, including heritage matters.</p> <p>The Epping Planning Review Discussion Paper (June 2017) presented seven built form options for Rosebank Avenue HCA interfaces with the land zoned R4 High Density residential and the strengths and weaknesses of each option were detailed. The purposes of these options was to gain feedback from the community as to what resolution was acceptable.</p> <p>Following assessment of built form options and community feedback Council resolved at its meeting on 9 July 2018 that the current planning proposal is the best means of achieving the objectives/intended outcomes for the HCA area. The proposed amendment to Hornsby LEP 2013 will help to satisfactorily resolve interface issues whilst still retaining the significance of the remaining portion of the HCA.</p>
Community Submissions		
Community	<p>The proposal will lead to additional traffic, destroy the existing peaceful environment and increase the traffic workload for schools in Epping, Beecroft and Carlingford</p>	<p>It is estimated that the planning proposal (which proposes the rezoning of land from R2 Low Density Residential to R4 High Density Residential) could hypothetically result in approximately 67 units being accommodated over the sites, resulting in an additional 60 dwellings. On balance, this is considered reasonable to increase density in this location to address the severe amenity impacts currently experienced by adjacent residents. In addition, land where density is proposed to be increased is located appropriately 400m from the Epping Town Centre and 650m from high frequency transport infrastructure, including bus routes, Epping Railway Station and Sydney Northwest Metro.</p>

Submission no.	Submission Summary	Council Officer Response
Community	Will the planning proposal have an impact on Kent Street Reserve?	Kent Street Reserve is located to the north west of the Planning Proposal. If No. 5 & 7 Rosebank Avenue were to realise a 11 metre residential flat building in the future (as a intended effect of the Planning Proposal), due to the proposed height and distance from the boundary with the Reserve, it is not expected to have any direct impacts in terms of overshadowing or direct overlooking.
Community	<p>The proposals will largely affect amenity and solar access.</p> <p>I strongly disagree with three sub-proposals of the No.2 Planning Proposal for 1-7 and 2-8 Rosebank Avenue, Epping.</p>	<p>The intended outcome of the Planning is to provide a more consistent and appropriate built form transition between adjoining Heritage Conservation Area and the adjacent high density residential development. In relation to solar access, consideration has been given to properties to the south through setback controls within the draft DCP Amendments (proposed to support this Planning Proposal) are not only designed to ensure a sympathetic transition to the adjoining heritage item and heritage conservation area, but to allow for an increased setback between existing and proposed dwellings to ensure that impacts such as solar access are minimised as far as possible. Any future development applications will consider matters relating to solar access in accordance with the controls and standards set out in the Apartment Design Guide (ADG), Hornsby LEP 2013 and Hornsby DCP 2013.</p>
Community	<p>I ask that Council reconsider its recommendations regarding the heritage listed properties at 9 & 10 Rosebank Avenue.</p> <p>Construction of future apartments will cause disruption to residents.</p>	<p>The southern part of the HCA faces serious interface issues cause by developments up to a height of 5 storeys adjacent to the HCA. The developments have caused significant resident concern in relation to their privacy and amenity. Arising from these concerns the planning proposal proposes to remove the conservation area listing from properties in the southern part of Rosebank Avenue. The planning proposal is considered appropriate as it will help to resolve interface issues.</p> <p>It is understandable that there may be future construction impact in relation to new development, however this is a short-term impact and will be considered as part of detailed development applications.</p>

Submission no.	Submission Summary	Council Officer Response
Landowner (within the Planning Proposal area)	Supportive of the rezoning from R2 to R4 High Density, however would like the proposed height to be increased from 11m to 12m. Concern that the height is not sufficient to allow for consolidation and redevelopment.	The intended effect of the Planning Proposal is to provide an improved transition of scale where currently one does not exist. The proposed building heights for the lands the subject of this Planning Proposal have been considered the most appropriate means to achieving a 3 storey residential flat building, while note resulting in additional impacts to surrounding properties.
Community	<p>The Department of Planning initially determined that Council's planning proposals should proceed on the basis of reducing the proposed heights on Rosebank Ave back to 8.5 m to preserve heritage at 9 & 10 Rosebank Ave.</p> <p>A recent traffic study found there was no capacity to further increase dwelling numbers in the Epping Town Centre.</p> <p>The proposal is not in line with the recommendation of the 2017 Epping Town Centre (East) Heritage Review or Ministerial Direction 2.3 Heritage Conservation. Consultation with the Office of Environment and Heritage and Premier and Cabinet needs to be undertaken.</p>	<p>The Planning Proposal for Rosebank Avenue received Gateway Determination from Department of Planning, Industry and Environment (DPIE) on 10 January 2020 and included a condition (Condition 1) which reduced the height of buildings within the Planning Proposal from the proposed 11 metres to 8.5 metres for 6-8 and 5-7 Rosebank Avenue. The reasons stated was <i>"to better preserve the context of the two listed heritage items and the surrounding streetscape"</i>.</p> <p>Following this Council wrote to DPIE requesting an amendment to this condition for the reasons below:</p> <ul style="list-style-type: none"> - Reducing the height of buildings on these sites will reduce incentives for amalgamation for a residential flat building and may result in delivery of multi-unit dwellings (town houses), which would likely result in reduced setbacks, greater site coverage and potential additional tree loss (compared to a residential flat building). - The Planning Proposal is supported by draft DCP controls with any new residential flat building would be required to be setback to the boundary 6 metre at ground level and 9 metres at the second and third storeys. This would create a stepped built form interface appropriate transition between it and the Heritage Conservation Area. <p>DPIE then subsequently issued an alteration on 30 March 2020 and requesting that Council <i>"prior to public exhibition, amend the planning proposal to outline a suitable planning mechanism to ensure transition of height and scale to the adjoining land to the north and retain streetscape values. This may include the</i></p>

Submission no.	Submission Summary	Council Officer Response
		<p><i>requirement to prepare a Development Control Plan that comes into force once the planning proposal is finalised.</i>" Council has prepared a Draft DCP which supports this proposal.</p> <p>The Epping Town Centre (East) Heritage Review (June 2017) purpose was to inform strategic land use decisions across part of the Epping Town Centre previously under the jurisdiction of Hornsby Shire Council and in addition to review related concerns of residents on a number of heritage issues. The Heritage Review found the Rosebank Avenue HCA to have maintained the significance and intactness established in previous studies and was recommended to be retained in full. However, this study did not fully address the land use conflicts occurring at the interface at the rear some of these properties and strong community concerns.</p> <p>On 9 July 2018, a report was presented updating Council on the implications for the findings of the Epping Planning Review, including further assessment work undertaken for Rosebank Avenue HCA. In summary, the Council report stated that interface issues represent a failure of the planning system which has created a current land use conflict. They are as a result of the Priority Precinct process and subsequent development application decisions. The current situation where 5 to 6 storey buildings overlook and encroach on the backyards of single dwellings is considered unacceptable. In conclusion, Council accepted that there are severe interface issues occurring in the southern half of the Rosebank Avenue Heritage Conservation Area.</p> <p>Council therefore resolved at its meeting on 9 July 2018 that no planning proposals would be supported that increased residential density unless it addressed matters relating to heritage interface with high density areas. It also resolved to proceed with this Planning Proposal.</p> <p>The Planning Proposal acknowledges that it is not consistent with the Ministerial Direction in relation to Heritage Conservation and has undertaken</p>

Submission no.	Submission Summary	Council Officer Response
		consultation with the NSW Heritage NSW as part of the public exhibition of the Planning Proposal. The Planning Proposal is considered appropriate as it will help to resolve interface issues and community concerns. In addition, the area of the HCA to be retained reflects the heritage values recognised in the Statement of Significance for the HCA and will retain a highly intact interwar streetscape. A bridge over the creek providing evidence of the early character of the area is within the retained area of the HCA.
Community	<p>There is too much ongoing disruption from construction in the local area. Construction in the local area has caused issues with traffic congestion.</p> <p>The Epping Town Centre Traffic Study 2018 demonstrates no further capacity for more development in the area. The proposal will cause further traffic congestion.</p> <p>Department of Planning's Gateway Determination report concluded that Council's planning proposals should proceed on the basis of reducing the proposed heights on Rosebank Ave back to 8.5 m to preserve heritage. There is no need for additional height as it will cause overshadowing to existing neighbouring apartments.</p>	<p>Future detailed development applications will need to consider how to mitigate impacts which result from construction traffic.</p> <p>The intended effect of the Planning Proposal is to address issues relating to the transition of scale within the Epping Town Centre. While it is acknowledged that zoning changes may result in additional traffic generation, it is considered reasonable on balance to address the amenity impacts currently experienced by residents. In addition, land where density is proposed to be increased is located appropriately 400m from the Epping Town Centre and 650m from well serviced transport infrastructure, including bus routes, Epping Railway Station and Sydney Northwest Metro.</p> <p>Refer above Council officer response immediately above this one for a detailed report in relation to height of buildings and the Gateway Determination process.</p>
Community	Epping is becoming overcrowded and increasingly unliveable as such we do not support the height increase.	The intended effect of the Planning Proposal seeks to address existing transition of scale issues which exist within the Epping Town Centre. While the Planning Proposal will likely result in additional dwellings and therefore residents, the impacts which will result from this redevelopment are considered reasonable on balance.
Epping Civic Trust	The proposal is different to what was in the original Gateway Determination which noted the proposed	The Planning Proposal for Rosebank Avenue received Gateway Determination from Department of Planning, Industry and Environment

Submission no.	Submission Summary	Council Officer Response
		<p>The intended effect of the Planning Proposal is to address issues relating to the transition of scale within the Epping Town Centre. While it is acknowledged that zoning changes may result in additional traffic generation, it is considered reasonable on balance to address the amenity impacts currently experienced by residents. In addition, land where density is proposed to be increased is located appropriately 400m from the Epping Town Centre and 650m from well serviced transport infrastructure, including bus routes, Epping Railway Station and Sydney Northwest Metro.</p>
Community	<p>The heritage conservation area should not be reduced in size.</p>	<p>The Planning Proposal is considered appropriate as it will help to resolve interface issues including resident concerns relating to overlooking and privacy as a result of adjacent residential flat buildings in Hazelwood Place. In addition, the area of the HCA to be retained reflects the heritage values recognised in the Statement of Significance for the HCA and will retain a highly intact interwar streetscape. A bridge over the creek providing evidence of the early character of the area is within the retained area of the HCA.</p>
Community	<p>Object to the Planning Proposal to rezone the southern half of Rosebank Ave from R2 to R4 thereby permitting the building of 3 storey apartments.</p> <p>Rosebank is a small and already very congested street.</p> <p>It is therefore not prudent to rezoned to allow 100s more dwellings in this area which will further contribute to the traffic congestion.</p> <p>Placing 3 storey apartments next to Heritage Items at 9 and 10 Rosebank Avenue should not be permitted. This will create unacceptable interface</p>	<p>The planning proposal will result in a rezoning of land from R2 Low Density Residential to R4 High Density Residential which will facilitate potential amalgamation of lots and new residential flat building development. Approximately 67 units could be accommodated over the sites, resulting in an additional 60 dwellings.</p> <p>The Planning Proposal seeks to increase the height of buildings from 8.5m to 11m (3 storey), which creates a transition in built form from 17.5 metres (5 and 6 storey) residential flat buildings at Hazelwood Place to the Rosebank Avenue single storey dwellings. The Draft DCP controls seek to support this transition through generous side and rear setbacks to the adjacent heritage conservation area and heritage items. The setbacks will allow for landscaping, including retention of trees and allowing for planting of trees.</p>

Submission no.	Submission Summary	Council Officer Response
	<p>issues and destroy the integrity of the Heritage Items.</p> <p>This will result in further trees being removed which in turn will impact on the wildlife.</p>	<p>It is recognised that there are high amenity street trees currently in Rosebank Avenue. Therefore, to encourage their protection, it is proposed to include in the DCP controls, which support this Planning Proposal that "street trees along Rosebank Avenue shall be retained and not be adversely impacted as part of any new development."</p>
<p>Community</p>	<p>The development resulting from changes to the Heritage Conservation area will result in loss of vegetation, noise increase, more traffic and loss of low density residential housing.</p>	<p>The Planning Proposal is considered appropriate, on balance, as it will help to resolve interface issues including resident concerns relating to overlooking and privacy as a result of adjacent residential flat buildings in Hazelwood Place.</p> <p>While it is acknowledged that zoning changes may result in additional traffic generation, it is considered reasonable on balance to address the amenity impacts currently experienced by residents the anticipated rates are likely to be low even at peak periods. In addition, land where density is proposed to be increased is located appropriately 400m from the Epping Town Centre and 650m from well serviced transport infrastructure, including bus routes, Epping Railway Station and Sydney Northwest Metro.</p> <p>In relation to vegetation, the setback controls within the draft DCP Amendments (proposed to support this Planning Proposal) are not only designed to ensure a sympathetic transition to the adjoining heritage item and heritage conservation area but to allow for trees to be retained and planted to maintain the landscape amenity and setting of adjoining heritage items and heritage conservation areas.</p> <p>Furthermore, it is recognised that there are high amenity street trees currently in Rosebank Avenue. Therefore, to encourage their protection, it is proposed to include in the DCP controls, which support this Planning Proposal "<i>Street trees along Rosebank Avenue shall be retained and not be adversely impacted as part of any new development.</i>"</p>

Submission no.	Submission Summary	Council Officer Response
Community	<p>Rosebank Avenue has heritage listing protection & you are trying to get rid of it.</p> <p>It is one of the very few leafy streets many of which have been allowed to be removed with no consideration or care for the environment.</p> <p>The proposal to increase the height for 5,6 & 7 Rosebank Avenue is not acceptable.</p>	<p>Council accepts that HCA will be reduced, and that the planning proposal is not in line with Ministerial Direction 2.3 Heritage Conservation.</p> <p>The setback controls within the draft DCP Amendments (proposed to support this Planning Proposal) are designed to ensure a sympathetic transition to the adjoining heritage item and heritage conservation area</p> <p>In relation to vegetation, the setback controls within the draft DCP Amendments (proposed to support this Planning Proposal) are not only designed to ensure a sympathetic transition to the adjoining heritage item and heritage conservation area but to allow for trees to be retained and planted to maintain the landscape amenity and setting of adjoining heritage items and heritage conservation areas.</p> <p>Furthermore, it is recognised that there are high amenity street trees currently in Rosebank Avenue. Community	I strongly disagree with three sub-proposals of the No.2 Planning Proposal for 1-7 and 2-8 Rosebank Avenue, Epping.	Noted.
Landowner (adjacent to Planning Proposal area)	<p><i>The following is a summary of the submission from 9 Rosebank Avenue, Epping.</i></p> <p>A 10 metre setback should be implemented and the R4 zone interface to the HCA and Heritage item.</p> <p>The heritage value of the item at 9 Rosebank will be greatly reduced, along with the economic value.</p>	<p>As a result of this submission, Council undertook the following:</p> <ul style="list-style-type: none"> - Councillor and Council Officer site visit to no. 9 Rosebank Avenue on 16 December 2020 (as requested) to inspect and discuss on site the potential impact on this property. - Council's Urban Design team tested an option to accommodate an increased setback (9m ground & 12m upper). - Council Officers consulted directly with owners of 5 and 7 Rosebank Avenue (letter and meeting in person) in relation to this option to vary to

Submission no.	Submission Summary	Council Officer Response
	<p>The living amenity will be significantly affected if the current setback is implemented. The amendment will lead to a further loss of privacy.</p> <p>The proposed FSR of 0.8:1 is too high and should be reduced to 0.6:1.</p> <p>The Epping Traffic study shows, even without current proposal, there will be queue along the whole Cliff Road waiting to enter Carlingford Road during peak hours. It is already stated that this is not acceptable</p> <p>Reducing the FSR to 0.6:1 will improve the built form and a greater setback will improve heritage interface.</p> <p>Reducing the FSR will help increase the front setback, mitigating impact on the streetscape and preserve historical value of the heritage item at 9 Rosebank Avenue.</p>	<p>the FSR within the Planning Proposal and setback controls within the Draft DCP.</p> <p>Findings of the urban design testing which sought to assess the effect of increased setbacks concluded that reductions to the side setback between 7 and 9 Rosebank Avenue would impact on the available floor space for 5-7 Rosebank Avenue from 0.8:1 to between 0.6:1 – 0.65:1.</p> <p>The reduced FSR may also lead to unintended consequences, such as redevelopment for uses other than residential flat buildings such as townhouses or multi-unit dwellings. Given the site specific controls relating to greater setback provisions have been drafted to apply to RFBs, should redevelopment occur for other uses these controls would not apply, thus reducing opportunities for deep soil planting.</p> <p>In relation to issues raised of privacy and overlooking, it is considered that an increase in setbacks would not achieve any greater privacy or outlook concerns. It is likely that any future residential flat building would contain 3 units per level and the potential for balconies to be located north facing. The balconies of ground floor units, which is proposed to be setback 6 metres from the boundary, would not directly impact on overlooking and privacy. Any future upper level unit balconies would be setback 9 metres from the boundary and would look onto the roof top of 9 Rosebank Ave and those balconies positioned in the north west corner could overlook the open space of 9 Rosebank Avenue. It is considered that proposed ground level setback of 6 metres, which allows for planting of mature trees and landscaping is the most appropriate method of providing adequate privacy and managing overlooking impacts</p> <p>Council Officers therefore recommend that some additional controls be put forward in the DCP to minimise potential overlooking and privacy impacts:</p>

Submission no.	Submission Summary	Council Officer Response
		<ul style="list-style-type: none"> new development located at 5 and 7 Rosebank Avenue, shall minimize the number of balconies facing northward. Those balconies facing west and north shall provide appropriate screening to minimise overlooking. That balconies cannot protrude in the front, rear and side setbacks.
Landowner (within the Planning Proposal area)	<p><i>The following is a summary of the submission from 5 Rosebank Avenue, Epping in direct response to the proposal to increase setbacks and potential reduce FSR between 5&7 Rosebank Ave and the boundary with 9 Rosebank Avenue.</i></p> <p>Given the heritage item is a dwelling house, a 6m separation from the boundary is sufficient and well exceeds what presently exists. An FSR of 0.65:1 is unusually low in an R4 zone and restrictive in terms of achieving a viable yield.</p> <p>The proposed 6m setback for three-storey units for sites within the Rosebank Avenue Planning Proposal would create a greater building separation than what currently exists. Further, the proposed three-storey height is less than the residential flat buildings located south-west of the heritage site.</p> <p>Increasing this side setback by an amount of 2.5m for 7 Rosebank Avenue achieves no obvious benefit to No. 9 in heritage terms, but it will have a considerable impact on the 7 Rosebank Avenue in terms of its development viability. Additionally, No. 9 is north of the development sites, meaning there will be no overshadowing.</p>	<p>Council Officer consider that a reduced FSR (density) controls may lead to unintended consequences, such as redevelopment for uses other than residential flat buildings such as townhouses or multi-unit dwellings. Given the site specific controls relating to greater setback provisions have been drafted to apply to RFBs, should redevelopment occur for other uses these controls would not apply, thus reducing opportunities for deep soil planting.</p> <p>The setback controls within the draft DCP Amendments (proposed to support this Planning Proposal) are not only designed to ensure a sympathetic transition to the adjoining heritage item and heritage conservation area but to allow for trees to be retained and planted to maintain the landscape amenity and setting of adjoining heritage items and heritage conservation areas.</p> <p>Notwithstanding, Council Officers therefore recommend that some additional controls be put forward in the DCP to minimise potential overlooking and privacy impacts:</p> <ul style="list-style-type: none"> new development located at 5 and 7 Rosebank Avenue, shall minimise the number of balconies facing northward. Those balconies facing west and north shall provide appropriate screening to minimise overlooking. That balconies cannot protrude in the front, rear and side setbacks.

Submission no.	Submission Summary	Council Officer Response
	<p>The orientation of living room windows towards the east and west of 9 Rosebank Ave mitigates against significant privacy impacts.</p> <p>A consistent FSR with nearby sites of 0.8:1 is appropriate, and the ultimate capability of the site can be determined once a Development Application is being assessed.</p>	

Table 3 - Minor corrections to the Epping Town Centre car parking provisions

Submission no.	Submission Summary	Council Officer Response
Transport for NSW	TfNSW has no objections to this amendment to the Hornsby Development Control Plan 2013.	Noted.
Heritage NSW	The DCP amendments will not have a direct physical or visual impact on any heritage items listed on the State Heritage Register.	Noted.
Hornsby Council	No specific comment.	-
Professional	The replacement of 'should' with 'must' is more than a housekeeping change and indicates a notable change by Council in their intended application of the parking requirements. 'Should' denotes flexibility in application and allows a development to respond to its site conditions and in the case of Epping Town Centre, its proximity to the Railway Station. 'Must' indicates a numerical requirement to which no flexibility may be permitted. Where an applicant provides an adequate justification for doing so, they should be provided with that opportunity.	<p>It is Council's intention to provide greater clarity around the need to provide adequate onsite parking to facilitate proposed development. Parking and traffic congestion is acknowledged as an issue within the Epping Town Centre. It is Council's intention that future developments having an obligation to help manage and mitigate these impacts, and it is hoped that this minor amendment to the DCP will encourage that.</p> <p>DCPs provide greater planning detail for developments, supplementing the zoning and development standards contained within Local Environmental Plans. DCPs allows flexibility to applicants to provide alternative design solutions to meet identified objectives or outcomes and have these alternatives considered on merit.</p>
Community	The changes to the HDCP 2013 to remove the Seniors Housing as per SEPP (Housing for Seniors or People with Disabilities) 2004 to be a 'minor' change. Anything which will impact adversely on seniors is not minor. Seniors need to be able to have cars to facilitate their independence.	The intended effect of the amendments to Council's endorsed car parking rates is to remove reference to specific car parking rates for Senior's Housing within the Epping Town Centre. Parking rates for development for seniors housing are outlined under the Seniors House SEPP, and would be applied by an authority in the event of a development seeking to deliver seniors housing.

Table 4 - A new provision to facilitate widening of the Forest Grove/Essex Street pedestrian link

Submission no.	Submission Summary	Council Officer Response
Transport for NSW	TfNSW has no objections to this amendment to the Hornsby Development Control Plan 2013.	Noted.
Heritage NSW	The DCP amendments will not have a direct physical or visual impact on any heritage items listed on the State Heritage Register.	Noted.
Hornsby Council	No specific comment.	-
Community Submissions		
Community	The improvement of seating in the public domain is not practical. It should be replaced with trees.	The proposed widening of the pedestrian link to 3m is intended to allow for public domain improvements including seating and planting. Seating is proposed to be balanced with planting through the provision of the increased width of the link to 3m. Seating is an important pedestrian activation tool, as it will promote the 'use' of the link to be more than just a thoroughfare.

PLANNING PROPOSAL

Relating to various properties in East Epping (Pembroke and Essex Streets and Rockleigh Park Precinct), Epping

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

INTRODUCTION

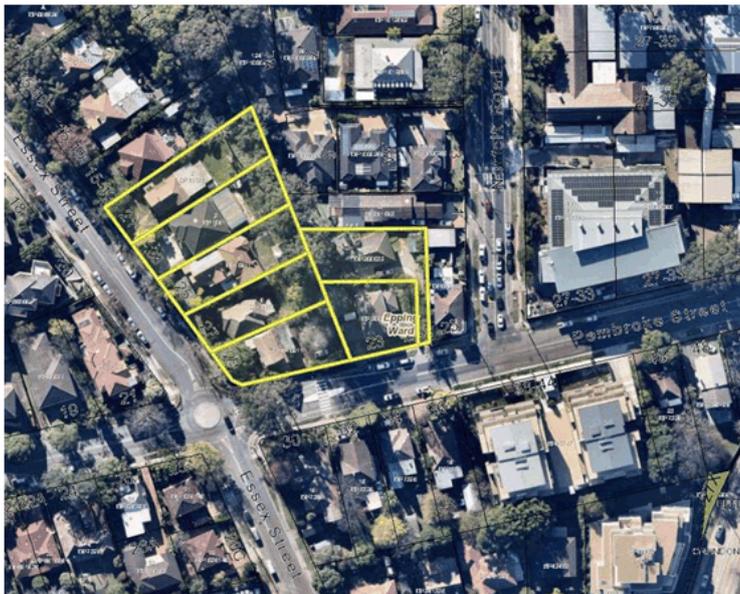

This planning proposal explains the intended effect of, and justification for, the proposed amendment to *Hornsby Local Environmental Plan 2013*. It has been prepared in accordance with Section 55 of the *Environmental Planning and Assessment Act 1979* and the Department of Planning and Environment (DP&E) guides, 'A Guide to Preparing Local Environment Plans' (August 2016) and 'A Guide to Preparing Planning Proposals' (August 2016) and 'Guidance for merged councils on planning functions' (May 2016).

Background and context

This planning proposal relates to 41 properties at 2-24 and 1-31 Rockleigh Way, 3-7 and 4-8 Brenda Way and 5A and 21-29 Essex Street and 23 and 23A Pembroke Street, Epping. The subject land is located near the Epping Town Centre and within the boundaries of the City of Parramatta Local Government Area (LGA). Prior to Council amalgamations on 12 May 2016 this area formed part of the Hornsby Shire LGA, therefore the existing planning controls for the sites are the Hornsby Local Environmental Plan 2013. The subject sites subject to this planning proposal are shown in **Figure 1 and 2** below.

The Planning Proposal is a progression of the Epping Planning Review undertaken by Council in 2017 and 2018 and the resolution made by Council on 9 July 2018 in relation to a number of matters resulting from the Epping Planning Review, including issues of development interface with Heritage Conservation Areas (HCAs). Council resolved on the 8 October 2019 to send the Planning Proposal to Department of Planning, Industry and Environment (DPIE) for Gateway Determination. Gateway Determination was subsequently issued by DPIE on 10 January 2020. Following this Council resolved on 9 June 2020 to seek an alteration to the Gateway Determination in order to be consistent with the Harmonisation Planning Proposal.

The planning proposal seeks to manage the impacts of development adjacent to the East Epping Heritage Conservation Area by reducing the maximum height of building controls for properties along Essex Street and Pembroke Street and to amend the planning controls in order to prevent the development of residential flat buildings in Rockleigh Park Precinct.

F2019/02038

2

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Figure 1 – 7 Properties along Essex and Pembroke Streets, Epping

Under the *Hornsby LEP 2013*, the properties at 21-29 Essex Street are currently:

- zoned R4 High Density Residential;
- Have a maximum height of buildings of 17.5 metres; and
- have no maximum floor space ratio (FSR).

Under the *Hornsby LEP 2013*, the properties at 23-23A Pembroke Street are currently:

- zoned R3 Medium Density Residential;
- have a maximum building height of 17.5 metres; and
- have no maximum floor space ratio (FSR).

Figure 2 - 34 properties in Rockleigh Park precinct are subject to the planning proposal

Under the *Hornsby LEP 2013* the properties at 2-24 Rockleigh Way, 3-7 and 4-8 Brenda Way and 5A Essex St (a private road known as Rockleigh Way) sites:

- Are zoned R4 High Density Residential;
- have a maximum building height of 17.5 metres; and
- have no maximum floor space ratio (FSR).

Under the *Hornsby LEP 2013* the properties at 1-31 Rockleigh Park:

- Are zoned R3 Medium Density Residential;
- have a maximum building height of 12 metres; and
- have no maximum floor space ratio (FSR).

An extract of the current *Hornsby LEP* maps for each of the sites are provided at **Figures 4 and 5** in Part 4 – Mapping.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

A legal description of the properties subject to this Planning Proposal is provided in **Table 1** below.

Property Address	Legal Description	Property Address	Legal Description
2 Rockleigh Way	Lot 2 DP285338	1 Rockleigh Way	Lot 34 DP285338
4 Rockleigh Way	Lot 3 DP285338	3 Rockleigh Way	Lot 33 DP285338

Table 1: Legal Description of Properties subject to this Planning Proposal

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 1 – OBJECTIVES OR INTENDED OUTCOMES

The main objective of this planning proposal is to provide a more consistent and appropriate built form transition to the East Epping Heritage Conservation Area.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 2 – EXPLANATION OF PROVISIONS

This planning proposal seeks to amend *Hornsby LEP 2013 (HLEP 2013)* in relation to the zoning, height and floor space ratio controls.

In order to achieve the desired objectives the following amendments to the *HLEP 2013* would need to be made:

For sites at 2-24 Rockleigh Way, 3-7 and 4-8 Brenda Way and 5A Essex St:

1. Amend the zone in the **Land Zoning Map** (Sheet LZN_011) from R4 High Density Residential to R3 Medium Density Residential. Refer Figure 8 in Part 4 of this planning proposal.
2. Amend the maximum building height in the **Height of Buildings Map** (Sheet HOB_011) from 17.5 metres to 11 metres. Refer Figure 10 in Part 4 of this planning proposal.
3. Amend the maximum FSR in the **Floor Space Ratio Map** (Sheet FSR_011) to apply an FSR of 0.6:1, noting there is no existing FSR control for the sites. Refer Figure 12 in Part 4 of this planning proposal.

For sites at 1-31 Rockleigh Way:

1. Amend the maximum building height in the **Height of Buildings Map** (Sheet HOB_011) from 12 metres to 11 metres. Refer Figure 10 in Part 4 of this planning proposal.
2. Amend the maximum FSR in the **Floor Space Ratio Map** (Sheet FSR_011) to apply an FSR of 0.6:1, noting there is no existing FSR control for the sites. Refer Figure 12 in Part 4 of this planning proposal.

For sites at 21-29 Essex Street:

1. Amend the maximum building height in the **Height of Buildings Map** (Sheet HOB_011) from 17.5 metres to 11 metres. Refer Figure 11 in Part 4 of this planning proposal.
2. Amend the maximum FSR in the **Floor Space Ratio Map** (Sheet FSR_011) to apply an FSR of 0.8:1, noting there is no existing FSR control for the sites. Refer Figure 13 in Part 4 of this planning proposal.

For sites at 23-23A Pembroke Street:

1. Amend the zone in the **Land Zoning Map** (Sheet LZN_011) from R3 Medium Density Residential to R4 High Density Residential. Refer Figure 9 in Part 4 of this planning proposal.
2. Amend the maximum building height in the **Height of Buildings Map** (Sheet HOB_011) from 12 metres to 11 metres. Refer Figure 11 in Part 4 of this planning proposal.
3. Amend the maximum FSR in the **Floor Space Ratio Map** (Sheet FSR_011) to apply an FSR of 0.8:1, noting there is no existing FSR control for the sites. Refer Figure 13 in Part 4 of this planning proposal.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Note: The Harmonisation Planning Proposal seeks to consolidate into one Planning Instrument a set of controls that will replace the controls in the five different Local Environmental Plans that currently apply in different parts of the City of Parramatta. This work will create a single LEP and DCP that will apply to the whole LGA. The Harmonisation Planning Proposal was considered by Council at its meeting of 11 November 2019. Council resolved to endorse the Planning Proposal for submission to the DPIE. DPIE subsequently issued a Gateway Determination for the Harmonisation Planning Proposal on 16 April 2020 and, as a next step, will be placed on public exhibition. Therefore the proposed planning controls in this Planning Proposal have been drafted to be consistent with the proposal controls in the harmonisation process so to ensure translation of controls are straight forward.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 3 – JUSTIFICATION

This part describes the reasons for the proposed outcomes and development standards in the planning proposal.

3.1 Section A - Need for the planning proposal

3.1.1 Is the Planning Proposal a result of any study or report?

The Planning Proposal is as a result of the Council resolution of Stage 1 of the Epping Planning Review on 9 July 2018 and forms part of the implementation of Stage 2. A background to the Epping Planning Review, as it relates to this planning proposal, is detailed below.

In March 2014, new planning controls for the Epping Town Centre and surrounds came into effect as a result of the, then, Department of Planning and Environments (DPE) Priority Precinct process. This process resulted in increased building heights and density controls and the creation of three new Heritage Conservation Areas – Rosebank Avenue, East Epping and Essex Street HCA (formerly located within the Hornsby Local Government Area).

Following Council amalgamations on 12 May 2016, Epping Town Centre and immediate surrounds fell wholly within the City of Parramatta Council Local Government Area.

In December 2016, the Epping Planning Review was commenced by City of Parramatta Council. The scope of the review was to address the unintended consequences of the planning control amendments brought into effect of DPE as well as allowing Council to manage current Planning Proposals seeking additional growth within the Town Centre. It also allowed Council to progress matters considered by the former Hornsby Shire Council, including heritage matters.

The Epping Planning Review involves the following Stages:

- Stage 1 – the preparation of technical studies, community consultation and the release of a discussion paper for public comment. This Stage was undertaken between 2016 and 2018. This planning proposal is one of the Council resolved outcomes of Stage 1 of the Epping Planning Review.
- Stage 2 – involves the statutory phase, including the preparation of planning proposals that seek to amend the current planning controls to resolve the land use issues identified during the first phase. Council are currently in this phase of the project.

As part of Stage 1 community consultation, community workshops were undertaken, including 2 heritage review workshops with regards to Heritage Conservation Areas (HCA) within Epping - one workshop for landowners within the HCAs and one general workshop for interested residents. The workshop explored potential land use scenarios and associated impacts in the HCAs. The workshops aimed to listen to the concerns of residents at the impact of proposals and developments for five storey apartments on land adjoining the Epping conservation areas, including the East Epping Heritage Conservation Area.

As part of Stage 1 technical studies, City Plan Heritage completed the Epping Town Centre (East) Heritage Review (June 2017) – refer **Appendix 1** of this report. The purpose of the review was to inform strategic land use decisions across part of the Epping Town Centre previously under the jurisdiction of Hornsby Shire Council and in addition to review related concerns of residents on a number of heritage issues.

In relation to planning controls surrounding the East Epping Heritage Conservation Area,

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

the Heritage Review (refer **Appendix 1**) concluded that a consistent transition between the R4 High Density Residential development along Essex and Pembroke Streets was required in order to prevent further encroachment on the conservation area. Key recommendations of the Heritage Review include:

- Rezone the Rockleigh Park parcels from the R4 High Density Residential Zone which has a 17.5m (5 storey) height to the R3 Medium Density zone with a 12 metre (4 storey) building height, in order to provide a smooth transition from the R2 Low Density Residential of the East Epping Heritage Conservation Area and the R4 High Density Residential area of Essex and Pembroke Streets.
- That the heritage conservation area designation be removed from 1, 3 and 3A Norfolk Road and 25 Pembroke Street and together with 5, 7, and 7A Norfolk Road be rezoned to R3 Medium Density Residential. This would allow them to be potentially developed for apartment buildings (4 storeys).

The Epping Planning Review Discussion Paper was released for public comment in June 2017 and aimed to present appropriate options and recommendations based on technical studies and community feedback in relation to a number of planning matters. The Discussion Paper presented options for the properties at Rockleigh Park precinct and Norfolk Road and Pembroke Street and the strengths and weaknesses of each option were detailed. The purposes of these options was to gain feedback from the community as to what resolution was acceptable.

On 14 August 2017, Council considered a report (refer **Council report and Minutes at Appendix 2**) that summarised submissions from the Epping Planning Review Discussion Paper and technical studies. The report summarised the feedback from land owners and the community on the East Epping Heritage Conservation Area and the options presented to mitigate the interface issues from the adjoining development. It noted that the submissions were divided in opinion as to how the interface issue should be managed.

On 9 July 2018, a report was presented updating Council on the implications for the findings of the Epping Planning Review (refer **Council report and minutes at Appendix 3**), including further assessment work undertaken for Rockleigh Park and Norfolk Road and Pembroke Street properties. In summary the Council report recommended:

- That the area zoned R4 be down-zoned to R3 in the Rockleigh Park Precinct to be consistent with R3 zone boundary to north and east; and
- No changes to battle-axe blocks at 7 and 7A Norfolk Road and rezone 1, 3, 3A and 5 Norfolk Road to R3 zone to enable three storey residential flat buildings subject to amalgamation controls being put in place to create 1 super lot and that 25 Pembroke cannot develop of itself and should retain its existing zoning.

Council resolved to support the above recommendation in relation to Rockleigh Park precinct, however no changes to properties along Norfolk Road and at 25 Pembroke Street. Further Council resolved to amend height of buildings in relation to properties at 21-29 Essex Street and 23 and 23A Pembroke Street, Epping.

A summary of decision making in relation to the above matters is provided at **Appendix 5**.

A Council-initiated Planning Proposal relating to various properties in East Epping was prepared in line with the 9 July 2018 resolution and presented to Local Planning Panel at its meeting of 17 September 2019. The Local Planning Panel advised Council to support the Planning Proposal. Subsequently, the Planning Proposal was reported to Council at its meeting of 8 October 2019 (refer **Council report and minutes at Appendix 4**). Council resolved to progress the Planning Proposal and send to the Department Planning, Industry and Environment for Gateway Determination. Gateway Determination was subsequently granted on 10 January 2020. Following this Council resolved on 9 June 2020 to seek an alteration to the Gateway Determination in order to be consistent with the Harmonisation Planning Proposal.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

3.1.2 Is the Planning Proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

The Epping Planning Review Discussion Paper (June 2017) examined the Heritage Review recommendations for Rockleigh Park Precinct and presented options for the community to consider. The purpose of these options was to gain feedback from the community as to what planning solution was acceptable.

In relation Rockleigh Park the Discussion Paper recommended down-zoning the site from the R4 High Density zone to the R3 Medium Density zone, enabling a reduction in the permissible density. It also recommended the preparation of a master plan to determine the most appropriate outcome.

Following assessment and community feedback Council resolved that the current planning proposal is the best means of achieving the objectives/intended outcomes in relation to Rockleigh Park precinct. The proposed amendment to Hornsby LEP 2013 will help to satisfactorily resolve transition issues from the R4 High Density Residential land use zoning to the East Epping HCA.

3.2 Section B – Relationship to strategic planning framework

3.2.1 Is the planning proposal consistent with the objectives and actions contained within the applicable regional or sub-regional strategy?

A Metropolis of Three Cities

In March 2018, the NSW Government released the *Greater Sydney Region Plan: A Metropolis of Three Cities* (“the GSRP”) a 20 year plan which outlines a three-city vision for metropolitan Sydney for to the year 2036.

The GSRP is structured under four themes: Infrastructure and Collaboration, Liveability, Productivity and Sustainability. Within these themes are 10 directions which are each contains Potential Indicator and, generally, a suite of objective/s with each objective supported by a Strategy or Strategies. Those objectives and or strategies relevant to this planning proposal are discussed below.

Infrastructure and Collaboration

An assessment of the planning proposal’s consistency with the GSRP’s relevant Infrastructure and Collaboration objectives is provided in Table 3a, below.

Table 3a – Consistency of planning proposal with relevant GSRP Actions – Infrastructure and Collaboration

Infrastructure and Collaboration Direction	Relevant Objective	Comment
A city supported by infrastructure	O1: Infrastructure supports the three cities	The region plan highlights that the Central River City is undergoing a rebuilding program in a high-growth environment, which requires existing infrastructure to be optimised. This planning proposal acknowledges Epping as a strategic centre in which the provision of housing this location promotes efficient use of the existing infrastructure while still maintaining appropriate interfaces with adjacent heritage items and conservation areas.
	O2: Infrastructure aligns with forecast growth – growth infrastructure compact	
	O3: Infrastructure adapts to meet future need	
	O4: Infrastructure use is optimised	

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Liveability

An assessment of the planning proposal's consistency with the GSRP's relevant Liveability objectives is provided in Table 3b, below.

Table 3b – Consistency of planning proposal with relevant GSRP Actions – Liveability

Liveability Direction	Relevant Objective	Comment
A city for people	O6: Services and infrastructure meet communities' changing needs	The planning proposal aims to improve amenity to the community by creating a better transition in built form from a high density to an existing low density heritage conservation area.
	O7: Communities are healthy, resilient and socially connected	
	O8: Greater Sydney's communities are culturally rich with diverse neighbourhoods	
	O9: Greater Sydney celebrates the arts and supports creative industries and innovation	
Housing the city	O10: Greater housing supply	It is highly unlikely that sites within the Rockleigh Park precinct will be purchased by a developer for redevelopment for five storey residential flat buildings. The existing lots are small (between 250-300 square metres) and have established dwelling homes. Further, a total of 33 lots rely on the same narrow road network for access which falls under community title and it would be a challenge to provide adequate vehicular access and parking. Further to this, the proposed downzoning on other sites is not significant and would not undermine the capacity for Epping to deliver housing as part of the Department's rezoning in 2014.
	O11: Housing is more diverse and affordable	The R3 zones within the Hornsby LEP 2013 offers a high degree of housing diversity, with residential flat buildings still permitted in the zone. There will be no negative impacts on housing diversity and affordability as a result of this planning proposal.
A city of great places	O12: Great places that bring people together	The planning proposal will help to resolve interface issues to the East Epping heritage conservation area by providing an appropriate transition model.
	O13: Environmental heritage is identified, conserved and enhanced	

Productivity

An assessment of the planning proposal's consistency with the GSRP's relevant Productivity objectives is provided in Table 3c, below.

Table 3c – Consistency of planning proposal with relevant GSRP Actions – Productivity

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Productivity Direction	Relevant Objective	Comment
A well connected city	O14: The plan integrates land use and transport creates walkable and 30 minute cities	The proposed density is appropriate given the context to existing transport infrastructure.
	O15: The Eastern, GOP and Western Economic Corridors are better connected and more competitive	

Sustainability

An assessment of the planning proposal’s consistency with the GSRP’s relevant Sustainability objectives is provided in Table 3d, below.

Table 3d – Consistency of planning proposal with relevant GSRP Actions – Sustainability

Sustainability Direction	Relevant Objective	Comment
A city in its landscape	O25: The coast and waterways are protected and healthier	No specific sustainability measures are proposed at this stage of the planning process. Measures within the Hornsby DCP 2013 will be implemented at development application stage.
	O27: Biodiversity is protected, urban bushland and remnant vegetation is enhanced	
	O28: Scenic and cultural landscapes are protected	
	O29: Environmental, social and economic values in rural areas are protected and enhanced	
	O30: Urban tree canopy cover is increased	
	O31: Public open space is accessible, protected and enhanced	
	O32: The Green grid links Parks, open spaces, bushland and walking and cycling paths	
An efficient city	O33: A low-carbon city contributes to net-zero emissions by 2050 and mitigates climate change	No specific sustainability measures are proposed at this stage of the planning process. Measures within the Hornsby DCP 2013 will be implemented at development application stage.
	O34: Energy and water flows are captured, used and re-used	
	O35: More waste is re-used and recycled to support the development of a circular economy	
A resilient city	O36: People and places adapt to climate change and future shocks and stresses	Brenda Way and Rockleigh Way (5A Essex Street), is flood prone and impacted by the 1:100 year flood level. As the flood levels are contained within the roadway, and this planning proposal is a downzoning to reflect the current land use, it is considered to be a little impact. Any future development applications for properties in Rockleigh Way would be required to address stormwater runoff and flooding to
	O37: Exposure to natural and urban hazards is reduced	
	O38: Heatwaves and extreme heat are managed	

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

		ensure compliance with Council's water management controls within the Hornsby DCP 2013.
--	--	---

Implementation

An assessment of the planning proposal's consistency with the GSRP's relevant Implementation objectives is provided in Table 3d, below.

Table 3d – Consistency of planning proposal with relevant GSRP Actions – Implementation

Implementation Direction	Relevant Objective	Comment
Implementation	O39: A collaborative approach to city planning	This planning proposal is a key outcome of Stage 1 of the Epping Planning Review which involved in-depth consultation with the community and the consideration of the feedback from this consultation.

Central City District Plan

In March 2018, the NSW Government released *Central City District Plan* which outlines a 20 year plan for the Central City District which comprises The Hills, Blacktown, Cumberland and Parramatta local government areas.

Taking its lead from the GSRP, the *Central City District Plan* ("CCDP") is also structured under four themes relating to Infrastructure and Collaboration, Liveability, Productivity and Sustainability. Within these themes are Planning Priorities which are each supported Action. Those Planning Priorities and Actions relevant to this planning proposal are discussed below.

Infrastructure and Collaboration

An assessment of the planning proposal's consistency with the CCDP's relevant Infrastructure and Collaboration Priorities and Actions is provided in Table 4a, below.

Table 4a – Consistency of planning proposal with relevant CCDP Actions – Infrastructure and Collaboration

Infrastructure and Collaboration Direction	Planning Priority/Action	Comment
<p>A city supported by infrastructure</p> <p>O1: Infrastructure supports the three cities</p> <p>O2: Infrastructure aligns with forecast growth – growth infrastructure compact</p> <p>O3: Infrastructure adapts to meet future need</p> <p>O4: Infrastructure use is optimised</p>	<p>PP C1: Planning for a city supported by infrastructure</p> <ul style="list-style-type: none"> • A1: Prioritise infrastructure investments to support the vision of <i>A metropolis</i> • A2: Sequence growth across the three cities to promote north-south and east-west connections • A3: Align forecast growth with infrastructure • A4: Sequence infrastructure provision using a place based approach • A5: Consider the adaptability of infrastructure and its potential 	<p>The planning proposal seeks to cluster appropriate density within the strategic centre of Epping while still ensuring that transitions to heritage conservation areas are appropriate.</p>

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

	<p>shared use when preparing infrastructure strategies and plans</p> <ul style="list-style-type: none"> • A6: Maximise the utility of existing infrastructure assets and consider strategies to influence behaviour changes to reduce the demand for new infrastructure, supporting the development of adaptive and flexible regulations to allow decentralised utilities 	
<p>O5: Benefits of growth realized by collaboration of governments, community and business</p>	<p>PP C2: Working through collaboration</p> <ul style="list-style-type: none"> • A7: Identify prioritise and delivery collaboration areas 	<p>This planning proposal is a key outcome of Stage 1 of the Epping Planning Review which involved in-depth consultation with the community and the consideration of the feedback from this consultation.</p>

Liveability

An assessment of the planning proposal’s consistency with the CCDP’s relevant Liveability Priorities and Actions is provided in Table 4b, below.

Table 4b – Consistency of planning proposal with relevant CCDP Actions – Liveability

Liveability Direction	Planning Priority/Action	Comment
<p>O7: Communities are healthy, resilient and socially connected</p> <p>O8: Greater Sydney’s communities are culturally rich with diverse neighbourhoods</p> <p>O9: Greater Sydney celebrates the arts and supports creative industries and innovation</p>	<p>PP C4: Working through collaboration</p> <ul style="list-style-type: none"> • A10: Deliver healthy, safe and inclusive places for people of all ages and abilities that support active, resilient and socially connected communities by (a-d). • A11: Incorporate cultural and linguistic diversity in strategic planning and engagement. • A12: Consider the local infrastructure implications of areas that accommodate large migrant and refugee populations. • A13: Strengthen the economic self-determination of Aboriginal communities by engagement and consultation with Local Aboriginal Land Council’s. • A14: Facilitate opportunities for creative and artistic expression and participation, wherever feasible with a minimum regulatory burden including (a-c). • A15: Strengthen social connections within and between communities through better understanding of the nature of social networks and supporting infrastructure in local places 	<p>The subject sites are within walking distance of community facilities in Epping Town Centre. Council has resolved to investigate options for Council owned land at Rawson Street and Pembroke Street for future civic space to accommodate current and future populations. Further to this, the planning proposal incorporates an appropriate transition model to the East Epping Conservation Area and allows for greater appreciation of heritage interfaces within this area.</p>

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

<p>Housing the city O10: Greater housing supply O11: Housing is more diverse and affordable</p>	<p>PP C5: Providing housing supply, choice and affordability, with access to jobs, services and public transport</p> <ul style="list-style-type: none"> • A16: Prepare local or district housing strategies that address housing targets [abridged version] • A17: Prepare Affordable Rental housing Target Schemes 	<p>It is highly unlikely that sites within the Rockleigh Park precinct will be purchased by a developer for redevelopment for five storey residential flat buildings. The existing lots are small (between 250-300 square metres) and have established dwelling homes. Further, a total of 33 lots rely on the same narrow road network for access which falls under community title and it would be a challenge to provide adequate vehicular access and parking.</p> <p>Further to this, the proposed downzoning on other sites is not significant and would not undermine the capacity for Epping to be a strategic centre as envisioned by the central city district plan.</p>
<p>A city of great places O12: Great places that bring people together O13: Environmental heritage is identified, conserved and enhanced</p>	<p>PP C6: Creating and renewing great places and local centres, and respecting the District's heritage</p> <ul style="list-style-type: none"> • A18: Using a place-based and collaborative approach throughout planning, design, development and management deliver great places by (a-e) • A19: Identify, conserve and enhance environmental heritage by (a-c) • A20: Use place-based planning to support the role of centres as a focus for connected neighbourhoods • A21: In Collaboration Areas, Planned Precincts and planning for centres (a-d) • A22: Use flexible and innovative approaches to revitalise high streets in decline. 	<p>This planning proposal proposes introduce an appropriate transition model to the East Epping conservation area. The planning proposal will help to resolve interface issues and community concerns as identified in the Epping Planning Review.</p>

Productivity

An assessment of the planning proposal’s consistency with the CCDP’s relevant Productivity Priorities and Actions is provided in Table 4c, below.

Table 4c – Consistency of planning proposal with relevant CCDP Actions – Productivity

Productivity Direction	Planning Priority/Action	Comment
<p>O14: The plan integrates land use and transport creates walkable and 30 minute cities</p>	<p>PP C9: Delivering integrated land use and transport planning and a 30-minute city</p> <ul style="list-style-type: none"> • A32: Integrate land use and transport plans to deliver a 30-minute city • A33: Investigate, plan and protect future transport and infrastructure corridors 	<p>It is acknowledged that this planning proposal includes provisions which reduced the permissible residential density of land.</p> <p>However, the planning proposal has been justified through the Epping Planning Review which directly identifies the subjects sites as needing amendment. The planning proposal does not undermine the capacity of Epping being a strategic</p>

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

	<ul style="list-style-type: none"> • A34: Support innovative approaches to the operation of business, educational and institutional establishments to improve the performance of the transport network • A35: Optimise the efficiency and effectiveness of the freight handling and logistics network by (a-d) • A36: Protect transport corridors as appropriate, including the Western Sydney Freight Line, North South train link from Schofields to WS Airport as well as Outer Sydney Orbital and Bells Line of Road-Castlereagh connections 	<p>centre' as identified in the central city district plan as it still allows for medium density residential development</p> <p>The reduction in density is of minor scale and thus of minor significance.</p>
--	--	--

3.2.2 Is the planning proposal consistent with the local council's Community Strategic Plan or other local strategic plan?

The following local strategic planning documents are relevant to the planning proposal.

Parramatta 2038 Community Strategic Plan

Parramatta 2038 is a long term Community Strategic Plan for the City of Parramatta and it links to the long-term future of Sydney. The plan formalises several big and transformational ideas for the City and the region.

The planning proposal is considered to be consistent with Council's local strategy as it aims to maintain the heritage significance of the East Epping HCA whilst resolving interface issues and the community.

Parramatta Local Strategic Planning Statement (LSPS)

The LSPS sets out the long-term vision for land use planning in the City of Parramatta's local government area (LGA) and responds to broader priorities identified in the District Plans and integrates with a Council's Community Strategic Plan. The LSPS came into effect on 31 March 2020 and any new Planning Proposal must justify any inconsistency with this framework.

This Planning Proposal is consistent with Planning Priority 11 of the LSPS, "Build the capacity of the Parramatta CBD, Strategic Centres, Local Centres and Employment Lands to be strong, competitive and productive" and associated action A69, "Advocate for the recommendations of the Epping Town Centre Review (when completed) and implement the adopted recommendations." The Planning Proposal is a progression of the Epping Planning Review undertaken by Council in 2017 and 2018 and the resolution made by Council on 9 July 2018 in relation to a number of matters resulting from the Epping Planning Review, including issues of development interface with Heritage Conservation Areas (HCAs).

The Planning Proposal is also consistent with the LSPS Planning Priority 5 "Support and enhance the low-scale character and identity of suburban Parramatta outside of the GOP area and Epping Strategic Centre" and Planning Priority 9 "Enhance Parramatta's heritage and cultural assets to maintain our authentic identity and deliver infrastructure to meet community needs." The Planning Proposal results in a reduction in overall residential density and incorporates an appropriate transition model to the East Epping Conservation Area and allows for greater appreciation of heritage interfaces within this area.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

3.2.3 Is the planning proposal consistent with the applicable State Environmental Planning Policies?

The following State Environmental Planning Policies (SEPPs) are of relevance to the site (refer to Table 5 below).

Table 5 – Consistency of planning proposal with relevant SEPPs

State Environmental Planning Policies (SEPPs)	Consistency: Yes = ✓ No = x N/A = Not applicable	Comment
SEPP No 1 Development Standards	N/A	This SEPP is not applicable to the subject land under clause 1.9 of Hornsby LEP 2013
SEPP 4 – Development Without Consent and Miscellaneous Exempt and Complying Development	N/A	This SEPP is not applicable to the subject land under clause 1.9 of Hornsby LEP 2013
SEPP 6 – Number of Storeys in a Building	N/A	Standard instrument definitions apply.
SEPP 33 – Hazardous and Offensive Development	N/A	
SEPP No 55 Remediation of Land	✓	Not relevant to proposed amendment. May be relevant to future DAs.
SEPP 60 – Exempt and Complying Development	N/A	This SEPP is not applicable to the subject land under Clause 1.9 of the Hornsby LEP 2013.
SEPP 64 – Advertising and Signage	N/A	Not relevant to proposed amendment. May be relevant to future DAs.
SEPP No 65 Design Quality of Residential Flat Development	✓	Detailed compliance with SEPP 65 will be demonstrated at the time of making a future development application for the site facilitated by this Planning Proposal (applies only to 21-29 Essex and 23 and 23A Pembroke Streets).
SEPP No.70 Affordable Housing (Revised Schemes)	N/A	Not relevant to proposed amendment.
SEPP (Affordable Rental Housing) 2009	N/A	Not relevant to proposed amendment.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

SEPP (BASIX) 2004	N/A	Detailed compliance with SEPP (BASIX) will be demonstrated at the time of making a development application for the site facilitated by this Planning Proposal.
SEPP (Exempt and Complying Development Codes) 2008	✓	May apply to future development of the site.
SEPP (Infrastructure) 2007	✓	May apply to future development of the site.
Sydney Regional Environmental Plan No 18– Public Transport Corridors	N/A	This SEPP is not applicable to the subject land under Clause 1.9 of the <i>Hornsby LEP 2013</i> .
Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005	N/A	The proposed development is not located directly on the Sydney Harbour Catchment foreshore. Any potential impacts as a result of development on the site, such as stormwater runoff, will be considered and addressed appropriately at DA stage.
SEPP (Urban Renewal) 2010	✓ N/A	Not relevant to proposed amendment. The Planning Proposal will stimulate renewal within the nominated precinct of Granville and will contribute to the employment and job targets for the area.

3.2.4 Is the planning proposal consistent with applicable Ministerial Directions (s.9.1 directions)

In accordance with Clause 9.1 of the *EP&A Act 1979* the Minister issues directions for the relevant planning authorities to follow when preparing planning proposals for new LEPs. The directions are listed under the following categories:

- Employment and resources
- Environment and heritage
- Housing, infrastructure and urban development
- Hazard and risk
- Housing, Infrastructure and Urban Development
- Local plan making

The following directions are considered relevant to the subject Planning Proposal.

Table 6 – Consistency of planning proposal with relevant Section 9.1 Directions

Relevant Direction	Comment	Compliance
1. Employment and Resources		
Direction 1.1 – Business and Industrial Zones	This Planning Proposal will not affect land within an existing or proposed business or industrial zone.	Yes

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

2. Environment and Heritage		
Direction 2.3 - Heritage Conservation	<p>The subject sites are adjacent to the East Epping Conservation Area (C9). A Heritage Review (refer Appendix 1) was completed as part of Stage 1 of the Epping Planning Review. The Heritage Review assessed the heritage value and significance of properties located in the East Epping Heritage Conservation Area on the interface with the R3 Medium Density Residential and the R4 High Density Residential zones, with particular attention to Rockleigh Way and 1, 3, 3A, 5, 7 and 7A Norfolk Road and 25 Pembroke Street.</p> <p>In relation to planning controls surrounding the East Epping Heritage Conservation Area, the Heritage Review concluded that a consistent transition between the R4 High Density Residential development along Essex and Pembroke Streets was required in order to prevent further encroachment on the conservation area. Key recommendations of this study with regards to the Rockleigh Park precinct have materialised as part of this planning proposal.</p> <p>Further to this, Council resolved to amend the planning controls at 21-29 Essex and 23-23A Pembroke Streets to further ensure an adequate built form transition to the East Epping Conservation Area.</p>	Yes
3. Housing, Infrastructure and Urban Development		
Direction 3.1 - Residential Zones	<p>It is acknowledged that this planning proposal includes provisions which reduced the permissible residential density of land.</p> <p>However, the planning proposal is consistent with Clause 6 of Direction 3.1 as it:</p> <ul style="list-style-type: none"> • Has been justified through the Epping Planning Review which directly identifies the subjects sites as needing amendment • The planning proposal does not undermine the capacity of Epping being a strategic centre' as identified in the central city district plan as it still allows for medium density residential development • The reduction in density is of minor scale and thus of minor significance. 	No - justified in comments
Direction 3.4 - Integrating Land Use and Transport	<p>The Planning Proposal is consistent with this direction, in that it:</p> <ul style="list-style-type: none"> • will continue to provide for an appropriate amount of density within the Epping strategic centre • will enable residents to walk or cycle to work if employed in the Epping or utilise the heavy rail or metro service. 	Yes
4. Hazard and Risk		
Direction 4.1 - Acid Sulfate Soils	The site is not identified on the Acid Sulfate Soils Map in Hornsby Local Environmental Plan 2013.	Yes
Direction 4.3 - Flood Prone Land	5A Essex and 16 Rockleigh Park are identified as flood affected and affected by the 1-100 year ARI. The other sites are not flood prone and is above the 1:100 year flood level.	Yes

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

	Any potential impacts as a result of development on the site, such as stormwater runoff, will be considered and addressed appropriately at DA stage. This will also include any design detail required to ensure compliance with Council's water management controls within the Parramatta DCP 2011.	
5. Local Plan Making		
Direction 6.1 - Approval and Referral Requirements	The Planning Proposal does not introduce any provisions that require any additional concurrence, consultation or referral.	Yes
Direction 6.3 - Site Specific Provisions	The Planning Proposal does not introduce any site specific provisions.	Yes
6. Metropolitan Planning		
Direction 7.1 - Implementation of A Plan for Growing Sydney	The planning proposal does not proposed substantive amendments and achieves the overall intent of the Plan for Growing Sydney. The achievements of the plan's planning principles, directions, priorities for subregions, strategic centres and transport gateways are not undermined by this planning proposal.	Yes

3.3 Section C – Environmental, social and economic impact

This section considers the potential environmental, social and economic impacts which may result from the Planning Proposal.

3.3.1 Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

Land the subject of this planning proposal does not contain any critical habitat or threatened species, populations or ecological communities, or their habitats. Therefore, this proposal does not pose any threat to the above.

3.3.2 Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?

The main potential environmental impacts to be assessed for the proposal for the site are built form and heritage.

Rockleigh Park Precinct

As part of the Epping Planning Review the interface issues relating to East Epping Avenue have been assessed through landowner and community feedback, heritage study (refer **Appendix 1**) and urban design testing. Based on these assessments it concluded that western side of Rockleigh Way be rezoned to be consistent with the eastern side of Rockleigh Way.

The proposed R3 Medium Density Residential zone is consistent with the Rockleigh Park properties that form its northern and eastern boundaries. The current R4 zoning and 17.5 metre height limit (five storey residential flat buildings) would result in encroachment of inappropriate high density development adjacent to low density and the low density of the East Epping Heritage Conservation Area.

It is highly unlikely that these sites will be purchased by a developer for redevelopment for five storey residential flat buildings. The existing lots are small (between 250-300 square

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

metres) and have established dwelling homes. Further, a total of 33 lots rely on the same narrow road network for access which falls under community title and it would be a challenge to provide adequate vehicular access and parking. The recommended down-zoning better reflects the current use of small single and two storey cottages.

The proposed R3 Medium Density Residential zone and 0.6:1 and 9 metre maximum height of buildings will ensure the current land uses are supported, as well as future potential to amalgamate two to three parcels in the future to develop multi-unit dwellings (that is townhouses) at an appropriate scale and intensity of development. It is also anticipated that these same controls would apply to the eastern side of Rockleigh Way as part of harmonisation of the planning controls.

The proposed planning controls for Rockleigh Park Precinct planning proposal are consistent with the recommendations of the Heritage Review (Epping East) (refer **Appendix 1**) and Epping Town Centre Discussion Paper. The proposed R3 Medium Density Residential zone would provide consistency with the adjacent development of the northern and eastern side of Rockleigh Way and a more appropriate transition to the adjoining East Epping Heritage Conservation Area. **Figure 3** below indicates the proximity of the subject sites to the East Epping Heritage Conservation Area.

Furthermore, Condition 1 of the Department Planning, Industry and Environment's Gateway Determination (granted on 10 January 2020) requires that additional 15 properties at 1 - 31 Rockleigh Way be included in the Planning Proposal. Currently this area is zoned R3 Medium Density Residential and has a maximum height of buildings 12 metres under the Hornsby LEP 2013. The DPIE's Gateway Assessment Report indicated that the additional sites should be included as they abut the HCA and the planning controls should be applied consistently for the Rockleigh Park Precinct. This will provide a more consistent transition from the R2 Low Density Residential of the East Epping Heritage Conservation Area and the R4 High Density Residential area of Essex and Pembroke Streets.

21-29 Essex Street and 23 & 23A Pembroke Street

Council on 9 July 2018 resolved to introduce the following changes to Hornsby LEP 2013 in respect of properties at 21-29 Essex Street and 23 and 23A Pembroke Street Epping:

- 21, 23, 25, 27 and 29 Essex Street amend the zoning from R4 High Density Residential to R3 Medium Density Residential with maximum height permitted on these sites to be amended from 17.5 metre to 11 metres (to allow for apartment building development no greater than three storeys on these sites); and
- The height of building control for 23 and 23A Pembroke be reduced from 12 metres to 11 metres with the existing zoning of Residential R3 Medium Density Residential to be retained for these two sites.

Refer **Appendix 3** for full Council report and minutes of 9 July 2018.

It is noted that the Council resolved to apply a R3 Medium Density zoning to properties along Essex and Pembroke Street, however Council officers recommend a R4 High Density zoning. Although the R3 Medium Density Zone in the Hornsby LEP 2013 currently permits residential flat buildings with development consent, it is the intention of City of Parramatta Council through the harmonisation of its planning controls, to restrict residential flat buildings to the R4 High Density Zone. A R4 High Density Zone in this location would ensure a straight forward translation of land use zone upon a newly consolidated Parramatta LEP whilst achieving the intended purpose of reducing the maximum height limit for residential flat buildings on these subject properties.

The Hornsby LEP 2013 does not generally apply a standard maximum floor space ratio to residential areas including properties in Essex and Pembroke Streets. As part of Council's harmonisation of planning controls, an application of a floor space ratio of 0.8:1

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

is recommended for the subject properties. This will ensure an appropriate scale and intensity of development. Further the proposed restriction height to 11 metres will allow for apartment development no greater than three storeys. The application of both a maximum height and FSR is consistent with City of Parramatta's intention for a newly consolidated Parramatta LEP and application of these controls would ensure a straight forward translation.

Further, the proposed planning controls would enable less dwellings than under the current planning controls.

It is noted that the sites directly adjoining the subject properties of this planning proposal, namely 7-9 Essex Street and 15-19 Essex Street are proposed to retain the current planning controls of R4 High Density Residential and a height of buildings of 17.5 metres. These sites are subject to active development applications, which means any amendment to planning controls at this current time be ineffective.

The proposed decrease in height of buildings from 17.5 metres (5 storeys) to 11 metres for the subject properties along Essex Street will allow for residential flat buildings of no greater than three storeys. Adjustment of the maximum height of buildings for both 23 and 23A Pembroke Street from 12 metres to 11 metres would ensure consistency with the adjacent Essex Street properties. The proposed reduction in height of buildings would provide a more appropriate built form transition to the directly adjoining East Epping Consideration Area. **Figure 3** below indicates the proximity of the subject sites to the East Epping Heritage Conservation Area.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Figure 3: The subject sites proximity to the East Epping Heritage Conservation Area and heritage items

3.3.3 How has the planning proposal adequately addressed any social and economic effects?

The planning proposal aims to resolve the outcome of a planning process which facilitated density which provided an inappropriate transition in built form to the East Epping heritage conservation area. The planning proposal recognises Rockleigh Way and Brenda Way will have consistent planning controls with the north and east of Rockleigh Way and that the landowners Essex and Pembroke Streets will still have the opportunity re-develop their sites and realise improved social and economic benefits.

3.4 Section D – State and Commonwealth Interests

3.4.1 Is there adequate public infrastructure for the planning proposal?

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

The subject land is located approximately 400 metres from retail area of Epping Town Centre and approximately 650 metres from the Epping Railway Station and the Sydney Northwest Metro service.

Civil and utility infrastructure is suitably accessible to service the subject land and support future development. Redevelopment of the subject site and further development within the area can optimise public infrastructure investment.

3.4.2 What are the views of State and Commonwealth public authorities consulted in accordance with the gateway determination?

Consultation with agencies will occur during public exhibition in accordance with the conditions of the Gateway Determination.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 4 – MAPPING

This section contains the mapping for this planning proposal in accordance with the DP&E's guidelines on LEPs and Planning Proposals. **Existing controls**

This section illustrates the current *Hornsby LEP 2013* controls which apply to the site.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Figures 4 and 5 illustrates the current R4 High Density Residential and R3 Medium Density Residential zoning over properties in Rockleigh Park Precinct and the current R4 High Density Residential Essex Street and the current R3 Medium Density Residential zoning over properties in Pembroke Street.

Figure 13 – Proposed amendment to the Hornsby LEP 2013 Floor Space Ratio Map

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 5 – COMMUNITY CONSULTATION

The planning proposal (as revised to comply with the Gateway determination) is to be publicly available for community consultation for a minimum period of 28 days in accordance with the Gateway Determination. Public exhibition will include:

- Display on the Council's website and NSW Planning Portal;
- Written notification to affected owners and occupiers; and
- hard copy display in Council's Customer Contact Centre and Epping Branch Library (subject to COVID 19 restrictions).

The gateway determination specifies the level of public consultation that must be undertaken in relation to the planning proposal including with Hornsby Shire Council, Transport for NSW and Department of Premier and Cabinet – Heritage Branch.

Note that due to COVID-19, local newspapers (including the Northern District Times, Hornsby Advocate and Parramatta Advertiser) are not currently in print circulation and therefore newspaper notification in relation to this planning proposal will not occur.

Consistent with sections 3.34(4) and 3.34(8) of the *EP&A Act 1979*, where community consultation is required, an instrument cannot be made unless the community has been given an opportunity to make submissions and the submissions have been considered.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 6 – PROJECT TIMELINE

Once the planning proposal has been referred to the Minister for review of the Gateway Determination and received a Gateway determination, the anticipated project timeline will be further refined, including at each major milestone throughout the planning proposal's process.

Table 7 below outlines the anticipated timeframe for the completion of the planning proposal.

Table 7 – Anticipated timeframe to planning proposal process

MILESTONE	ANTICIPATED TIMEFRAME
Report to LPP on the assessment of the PP	17 September 2019
Report to Council on the assessment of the PP	8 October 2019
Referral to Minister for review of Gateway determination	October 2019
Date of issue of the Gateway determination	10 January 2020
Report to Council on amendments to the Planning Proposal	9 June 2020
Referral to Minister for amendment to Gateway Determination	June 2020
Date of issue of the amended Gateway determination	3 August 2020
Commencement and completion dates for public exhibition period	19 August and 25 September 2020
Commencement and completion dates for government agency notification	19 August and 25 September 2020
Consideration of submissions	November 2020 – January 2021
Consideration of planning proposal post exhibition and associated report to LPP/Council	Local Planning Panel meeting - 18 May 2021 Council meeting – 15 June 2021
Submission to the Department to finalise the LEP	17 June 2021
Notification of instrument	To be determined

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

M:\IC\HERITAGE\ICPH-2017\17-016 EPPING TOWN CENTRE\REPORT\FINAL REPORT\EPPING TOWN CENTRE (EAST) HERITAGE REVIEW FINAL V2.DOCX V

1. Executive Summary

1.1 Background

This study has been commissioned by the City of Parramatta Council in order to undertake a Heritage Review of the Epping Town Centre. The City of Parramatta Council recently inherited the balance of the Epping Town Centre as a result of Council amalgamations from Hornsby Shire Council on the 12 May 2016. Currently, the controls for different parts of Epping Town Centre vary as a result of previous decision making structures under the City of Parramatta Council and Hornsby Shire Council.

The City of Parramatta's City Strategy Department commissioned a heritage review to inform strategic land use decisions across part of the Epping Town Centre previously under the jurisdiction of Hornsby Shire Council and, in addition, to review related concerns of residents on a number of heritage issues. It excludes any analysis on the western side of the Town Centre, railway line, excluding Rosebank Avenue HCA and properties subject to Stage 6 of the Hornsby Council Heritage Review.

The principal aims of this heritage review are to:

- Review the three existing Heritage Conservation Areas (HCAs) of East Epping, Essex Street and Rosebank Avenue located within the Epping Town Centre area recently acquired by the City of Parramatta Council;
- Investigate concerns raised by residents on a number of heritage issues including:
 - the value and significance of each HCA; and
 - the value and significance of properties located on interface areas with R4 and R3 High Density Residential Areas;
- Review of current planning controls of interface areas around the existing HCAs; and
- Conduct Stage 6 of the Hornsby Council Heritage Review.

1.2 Summary of Findings

In general, the East Epping, Essex Street and Rosebank Avenue HCAs retain the same level of integrity and significance as described in the most recent study, *Epping Town Centre Heritage Review*, conducted in 2013, with few significant changes evident.

Subsequent to the field survey, all properties within the East Epping, Essex Street and Rosebank Avenue HCAs were reassessed for their contribution to the overall significance of their respective HCAs. The previous rankings from the 2013 study were taken in to account in the reassessment of all properties within each HCA. Generally, the ranking awarded to each property was consistent for both the Essex Street and Rosebank Avenue HCAs, however, some differences occurred for the East Epping HCA. Some properties within the East Epping HCA were listed as Neutral, due to being from the historical period of development of the area (typically Federation or Inter War) however, had been modified to a degree that has removed or obscured characteristic detailing of their respective periods.

An investigation into the impact of R3 and R4, Medium and High Density Residential Zones was undertaken, through community consultation, site visits of individual properties, and analysis of recently approved development applications at the interface zones with the East Epping, Essex Street and Rosebank Avenue HCAs. Generally, property owners whose dwellings were located adjacent to a high density residential development raised concerns with both the development and the implications of being located within a HCA. Whilst not heritage concerns, issues of privacy, safety, health and financial implications were all raised during the different phases of community consultation. Through further assessment of the impact of the high and medium density residential development at site visits, it was noted that although the new developments do impact upon the backdrop of each of the HCA's in different ways, the developments did not impact upon the setting and streetscape characteristics of the particular HCA so much that would result in the modification to the

boundaries or removal in whole or in part of any HCA. The impact of the new developments essentially was in relation to planning matters rather than heritage matters.

Notwithstanding, in order to help mitigate the issues and concerns raised by the property owners and to address impacts upon the heritage significance of the East Epping, Essex Street and Rosebank Avenue HCAs as well as individual heritage items, planning controls were reviewed and recommendations made to assist in the alleviation of future impacts.

Stage 6 of the Hornsby Council Heritage Review was also conducted, with a total of twenty-two (22) identified properties reviewed.

1.3 Conclusion and Key Recommendations

As a result of this in depth survey and assessment of the HCAs within the Epping Town Centre, the following key recommendations are made within this heritage review:

1. *Retain the current boundaries of the Essex Street and Rosebank Avenue Heritage Conservation Areas (Refer to Sections 10.2 and 10.3)*
 - Following reassessment of the Essex Street and Rosebank Avenue Heritage Conservation Areas, both areas were found to have maintained the significance and intactness established in previous studies. The impact of High and Medium Density Residential development at the interface areas with the Heritage Conservation Areas were not found to have a detrimental impact warranting removal of the Heritage Conservation Areas in part or in whole. Thus, both Heritage Conservation Areas are recommended to be retained in full.
2. *Adjust the south-west boundary of the East Epping Heritage Conservation Area (Refer to Section 10.1)*
 - It is recommended for 25 Pembroke Street, and 1, 3, and 3A Norfolk Road to be removed from the East Epping Heritage Conservation Area, and the boundaries of the HCA are adjusted accordingly.
3. *Retain individual heritage items requested for removal by property owners (Refer to Sections 10.1.1 and 10.2)*
 - 3 and 42 Essex Street have been reassessed for their heritage significance and contribution to their respective Heritage Conservation Area, East Epping and Essex Street respectively, and are recommended to retain their heritage listing under Schedule 5 of the Hornsby LEP 2013.
4. *Rezone removed properties from East Epping Heritage Conservation Area, 5, 7 and 7A Norfolk Road and identified properties within 'Rockleigh Park' to R3-Medium Density Residential with 12m height limit (Refer to Section 11.5)*
 - In order to provide a consistent transition between R4-High Density Residential development on Essex Street and Pembroke Street from further encroaching on the East Epping Heritage Conservation Area, the removed properties from the East Epping Heritage Conservation Area (25 Pembroke Street, and 1, 3, and 3A Essex Street), 5, 7 and 7A Norfolk Road (which share a driveway with 3 and 3A Norfolk Road) and the late 20th Century development known at 'Rockleigh Park' are recommended to be rezoned as R3-Medium Density Residential with a 12m height limit, in order to provide a smooth transition from the R2-Low Density Residential of the Heritage Conservation Area and the R4-High Density Residential area of Essex and Pembroke Streets.
5. *Changes to Design Interface Guidelines of the Hornsby DCP (Refer to Section 11.2.3)*
 - The current Design Interface Guidelines in Section 9.4.1 of the Hornsby DCP 2013 are considered to be a good framework for which to assess the impact of high and medium density residential developments which are located in the interface areas with Heritage Conservation Areas. However, Section 9.4.1 needs to be considered at least in relation to Sections 9.6.6 and 9.6.8. It is recommended that where R3 and R4 Zones interface with a Heritage Conservation Area or Heritage Item that a

10m setback, which is required for Chapman Avenue, should be implemented in order to aid in maintaining the context and setting of each Heritage Conservation Area and Item. In addition, sufficient deep soil planting between R3 and R4 and heritage conservation areas and items should be encouraged, as well as the retention of any mature trees which aid in screening the high or medium density development from the heritage conservation area or heritage item. Furthermore, an adequate assessment of the potential heritage impact on the Heritage Conservation Area and/or Heritage item should be addressed for any future proposed development, to aid in the mitigation of likely heritage impacts.

6. *Maintain current 17.5m and 12m height limits of R4 High Density Residential Zone and R3 Medium Density Residential Zone respectively (Refer to Section 11.3)*

- To ensure that a sufficient transition between Heritage Conservation Areas are maintained and are not further adversely impacted upon through higher density development at interface areas, it is recommended that the current height limits for R4 and R3 Zones are maintained.

7. *Extend R3-Medium Density Residential Zone to Brigg Road and Rose Street (Refer to Section 11.4)*

- Recommendation to extend R3-Medium Density Residential Zone to the northern side of Brigg Road and to Rose Street, which will have an acceptable impact upon the current setting of the Essex Street HCA, provided that adequate consideration is given in regards to sufficient setback, deep soil planting and on the impact upon the setting and curtilage of the Essex Street HCA in any further development proposals, incorporating the recommendations provided in Section 11.2 of this study report.

8. *Additional Recommended Updates to Planning Controls (Refer to Section 11.6)*

- Include an additional prescriptive measure for Essex Street and Rosebank Avenue HCA Provisions for properties located on interface with R4-High Density Residential Zone, as follows:
 - i. Additional development in the rear of properties with direct interface to High and Medium Density Residential Zones can develop up to two storey additions, provided that the addition will not reduce the contribution of the property to the HCA, will not remove mature trees or plantings, and will not reduce the streetscape character of the area.
 - ii. In addition, it is recommended that a provision or Condition be included in the consents for an archival photographic recording to be prepared for all Heritage Items and Contributory buildings and any Neutral buildings which date from the Victorian, Federation, Inter War or Post War periods within the East Epping, Essex Street and Rosebank Avenue HCA's when major alterations and additions and/or demolition is proposed for the property.

9. *Assessment of significance of southern end of Essex Street HCA in future Heritage Review*

- Recommended that future heritage reviews, possibly as part of the new Local Environmental Plan to be developed for the City of Parramatta Council, consider assessing the southern end of the Essex Street HCA, for either extending the HCA's boundary, or for an arboricultural assessment to be undertaken for the possibility of listing the street trees as a landscape items.

10. *Retention or replacement of street trees in Rosebank Avenue due to stormwater drainage for Cliff Road*

- Recommended for the seven (7) street trees located on the western side of Rosebank Avenue identified to be impacted by the proposed stormwater drainage from Cliff Road to be maintained, or if this is not possible, that appropriate replacement trees be planted in the road reserve to ensure that the consistent street tree plantings of Rosebank Avenue are maintained.

11. Hornsby Council Heritage Review - Stage 6 (Refer to Section 13.6)

In summary, the resultant recommendations and updates were made as part of Stage 6 of the Hornsby Council Heritage Review:

iii. **Requests for Removal of Heritage listing**

The one request for removal of a Heritage Item, 184 Ray Road, has been recommended to be retained and the Inventory Sheet for the item has been updated.

iv. **Amend Anomalies in Details of Heritage Listings**

One Heritage Item, 73A Oxford Street, was recommended to be changed from R3 Medium Density Residential Zone to R2 Low Density Residential Zone to reflect the East Epping HCA zoning of R2.

v. **Request for Listing of New Items**

Of the six (6) properties recommended for heritage listing under the Hornsby LEP 2013, three (3) properties were recommended for heritage listing and three (3) were not recommended for heritage listing. Inventory Sheets for the three recommended heritage items have been created.

vi. **Review Isolated Items in Housing Strategy Zone (R4) High Density**

Of the two (2) Heritage Items which were identified as isolated items in R4 High Density Residential Zones, both Heritage items were recommended to be retained and the Inventory Sheet for each item were updated to reflect their current condition.

vii. **Review Details of Heritage Listing**

Eight (8) Heritage Items required various details reviewed. All Inventory Sheets were updated for each of the eight (8) items. Two (2) Heritage Items will require further investigation and follow up, due to needing expert advice or access to the site. All Inventory Sheets for these Heritage Items have been updated to reflect their current condition.

viii. **Missing Inventory Sheets for Existing Heritage Items**

Four (4) Heritage Items were missing Inventory Sheets. All four (4) Heritage Items Inventory Sheets have been either located or created, with up to date photographs. One Heritage Item was recommended for investigation by a Heritage Consultant who specialises in garden and landscapes.

2. Introduction

2.1 Background

This study has been commissioned by the City of Parramatta Council in order to undertake a Heritage Review of Epping Town Centre. The City of Parramatta Council recently inherited the balance of Epping Town Centre as a result of Council amalgamations from Hornsby Shire Council on the 12 May 2016. Currently, the controls for different parts of Epping Town Centre vary as a result of previous decision making structures under the City of Parramatta Council and Hornsby Shire Council.

The City of Parramatta's City Strategy department identified the need of a heritage review to inform strategic land use decisions across the Epping Town Centre that was previously under the jurisdiction of Hornsby Shire Council. In addition to review related concerns of residents on a number of heritage issues. It excludes any analysis on the western side of the Town Centre, railway line, excluding Rosebank Avenue HCA and properties subject Stage 6 of the Hornsby Council Heritage Review.

The principal aims of the heritage review are to:

- Review the three existing Heritage Conservation Areas (HCAs) incorporating East Epping, Essex Street and Rosebank Avenue located within the Epping Town Centre area and are recently acquired by the City of Parramatta Council;
- Investigate concerns raised by residents on a number of heritage issues including:
 - the value and significance of each HCA; and
 - the value and significance of properties located on interface areas with R4 and R3 High Density Residential Areas
- Review of current planning controls of interface areas around the existing HCAs; and
- Conduct Stage 6 of the Hornsby Council Heritage Review.

2.2 Study Area

The study area is located within the Epping Town Centre CBD, and is limited to the land that was previously under the jurisdiction of the Hornsby Shire Council until May 2016 (Figure 1). Epping Town Centre surrounds Epping Train Station along the North Shore and Northern Line.

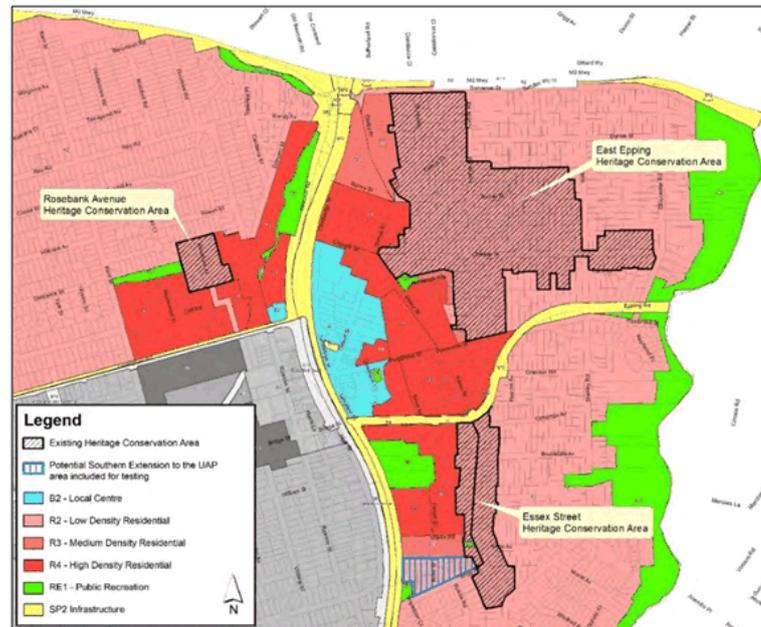

Figure 1: Epping Town Centre Study Area (Source: Amended Epping Town Centre Composite Zoning and Heritage Conservation Areas map, supplied by City of Parramatta Council)

2.3 Objectives and Components

This study focuses on five main parts, addressing the principal objectives of the heritage review:

1. Introduction to Heritage Review and overview of previous heritage studies:

- Review of all existing heritage studies relating to the study area.

2. Review of East Epping, Essex Street and Rosebank Avenue HCAs:

- Undertake a Heritage Assessment of East Epping, Essex Street and Rosebank HCAs;
- Assess the heritage value and significance of properties on the western side of Essex Street between Epping Road and Madeira Street, with the Essex Street HCA;
- Assess the heritage value and significance of properties located in the East Epping HCA on the interface with the R3 Medium Density Residential Zone and R4 High Density Residential Zone, with particular attention to 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street; and
- Provide advice on whether there are grounds for removal of any three of these HCAs in full or in part.

3. Review of Individual properties in HCAs:

- Investigate the heritage value and significance of 1 and 3 Essex Street and consider whether there are grounds for the removal of these properties from the Heritage Schedule of Hornsby LEP 2013 and the East Epping HCA; and
- Investigate the heritage value and significance of 42 Essex Street and consider whether there are grounds for the removal of this property from the Heritage Schedule of Hornsby LEP 2013 and from the Essex Street HCA.

4. Planning Controls Review

- Investigate the impact and implications of increasing the 17.5 and 12m height limits by one storey in the R4 High Density Residential Zone and R3 Medium Density Residential Zone on the integrity and conservation values of the East Epping, Essex Street and Rosebank Avenue HCAs. This investigation includes the implications of extending the R3 Medium Density Residential Zone in Briggs and Rose Streets as shown in blue hatched in Figure 1.
- Investigate the effectiveness of the current design interface guidelines (Section 9.4.1) and other relevant provisions in the Hornsby DCP 2013 in mitigating the effects of development on the character and integrity of the HCA as opposed to amenity concerns. As part of this investigation, have regard to topography and review recently approved Development Applications at the interface with HCAs.
- In addition, provide any recommendations (with clear justification) to modify or add planning and development control to address heritage related impacts in the study area.
- If any properties within the Essex Street HCA are identified for removal from the HCA, provide recommendations for the appropriate zones with FSR and height controls, and the potential implications of these changes on the character and integrity of the balance within the Essex Street HCA.
- If any properties located within the East Epping HCA are identified for removal from the HCA, provide recommendations for the appropriate zones with FSR and height controls; and
- If 1 and/or 3 Essex Street are identified for removal from the Heritage Schedule of Hornsby LEP 2013 and/or the East Epping HCA, provide recommendations on the appropriate zoning and height limits.

5. Hornsby Council Heritage Review – Stage 6:

- Investigate the list of matters identified by Hornsby Shire Council for Epping that were scheduled for review under the next Hornsby Council Heritage Review – Stage 6. This list covers requests to:
 - remove heritage items.;
 - amend anomalies in details of heritage listings;
 - review isolated heritage items in the R4 High Density Residential Zone;
 - review details of heritage listings; and
 - investigate missing inventory sheets for existing items and complete required information.

2.4 Author Identification

The following report has been prepared by Keira De Rosa (Assistant Heritage Consultant) in association with Kerime Danis (Director - Heritage) who has also reviewed and endorsed its content.

The study team included the following staff of City Plan Heritage:

- Kerime Danis (Director - Heritage), MHeritCons (Hons), BArch, AICOMOS Immediate Past President.
Field surveys, site inspections, liaison with client, report preparation and input to/ review of documentation as required.
- Keira De Rosa (Assistant Heritage Consultant) MHeritCons, MRes, BA:
Field surveys, site inspections, report preparation, mapping, graphics and preparation of State Heritage Inventory forms.
- Ziggy Potts (Assistant Heritage Consultant) MMHS, BA(Honours), BSc:
Preparation of State Heritage Inventory forms.

All photographs have been taken by CPH during the field surveys and site inspections conducted on 28 February 2017, 20 March, 21 March and 31 March 2017 unless otherwise stated.

This Heritage Review remains the intellectual property of City Plan Heritage and may not be reproduced in whole without the prior permission of the authors.

2.5 Sources

The reports and planning documents outlined in Section 3.1 have informed the historical context of this report. Additional secondary and primary source have also been sourced for the assessment of both HCAs and heritage items within this report.

A number of historical photographs and maps have been obtained from the NSW State Library online catalogue, the National Library of Australia, HLRV, Hornsby and City of Parramatta Council Local Studies and through various libraries accessed via Trove.

Current aerial photographs have been sourced from the NSW Department of Lands Spatial Information eXchange (SIX) at <http://lite.maps.nsw.gov.au/> as it has detailed aerial maps for Sydney while some street maps have been sourced from Google maps at <http://maps.google.com.au>. The NSW Department of Lands SIX website provided historical aerial photography from 1943.

2.6 Acknowledgments

City Plan Heritage wishes to acknowledge the invaluable support of the people and organisation that assisted in the preparation of this report:

- Paul Kennedy, Project Officer – Land Use Planning, City of Parramatta Council;

- Kevin Kuo, Team leader - Strategic Land Use Planning, City of Parramatta Council;
- Lily Wang, Place Manager, City of Parramatta Council;
- Laura Fraser, Heritage Planner, Hornsby Shire Council;
- Residents of East Epping, Essex Street and Rosebank Avenue Heritage Conservation Areas.

2.7 Limitations

- The land outside the area mapped in Figure 1 has not been covered in this report, however, was briefly surveyed during the site inspections in order to inform the contextual analysis;
- An assessment of the archaeological potential (Aboriginal and European) of the study area is beyond the scope of this report;
- Only heritage items which have been flagged for review as part of the Hornsby Council Heritage Review – Stage 6 have been reviewed. This means that the HCAs west of the railway line (excluding Rosebank Avenue HCA) were excluded from this study.
- A history of the Epping Town Centre and the three HCAs which are the focus of this report has been primarily adapted from previous studies conducted on the area, due to the limitations of the scope of works for this report and the restriction of time. Additional historic research has only been undertaken where it has been deemed by the author to require further research and explanation. Additional historic images and maps have been included in the history of the areas, where possible and available.
- Most review of heritage items and potential heritage items was undertaken on the basis of an external survey, with limited access to the properties themselves, or the interior of buildings; and
- A full heritage assessment of all sites recommended for listing has not been conducted as part of this review, however, heritage inventory forms have been prepared that provide sufficient justification for their recommended listing. This review recognises that further detailed analysis of the heritage assessment of the sites, if listed, can occur as part of the statement of heritage impact when a future development is proposed

3. Methodology

3.1 Previous Studies and Planning Document References

The current planning documents and maps relevant to heritage conservation in the study area of Epping Town Centre are:

- *Hornsby Local Environmental Plan (LEP) 2013*; and
- *Hornsby Development Control Plan (DCP) 2013*;
- *Epping Town Centre Public Domain Guidelines* (December 2015)

Previous Heritage Studies and Reviews relevant to Epping Town Centre include:

- Perumal Murphy Wu, *Hornsby Shire Heritage Study, Final Report* (May 1993)

This study was the first comprehensive study of the environmental heritage of the Hornsby LGA and established the current heritage listing for the Hornsby LEP. The Heritage Study was presented in three volumes, including a Thematic History, Specialist Report and Final Report. The Heritage Study's primary objectives were to: identify and analyse the environmental heritage of Hornsby Shire; make practical recommendations for its conservation and management; make recommendations on changes that may be required to the Hornsby Planning Scheme Ordinance, with regards to heritage; and promote heritage within Hornsby Shire. The first stage of the study followed a thematic study approach as it was for most of the heritage studies carried out across New South Wales at the time. This first volume delivered a basis for

the wider Heritage Study through identifying major themes of development across Hornsby Shire. The second volume described Hornsby Shire's built heritage in its historical context and explains its significance for Hornsby, the Sydney region and the State. This volume also included 50 recommended heritage items for Epping. The third volume presents a strategy for the conservation of Hornsby Shire's valuable heritage, including recommendations for development control measures and a range of other non-statutory initiatives.

- Tropman and Tropman Architects, *East Epping Conservation Evaluation and Review* (October 2001)

This report reviewed the heritage qualities of East Epping and the urban setting of the area. The heritage qualities and urban setting of the East Epping area was evaluated to identify HCA and Heritage Items within the study area. As a result, fourteen (14) new heritage items and two (2) HCAs were identified and recommended for inclusion in the Hornsby LEP. The two (2) HCAs recommended within the study area were East Epping and Essex Street HCAs.

- CPC Consulting, *Rosebank Avenue Heritage Assessment* (July 2003)

Following from a proposal to subdivide 15 Rosebank Avenue, Epping and for the demolition of the existing Inter War period dwelling, the streetscape was noted for its intact Inter War period landscape. As such, it was resolved by Council to undertake a heritage assessment of Rosebank Avenue, Epping to determine the need to implement a HCA. This report undertook a heritage assessment of Rosebank Avenue, Epping to determine the character, setting and heritage significance of the area and to determine the need to implement a HCA. The report concluded that the Rosebank Avenue streetscape is the only intact fine representative example of the residential development of Inter War housing estate within the Hornsby Shire and was recommended for listing under the Hornsby LEP.

- Tropman and Tropman Architects, *Hornsby Heritage Review Stage 3* (July 2004)

This report formed the third Hornsby Heritage Review aiming to assess the heritage significance of individual properties and to make recommendations for items inclusion or exclusion from the Hornsby LEP. The primary objectives were to: investigate and assess the heritage significance of the properties included in the review; to formulate statements of significance that address the heritage qualities of the properties; and to make recommendations for items to be included in, or removed from the Hornsby LEP. In Epping one (1) item was recommended to be retained and one (1) item was not recommended to be added.

- Landarc, *Hornsby Shire Heritage Review Stage 4* (January 2008)

Forming the fourth Heritage Review for the Hornsby Shire, this report included a review of heritage listed trees and a number of other built heritage items. Requests from property owners for the addition or removal of items were reviewed as well as nominations from individual and community groups considered within the report. The review of built heritage items included five (5) properties within Epping, with one recommended for removal and three (3) to be added to the Hornsby LEP.

- Godden Mackay Logan, *Hornsby Heritage Study Review Stage 5* (March 2013)

The fifth stage of the Hornsby Heritage Study reviewed the heritage significance of 78 items, for recommendations of inclusion or deletion of items from the Hornsby LEP. The review assessed thirty six (36) properties containing built and landscape items, as well as forty two (42) privately-owned heritage listed gardens. Of the items located in Epping, two (2) were recommended for listing, one (1) was recommended not to list, one items' details were updated, one (1) item was recommended for retention on LEP and two (2) items were recommended for removal.

- Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013)

Following from the preparation of the *Epping Town Centre Study* (2011) and the proposed intensification of the area, Hornsby Council resolved in 2012 to progress with recommendations from the 2001 and 2003 for the reassessment of three proposed HCAs, including the East Epping, Essex Street and Rosebank Avenue HCAs. In addition, the significance of twenty three (23) individual properties nominated for heritage listing within the Epping Town Centre Area were also assessed and the impact of the proposed Cliff Avenue Residential Intensification Precinct on the proposed Rosebank Avenue Heritage Conservation Area was also assessed. The review proposed for: all three HCAs to be listed, with extensions to some of the recommended boundaries of the areas; twenty two (22) of the twenty three (23) recommended items to be listed and a number of controls were recommended for the interface areas of the Rosebank Avenue HCA including minimum setback, reduced heights and massing new development in the Cliff Avenue Residential Intensification Precinct.

3.2 Study Methodology

This study employs a methodology that is consistent with the guidelines for Heritage Studies prepared by the then NSW Heritage Office and Department of Urban Affairs and Planning. It also uses the system described in the NSW Heritage Manual 'Assessing Heritage Significance' guidelines. The philosophy and process adopted is that guided by the Australia ICOMOS Burra Charter 2013.

The first stage of this study was to review the background documentation including but not limited to the existing studies detailed in Section 3.1 above and the inventory forms for the East Epping, Essex Street and Rosebank Avenue HCA's and the existing Heritage Items within the area which have been requested for review as part of this study. The review allowed for understanding of the previous rationale in the contribution/significance ranking and assessment of the boundaries of each HCAs and the Heritage Items within the area. Subsequently, determination of a methodology by which the HCAs and Heritage Items would be assessed has been established so as to maintain a consistent approach and assessment across the Epping Town Centre study area.

3.3 Heritage Conservation Area Definitions

HCAs are identified by analysing their heritage significance and the special characteristics that make up that significance; these may include subdivision and street pattern, vegetation, the consistency of building materials, form and scale, or the common age of the building stock and historical associations.

HCAs can be recognised and assessed in a number of ways. One such way is to rank and map the elements of an area to determine the cohesiveness and integrity of a place. A HCA will demonstrate a high proportion of contributory items in comparison to all other items. As well as demonstrating the proportion of significant elements topographically a HCA should also be evident in its visual experience. A HCA will become apparent when one moves into it due to the cohesive and consistent building forms, materials and scale which create a sense of place. When one can recognise that an area has a sense of place it becomes a matter of determining why that sense of place exists by articulating the physical and historical characteristics which define it, and if it then demonstrates sufficient value to be considered significant through those characteristics. Therefore, as well as having a high proportion of significant items these elements must also be visually apparent within the area. An understanding of historical patterns of subdivision and development within a locale will also aid in the identification of HCAs as one will be able to determine where such areas potentially exist only to qualify if its original elements are intact and interpretable.

Detailed Character Area Statements, Statements of Significance, Descriptions and Conservation policies were developed for East Epping, Essex Street and Rosebank Avenue HCAs in Section 6.0.

3.4 Ranking Methodology

A detailed survey of each of the HCAs, with particular focus on their interface areas with R4 High Density Residential Areas was then undertaken with methodology and system of ranking applied to the individual properties in each of the HCAs. The results of the survey were then mapped showing the following recommendations for rankings in Section 7.0.

Ranking	Definition
Heritage Item	A building that has been identified as an item of significance and has been listed on the Hornsby LEP 2013.
Contributory	A building that contributes to the character and significance of the Heritage Conservation Area for its historic or aesthetic values, or both. Building that have been adversely altered but still demonstrate historic and aesthetic values of significance to the area are also considered within this category. For example, a dwelling which may have had windows replaced but which otherwise retains its overall form and other detailing would be considered to be a contributory dwelling or dwelling with historic value. These items are of consistent period, scale, materials and form but are not individually significant enough to be included as a heritage item. They add to the cohesive and representative quality of the area.
Neutral	A building that does not contribute to the significance of the area but also does not detract from the area's overall character in terms of form, mass and small scale so that they fit without being disruptive. This may include early or new buildings. An example of a neutral building would be a modern single storey dwelling which respects the setbacks, forms and materials of the neighbouring dwellings. Retention of such neutral buildings may not be required provided that it is replaced with an appropriate infill building in a similar neutral nature.
Non-contributory	A building that detracts from the significance of the area and changes the character of the area. This may include early buildings with intrusive alterations and additions that erode their contribution to the significance of the area and which cannot easily be reversed. It also includes new buildings with detailing, scale and form that are not in line with the character of the area, for example large two storey buildings in unsympathetic 'Mediterranean' or other modern styles, such as light coloured rendered walls and black concrete roof tiles.

4. Study Area Description

4.1 Epping Town Centre Description

The study area is located in the Town Centre of Epping, a north-western suburb approximately 18km north-west of Sydney Central Business District (CBD) and 10km north-east of Parramatta CBD. The town of Epping contains a mixture of residential, commercial, education and recreation resources, which are centred around the North Shore and Northern train line around Epping Train Station. Epping Town Centre spreads in all directions outwards from Epping Train Station, with the highest density developments being located along the western side of the railway line. The whole of the Epping Town Centre study area is administered by the City of Parramatta Council. The eastern and north-western portions of the study area were formerly part of the Hornsby Council Local Government Area (LGA) until the recent local council amalgamations. The whole of the Epping Town Centre became part of the City of Parramatta LGA on 12 May 2016.

Epping Town Centre is bounded to the north by Cheltenham and North Epping, to the east by Marsfield, to the south by Eastwood and to the west by Carlingford. Further to the east is Macquarie University, ranked within the top 10 Australian Universities and among the top 2% of universities in the world and Macquarie Park, the second largest business district in NSW. In October 2012, Epping Town Centre was endorsed by the NSW Government as an Urban Activation Precinct, to develop new planning controls for the centre, allowing for additional dwellings through rezoning, a revitalised commercial and retail core, and upgrades to existing recreational facilities. In combination with the construction of the Sydney Metro Northwest and the close links to Macquarie University, Macquarie Park and Parramatta, the population of Epping is expected to exponentially increase over the coming decades.

Three HCAs exist within the Epping Town Centre study area, all of which contain a number of heritage items, totalling thirty five (35) across all three HCAs. Both the heritage conservation areas and heritage items are listed under Part 1 and 2 of Schedule 5 of the Hornsby Local Environmental Plan (LEP) 2013, of which include the following:¹

Heritage Conservation Areas		
Item No.	Description	Address
C9	East Epping Conservation Area	Refer to Figure 2
C10	Essex Street Conservation Area	Refer to Figure 2
C11	Rosebank Avenue Conservation Area	Refer to Figure 2

Heritage Items		
Item No.	Description	Address
367	House and garden	21 Chester Street
368	House and garden	23 Chester Street
369	Garden	27A Chester Street
370	"Snaresbrook"	45 Chester Street
371	House	57 Chester Street
372	House	70 Chester Street

¹ Heritage items located outside of the East Epping, Essex Street and Rosebank Avenue HCAs are not reviewed within this heritage review due to this report's limited scope. Only heritage items which are included within the *Hornsby Council Heritage Review – Stage 6*, which are also located outside of the Heritage Conservation Areas, are reviewed within this report in Section 13.0.

378	"Asheldom"	47 Essex Street
379	House	76 Essex Street
380	House	84 Essex Street
385	Epping Public School	2-16 Norfolk Road
386	House and garden	9 Norfolk Road
387	House	33 Norfolk Street
388	"Gwydir"	40 Norfolk Road
389	"Glenorie"	44 Norfolk Road
395	Chester Street Uniting Church and Grounds	56A Oxford Street
396	House	73A Oxford Street
397	"Folkestone"	87 Oxford Street
398	House and garden	93 Oxford Street
403	"Woodlands"	25 Ray Road
408	House	9 Rosebank Avenue
409	House	10 Rosebank Avenue
412	House	40 Surrey Street
413	House	9 Sussex Street
414	House	11 Sussex Street
415	House	15 Sussex Street
418	House	20 York Street
798	House	3 Essex Street
800	House	42 Essex Street
801	House	39 Norfolk Road
802	House	41 Norfolk Road
803	House	43 Norfolk Road
805	House	85 Oxford Street
806	House	91 Oxford Street
807	House	8 Surrey Street
808	House	18 Surrey Street

Descriptions of each of the HCAs under review as part of this study are detailed in Section 6.0. The following images provide an overview of the context of the Epping Town Centre study area.

5. Historical Summary

The following general history of the Epping Town Centre Area has been adapted from the *Epping Town Centre Heritage Review*, prepared in 2013 by Perumal Murphy Alessi in 2013, and the *East Epping Conservation Evaluation Review*, prepared in 2001 by Tropman and Tropman Architects. Historic maps and images have been included to supplement this overview. References for sources of information for the history of Epping Town Centre are scarce within both of these previous reports. Where possible, references have been added to substantiate and validate information incorporated from these reports.

5.1 General History of Epping Town Centre Area

European settlement of the Epping Town Centre was slow to develop in the early years of the nineteenth century. In 1804 the eastern side of the now existent railway line was part of the Field of Mars, an area of over 6000 acres dedicated as Common Land for the use of the personnel of the NSW Regiment, whilst areas to the west of the railway line was dedicated to naval officers. During the 1820s, part of the eastern side of the Epping Town centre Area was known as the 'Pennant Hills Sawing Establishment'. The dwellings, cooking place and burial ground of the timber sawing mill of the early 1800's was situated on the eastern side of the railway line on Oxford Street, Epping, now the present day site of the Chester Street Uniting Church. Dwellings included weatherboard and bark huts erected for the overseer and his staff and the convicts. Directly to the east of residential component of the sawing establishment was the saw pit which stretched around the present day Oxford Street from the junction of Chester Street to Pembroke Street. The sawing establishment was not long lived and closed around 1830.

Development between the years of 1830 and 1880 was very slow, with the area primarily being occupied by orchards, gardens and bushland. Very little evidence from this period of development exists today. Prior to the development of the railway line in 1882, there was no public transport to the area which hindered the development of a suburban population. The construction of the railway, which begun in 1881, motioned forward the development of the area. The first railway station for the Epping Town Centre area was situated on the western end of Surrey Street, further north than the present day platform. The original station consisted of a single platform, 264 feet long. The original name for the station was Field of Mars, which was soon changed in the following year to Carlingford. Only eight years following the development of the original station, the station was moved to the present location in 1890, prior to the duplication of the line in 1892 for the provision of improved and faster services to the Sydney region. At this same time, the bridge over the railway line was created, known as Bridge Street, and the Epping township continued to expand.

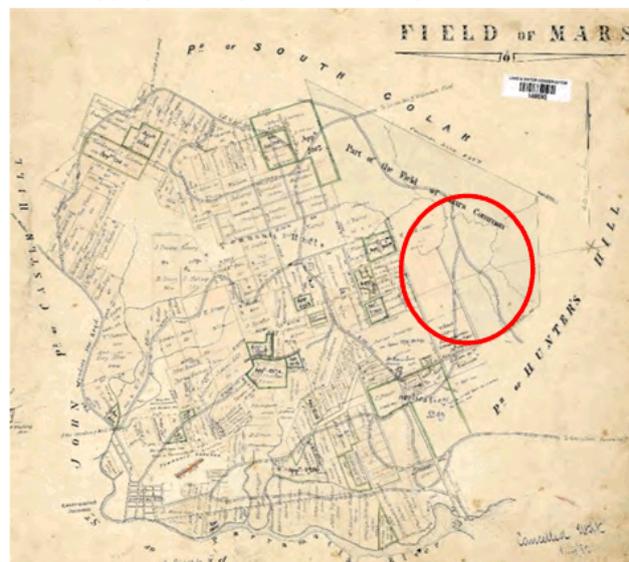

Figure 6: Field of Mars in 1882, prior to the development of the railway. The indicative location of the Epping Town Centre area is circled in red (Source: Land and Property Information, Sheet Reference 4, Edition Number 0)

Figure 7: Epping Railway Station in 1906. The bridge which now forms part of Bridge Street is visible in the background to the left and current day Beecroft Road runs along the length of the image. (Source: National Museum Australia, Josef Lebovic Gallery collection no. 1)

The opening of the railway spurred on residential development and the establishment of more orchards which had already been established in the area earlier in the nineteenth century. From the late nineteenth to the early twentieth century, Epping was known for its orchards, particularly for citrus in winter and stone fruits in summer. The railway had its advantages for the development of the orcharding industry, with easier access for local farmers to access the markets to sell their produce. One of the most prominent families of the orcharding industry in Epping during this time were the Mobbs family, who are thought to have been situated somewhere west of the West Epping Public School along present day Carlingford Road. Nurseries were also developed within the area, such as the Vollmer's Nursery which extended was located on the block bound by Epping Road to the north (formerly Laurel Avenue) Forest Park to the south (formerly Brown's Paddock), nearly as far as Essex Street to the east and Blaxland Road (formerly Sutherland Road) to the west. This nursery was established by M.F. Vollmer, a German who has arrived in Australia in the 1880s and moved into the Epping area during the 1890s. Vollmer took on a partner, C. E. Vessey, and the nursery became known as Vollmer and Vessey, Mount Tomah Nursery. Vessey took over after Vollmer's death and retired in 1919 after which his son Fred took over the business. Fred relocated the business to Eastwood and the land occupied by the nursery was subdivided in 1920 and subsequently developed. Part of the current Essex Street HCA lies on the land of the former Mount Tomah Nursery, which includes the heritage listed item at 42 Essex Street.

Figure 8: View of Mount Tomah nursery in 1902, possibly looking from the crest of present day Pembroke Street, looking south. The two dwellings on the left-hand side of the picture may possibly be 42 and 46 Essex Street, both of which are dwellings which date to the Federation period, despite their current later additions. (Source: City of Ryde Library, 4969553)

Within the same decade as the development of the railway line the Epping Town Centre area began to be closely subdivided, particularly to the east. The section of the Common Land of over 6000 acres originally granted in 1804, was subdivided not long after the railway in 1886. The first subdivision included land from Devlins Creek in the north to Pembroke Street in the south. Preparations for the sale were simultaneous with the celebration of Queen Victoria's Golden Jubilee to mark the 50th anniversary of her reign in 1887. The street names were nearly all named after English towns and counties.

In 1889, the name 'Epping' was officially adopted for the area, the name being derived due to the many trees in the area after 'Epping Forest' in England. At the same time the area surrounding the southern portion of present day Essex Street was subdivided. A survey of the land was made in 1886 and went up for sale on 30 November 1889. Initially this land was divided into country lots. The result was that, next to the growing town residences, there was a series of farmlets with both well-to-do residence and orchards. The situation of the country lots remained until the 1920s when further subdivision began.

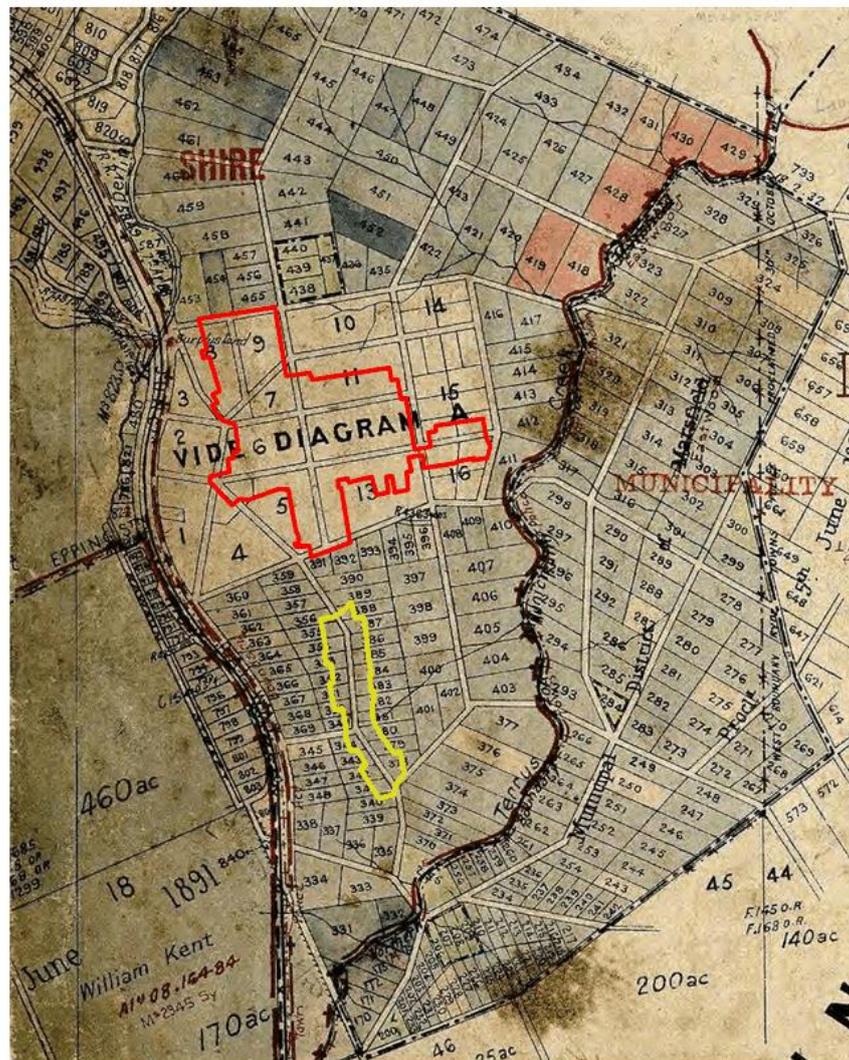

Figure 9: Extract from 1904 map of Parish of Field of Mars, County of Cumberland, Land District of Parramatta. The subdivision of the East Epping HCA and Essex Street HCA are beginning to take shape, and are outlined in red and yellow, respectively (Source: Land and Property Information, Sheet Reference 1, Edition Number 4)

As most of the early development was on the eastern side of the railway, a number of shops also emerged in the area, particularly near the station. The growing population also resulted in the Education Department's decision to construct a centralised public school in the area, now known as Epping Public School, which lies within the East Epping HCA. In January 1900, a site of over 2 acres on the corner of Norfolk Road and Pembroke Street was purchased for £350. In July, a tender was accepted for the erection of the building which was completed in June 1901. The first enrolment was for 94 pupils and by the end of the first month this number increased to 135. The School has continued to develop with more buildings added in 1911, 1913 and 1922. The early buildings largely remain in a bushland setting and school continues to be a local focus in the area.

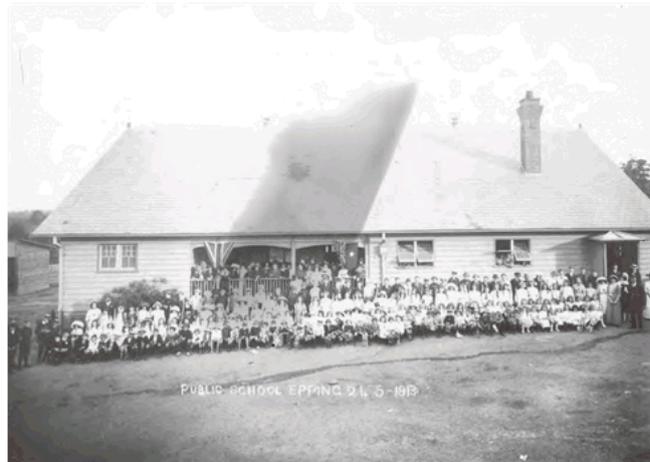

Figure 10: Epping Public School on Empire Day, 1913 (Source: Hornsby Central Library Local Studies, <https://hornsby.spydus.com/cgi-bin/spydus.exe/ENQ/OPAC/BIBENQ?BRN=64099>)

Major works were completed at Epping Station in 1900 when new platforms and a main platform building (which remains today) were constructed. Like most of the rail network the Station continued to be developed, largely in accordance with improvements to the overall system, but also to cater for the needs of the local population. The works have continued to the present, with major cross country link and triplication of the line through Chatswood and major upgrade of the complex, including construction of new overhead bridges and lifts completed in 2009. Further upgrades to Epping Station are scheduled as part of the Sydney Metro Northwest, scheduled to be completed in the first half of 2019.²

Figure 11: Epping Railway Station in 1900. The shops which had begun to develop around the railway station are visible to the right of the image (Source: National Library of Australia, <http://nla.gov.au/nla.obj-155296106>)

Unlike the eastern side of the station, land to the west of the station remained bushland and orchards for some time, however, the area was gradually developed during the early twentieth century, particularly during the Inter War period. One such subdivision was the Rosegrove Estate, today known as the Rosebank Avenue HCA. A short history of the Rosebank Avenue Heritage Conservation Area can be found in Section 6.4.2.

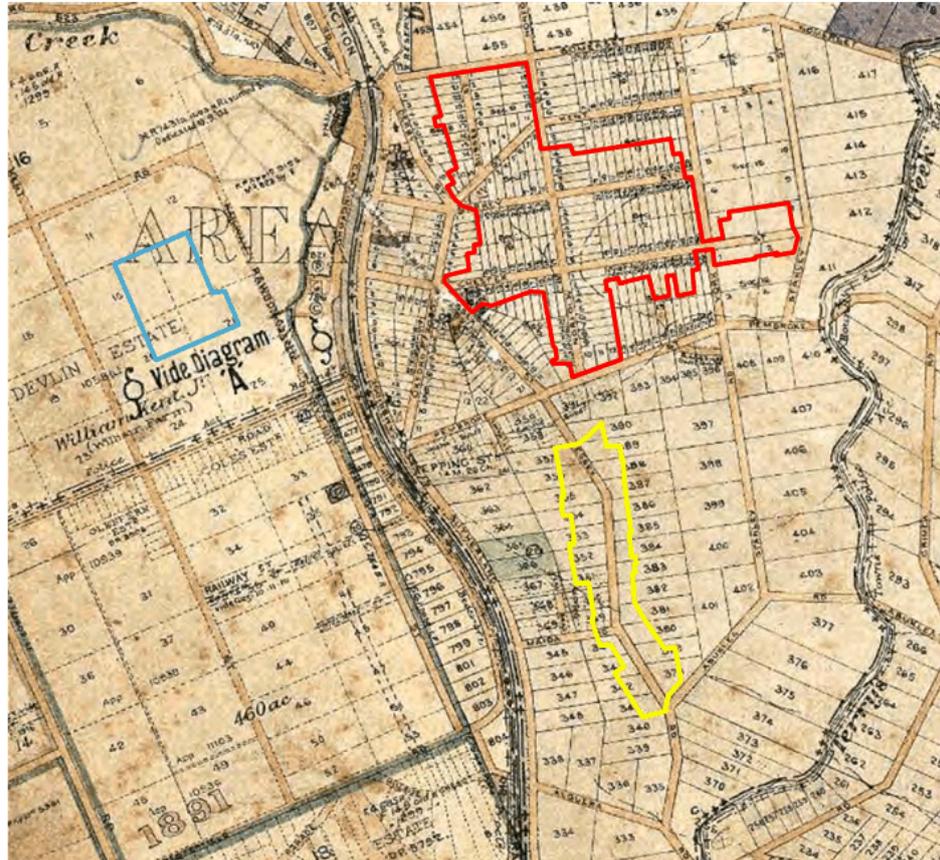

Figure 12: Extract from 1910 map of Parish of Field of Mars, County of Cumberland, Land Hornsby and Baulkham Hills Shires. The subdivision of the East Epping HCA has been divided since the 1904 map. The East Epping and Essex Street HCAs are outlined in red and yellow respectively. The Rosebank Avenue HCA is yet to be subdivided, which occurred during the Inter War period. The approximate outline of the Rosebank Avenue HCA is outlined in blue (Source: Land and Property Information, Sheet Reference 1, Edition Number 4)

The completion of Epping Road in 1940 and improvement of road networks recognised an increase in private car ownership and with this came further development and subdivision in the Epping Town Centre area. The overall improvements continued into the Post War period and building boom of the 1950s which saw a significant change in the character of the area, particularly the western side of the railway line. Aerial photographs and maps from the 1940s through to the 1950s display the development of the Epping Town Centre area.

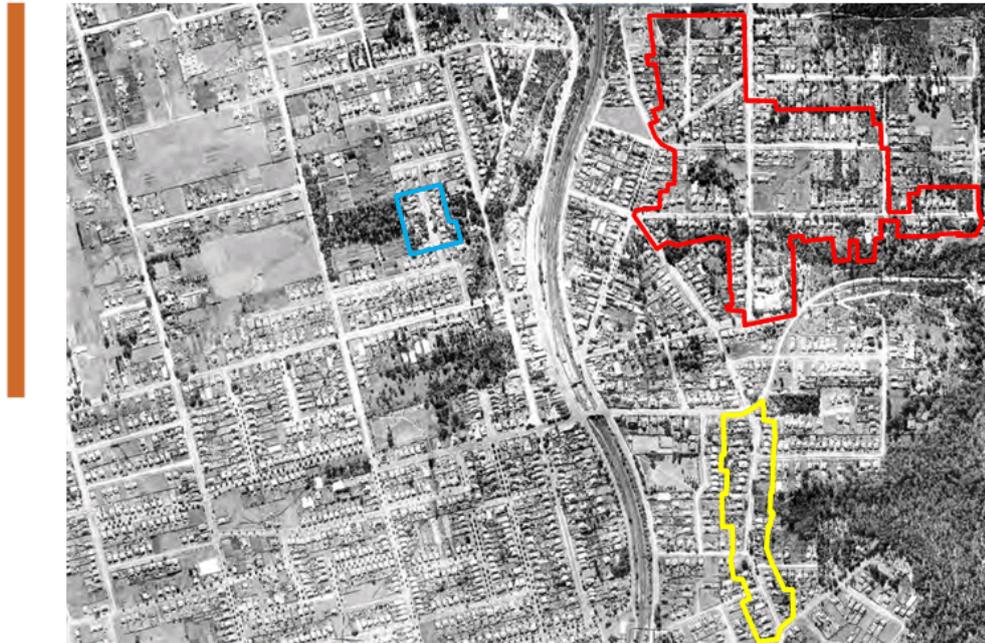

Figure 13: 1943 Aerial photographs of Epping Town Centre area. The East Epping, Essex Street and Rosebank Avenue HCA's are outlined in red, yellow and blue, respectively (Source: SIX Maps, accessed on 4 April 2017)

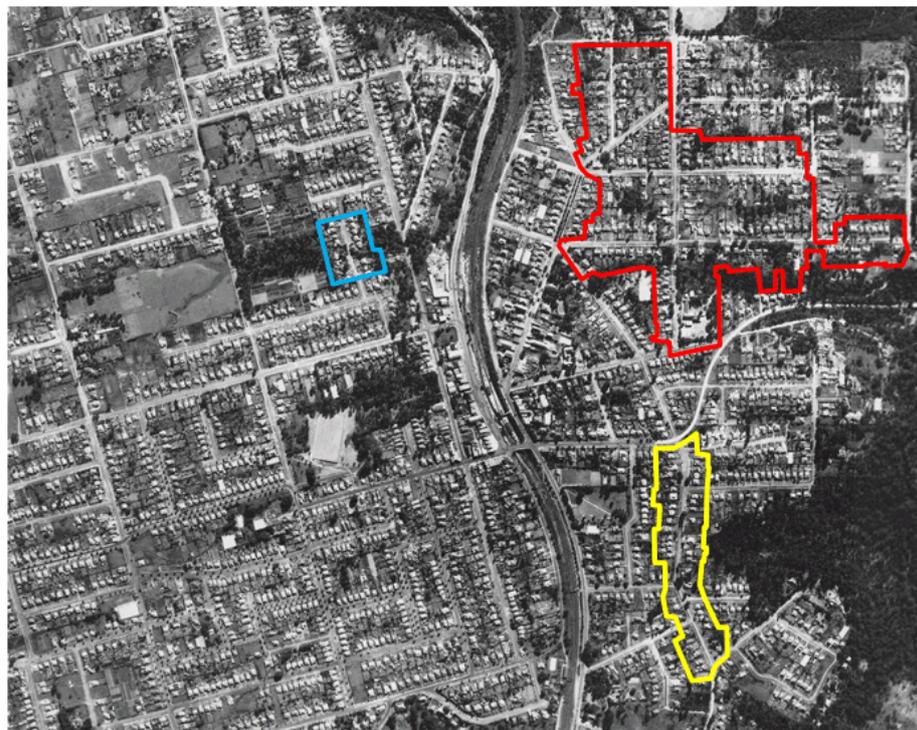

Figure 14: 1951 Aerial photograph of Epping Town Centre area. The area has been substantially developed by this point, including the western side of the railway line which saw significant development during the Inter War period. The East Epping, Essex Street and Rosebank Avenue HCA's are outlined in red, yellow and blue, respectively (Source: <https://www.flickr.com/photos/55198937@N05/9142070516>)

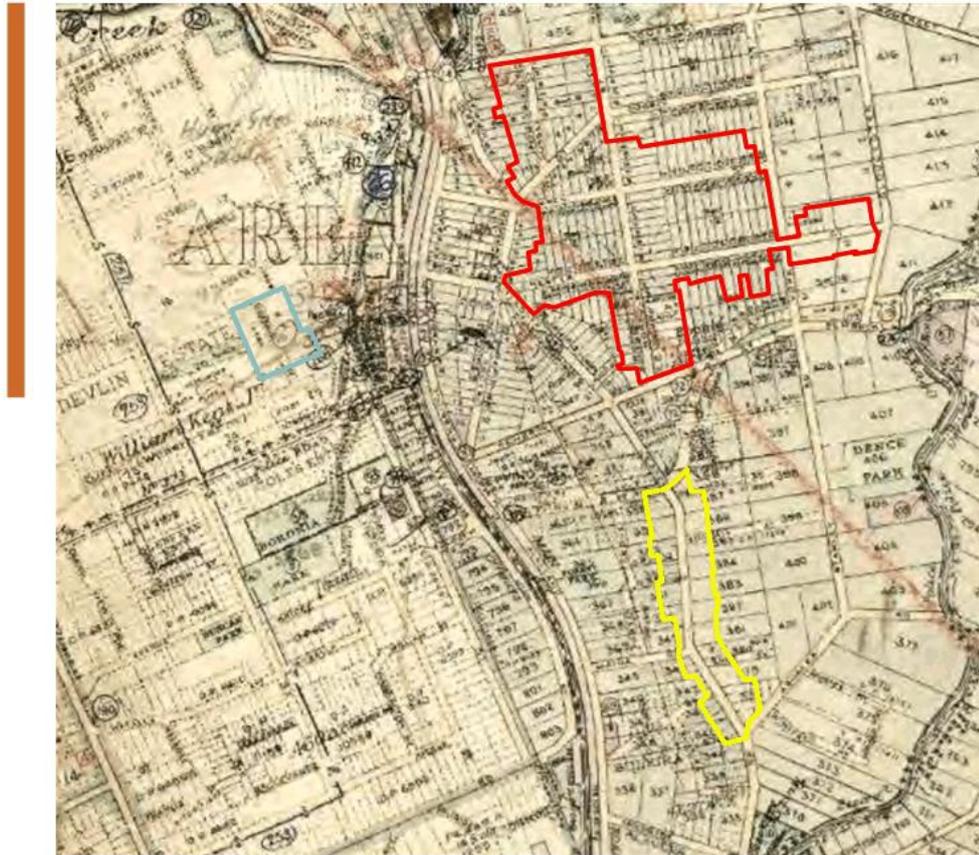

Figure 15: Extract from 1959 map of Parish of Field of Mars, County of Cumberland, Land Hornsby and Baulkham Hills Shires. The development of Epping Road is clearly reflected as well as the subdivision of the western side of the railway line. The East Epping and Essex Street HCAs are outlined in red and yellow respectively. The Rosebank Avenue HCA has by this time been subdivided, although the subdivision of the Rosegrove Estate is not clearly defined in this map. The Rosebank Avenue HCA is outlined in blue (Source: Land and Property Information, Sheet Reference 1, Edition Number 4)

Like many established areas in Sydney some medium density residential development occurred, particularly near the railway line, in the 1960s to the 1980s. Further improvements of the road networks and the addition of the M2 Motorway and improvements to the Epping Station has also resulted in a recent resurgence of larger scale residential and commercial development in the area, a trend which continues and is being explored today due to Epping's relatively easily accessible location and proximity to major business districts and universities.

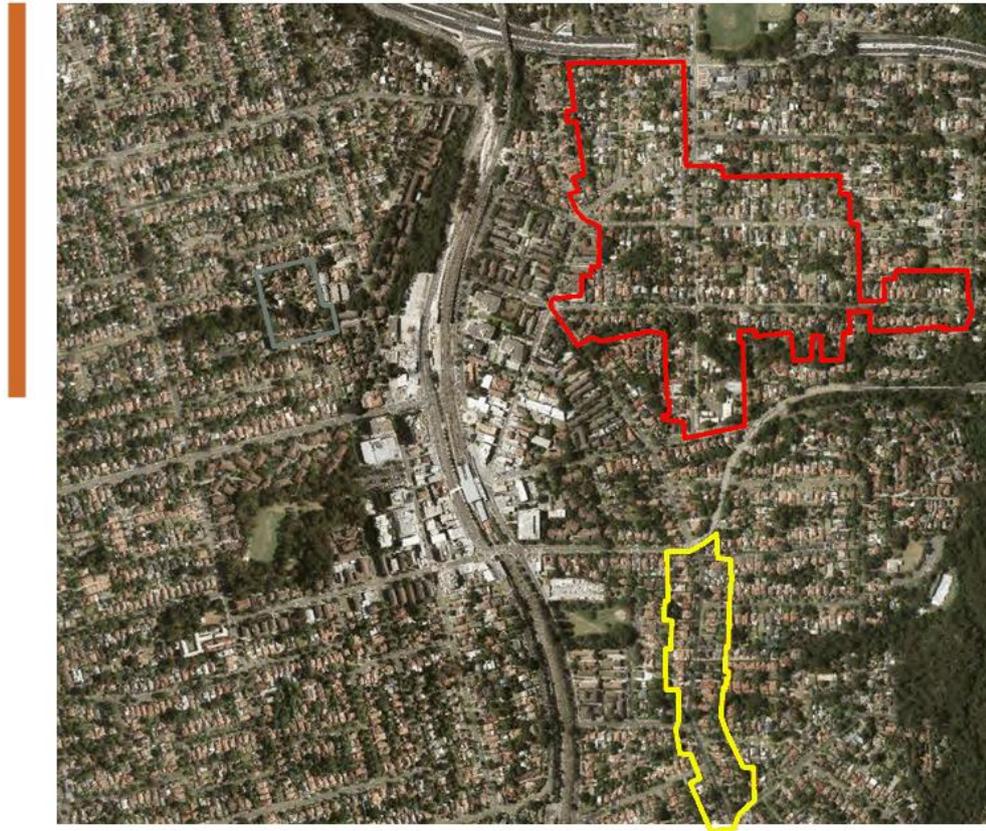

Figure 16: Aerial photograph of the Epping Town Centre area, prior to the current boom of development of the area. The East Epping, Essex Street and Rosebank Avenue HCA's are outlined in red, yellow and blue, respectively (Source: SIX Maps, accessed on 4 April 2017)

6. Heritage Conservation Area Assessments

6.1 Basis of Assessment

In assessing the cultural significance of a place, it is necessary to adequately research and consider all the information relevant to an understanding of the place and its fabric. The Burra Charter (2013) defines the cultural significance as being “aesthetic, historic, scientific or social value for past, present or future generations”.

The assessment of cultural significance is undertaken because it is necessary to understand the heritage values of a place before making decisions about the future of the place whether it is a heritage item or a HCA. This then leads to decisions that will retain these heritage values in the future.³ The ‘Statement of Significance’ indicates what heritage values of a place should be conserved, and is used as a basis for the formulation of specific guidelines for the development of conservation policies of a place. The Conservation Plan by J. S. Kerr (seventh edition, 2013, Australia ICOMOS), considers the following three criteria as a useful starting point in assessing the nature of significance:

- Ability to demonstrate a process, a custom or style;
- Associational (historic) links for which there is or is not surviving physical evidence; and
- Formal or aesthetic qualities.

All three HCAs have previously had their significance assessed as part of previous studies. The following subsections evaluate the previously established significance of each HCA in consideration of each HCAs current condition and integrity. Each assessment of significance addresses the criteria endorsed by the NSW Heritage Council, and is in accordance with the NSW Heritage Manual ‘Assessing Heritage Significance’ guidelines.

³ NSW Heritage Manual, *Assessing Heritage Significance*, 2000, p.2

6.2 East Epping Heritage Conservation Area

Figure 17: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting East Epping HCA (Source: Heritage Map 11, Hornsby LEP 2013)

6.2.1 Context and Description

The East Epping HCA is the largest of the three HCAs under review as part of this study, and spans a total of nine streets including: Chester Street, Essex Street, Norfolk Road, Oxford Street, Pembroke Street, Somerset Street, Surrey Street, Sussex Street and York Street. The area to the east of the railway line was one part of a large subdivision of the late nineteenth century. All the street names of the East Epping HCA are named after English towns and counties, with all names remaining the same as the 1910 subdivision plans for the area.

The East Epping HCA is characterised by a majority of Victorian, Federation and Inter War period dwellings, which reflect the early development of the East Epping Area. The area is further characterised by wide dual carriageways and grassed verges and substantial street plantings. The original subdivision pattern of the late nineteenth and early twentieth century is still understood, despite a number of properties being subdivided throughout the area. Despite this subdivision, the streetscape character of the area is still maintained by the dwellings which front onto the streetscapes, which are further enhanced through large setbacks, complementary fences and mature front garden landscaping.

Each of the nine streets of the East Epping HCA present a range of significant characteristics. Entering the HCA from the south into Norfolk Road, to the east is located Epping Public School with its Federation period classrooms and a large number of mature trees which stretch along the street and into the northern portion of the schools site. Moving further north along the street, Inter War and Federation period dwellings are regularly located, as the road slopes down slightly toward the first intersection with Chester Street. The section of Norfolk Road, bound by Chester Street and Surrey Street presents, a number of Late 20th Century

and 21st Century two storey dwellings, before the Inter War and Federation period character of the street returns closer to Surrey Street. Some Banksia trees line this section of the street, whilst mature Eucalypts rise above the street from front gardens of some of the early twentieth century properties. In the most northern section of Norfolk Road within the East Epping HCA, are clustered a number of Inter War Bungalows and Federation period dwellings, in Queen Anne, Cottage and Bungalow styles. Substantial landscaping on the street and in front gardens continue along this section of Norfolk Road, enhanced by timber picket fences and hedges on each of the individual properties.

Along both Sussex and Oxford Streets, two of the northern-most streets of the East Epping HCA, presents a mix of primarily Federation and Inter War periods dwellings. Being a narrower street than Oxford Street, Sussex Street's regular street trees, of both native and ornamental varieties, enhance the leafy aspect of the street, the street slopes down toward the west, with dwellings of the eastern side of the road sitting higher in their lots. Like Norfolk Road, the dwellings are set back onto their lots, with large front gardens, most of which have substantial mature plantings, which screen the houses from street view. Overall, the presentation of Sussex Street captures the aesthetic qualities of the East Epping HCA.

A small section of Oxford Street, between Derby Street and Norfolk Road, resides within the boundaries of the East Epping HCA. The street, like Norfolk Road, presents a dual carriageway, with wide verges. Federation, Inter War and Post War period dwellings line either side of the street, with a number of timber weatherboard Federation cottages located on the northern side of the road, whilst the southern side presents a number of Inter War Bungalows. Street tree planting is sporadic along Oxford Street, however, the landscaping of individual properties makes up for the lack of street trees, still eliciting the leafy character of the East Epping HCA.

Surrey Street and Chester Streets contain a diverse mix of buildings from Victorian, Federation, Inter War, Post War, Late 20th Century and 21st Century. Both streets have dual carriageways, but are not as wide as Norfolk Road, which acts as a main spine for the East Epping area. Mature trees, both native and exotic, are located along the length of each street, again enhanced by the large setbacks of properties and mature landscaped gardens. Surrey and Chester Street have the highest proportion of subdivided lots, mainly between their intersection with Norfolk Road and York Street. The original lot size of these properties from the late nineteenth and early twentieth century subdivisions, produced long lots, which have easily been subdivided to provide for additional dwellings. The dwellings located at the rear of the original houses on these subdivided lots are mostly not visible from the street, particularly where the front dwellings have mature trees and significant landscaping. On the very western end of Chester Street is located the only Church within the East Epping HCA. Built during the Inter War period, the presence of the church of the prominent corner of Chester, Oxford and Sussex Streets, acts as a western gateway to the East Epping HCA, typified by its brick turret and rendered detailing.

Across the East Epping HCA, there are a total of twenty-nine (29) heritage items located across all of the primary streets of the area. A majority of the heritage items of the East Epping HCA are from the Federation period, with one Victorian stone cottage and five (5) Inter War period dwellings and gardens. These properties and gardens further enhance the streetscapes of Sussex, Oxford, Surrey, Chester Streets and Norfolk Road, through their demonstration of historic, aesthetic, rare and representative significance.

The East Epping HCA presents a large unique area with a mixture of dwellings, gardens and landscapes from the late nineteenth century through to the present day. Whilst the majority of dwellings within the area date from the Federation and Inter War periods, the scattering of dwellings from the Post War, Late 20th and 21st Centuries, further add to the history of growth and development of the East Epping area.

The following images present a brief overview of the current character and streetscapes of the East Epping HCA.

Figure 18: Views looking north (left) and south (right) along Norfolk Road at the intersection with Surrey Street. The large mature trees lining Norfolk Road can be seen, as well as the wide dual carriageway, which acts as the main spine of the East Epping HCA.

Figure 19: Views looking east (left) and west (right) along Surrey Street at intersection with Norfolk Road. The mature landscaping in the front gardens of some properties can be seen, as well as established trees, particularly in the left image out the front of 40 Norfolk Road, a heritage item.

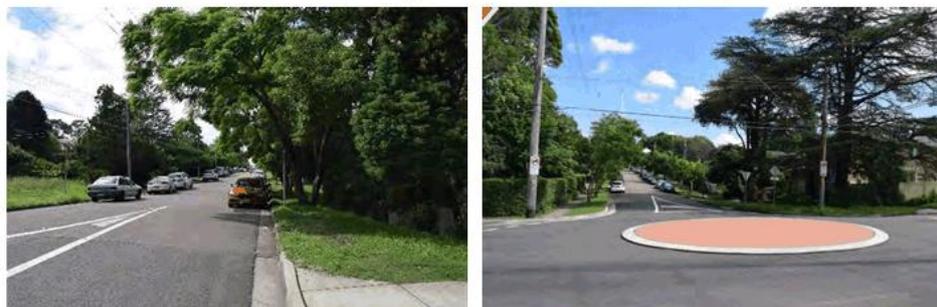

Figure 20: View looking east (left) and west (right) from the intersection of Norfolk Road and Chester Street. Substantial street tree planting can be seen in both views, particularly the large Pine trees in the right image which fall within the lot boundaries of 27A Chester Street.

Figure 21: Epping Public School, the original classrooms date from 1901 (left) and 70 Chester Street, Victorian stone cottage, the oldest dwelling in the East Epping HCA (right).

Figure 22: 11 Sussex Street, timber weatherboard Federation Cottage (left) and 85 Oxford Street, a timber weatherboard cottage with return verandah (right).

Figure 23: 93 Oxford Street, a two storey Federation Tudor style house, an unusual style for the area, presenting a prominent corner position at the intersection with Norfolk Road (left) and 39 Norfolk Road, a good example of a Federation bungalow, a prominent style within the East Epping HCA.

Figure 27: 42 Surrey Street, two storey Late 20th Century house (left) and 12 Sussex Street, a two storey 21st Century house (right)

6.2.2 Historical Summary

The history of the East Epping HCA is directly linked to the historical development of the development of the Epping Town Centre, thus refer to the brief history provided in Section 5.1.

6.2.3 Previous Assessment and Statement of Significance

The first assessment of significance for the East Epping HCA was undertaken as part of the *East Epping Conservation Evaluation and Review* prepared by Tropman and Tropman Architects in 2001. The assessment and statement of significance from this first study is as follows:

Criterion (a)

The area is a good example of the development of Federation and Inter-War period housing in the Epping area.

The area was one of the first parts of Epping to be closely subdivided for residential purposes.

Criterion (c)

The area has retained most of its original 1886 subdivision pattern.

Criterion (g)

The area is representative of the development of Federation period and Inter-War period suburban housing.

Statement of Significance

The East Epping Heritage Conservation Area is a good representative example of the development of Federation period and Inter-War period suburban housing

of the Epping area. The area retains coherent examples of Federation and Inter-War housing as well as remnants of late 1880s housing. The area has historic significance as one of the first parts of Epping to be closely subdivided for residential purposes. This area, with the exception of the eastern side which was originally divided into larger blocks, has retained most of its original 1886 subdivision pattern.

Whilst the above assessment of significance for the East Epping HCA is brief, further assessment of the area was conducted as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013. This study considered that the previous assessment of the East Epping HCA still stood and updated the assessment of significance as follows:

Criterion (a) – An item is important in the course, or pattern, of NSW's cultural or natural history (or the cultural or natural history of the area)

The area is of local historic significance as one of the first subdivisions and parts of Epping to be subdivided for residential development. Despite some site amalgamations and re-subdivisions, the area largely retains its original subdivision and streetscape pattern.

The area retains evidence of its major periods of development that reflect the growth and development and major changes in the local area and shift from a rural and farming community to centralised residential and low scale commercial area.

Criterion (c) - An item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the cultural or natural history of the area)

The area is characterised by good and largely intact examples of the Federation, Inter-war and Post-war detached housing in the Epping area. Some early buildings also remain.

The built context is also enhanced by the wide street proportions, street trees and garden settings and plantings which make a positive contribution to the area.

Criterion (d) - An item has strong or special association with a particular community or cultural group in NSW (or area) for social, cultural or spiritual reasons

Epping Public School is a major feature of the area and is of some social significance to the local community. Established in 1900 as a result of the growth and development it has continued to be a local focus and has developed in accordance with local needs and requirements.

The Uniting Church complex in Chester Street is also of some local social significance.

Criterion (e) - An item has potential to yield information that will contribute to an understanding of NSW's cultural or natural history (or the cultural or natural history of the area)

The area retains some rock forms, undulating streets, sloping sites and a number of mature native trees and plantings which indicate the early natural character and topography of the area.

Criterion (f) - An item possesses uncommon, rare or endangered aspects of NSW's cultural or natural history (or the cultural or natural history of the area)

The area retains a number of earlier timber weatherboard houses and one early stone dwelling which are relatively rare in the local area.

Criterion (g) - An item is important in demonstrating the principal characteristics of a class of NSW's (or area's)

- cultural or natural places; or
- cultural or natural environments (or a class of the local area's cultural or natural places; or
- cultural or natural environments)

The area is a good and relatively intact representative example of late 19th and early 20th century suburban residential subdivision and development.

Statement of Significance

The East Epping Heritage Conservation Area is of high local historic and aesthetic significance as a good representative example of late 19th century subdivision that retains a good and relatively intact collection of Federation, Inter-war and Post-war period residential development that represents the major period of growth and development of the Epping area.

The area significantly retains most of its original 1886 subdivision and streetscape pattern with mostly single detached houses including a number of good and highly intact examples of Federation and Inter-war period houses. The area also retains some earlier examples and overall built context is enhanced by the local topography and native plantings, wide street proportions, street trees and garden settings.

The Church and School sites located in the area are also of some historic and social significance to the local community.

6.2.4 Revised Assessment of Significance

The previous assessments of the East Epping HCA remain consistent with the existing condition of the area. The two previous assessments of significance, in terms of the evaluation of aesthetic, historical, social, rarity and representative values of the area are still considered valid and appropriate.

The previous Statements of Significance have been minorly updated in the below revised Statement of Significance, based upon the current condition and integrity of the area.

East Epping HCA Statement of Significance

The East Epping HCA is of high local historic and aesthetic significance as a good representative example of late nineteenth century subdivision that retains a good and relatively intact collection of Federation, Inter War and Post War period residential development that represents the major periods of growth and development of the Epping area.

The area significantly retains most of its original 1886 subdivision and streetscape pattern with mostly single detached houses including a number of good and highly intact examples of Victorian, Federation and Inter War period dwellings. The area has historic significance as one of the first parts of Epping to be closely subdivided for residential purposes. The original names of each of the streets, which were taken from English towns and counties, still remain. The areas overall built context is enhanced by the local topography and native plantings, wide street proportions, street trees and large garden settings. Many of the Federation and Inter War period houses retain their garden like settings, coupled with mature trees of both native and exotic varieties.

The inclusion of Epping Public School, established in 1901, and the Chester Street Uniting Church and grounds are also of some historic and social significance to the local community, further enhancing the pattern of development of not only the early subdivision of the area but the needs of the growing community of the East Epping area.

6.2.5 Individual Heritage Items Request for Removal within Essex Street HCA

3 Essex Street

A request by the property owner of 3 Essex Street for the removal of the property as an Heritage Item under the Hornsby LEP 2013 and to be removed from the East Epping HCA was lodged on 18 September 2015. This request was lodged by the property owner in response to the listing of the property at 3 Essex Street on the Hornsby LEP 2013 as part of the State Environmental Planning Policy (SEPP) Amendment (Epping Town Centre) 2013, published in March 2014.

The dwelling at 3 Essex Street is a single storey face brick Inter War Bungalow featuring a hipped roof clad in terracotta tiles and a stone base. The primary western façade features a projecting brick veranda with brick piers, flanked on either side by projecting bay windows, with detailed leadlight glazing set within timber double sash windows. The northern façade features a second verandah with brick piers, which has been enclosed by single brick and timber windows. The eastern boundary of the property is defined by a high brick fence and a wide timber gate. Some mature plantings exist on the site, including palm trees. A driveway is located on the eastern side of the house, which gives access to a lightweight carport attached to the southern façade of the dwelling. The location of the dwelling next to Rockleigh Park provides a leafy setting for the Inter War Bungalow.

A brief internal inspection was conducted as part of this heritage review. From the internal inspection, original detailing such as Art Deco cornices and plasterwork, timber doors and frames with associated hardware, timber picture rails, fireplace, floorboards and leadlight windows were observed throughout the property, excluding areas where modifications had taken place, which was primarily limited to the kitchen and bathrooms. The bungalow is overall in good condition, but does require some maintenance work. The bungalow appears to have maintained its condition and integrity since its assessment in the 2013 study.

An assessment of the significance of 3 Essex Street was undertaken as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy and Alessi in 2013.⁴ The established statement of significance has been slightly amended to reflect the current condition of the property and is provided below:

No. 3 Essex Street is of local historic and aesthetic significance as part of an early subdivision in the area, as a good and largely intact representative example of a substantial Inter War Bungalow constructed during c. 1920s. The site is associated with the Rockleigh House and grounds now remembered by the adjacent Park area. The building significantly retains its original scale, form and features including face brick façades and stone base and prominent roof scape, open verandah and bayed elements on the front facade. Internally many original elements of the Inter War Bungalow remain, including Art Deco cornices and plasterwork, timber doors and frames with associated hardware, timber picture rails, fireplace, floorboards and leadlight windows. Despite the addition of the high brick fence, the building has a wide frontage and prominent roof form enhanced by its garden setting and makes some visual contribution to the streetscape and neighbouring Rockleigh Park area. The large wide lot on which the Bungalow is established is unusual for the East Epping Area, presenting a unique element in the area.

The Inventory Sheet for the property has also been updated to reflect the above statement of significance, as well as updated images, which is provided as part of Appendix A. Recommendations in relation to the retention or removal of 3 Essex Street from the Hornsby LEP 2013 as a heritage item or from the East Epping HCA, have been provided in Section 10.1.

⁴ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 37.

6.3 Essex Street Heritage Conservation Area

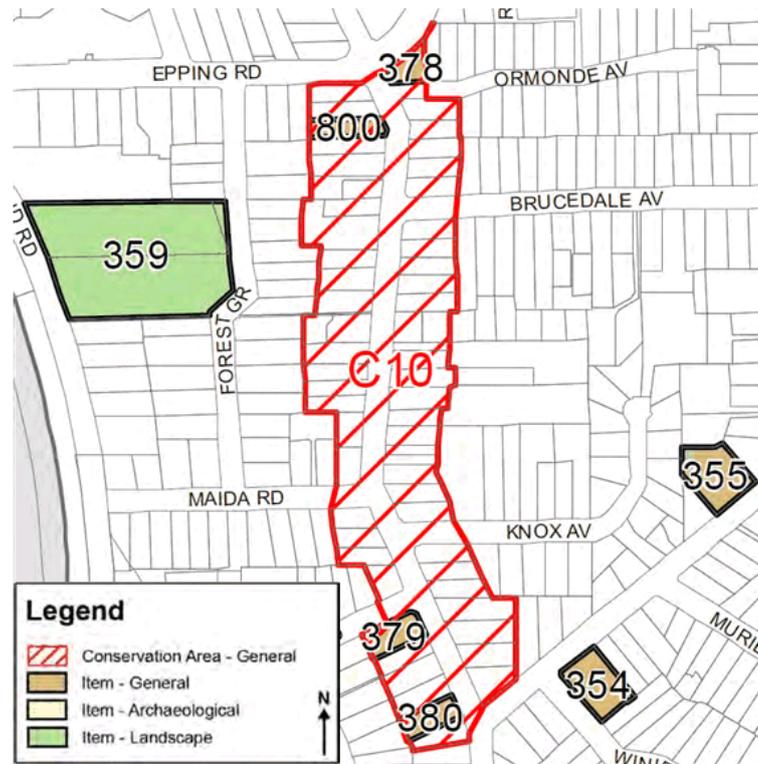

Figure 28: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting Essex Street HCA (Source: Heritage Map 11, Hornsby LEP 2013)

6.3.1 Context and Description

The Essex Street Avenue Heritage Conservation Area was last described in March 2013 in the Epping Town Centre Heritage Review as:

*"The built context is characterised by a mix of Federation and Inter-war period houses including substantial timber weatherboard and distinctive Federation red brick dwellings, liver brick and Inter-War Bungalows with a number of late 20th and early 21st century period dwellings and residential complexes between. The built context is generally enhanced by the streetscape pattern reinforced by regular setbacks, wide street proportions and garden settings."*⁵

During site inspections of the area in March 2017, it was observed that the Essex Street HCA continues to retain a built context characterised by a mixture of Federation and Inter War period dwellings, with some Post War, Late 20th and 21st Century development scattered throughout. The streetscape continues to be enhanced by street tree planting, coupled with the established gardens and trees of the properties which lines the edges of the street.

The Essex Street HCA is bound to the north by Epping Road and to the south by Abuklea Road. Whilst Essex Street continues both north and south from the Essex Street HCA, this particular section of Essex Street presents a unified character unlike the other sections of Essex Street, which have a higher proportion of Late 20th and 21st Century developments. This section of Essex Street presents a wide dual carriageway with wide grassed verges.

⁵ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 13.

The street slightly bends to the east following the intersection with Maida Road. This section of Essex Street gently slopes downwards from Epping Road and Abuklea Road to the lowest point around the intersection of Knox Avenue. Between Maida Road and Epping Road, the dwellings located on the western side of Essex Street rise above street level, whilst the dwellings to the east lie below street level, due to the sloping topography of the street down towards the east.

Dotted along the length of Essex Street are a number of different species of trees, including but not limited to Banksia and Eucalypt trees. The dwellings along this section of Essex Street present a regular setback from the street, incorporating a range of different fences, all predominantly of a low scale, including timber picket fences, low sandstone or brick walls, wire and timber fences and a few modern cement rendered walls. The front gardens of each property generally include mature plantings harmonising with and adding to the streetscape character the street.

The style of dwellings located within the Essex Street HCA, include a number of different styles from the Federation (Bungalow and Cottage styles), Inter War (Bungalow and Spanish Mission styles), Post War, Late 20th Century (Organic, Australian Nostalgic, and Immigrants Nostalgic styles) and 21st Century, all depicted in Figures 31 to 36.

Whilst a couple of lots within the Essex Street HCA have been subdivided, or some older buildings from the Federation or Inter War period have been replaced or modified over time, the overall character of early 20th Century and streetscape pattern and rhythm remains.

The following images the early present a brief overview of the current character and streetscape of the Essex Street HCA.

Figure 29: Views looking from intersection of Essex Street and Abuklea Road, looking north along Essex Street. The mature street trees and large front setbacks of dwellings along the street can be

Figure 36: 51 Essex Street, Late 20th Century Australian Nostalgic (left) and 53 Essex Street, 21st Century.

6.3.2 Historical Summary

The history of the Essex Street HCA is directly linked to the historical development of the development of the Epping Town Centre, thus refer to the brief history provided in Section 5.1.

6.3.3 Previous Assessment and Statement of Significance

The first assessment of significance for the Essex Street Heritage Conservation Area was undertaken as part of the *East Epping Conservation Evaluation and Review* prepared by Tropman and Tropman Architects in 2001. The assessment and statement of significance from this first study is as follows:

Criterion (a)

The area is a good example of the development of Federation and Inter-War period housing in the Epping area.

The area reflects the changing nature of the place from rural, through semirural to residential.

Criterion (c)

The area has retained most of its original 1886 subdivision pattern.

Criterion (g)

The area is representative of the development of Federation period and Inter- War period suburban housing.

Statement of Significance

The Essex Street Heritage Conservation Area has historic and aesthetic significance as a representative area of intact period housing, mainly from the Federation and Inter-War periods. The areas early subdivision patterns reflect the changing nature of the area from rural, into semi-rural 'farmlets' through to

residential lots in the 1920s. These subdivision patterns are still visible in the existing street layout.

Whilst the above assessment of significance for the Essex Street HCA is brief, further assessment of the area was conducted in as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013. This study considered that the previous assessment of the East Epping HCA still stood and updated the assessment of significance as follows:

Criterion (a) – An item is important in the course, or pattern, of NSW's cultural or natural history (or the cultural or natural history of the area)

The area is of local historic significance as part of an early subdivision and early 20th residential development. Despite some site amalgamations and re-subdivisions, the area largely retains a sense of its original subdivision pattern that represents the early 20th century shift from a rural to a residential and suburban area.

Criterion (c) - An item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the cultural or natural history of the area)

The area is characterised by good and largely intact examples of the Federation and Inter-war period detached housing in the Epping area. Some good examples of Post-war development are also extant.

The built context is also enhanced by the wide street proportions, street form and wide grassed verges, setbacks, garden settings and plantings which make a positive contribution to the area.

Criterion (g) - An item is important in demonstrating the principal characteristics of a class of NSW's (or area's)

- *cultural or natural places; or*
- *cultural or natural environments.*
- *(or a class of the local area's*
- *cultural or natural places; or*
- *cultural or natural environments)*

The area is representative of the development of the Federation and Inter-war period suburban housing in the local area.

Statement of Significance

The Essex Street Heritage Conservation Area is of local historic and aesthetic significance as part of an early subdivision in the local area and as a representative area of intact period housing mainly from the Federation and Inter-war periods which represents a major period of growth and development and shift from a rural to a suburban area.

The area significantly retains a sense of the original subdivision pattern and streetscape pattern with mostly single detached houses including a number of good and highly intact examples of Federation and Inter-war period houses. The built context is enhanced by the local topography, wide street proportions, setbacks and garden settings.

6.3.4 Revised Assessment of Significance

The previous assessments of the Essex Street HCA remain consistent with the existing condition of the area. The two previous assessments of significance, in terms the evaluation

of aesthetic, historical and representative values of the area is still considered valid and appropriate.

The previous Statements of Significance have been minorly updated in the below revised Statement of Significance, based upon the current condition and integrity of the area.

Essex Street HCA Statement of Significance

The Essex Street HCA is of local historic and aesthetic significance as part of the early subdivision of the Epping from the late 1890s, and maintains a representative area of largely intact Federation and Inter War period dwellings reflecting the major periods of growth and development of the Epping local area. Early Federation houses, some associated with the Mount Tomah Nursery of the 1890s are still extant, and further enhanced by the retention of the later 1920s subdivision upon which many Inter War period home were developed. The area represents the shift of Epping from an area of orchards and nurseries to a thriving suburban area.

The area retains many significant elements of the early twentieth century subdivision patterns, coupled with a cohesive streetscape pattern enhanced by large setbacks, wide street proportions, undulating topography, street plantings and garden settings. This section of Essex Street, maintains a large number of good and highly intact examples of Federation and Inter War period dwellings of various styles, interspersed with some good examples of residential Post War architecture.

6.3.5 Individual Heritage Items Requested for Removal within Essex Street HCA

42 Essex Street

A request by the property owner of 42 Essex Street for the removal of the property as a Heritage Item under the Hornsby LEP 2013 and to be removed from the Essex Street HCA was lodged on 17 January 2016. This request was lodged by the property owner in response to the listing of the property at 42 Essex Street on the Hornsby LEP 2013 as part of the SEPP Amendment (Epping Town Centre) 2013, published in March 2014.

The dwelling at 42 Essex Street is a substantial, single storey timber weatherboard Federation cottage, with a hipped roof and northern projecting gabled wing with corrugated steel roof. The dwelling features a veranda with returns to the sides with timber double sash windows with colour lead lighting on the primary façade facing toward Essex Street. The northern elevation features a bay window with timber double-hung sashes featuring coloured leadlight, matching the primary eastern façade. The cottage is substantially set back from the Essex Street frontage, allowing for a large front garden, which is primarily grassed with some mature plantings established along the Essex Street boundary.

A brief internal inspection of the property was conducted as part of this heritage review. From the internal inspection, original detailing such as floor boards, cornices and timber work were observed in the main hallway and front rooms of the cottage. Additions to the rear of the original cottage currently house living spaces and a kitchen. The cottage is overall in good condition and appears to have maintained its condition and integrity since its assessment in the 2013 study.

An assessment of the significance of 42 Essex Street was undertaken as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy and Alessi in 2013.⁶ The established statement of significance has been slightly amended to reflect the current condition of the property and is provided below:

The dwelling at 42 Essex Street is of high local historic and aesthetic significance as a good and largely intact Federation period timber weatherboard cottage constructed sometime between 1893 and 1902 that is associated with MF Vollmer and the Vessey family of the Mount Tomah Nursery that operated in the immediate area in the 1890s. Despite some alterations and additions, the cottage retains its overall scale, form and details particularly weatherboard facades, roof form, open wrap-around verandah,

⁶ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 42.

gable and bay on the northern facade. Internally, original details are also maintained, including cornices, timberwork, floorboards and chimneys. The building occupies a prominent and elevated site on a bend in Essex Street, is enhanced by its garden setting and makes a positive contribution to this section of Essex Street. The cottage is one of two remaining Federation period dwellings located in the area associated with the Mount Tomah Nursery, thus being rare for the local area.

The Inventory Sheet for the property has also been updated to reflect the above statement of significance, as well as updated images provided as part of Appendix A. Recommendations in relation to the retention or removal of 42 Essex Street from the Hornsby LEP 2013 as a Heritage item of from the Essex Street HCA have been provided in Section 10.2.

6.4 Rosebank Avenue Heritage Conservation Area

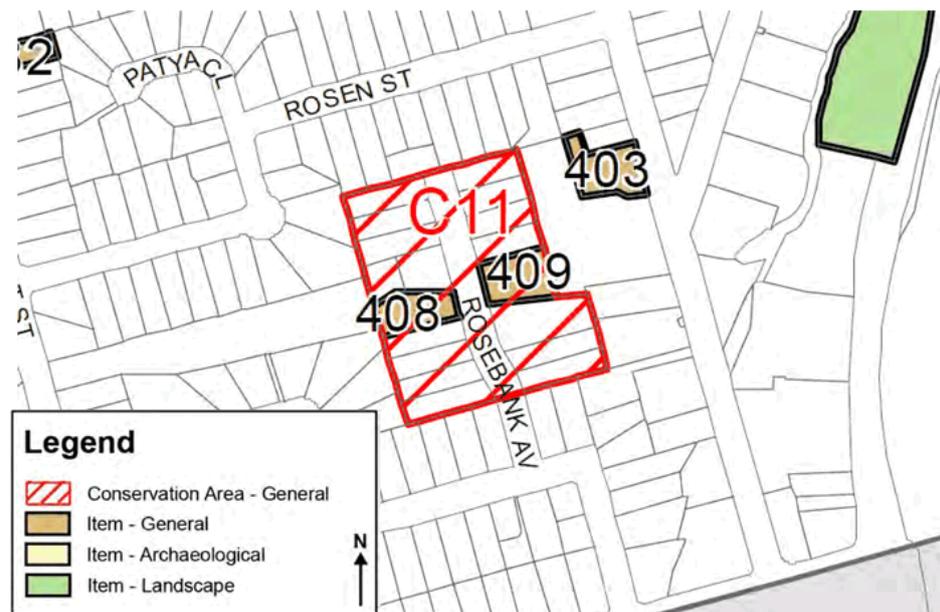

Figure 37: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting Rosebank Avenue HCA (Source: Heritage Map 11, Hornsby LEP 2013)

6.4.1 Context and Description

The Rosebank Avenue Heritage Conservation Area was last described in March 2013 in the Epping Town Centre Heritage Review as retaining:

"a good and highly intact group of Inter-War period dwellings illustrating various architectural elements enhanced by the streetscape character, reinforced by retention of the original subdivision pattern and street rhythm, consistent setbacks and also mature street and garden trees and garden plantings."

During site inspections of the area in March 2017, it was observed that the Rosebank Avenue HCA continues to remain a good and highly intact group of Inter War period dwellings however, there are some changes to the surrounding setting of the area and the streetscape which has minorly detracted from the description provided in 2013. These include the multiple high density residential developments on Cliff Road and Hazlewood Place, located to the

⁷ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 15.

east and south of the HCA. Some mature trees too have been removed from the streetscape, primarily out the front of 5 Rosebank Avenue.

Despite these changes, Rosebank Avenue HCA continues to maintain its established heritage character. The form, scale and detailing of the majority of dwellings within the area retain their original elements, and are enhanced by extensive plantings within the front gardens and nature strip planting. Whilst some minor modifications have been made to some buildings, such as the enclosure of balconies, addition of carports and garages and replacement of some original windows, the consistency of the street in terms of setbacks, and street presentation are still intact.

A range of architectural styles are presented along the length of Rosebank Avenue, including Spanish Mission, Bungalow and Tudor Revival. Whilst the style of each dwelling differs, all are linked together and complement one another through consistency in height, set back and landscaping. The original subdivision of the Rosegrove Estate is still evident in the current subdivision of the area, despite the singular subdivision of 13 and 15 Rosebank Avenue. The character of the area is further linked together through the consistent street trees which line the nature strips and the interjection of the creek line which runs between 15 and 9, and 10 and 6 Rosebank Avenue. The vegetation is denser at this point in the street and creates a lively setting for the appreciation of both the northern and southern components of the street.

The following images present a brief overview of the current character and streetscape of the Rosebank Avenue HCA.

Figure 38: View looking south along Rosebank Avenue, from northern end of street (left) and from middle of street in line with the creek (right). The consistency of street trees which line Rosebank Avenue are evident, enhancing the streetscape character, behind which an array of Inter War period dwellings are nestled.

Figure 39: View of the small bridge which runs over the creek line (left) and looking west toward 9 Rosebank Avenue visible through the trees which line the creek bed.

Figure 40: Two of the dwellings located within the Rosebank Avenue HCA are listed as local items, including 9 (right) and 10 (left) Rosebank Avenue. Whilst both dwellings date from the Inter War period, they are in two distinct styles of the period, the left being a Spanish Mission style and the right in a Tudor style.

Figure 41: 16 and 17 Rosebank Avenue, respectively, are designed in an Inter War Bungalow style. The Bungalow style is featured the most amongst the dwellings of Rosebank Avenue

Figure 42: 5 and 1 Rosebank Avenue have undergone some modifications to the original fabric. 5 Rosebank Avenue has modified the entrance path and driveway, as well as the entrance way and windows, whilst 1 Rosebank Avenue has undergone some minor changes, including enclosing the front balcony and the installation of a new gate to the driveway. Despite these changes, both dwellings continue to contribute to the character of the area.

6.4.2 Historical Summary

The following historical summary of the Rosebank Avenue Conservation Area has primarily been adapted from the 2003 Heritage Assessment of Rosebank Avenue, prepared by CPC Consulting.

The site of the present day Rosebank Avenue is located on the western side of the railway at Epping. Early Parish Maps indicated that the site was part of the land granted to William Kent Junior. Pioneer settler, David Hazlewood, purchased the land in this area (including the area that is now Rosebank Avenue) as a total of 16 acres in 1897.

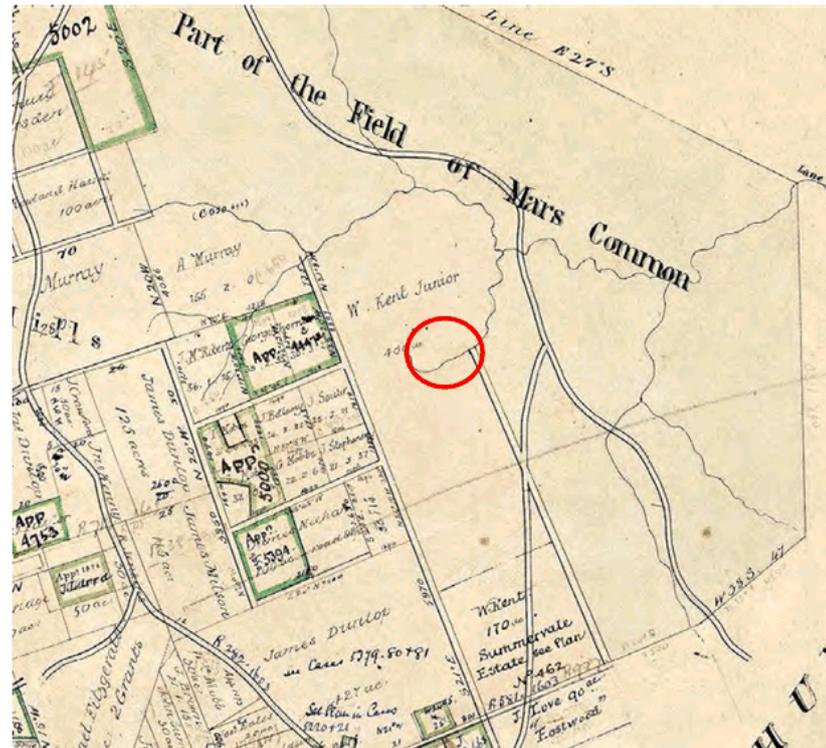

Figure 43: 1882 Field of Mars Parish Map with indicative location of Rosebank Avenue Heritage Conservation Area outlined in red (Source: Land and Property Information, Sheet Reference 4, Edition Number 0)

The Hazlewood Brothers made their reputation as rose suppliers in the early twentieth century from the Epping nursery. The Hazlewood nursery operations continued in Dural until 1965. The first subdivision of the Hazlewood Estate was placed on sale in October 1921 and included lots fronting the present Carlingford Road.

In November 1929, two years after David Hazlewood's death, the site of Rosebank Avenue went to auction sale as the Rosegrove Estate, one of the later estate subdivisions to occur in the Epping district. The Estate consisted of 18 lots fronting Rosebank Avenue and three lots fronting Ray Road. (Figure 44) A "fine old rustic bridge" was constructed over the existing creek by the Hazlewoods as part of their nursery operations and was retained as an attractive element of the Estate. The advertisements for the auction also indicate that a strict building ordinance was in place to ensure that "each home will be worthy of its setting" and that the layout and lot sizes allowed "ample space for gardens, lawns and motor car entrance".

ROSEGROVE ESTATE

In one of Nature's Loveliest Settings

21 Perfect Home Sites... 400 yards from Epping Station and Shopping Centre

ALTHOUGH photographs do not lie, they cannot, unfortunately, do full justice to this magnificent home location—ROSEGROVE ESTATE, EPPING. To appreciate the beauty of its surroundings—the appearance and character of each allotment—the well made roads with their concrete kerbs and gutters—and the Epping's station as every convenience that the home surface can desire—you must see it. The most walk over its smooth, green alleys and see its every pleasing vista.

Remember that only 21 homes can be erected on Rosegrove Estate, and the careful site building conditions will ensure that each home will be worthy of its setting. The land is ready now for building. Each allotment provides ample space for gardens, lawns and motor car entrance.

Beautiful Epping

Epping is one of Epping's most attractive—the home of beautiful scenery and the home of the future. The site is to be found in the fact that the Epping is a beautiful estate. Epping is a beautiful estate. Epping is a beautiful estate. Epping is a beautiful estate.

40 yards from Epping Station — a few minutes walk.

All shopping and other conveniences available.

High and healthy home sites, well-ventilated, commanding—118 feet above sea level.

All sites of generous size and ready now for building.

All conveniences and Services available

Those who live in Epping do most of their shopping in their own suburbs, the modern shopping centres supplies every need. A few minutes provides city amusements. Education facilities are well catered for, while water, gas and electricity are available right at the boundary of Rosegrove.

Ninety Electric Trains

Distance from Sydney are no longer measured in miles, but in minutes. Epping is fourteen in being only 28 minutes from the City. A service of electric trains per day serves all day.

ROSEGROVE allotments will be sold at surprisingly low prices; prices—that will never be repeated in this district.

What of the Future?

Perhaps it is unnecessary to dwell on the increasing possibilities of Rosegrove Estate. The phenomenal progress of Epping during the past few years is well known to everyone. Land values have reached surprising high levels, and these have attracted many who have realized very pleasing dividends for their investments. Epping's past progress, although rapid, is small compared to what the future should be.

Epping—Junction to New Railway

The decision of the railway authorities to connect Epping with St. Leonards by an Electric Railway has brought the district to the forefront amongst well-ventured speculators. It also holds promise to realize the tremendous progress and demand for home sites near the new line.

REAL ESTATE

WELL SITUATED

ALLOTMENTS AT EPPING

STATION, SHOPS HANDY

Situated within 400 yards of the railway station and shopping centre, Rosegrove Estate, Epping, occupies the top of a slope and fronts a main road. It will be sold by auction to-morrow by Messrs. Hardie and Gorman, in conjunction with Tom J. Dwyer. Ornamental native trees have been retained on the allotments, and the streets have been kerbed and gullied in concrete. There are 21 allotments, all generously sized. The soil is very suitable for gardens, and the allotments provide ample space for their inclusion. A large nursery adjoins the estate. Ninety electric trains each day provide transportation to and from the city, and the travelling time will be shortened when the Epping-St. Leonards branch line is built. Terms of sale will be 10 per cent. deposit, and the balance in four years.

Figure 44: 1929 Sale Notice for Rosegrove Estate (top and bottom left) and advertisement in The Sun from 1929 (bottom right) (Source: Appendix D, CPC Consulting, Heritage Assessment of Rosebank Avenue (2003) and The Sun, Friday 22 November 1929, p. 2.)

An aerial photograph from 1943 clearly shows the earlier Federation development within the surrounding streets (Cliff Road and Carlingford Road) and the formation of Rosebank Avenue.

Figure 45: 1943 Aerial of Rosebank Avenue Conservation Area, outlined in red (Source: SIX Maps, accessed on 28 March 2017)

Hornsby Shire Council's Sands Directory and Rate Books provide information regarding the development of the Rosebank Avenue streetscape. Up until 1932, the majority of the lots within the streetscape remain in the ownership of real estate agents. The 1931 Sands Directory (Page 444) records only the road as existing. The 1932/33 Sands Directory lists only Lot 1 as being owned by a C F Abbott. The Rate Books provide additional information as follows:

- Rate Book dated 29 May, 1930 - indicates a total of six lots in private ownership (Lots 1, 7, 9, 12, 17 and 18). The occupations of these owners are described as being gentleman, clerk, joiner, builder, joiner and lawyer, respectively, representing a 'middle-class' community. The remainder of the street was in the ownership of "Thomas Dwyer Real Estate of 8A Castlereagh Street, Sydney". No infrastructure is recorded in this record.
- Rate Book dated 7 October, 1932 - indicates all lots in private ownership with the exception of Lots 4, 5 and 14 still being in the ownership of Thomas Dwyer Real Estate and Lot 10 being owned by Prudential Estates Ltd. Fences are recorded as having been constructed on Lots 8, 10 and 12. Dwellings are recorded as having been constructed on Lots 9 ("cottage") and 12 ("bungalow").
- Rate Book dated 12 May, 1938 provides the following details regarding construction:

Original Lot No.	Current Address	Recorded Construction
Lot 9	1 Rosebank Avenue	Cottage
Lot 18	2 Rosebank Avenue	Cottage and garage
Lot 8	3 Rosebank Avenue	Cottage and garage
Lot 17	4 Rosebank Avenue	Cottage
Lot 7	5 Rosebank Avenue	Cottage, garage and workshop

Lot16/15	6-8 Rosebank Avenue	Cottage
Lot 6	7 Rosebank Avenue	Fence (Notes that dwelling constructed 1938-39)
Lot B (5)	9 Rosebank Avenue	Cottage C/E
Lot 14	10 Rosebank Avenue	(Notes that dwelling constructed 14 May 1940)
Lot 13	12 Rosebank Avenue	Cottage
Lot 12	14 Rosebank Avenue	Cottage
Lot A (4)	15 Rosebank Avenue	Cottage
Lot 11	16 Rosebank Avenue	Bungalow ("Laverton")
Lot 3	17 Rosebank Avenue	Cottage
Lot 10	18 Rosebank Avenue	Cottage ("Orana") and garage
Lot 2	19 Rosebank Avenue	Cottage and garage
Lot 1	21 Rosebank Avenue	Fence (Notes that dwelling constructed 1942)

It is noted that the occupations of property owners also includes builder (Lot 1), school headmaster (Lot 2), teacher (Lot A), architect (Lot 6) and musician (Lot 10).

In summary, all dwellings in the street with the exception of three had been constructed by 1938. The remaining three dwellings had been constructed by 1942. Accordingly, the majority of dwellings in Rosebank Avenue were constructed during the Inter-war period.

6.4.3 Previous Assessment of Significance

The first assessment of significance for the Rosebank Avenue HCA was undertaken by CPC Consulting in 2003 in the *Rosebank Avenue Heritage Assessment*. The assessment and statement of significance from this first study is as follows:

Criterion (a)

Rosebank Avenue is a fine example (the best example in the Hornsby Shire) of an intact Inter-war housing development and streetscape which retains its historical original subdivision layout (with minor boundary adjustments), building stock and natural features

Criterion (b)

The development of Rosebank Avenue does not have any strong or special association with the life or works of a person, or group of persons, of importance in NSW's cultural or natural history (or the cultural or natural history of Epping or the Hornsby Shire)

Criterion (c)

Rosebank Avenue retains and displays its original subdivision layout (with minor boundary adjustments), building stock and natural features. It retains its design integrity; has distinctive aesthetic attributes in its form, composition, style and character; is the only true intact and fine example of an Inter-war development/streetscape and as such, has landmark qualities;

Criterion (d)

The Rosebank Avenue streetscape does not have associations with any particular identifiable community or cultural group.

Criterion (e)

Rosebank Avenue and its features have little archaeological or research potential.

Criterion (f)

Rosebank Avenue is a rare example of an intact area of Inter-war housing development. However, as other intact examples of Inter-war housing developments exist in NSW and other parts of Australia, it is concluded that Rosebank Avenue's intact form is only rare at a local level.

Criterion (g)

Rosebank Avenue is a fine example of an Inter-war housing estate that survives in good condition and intact. It retains its historical subdivision pattern (with only minor boundary adjustments), its natural features (gardens and creekline) and its built fabric. It has representative significance through its physical form, building stock and history.

Statement of Significance

Rosebank Avenue is a fine representative example of the residential development of an Inter-war housing estate. It remains largely intact in terms of retaining its historical subdivision pattern, its natural features, its built fabric and landscaping. Collectively, the dwellings and their associated gardens contribute to a unique precinct that captures the historical development of housing constructed during this period within the Hornsby Shire and provides an historical setting for the individual heritage items that exist in the street.

The Rosebank Avenue streetscape remains a rare example (at local level) of an intact Inter-war streetscape within the Hornsby Shire (the only intact Interwar streetscape in the Shire). This conclusion is reached given that the entire street was developed as part of the one Estate and retains its built form and subdivision pattern (that includes the unusual configuration of allotments reflecting the location of a watercourse). Given its level of intactness and integrity, it is of high local heritage significance.

The above assessment of significance for the Rosebank Avenue HCA was again assessed as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013. This study considered that the previous assessment of the Rosebank Avenue HCA still stood. An assessment of the areas significance was included in the study as follows:

Criterion (a) – An item is important in the course, or pattern, of NSW's cultural or natural history (or the cultural or natural history of the area)

The area is of local historic significance as a fine and highly intact example of an Inter-war period housing development and streetscape that retains its original subdivision pattern, building stock and natural features.

Criterion (c) - An item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the cultural or natural history of the area)

The area is characterised by good and largely intact examples of the Inter-war period detached housing that retain their original form, character and details and a range of stylistic elements relating to that era. The buildings have common setbacks which contribute to the streetscape pattern and rhythm. The built context is also enhanced by the wide street proportions, street trees and creek line, garden settings and plantings which make a positive contribution to the area.

Criterion (f) - An item possesses uncommon, rare or endangered aspects of NSW's cultural or natural history (or the cultural or natural history of the area)

Rosebank Avenue has been identified as being a rear and best example of an intact Inter-war housing development in the Hornsby LGA. Other examples exist in other parts of NSW and Australia.

Criterion (g) - An item is important in demonstrating the principal characteristics of a class of NSW's (or area's)

- cultural or natural places; or
- cultural or natural environments (or a class of the local area's cultural or natural places; or
- cultural or natural environments)

The area is a good and highly intact representative example of Inter-war period suburban subdivision and development that retains its original subdivision pattern, housing stock and associated gardens and features and natural features.

Statement of Significance

Rosebank Avenue is of high local cultural significance as a fine representative example of an Inter-war period residential subdivision and development that remains largely intact and retains its historical subdivision pattern, built context and natural features. Collectively the group form a unique precinct in the Hornsby LGA. The houses each retain their overall scale, character and varying stylistic details associated with the period and are enhanced by the wide street proportion, street trees and garden settings and remaining natural features.

6.4.4 Revised Assessment and Statement of Significance

The previous assessments of the Rosebank Avenue HCA remain consistent with the existing condition of the area. The two previous assessments of significance, in terms the evaluation of aesthetic, historical and social values of the area is still considered valid and appropriate.

The previous Statements of Significance have been minorly updated in the below revised Statement of Significance, based upon the current condition and integrity of the area.

Rosebank Avenue HCA Statement of Significance

Rosebank Avenue HCA is a fine representative example of a residential development of an Inter War housing estate. It remains largely intact in terms of retaining its historical subdivision pattern, its natural features, its built fabric and landscaping. Collectively, the dwellings and their associated gardens contribute to a unique precinct that captures the historical development of housing constructed during this period within Epping and the wider developments of the time in the Field of Mars. Collectively the area presents a unique streetscape featuring varies styles of the period, including Bungalow, Spanish Mission and Tudor Revival. Each dwelling retains their overall scale, character and varying stylistic details associated within the Inter War period which are further enhanced by the street trees, garden settings and natural creek line, providing a historical setting for the individual heritage items and contributory dwellings.

The Rosebank Avenue streetscape remains a rare example, at local level, of an intact Inter War streetscape within Epping and the Parramatta area and is one of few intact Inter War housing estates remaining. Having been developed within a short course of time between the 1930s and 1940s as part of the one Estate, Rosebank Avenue retains its built form and subdivision pattern, including the unusual configuration of allotments reflecting the location of a watercourse. Given its level of intactness and integrity, it is of high local heritage significance.

7. Field Survey of Heritage Conservation Areas

7.1 General Discussion

Site surveys of each HCA were undertaken in March 2017, in which all buildings located within East Epping, Essex Street and Rosebank Avenue HCAs were surveyed from the public domain. The historical value and character of each of the HCAs, are defined by a total of thirty-five (35) heritage items.

As part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013, the contribution ranking of each of the properties located within the East Epping and Essex Street HCAs were assessed. Whilst Rosebank Avenue HCA was also included within this study, the contribution ranking of each of the properties within the HCA were not assessed. As part of the current assessment of the relative contribution of each property toward their respective HCA, previous assessments of their contributions are taken into account within this section of the report.

7.2 Ranking and Assessment Criteria

Each property within each HCA has been assessed in accordance with its contributory values to the overall significance of the relevant HCA, as defined in the revised Statements of Significance in Section 6.0. Existing heritage items identified in the Holroyd LEP 2013 have been indicated, and the remaining properties have been ranked as contributory, neutral and non-contributory. The description of each category has been provided below:

Ranking	Definition
Heritage Item	A building that has been identified as an item of significance and has been listed on the Hornsby LEP 2013.
Contributory	A building that contributes to the character and significance of HCA for its historic or aesthetic values, or both. Building that have been adversely altered but still demonstrate historic and aesthetic values of significance to the area are also considered within this category. For example, a dwelling which may have had windows replaced but which otherwise retains its overall form and other detailing would be considered to be a contributory dwelling or dwelling with historic value. These items are of consistent period, scale, materials and form but are not individually significant enough to be included as a heritage item. They add to the cohesive and representative quality of the area.
Neutral	A building that does not contribute to the significance of the area but also does not detract from the area's overall character in terms of form, mass and small scale so that they fit without being disruptive. This may include early or new buildings. An example of a neutral building would be a modern single storey dwelling which respects the setbacks, forms and materials of the neighbouring dwellings. Retention of such neutral buildings may not be required provided that it is replaced with an appropriate infill building in a similar neutral nature.
Non-contributory	A building that detracts from the significance of the area and changes the character of the area. This may include early buildings with intrusive alterations and additions that erode their contribution to the significance of the area and which cannot easily be reversed. It also includes new buildings with detailing, scale and form that are not in line with the character of the area, for example large two storey buildings in unsympathetic 'Mediterranean' or other modern styles, such as light coloured rendered walls and black concrete roof tiles.

Careful consideration has been given to the threshold between buildings identified as contributory items and those identified as neutral or non-contributory. Some of the buildings, even though they may have been altered, are still recognisable as part of the Federation or Inter War periods as defined in the Statements of Significance have been ranked as contributory within a HCA. Alterations may include sympathetic additions and changes to the architectural elements such as painting the external walls, and replacing windows, fences or roofing material. It is considered that these alterations are reversible and in the long term the aesthetics and architectural values may be recoverable.

7.3 East Epping Heritage Conservation Area

The East Epping HCA consists of 253 properties and nine (9) streets and is located in the north-eastern portion of the Epping Town Centre Study Area. The nine streets include: Chester Street, Essex Street, Norfolk Road, Oxford Street, Pembroke Street, Somerset Street, Surrey Street, Sussex Street and York Street.

7.3.1 Previous Contributions Ranking

There are currently twenty nine (29) Heritage Items listed under part 1 of Schedule 5 of the Hornsby LEP 2013 which are located within the East Epping HCA (Figure 46). The majority of heritage items within the HCA are of local significance.

Figure 46: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting East Epping HCA (Source: Heritage Map 11, Hornsby LEP 2013)

In addition to the listed heritage items within the HCA, relative contribution ranking of each property within the East Epping HCA was also identified as part of the of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013, as outlined previously. The contributions map prepared for this previous study is reproduced in Figure 47.

Figure 47: Mark up showing contributory items and recommended extension of East Epping HCA boundary (Source: Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 81)

7.3.2 Review of Contributions Ranking

Whilst Heritage Items and Contributory items of the East Epping HCA were identified within the *Epping Town Centre Heritage Review*, the relative ranking of the remaining properties was not addressed. In order to gain a greater understanding of all properties relative contribution to the significance of the East Epping HCA, an assessment of each property's contribution has been conducted on foot as part of this study.

The revised relative contribution of individual buildings towards the significance of the East Epping HCA is depicted in Figure 48 and further detailed in the table overleaf. The distribution of rankings and development periods are further summarised in Figures 49 to 53.

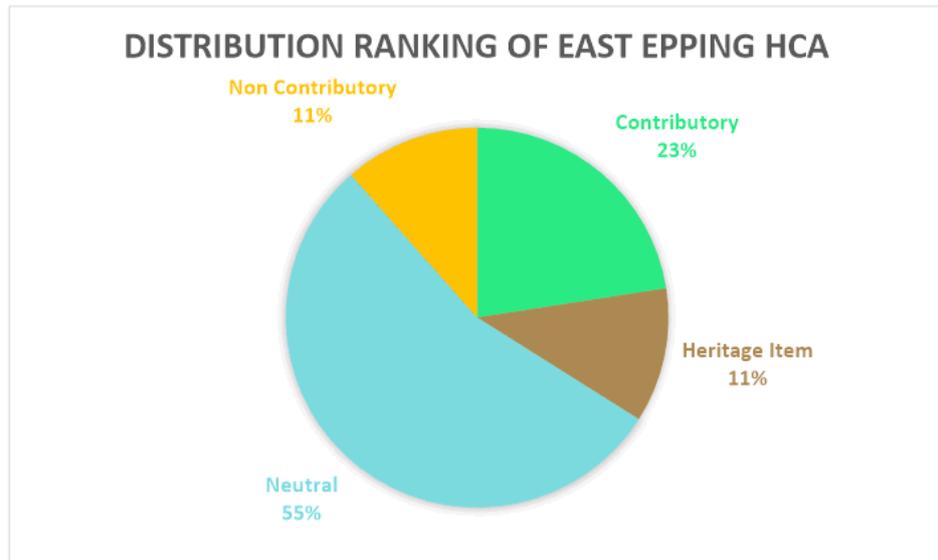

Figure 50: Distribution of Rankings of East Epping HCA.

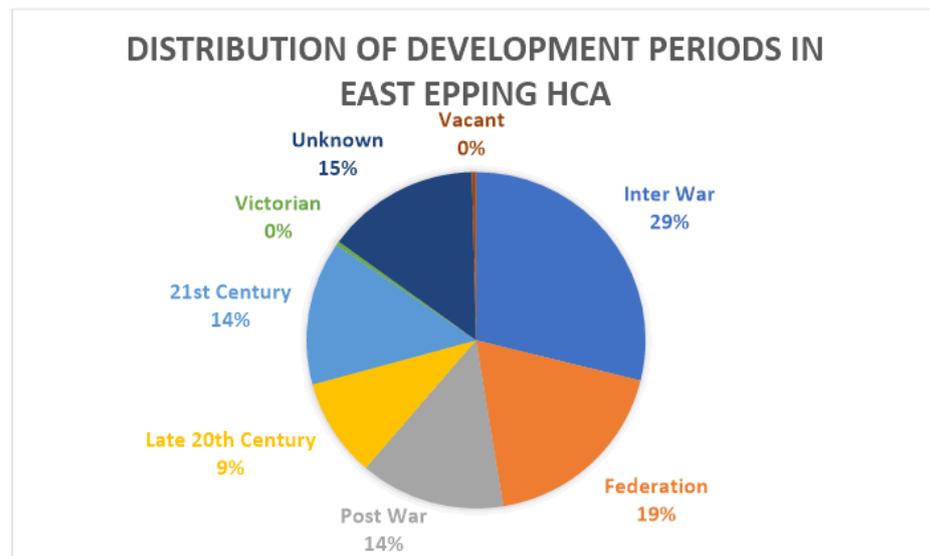

Figure 51: Distribution of Development Periods of East Epping HCA. The unknown development periods relate to properties which are located at the rear of another site and are not visible from the street fronts. Many properties within the East Epping HCA have been subdivided for dwellings to be constructed at the rear. These dwellings are not visible from the streetscape and have been ranked as being Neutral due to their presence neither enhancing or detracting from the area.

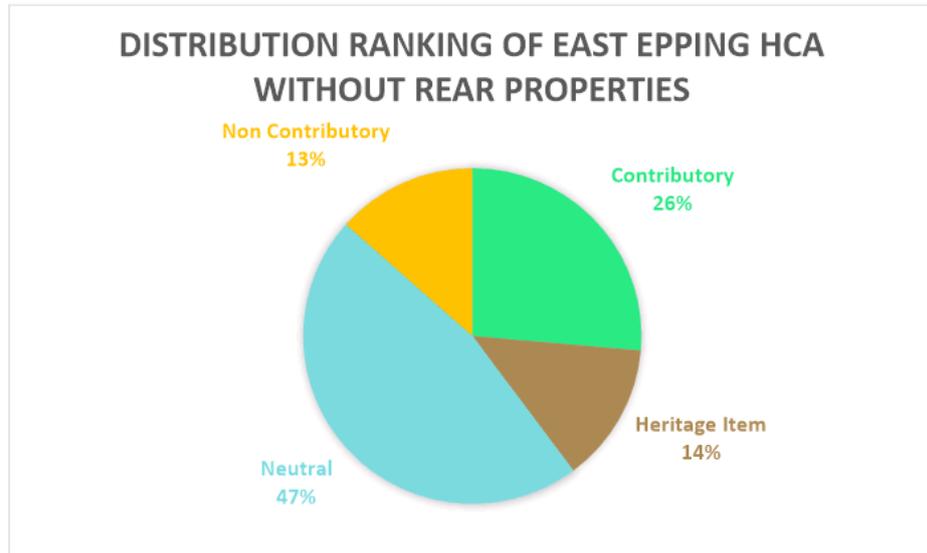

Figure 52: Distribution of ranking of East Epping HCA without rear property contribution. Due to a large number of properties within the East Epping HCA being subdivided, the properties which are not visible from the streetscape, do not contribute toward the character of the area and thus skew the distribution of rankings.

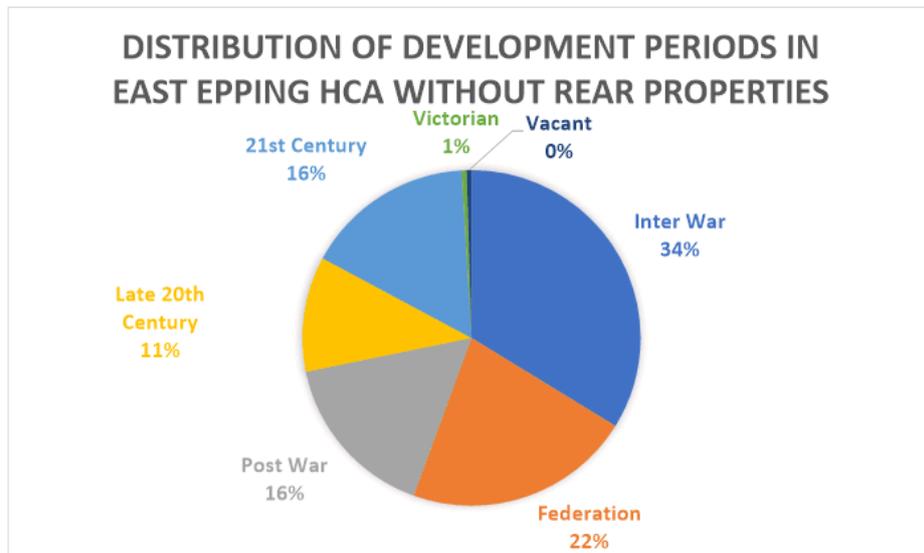

Figure 53: Distribution of developments periods of East Epping HCA without rear properties. Due to the large number of properties within the East Epping HCA being subdivided, the properties which are not visible from the streetscape do not contribute toward the character of the area. As such, their development period is unknown as depicted and have been removed from the above pie chart.

7.4 Essex Street Heritage Conservation Area

The Essex Street HCA consists of sixty (60) properties and two (2) streets and is located in the south-eastern portion of the Epping Town Centre Study Area. The two streets include Essex Street and Maida Road.

7.4.1 Previous Contributions Ranking

There are currently four (4) Heritage Items listed under Part 1 of Schedule 5 of the Hornsby LEP 2013 which are located within the Essex Street HCA (Figure 54). The majority of heritage items within the HCA are of local significance.

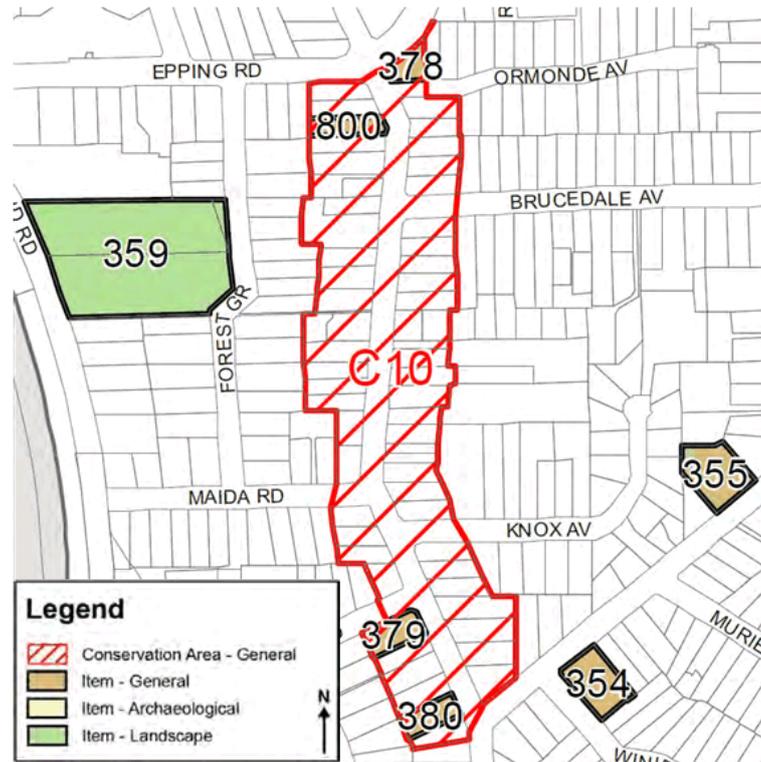

Figure 54: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting Essex Street HCA (Source: Heritage Map 11, Hornsby LEP 2013)

In addition to the listed heritage items within the HCA, relative contribution ranking of each property within the East Epping HCA Area was also identified as part of the of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013, as outlined previously. The contributions map prepared for this previous study is reproduced in Figure 52.

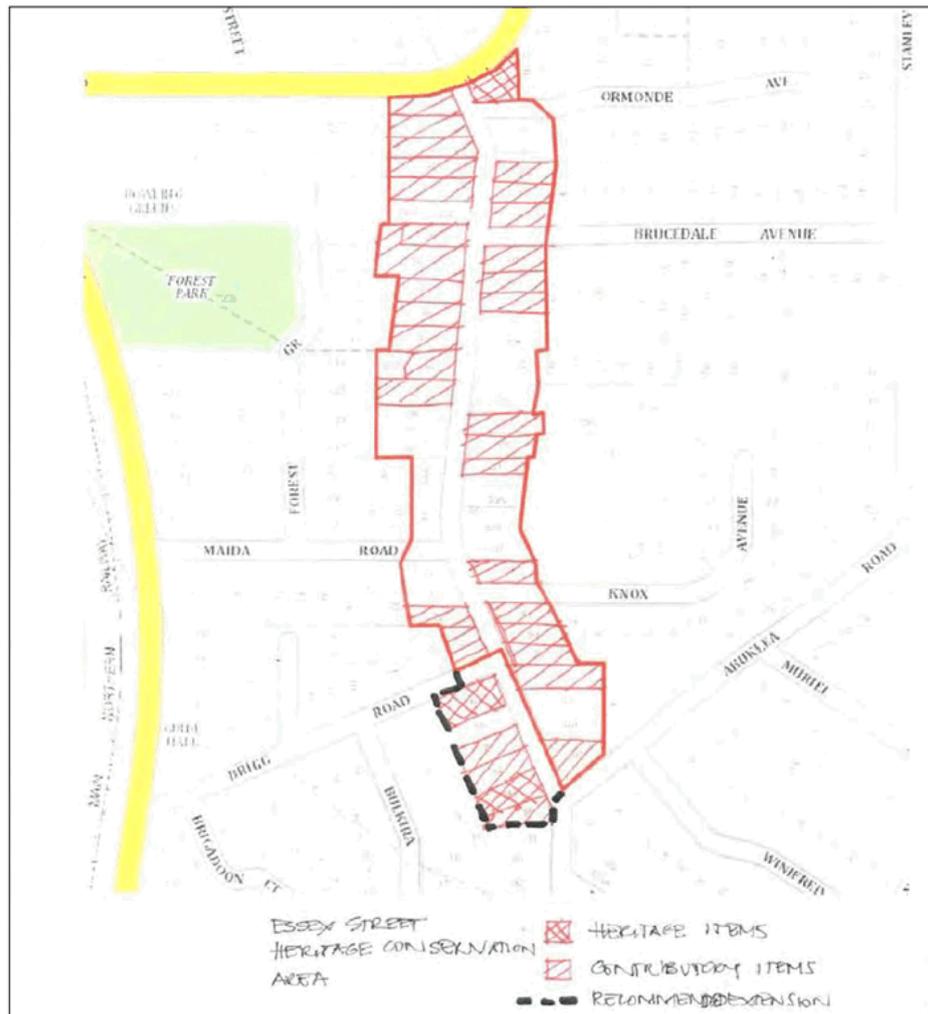

Figure 55: Mark up showing contributory items and recommended extension of Essex Street HCA (Source: Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 82)

7.4.2 Review of Contributions Ranking

Whilst Heritage Items and Contributory items of the Essex Street HCA were identified within the *Epping Town Centre Heritage Review*, the relative ranking of the remaining properties was not addressed. In order to gain a greater understanding of all properties' relative contribution to the significance of the Essex Street HCA, an assessment of each property's contribution has been conducted on foot as part of this study.

The revised relative contribution of individual buildings towards the significance of the Essex Street HCA is depicted in Figure 56 and further detailed in the table overleaf. The distribution of rankings and development periods are further summarised in Figures 57 to 59.

Figure 56: Essex Street HCA Contribution Ranking.

Figure 57: Essex Street HCA Ranking with development period overlay.

Ranking of Properties in Essex Street HCA

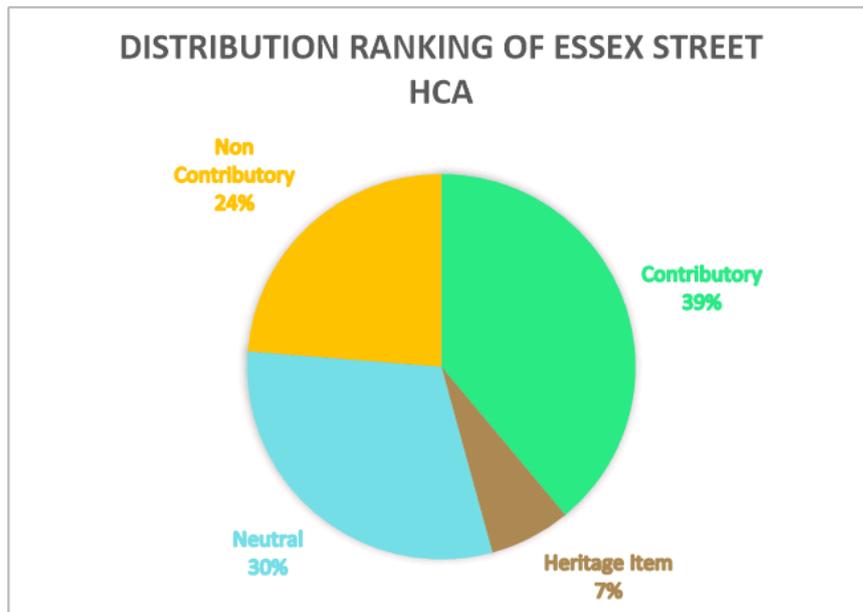

Figure 58: Distribution of Ranking of Essex Street HCA.

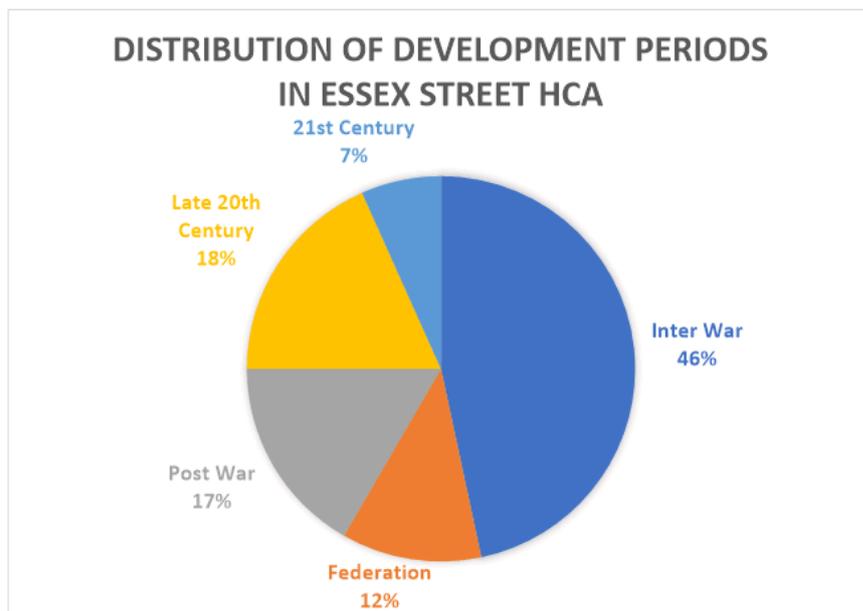

Figure 59: Distribution of Development Periods of Essex Street HCA.

7.5 Rosebank Avenue Heritage Conservation Area

The Rosebank Avenue HCA consists of approximately eighteen (18) properties and one (1) street and is located in the north-western portion of the Epping Town Centre Study Area. All properties within the HCA address Rosebank Avenue.

7.5.1 Previous Contributions Ranking

There are currently two (2) Heritage Items listed under Part 1 of Schedule 5 of the Hornsby LEP 2013 which are located within the Rosebank Avenue HCA (Figure 60). These two heritage items within the HCA are of local significance.

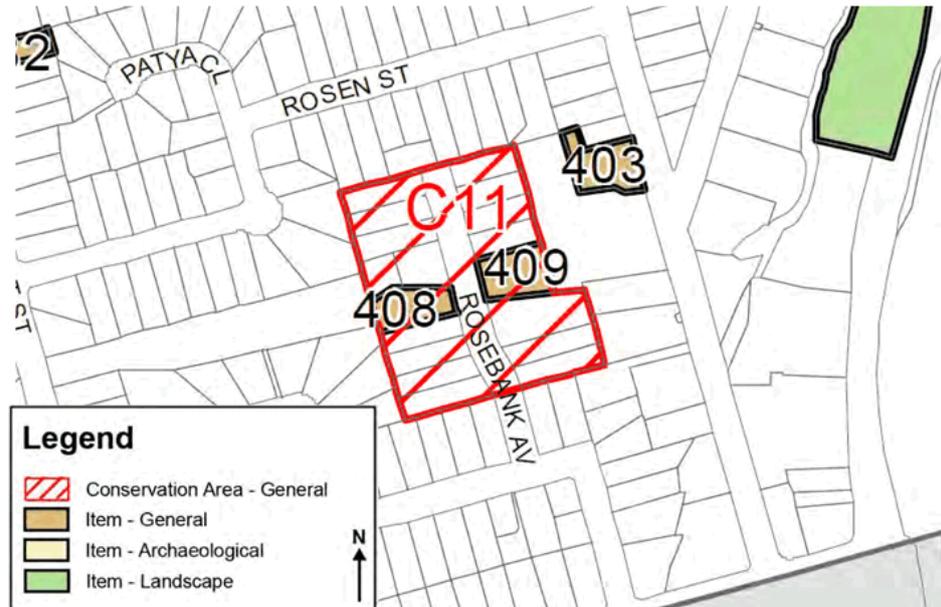

Figure 60: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting Rosebank Avenue HCA (Source: Heritage Map 11, Hornsby LEP 2013)

Unlike the East Epping and Essex Street HCAs, an assessment of each property's contribution to the area was not conducted as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013. Despite no contribution ranking being previously established for the Rosebank Avenue HCA, all except four dwellings within the area were constructed in 1938. The remaining three dwellings were constructed by 1942 and one in c.2007, which formed part of a subdivision of 15 Rosebank Avenue. As outlined in the Statement of Significance for the area in Section 6.4.4, the Rosebank Avenue HCA is a rare, fine and largely intact representative example of a residential development of an Inter War housing estate for the Hornsby Shire area. Due to the significance and intactness of the area, it can be stated that the relative contribution of each property within the Rosebank HCA is high, as determined through previous heritage assessments of the area.

7.5.2 Review of Contributions Ranking

Whilst Heritage Items within the Rosebank Avenue HCA were identified within the *Epping Town Centre Heritage Review*, the relative contribution of the properties was not addressed. In order to gain a greater understanding of all properties' relative contribution to the established significance of the Rosebank Avenue HCA, an assessment of each property's contribution has been conducted on foot as part of this study.

The relative contribution of individual building towards the significance of the Rosebank Avenue HCA is depicted in Figure 61 and further detailed in the following table. The distribution of rankings and development periods are further summarised in Figures 62 to 64.

Figure 61: Rosebank Avenue HCA Contribution Map.

Figure 62: Rosebank Avenue HCA Contribution map with distribution of periods overlay

Ranking of Properties in Rosebank Avenue HCA

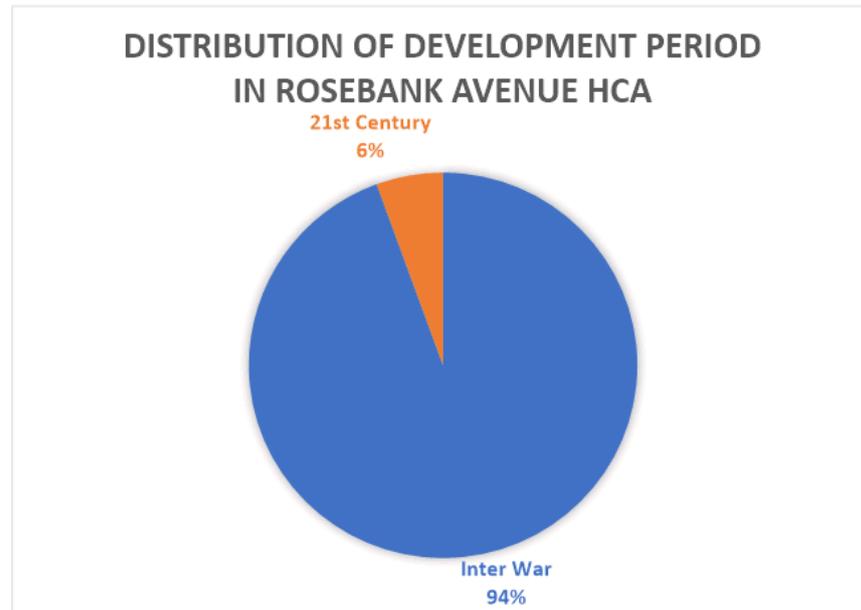

Figure 64: Distribution of Development Periods of Rosebank Avenue HCA.

7.6 Summary of Findings

7.6.1 East Epping Heritage Conservation Area

As established in Section 7.6.1, the East Epping HCA, retains its heritage significance as determined through previous studies of the area. Despite the previous contributory ranking of the East Epping HCA ranking more properties as being Contributory, the Neutral ranking awarded to the majority of properties within the HCA was primarily due to unsympathetic additions and alterations made to Federation and Inter War properties which rendered some of these properties a Neutral ranking rather than a Contributory ranking. Detailing of properties which are of the characteristics of the Federation and Inter War period could be altered to reflect the key characteristics of their respective development periods, restoring them to a ranking of Contributory. For example, this could include reinstating balconies which have been closed in, removal of unsympathetic carports, restoration of period detailing, such as exterior timber work, removal of uncharacteristic details and replacement with characteristic details.

Of the 253 properties located within the area, a total of 44% of the area is comprised of heritage items and contributory buildings and including all neutral buildings makes up a total of 89% of properties within the area. The area was confirmed to have a predominantly Federation and Inter War period character, with a total of 29% Inter War and 19% Federation properties, reflecting the early periods of development of the area following the subdivision of the Field of Mars. Post War, Late 20th Century and 21st Century properties total 37% all together; however, are scattered throughout the Inter War and Federation period properties of the area. Only one property was dated from the Victorian period at 70 Chester Street and another property was vacant, at 29A Chester Street. The vacant property previously had an Inter War Bungalow constructed on the site, and it appears that this building was demolished sometime after the 2013 study.

The high percentage of Neutral ranked properties was further due to a number of properties being subdivided, where it is typically seen in the area for an original Inter War or Federation period home to be sited at the front of the site, and newer dwelling being erected at the rear of the property, which would have served as the back yard of the original property. Due to

these rear properties not being visible from the streetscape, all of these properties have been ranked as Neutral, as they neither enhance nor detract from the overall characteristic detail of the HCA.

Whilst the area has retained its established heritage significance, the East Epping HCA requires adequate conservation guidelines and planning controls both within the area and in particular with interface areas of medium and high density development, which have the potential to further impact upon the visual setting and character of the area. This is of particular concern along the south-western edge of the area, where properties located along Essex Street, Norfolk Road and the very western properties of Chester Street. Recommendations on amendments to the current planning provisions for the area and interface areas are made in Section 11.2, which also take into account consultation with the residents and community members, which are also addressed in Section 8.0.

7.6.2 Essex Street Heritage Conservation Area

As established in Section 7.6.2, the Essex Street HCA, retains its heritage significance as determined through previous studies of the area. The ranking of properties as contributory has remained relatively the same as the previous rankings in 2013, with eight (8) properties being ranked as Neutral rather than Contributory, primarily due to unsympathetic alterations and additions to Inter War period dwellings, which has reduced the integrity of the buildings. One Inter War period weatherboard building, at 38 Essex Street, has sustained significant fire damage during 2016, with none of the original roof remaining. Despite being burnt out, the external façade remains, although damaged, and was awarded a Neutral ranking.

Of the sixty (60) properties located within the area, a total of 45% are comprised of heritage items and contributory buildings, and including all neutral buildings include a total of 75% of properties within the area. The area was confirmed to have predominantly Inter War period character, with a total of 46% of properties dating the period, reflecting the subdivisions of the farmlets located along the southern end of Essex Street from the 1920s. Federation period properties also still remain in the area, totalling 14%. These properties are scattered along the street, reflecting the earlier larger subdivision pattern of this area of the Epping Town Centre. The remaining properties, totalling 42% are composed of Post War, Late 20th Century and 21st Century properties. These later period properties are primarily located toward the centre of the Essex Street HCA.

Whilst the area has overall retained its integrity and character, the Essex Street HCA requires adequate conservation guidelines and planning controls both within the area and in particular with interface areas of medium and high density development, which have the potential to further impact upon the visual setting and character of the area. Particular areas of concern are the interface areas between the Essex Street properties located on the western side of the street, between Epping Road and Maida Road, where multiple high density residential developments are currently underway or have recently been approved. The recommendations on amendments to the current planning provisions for the area and interface areas are made in Section 11.2, which also take into account consultation with the residents and community members, which is also addressed in Section 8.0.

7.6.3 Rosebank Avenue Heritage Conservation Area

As established in Section 9.3, the Rosebank Avenue HCA, retains its heritage significance as determined through previous studies of the area. All properties within the area, except for 13 Rosebank Avenue, date to the original development of the Avenue as part of the Rosegrove Estate. All properties maintain their original Inter War period character; however, some modifications to two properties within the area, 5 and 21 Rosebank Avenue, have resulted in some period detailing being removed or modified, rendering in these properties being awarded a Neutral ranking. Despite this Neutral ranking, these two properties continue to contribute toward the character of the Rosebank Avenue HCA and could be returned to a Contributory ranking with reinstatement of period detailing and removal of unsympathetic modifications.

Of the 18 properties located within the area, a total of 88% of the area is comprised of heritage items and contributory buildings, and with inclusion of all neutral buildings make up a total of 100% of properties within the area. Only one property in the area dates from the 21st century, being 13 Rosebank Avenue, which lies directly behind 15 Rosebank Avenue. The new property is not visible from the street and is single storey, resulting in no impact to the significant streetscape qualities of the area.

Although the Rosebank Avenue HCA retains its integrity and established heritage significance, the area requires adequate conservation guidelines and planning controls both within the area and in particular with interface areas of medium and high density development, which have the potential to further impact upon the visual setting and character of the area. Areas of particular concern are properties within the Rosebank Avenue HCA which share a property boundary with high density residential developments on Cliff Road and Hazlewood Place. Recommendations on amendments to the current planning provisions for the area and interface areas are made in Section 11.2, which also take into account consultation with the residents and community members, which is also addressed in Section 8.0.

8. Community Consultation

8.1 Previous Community Issues and Concerns

Further to the re-assessment of the significance and integrity of the East Epping, Essex Street and Rosebank Avenue HCAs, this study sought feedback from the local community, property owners and heritage groups, on the issues which have arisen following the listing of each of the three HCAs after the 2013 study, and the current development of medium and high density residential development which are impacting upon the properties within HCAs that have the interface zone with these developments.

Prior to the beginning of this study, many community members and property owners of each of the three HCAs had made contact with Hornsby Council and the City of Parramatta Council to express their various concerns on the impact of heritage listing of HCAs, individual properties and the impact of medium and high density residential development. City of Parramatta Council provided letters from property owners and community groups over various concerns relating to heritage matters within the three HCAs. Of the material provided to City Plan Heritage, the following letters were included and are summarised as follows:

Letter Addresser	Issues and Concerns Raised
Property Owner of 42 Essex Street	Owner of 42 Essex Street request for property to be removed as a heritage item and be removed from Schedule 5 of the LEP (17 January 2016)
Epping Civic Trust	Epping Civic Trust supports the listing of the Essex Street Conservation Area, and supports the maintenance of the HCA's boundaries and the updating of the Section 9.4 of the DCP to include additional transitional measures to assist in mitigation impact from high density development (19 January 2015)
Damien Tudehope MP (Member for Epping)	Damien Tudehope MP (Member for Epping) requested for an immediate review as to the appropriateness of the continuation of the heritage conservation area in Essex Street and for Council to develop a new LEP that would act as a master plan for the redevelopment of the Essex Street precinct (provided the HCA is removed) (15 June 2015);
Property Owner of 1 Essex Street	Property owners of 1 Essex Street objection to listing of 1 and 3 Essex Street within the East Epping Heritage Conservation Area, and removal of 3 Essex Street as a heritage item. Further request for both properties to be rezoned as high density residential and equivalent building heights (18 September 2015);
Essex Street HCA Residents	Petition letter from residents of Essex Street HCA, requesting for a review of the Essex Street HCA, due to the burden the 'imposed' HCA zoning has on the properties within the zone. 38 residents of Essex Street signed the petition (16 December 2014)

The overwhelming number of the letters received from community members opposed the listing of the Essex Street and East Epping HCAs, in addition to the individual listing of 3 Essex Street and 42 Essex Street. The only letter not objecting to the removal of any HCA was from the Epping Civic Trust, who support the listing of the Essex Street HCA and encourage further planning controls to be included in the Hornsby DCP 2013.

8.2 Site Visit Consultation

In order to assess the current impact of high and medium density residential development at interface areas within the East Epping, Essex Street and Rosebank Avenue HCAs site visits with specific property owners were organised over two days, 21 and 22 March 2017. The

purpose of the site visits was two-fold, the first, to assess the impact of the high and medium density residential developments which lay adjacent to properties located within the HCAs, and the second, to gather and understand the issues and concerns of individual property owners on both the listing of each of the HCAs, and the impact that development was having upon them.

Whilst appointments were organised with individual property owners at allocated times, additional consultation was also conducted with property owners who had not secured an appointment was also undertaken. The below table outlines the property owners of whom City Plan Heritage consulted with and obtained their general issues and concerns relating to the East Epping, Essex Street and Rosebank Avenue HCAs and the impact of high and medium density. The issues and concerns raised are listed in no particular order.

HCA	Property Owners Consulted	General Issues and Concerns Raised
East Epping	3 Essex Street	<ul style="list-style-type: none"> ▪ Concerned about the impacts of high density residential development on their privacy ▪ Visual and physical impact of development on rear fence ▪ Worried about impact on financial value of property due to HCA, R2 zoning and adjacent development ▪ Some owners considering moving away from area due to impact of development ▪ Some owners experiencing health issues due to construction of developments ▪ Some owners unclear why their properties are included in the HCA ▪ Documentation from the property owners of Norfolk Road and Pembroke Streets was submitted to CPH for review as part of this phase of consultation. This documentation has been taken into consideration and is addressed in Section 11.5.
	25 Pembroke Street	
	1 Norfolk Road	
	3 Norfolk Road	
	3A Norfolk Road	
	5 Norfolk Road	
	7 Norfolk Road	
	7A Norfolk Road	
Essex Street	40 Essex Street	<ul style="list-style-type: none"> ▪ Visual and physical impact of development on rear fence ▪ Loss of privacy in rear yards ▪ Safety concerns ▪ Worried about impact on financial value of property due to HCA, R2 zoning and adjacent development ▪ Mature trees under threat or have been removed due to development ▪ Would like to add to existing properties, but not sure if substantial extensions would be approved due to HCA.

	5 Rosebank Avenue	

8.3 Community Workshops

Two community workshops were conducted by Parramatta City Council on 1 and 3 May 2017. Each workshop was facilitated by Straight Talk who will be composing a report for inclusion in the Discussion Paper to be prepared by the City of Parramatta Council. Each of the two community workshops were geared toward two groups, the first with property owners within the HCAs and the second with community members with general interest in the heritage review.

As part of these workshops, a short presentation by both the City of Parramatta Council and City Plan Heritage was conducted before the proceedings of the workshop activities.⁸ The City of Parramatta Council's presentation provided explanation as to the context and aims of the heritage review, as part of the Epping Planning Review which aims to:

1. Progress work undertaken by the Department of Planning & Environment, completed in March 2014;
2. Consolidate the planning controls to create one set of planning controls across the Town Centre and immediate surrounds; and
3. Provide a consistent approach to managing the high level of interest from developers within the centre.

In addition, the two stage approach of the Epping Planning Review was outlined as follows:

- **Stage 1 - December 2016 to December 2017**

1. Community consultations;
2. The preparation of 4 technical studies on: heritage conservation areas; traffic; social infrastructure; and commercial land uses;
3. The exhibition of a discussion paper in mid 2017, including getting public feedback;
4. Endorsement of key principles in late 2017

- **Stage 2 - from 2018 onwards:**

1. The preparation of new planning controls, including:
 - New Local Environmental Plan (LEP)
 - New Development Control Plan (DCP)
 - New Section 94 Plan

City Plan Heritage presented the information gathered to date (1 and 3 May) for the heritage review, to contextualise the study and provide clarification of the aims and scope of the study to the community members attending the workshops. The information presented at both workshops included the following:

- Scope of the brief;
- Methodology of heritage review;
- Brief History of the Epping Town Centre Area;
- Field Survey Ranking Criteria; and
- Overview of characteristics of East Epping, Essex Street and Rosebank Avenue HCAs.

As both of the community workshops took place before any recommendations had been made by City Plan Heritage to the City of Parramatta Council, all information presented at both of the workshops were at a preliminary stage.

⁸ A copy of the presentation from the community workshops conducted on the 1 and 3 May can be found via: <https://www.cityofparramatta.nsw.gov.au/about-parramatta/precinct-planning/epping-planning-review> (accessed on 15 May 2017)

Following City Plan Heritage's presentation, Straight Talk facilitated workshop discussions, based around three target questions as follows:

1. Values:
 - What do you value most about the Heritage Conservation Areas?
2. Experiences:
 - What is your experience around development in this area?
 - What do you see as being the key concerns when it comes to development regarding the Heritage Conservation Areas?
3. What should Council Consider?
 - What do you think Council should take into consideration when reviewing the planning controls for the Heritage Conservation Areas?

For the workshop on 1 May 2017, attendees were seated according to the street on which they lived, whilst for the workshop on 3 May 2017, attendees were seated wherever they wished. A summary of the results of these two workshops are outlined in the below tables.⁹ A detailed summary of the Community Workshops is contained within the report prepared by Straight Talk.

1 May 2017 - Directly Affected Community Members Workshop	
Key Insights	<ul style="list-style-type: none"> ▪ The current aesthetic of the area is highly valued. Greenery in general makes the area inviting and gives the streets a 'lovely' feel ▪ Low density buildings are perceived to add space and safety. This adds to the family-friendly character of the suburb ▪ There was comment that over-development raises issues regarding traffic, privacy, noise and rubbish. These things were among a number of other anxieties which relate to the 'destruction' of the overall quality of the suburb ▪ Traffic and parking was perceived to be a major issue. General congestion from increasing numbers of residents who may tenant new apartment blocks as well as commuters who travel through Epping on their commute to the city and other areas for work and during the week raise questions around how this will be managed for the future ▪ Participants believe that future planning and development should be consistent and appropriate for each section of the local area. Suggestions to apply transition zones to new developments were made ▪ A majority of the attendees supported a consideration of removing in whole or in part the HCAs which are part of the Heritage Review. This was particularly apparent in regards to Rosebank Avenue and Essex Street HCAs, as they are perceived the community members to now be compromised by new development in general.
Group Exercise 1 <i>Values: What do you value the most about your neighbourhood</i>	The most often mentioned values included: Proximity to public transport and schools, green, peaceful, community, heritage, suburban, consistency, privacy, open space, safety, gardens, pool, low-density, convenience and accessibility. Alongside listing these values, many participants expressed their concern about losing them because of new development. Some participants found this exercise difficult since they believe that the area has already changed significantly and therefore they struggled to identify any existing values.

⁹ The summary of findings of the Community Workshops have been provided by Straight Talk and are incorporated into the subject tables. Some amendments have been made to these summaries where clarification or additional information from the Community Workshops observed by CPH was deemed to be relevant for inclusion within these summaries.

<p>Group Exercise 2 <i>Experiences: What is your experience around development in this area? What do you see as being the key concerns when it comes to development regarding your street or neighbourhood?</i></p>	<p>Participants mentioned several different concerns including: Traffic issues and inadequate parking, visual and privacy issues concerning low and high-density housing immediately next to each other, increasing pollution and noise issues, lack of open and green spaces, confusion about what characterises an HCA and a wish to remove the heritage listing, lack of political transparency, safety, decrease in resident’s mental health, negative economic consequences for residents, affected infrastructure and closing down of local shops and services.</p>
<p>Group Exercise 3 <i>Proposals: What do you think Council should take into consideration when reviewing the existing planning controls?</i></p>	<p>The proposals to Council were concentrated around four subjects. Firstly, numerous participants expressed a wish for Council to review the HCAs under the current Heritage Review and to consider removing the HCAs in whole or in part. On the other hand, others stated that heritage items should be protected. Appropriate planning and development was another key matter and here participants suggested height restrictions on new development, buffer zones between low and high-density housing and well-designed new development as significant matters. Participants wanted Council to focus on improving Epping’s infrastructure which, it was felt, is currently not geared for the increasing population. Improving parking facilities was particularly emphasised. Finally, it was suggested that Council preserves existing greenery and community spaces as well as expand these.</p>

<p>3 May 2017 - General Community Members</p>	
<p>Key Insights</p>	<ul style="list-style-type: none"> ▪ The aesthetic appeal of the suburb is highly valued. This incorporates the gardens, low density and heritage buildings in the area and contributes to the feeling that the area is protected and has a good sense of community ▪ Low traffic and easy access to public transport is also highly valued ▪ Many say that the HCAs in the area need to be preserved in order to retain the living history of the area ▪ Increasing building heights cause concern for participants who say this causes problems around privacy and shadowing ▪ Some participants believe that building and planning controls need to be more strictly monitored so developers follow through on their obligations ▪ There is concern that the character of the suburb will be lost and the voices of residents will be over-shadowed by developers ▪ Consistency in future planning controls is desired.
<p>Group Exercise 1 <i>Values: What do you value the most about your neighbourhood</i></p>	<p>The most often mentioned values included: Green, heritage, history, architecture, consistency, low-density, peaceful, low-traffic, consistency, gardens, size, open spaces, beauty, community, wildlife. Alongside listing values, some participants explicitly expressed that they would like to see the HCAs expanded or maintained.</p>
<p>Group Exercise 2 <i>Experiences: What is your experience around development in this area? What do you see as being</i></p>	<p>Participants mentioned several different concerns including: Visual and privacy issues concerning low and high-density housing immediately next to each other, traffic issues and inadequate parking, environmental impacts affecting vegetation and wildlife, new development undermining the value of the HCAs and a wish to extend the HCAs, violation of planning and building by developers, loss of the area’s identity and architectural character.</p>

<p><i>the key concerns when it comes to development regarding your street or neighbourhood?</i></p>	
<p>Group Exercise 3 <i>Proposals: What do you think Council should take into consideration when reviewing the existing planning controls?</i></p>	<p>The proposals to Council were concentrated around four subjects. Firstly, a number of participants stated that they would like for the HCAs to be preserved and many further mentioned that they would prefer an extension of the HCAs. Some mentioned that the HCAs should be reviewed since their value has changed due to the new development and therefore consideration of the removal of the HCAs, in whole or in part, should be considered by Council. Many were concerned about protecting heritage housing and other items. Appropriate planning and development was another central matter and here participants suggested height restrictions on new development, control of floor space ratios, buffer zones between low and high-density housing and well-designed new development as significant matters. More control over developers was put forward as an important matter and finally, protecting the architectural value of Epping. Participants pointed out the need to improve Epping's infrastructure which, it was felt, is currently not geared for the increasing population. Improving parking facilities and minimising stormwater issues were mentioned. Finally, it was suggested that Council preserves existing greenery and community spaces as well as expand these.</p>

8.4 Submissions from Community Members Following Workshops

If any attendees of the Community Workshops wished to raise any additional issues, or submit documentation in regards to the heritage review, they were encouraged to do so through submitting written documentation to the City of Parramatta Council. Copies of all additional documentation from attendees was forwarded onto City Plan Heritage following recording by the City of Parramatta Council. A summary of the additional documentation received from community members from each of the workshops is summarised in the below table.

Topic/Issue	Documents received	CPH Comments
Impact of High Density Development on Rosebank Avenue HCA	<ul style="list-style-type: none"> ▪ Manuscript of Hornsby Shire Council Meeting, 12 August. ▪ Draft Zoning Map prior to UAP ▪ Images of Cliff Road development from and in Rosebank Avenue 	Consideration of the documentation provided in regards to the impact of high density residential development on the Rosebank Avenue HCA has been considered in Sections 9.3 and 10.3.
Rosebank Avenue draining disposal point and proposed tree removal	<ul style="list-style-type: none"> ▪ Request for additional information - DA/1292/2015 dated 10 March 2016 ▪ Email from Chris Fraser, Hornsby Shire Council to Richard and David (unknown surnames), no date included 	During the site visits to Rosebank Avenue on the 21 and 22 March, CPH was made aware that a proposal for the removal of some trees on the western side of Rosebank Avenue was proposed by Council in order accommodate stormwater drainage for the recent high density residential development located on Cliff Road. The documentation supplied provides evidence for this matter. It is noted by CPH that the email from Chris Fraser (Hornsby Shire Council) does indicate that the seven (7) trees to be impacted,

		<p>including Peppermint Gum, Brush Box and 5 Scribbly Gums could possibly be retained after the proposed works.</p> <p>To date, it does not appear that any works have commenced in regards to the installation of the stormwater draining for the developments on Cliff Road, however, the loss of these trees would negatively impact upon the setting of Rosebank Avenue, which currently is a leafy street, lined by street trees and enhanced by properties front gardens and mature plantings and trees. If it is not possible to maintain all trees due to the installation of the stormwater drain, as suggested within the email supplied it is recommended to the City of Parramatta Council that appropriate replacement trees be planted in the road reserve to ensure that the consistent street tree plantings of Rosebank Avenue are maintained. This matter has also been included within Section 8.5.</p>
<p>Uncharacteristic features in Rosebank Avenue HCA</p>	<ul style="list-style-type: none"> ▪ Images of 5, 21 and 22 Rosebank Avenue with notes on recent renovations to properties 	<p>The two properties located within the Rosebank Avenue HCA, being 5 and 21 Rosebank Avenue, were noted in the field survey as being of 'Neutral' ranking, due to the alterations and additions to the properties which have removed characteristics details as noted in Sections 7.5.2 and 7.6.3.</p> <p>Both 5 and 21 Rosebank Avenue could be returned to a 'Contributory' ranking with reinstatement of period detailing and removal of unsympathetic modifications, as noted in Section 7.6.3.</p> <p>22 Rosebank Avenue is located outside of the Rosebank Avenue HCA and was not assessed for its contribution to the Rosebank Avenue HCA, however, it was noted that although the building located on the property is modern, the single storey scale and form of the building is considered to be moderately sympathetic to the HCA.</p>
<p>Request for extension of Essex Street HCA</p>	<ul style="list-style-type: none"> ▪ Email from Friends of Terry Creek requesting extension of Essex Street HCA to the south 	<p>Whilst it is acknowledged that the southern end of Essex Street, south of Abuklea Road does continue the character of the leafy streetscape of Essex Street, an assessment for the extension of the Essex Street HCA was not undertaken as part of this heritage review and laid outside of the scope of the brief.</p> <p>However, it is recommended that future heritage reviews, possibly as part of the new Local Environmental Plan to be developed for the City of Parramatta Council, consider assessing the southern end of the Essex Street HCA, for either extending the HCA's</p>

		boundary, or for an arboricultural assessment to be undertaken for the possibility of listing the street trees as a landscape items.
Heritage Houses and Areas	<ul style="list-style-type: none"> List of sixteen (16) 'heritage houses and areas' located in and around Epping 	No other notes than the list of 'heritage houses and areas' was provided. Unsure of purpose of list.
Heritage Houses and Non-Heritage Houses in Epping	<ul style="list-style-type: none"> Images of houses located in Rosebank Avenue Images of heritage houses located in Epping (not able to determine from which locations in Epping) Images of new apartment developments and late twentieth and early twenty-first century single and two storey residential developments 	<p>No other notes other than the photographs provided, and the labelling of images as either A, B, C or D was provided. The intention of the images provided is unknown to CPH, however, the majority of the houses contained within the photographs are located within either Rosebank Avenue, Essex Street and East Epping HCAs.</p> <p>If the intention of the photographs was to delineate between properties which contribute and which do not contribute toward the significance of each of the HCAs, reference should be made to Section 7 for the ranking of individual properties within each HCA for comparison.</p>

8.5 Summary and Recommendations Arising from Community Consultation

The issues and concerns raised by property owners, community members, and local community groups of Epping have been taken into account throughout this Heritage Review. Some key issues and concerns were raised throughout the process in regards to issues outside of the scope of heritage concerns, particularly in relation to amenity, privacy, safety, traffic, green space, and a number of other issues as discussed throughout this section. Where issues and concerns raised throughout the community consultation phase were in direct relation to heritage matters, these have been addressed and incorporated throughout this report. The concerns of the community have been taken into account throughout the reassessment of the significance of each of the HCAs contained within this review (Sections 6 and 7), with particular attention to the impact of high density residential development being addressed in Section 9.

Two specific recommendations relating to heritage also arose from this Community Consultation phase, which are detailed as follows:

- It is recommended that future heritage reviews, possibly as part of the new Local Environmental Plan to be developed for the City of Parramatta Council, consider assessing the southern end of the Essex Street HCA, for either extending the HCA's boundary, or for an arboricultural assessment to be undertaken for the possibility of listing the street trees as a landscape items.
- CPH was made aware during the site visits to Rosebank Avenue that a proposal for the removal of some trees on the western side of Rosebank Avenue was proposed by Council in order accommodate stormwater drainage for the recent high density residential development located on Cliff Road. The documentation supplied indicated that seven (7) trees were to be impacted, including Peppermint Gum, Brush Box and 5 Scribbly Gums, however, could possibly be retained after the proposed works. As it does not appear that any works have commenced to date in regards to the installation of the stormwater drainage for the developments on Cliff Road, it is recommended for either the trees to be maintained, or if this is not possible, that appropriate replacement trees be planted in the road reserve to ensure that the consistent street tree plantings of Rosebank Avenue are maintained.

9. Assessment of Impact of Recently Approved Development Applications in Interface Areas

The following sub sections provide a diagrammatic and visual overview of recently approved developments, which have been either approved, are under construction, or have been completed, and which lay adjacent to the boundaries of East Epping, Essex Street and Rosebank Avenue HCAs.

As part of the Community Consultation phase, which has been documented in Section 8.0, access to the rear yards of the properties, which lie in the interface area of medium and high density residential development, was granted in order to establish and document the impact of the adjacent development has or will have on the setting, context, curtilage, character, landscape and most of all significance of each HCA.

The impact of these developments is assessed in Section 10.0 in regards to their impact on the overall significance of each of the East Epping, Essex Street and Rosebank Avenue HCA's. The significance, current integrity and intactness of each HCA, as determined in Sections 6.0. and 7.6, was factored in as part of this analysis.

9.1 East Epping HCA - Impact of Surrounding Developments

The following table and images provides an overview of the recently approved developments on the western side and southern edges of the East Epping HCA. Comments on the impact of each of these developments is provided in the captions.

Figure 69: Views from rear backyard of 66 Essex Street: looking west toward 23 and 25 Forest Grove (left); and looking south-west toward the development under construction at 27 Forest Grove.

Figure 70: Views from the rear of 42 Essex Street, a heritage item of local significance, toward the development at 20-24 Epping Road. As with 40 Essex Street, the high density residential development which is under construction lies directly behind the rear fence of the property, with minimal setback from the property line.

Figure 71: Above, view from opposite 44 Essex Street looking west. The high density residential development located at 1 Forest Grove is currently under construction, with the top two storeys visible over the roof top of 44 Essex Street. Right, view from the rear of 46 Essex Street toward the development at 1 Forest Grove. Whilst the development is very close the rear fence of 46 Essex Street the substantial planting in the property screens the majority of the development, lessening the developments impact.

Figure 72: View from rear back yard of 64 Essex Street, looking west toward the rear of 25 Forest Grove which has recently been approved for development of high density residential apartments.

9.3 Rosebank Avenue HCA - Impact of Surrounding Developments

The following table and images provides an overview of the recently approved developments on the western and southern edges of the Rosebank Avenue HCA. Comments on the impact of each of these developments is provided in the captions.

Address of Development	Development Application Number
2-8 Hazlewood Place	DA/364/2015
22-34 Cliff Road	DA/714/2016
18-20 Cliff Road	DA/1602/2014
11-27 Cliff Road	DA/1447/2014
7-9 Cliff Road	DA/1436/2014
1-5A Cliff Road	DA/712/2016

Figure 73: Recently approved developments in interface area with R4 - High Density Residential Development adjacent to the Rosebank Avenue HCA (Source of Basemap: Hornsby Shire Council)

Figure 74: Views from rear yard of 1 Rosebank Avenue looking to the west (left) to the developments in Hazlewood Place and to the south to the developments on Cliff Road (right). Development is yet to begin on the adjacent properties to the south of 1 Rosebank Avenue, however development approval has been granted for high density residential development at 22-34 Cliff Road.

Figure 75: View from rear yard of 1 Rosebank Avenue looking to the north-west toward the development at 4 Hazlewood Place and the rear year of 3 Rosebank Avenue (left) and view from 5 Rosebank Avenue looking west. The rear of 5 Rosebank Avenue does not have any mature tree plantings in order to help screen the new development (right).

Figure 76: View from 4 Rosebank Avenue looking to the west toward the Hazlewood high density residential development visible above the roof lines of 3 and 5 Rosebank Avenue (left) and view from 4 Rosebank Avenue looking south toward Cliff Road, with development visible in the background (right).

Figure 77: Entrance to Rosebank Avenue from Cliff Road. Development is underway visible to the left at 1-5A, 7-9 and 11-27 Cliff Road. Development approval has also been granted for 22-34 Cliff Road, visible to the right, however construction has not begun as yet. The entrance to Rosebank Avenue will be surrounded by high density residential developments following the completion of the approved constructions.

10. Recommendations for Amendments to Heritage Conservation Areas

The following section outlines the recommendations for amendments to the East Epping, Essex Street and Rosebank Avenue HCAs based upon the findings of the heritage assessment of each HCA, and consideration of the issues and concern raised during the community consultation phase of this study.

10.1 East Epping HCA and Individual Items Recommendations

In consideration of the reviewed assessment of the East Epping HCA, and the issues and concerns raised by the community in relation to the East Epping HCA associated with the impact of high density residential development on the western edge of the East Epping HCA boundary, it is recommended that a slight change to south-western boundary of the HCA be implemented. It is recommended that the following four (4) properties to be removed from the boundaries of the East Epping HCA and the boundaries of the HCA be adjusted accordingly as in Figures 78 and 79:

No.	Address	Development Period	Ranking
25	Pembroke Street	Federation	Contributory
1	Norfolk Road	Late 20th Century	Non Contributory
3	Norfolk Road	21st Century	Non Contributory
3A	Norfolk Road	21st Century	Neutral

Figure 78: East Epping HCA Contribution Ranking with Development Period overlay. The four properties recommended to be removed from the HCA are outlined in pink.

The recommendation of the removal of these four properties from the East Epping HCA is made due to the combination of the impact of the high density residential development at the rear of these properties and their relative contribution to the area. 1, 3, and 3A Norfolk Road are all new single and double storey dwellings, dating from the late 20th Century and early 21st Century. The style and age of these three dwellings are not in keeping with the Federation and Inter War characteristics of the East Epping HCA, thus resulting in the dwellings not contributing to the significance of the area. On the other hand, 25 Pembroke Street is a Contributory building for the East Epping HCA, however, will soon be isolated from similar properties of Federation and Inter War periods as a result of the rezoning of the southern side of Pembroke Street being an R4-High Density Residential Zone and properties to the west of 25 Pembroke also being zoned as R4-High Density Residential Zone. Whilst exhibiting characteristics of the Federation period, as a cottage with attached corner shop, the property is not considered to meet the threshold for individual heritage listing. Whilst it was noted in the *2013 Epping Town Centre Heritage Review* that this end of Norfolk Road, provided an entry way to the East Epping HCA, it is not until 9 Norfolk Road, which is a heritage item, that the characteristic streetscape features such as mature tree plantings, and built forms of the Federation and Inter War periods begin.¹⁰ Despite the heritage listed Epping Public School being located on the eastern side of this portion of Norfolk Road, the early buildings of the school are not located in the south-eastern end of the school grounds, instead, the Federation period buildings of Epping Public School begin directly opposite 9 Norfolk Road. From this start point, a true appreciation of the characteristics of the East Epping HCA can be experienced and observed.

If, as a result of 25 Pembroke Street being removed from the East Epping HCA, should in the future demolition of the property is proposed, it is recommended that a photographic archival recording be undertaken prior to the dwelling's demolition, and any significant fabric be salvaged and recycled in an appropriate manner.

In addition, it is recommended that both 1 and 3 Essex Street are retained within the East Epping HCA and for 3 Essex Street to maintain its heritage listing under the Hornsby LEP. An internal inspection of 3 Essex Street was conducted as part of the HCA review. The dwelling retains many original details both internally and externally, as detailed in Section 6.2.5. Despite the concerns of the property owner, of being surrounded by high density residential development and being located on the very edge of the HCA, 3 Essex Street along with 1 Essex Street will not be isolated sites. Another heritage item, the Scout Hall lies on the western side of Essex Street, as well as directly to the north is the Unity Church on Chester Street, also a heritage item. In addition, a recreational park lies directly to the south of 3 Essex and to the east is the East Epping HCA. Thus, 3 Essex Street will maintain its current setting and the high density residential development which is currently underway further south along Essex Street and further to the east close to the railway line will not affect the immediate context, curtilage and setting of either this section of the East Epping HCA or the Heritage Items themselves. Thus, it is recommended that both 1 and 3 Essex Street are maintained within the East Epping HCA and for 3 Essex Street to be maintained as a heritage item under the Hornsby LEP 2013. The Inventory Sheet for 3 Essex Street has been updated to reflect the current condition and setting of the property in Appendix A.

The recommended amendments to the boundary line of the East Epping HCA is depicted overleaf in Figure 79. Recommendations for the rezoning of properties recommended to be removed from the East Epping HCA are addressed in Section 11.5.

¹⁰ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 10.

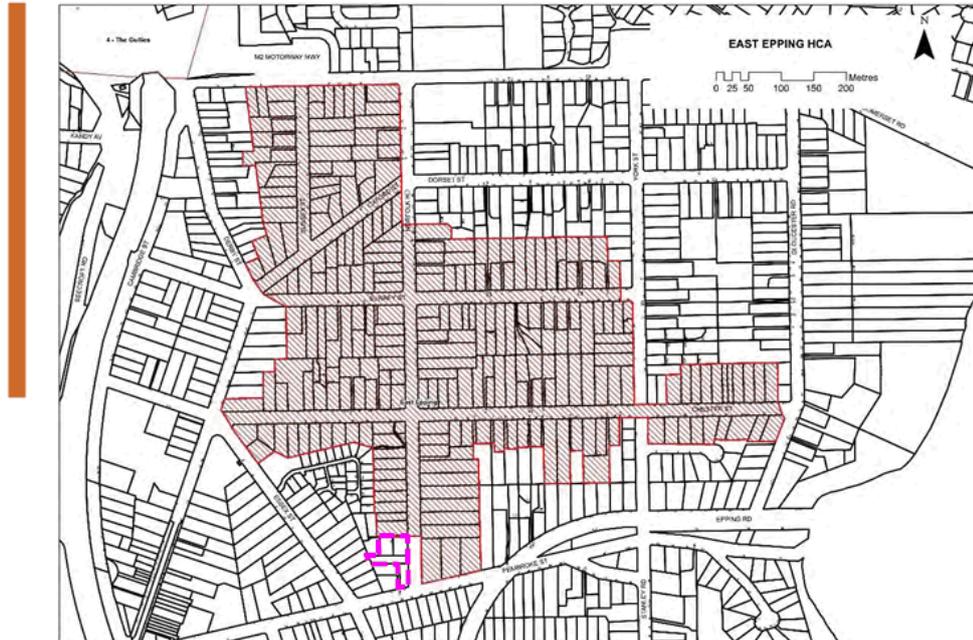

Figure 79: East Epping HCA with amendment to boundary removing 25 Pembroke Street, 1, 3 and 3A Essex Street. The properties recommended to be removed are outlined in pink.

10.2 Essex Street HCA and Individual Items Recommendations

In consideration of the survey findings and reviewed assessment of the Essex Street HCA, and despite the issues and concerns raised by the community in relation to interface areas of the high density residential development on the western edge of the area, no changes to the Essex Street HCA boundary are recommended.

Following the reassessment of the Essex Street HCA it was determined that the integrity and significance of the Essex Street HCA was still intact, as determined through the two previous studies conducted on the HCA in 2013 and 2001, as discussed in Section 6.3. In addition, the properties which are located between Epping Road and Maida Road within the Essex Street HCA are predominantly Contributory properties, primarily dating from the Federation and Inter War periods. Of the twenty (20) properties located on the western side of the Essex Street between Epping Road and Maida Road of the HCA, one (5%) is a Heritage Item, nine (45%) are Contributory, five (25%) are Neutral, and five (25%) are Non-Contributory. Thus, 50% of the properties located within this section of the Essex Street HCA are Heritage Items and Contributory buildings, and with inclusion of all Neutral buildings, they make up 75% of this section of the HCA contributing to the intactness of the Essex Street HCA. Two of the current Neutral buildings located in this section of the HCA date from the Inter War period and could be ranked as Contributory, if original detailing is reinstated and/or detracting elements are removed, which could increase the number of contributory buildings to eleven (55%), totalling twelve (60%) properties being either Heritage Items or Contributory.

In addition, the impact of the high density residential developments on Forest Grove and Epping Road upon the Essex Street HCA was also assessed as part of this heritage review in Section 9.2. Whilst five and six storey developments were currently underway at the rear of properties located on the western side of Essex Street between Epping Road and Maida Road, the visual impact of these developments are not considered to have a major impact upon the significance of the Essex Street HCA. Due to the long lot size of each of the properties on the western side of Essex Street, coupled with existing mature trees and vegetation on each of the properties, the high density residential developments recede into

the background of the setting of the Essex Street HCA and do not dominate the streetscape of the HCA. The streetscape qualities of the HCA are not affected detrimentally by the interface R4-High Density development and the impact on the backdrop of the properties are not experienced along the street-long views and vistas. It is considered that the main impact of these close high density development is privacy issue and dominance at the rear boundaries, which are essentially related to planning matters rather than heritage matters.

If the removal of these twenty (20) properties from the HCA was considered, it would result in a detrimental impact to the identified and assessed heritage significance of the HCA. The removal of these properties would result in the most intact component of the HCA being lost, reducing the HCA by a third of its size and significantly impacting upon the streetscape of the northern end of the Essex Street HCA. Furthermore, properties located on the eastern side of Essex Street, which would remain in the HCA, would further be impacted upon by the removal of these twenty (20) properties, dislocating the relationship between the east and west sides of Essex Street. The intactness and significance of the Essex Street HCA would be irrevocably changed if these twenty (20) properties were to be removed, thus, it is recommended that the existing boundary of the HCA remain as is.

Whilst it is acknowledged that the high density residential developments have and will result in significant impacts for property owners adjoining these new developments in relation to privacy and individual views from properties, these impacts are not considered to be heritage issues and do not impact upon the heritage significance of the Essex Street HCA. Despite this, recommendations have been made in Section 11.0 to mitigate some of the issues, both current and future, experienced by both property owners in these interface areas and the setting of the Essex Street HCA.

In addition, it is recommended that 42 Essex Street be retained as a heritage item under the Hornsby LEP. A brief internal inspection of 42 Essex Street was conducted as part of the HCA review. The dwelling retains many original details both internally and externally, as evidenced in Section 6.3.5. Furthermore, in conducting a review of the history of the Epping Town Centre area, the association of the 42 Essex Street within the Mount Tomah Nursery that operated in the area in the 1890s was reconfirmed. The association of the timber weatherboard Federation cottage with the Vollmer and Vessey family is a significant link with the early development of the Epping Town Centre, at a time when orchards and nurseries dotted the landscape of Epping. Whilst the high density residential development occurring at 20-24 Epping Road does create some visual impact, in terms of setting of the rear yard of the property, this impact is not considered to erode the heritage significance of the property, in terms of its historic, aesthetic, associational and representative values. Thus, it is recommended that 42 Essex Street be maintained as a heritage item under the Hornsby LEP 2013.

10.3 Rosebank Avenue Conservation Area Recommendations

In consideration of the survey findings and reviewed assessment of the Rosebank Avenue HCA, and despite the issues and concerns raised by the community in relation to interface areas of the high density residential development on the western and southern edge of the HCA, no changes to the Rosebank Avenue HCA boundary are recommended.

Following the reassessment of the Rosebank Avenue HCA it was determined that the integrity and significance of the Rosebank Avenue HCA was still intact, as determined through the two previous studies conducted on the HCA in 2013 and 2003, as discussed in Section 6.4. The Rosebank Avenue HCA still remains as a rare example, at local level, of an intact Inter War streetscape within Epping and the Parramatta area and is one of few intact Inter War housing estates remaining. Despite some minor modifications to a couple of properties within the HCA, such as modified windows, enclosed balconies and uncharacteristic driveways, these modifications are only minor and do not detract from the overall heritage significance of the HCA.

The impact of the high density residential developments to the south and west of the Rosebank Avenue HCA, along Cliff Road and Hazlewood Place will result in a modified setting and curtilage to the Rosebank Avenue HCA, particularly from the entrance looking

north along Rosebank Avenue. The entrance to Rosebank Avenue will soon be flanked by a six storey development to the west and a five storey development to the east of the entrance to Rosebank Avenue; however, once reaching 1 and 2 Rosebank Avenue, the view of the HCA will be unobstructed by the high density residential development which lays to the south. The backdrop of 1, 3, 5, 7 and 7A Rosebank Avenue will be of mature trees and high density residential redevelopment; however, due to the long blocks, the separation from the rear of the dwelling and the new developments allows for enough of a buffer to prevent the encroachment of views of the high density development being seen from Rosebank Avenue. 1, 3, and 7 Rosebank Avenue currently have substantial mature trees located along the rear boundary fence, screening much of the view of the new developments. Only 5 Rosebank Avenue does not have substantial mature trees along the rear fence line, thus resulting in more views to and from the new development, both from Rosebank Avenue and from the 5 Rosebank Avenue. Whilst the new backdrop of 1, 3, 5 and 7 Rosebank Avenue, will minimise the current leafy backdrop of the Rosebank Avenue HCA, it is not considered to warrant the removal of individual properties or the whole HCA from the Hornsby LEP.

The Rosebank Avenue HCA is exceedingly rare in the area and remains largely intact. All properties have retained their original subdivision, except for 15 Rosebank Avenue, and all retain the original buildings constructed during the 1930s and 1940s. The detailing of the Inter War period, from Bungalow, Tudor and Spanish styles, is retained amongst all original properties. Coupled with the substantial street plantings, natural creek, and established gardens of each of the properties, the Rosebank Avenue HCA will still retain its significance even following the completion of development along Cliff Road and Hazlewood Place. Whilst it is regrettable that such a backdrop to some of the properties in the HCA will be affected by the new high density residential development, the area will still retain its integrity and characteristics that makes it rare Inter War period housing development.

Whilst it is acknowledged that the high density residential developments have and will result in significant impacts for property owners in relation to privacy and individual views from properties at 1, 3, 5 and 7 Rosebank Avenue, these impacts are not considered to be heritage issues and do not impact upon the heritage significance of the Rosebank Avenue HCA. Despite this, recommendations have been made in Section 11.0 to mitigate some of the issues, both current and future, experienced by both property owners in these interface areas and the setting of the Rosebank Avenue HCA.

11. Planning Review

11.1 Existing Heritage Guidelines

Changes to Heritage items and HCAs are guided by the heritage provisions contained in the two main plans known as the *Hornsby Local Environmental Plan (LEP) 2013* and the *Hornsby Development Control Plan (DCP) 2013*. The controls in these instruments seek to "assist in conserving the heritage significance of the natural and built environment and ensure new development is sympathetic with identified heritage values. In doing this, the [Hornsby] Shire's heritage resources and the quality of the environment will be maintained or improved, resulting in attractive streetscapes and providing an appealing place to live."¹¹

Standard best practice heritage controls are currently contained in these instruments for managing the development of heritage places, including the need for Council's development consent for major changes, the requirement for statements of heritage impact to accompany development applications, and the Council's obligations to assess the impact of developments on the significance of listed places.

Planning controls specific to East Epping, Essex Street and Rosebank Avenue HCAs are contained with *Part 9.3 Heritage Conservation Areas*. This part of the DCP provides the Statements of Significance outlining the key heritage aspects of each HCA supported by explanatory information on the history and description of each HCA. In addition, prescriptive measures are also included which contain controls for demolition, streetscape character, materials and finishes, fences and gates, utilities, garages and carports, driveways, and subdivision. Furthermore, *Part 9.4.1 Development in the Vicinity of Heritage Item* provides controls for development to land that is adjoining, or across the road from a heritage item or a heritage conservation area.

In consideration of recently approved developments in line with the rezoning of the respective sites and the reassessed significance of each HCA within this study, the current planning controls relating to heritage have need to be reviewed to evaluate if the current planning controls provide adequate protection for the established heritage significance of heritage items and HCAs in the Epping Town Centre Area.

Specific matters for review were also outlined as part of the scope of works for this study by City of Parramatta Council, these included a review of Section 9.4.1 of the Hornsby DCP 2013, potential height increases for R4-High Density Residential Zone and R3-Medium Density Residential Zones, the extension of the existing R3-Medium Density Residential Zone to encompass Brigg road and Rose Street, individual property zoning changes if removed from a HCA and any other updates to the current planning controls not addressed in the aforementioned list. Each of these matters are addressed in the below subsections, with recommendations given for any changes to the existing planning controls which relate to the Epping Town Centre area.

11.2 Hornsby DCP 2013, Section 9.4.1 Review

An investigation of the effectiveness of the current design interface guidelines (Section 9.4.1) and other relevant provisions in the Hornsby DCP is necessary in order to mitigate the effects of development on the character and integrity of the East Epping, Essex Street and Rosebank Avenue HCAs. As part of this investigation, regard has been given to the topography of each of the HCAs and recently approved Development Applications at the interface with HCAs have also been reviewed in Section 9.0, in order to develop a holistic view of the impact that medium and high density residential development is having on these HCAs.

A review of the existing Hornsby LEP and DCP guidelines are investigated in the following sections, with reference to recently approved developments in the interface areas with the East Epping, Essex Street and Rosebank Avenue HCAs, as outlined in Section 9.0.

¹¹ *Hornsby Development Control Plan 2013*, 9-3.

11.2.1 Existing Guidelines

Section 9.4.1 of the Hornsby DCP 2013 provides controls for the development on land that is adjoining, or across the road from a heritage item or a heritage conservation area. The current guidelines encourage "New work that is sympathetic to the heritage significance of nearby heritage items, or adjoining heritage conservation area and their settings". The following is stated in Section 9.4.1 regarding to development in the vicinity of a Heritage item or Heritage Conservation Areas.

Heritage Items

- a. Design and siting of new work should complement the form, orientation, scale and style of the heritage item.
- b. Adequate space should be provided around the heritage item to allow for its interpretation.
- c. Development should maintain significant or historic public domain views to and from the heritage item.
- d. Original or significant landscape features that are associated with the heritage item and which contribute to its setting should be retained.
- e. For rural heritage items, the scale of new work is not to overwhelm the heritage item taking into consideration the matters within the Rural Heritage Items element.

Heritage Conservation Areas

- f. Development in the vicinity must respect the curtilage and setting of the HCA and protect views into and from the HCA.
- g. Development is to be sympathetic to the primary characteristics and heritage values of the HCA with regards to proposed:
 - context, including backdrop to places in the HCA;
 - bulk, height alignment form and roofline of new development;
 - proportions such as windows and door openings (number and location) and balconies;
 - Interface facade materials, treatments and palette;
 - Compatible fencing and screening.
- h. Development applications for multi-unit developments adjacent to HCAs must include a construction impact report demonstrating that the construction process will not detrimentally or indirectly adversely impact places in the HCA at the time of construction or over time.

The existing guidelines contained within Section 9.4.1 of the Hornsby DCP should encourage sites adjoining a heritage conservation area or heritage item to be sympathetic to the heritage significance of the area. This includes ensuring an appropriate context for the heritage conservation area, through preventing inappropriate and unsympathetic surrounding developments from detracting from the significance of the heritage conservation area and its setting.

11.2.2 Recent Development Application Response to DCP Controls

Recent developments surrounding the East Epping, Essex Street and Rosebank Avenue HCAs do not appear to have adequately addressed the provisions of Part 9.4.1 of the DCP due to their nature of built form resulting from the rezoning of the subject interface areas.

The recent approved developments within the interface areas of the East Epping, Essex Street and Rosebank Avenue HCAs are visually explored in Section 9.0. Of the developments approved surrounding the East Epping HCA, all developments are located at the very south-western corner of the HCA, where the R4 - High Density Residential Zone was implemented following the Epping Town Centre Urban Activation Precinct (UAP) Plan's new zoning. A total of five (5) development applications have been lodged since the new zoning was implemented, with a total of four (4) of the five (5) DA's being for amalgamated sites. The recent approved developments surrounding the Essex Street HCA are located along the western border of the Essex Street HCA area, between Epping and Maida Roads. As with the East Epping HCA, the properties located within this section of Epping were rezoned to R4 - High Density Residential and R3 - Medium Density Residential Zones following the Epping Town Centre UAP Plan. A total of ten (10) DA's have been lodged since 2014, with a total of nine (9) of the ten (10) developments being for amalgamated sites.

Finally, the approved developments surrounding the Rosebank Avenue HCA are located to the south, and very south-eastern and western corners of the Rosebank Avenue HCA. The Epping Town Centre UAP Plan resulted in the Rosebank Avenue HCA being surrounded on its southern side by a R4 - High Density Residential Zone. Since 2014, six (6) developments applications have been lodged, with all applications being for amalgamated lots.

Following the site inspections of multiple properties within each of the three HCAs, which were located on the interface zones with R4 and R3 developments, the majority of the developments located in these interfaces areas, particularly those located at the rear of HCA properties, were not sympathetic to the context and setting of the HCA.

The visual and physical impact of High Density Residential developments which have either been completed or are under construction at the rear of these properties in most cases did not include sufficient setback, screening or deep soil planting, to alleviate the scale and bulk of the development.

The biggest impact of these developments has been on individual properties themselves. From the streetscape, the recent high density residential developments do mostly recede into the background of the edges of the HCA, however, their impact on the HCAs is still not considered to be considerably sympathetic to the setting and context of each of the areas, as explored in Section 9.0 and analysed in Section 10.0.

Section 9.4.1 of the Hornsby DCP 2013, needs to be understood in conjunction with Sections 9.6.6 - Setbacks and 9.6.8 - Landscaping, at a minimum to be able to adequately address the current impact that recently approved high density residential developments are currently exerting on properties within the boundaries of the East Epping, Essex Street and Rosebank Avenues HCAs. In addition, consideration of the impact on the heritage significance of HCAs and/or heritage Items, need to be sufficiently addressed by development proposals. For some recently approved developments, the consideration of the impact upon the heritage significance of either a HCA, or a Heritage Item provided only a brief one paragraph explanation as to the impact on the heritage significance of the area of item. Such minimal consideration as to the impact of a large high density residential development is not considered to adequately address the impact that the development will have on an area or item of heritage significance. A discussion of each of these components are included below.

Setback

Section 9.6.6 of the Hornsby DCP provides for the following minimum setbacks in Residential Area, in Table 9.6.6(a):

Table 9.6.6(a):
Minimum Setbacks - Residential Area

Setback	Minimum building setback
Front Boundary	12m, which can be reduced to 10m for a maximum of 1/3 of the building width.
Rear Boundary	10m, which can be reduced to 8m for a maximum of 1/3 of the building width.
Side Boundary (including balconies)	6m, which can be reduced to 4m for a maximum of 1/3 of the building width.
Fifth Storey Setback	3m should be provided between exterior walls of the lowest storey and exterior walls of the fifth storey.
Fifth storey setback where mezzanine proposed	6m additional setback for exterior walls of the fstorey, measured from the walls of the lowest storey.
Basement Parking Setback	9m from front and rear boundaries and 4m from side boundaries to allow for deep soil landscaping.

Whilst a minimum of 10m is required at the rear boundary, this setback can be reduced to only 8m for a maximum of 1/3 of the buildings width. From a survey of some of the approved development assessments, it was evident that some of these developments have been able to encroach further than the 8m setback dictated by the above provisions, through the addition of balconies into the minimum setback.¹² The additional encroachment of the high density residential development into the minimum 8m setback results in both a physical and visual overwhelming impact on the adjacent individual property.

Whilst it is noted in Section 9.6.6 that 'development involving or adjoining heritage items should have regard to the Heritage DCP', the achievement of not even the minimum setback for the interface areas with HCAs do not appear to be in keeping with the guidelines of the Hornsby DCP.

Instead of meeting the absolute minimum requirements for setbacks for rear and side boundaries, additional setback, such as the blanket 10m setback which is required for Chapman Avenue, should be encouraged, in order to aid in maintaining the context and setting of each of the HCAs, and minimise impact on the adjoining individual properties within the HCAs.

Deep Soil Planting

Section 9.6.8 of the Hornsby DCP provides provisions for landscaping, of particular focus here is the provisions for deep soil planting, in order to aid in a sympathetic transition from HCA and/or Heritage Item to high density residential development. The following provisions are stated within Section 9.6.8 in relation to the deep soil planting:

- b. Landscaped areas should adjoin property boundaries, in accordance with Table 9.6.8(a), and be designed to accommodate:
- Canopy trees that will reach mature heights of at least 10 to 12 metres in the front and rear setback, and
 - Trees that will reach a mature height of at least 6 to 7 metres in the side setbacks.

Table 9.6.8(a): Deep Soil Landscaped Areas

Setback	Property Boundary Landscaped Area (deep soil)
Front Boundary	7m wide
Secondary Boundary (on corner lots)	4m wide
Rear Boundary	7m wide
Side Boundary	4m wide

A dominant feature in each of the East Epping, Essex Street and Rosebank Avenue HCAs is their landscape settings, whether it be street planting, front or rear gardens or verge planting. Many mature trees, which are contemporary with each of the area's period of development, from the Federation, Inter-War and Post War periods are still extant, and contribute significantly to the context and setting of each of these HCAs. The landscaped settings of these HCAs should be conserved and maintained and enhanced through development which lay adjacent to each of these HCAs, not only to ensure the continuation

¹² For example, DA/327/2015 at 20-24 Epping Road, which lies to the rear of properties on the western side of the Essex Street HCA.

of their landscaped setting, but also to alleviate the physical and visual impact of the high density residential development may have on the single and two storey dwellings, which are within the HCAs.

Heritage Management Documents

In order to sufficiently assess whether a proposed development which is located in the vicinity of a HCA or a Heritage Item will result in an acceptable impact upon the context and setting of the area or item, it may be necessary for the consent authority, Parramatta City Council, to require a heritage management document to be prepared that assesses the extent to which the carrying out of the proposed development would affect the heritage significance of the heritage item or heritage conservation area concerned, as stipulated in Part 5.10(5) of the Hornsby LEP 2013. Some of the recently approved development applications did include a heritage management document, such as a Heritage Impact Statement (Statement of Heritage Impact), whilst others only included a short paragraph within a Statement of Environmental Effects which assessed the impact on the effected Heritage Conservation Area and/or Heritage Item. Such heritage management documents should be sufficiently assessed by the consent authority to determine if the proposed development will or will not result in a negative or positive impact upon nearby HCAs or Heritage Items. Through a thorough assessment of the impact of high density residential development on a HCA or Heritage Item, a more sympathetic solution to a development could be arrived at, alleviating some of the issues which are currently being experienced by property owners at the interface areas with high density residential development and further ensuring the setting and curtilage of the area for item is retained and conserved for the future.

11.2.3 Recommendations for Section 9.4.1

The existing guidelines for development in the vicinity of a HCA in Section 9.4.1 of the Hornsby DCP 2013 does currently provide a good framework from which to assess the impact of high and medium density residential developments which are located in interface areas with HCAs. However, consideration of Sections 9.6.6 and 9.6.8 of the Hornsby DCP 2013 need also to be particularly considered in the assessment of high density residential developments in the vicinity of HCAs or Heritage Items.

It is recommended that where R3 and R4 Zones interface with a HCA or a Heritage Item that a 10m setback, which is required for Chapman Avenue, be implemented in order to aid in maintaining the context and setting of each heritage conservation areas and items. In addition, sufficient deep soil planting between R3 and R4, and HCAs and Heritage Items should be encouraged, as well as the retention of any mature trees which aid in screening the high or medium density development from the heritage conservation or heritage item.

The assessment of development applications within these interface areas needs to be rigorous, in order to take into account the heritage significance of the area or item it will affect, with any potential impacts needing to be adequately addressed in order to minimise the negative impacts experienced by the heritage conservation area or the heritage item.

11.3 Potential Impacts of Height Increases to HCAs

As part of the brief for this heritage review, a request for any investigation of the impact and implications of increasing the 17.5m and 12m height limits by one storey in the R4 High Density Residential Zone and R3 Medium Density Residential Zone on the integrity and conservation values of the Essex Street, Rosebank Avenue and East Epping HCAs was made.

In consideration of the existing impacts of high and medium density residential development on the interface areas with East Epping, Essex Street and Rosebank Avenue HCAs, the possibility of increasing the current height limits of R4 High Density Residential Zones and R3 Medium Density Residential Zones by one storey, would further negatively affect the current context and setting of each of the HCAs.

Whilst it has been acknowledged in this study that the high and medium density developments which are either completed, currently under construction or to be constructed mostly recede into the backdrop of each of the HCAs, in general, they do not overwhelm or adversely impact on the setting of the HCAs. An increase in the height limits of these zones would further increase the visibility of the high and medium density residential developments in the background of the HCAs. Whilst not a heritage issue, the impact upon individual property owners which share a boundary with these high and medium density developments, would likely experience further privacy and overwhelming dominance issues. An increase to the existing height limits of these zones would exacerbate the existing negative impacts upon both the East Epping, Essex Street and Rosebank Avenue HCAs and upon individual property owners.

Thus, it is recommended that the existing height limits of 17.5m and 12m are retained for R4-High Density Residential Zones and R3-Medium Density Residential Zones, respectively.

11.4 R3 Medium Density Residential Zone in Brigg Road and Rose Street

In addition to the consideration of height increases to R4-High Density Residential Zones and R3-Medium Density Residential Zones, the investigation also included the implications of extending the R3-Medium Density Residential Zone to the northern side of Briggs Road and all of Rose Street, as indicated in Figure 80.

During the site inspections conducted in March 2017, this area was also surveyed to ascertain the current condition and setting of both Brigg Road and Rose Street. From this inspection, it was noted that the majority of buildings within both of these streets comprised of a Post War, Late 20th Century and 21st Century dwellings, of either single or double storeys. The northern side of Brigg Road slopes down toward the north, the southern side of Brigg Street sloping up. Rose Street continues on the downward trajectory of the slope from Brigg Street, with the dwellings located in the area sitting low within their sites, as seen in Figure 81.

Some medium density residential developments are already under construction or completed along Maida Road, where the existing R3-Medium Density Residential Zone exists. One complete development, located at 18-22 Maida Road, is three storeys in height and lies to the rear of 70 and 72 Essex Street. The height of this three storey development does not negatively impact upon the current setting and curtilage of the Essex Street HCA, due to the height limit of the zoning being 12m and the incorporation of sufficient setbacks, further coupled with mature trees and plantings at the rear of both 70 and 72 Essex Street, as displayed in Figure 82.

Thus, it is considered that the implementation of a R3-Medium Density Residential Zone to the northern side of Brigg Road and to Rose Street will have an acceptable impact upon the current setting and of the Essex Street HCA, provided that consideration is given to sufficient setback, deep soil planting, and the impact upon the setting and curtilage of the Essex Street HCA is adequately addressed in any future development proposals, incorporating the recommendations, already made in Section 11.2. The topography of the area will aid in reducing the perceived overall height of medium density development and coupled with sympathetic design, will ensure that the integrity, setting and character of the Essex Street HCA is retained. Implementation of the above recommendations will ensure an appropriate transition from R2 to R3 zones.

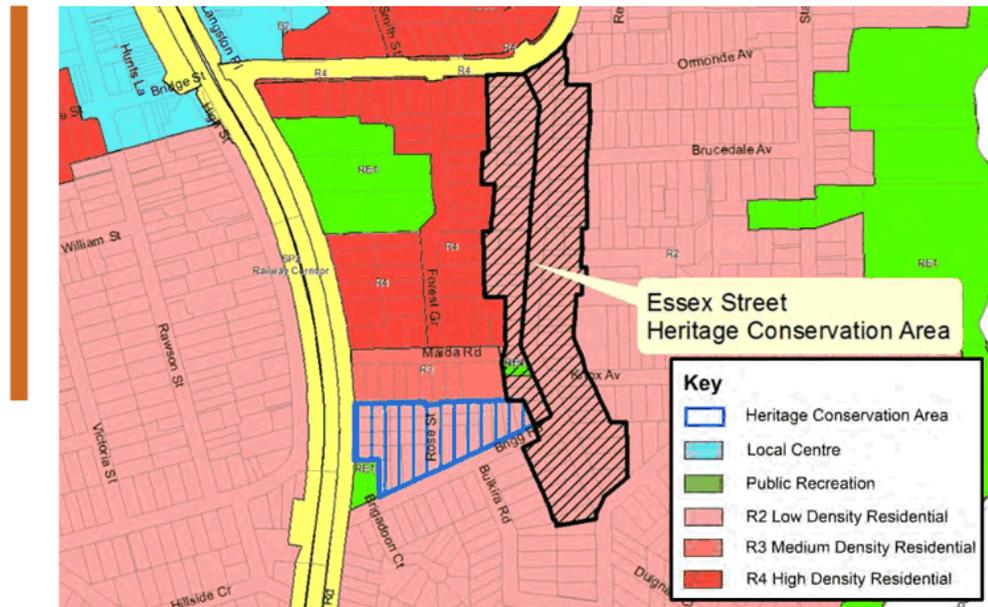

Figure 80: Extract from Epping Town Centre Composite Zoning and Heritage Conservation Area map with proposed extension of R3 Medium Residential Zone on Rose Street and Brigg Road highlighted in blue (Source: Amended Epping Town Centre Composite Zoning and Heritage Conservation Areas map, supplied by City of Parramatta Council)

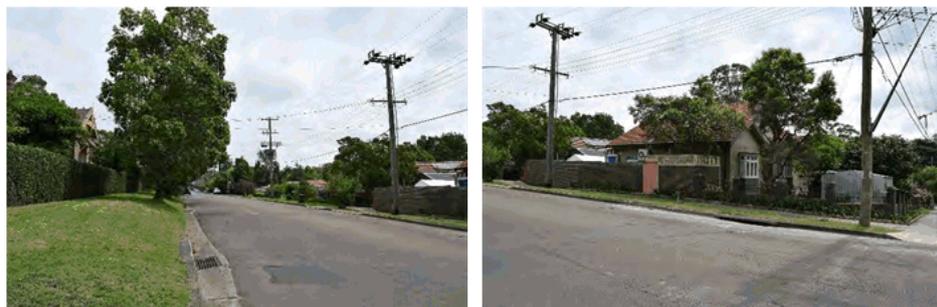

Figure 81: View looking west along Brigg Road from intersection with Essex Street. In the right image is a Heritage Item with the Essex Street HCA and in the right image is a Neutral building with the Essex Street HCA. From the left image, it can be seen that the dwelling located on the northern side of Brigg Road lay within their lots due to the topography of the area.

Figure 82: Recently constructed medium density residential development constructed at 18-22 Maida Road, view from intersection of Essex Street and Maida Road looking west (left) and view from 72 Essex Street looking west, with a small portion of the third storey of the 18-22 Maida Road development is visible in the background.

11.5 Individual Properties Changes

No recommendation has been made for the removal of any properties from either the Essex Street HCA or Rosebank Avenue HCA, thus no changes are needed to the current zoning and height limits of the existing controls. However, it has been recommended that four properties to be removed from the East Epping HCA, being 25 Pembroke Street, and 1, 3, and 3A Norfolk Road.

In order to provide a consistent transition between R4-High Density Residential Zone on Essex Street and Pembroke Street from further encroaching on the East Epping HCA, the removed properties from the East Epping HCA (25 Pembroke Street, and 1, 3, and 3A Norfolk Road), 5, 7 and 7A Norfolk Road (which share a driveway with 3 and 3A Norfolk Road) and the Late 20th Century development known as 'Rockleigh Park' are recommended to be rezoned as R3-Medium Density Residential Zone with a 12m height limit, in order to provide a smooth transition from the R2-Low Density Residential Zone of the HCA and the R4-High Density Residential Zone of Essex and Pembroke Streets. In addition, any new developments on these rezoned properties must sufficiently consider appropriate setbacks, deep soil planting and consideration of the impact upon the setting and curtilage of the East Epping HCA and nearby Heritage items. The recommendations already made in Section 11.2 should also be adequately addressed in any future development proposals.

The inclusion of 5, 7 and 7A Norfolk Road in the recommended R3-Medium Density Residential Zoning is suggested in order to ensure a consistent transitional zone between the boundary of the East Epping HCA and the R4-High Density Residential Zone on Essex Street. The properties located at 3, 3A, 5, 7 and 7A Norfolk Road all share the same driveway, however, currently only 3 and 3A Norfolk Road are located within the East Epping HCA. With the recommended removal of 3 and 3A Norfolk Road from the East Epping HCA, the opportunity is presented to ensure that a consistent approach to zoning and height limits is invoked over the properties which share the singular driveway from Norfolk Road, these properties being 3, 3A, 5, 7 and 7A Norfolk Road. All properties are currently within a R2-Low Density Residential Zone and are recommended to be rezoned to R3-Medium Density Residential Zoning to ease the transition between the R2-Low Density Residential Zone of the East Epping HCA and the R4-High Density Residential Zone on Essex Street.

In addition, the inclusion of all properties located within 'Rockleigh Park' in the recommended R3-Medium Density Residential Zoning is recommended due to the current R4-High Density Residential Zone not providing an adequate transition between the interface areas of the East Epping HCA and areas of R4 High Density Residential Zones. The current zoning effectively splits 'Rockleigh Park' in half, and is not considered appropriate for the current conditions of the properties which work homogeneously together as one estate of low density residential housing as displayed in Figures 84 and 85. Through the rezoning of 'Rockleigh Park' as R3, both the transition between R4 and the East Epping HCA will be minimised, whilst also maintaining the current cohesive form of 'Rockleigh Park'.

Figure 84: Views looking west (left) and east (right) along Rockleigh Way. The development is currently understood as one whole estate, wide a narrow roadway which links all properties of the estate together. The estate appears to have been developed in the mid 1990s and maintains a cohesive character, playing-off detailing from Federation period detailing of the surrounding Federation period homes within the East Epping area.

Figure 85: Entrance to 'Rockleigh Park' (left) and view looking east along Rockleigh Way (right)

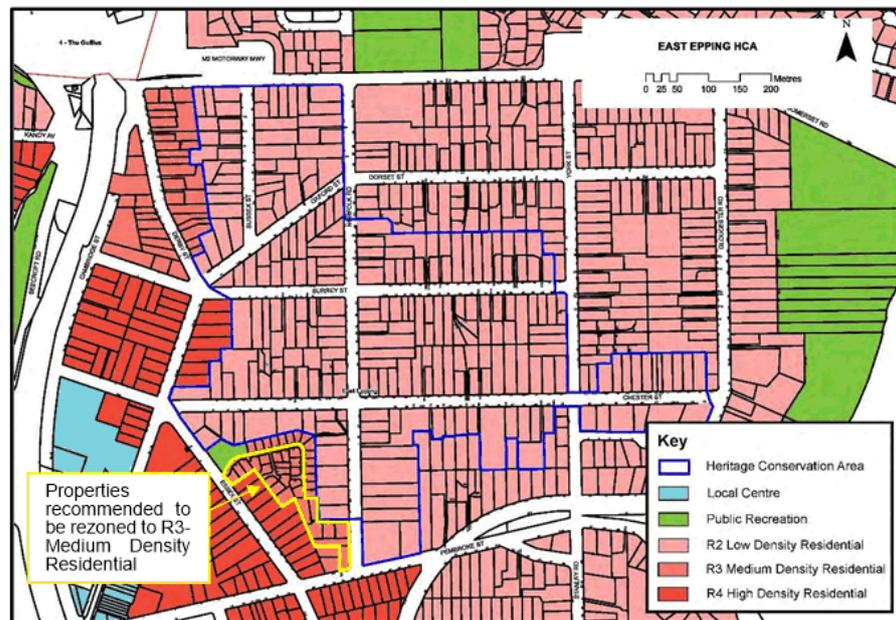

Figure 83: Recommended Land Zoning of properties removed from East Epping HCA (25 Pembroke Street, 1, 3 and 3A Norfolk Road), 5, 7 and 7A Norfolk Road and rezoning of Rockleigh Park to create a consistent transitional zone between the East Epping HCA and R4 High Density Residential Zone.

11.6 Recommended Updates to Planning Controls

Whilst a detailed review of all current planning controls relevant to heritage items and HCAs within the Epping Town Centre study area is beyond the scope of this study, this review has indicated there is some room for improvement in the current planning controls, other than those individual matters already addressed in the previous subsections. The following subsections make recommendations to the current planning controls.

11.6.1 Additional Prescriptive Measures

Specific additional prescriptive measures for each HCA are provided for in Section 9.3 of the Hornsby DCP. These provisions provide for prescriptive measures in relation to demolition, streetscape character, materials and finishes, fences and gates, utilities, garages and carports, driveways and subdivision.

As addressed in Section 10.0, the impact of high density residential development on some properties in the Essex Street and Rosebank Avenue HCAs have resulted in some properties being impacted upon through a lack of privacy from existing or future high density residential developments. For properties which are on a direct boundary line with R4 High Density

Residential Zone, additional provisions are recommended to be included in the 'Additional Prescriptive Measures' for Essex Street and Rosebank Avenue HCAs within Sections 9.3.13 and 9.3.14 respectively. The recommended provisions to be added is to allow for the construction of two storey additions to the rear of properties identified to be most affected by high density residential development as highlighted in Figures 86 and 87.

The current provisions contained within Section 9.3 of the Hornsby DCP 2013, in respect to additions to properties located within a heritage conservation area, allows for additions to properties to be made away from the street elevation and below the main ridge line. In order to assist in alleviating the impact of the high density residential developments, located behind the effected properties within the Rosebank Avenue and Essex Street HCA's, an intermediary two storey addition to the rear of properties would provide a sufficient barrier between the existing contributory dwellings in the HCAs and the high density residential development to the rear. Any addition to the rear of the properties highlighted in Figures 86 and 87, however, would still need to comply with the heritage provisions contained within the Hornsby DCP 2013, with particular attention to ensuring that the addition does not subdivide the site, does not reduce the contribution of the overall properties contribution to the respective HCA, will not remove mature trees or plantings and will not reduce the streetscape character of the area. The intervention of any addition to the rear of these properties must be sympathetic to the heritage significance of its respective HCA and any heritage item located within its vicinity.

Whilst this option may not be attainable on all sites highlighted in Figure 86 and 87, it does provide an option for some property owners to attain an increased level of amenity. Thus, it is recommended that the following 'Additional Prescriptive Measure' be added to the existing Essex Street HCA Provisions and Rosebank Avenue HCA Provisions under Element - Streetscape Character, in Tables 9.3.13(a) and 9.3.14(a), respectively.

- Additional development in the rear of properties with direct interface to High and Medium Density Residential Zones can develop up to two storey additions, provided that the addition will not subdivide the site, reduce the contribution of the property to the HCA, will not remove mature trees or plantings and will not reduce the streetscape character of the area.

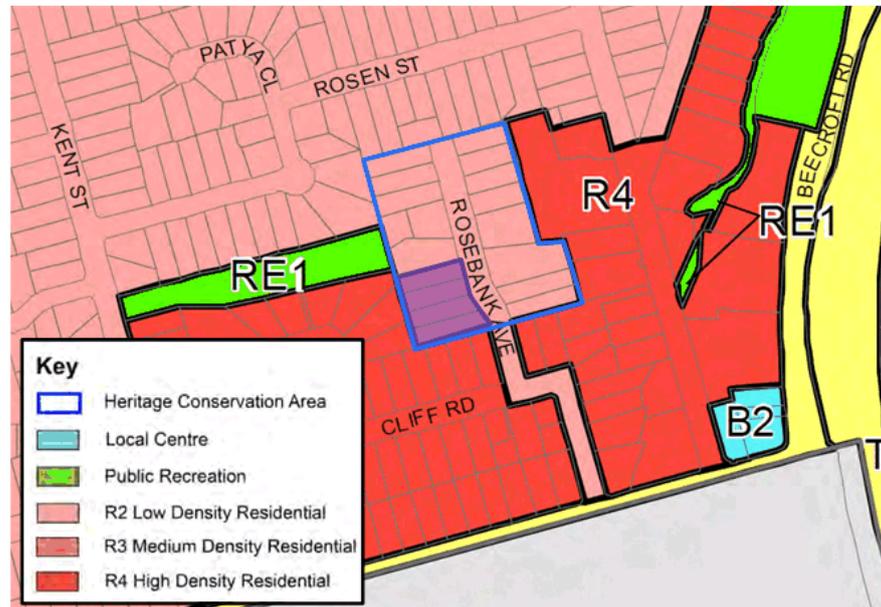

Figure 86: Rosebank Avenue HCA properties affected by high density residential development, of which the recommended provisions would apply, highlighted in purple (Source: Extract from Hornsby LEP 2013, Land Zoning Map 11)

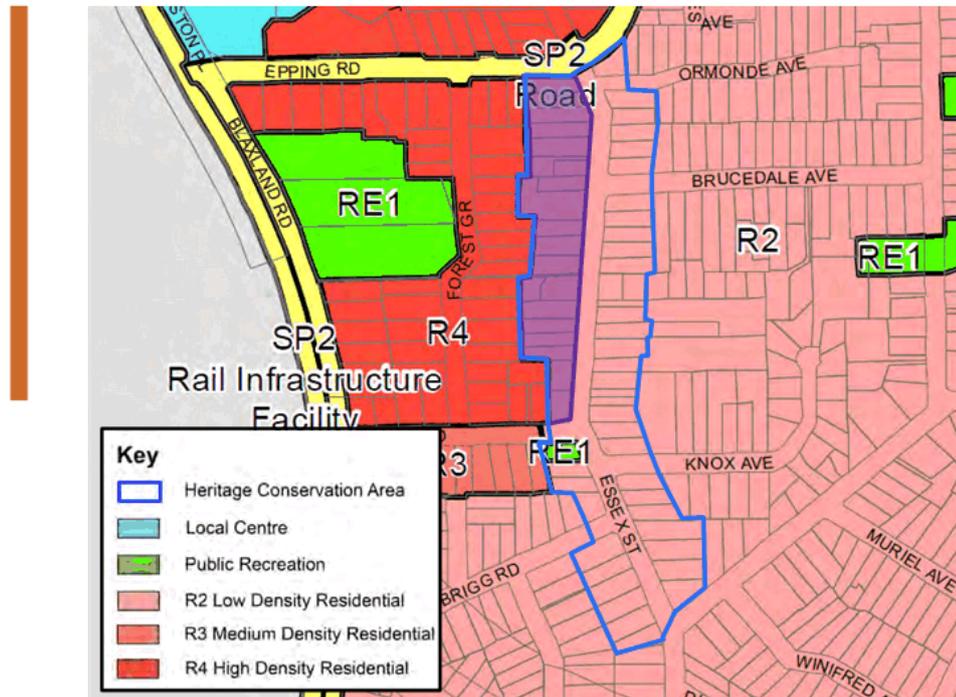

Figure 87: Essex Street HCA properties affected by high density residential development, of which the recommended provisions would apply, highlighted in purple (Source: Extract from Hornsby LEP 2013, Land Zoning Map 11)

11.6.2 Recording and Interpretation

Currently, there are no provisions within the Hornsby DCP 2013 for the preparation of an archival recording for heritage items or contributory buildings within a HCA to have an archival recording prepared prior to the major alterations and additions to a property or demolition of a property.

It is recommended that an archival photographic recording be prepared for all Heritage Items and Contributory buildings and any Neutral buildings which date from the Victorian, Federation, Inter War or Post War periods within the East Epping, Essex Street and Rosebank Avenue HCA's when major alterations and additions and/or demolition is proposed for the property. This also includes any major alterations and additions to significant gardens which significantly contribute to the streetscape character of any of the HCAs.

This recommendation is made in order to ensure that a historical record of changes to significant items and areas are collected and kept in the Council's archives for future reference and research purposes.

12. Conclusion and Key Recommendations of Heritage Conservation Area Review

As a result of in depth surveys and assessments of the HCAs within the Epping Town Centre, the following key recommendations are made as part of this heritage review study:

1. *Retain the current boundaries of the Essex Street and Rosebank Avenue Heritage Conservation Areas (Refer to Sections 10.2 and 10.3)*
 - Following reassessment of the Essex Street and Rosebank Avenue Heritage Conservation Areas, both areas were found to have maintained the significance and intactness established in previous studies. The impact of High and Medium Density Residential development at the interface areas with the Heritage Conservation Areas were not found to have a detrimental impact warranting removal of the Heritage Conservation Areas in part or in whole. Thus, both Heritage Conservation Areas are recommended to be retained in full.
2. *Adjust the south-west boundary of the East Epping Heritage Conservation Area (Refer to Section 10.1)*
 - It is recommended that 25 Pembroke Street, and 1, 3, and 3A Norfolk Road to be removed from the East Epping Heritage Conservation Area, and the boundaries of the HCA are adjusted accordingly.
3. *Retain individual heritage items requested for removal by property owners (Refer to Sections 10.1 and 10.2)*
 - 3 and 42 Essex Street have been reassessed for their heritage significance and contribution to their respective Heritage Conservation Area, East Epping and Essex Street respectively, and are recommended to retain their heritage listing under Schedule 5 of the Hornsby LEP 2013.
4. *Rezone removed properties from East Epping Heritage Conservation Area, 5, 7 and 7A Norfolk Road and identified properties within 'Rockleigh Park' to R3-Medium Density Residential with 12m height limit (Refer to Section 11.5)*
 - In order to provide a consistent transition between R4-High Density Residential development on Essex Street and Pembroke Street from further encroaching on the East Epping Heritage Conservation Area, the removed properties from the East Epping Heritage Conservation Area (25 Pembroke Street, and 1, 3, and 3A Essex Street), 5, 7 and 7A Norfolk Road (which share a driveway with 3 and 3A Norfolk Road) and the late 20th Century development known at 'Rockleigh Park' are recommended to be rezoned as R3-Medium Density Residential with a 12m height limit, in order to provide a smooth transition from the R2-Low Density Residential of the Heritage Conservation Area and the R4-High Density Residential area of Essex and Pembroke Streets.
5. *Changes to Design Interface Guidelines of the Hornsby DCP (Refer to Section 11.2.3)*
 - The current Design Interface Guidelines in Section 9.4.1 of the Hornsby DCP 2013 are considered to be a good framework for which to assess the impact of high and medium density residential developments which are located in the interface areas with Heritage Conservation Areas. However, Section 9.4.1 needs to be considered at least in relation to Sections 9.6.6 and 9.6.8. It is recommended that where R3 and R4 Zones interface with a Heritage Conservation Area or Heritage Item that a 10m setback, which is required for Chapman Avenue, should be implemented in order to aid in maintaining the context and setting of each Heritage Conservation Area and Item. In addition, sufficient deep soil planting between R3 and R4 and heritage conservation areas and items should be encouraged, as well as the retention of any mature trees which aid in screening the high or medium density development from the heritage conservation area or heritage item. Furthermore, an adequate assessment of the potential heritage impact on the Heritage

Conservation Area and/or Heritage item should be addressed for any future proposed development, to aid in the mitigation of likely heritage impacts.

6. *Maintain current 17.5m and 12m height limits of R4 High Density Residential Zone and R3 Medium Density Residential Zone respectively (Refer to Section 11.3)*

- To ensure that a sufficient transition between Heritage Conservation Areas are maintained and are not further adversely impacted upon through higher density development at interface areas, it is recommended that the current height limits for R4 and R3 Zones are maintained.

7. *Extend R3-Medium Density Residential Zone to Brigg Road and Rose Street (Refer to Section 11.4)*

- Recommendation to extend R3-Medium Density Residential Zone to the northern side of Brigg Road and to Rose Street, which will have an acceptable impact upon the current setting of the Essex Street HCA, provided that adequate consideration is given in regards to sufficient setback, deep soil planting and on the impact upon the setting and curtilage of the Essex Street HCA in any further development proposals, incorporating the recommendations provided in Section 11.2 of this study report.

8. *Additional Recommended Updates to Planning Controls (Refer to Section 11.6)*

- Include an additional prescriptive measure for Essex Street and Rosebank Avenue HCA Provisions for properties located on interface with R4-High Density Residential Zone, as follows:
 - i. Additional development in the rear of properties with direct interface to High and Medium Density Residential Zones can develop up to two storey additions, provided that the addition will not reduce the contribution of the property to the HCA, will not remove mature trees or plantings, and will not reduce the streetscape character of the area.
 - ii. In addition, it is recommended that a provision or Condition be included in the consents for an archival photographic recording to be prepared for all Heritage Items and Contributory buildings and any Neutral buildings which date from the Victorian, Federation, Inter War or Post War periods within the East Epping, Essex Street and Rosebank Avenue HCA's when major alterations and additions and/or demolition is proposed for the property.

9. *Assessment of significance of southern end of Essex Street HCA in future Heritage Review*

- Recommended that future heritage reviews, possibly as part of the new Local Environmental Plan to be developed for the City of Parramatta Council, consider assessing the southern end of the Essex Street HCA, for either extending the HCA's boundary, or for an arboricultural assessment to be undertaken for the possibility of listing the street trees as a landscape items.

10. *Retention or replacement of street trees in Rosebank Avenue due to stormwater drainage for Cliff Road*

- Recommended for the seven (7) street trees located on the western side of Rosebank Avenue identified to be impacted by the proposed stormwater drainage from Cliff Road to be maintained, or if this is not possible, that appropriate replacement trees be planted in the road reserve to ensure that the consistent street tree plantings of Rosebank Avenue are maintained.

13. Hornsby Heritage Review Stage 6 - Items for Review

13.1 Background

The Heritage Review Stage 6 - Items for Review is part of a process commenced in 1995 to review heritage listings in Schedule 5 of the Hornsby LEP 2013 (previously Schedule D of the Hornsby LEP 1994). The review process was expanded to allow a staged program to thoroughly review items, including further requests for inclusion or removal of items. Previous Heritage Reviews have been conducted since 1997, as follows:

- *Hornsby Shire Heritage Review Stage 1 - Review of heritage items and correction of anomalies within existing listings (1997);*
- *Hornsby Shire Heritage Review Stage 2 - Review of heritage items and correction of anomalies within existing listings (1998);*
- *Hornsby Shire Heritage Review Stage 3 - Review of Heritage Items (2004) prepared by Tropman & Tropman Architects;*
- *Hornsby Shire Heritage Review Stage 4 - Review of heritage items, heritage listed trees and correction of anomalies within existing listings (2008) prepared by LandArc Pty Limited in association with Patrick O'Carrigan + Partners; and*
- *Hornsby Shire Heritage Review Stage 5 - prepared by Godden Mackay and Logan.*

This section of the report provides for Stage 6 of the Heritage Review, and includes heritage listed dwellings, gardens and woodlands. A number of items had been flagged by Hornsby Council, property owners and community members for either removal from Schedule 5 or for inclusion on Schedule 5. A number of other heritage items' inventory forms need to be updated or inventory forms are completely missing. In addition to these requests, further heritage items have been requested by Council to be reviewed as a result of the recent changes in zoning, where they intersect with R4-High Density Residential Zones.

13.2 Objectives

The Heritage Review Stage 6 - Items for Review, has the following objectives:

- Investigate the list of matters identified by Hornsby Shire Council for Epping that were scheduled for review under the next Hornsby Council Heritage Review – Stage 6. This includes:
 - a) removal heritage items.
 - b) amend anomalies in details of heritage listings.
 - c) review isolated heritage items in the R4 High Density Residential Zone.
 - d) review details of heritage listings.
 - e) investigate missing inventory sheets for existing items and complete required information.

13.3 Methodology

This Heritage Review has been prepared in accordance with the best practice heritage standards for the assessment of heritage significance and heritage studies established by the NSW Heritage Council, the then NSW Heritage Office and NSW Department of Urban Affairs and Planning, as set out in the NSW *Heritage Manual*.

It has also been prepared in accordance with national best practice standards for heritage assessment contained in the Burra Charter (Australia ICOMOS, 2013). The Burra Charter defines significance as the:

"Aesthetic, historic, scientific, social or spiritual value for past, present or future generations. Cultural significance is embodied in the place itself, its fabric, setting, use,

associations, meanings, records, related places and related objects. Places may have a range of values for different individuals or groups."

To determine whether sites have heritage significance and therefore warrant heritage listing, each site has been assessed against the seven NSW criteria of Assessing Heritage Significance as set out in the NSW *Heritage Manual*. The seven criteria for heritage significance include:

Criterion (a): An item is important in the course, or pattern, of NSW's cultural or natural history (or the cultural or natural history of the local area);

Criterion (b): An item has strong or special association with the life or works of a person, or group of persons, of importance in NSW's cultural or natural history (or the cultural or natural history of the local area);

Criterion (c): An item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the local area);

Criterion (d): An item has strong or special association with a particular community or cultural group in NSW (or the local area) for social, cultural or spiritual reasons;

Criterion (e): An item has potential to yield information that will contribute to an understanding of NSW's cultural or natural history (or the culture or natural history of the local area);

Criterion (f): An item possesses uncommon, rare or endangered aspects of NSW's cultural or natural history (or the cultural or natural history of the local area);

Criterion (g): An item is important in demonstrating the principal characteristics of a class of NSW's cultural or natural places or environments.

The NSW *Heritage Manual* guidelines establish that a site warrants heritage listing when it fulfils one or more of these seven criteria of local heritage significance. The assessment process is the same for individual items, conservation areas and archaeological sites.

All buildings recommended for heritage listing have been categorised according to their architectural style and detailing in accordance with Apperly, R. Irving, R, Reynolds, P. 1989. *A Pictorial Guide to Identifying Australian Architecture: Styles and terms from 1788 to the present*. Harper Collins Publishers; Australia.

13.4 Inventory Forms

The format for the Inventory Forms used are in Microsoft Word format, based upon the State Heritage Inventory form template. Each inventory form compiles and summarises all the information about each item, including but not limited to: heritage significance, location, description of overall site components and a brief history for each of the items to support their listing recommendations.

The Microsoft Word format Inventory Forms can be readily transferred to the SHI Microsoft Access Database format by the Council in the future. All inventory forms created or updated within this Heritage Review are provided in Appendix A.

13.5 Items for Review

The following tables summarise the outcomes of the individual property assessments and recommendations. In addition, inventory forms have been either updated or created for property either missing information or for those which have been recommended for listing. The Inventory forms are provided in Appendix A.

13.5.1 Requests for Removal of Heritage Listing

The following properties have been requested for removal and have been re-assessed to determine if removal is warranted or not.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.1A	184 Ray Road, Epping	House		+	Retain on LEP. Inventory Form has been prepared in Appendix A.

13.5.2 Amend Anomalies in Details of Heritage Listings

The following property's zoning has been requested to be investigated.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
N/A	73A Oxford Street Epping	Federation Queen Anne house		Council staff Site is in HCA which is zoned R2, however, this property is zoned R3. Appears to be an anomaly as on the corner of HCA. Potential for redevelopment on heritage grounds is nil due to significance and integrity of the item. The zoning to manage this significance should reflect HCA R2 zoning. It is not an isolated site.	Recommend to change R3 zoning to R2 to reflect the East Epping HCA zoning of R2.

13.5.3 Request for Listing of New Items

The following properties have been requested to be listed as heritage items and have been assessed to determine if they warrant listing or not.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
N/A	7 Dorset Street, East Epping	House		Tara Bennett, owner of 5 Dorset Street. D01672179 Request in May 2011 D02427814 Second request in August 2013	Not recommended for listing on LEP. Simple timber weatherboard Federation Cottage with some external detailing retained. More intact examples of similar period dwellings exist within the East Epping area, which reflect the aesthetic qualities of the style better.
13.5.3A	50 Dorset Street, Epping	House		Council Resolution D02762872. Included on Exhibition copy of proposed heritage items. Recommended for listing in the Epping Town Centre Heritage Review 2014	Recommended for listing on LEP. Inventory Form has been prepared in Appendix A.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.3B	86 Essex Street, Epping	House		Council Resolution Included on Exhibition copy of proposed heritage items in the Epping UAP. Recommended for listing in the Epping Town Centre Review 2014	Recommended for listing on LEP. Inventory Form has been prepared in Appendix A
N/A	3 Norfolk Road, Epping	House		Council Resolution Included on Exhibition copy of proposed heritage items in the Epping UAP	Not recommended for listing on LEP. Dwelling is a modern 21th century construction and does not meet any criteria to warrant listing. An Inventory form has not been prepared for this dwelling

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.3C	83 Norfolk Road, Epping	House		Council Resolution Included on Exhibition copy of proposed heritage items in the Epping UAP	Recommended for listing on LEP. Inventory Form has been prepared in Appendix A.
N/A	3 York Street, Epping	House		Council Resolution Nomination through East Epping HCA inspections	Not recommended for listing on LEP. Single storey timber weatherboard Federation cottage. Appears to have undergone substantial modifications to original fabric. New corrugated roof, windows appear to mimic original windows. Timber balustrade all new. Internal assessment of property would need to be undertaken to determine if any original fabric remains. An Inventory form has not been prepared for this dwelling.

13.5.4 Review Isolated Items in Housing Strategy Zone (R4) High Density

The following properties were identified to be 'isolated items' and were requested to be investigated determine if they their listing should be maintained.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.4A	25 Ray Road, Epping	Woodlands		Council staff Heritage item in R4 Zone	Retain on LEP. Single storey dwelling is located on high point of street, lessening the impact of the five storey development to the south and west of the item. Heritage Item was maintained and restored as part of recent development known as 'Woodlands' at 23-27 Ray Road. Listing has been updated on Inventory Form in Appendix A
N/A	6 Essex Street, Epping	House (Scout Hall)		Council Resolution Council Resolution 19/12/12 in response to public exhibition of the draft Hornsby LEP to review potential heritage	Retain on LEP and retain R4 High Density Residential zoning. Directly to the south of the site is Arden Anglican School, whilst directly to the north is a recent three storey developments. The significance of the Scout Hall is retained despite the R4 High Density Residential Zoning. Listing was updated in 2013 as part of the UAP and is not considered to need further update.

13.5.5 Review of Details of Heritage Listings

The following properties were requested to be reviewed, in whole and in part, and for their Inventory Forms to be updated.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.5A	27A Chester Street, Epping	Garden		Heritage Review Stage 5 House identified to be investigated for heritage listing.	Retain garden on LEP. Inter War Bungalow which dated to the development of the heritage listed garden was demolished as part of DA/1226/2011. Current house on site does not warrant heritage listing. Listing has been updated on Inventory Form in Appendix A.
13.5.5B	78 Kent Street, Epping	Slab hut		Heritage Review Stage 5 House identified to be investigated for heritage listing.	Retain on LEP. Access to slab hut was not possible during site visit due to being located in the rear yard of 78 Kent Street. House at front of property blocking view of slab hut but glimpses of the hut have been observed and it appears in the recent aerial maps. Listing has been updated on Inventory Form in Appendix A.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.5C	142-144 Ray Road, Epping	House & Garden		Council staff Australian Bottle trees to be included in listing	Retain on LEP and add garden to listing. At least two Bottle trees were identified on the site, along with many mature trees, which appear to have been planted early in the house's history, at least before 1943. It is recommended that an arboricultural assessment be undertaken on the existing mature trees on the eastern side of the property in order to determine the condition and significance of the existing trees. Listing has been updated on Inventory Form in Appendix A.
13.5.5D	35-37 Stanley Road, Epping	Tallwood Lodge		Council staff Listed in HR1 - No photo	Retain on LEP Listing has been updated on Inventory Form in Appendix A

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.5E	9 Sussex Street, Epping	House		Council staff Listed in HS – 1993. Currently 3 houses (9, 11 and 15 Sussex Street) on one inventory sheet	Retain on LEP All houses are listed separately under the LEP and their relative Inventory Forms have been updated to individually address each property. Updated Inventory Forms in Appendix A.
13.5.5F	11 Sussex Street, Epping	House		Council staff Listed in HS – 1993. Currently 3 houses (9, 11 and 15 Sussex Street) on one inventory sheet	Retain on LEP All houses are listed separately under the LEP and their relative Inventory Forms have been updated to individually address each property. Updated Inventory Forms in Appendix A.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.5G	15 Sussex Street, Epping	House		Council staff Listed in HS – 1993. Currently 3 houses (9, 11 and 15 Sussex Street) on one inventory sheet	Retain on LEP All houses are listed separately under the LEP and their relative Inventory Forms have been updated to individually address each property. Updated Inventory Forms in Appendix A.
13.5.5H	20 York Street, Epping	House		Council staff Listed in HR1 - No photo and no description	Retain on LEP Listing has been updated on Inventory Form in Appendix A.

13.5.6 Missing Inventory Sheets for Existing Heritage Items

The following listed items were recorded as missing information or photographs from their relative inventory forms. All inventory forms have been updated and provided in Appendix A.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.6A	Beecroft Road near southern end of Old Beecroft Road, Epping	Stone causeway over Devlins Creek		Council Staff No information on Inventory Sheet. Listed on RTA Heritage Register	Retain on LEP Listing was last updated in 2013 and has been updated with recent images. The Inventory Form in contained in Appendix A
13.5.6B	21 Chester Street, Epping	House and Garden		Council staff Listed in 1994 LEP. Inventory Sheet missing	Retain on LEP Listing has been updated on Inventory Form in Appendix A.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.6C	23 Chester Street, Epping	House and Garden		Council staff Listed in 1994 LEP. Inventory Sheet missing.	Retain on LEP Listing has been updated on Inventory Form in Appendix A.
13.5.6D	9 Norfolk Road, Epping	House and Garden		Council staff House listed in HR2. Inventory Sheet for house missing	Retain on LEP The garden which is part of the heritage listing is currently undergoing major changes. It appears all mature trees mentioned in the description of the site have been maintained. Recommend for investigation by a Heritage Consultant who specialises in gardens and landscapes. Listing has been updated on Inventory Form in Appendix A.

13.6 Summary and Recommendations of Hornsby Heritage Review Stage 6

The significance, intactness and merit of each property has been assessed as far as possible from the available information and the availability of access to properties. Due to the time constraints of this Heritage Review, properties which needed a follow up site inspection due to limited views of heritage items from street view were not able to be conducted. Where this has occurred, a recommendation has been made for a site inspection to be undertaken at a later date. For those properties recommended to be retained or added to the Hornsby LEP, the Inventory Sheets have been updated or created for each of these properties. All Inventory sheets updated or created are included in Appendix A.

In summary, the following resultant recommendations and updates were made as part of Stage 6 of the Hornsby Council Heritage Review:

13.7 Requests for Removal of Heritage Listing Summary

The one (1) request for removal of a Heritage Item, 184 Ray Road, has been recommended to be retained and the Inventory Sheet for the item has been updated. The recommendation is as follows:

Street Address	Item	Recommendations	Appendix A Reference
184 Ray Road	House	Retain heritage listing	13.5.1A

13.8 Amend Anomalies in Details of Heritage Listings Summary

One (1) Heritage Item, 73A Oxford Street, was recommended to be changed from R3-Medium Density Residential Zone to R2-Low Density Residential Zone to reflect the East Epping HCA zoning of R2. The recommendation is as follows:

Street Address	Item	Recommendations	Appendix A Reference
73A Oxford Street	Federation Queen Anne house	Recommend to change R3 zoning to R2 to reflect the East Epping HCA zoning of R2	N/A

13.9 Request for Listing of New Items Summary

Of the six (6) properties recommended for heritage listing under the Hornsby LEP 2013, three (3) properties were recommended for heritage listing and three (3) were not recommended for heritage listing. Inventory Sheets for the three recommended heritage items were created. The recommendations in summary are as follows.

Street Address	Item	Recommendations	Appendix A Reference
7 Dorset Street	House	Not recommended for listing	N/A
50 Dorset Street	House	Recommended for listing	13.5.3A
86 Essex Street, Epping	House	Recommended for listing	13.5.3B
3 Norfolk Road	House	Not recommended for listing	N/A
83 Norfolk Road	House	Recommended for listing	13.5.3C
3 York Street	House	Not recommended for listing	N/A

13.10 Review Isolated Items in Housing Strategy Zone (R4) High Density Summary

Of the two (2) Heritage Items which were identified as isolated items in R4 high Density Residential Zones, both Heritage items were recommended to be retained and the Inventory Sheet for each item were updated to reflect their current condition. In summary, the recommendation were as follows:

Street Address	Item	Recommendations	Appendix A Reference
25 Ray Road	Woodlands	Retain heritage listing.	13.5.4A
6 Essex Street	House (Scout Hall)	Retain heritage listing and retain R4-High Density Residential Zone	N/A

13.11 Review Details of Heritage Listing Summary

Eight (8) Heritage Items required various details be reviewed. All Inventory Sheets were updated for each of the eight (8) items. Two (2) Heritage Items will require further investigation and follow up, due to needing expert advice or access to the site. All Inventory Sheets for these Heritage Items were updated to reflect their current condition. In summary, the recommendations and updates to Heritage Items were as follows:

Street Address	Item	Recommendations	Appendix A Reference
27A Chester Street	Garden	Retain the heritage listing of the Garden. House is not recommended for listing, as recently was built. Original Inter War Bungalow demolished as part of DA/1226/2011.	13.5.5A
78 Kent Street	Slab Hut	Retain heritage listing. Further investigation will be required at a later date to gain access to the site to acquire current photographs of the slab hut.	13.5.5B
142-144 Ray Road	House & Garden	Retain the House's heritage listing and add the Garden to the listing. It is recommended that an arboricultural assessment be undertaken on the existing mature trees on the eastern side of the property in order to determine the condition and significance of the existing trees.	13.5.5C
35-37 Stanley Road	"Tallwood Lodge"	Retain heritage listing	13.5.5D
9 Sussex Street	House	Retain heritage listing	13.5.5E
11 Sussex Street	House	Retain heritage listing	13.5.5F
15 Sussex Street	House	Retain heritage listing	13.5.5G
20 York Street	House	Retain heritage listing	13.5.5H

13.12 Missing Inventory Sheets for Existing Heritage Items Summary

Four (4) Heritage Items were missing Inventory Sheets. All four (4) Heritage Items Inventory Sheets were either located or created, with up to date photographs. One Heritage Item was recommended for investigation by a Heritage Consultant who specialises in garden and landscapes.

Street Address	Item	Recommendations	Appendix A Reference
Beecroft Road near southern end of Old Beecroft Road	Stone causeway over Devlins Creek	Retain heritage listing. Existing Inventory Sheet located dating to 2013. Inventory Sheet updated to reflect current condition.	13.5.6A
21 Chester Street	House and Garden	Retain heritage listing	13.5.6B
23 Chester Street	House and Garden	Retain heritage listing	13.5.6C
9 Norfolk Road	House and Garden	Retain heritage listing. Recommended for investigation by a Heritage Consultant who specialises in gardens and landscapes.	13.5.6D

Item 11.3

LEADING

ITEM NUMBER	11.3
SUBJECT	Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2
REFERENCE	F2017/00210 - D05111630
REPORT OF	Snr Project Officer

PURPOSE:

The purpose of this report is twofold: to detail the feedback received from submissions on the Epping Planning Review Discussion Paper exhibited from 21 June and 19 July 2017; and to recommend principles to guide Stage 2 of the Epping Planning Review.

RECOMMENDATION

- (a) **That** Council receive and note the submissions made on the Epping Planning Review Discussion Paper.
- (b) **That** the recommended principles, as identified within this report and contained within **Attachment 6** be endorsed for the purposes of guiding Stage 2 of the Epping Planning Review.
- (c) **That** Council Officers:
- 1 Brief the incoming Councillors on the Epping Planning Review process to date including the endorsed principles to confirm the future planning direction for Epping as part of progressing Stage 2 of the project, and
 - 2 That following the above briefing, a further report be submitted to Council recommending the commencement of Stage 2 of the Epping Planning Review which will involve preparing new planning controls including:
 - 2.1 A planning proposal to amend both the *PLEP 2011* and *HLEP 2013*
 - 2.2 A development control plan amendment to amend PDCP 2011 and HDCP 2013
 - 2.3 Amendments to relevant Contributions Plans and public domain plans where relevant.
- (d) **That** the recommendations contained within **Attachment 5** detailing the outcomes of the Stage 6 Heritage Review be endorsed.
- (e) **That** Council write to the community thanking them for their feedback and advising them on the outcome of Stage 1 Review and next steps
- (f) **Further, that** Council write to the Minister for Planning, Greater Sydney Commission, Department of Planning and Environment, Transport for NSW and the Roads and Maritime Services to provide an update on the project and outline of next steps.

BACKGROUND

Council 14 August 2017

Item 11.3

1. In March 2014, new planning controls for the Epping Town Centre and surrounds came into effect as a result of the Department of Planning and Environment's (DPE) Priority Precinct process. This process resulted in increased building heights and density controls within Epping Town Centre and surrounds which at the time was split between the former Parramatta City Council (western side of the train line) and former Hornsby Shire Council (eastern side of the train line). This process also saw the creation of three new Heritage Conservation Areas (on the former Hornsby Council side) – Rosebank Avenue, East Epping and Essex Street HCA.
2. On 12 May 2016, Council amalgamations saw the Epping Town Centre and immediate surrounds fall wholly within a new jurisdiction - the City of Parramatta Council. Prior to this, the Epping Town Centre had been split between the former Parramatta City Council (PCC) to the west and the former Hornsby Shire Council to the north and east. This historic dual structure has resulted in a complex planning control framework comprising of:
 - a. two local environmental plans (*Parramatta Local Environmental Plan 2011* and *Hornsby Local Environmental Plan 2013*);
 - b. two development control plans (*Parramatta Development Control Plan 2011* and *Hornsby Development Control Plan 2013*);
 - c. three development contributions plans with different contributions rates across each development type (a Section 94A plan applying to the former PCC area, and a Section 94 plan and Section 94A Plan applying to the former Hornsby Shire area); and
 - d. one public domain plan for the former Hornsby Shire Council area and public domain guidelines for the former PCC side.
3. The amalgamation has not changed or unified the planning controls, thus an exercise of bringing all of the controls into a single framework is required to deliver consistency. The objective of unifying the controls is to have one LEP, one DCP, one development contributions plan and one public domain plan applying to the entire town centre and immediate surrounds.
4. The Epping Planning Review project is identified in Council's *Operational Plan 2016/2017* under Action 2.4 "Review of Epping Town Centre Planning Controls". The Action involves undertaking a review of the planning for the Epping Town Centre, in conjunction with the Department of Planning and Environment (DP&E). Council's *Operational Plan 2017/2018* sees Council continuing to work with stakeholders on key precincts such as Epping. The *Draft West Central District Plan* also foresees that Council will progress the delivery of the Epping Town Centre urban renewal with the Greater Sydney Commission and the DP&E to ensure that the centre is considered as an integrated whole.
5. The study area for the Epping Planning Review is based on the DP&E's Urban Activation Precinct boundary and is illustrated in **Figure 1**. However, in the case of social infrastructure, the study boundary extends beyond the boundary in **Figure 1** so as to incorporate all the social infrastructure that Epping Town Centre residents rely on, which generally, is the Epping suburb.

Council 14 August 2017

Item 11.3

Figure 1 - Epping Planning Review Study area

6. The Epping Planning Review project involves two stages, the scope of which has been to address the unintended consequences of the planning control amendments brought into effect in March 2014 as well as allowing Council to manage current (formal and preliminary) Planning Proposals seeking growth within the Town Centre. It is also intended to allow the City of Parramatta Council to progress resolutions made by the former Hornsby Shire Council on specific heritage matters. Stage 1 of the Epping Planning Review has involved:
 - a. A public launch in mid December 2016.
 - b. Preparation of technical studies on Heritage, Social Infrastructure, Commercial Floorspace and Traffic (Interim) by consultants as well urban design and planning analysis which was undertaken by Council.
 - c. Pre-Phase 1 Community Consultation commencing in December 2016; this consultation is summarised in Chapter 5.0 Community Engagement of the Discussion Paper (**Attachment 1**) and involved Council Officer attendance at various community events such as the Australia Day and Lunar New Year to inform the community of the review being undertaken.
 - d. Phase 1 Community Consultation involved consultations that informed the technical studies and Discussion Paper and was undertaken in conjunction with Straight Talk who were engaged to facilitate the consultation events. The feedback received from the Phase 1 consultations was contained in Straight Talk's Phase 1 Community Consultation report which formed part of the supporting information to the Discussion Paper in **Attachment 1**.
 - e. The preparation of the Epping Planning Review Discussion Paper (informed by points b, c and d, above) for public exhibition.

Council 14 August 2017

Item 11.3

- f. Phase 2 Community Consultation carried out during the public exhibition of the Discussion Paper with a series of Community Workshop Sessions.

7. **Figure 2** below illustrates the major structural components of Stage 1 of the Epping Planning Review.

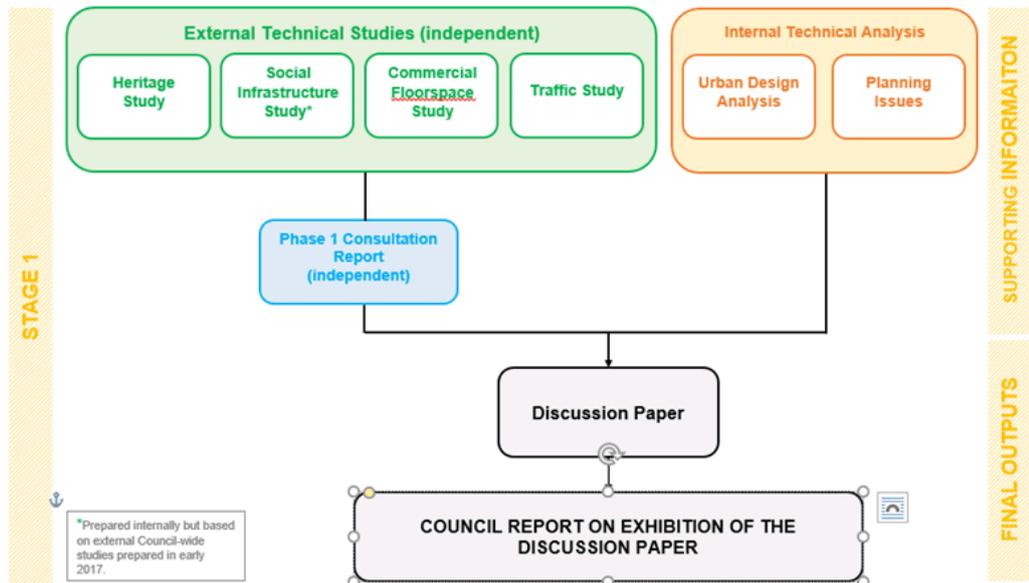

Figure 2 - Stage 1 of the Epping Planning Review

8. This Council report constitutes the last major milestone of Stage 1 of the Epping Planning Review and reports on the feedback received from the Phase 2 community consultations and Discussion Paper exhibition process.
9. Stage 2 of the Epping Planning Review will involve implementing changes to planning controls (zoning, heights, FSRs) and unifying the planning controls to create a single set of controls for the town centre. This means amending the *Parramatta LEP (PLEP) 2011* and the *Hornsby LEP (HLEP) 2013*, Parramatta DCP and Hornsby DCP, and relevant development contributions plans and public domain plans to create a single set of planning controls.
10. It is noted that the principles determined in Stage 1 also impact on other policy areas of Council (outside of the changes to planning controls covered in Stage 2) and that the findings and analysis carried out to date will be used to inform further work on these areas (ie. social infrastructure) as part of a separate process.

PUBLIC EXHIBITION OF DISCUSSION PAPER

11. The Epping Planning Review Discussion Paper (**Attachment 1**) and supporting studies were publicly exhibited from Wednesday, 21 June to Wednesday, 19 July 2016.
12. The Discussion Paper contained 32 questions, of which:
- 4 questions addressed heritage interface issues;
 - 9 questions addressed commercial floorspace issues;

Council 14 August 2017

Item 11.3

- c. 11 questions addressed social infrastructure issues;
 - d. 2 questions addressed public domain issues; and
 - e. 6 questions addressed traffic and transport issues.
13. The context around the questions are detailed in the Discussion Paper.
14. Council has specifically sought responses to the questions to help guide the future direction of Stage 2 of the Epping Planning Review. As such this report focuses on the community feedback raised in relation to the questions.
15. It must also be noted that comments/feedback were also provided outside of the questions and this is also discussed in this report.

Phase 2 Community Engagement

16. Phase 2 community engagement involved a series of Community Workshop sessions which presented the findings of the technical studies and Discussion Paper. Feedback was also sought on the options and the questions.
17. Over 750 participant entries were recorded across all engagement activities, which incorporated:
- a. Three evening sessions held on:
 - i. Social Infrastructure and commercial floor space (3 July 2017),
 - ii. Heritage (5 July 2017), and
 - iii. Traffic (12 July 2017).

These were held at the St Albans Anglican Church Main Hall in the Epping Town Centre.
 - b. Two evening sessions for Epping's two largest culturally and linguistically diverse (CALD) communities:
 - i. A session for the Chinese community was held on 10 July 2017,
 - ii. A session for the Korean community was held on 17 July 2017.

These were held at the Epping Creative Centre.
18. All sessions were facilitated by Straight Talk, a consultancy commissioned to independently facilitate and record the feedback from each session.
19. These Phase 2 consultations are summarised in the *Epping Town Centre Review: Phase two – Exhibition period consultation* (provided at **Attachment 2**).

Site visits

20. Three site visits were undertaken by Council Officers and the Administrator at the request of residents who raised concerns about the impacts of current development in their areas. Site visits were undertaken at the following locations:
- a. Rosebank Avenue.
 - b. Eastern side of Essex Street, within the Essex Street HCA.
 - c. Norfolk Street in the vicinity of Pembroke Street.

Council 14 August 2017

Item 11.3

21. The purpose of the site visits was to listen to the concerns raised by residents with regard to the findings of the Discussion Paper and assist them in informing their submission.

Developer Consultation

22. On 30 June 2017, Council Officers hosted an Information Session for the applicants of the Austino Planning Proposal (adjacent to Forest Park) and the two Preliminary planning proposals at Rawson Street and Beecroft Road.
23. The purpose of this consultation was to provide an update to the applicants on the status of the Epping Planning Review project, in order to enable them to prepare a submission.

PROJECT STEERING GROUP

24. To ensure State agency engagement on the recommendations of the Epping Planning Review process, at the commencement of the project, Council established the Epping Planning Review State Agency Steering Group.
25. The Steering Group comprises representation from the Greater Sydney Commission, the Department of Planning and Environment, Transport for NSW and Roads and Maritime Services and staff of City of Parramatta.
26. To date, the Steering Group has met on three occasions to discuss issues relating to the review as well as oversee the progress of the Discussion Paper.

COMMUNITY FEEDBACK - INTRODUCTION

Submissions

27. Council received over 300 individual pieces of correspondence in response to the exhibition. Within this correspondence, there were several submitters that made multi-part submissions, as well as a few submissions made on behalf of small groups of residents. These factors meant that the total number of submitters was over 260.
28. The submissions varied broadly in scope in terms of their response to the 32 questions posed in the Discussion Paper. The majority of submissions (about 90%) directly answered questions posed in the Discussion Paper. Of these, about one third of submitters focused on one question, about one third of submitters discussed 2-5 questions, and about one third addressed 6 or more questions. About 12% of submitters addressed 20 or more questions.
29. **Figure 3** below demonstrates the frequency of response to the 32 questions.
30. As demonstrated in **Figure 3** there was a high level of response to each of the questions posed (minimum 24 responses; maximum 131 responses). The average number of responses to each question was 50, for a total of over 1,600 individual answers across all of the questions. The four questions attracting the highest frequency of responses were 9b (relating to the purchase of the former Bowling Club site), 9k (relating to future use of the Dence Park Aquatic Centre), 9a (relating to expanding parks ahead of creating new parks), and 11a (relating to delaying processing of planning proposals until the Traffic Study is complete); each of these four questions received over 100 responses.

Council 14 August 2017

Item 11.3

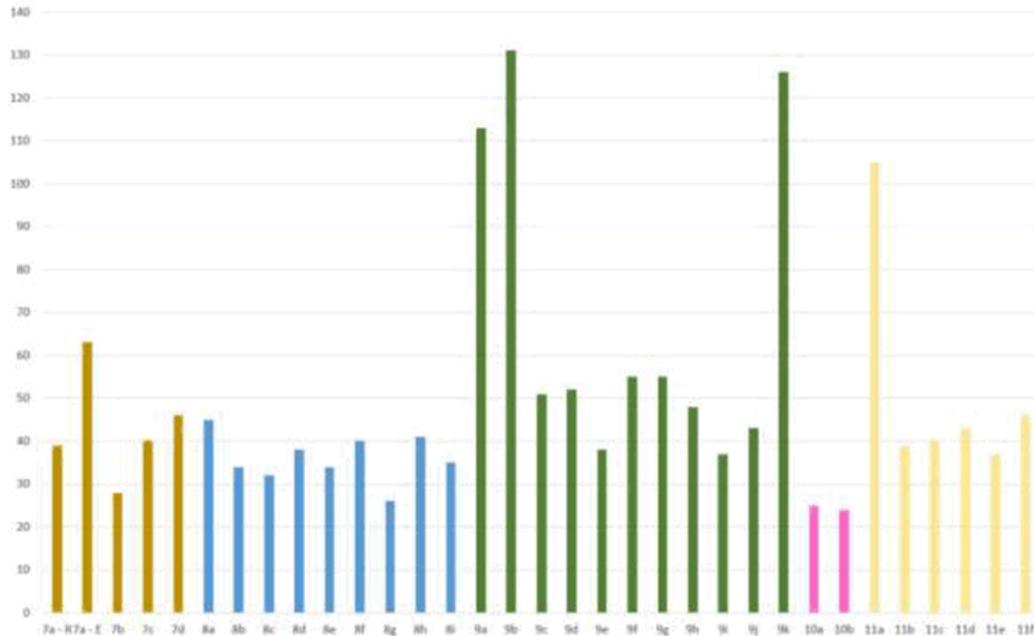

Figure 3 - Graph showing responses to the questions

31. **Attachment 3** provides a detailed summary of the submissions received in response to each question, and further sections of this report respond to this analysis on a question-by-question basis. Many respondents provided commentary outside of the questions posed, but which still broadly related to the five themes in the Discussion Paper (Heritage, Commercial Floor Space, Social Infrastructure, Public Domain and Traffic/Transport). This commentary is also summarised in **Attachment 3** on a thematic basis. Analysis of this feedback is also considered within this report.
32. Many respondents provided commentary outside of the questions and themes of the Discussion Paper. Council officers' analysis of this commentary is detailed in **Attachment 4** (General Comments). Analysis of this feedback is also considered within this report.

Community Workshop Sessions

33. The Community Workshop sessions (discussed above in 'Phase 2 Community Engagement') were a major element of the Phase 2 Community Engagement process and have been summarised in Straight Talk's *Epping Town Centre Review: Phase two – Exhibition period consultation* which forms **Attachment 2** to this report.
34. Generally, there are strong similarities with the feedback from the community submission process. However, any differences in views between submissions and feedback received directly from the community workshop sessions are explained in each of the chapter sections below.

HERITAGE CHAPTER

35. Chapter 7.0 of the Discussion Paper responds to the recommendations made within City Plan Services' *Epping Town Centre (East) Heritage Review* ("Heritage Review") as well as feedback received from residents during the Phase 1 consultations held in May this year.

Council 14 August 2017

Item 11.3

36. The sub-sections below summarise the responses to the Discussion Paper's four questions (ie. 7a, 7b, 7c and 7d) which pertain to Rosebank Avenue and Essex Street Heritage Conservation Areas (HCAs), Rockleigh Way, certain properties at Norfolk Road and Pembroke Street and the Rose Street Precinct.

Rosebank Avenue HCA

37. Until March 2014, the Rosebank Avenue area and surrounds were zoned R2 Low Density Residential Zone. However, new planning controls which came into effect in March 2014 by way of the Department of Planning and Environment's (DP&E's) Urban Activation Precinct process introduced the Rosebank Avenue HCA and introduced the R4 High Density Residential Zone to its south eastern, southern and eastern borders. The R4 High Density Residential Zone currently permits 5 storey residential flat buildings.
38. The Rosebank HCA and surrounding land zonings in *HLEP 2013* are illustrated in **Figure 4**, below.

Figure 4 - Rosebank Avenue HCA (hashed) and current zoning

39. Two heritage items are situated midpoint within the HCA, at No.s 9 and 10 Rosebank Avenue (refer to **Figure 5** below). These two sites mark the midpoint on either side of the HCA.
40. The street runs in a north/south direction with most properties fronting the street in an east or west direction. These lots are relatively large. However, No.23 Rosebank Avenue is the only property that fronts the street in a north/south direction. This lot is also much smaller in size and is flanked by larger lots that have frontage to Rosen Street. It therefore, has limited redevelopment opportunity on its own.
41. The Heritage Review assessed the heritage value of the HCA and has recommended the retention of the Rosebank Avenue HCA. However, this study only looks at the heritage factors and does not address the land use conflicts occurring at the interface at the rear of some of the properties within the Rosebank Avenue HCA.
42. A strong residential market has seen many of the R4 zoned sites be redeveloped for 5 storey residential flat buildings. This has created a conflict in land use that sees 5 storey residential flat buildings overlooking single and two

Council 14 August 2017

Item 11.3

storey low density residential development which is significantly impacting on the privacy and amenity of the Rosebank Avenue residents, particularly those at No.s 1-7, and 2-8 Rosebank Avenue.

43. Section 7.4.1 of the Discussion Paper presents 7 options to resolve interface issues at the Rosebank Avenue HCA (as well as the Essex Street HCA which is discussed in the section below). The options range from "Maintain the HCA" to presenting an option that would permit "3 storey residential flat building" redevelopment and involve the removal of the HCA notation in the *HLEP 2013*.
44. Council Officers recommend three options (Options 4, 5 and 6) for the Rosebank Avenue HCA all of which involve:
 - a. Removal of the HCA affectation in *HLEP 2013*; and
 - b. Planning controls that permit demolition of the existing housing and two storey redevelopment comprising: (1) Dual Occupancy (side by side); (2) Town Houses; or (3) Manor home, (with the exception of the two heritage items).
45. With the adjacent creek (zoned RE1 Public Open Space) and the two heritage items sitting midway in the precinct, the Discussion Paper noted that further analysis be undertaken to assess how *different options that might be applied to different parts of the HCA* due to the fact that the interface issues primarily affect the southern properties in Rosebank Avenue.
46. The standard question 7a. asks: *What is your preferred option and why?*

Community Feedback

47. Feedback from the community on Rosebank Avenue received via the community information sessions and via submissions was divided.
48. Some residents within Rosebank Avenue want to see the same planning controls that enable 5 storey residential development applied to their sites so they can maximise their economic benefit in the same way their neighbours have to the south and south east (refer to **Figure 5** below showing the extent of the HCA and street numbers).

Figure 5 - Rosebank Avenue HCA and heritage items with street numbers

Council 14 August 2017

Item 11.3

49. Views received via submissions and Community Workshop sessions from some residents who reside outside the HCA see the removal of the HCA and allowance for redevelopment as further degradation of local character. Many are unsympathetic to the residents experiencing the interface issues. Some view that the new R4 zone has been in place for over 3 and a half years and affected residents could have either sold up to a more tolerant resident who "knew what they were buying". Some hold the view that affected residents could have planted trees at the time the new controls came into effect to help mitigate the amenity and privacy impacts. There is also a perception from these respondents that the affected residents who see redevelopment as a resolution to the interface issues do not care about the impacts it will have on the residents who choose to stay or who are less affected by the new development.
50. With regards the heritage items at No.s 9 and 10 Rosebank Avenue, the predominant response from respondents was that the heritage items should be removed if the HCA notation is recommended for removal on the basis that the heritage items are just as affected as the properties at the southern portion of the precinct. They see that these properties also have visual proximity to the interface issues and this devalues the significance of the heritage items. There was also a contrary view – that the preference is for Options 1 ("Maintain the HCA") or Option 2 ("Landscaping at interface") across the precinct but notes that in the instance the HCA is recommended for removal, then the entire precinct should enable 5 storey residential flat buildings.

Conclusions and recommendations

51. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls introduced by the State Government in March 2014.
52. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. That Council Officers accept that there are severe interface issues occurring (or, in some cases, are yet to occur) to the southern half of the precinct; specifically, the properties at No.s 1, 3, 5 and 7 as well as 2, 4 and 6-8 are likely experience the same impacts as the remaining adjoining R4 zoned land is redeveloped over time.
 - b. That a heritage item (such as the two at No.s 9 and 10 Rosebank Avenue), as opposed to a property with just a HCA notation over it, has a much more significant role in terms of heritage conservation and protection. The importance of a heritage item relies less on the surrounding character and more so on its own individual historical attributes. As such, it is not uncommon for heritage items to sit amongst development that is of a different typology.
 - c. The RE1 zoned land to the west comprising the eastern edge of Kent Street Park – along with the two heritage items - also forms a 'break' and mid point within the Rosebank Avenue Precinct.
 - d. Council Officers see that the interface issues are less significant at the rear of No.s 12 to 18 Rosebank Avenue, despite the R4 zoning on the adjoining large site to the east at No.23 Ray Road. Constructed in early 2011, the development on this site incorporates 2.5 and 3 storey town house development which faces the properties at No.s 12 to 18 Rosebank Avenue. These townhouses shield the 4 storey residential flat building development that fronts Ray Road. Since 2011, tree

Council 14 August 2017

Item 11.3

plantings now shield views to this development from Rosebank Avenue.

- e. Similarly, Council Officers determine that there are no interface issues occurring (or anticipated to occur) at the rear of the sites at No.s 13 to 21 Rosebank Avenue. This also includes No.23 Rosebank Avenue. These sites do not adjoin any R4 zoned land. As noted above, the property at No.23 is isolated, smaller in size than the other Rosebank Avenue parcels and has little chance of being redeveloped and given it is surrounded by the R2 zoned properties which have frontage to Rosen Street. Therefore, the current R2 zone is not considered to be inappropriate against the R2 zoned land which has a two storey height limit.
- f. That any change to the planning controls needs to be sensitive and sympathetic to the existing heritage items at No.s 9 and 10 Rosebank Avenue.
- g. That the removal of the HCA notation will not have any impact on the heritage significance of the two heritage items situated at No.s 9 and 10 Rosebank Avenue (refer to **Figure 5**) as these properties are recognised for their significance as stand-alone sites.
- h. That the basis for any changes to the planning controls is to place as little pressure as possible on local traffic.

53. Council Officers therefore, **recommend the following principles:**

- a. In the case of properties situated at No.s 1, 3, 5 and 7 as well as 2, 4 and 6-8 Rosebank Avenue:
 - i. That Option 7 – 3 storey residential flat building redevelopment be permissible; and
 - ii. That further urban design work identify appropriate building height, density (FSR) controls, building setback and amalgamation controls so as to ensure an appropriate transition from 3 storeys to 2 storeys towards the heritage item sites to the north. This analysis will inform new DCP controls.

These recommended controls:

 - enable owners to achieve economic benefit from a higher density solution.
 - represent a sound transition in density from the 5 storey residential flat building to a single storey heritage item.
- b. That the Rosebank Avenue HCA notation in *HLEP 2013* (labelled "C11") be removed entirely.
- c. That the existing heritage items at No.s 9 and 10 Rosebank Avenue remain listed in the LEP Heritage Schedule as heritage items.
- d. In the case of the properties situated north of the heritage items comprising No.s 13 to 21 Rosebank Avenue (western side) and 12 to 18 Rosebank Avenue (eastern side) and of No.23 Rosebank Avenue, that there be no change to the LEP planning controls.
- e. That in the case of the entire Rosebank Avenue area, that the relevant DCP controls be amended accordingly, including any amendments to

Council 14 August 2017

Item 11.3

Section 9.3.14 'Rosebank Avenue (Epping) Heritage Conservation Area' section of the Hornsby DCP'.

- f. That despite the increase in residential density proposed, that the above recommendations could proceed ahead of the completion of the Traffic study as they seek to urgently deal with the unintended impacts arising from the new planning controls implemented in 2014 relating to land use interface issues. Furthermore, the potential increase in dwelling numbers resulting from this recommendation is likely to be minimal when compared against the traffic impacts arising from proposals detailed later in this report.

Essex Street HCA

54. Until March 2014, land situated on the eastern side of Forest Grove - which directly adjoins land on the western side of Essex Street between Epping Road and Maida Road - was zoned R2 Low Density Residential. However, new planning controls which came into effect in March 2014 via the DP&E's Urban Activation Precinct process introduced the R4 zone. The R4 High Density Residential zone permits 5 storey residential flat buildings.
55. The Essex Street HCA and surrounding land zonings in *HLEP 2013* are illustrated in **Figure 6**, below.

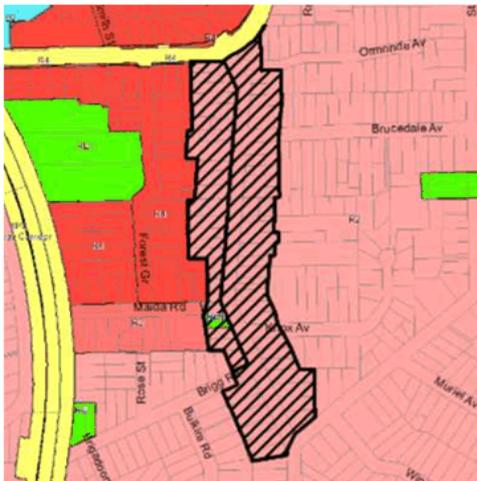

Figure 6 - Essex Street HCA (hashed) and current zoning

56. Four heritage items are situated within the Essex Street HCA - at No.s 42, 47, 76 and 84 Essex Street (refer to **Figure 7** below).
57. The Heritage Review assessed the heritage value of the HCA and has recommended retention of the Essex Street HCA. However, this study only looks at the heritage factors and does not address the land use conflicts occurring on the west side of the HCA between Epping Road and Maida Road.
58. A strong residential market has seen most of the R4 zoned sites (between Epping and Maida Roads) flanking the western side of Essex Street be redeveloped (or have existing approvals) for 5 storey residential flat buildings. This has created a conflict in land uses that sees 5 storey residential flat buildings overlooking single and two storey low density residential which is significantly impacting on the privacy and amenity of the Essex Street residents on the western side of Epping and Maida Road.

Council 14 August 2017

Item 11.3

59. Section 7.4.1 of the Discussion Paper presents 7 options to resolve interface issues at the Rosebank Avenue HCA (as well as the Essex Street HCA which is discussed in the section below). The options range from "Maintain the HCA" to "3 storey residential flat building" redevelopment.
60. Council Officers recommend three options (Options 4, 5 and 6) for the Rosebank Avenue HCA all of which involve:
- a. Removal of the HCA notation in *HLEP 2013*; and
 - b. Introduction of new planning controls that permit two storey redevelopment comprising: (1) Dual Occupancy (side by side); (2) Town Houses; or (3) Manor home (with the exception of heritage items).
61. The standard question, 7a., asks: *What is your preferred option and why?*
- Community Feedback*
62. Feedback from the community on the Essex Street HCA received via the community information sessions and via submissions is divided.
63. For residents residing on the western side of Essex Street, situated within the HCA, the responses were as follows:
- a. 75% of residents either supported the Council Officer recommendation or Option 7 ("3 Storey Residential Flat Building").
 - b. 25% of residents supported Option 1 ("No Change").
64. The predominant view from residents on the eastern side of Essex Street within the HCA also support the removal of the HCA notation to enable redevelopment that enables a transition to the adjoining R4 zone. Views from the eastern side of Essex Street held the strong view that if there was any change to the building form on the western side of the street, that the same type of development should be permissible on the eastern side of the street.
65. Views of residents that reside outside the HCA see the removal of the HCA and allowance for redevelopment as further degradation of local character. Furthermore these views have strong similarities with those of the residents situated outside the Rosebank Avenue HCA, in that:
- a. Some residents are not sympathetic to the residents experiencing the interface issues:
 - i. Some view that affected residents could have addressed interface issues early by tree planting at the time the new controls came into effect to help mitigate the amenity and privacy impacts
 - ii. Some view that affected residents could have either sold up and moved out by selling to a more tolerant resident who "knew what they were buying" and appreciates what special character is left.
 - iii. Some have the perception that the affected residents who are fed up and want to sell to maximise their economic benefit do not care about the impacts it will have on the residents who choose to stay or who are less affected by the new development.

Council 14 August 2017

Item 11.3

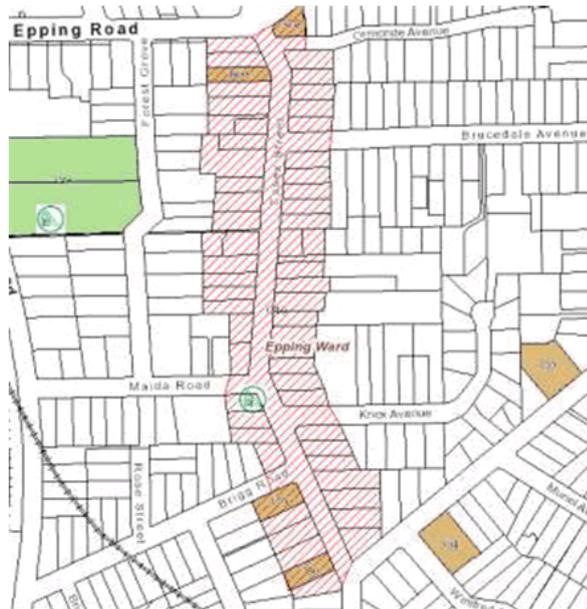

Figure 7 - Essex Street HCA and heritage items in HLEP 2013

Conclusions and recommendations

66. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
67. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
 - a. That there are significant interface issues that properties are experiencing on the western side of Essex Street HCA; specifically, those situated between Epping Road and No.86 Essex Street.
 - b. That there are no interface issues being experienced on the eastern side of the Essex Street HCA despite the numerous views of the residents residing on the eastern side. The role of the Essex Street road reserve is critical in establishing a demarcation between land uses. The road reserve which is approximately 21 metres wide when measured between the front boundaries of the western and eastern side of the street acts as a clear demarcation for any change in land use and becomes the ideal "line in the sand". If Council was to enable redevelopment uplift of the eastern side of Essex, this only pushes and extends the interface issue further east.
 - c. Essex Street stretches from Oxford Street in the north to Abuklea Road in the south with the Essex Street HCA section occupying a little more than 25% of its full length. Therefore, any recommendations to change the eastern side of Essex Street within the HCA section is likely to result in the Essex Street residents situated outside of the HCA that own land zoned R2 Low Density Residential to also seek uplift because the rezoning of the eastern side will establish a precedent.
 - d. Terry's Creek forms a natural geographical boundary rather than a boundary for land use change. Relying on Terry's Creek as a land use boundary would introduce a significant number of dwellings which

Council 14 August 2017

Item 11.3

would not only have significant traffic implications but also result in significant additional land being up-zoned further away from the station.

- e. Of the 3 recommended re-development options within the Discussion Paper (which were: Option 4 Dual Occupancy (side by side), Option 5 Town house re-development and Option 6 Manor home, that Council Officers recommend Option 6 Manor home because this option:
 - i. Represents a sound transition in density from the 5 storey residential flat building to 2 a storey medium-density, to the 1 to 2 storey low density across the street. It means that no change to the existing height control is required.
 - ii. Does not require site amalgamation so that owners will be able to independently develop their sites if they wish.
- f. That if there is a recommendation that enables redevelopment of the western side of Essex Street between Epping and Maida Roads, that there is no heritage benefit in keeping the Essex Street HCA notation.
- g. The removal of the HCA notation will not have any impact on the heritage significance of the four heritage items situated at No.s 42, 47, 76 and 84 Essex Street (refer to **Figure 7**) as these properties are recognised for their significance as stand-alone sites.

68. Council Officers therefore, **recommend the following principles:**

- a. That the Essex Street HCA notation in *HLEP 2013* (labelled "C10") be removed in full.
- b. That the existing heritage items at No.s 42, 47, 76 and 84 Essex Street remain listed in the LEP Heritage Schedule as heritage items.
- c. That the planning controls for the properties on the western side of the Essex Street HCA area be amended to permit re-development that involves demolition of the existing housing (with the exception of heritage items) to enable development of two storey manor home development, between Epping Road and Maida Road.
- d. That the planning controls for the properties on the eastern side of the Essex Street HCA area remain unchanged and not be amended.
- e. That further urban design be undertaken to determine the appropriate density, setbacks and other building envelope and controls to guide the development of new manor home development. This analysis will inform new development control plan (DCP) controls including any amendments to Section 9.3.13 'Essex Street (Epping) Heritage Conservation Area of the Hornsby DCP'.
- f. That despite the increase in residential density proposed, that the above recommendations could proceed ahead of the completion of the Traffic study as they seek to urgently deal with the unintended impacts arising from the new planning controls implemented in 2014 relating to land use interface issues. Furthermore, the potential increase in dwelling numbers resulting from this recommendation is likely to be minimal when compared against the traffic impacts arising from proposals detailed later in this report.

Rockleigh Park

Council 14 August 2017

Item 11.3

69. The Rockleigh Park precinct comprises 33 small subdivided lots that come off a small, narrow laneway system. The area is predominantly zoned R4 high Density Residential (shown edged yellow in **Figure 8** below) with an R3 Medium Density Residential zoned strip edging the north and eastern boundaries. The subject site currently contains medium density housing.
70. Until March 2014, the 36 parcels that make up Rockleigh Park were zoned R2 Low Density Residential Zone. However, new planning controls which came into effect in March 2014 via the DP&E's Urban Activation Precinct process introduced the R4 zone to the 18 parcels central within Rockleigh Park. The R4 High Density Residential zone permits 5 storey residential flat buildings. No sites have been redeveloped in accordance with the new zone on account of constraints around community title and the small street network.
71. The precinct's proximity to the R4 zoned land at Essex Street to the south and the East Epping HCA to the north (shown hashed red) are illustrated in **Figure 8**.
72. The Heritage Review commissioned by Council recommends down-zoning the parcels zoned R4 (which has a 17.5 metre or 5 storey building height) to R3 Medium Density Residential zone (which has a 12 metre or 4 storey building height) to better reflect existing development.

Figure 8 - Rockleigh Way (area edged in yellow and with a R3 zoned strip)

73. The Discussion Paper recommends supporting the R3 zone and that further urban design analysis to identify the appropriate amalgamation, height and density controls be carried out.
74. The proposed downzoning to the R3 zone better reflects the current use – small single and two storey cottages, some of which are attached, on a small, narrow laneway system.
75. The standard question at the end of this section (Question 7b) asks: *Do you agree with the recommendation for Rockleigh Park?*

Community Feedback

76. Community feedback from residents on this issue showed strong support for the down zoning of the site from the R4 zone to the R3 zone.
77. Respondents also said that the proposed R3 zone:
 - a. Would more appropriately deal with the transition between higher and lower density areas; and

Council 14 August 2017

Item 11.3

- b. Should be supported by a master planning process so that appropriate heights and density controls can be put in place.

Conclusions and recommendations

78. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
79. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. With 18 lots zoned R4 and 15 lots zoned R3 all of which rely on the same small road network for access which falls under a community title, it is highly unlikely that these sites will be purchased by a developer for redevelopment.
 - b. The recommended downzoning better reflects the current use – small single and two storey cottages, some of which are attached, on a small, narrow laneway system.
 - c. The proposed R3 Medium Density Residential zone is consistent with the Rockleigh Park properties that form its northern and eastern boundaries.
 - d. That redevelopment of Rockleigh Park for 5 storey residential flat building development would reflect further and unnecessary encroachment of inappropriate high density development up against low density development.
 - e. That the recommendation within the Discussion Paper to down-zone the R4 zone to the R3 zone still stands.
80. Council Officers therefore, **recommend the following principles**:
- a. That the component of Rockleigh Park currently zoned R4 be rezoned to the R3 zone so that the entire 33 parcels fall under a single (R3) zone consistent with the recommendations with the Heritage Review and Discussion Paper.
 - b. That further urban design analysis be undertaken across all of Rockleigh Park to determine the best building height and density (FSR) controls including amalgamation patterns should the site be amalgamated in the future. This analysis will also inform DCP controls.

1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street

81. The parcels at 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street are all currently zoned R2 Low Density Residential with the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street located within the most southern section of the East Epping HCA (refer to **Figures 9 and 10**, below)

Council 14 August 2017

Item 11.3

Council 14 August 2017

Item 11.3

84. Until March 2014, the R4 zone to the west of this area did not exist. However, new planning controls which came into effect in March 2014 via the DP&E's Urban Activation Precinct process rezoned the R2 Low Density Residential land to the R4 High Density Residential zone which permits 5 storey residential flat buildings.
85. The Heritage Review commissioned by Council recommends:
- a. The removal of the East Epping HCA notation (labelled "C9" in *HLEP 2013*) over the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street; and
 - b. Rezone No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street as well as No. 5, 7 and 7A to the R3 zone so all parcels share the same zoning and also, match the zoning to the south.
86. Since 2014, when the adjacent R4 zone came into effect, there has been no redevelopment of land in this vicinity however, it is noted that a strong residential market could drive redevelopment in the future.
87. To resolve any forthcoming interface issues at No.s 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street, Section 7.4.2 of the Discussion Paper presented three options and sought feedback. The three options are as follows:
- a. Option 1 is as per the Heritage Review's recommendation (described above).
 - b. Option 2 is to both:
 - i. Remove the East Epping HCA notation (labelled "C9" in *HLEP 2013*) over the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street, and
 - ii. Rezone all of the seven parcels to the R3 zone, but restrict development on No.s 3, 3A, 5, 7 and 7A Norfolk Road to a 2 storey manor home and encouraging No.s 1 Norfolk Road and 25 Pembroke Street to amalgamate with No.s 23 and 23A Pembroke Street to redevelopment into a town house scheme.
 - c. Option 3 is to:
 - i. Remove the East Epping HCA notation (labelled "C9" in *HLEP 2013*) over the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street, and
 - ii. Retain the R2 zone on No.s 3, 3A, 5, 7 and 7A Norfolk Road, and
 - iii. Allow No.1 Norfolk Road and 25 Pembroke Street to be rezoned to the R3 zone.
88. The standard question at the end of this section (Question 7c) asks: *...what is your preferred option and why?*

Community Feedback

89. Feedback from the community via the community information sessions and submissions is divided.
90. Responses from the owners of No.s 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street, included a coordinated group response which was included in some of the households' submissions. These indicated unanimous support

Council 14 August 2017

Item 11.3

for Option 1 (remove HCA and rezone to R3). Key reasons for supporting this option were:

- a. That there is a desire to resolve future interface issues with the anticipated R4 development yet to occur on the adjoining R4 land.
 - b. That the option could encourage amalgamated development sites large enough to support "high-quality integrated development" with adequate transition to adjacent low-rise areas and the Heritage Item at 9 Norfolk Road.
 - c. To encourage housing within walkable access to the school and town centre.
 - d. That Option 2 (manor home) was not preferred as it was seen as an undesirable and less integrated approach than larger site amalgamation along with the potential problems with strata-titled developments sharing one driveway (i.e. access, construction, utilities) was also raised although it should be noted that the manor home recommendation involves amalgamated sites.
 - e. That Option 3 was considered as an uncoordinated approach to zoning that could result in small, piecemeal development. An alternative for R4 zoning was also raised by some.
91. Feedback from two adjoining owners, including the owner of the adjoining heritage property at No. 9 Norfolk Road have preference for Option 3 as this is seen as a more appropriate building form response since the sites at No.s 3A, 5, 7 and 7A Norfolk Street have no street address.
92. Feedback from other residents were varied:
- a. some seeing Option 2 as preferable,
 - b. others as Option 3 as preferable, with
 - c. others feeling that only limited redevelopment was acceptable (low density to be replaced with low density).
93. Other residents cited the local neighbourhood shop building which is attached to the dwelling at No. 25 Pembroke Street as a valued and historically important building in this area. However, despite the Heritage Study's identification of the site as a 'contributory item', it also recommends removal of the East Epping HCA notation over the site.

Conclusions and recommendations

94. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
95. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. That any response needs to be sensitive to the heritage item at No.9 Norfolk Road.
 - b. The narrowness of the lots at No.25 Pembroke Street and No.1 Norfolk Street lend themselves to amalgamating with No.s 23 and 23A given their location.

Council 14 August 2017

Item 11.3

- c. That the R4 High Density Residential zone to the west and R3 Medium Density Residential zone to the south have the strong potential to result in interface issues which need to be managed.

96. Council Officers therefore, **recommend the following principles:**

- a. That option 2 from the Discussion Paper be applied, which involves:
- i. Removing the East Epping HCA notation (labelled "C9" in *HLEP 2013*) over the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street, and
 - ii. Rezoning all of the seven parcels to the R3 zone*, but:
 1. Limit re-development on No.s 7 and 7A Norfolk Road to a 2 storey manor home.
 2. Enable re-development on No.s 1, 3 and 3A, 5 Norfolk Road and 25 Pembroke Street to realise residential flat building (no more than 3 storeys in height) however, undertake urban design analysis to determine:
 - appropriate height, density and amalgamation controls including the controls affecting No.s 23 and 23A Pembroke Street; and
 - appropriate setback controls from the heritage item at No. 9 Norfolk Street; and
 - that this analysis informs DCP controls including any amendments to section 9.3.12 'East Epping Heritage Conservation Area'.

Note: this may result in a different zone depending on the methodology utilized in the harmonization of the planning controls.

- b. That despite the increase in residential density proposed, that the above recommendations could proceed ahead of the completion of the Traffic study as they seek to urgently deal with the unintended impacts arising from the new planning controls implemented in 2014 relating to land use interface issues. Furthermore, the potential increase in dwelling numbers resulting from this recommendation is likely to be minimal when compared against the traffic impacts arising from proposals detailed later in this report.

Rose Street precinct

97. The Rose Street Precinct is flanked by properties zoned R3 Medium Density Residential (which front Maida Road), Blaxland Road to the west, the Essex Street HCA properties to the east and Brigg Road to the south. It excludes the Essex Street properties and a pocket park in the north east corner with Maida Road and Essex Street. Refer to **Figure 11** below.
98. Until March 2014, land situated on the southern side Maida Road was zoned R2 Low Density Residential Zone. However, new planning controls which came into effect in March 2014 via the DP&E's Urban Activation Precinct process introduced the R3 zone to Maida Road. The R3 zone permits 4 storey residential flat buildings.

Council 14 August 2017

Item 11.3

Figure 11 - Rose Street Precinct (area hashed blue)

99. The land that is zoned R3 is being redeveloped into 4 storey residential flat buildings. Also the topography slopes (downwards) to the south increasing the impact of the height of new development.
100. The Heritage Review assessed the appropriateness of the R2 zone with regards to the adjoining Essex Street HCA and concluded that the Rose Street precinct be upzoned to the R3 zone on a land use basis.
101. With regards to land outside the precinct (as per **Figure 11**, above) it should be noted that as per the recommendations for Essex Street, the HCA notation to the east of the precinct is recommended for removal.
102. As at mid July 2017, over two-thirds of the strip of R3 zoned land fronting Maida Road has either been developed as 4 storey residential flat buildings or is under construction for the same.
103. There is potentially an opportunity for Council to pursue an acquisition process to purchase sites for community/public open space in the vicinity of Rotary Park given the findings from the *Epping Social Infrastructure Study* which supported the Discussion Paper.
104. The Discussion Paper supports the recommendation within the Heritage Study - which is to zone the precinct R3 zone - but also recommends that further master planning work be undertaken to determine the appropriate height and density controls so as to ensure a clear transition to the R2 zoned land on the southern side of Brigg Road.
105. The Discussion Paper seeks feedback on the recommendation (Question 7d) which asks: *Do you agree with the recommendation for the Rose Street Precinct?*

Community Feedback

106. Council received a total of 45 submissions on this issue. Feedback from the community is divided. Responses from 19 respondents support the Discussion Paper's recommendation to up-zone the precinct. This is largely because those residing within the Rose Street precinct feel they have lost significant amenity with the introduction of the 4 storey residential flat building development occurring to the north. The views of residents outside the precinct (26 respondents) do not support the recommendation for up-zoning as they feel

Council 14 August 2017

Item 11.3

that it will only extend pressure to upzone land further south. Some respondents have the view that the four storey interface is insignificant. (Refer to a summary of the submissions at **Attachment 3**).

107. The above views were also reflected at the Community Information Sessions (refer to Straight Talk's *Epping Town Centre Review - Phase Two - Exhibition period consultation* at **Attachment 2**).

Conclusions/Recommendations

108. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.

109. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. That the interface issues that are occurring to the north of the precinct require a land use planning response to manage these interface issues.
- b. That the recommended R3 Medium Density zone in the Heritage Review and the Discussion Paper generally represents a sound transition to the R2 zone on the southern side of Briggs Road providing that master planning is undertaken for this precinct.

110. Council Officers therefore, **recommend the following principles**:

- a. That the land be rezoned to the R3 zone*; and
- b. That further urban design analysis/master planning process is needed to:
 - i. Determine how development from the north needs to step down to a building height of 2 storeys at the Brigg Road frontage to transition to development across the road. Transition should also be considered towards the eastern end of the site to ensure future massing appropriately responds to the low density residential development fronting Essex Street.
 - ii. Determine an appropriate amalgamation pattern, building height, density and setback controls as well as provision of communal and public open space
 - iii. That this analysis inform DCP controls.

Note: this may result in a different zone depending on the methodology utilized in the harmonization of the planning controls. But the intended built form outcome will remain the same.

- c. That despite the increase in residential density proposed, that the above recommendations could proceed ahead of the completion of the Traffic study as they seek to urgently deal with the unintended impacts arising from the new planning controls implemented in 2014 relating to land use interface issues. Furthermore, the potential increase in dwelling numbers resulting from this recommendation is likely to be minimal when compared against the traffic impacts arising from proposals detailed later in this report.

Hornsby Heritage Review Stage 6

Council 14 August 2017

Item 11.3

111. Section 7.1 within the Heritage Chapter of the Discussion Paper responds to a previous Hornsby Shire Council resolution pertaining to certain heritage matters in Epping.
112. Identified as part of 'Stage 6' of the Hornsby Shire Council Heritage Study Review, the Heritage Study prepared by City Plan Services reviewed these matters and made a number of recommendations. These matters and recommendations are detailed in **Attachment 5** and are also detailed in the consolidated list of recommendations contained in **Attachment 6**.

COMMERCIAL FLOORSPACE CHAPTER

113. As noted in the Discussion Paper, in 2011 the Epping Town Centre had 4,512 jobs with 55,000sqm of office floor space and 13,000sqm of retail floor space. However, since 2014, new development within the B2 Local Centre zone has reduced the amount of office floor space. Developers are replacing existing large scale office towers and small scale (2 and 3 storey) office development with shop top housing.
114. This trend is occurring despite the Hornsby DCP controls requiring non-residential uses on the first two to three floors of development in the B2 Local Centre zone. Parramatta's DCP controls require applicant's to provide "up to" 4 storeys of commercial development, but only for development on Becroft Road.

<p>Note: Commercial floorspace is floorspace utilised for retail, office or business premises.</p>

115. The Department's position on the reduction of commercial floor space is that, based on market analysis, demand for commercial floor space is expected to reduce as other centres such as Macquarie Park and Norwest Business Park become more attractive. City of Parramatta commenced a review and in response commissioned SGS Economics and Planning to understand whether the loss of floor space is a positive trend, and to understand other commercial land use elements that may create a more successful town centre.
116. Chapter 8.0 of the Discussion Paper responds to the recommendations made within SGS Economics and Planning *Epping Town Centre Commercial Floorspace Study* ("Floorspace Study") as well as feedback received from residents during the Phase 1 consultations held in May this year.
117. The sub-sections below summarise the responses to the Discussion Paper's nine questions which pertain to:
- a. Epping Town Centre's role as a Sub-District Centre;
 - b. The role of Government owned sites; and
 - c. The mix of retail uses.

Epping as a Sub District Town Centre in 2036

118. One of the concepts considered in the Floorspace Study is the State Government's **30-minute city** where people can access a wide range of job, services and other opportunities within 30 minutes from their place of residence.
119. Sections 8.5.1 and 8.5.2 within the Discussion Paper comprises three questions (8a to 8c) which seek feedback on the future role of the Epping Town Centre to the year 2036.

Council 14 August 2017

Item 11.3

Community Feedback

120. With regards to question 8a: *Should Epping evolve as a Sub District Centre with a target of achieving the commercial floor space targets without any increase in Net Floor Space on Business B2 zoned sites?* The community's responses are highly supportive of the role of the centre having a significant component of commercial floorspace. The most common view is that there needs to be more variety in retail and more night time activity.
121. With regards to questions 8b and 8c, these ask if Epping should evolve as a Sub District Centre:
- a. Without any increase in net floorspace (8b) noting that additional commercial floorspace provision would be provided at the expense of residential development; or
 - b. By allowing an increase in net floorspace (8c) to recognise the need for increased provision of commercial floorspace.
122. Responses were as follows:
- a. Despite residents generally recognising the need for additional commercial floorspace, residents generally consider that this additional floorspace should be contained within the current height and density controls.
 - b. Developers believe that an incentive – such as mandating a minimum commercial floorspace - needs to ensure that there is no net loss of potential residential floorspace and is an essential mechanism to ensure the delivery of the amount of commercial floorspace to deliver a sub-district centre.

Conclusions and recommendations

123. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
124. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude** the following:
- a. That Epping Town Centre should aim to be a Sub-District Centre in 2036 (ie. 13,000sqm of retail floorspace and 55,000sqm of other commercial floorspace) as per the *Epping Commercial Floorspace Study* prepared by SGS Economics and Planning.
 - b. The urban design analysis demonstrates that a 3 storey podium is required on remaining developable sites within the town centre to achieve the target identified in the Study.
 - c. In order for the Epping Town Centre to become a vibrant commercial centre, additional floorspace which enables higher rates of office and retail floor space is needed.
 - d. Such controls need to be mandated and therefore, should be in the LEP not the just the DCP.
 - e. That the traffic implications of increased commercial floorspace provision and associated increase in residential floorspace (should this be supported) be tested as part of the traffic study.
125. Council Officers **recommend the following principles:**

Council 14 August 2017

Item 11.3

- a. That further analysis be undertaken to determine the best LEP mechanism that mandates for a minimum amount of commercial floorspace within suitable locations that delivers a minimum 3 storey podium of commercial floorspace in the LEP and that this apply to all land zoned B2 without having the need to expand the B2 zone (except in the case of the site at 240-244 Beecroft Road – see below).
- b. That any additional residential floorspace and height be investigated and analysed through the Traffic Study to partially recognise the proposed requirement to provide increased commercial floorspace.
- c. That the SGS Economics and Planning's *Epping Commercial Floorspace Study* and Section 8.5.2 of the Epping Planning Review Discussion Paper which demonstrates that there is demand for additional retail and commercial floor space in Epping be used to inform the assessment of future development applications until more formal planning controls are in place.

Role of Government owned Sites

126. As noted in the Discussion Paper, the *Epping Commercial Floorspace Study* has identified a role where Government-owned sites could be used as part of a deliberate strategy to support the Government's 30-minute city strategy by:

- a. Providing commercial floor space to offset the loss when other sites are developed; and
- b. Providing floor space to allow businesses that are displaced when their existing building is being redeveloped to relocate within the centre.

127. The section below discusses the Government-owned sites that have been identified as opportunities to contribute to the 30-minute city strategy.

State Government owned sites

128. Part of Section 8.5.3 of the Discussion Paper proposes two State Government owned sites within the town centre at the following addresses to provide commercial floorspace:

- a. 240-244 Beecroft Road, Epping (see **Figure 12** below); and
- b. Epping Railway Station Site (see **Figure 13** below).

Council 14 August 2017

Item 11.3

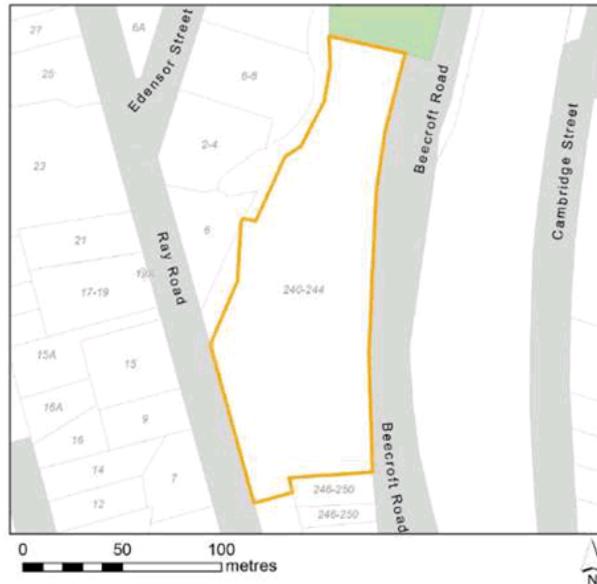

Figure 12 - UrbanGrowth NSW site – 240-244 Becroft Road, Epping

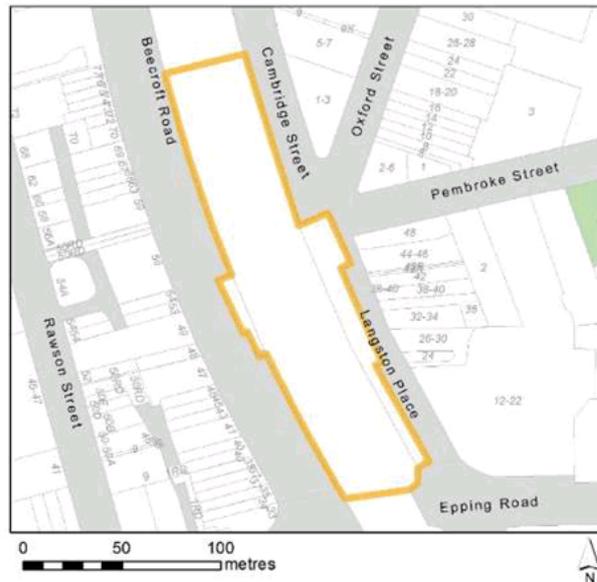

Figure 13 - Epping Railway Station site

129. The questions for each site (8e, 8f and 8g) asks the community *what contribution should each site make to the provision of commercial floor space in Epping?*

Community Feedback

130. A total of 40 responses were received on this question.

131. Community feedback received on the UrbanGrowth site at 240-244 Becroft Road, Epping was:

- a. 19 submissions supported commercial and/or retail uses at the site, though some of these preferred commercial only, while more preferred a mix of non-residential uses.

Council 14 August 2017

Item 11.3

- b. Some respondents saw the site as having potential to provide commuter parking or a bus interchange.
- c. Some respondents, including the land owner were of the view that the R4 High Density Residential zone was appropriate; reasons offered in support of this view included its proximity to the station and that there are other more suitable and feasible large commercial sites nearby. The landowner, a State Government agency, also questioned the need for large-scale floorplates in the town centre and at this site specifically.

132. Community feedback received on the Railway Station Site was as follows:

- a. There was a high level of agreement that it could make a strong contribution to connectivity and civic space. The existing pedestrian connections through the station site were generally seen as inadequate, unattractive and inaccessible, and viewed redevelopment as a potential way to address some of these issues.
- b. While there was a high level of support for use of this site for public open space and to improve public connectivity, there was less support for associated development due to concerns such as perceived overdevelopment and potential impacts on views and overshadowing.
- c. While some submissions acknowledged that partnering with a developer might be necessary to realise development at this site, in general, only a low level of development was seen as acceptable – with many not accepting any level of development at all.
- d. Many submissions acknowledged the technical complexity of such an undertaking, due to interface with the rail line.

Refer to a summary of the submissions at **Attachment 3**.

133. The above views were also reflected in the Community Workshop Sessions (refer to the *Epping Town Centre Review: Phase two – Exhibition period consultation Attachment 2*).

Conclusions and recommendations

134. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.

135. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. The State Government site situated at 240-244 Beecroft Road had previously been zoned B2 zone up to March 2014 when the State Government rezoned the land to residential. The amount of commercial floorspace that the site could deliver under the current controls would be tokenistic given its current R4 zone which only permits shop top housing and neighbourhood shops.
- b. Large floorplate commercial is an important part of making a town centre commercially vibrant and diverse. The centre's poor offering of large floorplate commercial is identified as a disadvantage in the SGS Economics and Planning *Commercial Floorspace Study*.
- c. There is limited opportunity for large floorplate commercial floorspace within the town centre.
- d. The State Government sites:

Council 14 August 2017

Item 11.3

- i. Are large in scale (particularly the Beecroft Road site) and can make a unique offering by providing large floorplate commercial as found by the *Floorspace Study*.
- ii. Can make a contribution to commercial floorspace as per the urban design analysis which recommends three storey podium of commercial development.

Each State Government site could be individually assessed for an appropriate level and type of commercial floorspace.

136. Council Officers therefore, **recommend the following principles:**

- a. With regards to the site at 240-244 Beecroft Road, that:
 - i. That Council amends the planning controls (as discussed above) to rezone the site back to the B2 zone to ensure an appropriate contribution is made towards commercial floorspace whilst retaining current residential floorspace capacity. This may include concentrating these uses at the southern end of the site.
 - ii. That Council meet with UrbanGrowth NSW to discuss this proposed amendment.
- b. With regards to the Epping Railway Station site, that Council Officers meet with Transport for NSW to discuss the opportunities for the site to deliver commercial development.
- c. That the traffic impacts of both options need to be properly understood before finalising any changes to the planning controls.

Local Government owned sites

137. Part of Section 8.5.3 of the Discussion Paper considers two Council owned sites within the town centre at:

- a. Council Car Park site at Rawson Street (see **Figure 14**); and
- b. Epping Library Site (see **Figure 15**).

Figure 14 - Council Car Park landholding – 51A and 51B Rawson Street, Epping

Council 14 August 2017

Item 11.3

Figure 15 - Epping Library Site

138. Council has been approached by two developers to enter into an agreement to redevelop the Rawson Street car park.
139. The Epping Library site was previously identified by Hornsby Shire Council as a potential redevelopment site. Through an EOI process initiated by Hornsby Shire Council, it sought to redevelop the site with a view to being redeveloped with residential uses and a new library facility located on the lower storeys.
140. With regards to the Rawson Street car park site, the Discussion Paper recommended that the site not be identified as a site where significant commercial or retail floor space should be contemplated. If redeveloped, this site will more likely play a role ensuring that there is sufficient social infrastructure provided in the town centre.
141. The two questions – one for each site – asked:
- a. 8f. Should the Epping Library and Council car park sites play a role in providing for commercial floor space in the centre?
 - b. 8g. Should the floor space allocated to community uses and commercial floor spaces be equivalent to or greater than the levels required on adjoining equivalent sites?

Community Feedback

142. A total of 38 responses were received on this question.
143. Community feedback received on the Rawson Street Car Park site was as follows:
- a. The predominant view was that respondents felt that the car park site should not be redeveloped to include commercial floor space. Instead an open space/plaza was preferred, in conjunction with linkages to nearby Boronia Park and underground parking.
 - b. There were strong views that this site should be retained for public use only.

Council 14 August 2017

Item 11.3

- c. Some respondents (9) were positive about or at least willing to consider some commercial development here, some with provisos such that community facilities were maintained/increased, that height was limited, that access to Boronia Park was maintained, that such development might not be feasible given demand for commercial floor space, and that any such decision would require additional community consultation and careful consideration.
- d. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

144. Community feedback received on the Epping Library Site was as follows:

- a. Views on the library site were more evenly-mixed. While 13 respondents were supportive or at least willing to consider such a proposal, 16 submissions were not supportive.
- b. As with the car park, there was a frequent view that maintaining an exclusive public use on this site was important. Amongst those willing to consider a possible redevelopment, there were again provisos, such as prioritisation of community space over commercial, making space for NGOs, only with limited height potential, only with a master planning exercise, and only if community facilities were maintained or expanded.

Refer to a summary of the submissions at **Attachment 3**.

145. The above views were also reflected in the Community Workshop Sessions (refer to the *Epping Town Centre Review: Phase two – Exhibition period consultation* **Attachment 2**).

Conclusions and recommendations

146. These two Council assets are explored in more detail in the Social Infrastructure section of this Council report

147. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude** in the Social Infrastructure section of this Council report:

- a. Council Officers note and support the community's preference for Council to use its current assets at Rawson St and Chambers Court (Epping Library) for community uses.
- b. Refer also to the Social Infrastructure section of this Council report where this asset is discussed in more detail including recommended principles.

148. Council Officers therefore, **recommend the principles**:

- a. From the 'Local of Potential Civic Focal Point' section in the Social Infrastructure Chapter session of this report be applied here; and
- b. That investigation take place on the potential for commercial uses on both sites and that occur in conjunction with the analysis on these sites' social/community role.

Delivering a supermarket on the eastern side of the Town Centre

149. As noted in Section 8.5.4 of the Discussion Paper, one of the issues that will impact on the future liveability of Epping Town Centre will be future residents' and workers' ability to access their daily food retail needs in a convenient manner.

Council 14 August 2017

Item 11.3

150. The Discussion Paper explains that ideally there should be a supermarket provided on both sides of the rail line as supermarkets tend to be an anchor use that encourage other smaller and medium enterprises to locate nearby, providing a wider range of local uses for daily needs. A supermarket (Coles) already operates on the west side of the centre but there is no supermarket on the eastern side.
151. As the Discussion Paper explains, the planning system cannot mandate the location and operation of any business. The planning controls allocate floor space ratios and set in place planning controls that seek to create an environment for the business community to operate these types of businesses. Council cannot guarantee a supermarket would be provided, but it can put in place planning controls that promote or incentivise desirable outcomes and apply economic development initiatives to attract a supermarket tenant.
152. Supermarkets require large floorplates. On the eastern side of the Epping Town Centre, the existing lot pattern with multiple small shops requires significant lot amalgamation to occur to achieve an appropriate site. Having considered the pattern of Development Applications already in place and the possible locations for a supermarket, the Discussion Paper presents one site as ideal for a supermarket to service the eastern side of the Town Centre. The landholding (see **Figure 16**) consists of 7 sites – 38-48 Langston Place and 2 Pembroke Street – which together have a site area of approximately 2,900sqm.

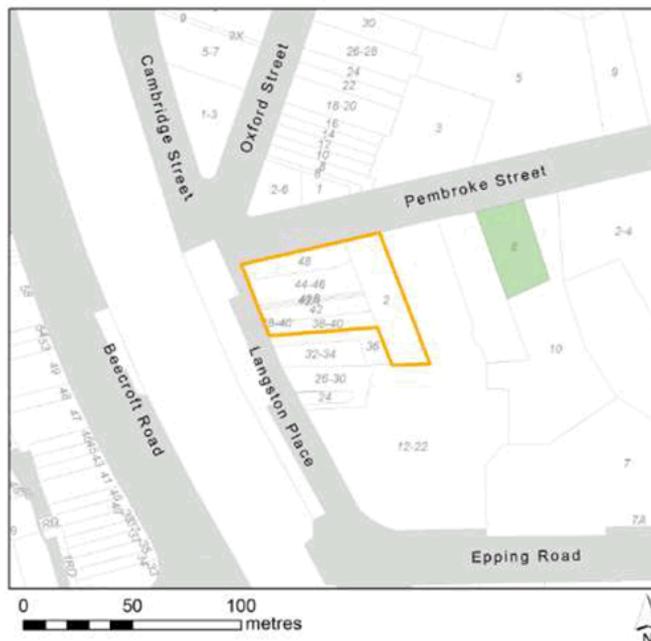

Figure 16 - Site identified within the Discussion Paper as a potential supermarket site on eastern side of Epping Town Centre

153. The question in the Discussion Paper, standard question 8h, asked *Should Council seek to actively encourage a supermarket site on the eastern side of the Epping Town Centre by providing floor space and height bonuses to incentivise the site amalgamation necessary to achieve a supermarket?*

Community Feedback

154. Specific feedback with regards to the eastern side was as follows:

Council 14 August 2017

Item 11.3

- a. Most respondents were positive about a supermarket on the eastern side of the rail line. There was a perception that additional residential development on the eastern side would necessitate this. As noted above, many submissions did not wish to accept height increases to incentivise this use.
- b. Some alternative locations were suggested besides the one raised in the Discussion Paper, such as church and library sites on the eastern side, or at the end of Chester Street where traffic is less of an issue.
- c. Few felt that supermarket options on the western side and/or nearby centres was sufficient, and that an additional supermarket was not needed on the eastern side.

155. Specific feedback with regards to the western side was as follows:

- a. There were more mixed views about additional or new supermarkets, and this seemed to be affected by the fact that there is already a supermarket on the western side.
- b. Most respondents did not support planning incentives to deliver a supermarket.
- c. Some respondents saw supermarkets as a secondary consideration on the western side, instead considering smaller shops, services and other commercial floor space as more important.
- d. Some respondents suggested that DCP controls be drafted to support delivery of a supermarket, rather than incentives.

Conclusions and recommendations

156. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude and recommend the following principle**:

- a. That the requirement for 3 storey commercial podium (as discussed, above) would provide additional floorspace for commercial and retail uses that could assist in potentially delivering a supermarket on the eastern side.

Other Large Floorplate Retail Options

157. As noted in Section 8.5.4 of the Discussion Paper, Council has two Preliminary Planning Proposals seeking to increase FSR and height on sites on the western side of the Epping Town Centre. In both the proposals submitted there are large floorplate shops provided for in the lower levels. (Refer to **Figures 17 and 18**).

158. In order to achieve a role for Epping as a sub district centre, it is critical that these sites provide commercial levels in a podium and that larger floorplate shops are retained within it. The DCP currently requires up to a 4 storey podium be provided for the Beecroft Road Site (see **Figure 18**). However, the current planning controls do not contain any provisions that require the applicants to retain large floorplate outlets. There are also no controls that require a supermarket site be retained for the site on the western corner of Rawson Road and Carlingford Road

159. This type of landuse/planning control has traditionally not been specified in a DCP and instead it has been left to the market to determine the mix of retail shop sites in a development. However, it is recommended that Council

Council 14 August 2017

Item 11.3

strengthen its DCP controls to specify that large floorplate retail should be provided.

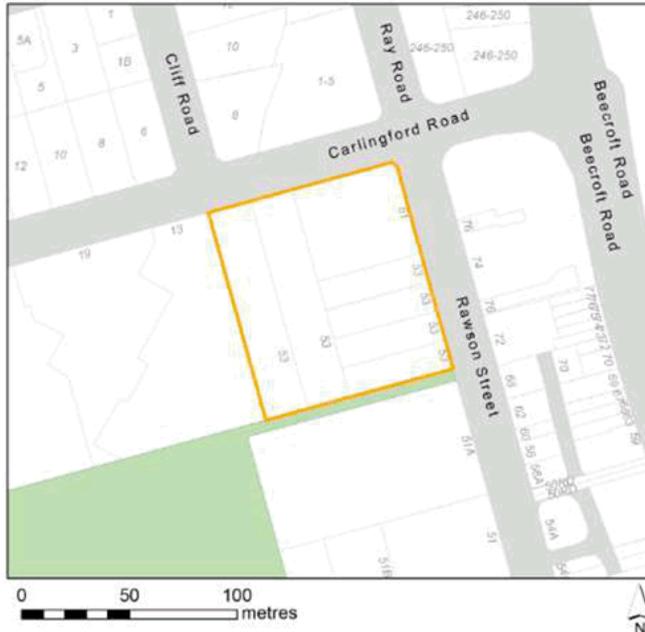

Figure 17 - Oakstand land holding

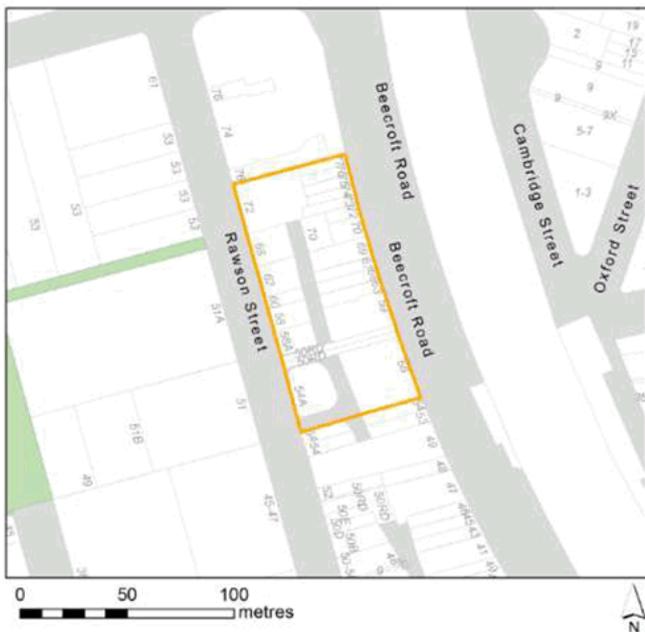

Figure 18 - Beecroft Road land holding

160. The circumstances for these sites are different to those discussed above in relation to providing a supermarket in the east. These sites have effectively already been amalgamated so there is no incentive required to promote amalgamation.

161. However, in both cases the applicants via their Preliminary Planning Proposals are seeking additional density on these sites over and above what is permitted

Council 14 August 2017

Item 11.3

under the current controls. There are various other issues, particularly traffic management and urban design, that need to be considered before any decision about whether these sites will be able to be developed at higher densities.

162. However, a position Council could take is that any additional density on these sites (subject to Council being satisfied it is satisfactory from a traffic and urban design point of view) would be conditional upon large floorplate shops being provided.

163. The Discussion Paper question (8i) asked: *Should Council consider floor space incentives to seek to ensure larger floorplate retail shops on these sites?*

Community Feedback

164. There was a common, though not unanimous, view that more retail options are required across Epping. However, amongst the respondents who discussed incentives, most did not want Council to consider incentives to encourage amalgamation of large floorplates.

Conclusions and recommendations

165. These two sites are subject to another standard question (11a) in the report that asks if further consideration of the Planning Proposals (including the Austino planning Proposal) be deferred until the Traffic Study is complete so the traffic implications are fully understood (see on Traffic Chapter, below).

166. Council Officers therefore, **recommend the following principle:**

- a. That the consideration of large floorplate controls be deferred until the preliminary planning proposals can be progressed. See also recommendations in Traffic Chapter, below.

SOCIAL INFRASTRUCTURE CHAPTER

167. Chapter 9.0 Social Infrastructure comes from technical work initially prepared for Council by Suter Planners and Elton Consulting on Council's social infrastructure across the City of Parramatta local government area. The analysis relevant to the Epping suburb was extracted and presented in the *Epping Social Infrastructure Study* prepared by Council which supported the exhibition of the Discussion Paper.

168. The role of the Chapter 9.0 Social Infrastructure is to identify principles that will guide future decision making on the provision of social infrastructure. The outcomes are via feedback received on the questions.

169. The Discussion Paper recognises that the process will also need to be informed by project feasibility and financial analysis prior to Council making any decisions on exactly how and where social infrastructure changes are pursued in the future.

170. The Discussion Paper looks at the areas requiring attention in Epping:

- a. Improving access to open space
- b. Location of potential future Civic Focal Point
- c. Methods for funding and delivering a potential future Civic Focal Point
- d. Dence Park - Epping Aquatic and Leisure Centre.

These are summarised below.

Improving open space provision in Epping to 2036

Council 14 August 2017

Item 11.3

171. Section 9.5.1 of the Discussion Paper discusses three issues that seek to improve open space provision to meet the Epping community's needs by 2036. These are outlined and addressed below.

Assessing where new land should be acquired for open space

172. The Discussion Paper's recommended principle is that Council look at opportunities to expand the size of existing parks over and above creating new parks. The Discussion Paper's standard question (9a.) asks: *Do you support an approach of expanding existing parks in and around Epping ahead of the creation of a new park in the area around the Epping Town Centre?*

Community Feedback

173. Feedback from both the submissions and Phase 2 Community Workshops shows very strong community support for expanding open space opportunities in Epping, though it is noted that not all submissions appeared to view this question as a choice between expanding existing parks versus creating a new park. (A more detailed summary of feedback to this question is contained in **Attachments 2 and 3**).

Conclusions and recommendations

174. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. The community's strong support for expanding access to open space is noted.
- b. Community sentiment reflects the directions outlined for open space (parks) in Council's draft Social Infrastructure Strategy (SIS), which is to be publicly exhibited between August – September 2017, and is expected to be finalised by the end of 2017. In relation to parks, the draft Strategy suggests no net loss of current parks and outdoor recreation space provision in the City of Parramatta LGA, to increase the utilisation and hours of use of Council's existing parks through improvements to quality and design, diversity of offer, enhanced pedestrian, cycle, public transport connections and or parking facilities, and further to seek to increase provision of open space for parks and outdoor recreation.

175. Council Officers therefore, **recommend the following principles**:

- a. That Council should investigate a series of detailed options to ensure that all its open space needs are met for the growing Epping population.
- b. That community feedback on expanding access to open space parks in Epping be considered as an information input to inform finalisation of Council's Social Infrastructure Strategy and the preparation of an Organised Sporting Asset Assessment Report (OSAAR) which is currently being drafted.

Acquisition of former bowling club site (725 Blaxland Road)

176. The Discussion Paper explains that a Planning Proposal by Austino Property Group applies (in part) to the former Epping Bowling Club site situated at 725 Blaxland Road (refer to **Figure 19** below). The site is currently zoned RE1 Public Recreation zone and identified for acquisition on the Land Reservation Map in *HLEP 2013*.

Council 14 August 2017

Item 11.3

Figure 19 - Former bowling club site – 725 Blaxland Road, Epping

177. Despite this, the Hornsby Council concluded in April 2016 that the purchase of the site for the purpose of expanding Forest Park *is unlikely to represent value for money when compared with alternative open space options within the locality.*
178. The applicant's planning proposal is currently proceeding through the Department of Planning and Environment's Pre-Gateway Review process. In November 2016, Council nominated to be the relevant planning authority (RPA) in order to have influence over the outcome. It did so on the condition that the Gateway Determination is issued after the exhibition of the Discussion Paper and technical studies. However, because the Traffic Study is not yet complete, Council is reluctant to determine the planning proposal until the proponent's proposed density has been tested within the traffic model. Regardless, at any point, the Minister for Planning can withdraw Council's status as the RPA and take full control of the planning proposal process and progress it in a way that may not fully address Council's or the community's concerns.
179. The Discussion Paper's standard question (9b.) asks: *Should Council purchase the former Bowling Club site separate from the current Planning Proposal process or continue to consider the Planning Proposal option that it be provided to Council subject to additional density being permitted on the existing landowners site?*

Community Feedback

180. Feedback from both the submissions and Phase 2 Community Workshops shows very strong community support in favour of purchasing the Bowling Club and for Council to not progress the Planning Proposal. (A more detailed summary of feedback to this question is contained in **Attachments 2 and 3**).

Conclusions and recommendations

181. Having considered the feedback from the Phase 2 consultations along with Council's analysis, Council Officers **conclude**:

Council 14 August 2017

Item 11.3

- a. Council's Property officers have since undertaken an indicative assessment of the valuation of the site and determine that its value is cost prohibitive. The analysis further finds that Council would achieve better value for money by purchasing individual residential R2 zoned properties elsewhere near the town centre for a new park. Indicative costing of this alternate approach is provided within the *Draft Former Hornsby Council/Epping Town Centre Development Contributions Plans* which are scheduled to be exhibited from August to September 2017.
- b. That should the planning proposal progress, that Council negotiate with the developer for the provision of public open space appropriately located and sized on the site.

182. Council Officers **recommend the following principle:**

- a. That Council should seek to progress the planning proposal with Council as the RPA subject to the Traffic Study being completed before FSRs for the site can be finalised. That Council also negotiate with the developer for the provision of public open space in a way that ensures there is a suitable area of open space which is appropriately sized and located.

Note: Refer also to the response to question 11a pertaining to *Consideration of Planning Proposals/Preliminary Planning Proposals*.

Process for acquiring open space

183. As noted within the Discussion Paper, Council will, as part of future phases of the planning process (initiated via the Discussion Paper) commence the feasibility analysis for identifying potential residential sites that could be acquired to expand existing parks. Consultation with land owners will precede any rezoning because in most instances they will be single detached homes. It will be necessary to explain to the occupants/owners the impacts on their property value, their ability to sell their site and the ability to stay on the site.
184. The Discussion Paper's question (9c.) asks: *Do you support Council pursuing a process where acquisition of land for open space is done on the basis of negotiated acquisition rather than compulsory acquisition?*

Community Feedback

185. With regards to the submissions received, there were mixed responses. Whilst respondents generally supported negotiated acquisition over compulsory acquisition, many other respondents expressed:
 - a. support for compulsory acquisition in limited circumstances only;
 - b. negotiated acquisition for private homes but compulsory at development sites;
 - c. support for any option which would increase open space; and
 - d. strict opposition to compulsory acquisition.

A more detailed summary of feedback to this question is contained in **Attachment 3**.

186. With regards to the Phase 2 Community Workshop, the predominant response supported negotiated acquisition with a few respondents not supporting the idea. (A more detailed summary of feedback to this question is contained in

Council 14 August 2017

Item 11.3

Straight Talk's *Epping Town Centre Review: Phase two – Exhibition period consultation report at Attachment 2*).

Conclusions and recommendations

187. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. Council has prepared a Council wide draft *Social Infrastructure Strategy* (SIS) which is scheduled for exhibition from August to September 2017. The draft SIS: *identifies and assesses existing social infrastructure provision in City of Parramatta LGA. It identifies contemporary challenges we have for realising quality social infrastructure, and finally key opportunities and directions by asset type (including open space) and for City of Parramatta's 13 high growth areas (which includes Epping). This draft Strategy applies to our unique and diverse neighbourhoods as well as our CBD.*
- b. Council is also preparing an *Organised Sporting Asset Assessment Report* (OSAAR). The OSAAR will further assist Council to understand the specific challenges and opportunities that existing with each of our sports fields and determine the priority actions to take to increase provision and utilisation of our sports field open space. This will include sports fields in the suburb of Epping.
- c. The Discussion Paper process which constitutes Stage 1 of the Epping Planning Review aligns with the approaches being undertaken for the draft SIS and OSAAR, both of which are about increasing access to green open space.

188. Council Officers therefore, **recommend the following principle**:

- a. That the findings, analysis and feedback from Stage 1 of the Epping Planning Review process relating to the process for acquiring open space be considered as part of the preparation of the final SIS and OSAAR projects

Utilising existing land more effectively

189. The Discussion Paper explains that there are a number of factors that determine the level of intensity of use of a local park or sports field, to ensure it can be used by the community without being degraded. Two key factors are the amount (or type) of landscaping on the site, and the level of maintenance required. The Discussion Paper provides two examples:

- a. re-configuring landscaping in existing parks could enable more active uses (including both unstructured play and organised sporting activities) while also accommodating for the needs of residents who want to use parks to passively enjoy the outdoors.
- b. provide a different surface treatment to playgrounds and sporting fields to accommodate a higher level of use, such as the use of synthetic sporting surfaces.

190. The Discussion Paper's question (9d.) asks: *Are you supportive of Council investing in improved landscaping and equipment in parks and sporting fields, including investigating synthetic surfaces for sporting fields to cater for more intensive use?*

Community Feedback

Council 14 August 2017

Item 11.3

191. Feedback from both the submissions and Phase 2 Community Workshops revealed there was unanimous community support for improving landscaping, equipment and parks in Epping. There were mixed views on synthetic surfaces, with some accepting and some against their use. The community urged a site-by-site consideration of parks with additional consultation to make future decisions about improvements to parks and sports fields. (A more detailed summary of feedback to this question is contained in **Attachments 2 and 3**).

Conclusions and recommendations

192. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. Council Officers recognise that the community of Epping support the upgrade and increased utilisation of parks and sports fields. Council Officers also acknowledge that there is mixed opinion for synthetic sports fields.
- b. The sports fields in the suburb of Epping must be analysed and planned within the context of the overall sports field network in the CoP LGA.
- c. Council has prepared a draft SIS which is scheduled for exhibition from August to September 2017. Work has also commenced on an LGA wide detailed organised sporting asset assessment (ie. the OSAAR).
- d. As part of the above documents Council will consider the use of synthetics and other options to increase utilisation and access to sports fields, as well as upgrades to parks within Epping.

193. Having considered the feedback from the Phase 2 consultations, Council Officers **recommend the following principle**:

- a. That the responses provided as part of the Phase 2 consultation process for the Epping Planning review relating to landscaping and synthetic surfaces for parks will inform the finalisation of the Social Infrastructure Strategy and Organised Sporting Asset Assessment Report. The intention is to finalise the SIS by the end of 2017.

Establishing partnerships to make better use of existing facilities

194. Large institutional landowners, including government and non-government schools, provide opportunities for Council to facilitate partnerships with local community organisations (such as amateur sports clubs) to make better use of existing facilities for the local community. In the case of schools, many children within the Epping community use their schools' open space areas during the week, but are unable to use the same fields on the weekend in organised sporting activities by non-school groups. The way in which schools are fenced off, and the way landscaping is used to prevent access is important to ensure the safety and supervision of students during school days, however there is an opportunity to consider further community use of schools' sporting fields.

195. Council considered a report on 13 June 2017 where it resolved to enter into a Memorandum of Understanding (MOU) with the NSW Department of Education (DOE). The associated Investigation Program identifies seven action areas that together form the basis of Council's initial work with DOE:

- a. Increase community access to sports fields.
- b. Establish formal arrangements between DOE and Council to continue use of Carlingford High School sports fields.

Council 14 August 2017

Item 11.3

- c. Increase community access to school halls and related facilities.
- d. Increase community access to library facilities.
- e. Proactive joint planning for the growth of Telopea and the shared use of school facilities and community assets.
- f. Proactive joint planning and preparation to support the opening of Wentworth Point Public School.
- g. Proactive joint planning of a primary school in the Carter Street Precinct.

196. The Discussion Paper sought feedback on how this MOU should be pursued in the Epping area through question 9e. *Which schools should Council pursue in the Epping area to progress the MOU between Council and the Department of Education to improve the availability of sporting fields?*

Community Feedback

197. The community's views from both submissions and the Phase 2 Community Workshops were as follows:

- a. There is broad support for use of school facilities.
- b. Some respondents query some of the detail about which schools and which facilities.

A more detailed summary of feedback to this question is contained in **Attachment 3**.

Conclusions and recommendations

198. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. That there is broad support for Council to work with schools to increase community use of school assets.
- b. Council is commencing implementation and this includes investigating the suitability of individual schools and assets for community use.
- c. Initial actions will focus on analysing the suitability of sports fields on specific school sites.

199. Council Officers therefore, **recommend the following principle**:

- a. That the detailed community feedback provided as part of the Phase 2 community engagement process for the Epping Planning Review inform the implementation of the MOU with the DOE.

Location of potential future Civic Focal Point

200. Section 9.5.2 of the Discussion Paper defines a **Civic Focal Point** as comprising:

- a. A library and community facility floor space; and
- b. A public urban plaza.

201. The Discussion Paper (and *Epping Social Infrastructure Study* which supports the Discussion Paper) identifies:

- a. That to meet the needs of a larger population living in a higher density environment by 2036, the Study recommends the provision of a 3,500sqm multi-purpose facility based on the Community Hub model

Council 14 August 2017

Item 11.3

(involving library and community facility floor space). This could include the co-location of an expanded library offering, as well as community meeting rooms, study areas, community programming facilities and the like.

- b. That the 550sqm Epping library facility requires an additional minimum 1,000sqm to meet current population needs.

202. The Discussion Paper subsequently proposes three options for a civic focal point within the Epping Town Centre:

- a. Rawson Street car park site (refer to **Figure 14**);
- b. Epping Library site (refer to **Figure 15**); or
- c. Two civic focal points each with a range of services.

203. The Discussion Paper then presents the Council Officer recommendation which is for Option 1 – Rawson Street Car Park site *as the site is better able to accommodate a Community Facility Hub and Civic Space in a way that can be integrated into the broader pedestrian network and town centre. ...[it] does not result in the loss of any existing community facility given that the public car park can be located underground below the new Community Facility Hub whereas the Epping Library Site and Pembroke Park would result in the loss of local open space if Pembroke Park was converted into a more formalised Civic Space.*

204. The city-wide Draft Social Infrastructure Strategy which is scheduled to be exhibited from August to September 2017, identifies the need to locate and plan for a civic focal point within the Epping Town Centre.

205. The Discussion Paper asked three questions relating to a Civic Focal Point:

- a. Questions 9f. and 9g. asked: *Where is your preferred location for a Civic Focal Point incorporating a Community Facilities Hub and some form of Civic Space? and Why is this your preferred location?*
- b. Question 9h. asked: *Would you support existing community facilities sites being sold to assist with funding a new consolidated single community hub to provide a higher quality community facility somewhere else within the Epping Town Centre?*
- c. Question 9i. asked: *Should Council seek to develop Council-owned sites to maximise the funding available to deliver a new Civic Focal Point?*

The responses to the above questions pertaining to a Civic Focal Point are consolidated below.

Options for funding and delivering a potential future Civic Focal Point

206. Section 9.5.3 of the Discussion Paper proposes three options for funding and delivering a potential future Civic Focal Point:

- a. Selling land that becomes surplus to requirements if a single Civic Focal Point is built;
- b. Maximise the development potential of sites to assist with funding a Civic Focal Point; or
- c. Allowing additional density to secure a new Civic Focal Point.

These are discussed below.

Council 14 August 2017

Item 11.3

Selling land that becomes surplus to requirements if a single Civic Focal Point is built

207. As noted within the Discussion Paper, all Council-owned sites located within the town centre have some development potential for which Council could realise value by selling the site for redevelopment. Council could seek to sell any number of sites it currently owns to provide funding for delivery of the community infrastructure discussed in this section.

208. The purpose of selling sites would not be to reduce the level of services. Instead, the strategy would be to provide improved services in a more efficient way on a consolidated site.

Maximise the development potential of sites to assist with funding a Civic Focal Point

209. As noted within the Discussion Paper, one option for funding the provision of Community Infrastructure is for Council to realise the value of land holdings in a way that provides the community with a financial return that can be used to assist with funding the new Civic Focal Point (the EOI process that Hornsby Shire Council undertook before the Local Government boundary changes that saw Epping included in the City of Parramatta is an example which involved the Council finding a partner to develop a site). Another avenue can be through a planning proposal process involving Council owned land. Two Preliminary Planning Proposal examples were provided in the Discussion Paper.

210. The redevelopment of Council owned land in partnership with other partners can deliver significant community benefits that will allow the delivery of community infrastructure in a more financially sustainable manner. The Discussion Paper seeks feedback on whether the community is comfortable with this approach.

211. The Discussion Paper's question (9i.) asks: *Should Council seek to develop Council-owned sites to maximise the funding available to deliver a new Civic Focal Point?*

Allowing additional density to secure a new Civic Focal Point

212. The Discussion Paper notes two Preliminary Planning Proposals, for sites adjoining the Rawson Street Carpark Site. Both propose an increase in the overall density permitted on their site and both proposals seek to underground the carpark, and provide community facilities and a civic space.

213. The Discussion Paper's question 9j. which asks the community to consider a trade-off between timely provision of community facilities against additional density being permitted in the town centre, was: *Are you willing to accept further increases in density in the town centre if it would assist with funding a new Civic Focal Point?*

Community Feedback

214. Community feedback received from the submission process and Phase 2 Community Workshops on questions 9f, 9g and 9h pertaining to a Civic Focal Point indicated mixed views:

- a. The most common response was a preference for two sites (and of these, most expressed support for the Rawson Street Car Park and Library sites). The key reasons for this included a preference for having different sites for different uses and a perception of "fairness" across both sides of the rail line.
- b. Of those who preferred a single site, the most common response was the Rawson Street Car Park site. The main advantages for this site

Council 14 August 2017

Item 11.3

were seen to be access, site size, parking and proximity to Boronia Park.

- c. There was proportionately more support for Council seeking to develop Council-owned sites, than for selling existing community facilities or accepting further increases in density from the Phase 2 Community Workshops. This feedback was more supportive of such redevelopment models of Council-owned sites.

215. Refer to Straight Talk's *Epping Town Centre Review: Phase two – Exhibition period consultation* report at **Attachment 2.a** more detailed summary of feedback at **Attachment 3**.

Conclusions and recommendations

216. Having considered the feedback from the Phase 2 consultations and submissions, Council Officers **conclude**:

- a. Council Officers note and support the community's preference for community facilities on both sides of the railway line.
- b. Council Officers note and support the community's preference for Council to use its current assets at Rawson St and Chambers Court (Epping Library) for community uses.
- c. Council officers note that there was no clear preference over the three options. However most support was given to the "developing council owned sites" option.

217. Council Officers therefore, **recommend the following principles**:

- a. That Council utilise its assets at Rawson Street car park and Chambers Court to provide community infrastructure and civic focal points on both sides of the town centre.
- b. That Council seek to develop a community hub (defined above) but on one of the sites and other adjunct uses for the other site.
- c. That there be no net loss of community facility floor space overall in Epping.
- d. That Council seek to increase the utilisation of all of Council's current assets in Epping for the broader community.
- e. That further feasibility testing of Council owned land assets should be undertaken (including additional community consultation) to develop options - including a Community Hub (defined in the Discussion Paper as a facility incorporating a library and community facility floor space) and public urban plaza - and potential funding mechanisms for community facilities in Epping.

Dence Park – Epping Aquatic and Leisure Centre

218. Council's *Social Infrastructure Study* identifies that the Dence Park – Epping Aquatic and Leisure Centre is aging and has accessibility issues which means it does not meet current standards for this type of facility. Hornsby Shire Council considered the option of closing the centre at the time the pool was its responsibility.

219. Section 9.5.4 of the Discussion Paper acknowledges that as part of the development of a community facilities strategy, Council will need to determine what role the Epping Aquatic and Leisure Centre might play. For instance,

Council 14 August 2017

Item 11.3

should the centre be redeveloped or modernised as an aquatic centre, or put to an alternate community use.

220. Through the Phase 1 community consultation process, it was clear the facility is a beloved community asset to sections of the Epping community. However, despite this impassioned position, usage levels of this facility have been in decline over the longer term, except in the last year where usage levels had actually increased since City of Parramatta took ownership.
221. The Discussion Paper noted the strengths and the weakness of the site. The strengths are that Council owns the land and that Council will open the pool for the October 2017 summer season. The weaknesses of the site are that:
- a. The Centre is aging, needs significant upgrading, and is at risk of significant infrastructure failure
 - b. It lacks visual prominence,
 - c. It is in a bushfire-prone site,
 - d. Is underutilized, and
 - e. The topography of the site makes modernising the site a relatively expensive exercise and impacts on its accessibility.
222. Adjoining bushland along Terrys Creek is a key wildlife corridor (confirmed in recent bushland fauna surveys).
223. The Discussion Paper's question (9k) asks: *What should be the future use of the Dence Park Aquatic Site?*

Community Feedback

224. The feedback from both the submissions and Phase 2 Community Workshops showed there was very strong community support to retain Dence Park for public and recreational uses. There was also strong community support to retain the swimming pool, and perhaps increase/improve it in some capacity with an expanded indoor fitness centre or similar uses. Furthermore, many respondents highlighted the environmental conservation value of the bushland and the need for its retention along with carefully selected passive recreational uses.

Conclusions and recommendations

225. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. Council's Draft SIS which is being exhibited from August to September 2017 draws attention to the LGA-wide issues pertaining to the overall aquatic infrastructure/network.
 - b. Adjoining bushland along Terrys Creek requires protection and there needs to be a restriction on the expansion of Dence Park aquatic facility.
226. Council Officers therefore, **recommend the following principles**:
- a. The feedback obtained from the Phase 2 consultation process be considered and integrated into the exhibition process for the Draft SIS.
 - b. A master plan process be undertaken for the entire Dence Park site, giving consideration to the future options for aquatic and other water related activities for the Epping Aquatic and Leisure Centre, as well as

Council 14 August 2017

Item 11.3

increasing the overall recreation uses of the site and adjoining sensitive bushland.

PUBLIC DOMAIN CHAPTER

227. The intense growth within the Epping Town Centre has presented Council with the opportunity to review aspects of the centre's public domain, identify opportunities for improvements and present these to the community for discussion. The feedback and direction will also assist Council in advising Development Application and Planning Proposal applicants until new planning controls can be formulated. The areas requiring immediate attention are pedestrian connections and footpath widths.

228. Numerous urban design themes have been consistently raised throughout the consultation process on:

- a. Pedestrian connections - That pedestrian connections should be:
 - i. created or improved either between or through blocks;
 - ii. improved between different land uses and attractors (i.e. the centre and open space areas);
 - iii. created at mid-block where block lengths were long; and
 - iv. improved to form linkages from one side of the centre to the other.
- b. A vibrant centre – The community are enthusiastic about the possible future of Epping. They want their town centre to reflect the vibrant, friendly, community which they are familiar with.
- c. Enable liveability - The community see that future infrastructure planning needs to “enable liveable town centres” as an overarching principle.

229. The Discussion Paper subsequently presented two public domain issues:

- a. Through-block connections, streets, laneways and arcades and shareways; and
- b. Wider footpaths (which pertain to building setbacks).

230. The Discussion Paper asked two questions each were supported by a diagram:

- a. 10a. *Are there any other through site links outside of those that are already proposed in Figure 30 that should be considered by Council?* and
- b. 10b. *Do you think the new ground floor setbacks proposed in Figure 31 for Epping Town Centre are appropriate?*

Community Feedback

231. Community feedback (from 23 submissions) received on the through-block connections indicated the following:

- a. Some submissions broadly reflected that any and all links should be encouraged, in order to improve safe and pleasant access across the town centre.
- b. Many submissions also identified specific existing links that they wished to see reflected in the map.

Council 14 August 2017

Item 11.3

- c. Some submissions proposed:
- extensions to existing links, and/or
 - where a new link could be created.

232. Community feedback (from 21 submissions) received on wider footpaths said the following:

- a. The majority of submissions were supportive of the new ground floor setbacks proposed in the discussion paper.
- b. Some submissions noted that having setbacks which are consistent are important, and noted that the desired setbacks are not being achieved consistently through current controls (particular concern about current redevelopment at 35 Oxford Street).
- c. Some respondents felt that setbacks should be further increased (for example, on Oxford Street, Epping Road and Beecroft Road); justifications included that increased setbacks might provide space for larger trees, and that footpaths will continue to get busier in the town centre as Epping grows and that this could present safety and accessibility risks – particularly to those with limited mobility. Trees were seen in some submissions as being important to Epping's character, as well as having shading, cooling and aesthetics benefits.
- d. Some respondents also asked Council to consider cycling movement through Epping, as increasing bicycle trips could improve traffic issues.
- e. A couple of respondents were not supportive, as it was felt that the current setback situation is adequate.
- f. One developer was also not supportive of the proposed setbacks and instead proposed that setbacks be flexible in order to accommodate large retail/commercial floorplates at podium levels, should be determined at a master planning stage, and that having tightly controlled setbacks might not achieve the best outcome in all cases.

233. Refer to **Attachment 3** for a summary of the submission responses. Also, Public Domain matters were not covered by the Community Workshop Sessions.

Conclusions and recommendations

234. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. There are a number of opportunities to improve the public domain in terms of delivering through-block links and wider footpaths.
- b. The best mechanism for delivering public domain initiatives is via new DCP controls (where appropriate) and a revised public domain plan.

235. Council Officers therefore, **recommend the following principles**:

- a. That as part of Stage 2 of the Epping Planning Review, that Council prepare appropriate DCP controls and a public domain plan that deliver through-block links and wider footpaths.

TRAFFIC CHAPTER

Council 14 August 2017

Item 11.3

236. As noted on the Discussion Paper, Council has commissioned EMM Consulting to prepare a Traffic and Land Use Options Study (Traffic Study) to provide an evidence-based approach to the assessment of existing and future traffic conditions with different development scenarios for the Epping Town Centre and surrounds, including potential infrastructure improvements.
237. The Traffic Study builds on traffic study work which was carried out previously by Halcrow in 2011 on behalf of Hornsby Shire Council, the former Parramatta City Council and the Department of Planning and Environment as part of the proposed new planning controls implemented by the Department of Planning and Environment in 2014.
238. There are significant concerns from the community around the impacts of the additional residential densities permitted under the 2014 planning controls given the additional population envisaged and the subsequent impacts on an already congested and constrained road network. There is also increasing developer pressure to increase residential densities (through Planning Proposals) beyond that permitted under the existing planning framework.
239. EMM prepared an *Interim Traffic Modelling Report* which was exhibited as supporting information to the Discussion Paper. It included preliminary analysis to provide an indicator of the issues and options available to allow discussion of these issues as part of the exhibition process.
240. The preliminary advice concludes that regardless of what land use density options or road work improvements are put in place there is little scope for significant improvements to the way the road network operates in the Epping Town Centre without new and additional policies to reduce car usage and shift more trips that currently come through the centre by car onto public transport modes.
241. This chapter of the Discussion Paper presented six questions that play a role in developing the scenarios for the purposes of the traffic model exercise.

Consideration of Planning Proposals/Preliminary Planning Proposals

242. The Discussion Paper explains the level of developer interest in the Epping Town Centre with three planning proposal under assessment and other land owners also expressing a desire to seek uplift.
243. The standard question (11a) asks: *Should Council delay the processing of current and future Planning Proposals within the Epping Town Centre and surrounds until the Traffic Study is completed?*

Community Feedback

244. This matter received a total of 103 submissions - the most received for any standard question.
245. The predominant view (94 submissions) is overwhelmingly in favour of delaying the progression of any planning proposal including existing planning proposal, preliminary planning proposals and future planning proposals.
246. The majority of submissions to this question also raised concerns about existing traffic congestion in Epping (particularly around the Town Centre). Specific matters raised included:
- a. Residential growth has already outpaced the original traffic review carried out by Hornsby Council.

Council 14 August 2017

Item 11.3

- b. There is a need to address traffic flows in and out of North Epping before further major developments are started.
 - c. The volume of traffic has already increased markedly over the past decade and this is significantly detracting from the amenity of the Town Centre, with current levels of congestion only likely to worsen.
 - d. A workable traffic solution for existing problems needs to be developed by Council and the RMS before any future Planning Proposals should be considered.
247. There was a broad view that further traffic analysis is required, and commentary on the Traffic Study was offered. Many submissions suggested that any additional impact from Planning Proposals (both current and future) needs to be carefully studied and understood, and that Council should not delay pending traffic studies.
248. A few submissions mentioned that the quality of the recommendations in the Traffic Study will depend on the quality of the assumptions made during the modelling performed. It was suggested that the Traffic Study should be peer reviewed and made available for public comment prior to finalisation. One submission recommended that the Traffic Study should assess usage and movement patterns in areas such as Cliff Road.
249. A total of 16 respondents specifically recommended that the Austino Planning Proposal be placed on hold until the Traffic Study is finalised, citing concerns about the level of density and the impact on local area traffic. In contrast, a developer submission from Austino strongly disagreed that current planning proposals be delayed until the traffic study is completed; this submission stated that this is currently the only major site in Epping that has been determined to have strategic merit by the NSW Department of Planning and Environment, the JRPP, and has been supported on traffic grounds by the RMS.
250. Some community responses sought to also delay development applications. However, under the *Environmental Planning and Assessment Act 1979* this is not legally possible. This position has been reinforced by Council's Administrator at the public launch of the Epping Planning Review in December 2016 as well as at subsequent community consultation sessions.
251. The above views were also expressed at the Community Workshop Sessions. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

Conclusions and recommendations

252. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
253. The Epping Town Centre currently experiences significant traffic delays during morning and afternoon peaks as a result of the significant amount through traffic as well as increased residential densities resulting from the new planning controls implemented in 2014. Until the traffic impacts of allowing increased development above and beyond current planning controls are properly understood (including the cumulative impact of current and potential planning proposals), any planning proposal should not be finalised.
254. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

Council 14 August 2017

Item 11.3

- a. Council has deferred consideration of a Planning Proposal and two Preliminary Planning Proposal processes on account of the work being undertaken by the Epping Planning Review:
 - i. The Austino Planning Proposal seeking to deliver an additional **272 dwellings**.
 - ii. The Oakstand Preliminary Planning Proposal seeking to deliver an additional **922 dwellings***.
 - iii. The Winten/Lyon Group Preliminary Planning Proposal seeking to deliver an additional **584 dwellings***.

Note: with regards to the two preliminary planning proposals, it is accepted that the dwelling numbers as currently proposed cannot be delivered simultaneously as both proposals seek to develop Council's car park.

- b. In addition to the above, Council is aware of at least two other land holders potentially looking to pursue a planning proposal process. Therefore, there is an urgent need to understand the traffic issues prior to advancing proposals that seek development growth above the March 2014 planning controls.
- c. The Epping Town Centre has been doing a lot of the "heavy lifting" for the residential growth in this vicinity of Sydney. With the number of planning proposals and precinct planning projects across the LGA before Council, Council does not require any further uplift in Epping for the purpose of meeting its housing targets as expressed in the Greater Sydney Commission's *Draft West Central District Plan*. Also, as has been made clear, the scope of the Epping Planning Review has been to address the failings of the planning system that came into effect in March 2014. As such, additional requests for rezoning (received through the submission process) will not be considered as part of the Epping Planning Review.
- d. The pace of change is having a significant impact on the Epping residents. Council should therefore continue to manage any further formal requests for uplift (eg. planning proposal applications) outside of the Epping Planning Review process and be subject to the Epping Traffic Study which is still being completed.
- e. The scope of the traffic analysis has been undertaken to better understand the traffic impacts of any growth, not necessarily to enable any further growth within the Town Centre. Therefore, there is no urgency or need for Council to consider individual requests for uplift as part of the Epping Planning Review process. Instead, that applicant's seeking uplift should do this via a formal planning proposal process.
- f. There is some urgency in bringing about the planning control changes to address the unintended impacts associated with the new planning controls that came into effect in March 2014 as soon as possible. The inclusion of other landowner sites within the Stage 2 process will only cause further delay to this process.

255. Council Officers therefore, **recommend the following principles:**

- a. That Council continue to manage and progress the current planning proposal (Austino) given the potential risk of not being the Relevant Planning Authority (ie. the State Government becoming the Relevant

Council 14 August 2017

Item 11.3

Planning Authority). As mentioned previously, this is to ensure that Council's and the community's concerns and issues are addressed (eg. open space – refer to 'Acquisition of former bowling club site (725 Blaxland Road)' in Social Infrastructure section (ie. Response to question 9b). However, should the proposal proceed to Gateway Determination, that Council request that a condition be placed on the Gateway to ensure that the proposed FSRs for the site cannot be finalised until the Traffic Study is completed.

- b. That following the Local Government elections in September 2017, the new Councillors be consulted and briefed on the progress of the Epping Planning Review and the community feedback received with regards to the future of the Rawson Street Car Park. This will enable Council officers to engage with the applicants of the 2 Preliminary Planning Proposals (Winten Lyon and Oakstand) to allow these proposals to be further considered.
- c. That other landowners seeking to pursue development uplift will need to pursue this via a formal planning proposal process and not through the Epping Planning Review process.
- d. That the Traffic Study must be completed to ensure that the traffic impacts of proposals seeking development uplift (with the exception of those changes proposed to deal with the unintended impacts of the previous UAP planning process) within Epping can be properly understood prior to any proposal being finalised. Furthermore, unless innovative solutions or initiatives that significantly curb or restrict car ownership/movements are incorporated as part of the development, that proposals seeking uplift will not be able to progress or be further considered given current traffic issues in Epping. Notwithstanding the above, any proposed parking/vehicle management solutions need to be assessed via the Traffic Study in order to determine its impact on the wider road network.

Car Parking Rates

256. Section 11.7.2 of the Discussion Paper explains the inconsistency between the parking rates between the Hornsby and Parramatta DCPs and the need to make them consistent. The Discussion Paper notes that parking rates should be reviewed and potentially further reduced to encourage residents to use public transport and other active transport modes.
257. The objectives around reducing car parking rates in DCPs is to minimise local car ownership and decrease private motor vehicle use.
258. The Discussion Paper's question (11b.) asks: *Should Council consider further reducing car parking rates as a means to reducing traffic within the Epping Town Centre and encourage public transport usage?*

Community Feedback

259. Community views (from a total of 38 respondents) were mixed with just over half of submissions not supporting this approach to reducing traffic.
260. Respondents that were not supportive (22) were of the view that reduced availability of car parking spaces will result in more on-street parking. Several believed that the current parking rates were reasonable and should not be changed. Some were sceptical on whether this would actually work in terms of

Council 14 August 2017

Item 11.3

reducing car ownership, and felt a more effective approach to reducing congestion would be to limit development instead.

261. Respondents that were supportive (11) generally took the view that the number of cars on the roads need to be reduced, with some supporting any measure to reduce the traffic load on Epping. Some submissions which were broadly supportive did note that reduced rates would be more appropriate for residential uses than for retail and service providers.
262. Many submissions were of the opinion that owning a car is necessary and that people cannot rely on public transport. These submissions mentioned that the new residents will need cars to move families around to libraries, school, after school activities, pick up from the station etc.

Conclusions and recommendations

263. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
264. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. That given the results of the interim traffic findings, reducing car parking rates is an important planning and traffic mechanism that can contribute towards the reduction of local car ownership and alternatively promote active and public transport options through and within Epping.
265. Council Officers therefore, **recommend the following principles**:
- a. The car parking rates across the Hornsby and Parramatta DCPs be reviewed to determine appropriate lower parking rates.
 - b. That any proposed lower parking rate be tested as part of the traffic modelling in the Epping Traffic Study before changes are finalised.
 - c. That further to points a. and b. above, an interim step towards reducing parking rates could be to amend Hornsby DCP parking controls (which have minimum parking rates) to be in line with Parramatta DCP parking controls (which have maximum parking rates).

Commuter Parking Station

266. Section 11.7.3 of the Discussion Paper explains that a number of stakeholders suggested that Council should either provide or lobby the State Government to provide commuter parking near the Epping Station. The argument put forward by proponents is that this would clear surrounding streets of commuter parking and improve access to local shops for local people.
267. Commuter parking at train stations is a complex issue that depends very much on local context. It is acknowledged that allowing people to drive to stations to use public transport is decreasing the length of cross-city vehicle trips and increasing the length of public transport trips which is to be encouraged. However, the provision of commuter car parks can have other unintended impacts unless it is implemented sensitively and in appropriate locations.
268. Again, the objectives around the car parking policy for the Epping Town Centre is to minimise local car ownership and decrease private motor vehicle use.

Council 14 August 2017

Item 11.3

269. The Discussion Paper's question (11c.) asks: *Is there a suitable site for which Council should lobby the State Government to have a commuter parking station provided near Epping Station?*

Community Feedback

270. A total of 38 submissions were received with opinions split on this issue.

271. Across submissions supportive of commuter car parking, there was a view that the current situation where commuters park in local streets was not acceptable, as it affected locals, visitors, and businesses. Providing commuter car parking was seen as potentially increasing residents' usage of the rail line; current bus service was generally seen as poor, with commuter car parking as a better alternative. However, it was also noted that elderly residents who were unable to drive might still struggle to use transport.

272. The needs of neighbouring suburbs were also considered in some submissions, with the view expressed that North Epping residents need commuter parking as well; Transport for NSW's current investigations of a similar solution at Eastwood was also raised.

273. As noted above, several ideas about commuter car park sites were suggested:

- a. 240-244 Beecroft Road, mainly due to good station access,
- b. Above Epping Train Station,
- c. Above Rawson Street Car Park,
- d. Under current library site,
- e. Older apartment complex near Epping Station, through an acquisition process, and
- f. Inside newly constructed residential towers.

274. Many submissions took a broader view that any site considered should be within walking distance of the town centre and train station, while others were willing to consider sites outside the town centre in combination with shuttle buses to the station.

275. Amongst submissions not supporting commuter car parking, there was a common view that commuter parking would only increase traffic and local car use. Some felt that this would incentivise commuters from other suburbs coming into Epping to park, thereby impacting the road network and taking away parking from local residents. Others felt there was no suitable space in Epping for a commuter parking station, while others felt that a commuter parking station was a lower priority than valuable commercial, retail and residential space. Some felt that a low-cost shuttle bus would be a better alternative.

276. The above views were also expressed at the Community Workshop Sessions. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

Conclusions and recommendations

277. Having considered the feedback from the Phase 2 consultations on a commuter car parking station in the Epping Town Centre, Council Officers maintain the views expressed in the Discussion Paper and therefore **conclude** the following:

Council 14 August 2017

Item 11.3

- a. It will attract additional trips into the Epping Town Centre for the sole purpose of utilising the car park which will have a further detrimental impact on local traffic conditions and increase traffic congestion.
- b. It will encourage local employees to drive to the centre rather than arrive via public transport due to the increased access to day long parking options.
- c. Experience in other centres suggests that the availability of day long parking encourages more commuters to make the choice to drive to the station because of the increased likelihood they can find a park. If all spaces within the commuter car park are occupied, drivers will park on the street. So parking availability on local streets is not improved.
- d. An integrated transport system would see people take the bus from close to their home to the station to continue their public transport journey. This is most efficient and effective if regular bus services are feasible. The more commuter parking is provided the greater the negative impact on the feasibility of running regular bus services especially given the number of buses that provide access to Epping.
- e. Commuter parking stations do play an important role in promoting public transport but do not consider that Epping is an appropriate location for a commuter parking station.

278. Council Officers therefore, **recommend the following principles:**

- a. That Council Officers not pursue a policy of providing a commuter car parking facility within the Town Centre.

Policies to manage local parking and access to private motor vehicles

279. Section 11.7.4 of the Discussion Paper proposes two options to discourage residents that purchase into new high density development from parking in local residential streets:

- a. Resident or controlled parking schemes; and
- b. Car sharing scheme.

280. As Section 11.7.4 of the Discussion Paper noted, a commonly expressed concern when any proposal is put forward to decrease parking rates on site is that residents will still own a car and will park it on local streets. Should Council consider introducing maximum rates or reducing car parking rates below the "maximum rates" identified in the PDCP 2011 in order to influence mode shift, it is considered that additional measures could also be investigated to discourage residents purchasing into new high density development do not end up parking in local residential streets.

Resident or controlled car parking schemes

281. The Discussion Paper notes that a rollout of restricted/time limited parking zones within residential streets adjacent to higher density development could be investigated along with a resident parking scheme to enable existing residents within lower density residential zones up to a 3 storey apartment building to have the opportunity to apply for a permit to enable residents and their visitors to continue to have on-street parking albeit in a limited and controlled manner. Such initiatives also discourage commuters from parking within local streets close to Epping Station and depending on the nature of the restricted parking roll out, can encourage commuters to catch a bus to the Epping Station.

Council 14 August 2017

Item 11.3

282. The fundamental objectives around introducing a resident or controlled parking scheme is to minimise local car ownership and decrease private motor vehicle use.

283. The Discussion Paper's question (11d.) asks: *Would you support the introduction of a Resident Parking Scheme where owners of new units would not be permitted to park on local streets as a way to discourage car ownership and manage parking on local streets?*

Community Feedback

284. Community views (from a total of 41 respondents) were mixed with more than half of submissions supporting this approach to reducing traffic.

285. Respondents that were supportive generally supported introducing restricted/time parking zones within residential streets adjacent to high density residential development. Others suggested delineating a radius around the station to which the scheme would apply. Others suggested that Council remove "full day" parking in favour of different timed parking options which radiated out from the centre. There was also a specific request for extension of 2-hour parking farther along Oxford Street.

286. Respondents that were not supportive had the following opinions:

- a. Many respondents felt that people would want to own cars, regardless of efforts made by Council to encourage behaviour change.
- b. Some were concerned about how the value of units might be affected with the introduction of a scheme. One was unsure about how this approach could help with reducing car ownership.

287. The above views were also expressed at the Community Workshop Sessions. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

Conclusions and recommendations

288. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.

289. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. There is strong community support for a residential or controlled parking scheme

290. Council Officers therefore, **recommend the following principle**:

- a. That Council officers carry out further investigation around the potential implementation of a resident parking scheme in Epping in order to minimise local car ownership and decrease private motor vehicle use.

Car sharing scheme

291. As noted within the Discussion Paper, car sharing enables more sustainable travel habits by making more efficient use of a parking space either on street or within a private development. A single car share vehicle can replace up to 12 private vehicles that would otherwise compete for local parking (source: www.cityofsydney.nsw.gov.au/live/residents/car-sharing). Car share schemes provide flexibility to residents or businesses who either do not own a car, cannot justify car ownership given close proximity to public transport or lack of

Council 14 August 2017

Item 11.3

a parking space. Resident and businesses can book a car online when they need one and pick it up from a car share space.

292. Furthermore, car share users are charged by time and distance, at a rate set by each operator (e.g. GoGET, Hertz24/7). Costs associated with fuel, vehicle maintenance and insurance are usually included in the operator's hire fees. Car share spaces can be located on street with the agreement of Council or within larger scale developments.
293. The objectives around introducing a car sharing scheme is to minimise local car ownership and decrease private motor vehicle use.
294. The Discussion Paper's question (11e.) asks: *Do you support car sharing schemes as measures to decrease vehicle ownership and the potential impacts of decreasing parking rates for sites within walking distance of Epping Station?* This question sought feedback on reducing the rates of car parking provision in new development in the town centre.

Community Feedback

295. Community views were mixed on this question, with the majority of respondents supporting this approach to reducing traffic. Of those supporting the scheme:
- a. Many respondents offered feedback about providing and locating potential spaces:
 - i. Some suggested dedicated spaces be created on both sides of the railway to reduce walking distance for all residents.
 - ii. Some proposed a collaborative approach with neighbouring councils as was the idea of working in a network (along with existing car share facilities at Macquarie Park).
 - b. Other views saw that car share spaces need to be dedicated for car share only, and that spaces should be included in new developments. One developer noted that they would be willing to include car share spaces in their basement parking allowance.
 - c. Some views expressed uncertainty about the effectiveness of car share schemes (even across some of those who were supportive). Some were unsure if it would work effectively in the suburbs, while others were unsure if it would actually reduce car ownership rates.
 - d. Some submissions suggested that Council would need to actively promote and make the community aware of alternative transport options like car sharing in order for this approach to have a positive impact.

Conclusions and recommendations

296. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
297. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. On 13 June 2017, the Parramatta Traffic Committee (PTC) and Traffic Engineering Advisory Group (TEAG) approved a number of car share spaces across the city (Item 1705 A3). However, it excluded a 6 car share parking spaces in Epping because whilst: *Council notes that car share may be an important element of creating a less private car*

Council 14 August 2017

Item 11.3

dependent town centre, that car share arrangements be considered as part of the current traffic and land use study for Epping. No further action be taken on car share spaces in Epping until this study is complete.

- b. The community feedback received on this issue reveals there is overwhelming support by Epping residents.

298. Council Officers therefore, **recommend the following principles:**

- a. That Council introduce a car share scheme in the Epping Town Centre as per the recommendations within the PTC report of 13 June 2017.
- b. That the potential for car share schemes to be provided within a development be further explored and if technically supported, be introduced as new DCP controls as part of Stage 2 of the Epping Planning Review.

Policies to manage local traffic congestion

299. Section 11.7.5 of the Discussion Paper proposes a "Stop/Go" traffic controller to manage pedestrian activity at the pedestrian crossing on Rawson Street adjacent to the Rawson Street car park.

300. The Discussion Paper's standard question (11f.) asks: *Do you think Council should employ crossing attendants during peak conflict periods at the Rawson Street pedestrian crossing to manage the flow of pedestrians and vehicles to best manage congestion in Rawson Street?*

Community Feedback

301. With 44 submissions, the community was divided on this issue, with an equal number of submissions supporting/not supporting this approach and a small number undecided. The reasons for supporting the proposal were around improving pedestrian safety and managing congestion. The reasons for not supporting the proposal were around skepticism of its success.

302. The above views were also expressed at the Community Workshop Sessions. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

Conclusions and recommendations

303. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude:**

- a. Council should consider funding a "Stop/Go" traffic controller on the crossing during peak times to control pedestrians, it would cost of up to \$10,000 per month inclusive of all on costs.
- b. There are technical legal questions over the enforceability of a "Stop/Go" traffic controller.
- c. The effectiveness of a "Stop/Go" traffic controller is also limited, having to be positioned on one side of the street.

304. Council Officers therefore, **recommend the following principles:**

- a. That Council trial a "Stop/Go" traffic controller at the pedestrian crossing on Rawson Street adjacent to the Rawson Street car park for a period of 2 months and report on the effectiveness of the trial to Council's PTC and TEAG by the middle of 2018.

Council 14 August 2017

Item 11.3

COMMUNITY FEEDBACK – GENERAL COMMENTS

305. As has been noted within this report, the scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
306. Whilst the purpose of the exhibition was to seek the wider community's opinion on the Discussion Paper's questions, other matters were raised that are outside the scope of this phase of the study. A broad summary of the issues raised is provided below:
- a. The predominant theme from submitters are concerns around:
 - i. Overdevelopment of the Epping Town Centre in terms of what has been built since March 2014, and
 - ii. Further developer interest in the area by way of planning proposals (either existing, preliminary or future planning proposals).
- These concerns largely relate to the associated traffic impacts, construction impacts, tree loss, character loss, heritage loss, parking concerns, visual impacts (regarding inappropriate building heights) and environmental impacts.
307. Some submitters situated outside the town centre core have requested upzonings. Council's response is that the Epping Town Centre has been doing a lot of the "heavy lifting" for the residential growth in this vicinity of Sydney. With the number of planning proposals and precinct planning projects across the LGA before Council, Council does not require any further uplift in Epping for the purpose of meeting its housing targets as expressed in the Greater Sydney Commission's *Draft West Central District Plan*. As has been made clear, the scope of the Epping Planning Review has been to address the failings of the planning system that came into effect in March 2014. As such, additional requests for rezoning (received through the submission process) will not be considered as part of the Epping Planning Review process.
308. A submission table details Council Officers response to general issues raised, is detailed in **Attachment 4**.

RECOMMENDATIONS

309. The recommendations detailed in this report are consolidated and contained in **Attachment 6**.

NEXT STEPS

310. As has been noted, the scope of the Epping Planning Review is limited to better managing the impacts of new development generated from planning controls that came into effect in March 2014 and allowing Council to manage current (formal and preliminary) planning proposals seeking growth in the town centre. It is also intended to allow Council to progress decisions made by Hornsby Shire Council on specific heritage matters when it governed part of the Epping suburb.

Council 14 August 2017

Item 11.3

311. The recommended principles from Stage 1 also impact on other policy areas of Council which are outside the changes to planning controls to be covered in Stage 2. The findings and analysis carried out to date will be used to inform further work in these areas (ie. social infrastructure) as part of separate processes.
312. Once the new Councillors have been elected, a briefing will be undertaken on the Epping Planning Review process to date, including the endorsed principles, to confirm the future planning direction for Epping as part of progressing Stage 2 of the project.
313. Further discussion with the DP&E will be carried out to determine the appropriate mechanism for which to implement Stage 2 of the Epping Planning Review. For instance whether this can be carried out via a new State Environmental Planning Policy (similar to the previous mechanism which implemented the March 2014 planning controls) or alternatively, via a Planning Proposal process.
314. The community that have given their time in such a generous way to contribute to this stage of the Review will be thanked and advised of the outcomes. Council will continue to engage with the community through future stages of the review.

FINANCIAL IMPLICATIONS

The only recommended principle that would have an immediate and direct financial implication for Council is the trial of a Stop/Go Controller for 2 months (see **point 304**), which would cost Council \$20,000. This would be funded from an existing operational budget.

MINUTES OF THE MEETING OF CITY OF PARRAMATTA COUNCIL HELD IN THE JUBILEE ROOM, PARRAMATTA TOWN HALL, CENTENARY SQUARE, PARRAMATTA ON MONDAY, 14 AUGUST 2017 AT 6:08PM

PRESENT

Amanda Chadwick – Administrator

ACKNOWLEDGEMENT TO TRADITIONAL LAND OWNERS

The Administrator, Amanda Chadwick, acknowledged the Burramattagal people of The Darug Nation as the traditional custodians of this land and paid respect to their ancient culture and their elders past and present.

WEBCASTING COUNCIL MEETING

The Administrator, Amanda Chadwick, advised that this public meeting is being recorded and streamed live on the internet. The recording will also be archived and made available on Council's website.

The Administrator further advised that all care will be taken to maintain privacy, however as a visitor in the public gallery, the public should be aware that their presence may be recorded.

MINUTES

	SUBJECT	Minutes of the Council Meeting held on 27 July 2017
720	RESOLVED	(Chadwick)
	That	the minutes be taken as read and be accepted as a true record of the Meeting.

APOLOGIES

An apology was received and accepted for the absence of the Chief Executive Officer, Mr Greg Dyer.

DECLARATIONS OF INTEREST

The Administrator, Amanda Chadwick, advised that she does not own any property in the City of Parramatta Council local government area nor have a direct or non-direct conflict of interest in any matter on the current agenda but noted that in relation to Item 11.3 regarding the Epping Planning Review – Completion of Stage 1 and commencement of Stage 2, she is a member of car share group GoGet.

MINUTES OF THE ADMINISTRATOR

5.1	SUBJECT	Update on the Formation of City of Parramatta Council
-----	---------	---

SUSPENSION OF STANDING ORDERS

- 737 RESOLVED (Chadwick)
- That** Standing Orders be suspended to enable consideration of item 11.3 regarding the Epping Planning Review – Completion of Stage 1 and Commencement of Stage 2.

LEADING

- 11.3 SUBJECT Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2
- REFERENCE F2017/00210 - D05111630
- REPORT OF Snr Project Officer. Also Administrator Briefing Note from Senior Project Officer dated 14 August 2017. Also correspondence from Frances and Richard Lyons, Wai Ling Chan and Save Epping's Forest Park.
- 738 RESOLVED (Chadwick)
- (a) **That** Council receive and note the submissions made on the Epping Planning Review Discussion Paper.
- (b) **That** the recommended principles, as identified within the report and contained within **Attachment 6** be endorsed for the purposes of guiding Stage 2 of the Epping Planning review subject to the following amendments:
- Traffic Chapter – Consideration of Planning Proposals/Preliminary Planning Proposals
 Clause 255, recommended principle a. be replaced with the following:

a1. That Council write to the Department of Planning and Environment (DPE) advising that significant progress has been made on the Traffic Study to date, however further work still needs to be carried out and land use scenarios tested before this Study can be completed. Council will also confirm that it seeks to retain Relevant Planning Authority status relating to the Austino Planning on the basis that the planning proposal cannot be finalised until the traffic study is completed and to ensure that the community's concerns and issues are addressed (e.g open space – refer to 'Acquisition of former of former bowling club site (725 Blaxland Road)' in Social Infrastructure section (ie Response to questions 9b).

a2. That given the status of the traffic study detailed above, current Preliminary Planning Proposals (Winten Lyon and Oakstand) and any future planning proposals should not be finalised until the Traffic Study is completed.

Traffic Chapter – Car Parking Rates

Clause 265, include the additional principle below:

d. That Council receive a report at the next Council meeting for the purpose of amending the Hornsby DCP parking rates to ensure consistency with the CoP DCP parking rates

Social Infrastructure Chapter – Dence Park – Epping Aquatic and Leisure Centre

Clause 226, include the additional principle below:

c. That the Master Plan for Dence Park be prepared 2018/2019 and include the base assumption of an aquatic facility of 50m.

Heritage Chapter – Rosebank Avenue

Clause 53, recommended principle a. be replaced with the following principle and delete principle d.:

Refer to Alternate Principle - Heritage below.

Heritage Chapter – 1, 3, 3A, 5, 7 and 7A Norfolk Road and 25 Pembroke Street

Clause 96, recommended principle a.ii. be replaced with the following principle:

Refer to Alternate Principle – Heritage below.

Heritage Chapter – Rose Street Precinct

Clause 110, recommended principle a. and b. be replaced with the following principle:

Refer to Alternate Principle - Heritage below.

Alternate Principle - Heritage

That the development of 2 storey 'manor houses' within the following precincts be pursued in response to the current interface issues being experienced by residents. However, as part of this process further work should also be carried out to test the benefits of 3 storey residential flat buildings with all the appropriate DCP controls, for example setbacks, amalgamation patterns to determine whether an alternative approach may be more appropriate.

- Rosebank Avenue (full length of Rosebank Avenue excluding existing heritage listed items)
- 1, 3, 3A, 5, 7 and 7A Norfolk road and 25 Pembroke Street
- Rose Street Precinct (with the inclusion of 70,72 and 74 Essex Street forming part of this Precinct)

(c) **That** Council Officers:

- 1 Brief the incoming Councillors on the Epping Planning Review process to date including the endorsed principles to confirm the future planning direction for Epping as part of progressing to Stage 2 of the project, and
- 2 That following the above briefing, a further report be submitted to Council recommending the commencement of Stage 2 of the Epping Planning Review which will involve preparing new planning controls including:
 - 2.1 A planning proposal to amend both the *PLEP 2011* and *HLEP 2013*
 - 2.2 A development control plan amendment to amend PDCP 2011 and HDCP 2013
 - 2.3 Amendments to relevant Contributions Plans and public domain plans where relevant.

(d) **That** the recommendations contained within **Attachment 5** detailing the outcomes of the Stage 6 Heritage Review be endorsed.

(e) **That** Council write to the community thanking them for their feedback and advising them on the outcome of Stage 1 Review and next steps

(f) **That** Council write to the Minister for Planning, Greater Sydney Commission, Department of Planning and Environment, Transport for NSW and the Roads and Maritime Services to provide an update on the project and an outline of the next steps.

(g) **Further, that** the finalisation of LEP amendments proposing changes to zoning, height and FSR controls come into effect at the same time as relevant DCP controls relating to this

development (excluding Draft Section 94 Plan and DCP amendments relating to tree protection and parking rates).

NOTE:

Amanda Chadwick declared an interest in this matter, as she is a member of car share group GoGet.

RESUMPTION OF STANDING ORDERS

739 RESOLVED (Chadwick)
That Standing Orders be resumed.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Appendix 3 – City of Parramatta Council Report and Meeting Minutes of Item 14.3 of 9 July 2018

F2019/02038

NOTICE OF COUNCIL MEETING PUBLIC COPY

The Meeting of City of Parramatta Council will be held in the Dundas Community Centre, 21 Sturt Street, Telopea on Monday, 9 July 2018 at 6.30pm.

Item 14.5

LEADING

ITEM NUMBER	14.5
SUBJECT	Epping Town Centre Traffic Study and other Epping Planning Review Matters
REFERENCE	F2017/00210 - D06202874
REPORT OF	Snr Project Officer
PREVIOUS ITEMS	11.3 - Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2 - Council - 14 Aug 2017 6:00pm 12.5 - Update on Epping Planning Review and Related Matters - Council - 12 Feb 2018 6.30pm 13.4 - Outcomes of Public Exhibition - Draft Amendments to Hornsby Development Control Plan 2013 - Tree and Vegetation Preservation - Council - 26 Feb 2018 6.30pm

Note: This report was deferred from the 28 May 2018 and 25 June Council Meetings.

PURPOSE:

This report details the progress of the Epping Town Centre Traffic Study and updates Council on the implications for the findings of the Epping Planning Review, as well as several related planning matters relevant to the Epping Town Centre.

RECOMMENDATION

- (a) **That** Council note this update on the Epping Planning Review and related matters.
- (b) **That** Council exhibits the Epping Town Centre Traffic Study and supporting documentation to enable comment from major stakeholders in accordance with the consultation plan described in the body of this report.
- (c) **That** despite recommendation (b) above, that Council adopts the position that it does not support any:
 - i. Planning proposal or preliminary planning proposal that applies to sites situated within the Epping Planning Review Study Area which seek to deliver extra housing in addition to what can be achieved under the current planning controls, unless the planning proposal is seeking to address a planning issue identified in Council's Epping Planning Review process related to heritage interface controls, commercial floor space or resolving open space issues at Forest Park.
 - ii. Development applications seeking an increase in residential density via clause 4.6 of the *PLEP 2011*
 and that Council write to the Department of Planning and Environment (DP&E) advising them of this position.
- (d) **That** in relation to the Austino Planning Proposal that Council write to the DP&E to:-
 - i. Object to the Planning Proposal in its current form and density

Council 9 July 2018

Item 14.5

proceeding; and

ii. Request that Council be re-instated as the RPA so that Council can pursue a Planning Proposal that would retain the current controls that apply to the site with the exception of the former Bowling Club portion of the site which would be rezoned from RE1 Public Recreation to R4 High Density Residential with a maximum Height of Building control of 17.5m and FSR of 1.5:1.

- (e) That should Council be re-instated as the RPA (on the basis that it will pursue a Planning Proposal as per (d)(ii) above) Council officers be authorized to commence discussions with the Austino PP applicant about the form of the Planning Proposal and whether there are any opportunities for some contribution to additional open space as part of the Planning Proposal. The outcome of these discussions should be reported to Council.
- (f) **That** Council write to the Minister for Planning and the Greater Sydney Commission and request the State Significant Development currently being progressed for 240-244 Beecroft Road be placed on hold until:
- i. the supplementary work on a new road link has been completed; and
 - ii. that the relevant approval authority agrees to the provision of commercial floor space equivalent to a 1:1 FSR.
- (g) **That** a further report is brought to Council on the options for the Rawson Street carpark site as a site for future civic space and community facilities and analysis on whether any EOI process should be commenced to seek partners to redevelop the site and realise the FSR available on the site.
- (h) **That** a further report is brought to Council on the outcome of the consultation on the Epping Town Centre Traffic Study and the results of the supplementary traffic analysis discussed in this report on:-
- i. Reopening of the former M2 bus tunnel link; and
 - ii. A new east west road link through 240-244 Beecroft Road
- (i) **That** a Planning Proposal including all necessary background studies and analysis be prepared to progress the recommended LEP amendments detailed in this report relating to:-
- i. Rosebank Avenue HCA, Precinct;
 - ii. 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street;
 - iii. Essex Street HCA Precinct;
 - iv. Rose Street Precinct; and
 - v. Rockleigh Park Precinct;
- and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.
- (j) **Further, that** a Planning Proposal including all necessary background studies and analysis be prepared to progress the recommended LEP amendments detailed in this report relating to new controls to require the provision of commercial floor space in the centre and that the Planning Proposal and associated material be reported to Council for endorsement

Council 9 July 2018

Item 14.5

before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.

BACKGROUND

1. This report is a progression of a Council report deferred from the 12 February 2018 Council meeting (Item 12.5) provided at **Attachment 1**. This report also relates to a Council assessment of the Austino planning proposal.
2. As noted above, Item 12.5 from the 12 February 2018 Council meeting which sought to provide an update on the status of the Epping Planning Review and associated matters was deferred. It resolved as follows:

That consideration of this matter be deferred for the following reasons:

1. *Consultation with Ward Councillors.*
 2. *That Council write to the Department of Planning seeking clarification around the decision of 1 December 2017 to appoint the Sydney Central Planning Panel as the relevant Planning Authority, meaning that Council no longer has relevant planning Authority Status for this proposal. Council is seeking this clarification particularly around the fact that the Department of Planning and Environment will be referring the outcome of the Traffic Study to make their determination which is the reason for our Council delaying a recommendation to the Council.*
 3. *Upon receipt of the valuation for the former Epping Bowling Club site, the formal valuation be the subject of a Briefing to Ward Councillors and any other interested Councillors prior to the Austino Planning Proposal or any update on the Epping Planning Review being reported back to Council.*
3. In response to the resolution of 12 February 2018:
 - a. A Workshop was held with Councillors on 16 February 2018 so that the applicants of two preliminary planning proposals – Oakstand consortium and Lyon Group – could present their respective preliminary planning proposals. These preliminary planning proposals are detailed later in this report.
 - b. A Councillor briefing session was held with Ward Councillors on Wednesday, 28th March 2018 which provided an update on the Epping Planning review including the draft findings on the Epping Town Centre Traffic Study and valuation report on 725 Blaxland Road.
 - c. A meeting was held with the Member for Epping, Damien Tudehope on Thursday, 29th March 2018 which also provided an update on the Epping Planning review and included a discussion on the draft findings on the Epping Town Centre Traffic Study and valuation report on 725 Blaxland Road.
 4. Consistent with resolution 2 above, on 1 March 2018, Council Officers wrote to the Department of Planning and Environment (DP&E) seeking clarification on the removal of the relevant planning authority role from City of Parramatta council. The DP&E's response is attached to this report at **Attachment 2**.

Council 9 July 2018

Item 14.5

OVERVIEW OF EPPING PLANNING REVIEW AND STRUCTURE OF THIS REPORT

- The Epping Planning Review (EPR) was initiated as a review of planning controls for the Epping Town Centre and immediate surrounds (refer to the area delineated orange in the figure below) to address the issues of land use conflicts. These conflicts were raised by the Epping Community following from the DP&E's Priority Precinct process which increased the density controls in March 2014. The EPR Study Area is shown in Figure 1.

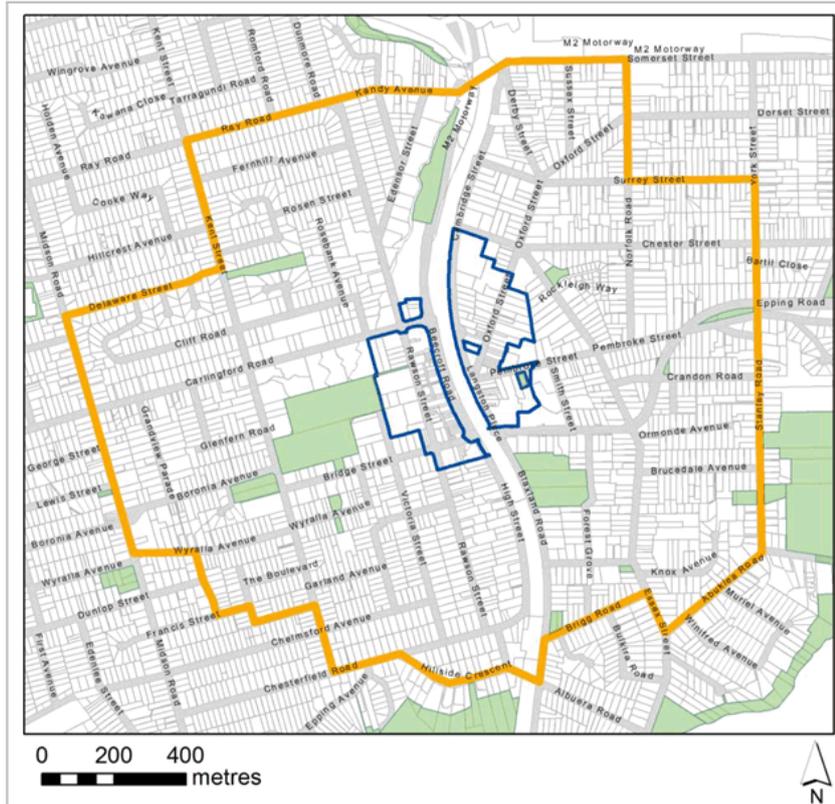

Figure 1 - Epping Planning Review study area showing the town centre and immediate surrounds

- The EPR has also followed the Council boundary changes occurring in May 2016 under which the Epping Town Centre came to be entirely contained within the City of Parramatta (having previously been split between Parramatta City and Hornsby Shire Councils).
- One objective of the EPR has been to create a unified planning framework for the Epping Town Centre and its immediate surrounds, including one set of LEP and DCP controls, a unified development contributions framework and one public domain plan. Council has already developed a single development contributions framework for the Epping Town Centre and Council's formal LGA-wide Harmonization Process will have a role in bringing some further consistency to the planning controls.
- The EPR has two stages. The first stage has involved undertaking technical studies and community consultation to inform planning control amendments to resolve land use conflicts or issues. The last remaining element of this stage is

Council 9 July 2018

Item 14.5

the completion of traffic analysis and the major element of this is the Epping Town Centre Traffic Study.

9. The **Epping Town Centre Traffic Study** (ETCTS) is the key component of this report, as its findings have major implications for the Epping Town Centre in the short to mid-term. The implications of the ETCTS are also discussed with regards to:
 - a. Updates on the status of **LEP and DCP amendments** affecting land within the Town Centre with a small section of the report discussing the release of the final **Central City District Plan** in March 2018 and relationship with the EPR.
 - b. the State Significant Development proposal affecting NSW Government owned land at **240-244 Beecroft Road, Epping**.
 - c. The **Austino Planning Proposal** and **Preliminary planning proposals** affecting land within the Town Centre.
10. This report makes recommendations on:
 - a. the **interface areas** at Rosebank Avenue, Rockleigh Park, Pembroke Street/Norfolk Rd, Essex Street and the Rose Street Precinct;
 - b. **commercial floorspace** within the centre; and
 - c. potential **social infrastructure** provision on the Rawson Street Car Parking site.

RELATED PLANNING POLICY MATTERS

11. A series of recent policy amendments (LEP, DCP and development contributions plans) are complete which apply to land within the EPR study area and relate to:
 - a. Housekeeping Amendment to Hornsby LEP 2013 recently coming into effect.
 - b. Fast Tracked Amendments to Parramatta DCP 2011 involving footpath widening recently coming into effect.
 - c. Amendment to Hornsby DCP 2013 - Tree Preservation and associated matters raised by Council in its resolution from the 26 February 2018 Council meeting pertaining to tree removal in Forest Park and the potential impact of Austino planning proposal on trees in the north of Forest Park are detailed in **Attachment 3** to this report.
 - d. Section 94 and 94A Developer Contributions Plans applying to the EPR area recently coming into effect.
12. These matters are further detailed in **Attachment 3**.

Greater Sydney Region Plan and Central City District Plan

13. In March 2018, the Greater Sydney Commission (GSC) released the final *Central City District Plan* (CCDP) and its metro-wide level plan *Greater Sydney Region Plan - A Metropolis of Three Cities*.
14. In both plans, Epping is identified as a 'Strategic Centre' for 2036. However, in the earlier iterations of the District Plan and Metro Plan, Epping was identified as a "Town Centre" or "Local Centre". Thus the role of the Epping Town Centre has been elevated to a higher-order centre without any corresponding dialogue or justification. Also, the 'Strategic Centre' category is still not clearly defined in

Council 9 July 2018

Item 14.5

the Final Plans. The change has also occurred ahead of completion of the Epping Town Centre Traffic Study.

15. The CCDP establishes dwelling targets for the five year period from 2016 to 2021 for the Parramatta LGA and jobs targets for lower and higher scenarios for 2036 for Epping, specifically. In the context of the Epping Planning Review and recent development forecast, these are discussed below:
 - a. With regards to **dwelling targets** for that period, the CCDP sees 21,650 additional dwellings for the 2016-2021 period for the Parramatta LGA. Analysis contained in this report on recent dwelling growth within the Epping Town Centre demonstrates that recent growth patterns mean this centre can meet a substantial proportion of this target.
 - b. With regards to the **jobs targets**, the Epping Town Centre is identified as a Strategic Centre for 2036 with a jobs target of 1,900 additional jobs (2036 **baseline**) to 2,400 additional job (2036 **higher target**). These are on top of the 5,100 jobs that the CCDP sees as the baseline for 2016. Further discussion about the provision of commercial floorspace is provided further in this report.
16. Furthermore, a series of actions (both direct or indirect) across a number of the CCDP's Planning Priorities apply to the Epping Town Centre and largely involve collaboration with the DP&E and GSC.

EPPING PLANNING REVIEW - STAGE 1

17. The major elements of Stage 1 of the EPR were spelled out in the 12 February 2018 report (Item 12.5) which noted that Stage 1 of the Epping Planning Review was largely completed with the exception of a Final Traffic Study. This was precluded by a report of Council at its meeting on 14 August 2017 which reported the Discussion Paper and its supporting technical studies.
18. An **Interim Traffic Modelling Report** (dated June 2017) was prepared by EMM for the purposes of the Epping Planning Review Discussion Paper which was exhibited in June/July 2017. The Interim Report formed preliminary analysis in order to consult the Epping community on traffic and access in and around the Town Centre.
19. At the 14 August 2017 Council meeting, Council endorsed a suite of principles to guide Stage 2 of the Epping Planning Review. The issues discussed in this report directly affect many of the principles.

Epping Planning Review Steering Group

20. To ensure delivery of the Epping Planning Review, in February 2017, Council established the Epping Planning Review State Agency Steering Group which has representation from the Greater Sydney Commission, the Department of Planning and Environment, Transport for NSW and Roads and Maritime Services.
21. The Steering Group is also consistent with the Central City District Plan where:

Parramatta City Council is leading the review of planning controls and the Commission is collaborating with Council and other State agencies to address social infrastructure, traffic, heritage and commercial land issues (p.21).
22. Given the recommendations within this report, the role of the Steering Group in providing further direction on the Epping Planning Review process is paramount.

Council 9 July 2018

Item 14.5

BACKGROUND TO EPPING TOWN CENTRE TRAFFIC STUDY

23. The principal traffic study underpinning the existing planning controls which is now outdated is the **Halcrow Study** of 2011 commissioned by Hornsby Council, the then Parramatta City Council and the DP&E prior to the Priority Precinct process formally commencing. The Epping Town Centre Traffic Study (ETCTS) replaces this analysis.
24. The Halcrow Study tested the short term and long term land use scenarios:
- a. The short term (2016) land use scenario was based on a forecast of additional 900 dwellings and additional 3,000sqm of retail uses; and
 - b. The long term (2026) land use forecast a further 2,100 dwellings and another 3,000sqm of retail uses.
25. In total, this tested the impact of 3,000 additional dwellings and 6,000sqm of additional retail within the Town Centre by 2026. As is discussed further in this report, the Halcrow assumptions on residential land use have substantially underestimated the development trends.

EMM's Interim Traffic Study (2017)

26. The preliminary analysis carried out by EMM in 2017 as part of the Interim Traffic Modelling report for the purposes of the EPR Discussion Paper allowed discussion of the issues as part of the Discussion Paper process. Specifically, the preliminary study identified the following key issues:
- a. The east west Carlingford Road/Epping Road and north south Beecroft Road/Blaxland Road are sub-regional routes that converge at the Town Centre mixing with local traffic.
 - b. Approximately 89% of trips that cross the bridge are through traffic trips where the origin and destination of the trip is outside the Epping Town Centre.
 - c. The through trips are a significant barrier to improving the traffic flow around the Epping Town Centre. (Note: Centres are usually structured in a way that separates local traffic from through-traffic, but the Epping Town Centre is not).
 - d. The widening of the rail bridge will not be a "game changer" given the time it will take motorists to cross the bridge. In other words, the expansion of the bridge will be an improvement, but will not be a *significant* improvement in providing relief to congestion.
 - e. Traffic routes and intersections are currently operating at over-saturated traffic levels for both the morning and afternoon peak hour, and the increased intersection traffic delays are already displacing some of the previous regional through traffic movements away from the Epping Town centre to other parallel traffic routes such as the M2 Motorway for east-west traffic and Midson Road for north-south traffic.

Local road upgrades

27. The Roads and Maritime Services' (RMS) program of main road improvements within the town centre have been factored into the ETCTS. They are:
- a. Widening of Epping Road from two lanes to three lanes involving:
 - i. Removal of the right turn movement from Langston Place into Epping Road,

Council 9 July 2018

Item 14.5

- ii. Removal of the right turn movement from Epping Road into Smith Street and Forest Gove;
 - iii. New dedicated right turn lanes from Essex Street into Epping Road; and
 - iv. New traffic light controlled pedestrian crossing for Epping Road and Essex Street.
- b. Upgrading the Beecroft Road and Carlingford Road intersection in Epping involving:
- i. New traffic light controlled pedestrian crossing for Carlingford and Beecroft Roads;
 - ii. Additional right-turn lane from Beecroft Road into Carlingford Road; and
 - iii. New pedestrian path to link with the exiting path to Epping Station.
28. A critical factor is that the traffic modelling undertaken since 2011 all factor in a widening of the rail bridge carriageway on Epping Road to accommodate an additional westbound lane. In a letter from the DP&E to Council dated 7 November 2017, it notes that "Transport for NSW is investigating several options for widening this overpass and the Council would be informed of the results when the investigation concludes" but the letter did not provide a timeframe. Since the receipt of the letter, Council Officers have not been provided with an update.

Dwelling forecasts since 2011 and actual dwelling growth

29. In order to understand the significance of the findings from the ETCTS (covered in the next section), it is important to understand recent (actual) and anticipated dwelling growth in the context of the growth predicted by the DP&E as part of the former Epping Priority Precinct process completed in March 2014. This must be understood so that infrastructure providers (Council and the State government) can ensure the delivery of appropriate infrastructure at the right time.

Dwelling forecasts

30. During the progression of the DP&E's Priority Precinct process, dwelling growth forecasts were reviewed from **3,000 additional dwellings** for 2026 in the Halcrow Study to **3,750 additional dwellings** for the year 2036 as per the Department of Planning and Environment's (DP&E's) *Finalisation Report* (November 2013). However, shortly after the City of Parramatta commenced the EPR process, in early 2017, the DP&E revised its forecast figure of 3,750 additional dwellings to **5,500 additional dwellings** by 2036 and set a maximum dwelling yield of **10,000 additional dwellings** at a 100% take up rate.

Actual dwelling growth

31. The Epping Planning Review Discussion Paper (June 2017) noted that Council Officers had reviewed recent development applications and approvals to track actual growth against the dwelling forecasts undertaken by the DP&E and/or during the Priority Precinct process. This reviewed all of the pre-lodgments, DAs under assessment and determined (both under construction and not yet under construction) that have occurred since March 2014 when the new Priority Precinct controls came into effect and found that **4,735 additional dwellings** could be delivered in the short to mid term (assumed to be as early as 2023), if

Council 9 July 2018

Item 14.5

all DAs are constructed and fully occupied in that time. This equates to an additional **10,890 people** within the centre assuming a household size of 2.3 persons per household (Source: Council's Social Outcomes Unit).

32. Then again, for the purpose of this Council report, on 19 April 2018, Council Officers tracked this figure to **5,553 additional dwellings** by 2023. This is made up of 3,940 approved dwellings and 1,613 dwellings under assessment. Again, applying an occupancy rate of 2.3 persons per household, this means an additional **12,771 people** in the town centre by 2023. With no signs of the Town Centre's residential market slowing down, Council Officers conclude that within 4 years of the new planning framework being in place, the DP&E's revised 5,550 additional dwelling target for 2036 is well on its way to being met well before 2036.

What does this growth mean?

33. The tracked growth is well above what was forecast and planned for by the DP&E during the Priority Precinct process. In effect, the 2036 revised forecast of last year by the DP&E (of 5,500 dwellings) will already effectively be met within 4 years of the new planning controls if the development detailed in existing approvals and applications are realised.
34. The rate of this growth has significant implications for the amenity and function of the centre including infrastructure provision in the short and mid-terms. For example:
- a. The widening of the rail bridge carriageway on Epping Road to accommodate an additional westbound lane is yet to be delivered by the State Government.
 - b. Education infrastructure such as schools managed by the Department of Education (public schools) as well as private schools will be under more pressure.
 - c. The significant loss of commercial floorspace spelled out in the *SGS Commercial Floorspace Study* and the *Epping Planning Review Discussion Paper* exhibited in mid 2017 means the future amenity and function of Epping as a centre is at stake.
 - d. The provision of local infrastructure (libraries, community facilities, open space and recreational facilities) is under pressure to be enhanced and improved.

Conclusions

35. Comparing the Town Centre's growth with the CCDP's dwelling targets for the Parramatta local government area (LGA) for the 2016-2021 period which is (21,650 dwellings), the 5,553 additional dwellings represents a substantial proportion of the dwelling target although some of that growth has occurred post March 2014.
36. In addition to the tracked dwelling growth since March 2014, there is substantial interest from developers and land owners within and around the town centre seeking an increase in residential yield above what the current controls allow via a planning proposal process.
37. Council must ensure that the amenity of the centre as well as the long term social, environmental and economic aspirations of the Epping community are not undermined. Both the Greater Sydney Commission and the DP&E have a critical role in this.

Council 9 July 2018

Item 14.5

EPHING TOWN CENTRE TRAFFIC STUDY

38. Council Officers commissioned EMM Planning and Environmental Consultancy in March 2017 to revise the traffic analysis work done as part of the DP&E's Precinct Planning process.
39. The Epping Town Centre Traffic Study (ETCTS) effectively replaces the 2011 Halcrow Study which formed the basis for the current planning controls within the Town Centre. It also replaces other applicant-prepared traffic analysis from 2015. A copy of the ETCTS is provided at **Attachments 4 and 5** (Attachment 4 comprises the Traffic Report and Attachment 5 comprises the Appendices).

The EMM Epping Town Centre model

40. The traffic model was developed by Transport Modelling for EMM. The base model report was completed in December 2017 and forwarded to the RMS for authorisation which was received in February 2018. In its response, RMS stated that the consultant's 2017 base model is suitable for traffic assignment analysis (traffic distribution) for the assessment of any future proposals within the study area.
41. The ETCTS models the co-ordinated operation of a chain of linked intersections. It does this for four existing and future traffic network model and land use scenarios which are:
 - a. Existing actual peak hour intersection traffic volumes which were surveyed in March 2017;
 - b. Modelled base case 2017 intersection traffic volumes from the EMME model;
 - c. Modelled +5,000 dwellings growth scenario intersection traffic volumes from 2026; and
 - d. Modelled +10,000 dwellings growth scenario intersection traffic volumes from 2026.
42. To develop a base year for the network traffic model, in March 2017 the following peak hour surveys, travel time surveys and traffic queue length observations were undertaken:
 - a. Peak hourly intersection turning movements at 17 intersections;
 - b. Morning/afternoon peak hour travel time surveys across the full study area;
 - c. Morning/afternoon peak hour maximum traffic queues for traffic signal operations on Beecroft Road, Carlingford, Epping and Blaxland Roads.
43. The model then tests two future residential growth scenarios in the study area as follows:
 - a. A 2026 land use scenario tests 5,000 additional dwellings
 - b. A 2036 land use scenario tests 10,000 additional dwellings.

These scenarios are additional dwellings realized after the new DP&E planning controls came into effect in March 2014.
44. The ETCTS also includes preliminary analysis of two local road network options:
 - a. The reopening of the former M2 bus tunnel link to Epping Station as a one way westbound link with left turn egress only at Beecroft Road and

Council 9 July 2018

Item 14.5

- b. A new east west road link connecting between Ray Road and Beecroft Road, through the NSW Government site at 240-244 Beecroft Road on the western side of Beecroft Road.
45. These two road network options are only explored in a preliminary sense for the 2026 and 2036 future traffic network models. This seeks to determine the potential future extent of the likely road network traffic delay benefits for locally based traffic accessing the major road network at Epping. Refer to Sections 7.3 and 7.4 of the ETCTS provided at **Attachment 4**.

ETCTS Findings

46. The broad findings from the ETCTS are summarized below.

Findings from Survey Counts

47. For the **March 2017** surveyed morning and afternoon peak hour traffic conditions the findings are as follows:
- a. Up to four of the six key intersections on the four major traffic routes (via Beecroft Road, Blaxland Road, Carlingford Road and Epping Road) are operating at over saturated (level of service F) traffic conditions respectively with an average 5 minute waiting time.
 - b. During the morning peak period the combined eastbound and southbound traffic queues on Carlingford Road and Beecroft Road can reach a combined total length of approximate 1.5 km.
 - c. The most widespread traffic queuing effects on all areas of the road network are considered to occur at approximately 8:40 am and 5:40pm, consistent with the Sydney regional major road traffic conditions.
 - d. The increasing road traffic congestion occurring in the Town Centre area, is adversely affecting both the regional through traffic movements and local traffic accessibility to the major road network.

Future years of 2026 and 2036

48. The findings of the +5,000 and +10,000 dwellings growth scenario intersection traffic volumes for the 2026 and 2036 are as follows:
- a. Future peak hour traffic conditions continue to worsen even when the full programs of the identified RMS and Council road improvements have been implemented.
 - b. In the road networks, five to six of the assessed intersections will have traffic conditions operating at oversaturated (level of service F) during both the morning and afternoon traffic peak periods. As an example, in 2026, the Carlingford Road/Beecroft Road intersection has an average delay which equates to 70.5 minutes (morning peak) and 23.5 minutes (afternoon peak). In 2036, this increases to 77 minutes (morning peak) and improves to 10.5 mins in the afternoon peak.
 - c. In 2036, over 3,300 vehicles cannot enter the network.
49. The average intersection delays are predicted to improve by 2036 from the 2026 base scenario as a result of Council proposed road improvements which are anticipated to be implemented during this period. However, the most crucial intersection – Beecroft Road – actually experiences a higher average delay in 2036 than for the 2026 case (p.41).

Council 9 July 2018

Item 14.5

50. The ETCTS also finds that *the afternoon performance of the network for the base 2036 is such that it is unlikely that there will be any spare capacity for additional vehicles* (p.41).

Additional westbound lane on Epping Bridge

51. The additional westbound lane on Epping Bridge would primarily benefit the afternoon peak hour westbound regional traffic movements travelling through the Town Centre. However, if the bridge were to operate with future tidal flow traffic conditions such as four lanes eastbound during the morning peak periods with two lanes westbound and three lanes in each direction during the afternoon peak periods, this future improvement could provide significant travel flow benefits during both these peak periods.

Additional road network options

52. The findings from preliminary testing of two additional road network options, are as follows:
- a. **Reopening of the former M2 bus tunnel link:** the envisaged number of vehicles that would use the tunnel would result in equivalent peak hourly traffic reductions for certain southbound right turning traffic and westbound traffic movements. These *"would probably have significant network traffic benefits in terms of reducing the future peak hourly intersection traffic delays at these intersections"* (ETCTS, p.45).
 - b. **A new east west road link through 240-244 Beecroft Road:** the envisaged number of vehicles that would use the through link would result in equivalent peak hourly traffic reductions for the other traffic movements using the Carlingford Road intersections with Beecroft Road or Ray Road and Rawson Street which *"could have significant network traffic benefits in terms of reducing the future peak hourly intersection traffic delays at these intersections"* (ETCTS, p.45).
53. However, further SIDRA intersection analysis is required of the above two road network options, this analysis is currently underway.

Implications

54. The findings from the ETCTS has major land use and infrastructure implications for town centre and surrounds. Therefore, Council Officers see that the role of the ETCTS is to:
- a. Inform planning policy affecting the Study Area particularly in relation to:
 - i. Certain proposals seeking an increase in residential yield; and
 - ii. State Significant Development applications.
 - b. Provide a basis for Council to take to the DP&E, GSC and the Minister for Planning seeking support for:
 - i. a position on residential development that indicates that any growth in residential development should only be permitted to resolve planning issues in Epping rather than just to permit additional residential development above what can be achieved under the current controls; and
 - ii. a coordinated approach to infrastructure delivery consistent with actions within the CCDP.

Council 9 July 2018

Item 14.5

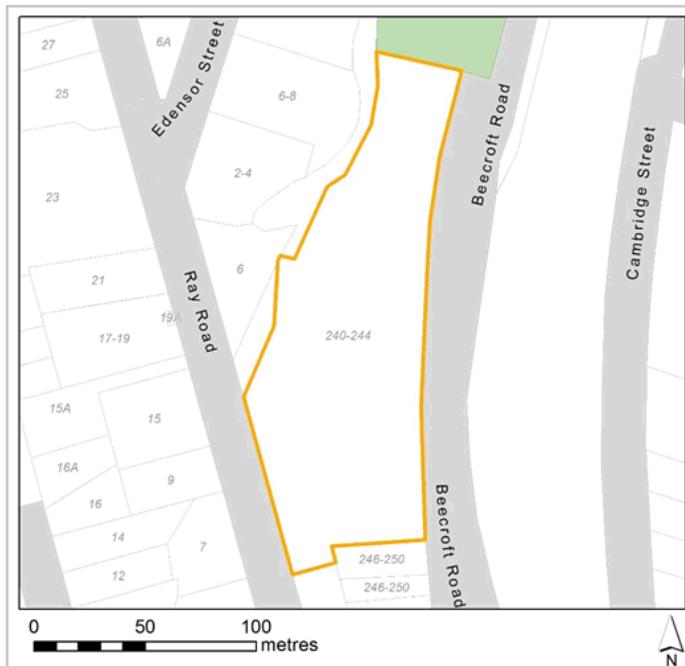

- c. Inform changes to the principles adopted by Council on 14 August 2017 that relate to:
 - i. Heritage interface;
 - ii. Commercial floorspace; and
 - iii. Open space and community infrastructure.

Consultation

55. The ETCTS and any associated traffic analysis as part of the overall ETCTS brief should be placed on exhibition so that the major stakeholders (such as RMS, Transport for NSW (TfNSW), DP&E, GSC, landowners and the wider community) have an opportunity to comment on the documentation. Consultation will occur via:
 - a. Formal invitation to State agencies represented on the EPR Steering Group which are RMS, TfNSW, DP&E and GSC.
 - b. Formal invitation to major land owners formally seeking density residential density uplift such as Austino, Oakstand and Lyon Group.
 - c. Notification e-newsletter to the 440 residents and businesses registered on the EPR project mailout database. This will include local residents and business as well as planning consultants acting for Epping landowners.
 - d. A public notice in the *Northern District Times*.
56. The ETCTS and associated supporting material will be made available on the EPR project website.

IMPACT OF ETCTS ON STATE SIGNIFICANT DEVELOPMENT AT 240-244 BEECROFT ROAD

57. The State government owned site at 240-244 Beecroft Road (refer to Figure 2) once used for the Sydney Metro Northwest project is subject of a State Significant Development (SSD) application.

Council 9 July 2018

Item 14.5

Figure 2 - State government owned land at 240-244 Beecroft Road, Epping

58. The background to his SSD application up to January 2018 is contained within the deferred Council report of 12 February 2018 (**Attachment 1**). However, the role of the site in the future development of the Town Centre is key in two ways: from both land use and traffic/access perspectives.

Land Use issue

59. The SSD application applies to 10,120sqm of the 13,342sqm total site area and proposes 39,000sqm of GFA (450 residential units) and 15 storeys which equates to a 3.8:1 FSR. Of that, the SSC proposes 2,000sqm of commercial FSR which equates to 0.2:1 *to be located at ground level on Road (could be general store, childcare, gymnasium, café, small offices)*.
60. The Commercial Floorspace Study by SGS prepared for the purposes of the EPR Discussion Paper saw that there has been a loss of commercial floorspace estimated at about 63%. Further internal analysis undertaken by Council Officers in early February 2018 has identified that that approximately **8,200sqm retail** and **35,200sqm office** floorspace needs to be “replaced” within the Town Centre. Given its scale, this site plays an important role.
61. From a planning perspective, the SSD process presents Council with an opportunity to negotiate an outcome because:
- a. The site’s current zoning (R4 High Density Residential) does not require any commercial floorspace however, a **neighbourhood shop** use (max. 100sqm) is permissible within the zone.
 - b. The site’s previous zone (B4 Mixed Use) would still have allowed the commercial office building on that site to be demolished and replaced with a building that had retail and commercial at lower levels and residential on higher levels. Returning the site to its previous zoning would not require the owner to replace the previous commercial floor space that historically existed on that site.
 - c. The timeframe around the SSD process is much faster, than a rezoning process; in the latter, Council can seek a higher amount of commercial floorspace on the site, but this would take some time. The SSD can approve commercial floorspace even if it is not permitted in the zone so there is a mechanism for addressing the floorspace in a timely manner if agreement can be reached.
62. Therefore, a 1:1 FSR (10,120sqm) for commercial uses is a balanced negotiating position that maximises the chances that commercial can be achieved on the site and contribute to Epping’s role as a Strategic Centre as identified in the CCDP.

Local Traffic/Access issue

63. Also, as already noted in this report, a road link through the SSD site is being tested to determine whether it can alleviate some of the traffic pressure at the intersections of Carlingford Road with Ray Road and Beecroft Road. Preliminary testing shows it can take of some pressure of peak hour traffic. However, more detailed analysis is progressing with a supplementary report due shortly which will form supplementary analysis to the ETCTS.

Recommendations

64. Council Officers therefore recommend:

Council 9 July 2018

Item 14.5

- a. That Council not support the application until:
 - i. A 1:1 FSR of commercial land uses can be delivered on the site; and
 - ii. A supplementary report on an east west through link is completed.
- b. That Council write to the Minister seeking that he not support the proposal until the two criteria listed in a. immediately above are achieved.

IMPACT OF ETCTS ON AUSTINO PLANNING PROPOSAL

Introduction

65. Council Officers were intending to undertake a detailed assessment of the Austino PP. However, on account of:
 - a. The Town Centre having effectively reached the DP&E's revised 2036 dwelling target; and
 - b. the findings from the ETCTS;

Council Officers consider that a detailed assessment of this proposal is no longer required. Instead the assessment method emphasises the significance of the findings of the ETCTS and recognises the critical importance of the RMS and JRPP's comments on traffic matters at the earlier stages of the planning proposal (discussed in the "Traffic" sub-section, below). In short, the traffic impacts associated with the faster than anticipated dwelling growth is the guiding principle informing the outcome of this proposal.

Background

66. The Austino Property Group are the applicant for a Planning Proposal affecting land at 2-18 Epping Road, 2-4 Forest Grove and 725 Blaxland Road (the latter site being the former bowling club site – refer to Figure 3).

Figure 3 - Land affected by the Austino Planning Proposal denoted in solid red line (from applicant's Urban Design Report)

67. The planning proposal – resubmitted to the DP&E in January 2018 seeks to:
 - a. Reconfigure the existing R4 and RE1 zones resulting in no net loss of open space;

Council 9 July 2018

Item 14.5

- b. Increase the building heights over the reconfigured R4 zone from 26.5 metres to a maximum of 65.5 metres along with 5 other building heights; and
 - c. Increase the density on the site from an equivalent 2.1:1 to a combination of 7.5:1, 4.6:1, and 1.75:1.
68. The above proposed changes seek to deliver a predominantly residential development comprising two towers on Blaxland Road with smaller towers on Epping Road accommodating estimated 794* units. (Note this calculation relies on Council's standard practice of applying an efficiency unit rate of 85sqm per unit whereby the applicant relies on a rate of 100sqm). Under the current controls (ie R4 zoning, maximum height of 26.5 metres) on the sites fronting Epping Road), the Austino landholdings would realise a total of approximately 308 units according to Council Officer analysis.
69. A VPA dated 4 December 2015 accompanies the planning proposal which proposes a public urban plaza through the proposed development providing a pedestrian connection between Epping Road and Forest Park, with an area equivalent to the area of land currently zoned RE1 Public Recreation (6,665sqm), so there will be no net loss in open space. However, much of the area proposed to be zoned public open space contains underground car parking below it which is generally not acceptable to Council.
70. This PP has a complex history. Details of the process and the proposal are provided at **Attachment 6**.

Petition

71. Between February and March 2017, Council Officers received a petition which containing nearly 600 signatures. The petition requested a number of actions including that Council purchase the site at 725 Blaxland Road. Other actions related to concerns on the impacts of the planning proposal on Forest Park in terms of traffic and urban design.
72. The petitions were tabled at the Council meeting held on 13 February 2017 where Council resolved:
- That the petition be received and referred to the appropriate Council officer for report.*
73. In response to the resolution, the appropriate time for the consideration of the petition was always intended to be undertaken as part of the assessment of the Austino planning proposal. This section in this report forms that assessment.

Traffic Analysis

74. The applicant's Traffic Impact Study prepared by GTA in 2015 tested the traffic impacts of the proposal based on the Halcrow Study's 3,000 additional dwellings for 2026. However, as identified in the Halcrow Study, the 3,000 dwellings for 2026 falls well short of the likely growth of 2025 (5,553 dwellings) based on current and expected development activity.
75. In March 2016 having reviewed the applicant's traffic analysis the RMS wrote to Hornsby Shire Council when it was the RPA noting the following:

Should Council support a recommendation for gateway determination, the exhibited proposal must also ensure that the Transport Impact Assessment traffic includes detailed Network modelling results (ie. phasing, queue lengths/delays for all movements, intersection details) for [six] key intersections for all modelled scenarios.

Council 9 July 2018

Item 14.5

76. At that time, RMS also noted that *the total Residential Parking requirements being restricted to no greater than the minimum parking rates applicable for a total of 327 apartments* on the entire site (ie. Limited to approximately half the amount being sought under this proposal)*. (Note: it is not clear what assumptions the RMS has relied to determine this number of units. Council's assessment suggests the figure is closer to 308 units).
77. In February 2018, the brief for the Epping Traffic Study was extended so that an impact assessment of the Austino planning proposal on traffic and access around the site could be undertaken. This was decided given the findings from the modelled base case 2017 intersection traffic volumes from EMME software based counts.
78. The Traffic Impact Assessment (TIA) prepared by EMM (provided at **Attachment 6**) concludes that the proposal would generate an additional 768 daily vehicle movements on Forest Grove. It also sees that because the impacts of the 2026 and 2036 additional dwellings on the network are so severe, that the actual intersection performance deterioration due to the Austino development either with or without the planning proposal is relatively small.
79. The ETCTS and recent TIA by EMM updates the Austino TIA because the TIA findings were based on a slightly lower future baseline year 2026 additional dwelling forecast than the forecast which has been used in the ETCTS. That said, the general findings within the EMM TIA are still valid. All the same, with regards to the Austino planning proposal impacts, the ETCTS concludes the:
- ...significant intersection performance deterioration from the 2017 base to the 2026 future base traffic situation renders any further traffic generating development in this location unacceptable without further capacity improvements to the locality major road and local road network capacity, in particular at the Epping Road/Blaxland Road intersection, and to a lesser extent at the Epping Road/Essex Street intersection. (p.42)*
80. When the (then) Sydney East Joint Regional Planning Panel (JRPP) assessed the planning proposal as part of its initial review, it stated, as one of the seven (7) actions, that:
- The proposal on this site should be part of the current Council traffic review of the whole of Epping Town Centre and the outcomes that review shall inform the final decision on Floor Space Ratio for the site.*
81. Because of this, a detailed assessment of the planning proposal is considered unnecessary as the fundamental determinant for deciding whether the Epping Planning Review Study Area can take any more residential development is the ETCTS.
82. It is also worth noting that in March 2014, the zoning and density controls for the parcels fronting Epping Road and Forest Grove were amended enabling higher residential yields as part of the DP&E's Priority Precinct process. With the controls having only been in place for 18 months, the applicant seeks further uplift through this planning proposal process. As noted elsewhere in this report, this planning proposal for additional residential development represents housing development simply to increase housing.

Purchase of 725 Blaxland Road (former bowling club) site

83. Part of the site (the former Bowling Club site) is zoned RE1 Public Recreation. The City of Parramatta became responsible for the Planning Controls that apply

Council 9 July 2018

Item 14.5

to the subject site when the amalgamation occurred in May 2016. Therefore, the City of Parramatta became the acquisition authority for this public recreation land.

84. However, Hornsby Council did not have a funding strategy to acquire the site at 725 Blaxland Road. When the bowling club site became available for sale (ie the transaction that resulted in the current land owner acquiring it). The then Hornsby Council, had the opportunity to purchase it but made a decision not to yet still retained both the RE1 Public Open Space zoning on the Land Zoning Map, and the "Local Open Space Reservation" on the Land Reservation Acquisition Map, over the site.
85. Currently, there is no City of Parramatta Council funding strategy for its acquisition. The revised Section 7.11 and 7.12 (formerly 94/94A) Contributions Plans for Epping which came into effect in November 2017 does include collection for some open space provision. However, the advice in the Epping Planning Review was that Council would be better served by acquiring open space in different parts of Epping where growth is occurring rather than spending a substantial proportion of any funding available (via Section 94 or from other sources) on this portion of land which adjoins an existing substantial piece of open space. This recognises that spending funds to acquire this site would reduce Council's capacity to invest in other open space to meet the needs of growth in other parts of Epping as well as other community needs.
86. An initial internal valuation of the site was undertaken in mid 2017. The ERP Discussion Paper concluded that for the reasons described above the purchase of the site did not represent value for money and this position informed the subsequent adopted principle which was that Council not purchase the site and instead:
- That Council should seek to progress the planning proposal with Council as the RPA subject to the Traffic Study being completed before FSRs for the site can be finalised. That Council also negotiate with the developer for the provision of public open space in a way that ensures there is a suitable area of open space which is appropriately sized and located.*
87. Council Officers have subsequently commissioned an independent valuation for peer review purposes. The valuations remain Commercial in Confidence and confirms that the purchase of the site by Council is not a viable financial option.
88. With regards to the adopted principle above, Council Officers suggest that the opportunity to negotiate with the landowner to have them provide an equivalent amount of open space has changed because of the result of the ETCTS and is in part depended upon the decision made by the current RPA for the Austino Planning Proposal.
89. As already detailed above in this report the DP&E has chosen to remove the Council as the Relevant Planning Authority (RPA) for the Austino Planning Proposal and so it will need to make the next key decision. If despite the ETCTS the RPA now in place for the Austino PP (ie the Central Sydney Planning Panel) decide to proceed with the Planning Proposal then the Council should seek to enter into further discussions with the applicant and the RPA to seek to achieve some dedication of an equivalent amount of open space at no cost to Council as part of the Planning Proposal. If the DP&E allows the further growth despite the problems with the road network they should also be seeking to broker appropriate open space outcomes to help deal with the growth proposed.

Council 9 July 2018

Item 14.5

90. However, if the RPA decides not to proceed with the Planning Proposal then Council and the applicant will still need to resolve what will happen to the former bowling club site as it will remain zoned RE1 Public Recreation. Whilst this zoning is retained Council remains the acquisition authority.
91. Council options for the former bowling club site in this case will be:-
- a. To commit to the acquisition by retaining the RE1 zoning. As detailed above this option is not recommended by Council Officers as is not considered to be an efficient use of Council funds.
 - b. Alternatively, rezone the site so Council is no longer the acquisition authority. In this case the appropriate zoning would be R4 High Density Residential with a maximum height of 17.5m (which permits 5-6 storeys) (Note the *Hornsby LEP* does not include FSR controls for sites zoned R4 High Density Residential but Council's Urban Designers indicate that this would allow approximately 162 units to be built on this site under the controls that would apply under the Hornsby DCP with an FSR equivalent to 1.5:1).
92. It is acknowledged that allowing the site to be rezoned to allow more residential development will be inconsistent with the ETCTS conclusions but Council has two conflicting issues that need to be managed. Council will need to balance two potential negative impacts:-
- a. the traffic impact
versus
 - b. the sub-optimal financial and open space outcomes if it commits to remaining as the acquisition authority for the former bowling club site.
93. Council Officer consider that rezoning the former bowling club site to R4 High Density Residential with a height of 17.5m and FSR of 1.5:1 is the preferred approach because:-
- a. The density that would be permitted is much less than that proposed in the applicants PP so the traffic impact would be mitigated by comparison.
 - b. Council will not be forced to expend resources acquiring the former bowling club site in a location Council Officers consider is not optimal use of available funds.
 - c. The building height is consistent with the height applied by the DP&E to transition areas when it put in place the existing planning controls in Epping. It will see a stepping down of permitted height as you move away from Epping Road and down to Forrest Park.
94. It is acknowledged that the density permitted on the former bowling club site is the most significant factor driving its valuation and as the density decreases so will the cost of acquiring the site. If Council and the DP&E accept that a R4 High Density Residential Zoning with a height of 17.5m and FSR of 1.5:1 are the appropriate alternate controls to the current RE1 zoning then it maybe possible to have further discussions with the owner about the implications of this for the redevelopment of the site and the delivery of open space outcomes.

Recommendation

95. That Council object to the Planning Proposal in its current form and density proceeding and request that Council be re-instated as the RPA so that Council

Council 9 July 2018

Item 14.5

can pursue a Planning Proposal that would retain the current controls that apply to the site with the exception of the Bowling Club portion of the site which would be rezoned from RE1 Public Recreation to R4 High Density Residential with a maximum Height of Building control of 17.5m and FSR of 1.5:1.

IMPACT OF ETCTS ON PRELIMINARY PLANNING PROPOSALS

96. As has been noted during Stage 1 of the Epping Planning Review process, two preliminary planning proposals were lodged with Council in late 2014 which affect land within the town centre (western side). Refer to Figure 4. Both proposals have been on hold on account of the ETCTS being completed as per adopted principles of 14 August 2017. When combined, the preliminary planning proposals seek more than **2,000 dwellings**. This equates to an additional 1,000 dwellings above what can currently be achieved across both sites.
97. Each proposal seeks a partnership with Council to develop their sites in conjunction with the Council car park. Figure 4 below shows both the Oakstand and Lyon Group land holdings as well as Council's land holdings. The details of each proposal are provided in **Attachment 7**.

Figure 4 – Applicant owned land for preliminary planning proposals as well as Council's Rawson Car Park sites

Recommendations

98. Given the current growth rate from tracked DAs and the findings from the ETCTS, Council Officers conclude that in the short to mid term, there is no justification for further residential development simply to increase housing. That said, there is an opportunity for an expression of interest (EOI) process with landowners within the Town Centre to transfer some of the floorspace on Council's car park sites to another land owner/s site/s. The EOI process would, at the minimum, stipulate public benefits around a community hub facility, underground car parking, an east-west connection between community hub and the Epping Rail Station, and the like.
99. The outcome of this approach would mean that there is there no net increase in residential floorspace above what can currently be achieved. Effectively Council would be "trading" off the FSR from the carpark site to other sites to generate

Council 9 July 2018

Item 14.5

funding to provide community facilities on the site of the current car park. It should be noted that any redevelopment would also include retention of carparking on site as it is recognised that this is critical to the operation of western part of the Epping Town Centre.

100. This process would be the subject of a further Council report before any further action is taken explaining the process and potential outcomes. The alternative is to retain the current carpark site and seek to redevelop it independent of other landowners sites. In this case Council would find it difficult to realise the full FSR that currently applies on the site and at the same time provide a significant piece of civic space within current height limits. The viability of achieving the FSR of 4:1 and community facilities and a civic space on the site as a stand alone redevelopment would also be covered in the report should Council request a further report be provided.

IMPACT OF ETCTS ON AREAS WITH INTERFACE ISSUES

101. With regards to the heritage interface areas at Rosebank Avenue HCA, part of the Essex Street HCA, land parcels and Pembroke Road and Norfolk Street and the Rose Street Precinct, the principles adopted at the 14 August 2017 Council meeting recommend further planning analysis that tests higher residential densities such as *manor homes* or 3 storey *residential flat buildings* which would replace existing detached dwelling development.
102. The interface issues are a result of land use conflicts occurring as a result of the DP&E's Priority Precinct process and require resolution where possible. It is acknowledged that the ETCTS identifies significant traffic impacts on the EPR study area and increasing densities at interface areas will have an increase on the traffic impacts. However, the interfaces put in place where 5-6 storey building look onto the backyards of sites zoned for single dwelling development and covered by a Heritage Conservation Area designation are unacceptable and need to be addressed in some format. This issue was discussed in detail in the Epping Planning Review documents.
103. A copy of the EPR Discussion Paper and the report considered by the Council on 14 August 2017 have been attached (refer to **Attachments 8 and 9**). The details on each HCA and background on the recommendations for these areas is available in this background material. The report below details just the recommendations made previously and options discussed with Councillors at Ward Councillor Briefings to allow Council to determine whether it should proceed with the previous recommendations.
104. Council officers are of the opinion that if growth is to be permitted which will impact on the road network that it should be to resolve these types of planning problems rather than to just increase density on a site for the sake of additional housing numbers. It is for these reasons that Council Officers recommend that changes to the planning controls proceed despite the findings of the ETCTS.
105. Furthermore, in March this year, the DP&E released its *Low Rise Medium Density Housing Code* which comes into effect in July 2018. This establishes planning controls on some forms of medium density housing and provide further guidance on the recommended outcomes in this section.

Rosebank Avenue HCA

106. With regards to Rosebank Avenue HCA, in the 14 August 2018 Council report, Council Officers recommended:
- a. Removing the HCA notation but keeping heritage items.

Council 9 July 2018

Item 14.5

- b. For the area south of the heritage items: allow 3 storey **residential flat buildings (RFBs)**.
- c. For the area north of the heritage items: no change.
- d. That the changes occur ahead of completion of ETCTS.

107. Council subsequently resolved that it pursue 2 storey **manor homes** along full length of Rosebank Ave but test benefits of 3 storey **RFBs**.

Recommendation

108. Council Officers recommend proceeding with the original recommendations to remove the HCA notation, enable 3 storey **RFBs** south of the heritage items with no change north of the heritage items. Refer to Figure 5.

Figures 5 – Council Officer recommendation for Rosebank Avenue HCA

1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street

109. With regards to properties at 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street, in the 14 August 2018 Council report, Council Officers recommended:

- a. Remove HCA notation but keep heritage items.
- b. R3 zone of area edged black but limit No.s 7 & 7A Norfolk Rd to **manor homes** (current zoning is shown in Figure 6).
- c. Enable 3 storey **RFB** on No.s 1, 3, 3A and 5 Norfolk Rd and 25 Pembroke St.
- d. Changes occur ahead of completion of ETCTS.

Council 9 July 2018

Item 14.5

Figure 6 – Current zoning of 1, 3, 3A, 5, 7, and 7A Norfolk Road and 23, 23A and 25 Pembroke Street

110. Council subsequently resolved that it pursue 2 storey *manor homes* but test benefits of 3 storey *residential flat buildings*.
111. At the Ward Councillor Briefings discussed above the option of making no change to the controls in this area was discussed. Should Councillors wish to proceed with this option then Council should resolve to take no further action to change the planning controls for this precinct.

Recommendation

112. To ensure consistency with new Complying Code and subsequent analysis as part of the LEP Harmonisation process, Council Officers propose a new recommendation - **Part 'no change', part RFB:**
- No changes to battle-axe blocks at No.s 7 & 7A (ie. maintain controls for *detached dwellings*) because this conflicts with the DP&E's Complying Code on battle-axe blocks.
 - Rezone No.s 1, 3, 3A & 5 to R3 zone to enable 3 storey **RFB** subject to amalgamation controls being put in place to create 1 super lot.
 - No.25 Pembroke cannot develop of itself and should retain its existing zoning.
- Refer to the Figure 7.

Council 9 July 2018

Item 14.5

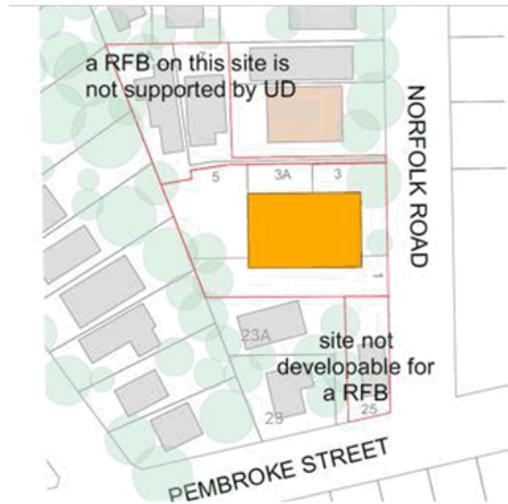

Figure 7 – Council Officer recommendation for 1, 3, 3A, 5, 7, and 7A Norfolk Road and 23, 23A and 25 Pembroke Street

Essex Street HCA

113. With regards to the Essex Street HCA, in the 14 August 2018 Council report, Council Officers recommended:

- a. Remove HCA notation but keep heritage items.
- b. Allow **manor homes** on western side between Epping Road and Maida Road only with no change on eastern side.
- c. That the changes occur ahead of completion of ETCTS.

114. The above recommendations were supported by the Council in August 2017.

Recommendation

115. Council Officers recommend maintaining the above recommendations and develop DCP controls that protect larger setbacks to ensure the protection of the tree canopy at rear setbacks.

Rose Street Precinct

116. With regards to the Rose Street Precinct, in the 14 August 2018 Council report, Council Officers recommended:

- a. Allow **residential flat buildings** development (R3 zone) with urban design analysis to step down height to Brigg Rd to 2 storeys.
- b. That the changes occur ahead of completion of ETCTS.

117. Council subsequently resolved that it pursue 2 storey **manor homes** but test benefits of 3 storey **residential flat buildings**.

118. At the Ward Councillor Briefing Councillors the issue of the topography of this area and the drainage implications of allowing more density were raised. Council Officers consider that this issue could be investigated as part of the redevelopment options but if Councillors are of the opinion that this should be investigated upfront the recommendation should be amended accordingly.

Recommendation

119. Council Officers recommend allowing **residential flat buildings** with associated urban design analysis and DCP controls that enable the stepping down of the building height to 2 storeys at the Brigg Road/Rose Street

Council 9 July 2018

Item 14.5

frontages and that the four (4) sites fronting Blaxland Road also be included in the precinct. Refer to Figure 8.

Figure 8 – Council Officer recommendation for Rose Street Precinct but include the 4 properties fronting Blaxland Road

Rockleigh Park

120. With regards to the Rockleigh Park, in the 14 August 2018 Council report, Council Officers recommended:

- a. The area zoned R4 (edged with yellow line) be down-zoned to R3 to be consistent with R3 zone boundary to north and east.
- b. That further urban design analysis to determine best height and FSR controls.

121. The above recommendations were supported by the Council.

Recommendation

122. Council Officers recommend reinstate original recommendations. But ensure that **residential flat buildings** are prohibited from this area (R3 zone in HLEP permits 4 storey RFBs). Refer to Figure 9.

Figure 9 – Council Officer recommendation for Rockleigh Park

IMPACTS OF ETCTS ON COMMERCIAL FLOORSPACE

123. Recent pre-lodgments and development applications within the centre continue to erode the volume of commercial floorspace within the centre as developers

Council 9 July 2018

Item 14.5

are 'opting out' of applying the existing DCP provisions that require delivery of 2, 3 and 4 storey podiums of commercial floorspace in mixed use proposals. This is because of the weak 'statutory weight' that DCP controls have over an environmental planning instrument such as a LEP.

124. As discussed in the section entitled "Impact of ETCTS on State Significant Development at 240-244 Beecroft Road", Council Officers have identified that approximately **8,200sqm of retail floorspace** and **35,200sqm of office floorspace** needs to be "replaced". To deliver this, Council's Urban Designers determine that three storey commercial podiums (comprising one floor of retail and two floors of office premises) on remaining sites can deliver the required floorspace.
125. With regards to traffic, the associated traffic impacts from commercial land uses (retail and office premises) may well be greater than those associated with residential development. This is because commercial uses tend to generate a greater number of trips per square metre of floor area. This is another area where Council Officers consider that it may be necessary to allow additional development to resolve a planning issue not related solely to housing delivery. In this case allowing additional density that may detrimentally impact on traffic outcomes should be considered.
126. Given this conflict around the need for more commercial floorspace within the centre to protect its economic viability and amenity, with its associated traffic impacts, a delicate balancing exercise is required that meets the of commercial floorspace needs of the centre whilst acknowledging the potential traffic impacts.
127. In light of the above, Council Officers have identified the following potential options:
- a. **Option 1 – No change:** This option involves no change to the current controls. Because the market favours residential development and the pace of that development recently, this option is highly likely to encourage DAs that deliver only ground floor commercial that will undermine centre's amenity and economic viability. This has no traffic impact compared to current controls.
 - b. **Option 2 – Require minimum level of commercial FSR provision to be provided without amending the maximum FSR or Building Heights:** This option involves increasing the commercial FSR requirements but this occurs at the cost of residential FSR. It means that the heights or densities of buildings will not change, but there will be a higher proportion of commercial floorspace within any development and less residential than would currently be permitted. In other words, it equates to a net decrease in residential FSR but will improve centre's amenity and economic viability. This will potentially result in a detrimental impact on the local traffic network.
 - c. **Option 3 – Require minimum level of commercial FSR provision to be provided but amend the maximum FSR or Building Heights to seek to retain where possible an FSR for residential equivalent to existing levels** This will mean increases in overall density and building heights but it makes delivery of more commercial (retail/office) uses more viable which will improve the centre's amenity and economic viability. The detrimental impact on the local traffic network will be greatest with this option.

Council 9 July 2018

Item 14.5

Recommendation

128. Of the above options, Council Officers recommend **Option 3 - Increase Commercial FSR and density/building heights** because of the strong residential market and the way the planning system operates, if Option 2 was pursued, Council would receive a flood of DAs seeking mixed use development with only the ground floor allocated to commercial uses. These would all have to be considered and potentially approved under the current planning rules and the opportunity to provide the commercial floorspace Epping needs will be lost forever. Without sufficient commercial/retail floorspace the future function and amenity of the Town Centre is significantly impacted.
129. Whilst Option 3 is the Council Officer preference at this point in time this scenario needs to be run through the traffic modelling and if the outcome is unacceptable it may be necessary to fall back to Option 2. A further analysis and report to Council will allow Council to determine which option it will ultimately pursue via a Planning Proposal.

CONCLUSION

130. The reported rate of growth compared to the growth envisaged by the DP&E in 2013 demonstrates the Epping Town Centre has been doing a lot of the “heavy lifting” for dwelling growth and that the impact on infrastructure means that further housing growth for the sake of increasing house supply in Epping is not necessary.
131. This report provides a basis for Council to take to the DP&E, the Minister for Planning and the GSC seeking support for a strategic approach to future planning in Epping where any growth seeks to solve existing planning problems rather than just increasing density for the sole purpose of providing additional housing supply.

NEXT STEPS

132. The next steps are:
- a. Progressing supplementary traffic analysis on new through link through 240-244 Beecroft Rd; and re-opening of former M2 bus tunnel link.
 - b. Exhibiting the ETCTS documentation for major stakeholder comment.
 - c. Council Officers to arrange EPR Steering Group meeting with State agencies about proposed policy change and revisiting infrastructure delivery.
 - d. Council Officers prepare further Council reports that seek to:
 - i. Provide advice on provision of community facilities on the Councils Rawson Street Car park land and whether an EOI process should be pursued to enter into partnerships with other landowners.
 - ii. Report on the outcome of the consultation on the Epping Town Centre Traffic Study and the results of the supplementary traffic analysis discussed in this report on:-
 1. Reopening of the former M2 bus tunnel link; and
 2. A new east west road link through 240-244 Beecroft Road.

Council 9 July 2018

Item 14.5

- e. Planning Proposal processes inclusive of background and technical study preparation commence on:
- i. The heritage interface areas; and
 - ii. The provision of commercial floor space in the centre.

MINUTES OF THE MEETING OF CITY OF PARRAMATTA COUNCIL HELD IN THE DUNDAS COMMUNITY CENTRE, 21 STURT STREET, TELOPEA ON MONDAY, 9 JULY 2018 AT 6.33PM

PRESENT

The Lord Mayor, Councillor Andrew Wilson and Councillors Benjamin Barrak, Phil Bradley, Donna Davis, Robert Dwyer, Pierre Esber, Michelle Garrard (Deputy Lord Mayor), Paul Han, Steven Issa, Andrew Jefferies, Sameer Pandey, Dr Patricia Prociv, Bill Tyrrell, Lorraine Wearne and Martin Zaiter.

ACKNOWLEDGEMENT TO TRADITIONAL LAND OWNERS

The Lord Mayor, Councillor Andrew Wilson, acknowledged the people of The Darug Nation as the traditional custodians of this land, and paid respect to their ancient culture and their elders past and present.

WEBCASTING COUNCIL MEETING

The Lord Mayor, Councillor Andrew Wilson, advised that this public meeting is being recorded and streamed live on the internet. The recording will also be archived and made available on Council's website.

The Lord Mayor further advised that all care will be taken to maintain privacy, however as a visitor in the public gallery, the public should be aware that their presence may be recorded.

OTHER RECORDING OF MEETING

As per Council's Code of Meeting Practice, the recording of the Council Meeting by the public using any device, audio or video, is only permitted with Council permission. Recording a Council Meeting without permission may result in the individual being expelled from the Meeting.

PROCEDURAL MOTION

1449 RESOLVED (Wilson)

That Item 14.5 relating to Epping Town Centre Traffic Study and other Epping Planning Review Matters and Item 14.7 Delegations to the Chief Executive Officer be brought forward in the meeting for consideration.

14.5 SUBJECT Epping Town Centre Traffic Study and other Epping Planning Review Matters

REFERENCE F2017/00210 - D06202874

REPORT OF Snr Project Officer

1450 RESOLVED (Tyrrell/Wearne)

(a) **That** Council note this update on the Epping Planning Review and related matters.

(b1) **That** Council exhibits the Epping Town Centre Traffic Study and supporting documentation (including the further supplementary reports) to enable comment from major stakeholders in accordance with the consultation plan described in the body of this report with a Community Briefing Session to be organised to inform the community about the content of the Traffic Study and allow them to ask questions about its preliminary findings to inform any submissions stakeholders may wish make on the study.

- (b2) **That** the exhibition material placed on public exhibition state that Council does not support any extension of Rosebank Avenue to connect with Rosen Street as described in the traffic study and advise the affected landowners of this decision.
- (c1) **That** despite recommendation (b1) above, that Council adopts the position that it does not support any:
- (i) Planning proposal or preliminary planning proposal that applies to sites situated within the Epping Planning Review Study Area which seek to deliver extra housing in addition to what can be achieved under the current planning controls, unless the planning proposal is seeking to address a planning issue identified in Council's Epping Planning Review process related to:-
 - commercial floor space in the Epping Town Centre; or
 - the Planning Controls that should apply to Heritage Conservation Areas or areas that interface with High Density Residential zones surrounding Epping Town Centre.
 - (ii) Development applications seeking an increase in residential density via clause 4.6 of the *PLEP 2011*;
and that Council write to both the Department of Planning and Environment (DP&E) and the Greater Sydney Commission advising them this will remain Council's position until the State Government has provided infrastructure to resolve the through traffic issues with the Epping Town Centre.
- (c2) **That** a Planning Proposal including all necessary background studies and analysis be prepared to amend Clause 4.6 of PLEP 2011 so that it cannot be used to seek a FSR greater than that permitted on the Floor Space Ratio Map for sites within the Epping Town Centre.
- (d) **That** in relation to the Austino Planning Proposal that Council write to the DP&E to:-
- (i) Object to the Planning Proposal proceeding in its current form and density and request that no Planning Proposal proceed for this site. Instead the existing planning controls should be retained with the portion currently zoned RE1 Public Recreation remaining in place along with retaining no Floor Space Ratio or Height of Buildings control notations applying to that portion.
 - (ii) **That** the Council write to the Minister for Planning seeking that the Minister amends the legislative provisions related to the acquisition of open space land applying the principle that where a developer has purchased land which at the time of purchase is already zoned public open space, they should not benefit from any changes to the value derived from the existing zoning of adjoining land or changes to zoning of adjoining land. And write to the Local Members requesting funding out of the Open Spaces and Greater Sydney Package. To avoid any doubt Council considers that the owner should be entitled to the price they paid (adjusted for

- CPI) but no increases in value as a result of changes to the planning controls surrounding the site.
- (e) **That** Council write to the Minister for Planning, Landcom and the Greater Sydney Commission and request the State Significant Development currently being progressed for 240-244 Beecroft Road be placed on hold until a workshop can be organised involving Council and Landcom to discuss and seek to resolve the following:-
- (i) to establish whether a new road link can be provided through this site linking Beecroft Road and Ray Road; and
 - (ii) the provision of commercial floor space on the site being provided at a level no less than 1:1 FSR on this site.
- (f) **That** a further report is brought to Council on the options for future civic space and community facilities on the following sites:-
- (i) the Rawson Street carpark site; and
 - (ii) the Chalmers Street site (containing the existing Epping Library site and adjoining open space);
- including analysis on whether any process should be commenced to realise the FSR available on either of these sites.
- (g) **That** in addition to correspondence Council resolved to forward to the State Government regarding the investigation of M2 tolling at the 12 June 2018 Council Meeting (i.e. Item 15.5) the further supplementary reports on:-
- (i) Reopening of the former M2 bus tunnel link; and
 - (ii) A new east west road link through 240-244 Beecroft Road
- be forwarded to the relevant transport agencies that manage the former M2 bus link, the RMS and Urban Growth and circulated to Councillors upon receipt and then be placed on public exhibition with the Epping Town Centre Traffic Study with any feedback received on this issues during the consultation to be reported back to Council.
- (h) **That** a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments as follows:-
- (i) Rockleigh Park Precinct; controls consistent with the recommendations in the body of this report
 - (ii) In the Norfolk, Pembroke, Essex Street area the planning controls be retained (including the Heritage Conservation Area notation) for 1, 3, 3A, 5, 7, and 7A Norfolk Road 25 Pembroke (ie retain the existing R2 Low Density Residential zoning and the existing Height of Building controls of 8.5m) and instead amend the controls for the following sites as follows:-
 - 21, 23, 25, 27 and 29 Essex Street amend the zoning from R4 High Density Residential to R3 Medium Density Residential with maximum height permitted on these sites to be amended from 17.5m to 11m (to allow for apartment building development no greater than 3

storeys on these sites); and

- The height of building control for 23, 23A Pembroke be reduced from 12m to 11m with the existing zoning of Residential R3 Medium Density Residential to be retained for these two sites;

and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.

- (i) **That** a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments for 2 - 8 Rosebank Ave and 1 - 7 Rosebank Ave as follows:

- (i) Remove the Heritage Conservation Area notation from these sites;
- (ii) Rezone the sites from Residential R2 Low Density Residential to R3 Medium Density Residential; and
- (iii) Amend the permitted height of building for these sites from 8.5m to 11m (to allow for apartment building development no greater than 3 storeys on these sites).

All other sites in Rosebank Avenue should retain their existing planning controls including the Heritage Conservation Area notation and that the Planning Proposal and associated material shall be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.

- (j) **That** a Planning Proposal and Draft DCP amendments including all necessary background studies and analysis be prepared to progress amendments to these plans for the Essex Street HCA Precinct with the planning controls to be consistent with the following:-

- (i) Retention of the existing Heritage Conservation Area for both sides of Essex Street
- (ii) Amend the planning controls to allow for detached dual occupancies on the western side of Essex Street between Epping Road and Maida Road (which are the sites that are impacted by proximity to the adjoining 5 storey apartment buildings) in the form where the second dwelling shall be permitted behind the existing dwelling but not in a Duplex form.
- (iii) That the Draft DCP that applies to this HCA and surrounding land be reviewed with a view to including: -
 - a detailed analysis of significant trees located on the sites on the western side of Essex Street and supporting DCP controls that seek protect those trees; and
 - Draft DCP planning controls that require provision to be made for the widening and improvement of the pedestrian link currently located between 58-60 Essex Street linking through to Forest Grove;

and that the Planning Proposal and associated material be

reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.

- (k) **That** no further action be taken to amend the Planning Controls that apply to the Rose Street Precinct until a drainage analysis detailing the implications of re-development of the Rose Street Precinct Sites is completed and reported to Council.
- (l) **That** a Planning Proposal including all necessary background studies and analysis be prepared to progress the recommended LEP amendments detailed in this report relating to new controls to require the provision of commercial floor space in the Town Centre and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.
- (m) **That** Council Officers identify potential sites for acquisition for open space purposes in the areas to the north east of the Epping Town Centre. This process should include obtaining valuations for acquisition and the construction of the parks and should also involve discussions with potentially affected landowners. A further report to Council on the outcome of this analysis be reported to Council to allow Council to determine whether it wishes to commence a rezoning process to rezone any sites in this area for open space.
- (n) **That** Council write to the Member for Epping seeking their support for funding for the acquisition of open space in the area north east of the Epping town centre as part of the Open Spaces and Greener Sydney package announced in April 2018. The Local Member also be requested to make representations to the relevant Minister to ensure the criteria that needs to be met to obtain grant funding provides flexibility (in terms of timeframe for delivery and the identification of the land to be acquired) so that Council can secure the funding prior to finalizing the rezoning and consultation/ acquisition processes
- (o) **Further, that** this motion carries the unanimous support of the Ward Councillors being Councillors Tyrrell, Wearne and Davis.

DIVISION The result being:-

AYES: Councillors B Barrak, P Bradley, D Davis, B Dwyer, P Esber, M Garrard, P Han, S Issa, A Jefferies, S Pandey, P Prociw, W Tyrrell, L Wearne, A Wilson and M Zaiter

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

**Appendix 4 – City of Parramatta Council Report
and Meeting Minutes of Item 18.6 of 8 October
2019**

F2019/02038

Council 8 October 2019

Item 18.6

INNOVATIVE

ITEM NUMBER	18.6
SUBJECT	FOR APPROVAL: Gateway Request: Planning Proposal - Various properties in Rockleigh Way, Pembroke and Essex Streets, Epping
REFERENCE	F2019/02038 - D07010150
REPORT OF	Senior Project Officer - Land Use
PREVIOUS ITEMS	14.5 - Epping Town Centre Traffic Study and other Epping Planning Review Matters - Council - 09 Jul 2018 6.30pm 11.3 - Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2 - Council - 14 Aug 2017 6:00pm

PURPOSE:

To seek Council's endorsement of a Planning Proposal for various sites in the Rockleigh Park precinct, Essex Street and Pembroke Street, Epping, for the purposes of seeking a Gateway Determination from the Department of Planning, Industry and Environment to amend the land use zoning, floor space ratio and height controls to manage impacts of future development on the sites on the adjoining East Epping Heritage Conservation Area.

RECOMMENDATION

- (a) **That** Council endorse the Planning Proposal at **Attachment 1** which seeks the following amendments to Hornsby Local Environmental Plan (LEP) 2013:
- Land at 5A Essex Street, 2-24 Rockleigh Park, 3-7 and 4-8 Brenda Way:
 - Rezone the land from R4 High Density Residential to R3 Medium Density Residential;
 - Amend the maximum height of buildings control from 17.5 metres to 9 metres; and
 - Apply a floor space ratio control of 0.6:1, noting there is no existing FSR control for the sites.
 - Land at 21-29 Essex Street
 - Amend the maximum height of buildings control from 17.5 metres to 11 metres (to allow for residential flat buildings no greater than three storeys); and
 - Apply a floor space ratio control of 0.8:1, noting there is no existing FSR control for the sites.
 - Land at 23 and 23A Pembroke Street, Epping
 - Rezone the sites from R3 Medium Density Residential to R4 High Density Residential;
 - Amend the maximum height of buildings control from 12 metres to 11 metres; and
 - Apply a floor space ratio control of 0.8:1, noting there is no existing FSR control for the sites.

Council 8 October 2019

Item 18.6

- (b) **That** Council not prepare a masterplan for the Rockleigh Park Precinct sites that any redevelopment under the proposed R3 Medium Density Residential instead be assessed against the relevant Hornsby Development Control Plan (DCP) 2013.
- (c) **That** the Planning Proposal be forwarded to the Department of Planning, Industry and Environment to request the issuing of a Gateway Determination.
- (d) **That** Council advises the Department of Planning, Industry and Environment that the Chief Executive Officer will be exercising the plan-making delegations for this Planning Proposal as authorised by Council on 26 November 2012.
- (e) **That** Council authorise the Chief Executive Officer to correct any minor anomalies of a non-policy and administrative nature that may arise during the amendment process.
- (f) **Further, that** Council note the Local Planning Panel's advice provided at **Attachment 2** is consistent with the Council Officer's recommendation.

PLANNING PROPOSAL TIMELINE

Council 8 October 2019

Item 18.6

BACKGROUND

1. This summary report is supported by a detailed assessment report included at **Attachment 2** that was provided to the Local Planning Panel at its meeting on 17 September 2019. The Panel supported Council officer's recommendations.
2. The Planning Proposal is a progression of the Epping Planning Review undertaken by Council in 2017 and 2018 and the resolution made by Council on 9 July 2018 in relation to a number of matters resulting from the Epping Planning Review, including issues of development interface with Heritage Conservation Areas.
3. The Planning Proposal seeks to manage the impacts of future development on certain land on the adjoining East Epping Heritage Conservation Area by reducing the maximum height of building controls for properties along Essex Street and Pembroke Street and to amend the planning controls to prohibit residential flat buildings in Rockleigh Park Precinct.
4. On 14 March 2014, the (then) Department of Planning and Environment (Department) finalised the Epping Urban Activation Precinct amendments to the Hornsby and Parramatta Local Environmental Plans via State Environmental Planning Policy (Epping Town Centre) 2013 ("the SEPP Amendment"). The SEPP Amendment provides capacity for approximately 10,000 additional dwellings and a revitalised commercial and retail core adjacent to a major transport hub.
5. The new planning controls established four new Heritage Conservation Areas, including the East Epping Heritage Conservation Area. It also up-zoned the properties subject to this planning proposal on the south and west side of Rockleigh Park and Pembroke and Essex Street from R2 Low Density Residential to R4 High Density Residential, permitting 5 storey residential flat buildings.
6. In December 2016, the Epping Planning Review was commenced by the City of Parramatta Council. The scope of the review was to address the unintended consequences of the planning control amendments brought into effect in March 2014 as well as allowing Council to manage current (formal and preliminary) Planning Proposals seeking additional growth within the Town Centre. It also allowed the City of Parramatta Council to progress matters considered by the former Hornsby Shire Council, including heritage matters.
7. The Epping Planning Review project involves the following stages:-
 - Stage 1 – the preparation of technical studies, community consultation and the release of a Discussion Paper for public comment.
 - Stage 2 – the statutory phase, including the preparation of planning proposals that seek to amend the current planning controls to resolve the land use issues identified during Stage 1. Council is currently in this phase of the project and this planning proposal forms part of this stage.
8. Stage 1 was undertaken primarily between December 2016 and July 2018 and included the preparation of a series of technical studies, release of the Epping Planning Review Discussion Paper and two phases of community consultation.

Council 8 October 2019

Item 18.6

9. A number of key issues were considered as part of Stage 1 of the Epping Planning Review including the interface of high-density residential development with adjoining heritage conservation areas. One of these conservation areas is the East Epping Heritage Conservation Area and interface of high-density development or land use zoning along Rockleigh Way, Brenda Way, Pembroke Street and Essex Street. **Figure 1** overleaf highlights the properties subject to this Planning Proposal and their proximity to the East Epping conservation area.

10. As part of Stage 1 community consultation, community workshops were undertaken, including two heritage review workshops about Heritage Conservation Areas within Epping. One workshop was held for landowners within the conservation areas and one general workshop was held for interested residents. The workshop explored potential land use scenarios and associated impacts in the conservation areas. The workshops aimed to understand residents concerns about the impact five-storey residential flat building development on properties within adjoining conservation areas, including the East Epping Heritage Conservation Area.

11. As part of Stage 1 technical studies, the City commissioned City Plan Heritage consultants to complete the Epping Town Centre (East) Heritage Review (June 2017). The purpose of the review was to inform strategic land use decisions across part of the Epping Town Centre previously under the jurisdiction of Hornsby Shire Council and review residents' concerns about heritage issues.

Figure 1: Subject properties and proximity to East Epping Heritage Conservation Area

Council 8 October 2019

Item 18.6

12. In relation to planning controls surrounding the East Epping Heritage Conservation Area, the Heritage Review concluded that a consistent transition between the R4 High Density Residential development along Essex and Pembroke Streets is required to prevent further encroachment on the conservation area. Key recommendations of the Heritage Review include:
 - a. Rezone the Rockleigh Park parcels from the R4 High Density Residential Zone which has a 17.5 metre (five storey) height control to the R3 Medium Density zone with a 12 metre (four storey) building height control, to provide a smooth transition from the R2 Low Density Residential of the East Epping Heritage Conservation Area and the R4 High Density Residential area of Essex and Pembroke Streets.
 - b. That the heritage conservation area designation be removed from 1, 3 and 3A Norfolk Road and 25 Pembroke Street and together with 5, 7, and 7A Norfolk Road be rezoned to R3 Medium Density Residential. This would enable residential flat buildings (four storeys) to be potentially developed on the sites.
13. The City released the Epping Planning Review Discussion Paper for public comment in June 2017 and it presented options and recommendations based on technical studies and community feedback about various planning matters. The Discussion Paper presented options for the properties at Rockleigh Park precinct and Norfolk Road and Pembroke Street and detailed the strengths and weaknesses of each option to gain the community's feedback about the options.
14. On 14 August 2017, Council considered a report that summarised submissions received in response to the public exhibition of Epping Planning Review Discussion Paper and associated technical studies. The report summarised the feedback from landowners and the community on the East Epping Heritage Conservation Area and the options presented to help address interface issues from the adjoining development. It noted submissions expressed mixed views about how the interface issue should be managed.
15. On 9 July 2018, a report was presented updating Council on the implications for the findings of the Epping Planning Review, including further assessment work undertaken for Rockleigh Park, Norfolk Road and Pembroke Street properties. In part the Council resolved:

“That a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments as follows:-

 - (i) Rockleigh Park Precinct; controls consistent with the recommendations in the body of this report*
 - (ii) In the Norfolk, Pembroke, Essex Street area the planning controls be retained (including the Heritage Conservation Area notation) for 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke (ie retain the existing R2 Low Density Residential zoning and the existing Height of Building controls of 8.5m) and instead amend the controls for the following sites as follows:-*

Council 8 October 2019

Item 18.6

- 21, 23, 25, 27 and 29 Essex Street amend the zoning from R4 High Density Residential to R3 Medium Density Residential with maximum height permitted on these sites to be amended from 17.5m to 11m (to allow for apartment building development no greater than 3 storeys on these sites); and
- The height of building control for 23, 23A Pembroke be reduced from 12m to 11m with the existing zoning of Residential R3 Medium Density Residential to be retained for these two sites;

and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.”

PLANNING PROPOSAL

16. The Planning Proposal reflects the intent of the resolution made by Council on 9 July 2018 in relation to issues of development interface with Heritage Conservation Areas assessed as part of the Epping Planning Review.
17. A detailed assessment of the planning proposal is included at **Attachment 2** as part of the Local Planning Panel report.
18. **Table 1** below summarises the existing controls under the *Hornsby Local Environmental Plan (LEP) 2013* that apply to the subject properties and the proposed controls as contained in the planning proposal.

Table 1: Summary of current planning controls and proposed amendments to the Hornsby LEP 2013 controls relating to the subject properties.

Subject sites	Hornsby LEP 2013 – current controls	Planning Proposal - proposed controls
Rockleigh Park precinct	<ul style="list-style-type: none"> • Zoned R4 High Density Residential; • maximum building height of 17.5 metres; and • No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> • R3 Medium Density Residential • Maximum building height of 9 metres; and • Maximum floor space ratio of 0.6:1
21-29 Essex Street	<ul style="list-style-type: none"> • Zoned R4 High Density Residential; • Maximum height of buildings of 17.5 metres; and • No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> • Maximum building height of 11 metres; and • Maximum floor space ratio of 0.8:1
23-23A Pembroke Street	<ul style="list-style-type: none"> • Zoned R3 Medium Density Residential; • Maximum building height of 17.5 metres; and • No maximum floor space ratio (FSR). 	<ul style="list-style-type: none"> • R4 High Density Residential • Maximum building height of 11 metres; and • Maximum floor space ratio of 0.8:1

Council 8 October 2019

Item 18.6

Rockleigh Park Precinct

19. Figures 2, 3 and 4 below illustrate the proposed amendments to the land use zoning, height of buildings and floor space ratio in relation to Rockleigh Way.

Figure 2: Proposed R3 Medium Density Residential zone

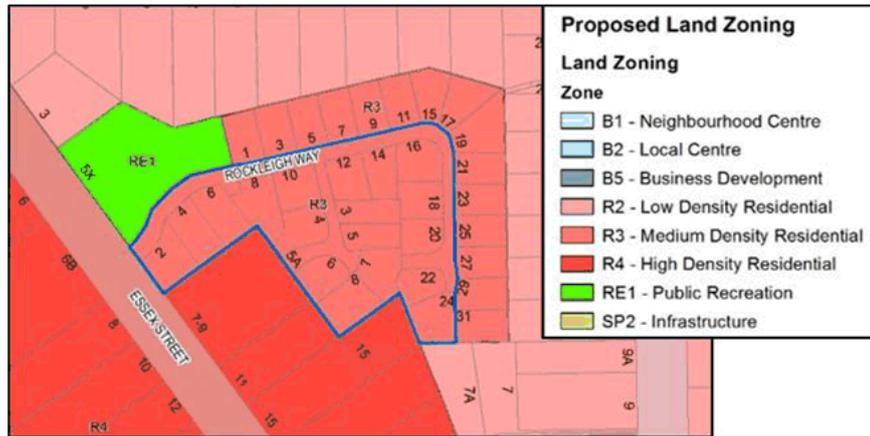

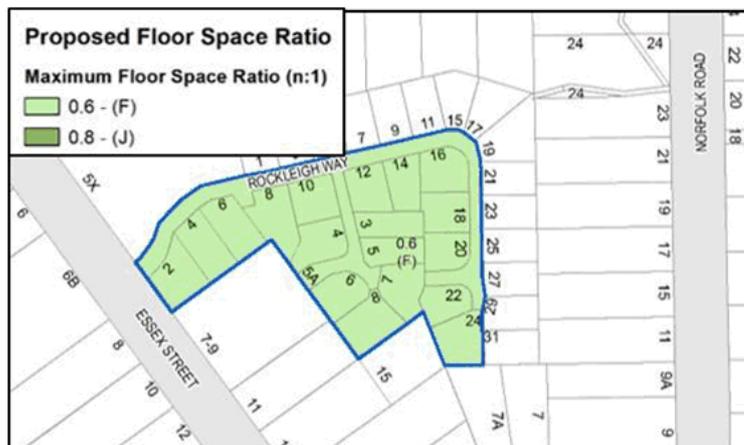

Figure 3: Proposed maximum height of buildings of 9 metres

Figure 4: Proposed maximum floor space ratio of 0.6:1

20. The proposed R3 Medium Density Residential zone is consistent with the Rockleigh Park properties that form its northern and eastern boundaries. The current R4 zoning and 17.5 metre height limit (five storey residential flat buildings) would result in encroachment of inappropriate high density development adjacent to the low density of the East Epping Heritage Conservation Area.
21. The Hornsby LEP 2013 does not generally apply a standard maximum floor space ratio to residential areas including properties in Rockleigh Park Precinct. As part of Council's harmonisation of planning controls, an application of a floor space ratio of 0.6:1 is recommended for the subject properties. Further the proposed restriction height to 9 metres will allow for development no greater than three storeys. The application of both a maximum height and FSR is consistent with City of Parramatta's intention for a newly consolidated Parramatta LEP and application of these controls would ensure a straight forward translation. This will ensure the current land uses are supported, as well as future potential to amalgamate two to three parcels in the future to develop multi-unit dwellings (that is townhouses) at an appropriate scale and intensity of development.

Essex and Pembroke Streets

22. **Figures 5, 6 and 7** below illustrate the proposed amendments to the land use zoning, height of buildings and floor space ratio in relation to 21-29 Essex Street and 23 and 23A Pembroke Street.

Figure 5: Proposed R4 High Density Residential Zone

Council 8 October 2019

Item 18.6

Figure 6: Proposed maximum height of building of 11 metres

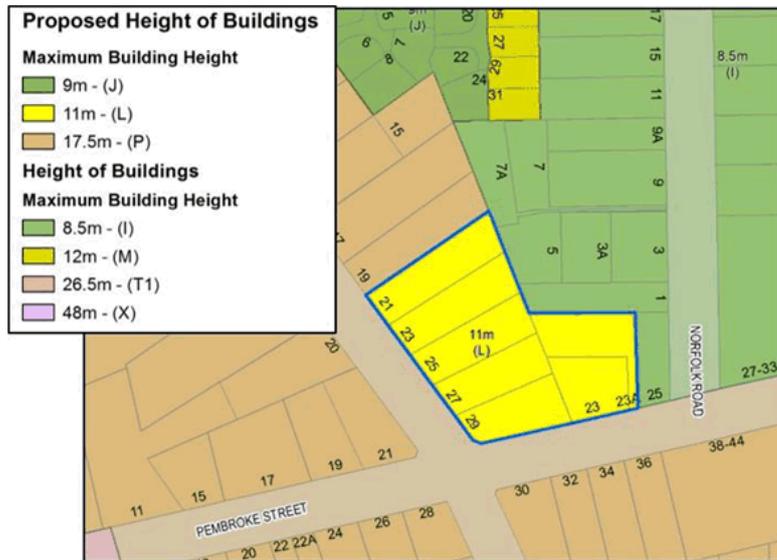

Figure 7: Proposed maximum floor space ratio of 0.8:1

23. It is noted that the Council resolved to apply a R3 Medium Density zoning to properties along Essex and Pembroke Street, however Council officers recommend a R4 High Density Residential zoning. Although the R3 Medium Density Residential Zone in the Hornsby LEP 2013 currently permits residential flat buildings with development consent, it is the intention of City of Parramatta Council through the harmonisation of its planning controls, to restrict residential flat buildings to the R4 High Density Residential Zone. A R4 High Density Residential Zone in this location would ensure a straight forward translation of land use zone upon a newly consolidated Parramatta LEP whilst achieving the intended purpose of reducing the maximum height limit for residential flat buildings on these subject properties.
24. The Hornsby LEP 2013 does not generally apply a standard maximum floor space ratio to residential areas including properties in Essex and Pembroke Streets. As part of Council's harmonisation of planning controls, an application of a floor space ratio of 0.8:1 is recommended for the subject properties. This will ensure an appropriate scale and intensity of development. Further the

Council 8 October 2019

Item 18.6

proposed restriction height to 11 metres will allow for apartment development no greater than three storeys. The application of both a maximum height and FSR is consistent with City of Parramatta's intention for a newly consolidated Parramatta LEP and application of these controls would ensure a straight forward translation.

PLAN-MAKING DELEGATIONS

25. Delegations were announced by the Minister for Planning in October 2012, allowing councils to make LEPs of local significance. On 26 November 2012 Council resolved to accept the delegation for plan making functions. Council also resolved that these functions be delegated to the Chief Executive Officer (CEO).
26. Should Council resolve to proceed with this planning proposal, Council should exercise its plan-making delegations. This means that after the planning proposal has been to Gateway, undergone public exhibition and been adopted by Council, Council officers will deal directly with the Parliamentary Counsel Office in the drafting of the LEP amendment, which is then signed by the CEO before being notified on the NSW Legislation web-site.
27. The matter will be reported to Council along with the Local Planning Panel's advice to Council. If Council resolves to proceed with the Planning Proposal, it will be forwarded to the Department of Planning, Industry and Environment for a Gateway Determination. If the matter proceeds to public consultation, a report on the outcomes of the public exhibition will be provided to the Panel addressing any objections received. If no objections are received, the matter will be reported directly to Council seeking approval to finalise the Planning Proposal.
28. As part of the public exhibition of the Planning Proposal, effected landowners and surrounding residents and key stakeholders including Council's Heritage Committee and Epping Civic Trust will be notified.

NEXT STEPS

29. Subject to Council's endorsement, the City will submit the Planning Proposal to the Department of Planning, Industry and Environment with a request for a Gateway Determination.
30. Subject to Gateway determination, the City will then publicly exhibit the Planning Proposal. As part of the public exhibition of the Planning Proposal, effected landowners and surrounding residents and key stakeholders including Council's Heritage Committee and Epping Civic Trust will be notified.
31. If the matter proceeds to public consultation, a report on the outcomes of the public exhibition will be provided to the Panel addressing any objections received. If no objections are received, the matter will be reported directly to Council seeking approval to finalise the Planning Proposal.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

INTRODUCTION

This planning proposal explains the intended effect of, and justification for, the proposed amendment to *Hornsby Local Environmental Plan 2013*. It has been prepared in accordance with Section 55 of the *Environmental Planning and Assessment Act 1979* and the Department of Planning and Environment (DP&E) guides, 'A Guide to Preparing Local Environment Plans' (August 2016) and 'A Guide to Preparing Planning Proposals' (August 2016) and 'Guidance for merged councils on planning functions' (May 2016).

Background and context

This planning proposal relates to 26 properties at 2-24 Rockleigh Way, 3-7 and 4-8 Brenda Way and 5A and 21-29 Essex Street and 23 and 23A Pembroke Street, Epping. The subject land is located near the Epping Town Centre and within the boundaries of the City of Parramatta Local Government Area (LGA). Prior to Council amalgamations on 12 May 2016 this area formed part of the Hornsby Shire LGA, therefore the existing planning controls for the sites are the Hornsby Local Environmental Plan 2013. The subject sites subject to this planning proposal are shown in **Figure 1 and 2** below.

The Planning Proposal is a progression of the Epping Planning Review undertaken by Council in 2017 and 2018 and the resolution made by Council on 9 July 2018 in relation to a number of matters resulting from the Epping Planning Review, including issues of development interface with Heritage Conservation Areas (HCAs).

The planning proposal seeks to manage the impacts of development adjacent to the East Epping Heritage Conservation Area by reducing the maximum height of building controls for properties along Essex Street and Pembroke Street and to amend the planning controls in order to prevent the development of residential flat buildings in Rockleigh Park Precinct.

Figure 1 – 7 Properties along Essex and Pembroke Streets, Epping

Under the *Hornsby LEP 2013*, the properties at 21-29 Essex Street are currently:

F2019/02038

2

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

- zoned R4 High Density Residential;
- Have a maximum height of buildings of 17.5 metres; and
- have no maximum floor space ratio (FSR).

Under the *Hornsby LEP 2013*, the properties at 23-23A Pembroke Street are currently:

- zoned R3 Medium Density Residential;
- have a maximum building height of 17.5 metres; and
- have no maximum floor space ratio (FSR).

Figure 2 - 19 properties in Rockleigh Park precinct are subject to the planning proposal

Under the *Hornsby LEP 2013* the Rockleigh Park precinct sites:

- Are zoned R4 Low Density Residential;
- have a maximum building height of 17.5 metres; and
- have no maximum floor space ratio (FSR).

An extract of the *Hornsby LEP* maps for each of the sites are provided in Part 4 – Mapping; specifically, Section 4.1 Existing controls.

A legal description of the properties subject to this Planning Proposal is provided in **Table 1** below.

Property Address	Legal Description
2 Rockleigh Way	Lot 2 DP285338
4 Rockleigh Way	Lot 3 DP285338

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 1 – OBJECTIVES OR INTENDED OUTCOMES

The main objective of this planning proposal is to provide a more consistent and appropriate built form transition to the East Epping Heritage Conservation Area.

F2019/02038

5

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 2 – EXPLANATION OF PROVISIONS

This planning proposal seeks to amend *Hornsby LEP 2013 (HLEP 2013)* in relation to the zoning, height and floor space ratio controls.

In order to achieve the desired objectives the following amendments to the *HLEP 2013* would need to be made:

For sites at 2-24 Rockleigh Park, 3-7 and 4-8 Brenda Way:

1. Amend the zone in the **Land Zoning Map** (Sheet LZN_011) from R4 High Density Residential to R3 Medium Density Residential. Refer Figure 6 in Part 4 of this planning proposal.
2. Amend the maximum building height in the **Height of Buildings Map** (Sheet HOB_011) from 17.5 metres to 9 metres. Refer Figure 8 in Part 4 of this planning proposal.
3. Amend the maximum FSR in the **Floor Space Ratio Map** (Sheet FSR_011) to apply an FSR of 0.6:1, noting there is no existing FSR control for the sites. Refer Figure 10 in Part 4 of this planning proposal.

For sites at 5A and 21-29 Essex Street:

1. Amend the maximum building height in the **Height of Buildings Map** (Sheet HOB_011) from 17.5 metres to 11 metres. Refer Figure 9 in Part 4 of this planning proposal.
2. Amend the maximum FSR in the **Floor Space Ratio Map** (Sheet FSR_011) to apply an FSR of 0.8:1, noting there is no existing FSR control for the sites. Refer Figure 11 in Part 4 of this planning proposal.

For sites at 23-23A Pembroke Street:

1. Amend the zone in the **Land Zoning Map** (Sheet LZN_011) from R3 Medium Density Residential to R4 High Density Residential. Refer Figure 7 in Part 4 of this planning proposal.
2. Amend the maximum building height in the **Height of Buildings Map** (Sheet HOB_011) from 12 metres to 11 metres. Refer Figure 9 in Part 4 of this planning proposal.
3. Amend the maximum FSR in the **Floor Space Ratio Map** (Sheet FSR_011) to apply an FSR of 0.8:1, noting there is no existing FSR control for the sites. Refer Figure 11 in Part 4 of this planning proposal.

Note: Council is currently reviewing the multiple land use plans that apply to different parts of the City of Parramatta Local Government Area (LGA). This work will create a single LEP and DCP that will apply to the whole LGA. The process of 'harmonisation' of planning controls is currently at a stage in the planning proposal process which is similar to this planning proposal. Therefore the above controls have been drafted to be consistent with the proposal controls in the harmonisation process so to ensure translation of controls are straight forward.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 3 – JUSTIFICATION

This part describes the reasons for the proposed outcomes and development standards in the planning proposal.

3.1 Section A - Need for the planning proposal

1.1.1. Is the Planning Proposal a result of any study or report?

The Planning Proposal is as a result of the Council resolution of Stage 1 of the Epping Planning Review on 9 July 2018 and forms part of the implementation of Stage 2. A background to the Epping Planning Review, as it relates to this planning proposal, is detailed below.

In March 2014, new planning controls for the Epping Town Centre and surrounds came into effect as a result of the, then, Department of Planning and Environments (DPE) Priority Precinct process. This process resulted in increased building heights and density controls and the creation of three new Heritage Conservation Areas – Rosebank Avenue, East Epping and Essex Street HCA (formerly located within the Hornsby Local Government Area).

Following Council amalgamations on 12 May 2016, Epping Town Centre and immediate surrounds fell wholly within the City of Parramatta Council Local Government Area.

In December 2016, the Epping Planning Review was commenced by City of Parramatta Council. The scope of the review was to address the unintended consequences of the planning control amendments brought into effect of DPE as well as allowing Council to manage current Planning Proposals seeking additional growth within the Town Centre. It also allowed Council to progress matters considered by the former Hornsby Shire Council, including heritage matters.

The Epping Planning Review involves the following Stages:

- Stage 1 – the preparation of technical studies, community consultation and the release of a discussion paper for public comment. This Stage was undertaken between 2016 and 2018. This planning proposal is one of the Council resolved outcomes of Stage 1 of the Epping Planning Review.
- Stage 2 – involves the statutory phase, including the preparation of planning proposals that seek to amend the current planning controls to resolve the land use issues identified during the first phase. Council are currently in this phase of the project.

As part of Stage 1 community consultation, community workshops were undertaken, including 2 heritage review workshops with regards to Heritage Conservation Areas (HCA) within Epping - one workshop for landowners within the HCAs and one general workshop for interested residents. The workshop explored potential land use scenarios and associated impacts in the HCAs. The workshops aimed to listen to the concerns of residents at the impact of proposals and developments for five storey apartments on land adjoining the Epping conservation areas, including the East Epping Heritage Conservation Area.

As part of Stage 1 technical studies, City Plan Heritage completed the Epping Town Centre (East) Heritage Review (June 2017) – refer **Appendix 1** of this report. The purpose of the review was to inform strategic land use decisions across part of the Epping Town Centre previously under the jurisdiction of Hornsby Shire Council and in addition to review related concerns of residents on a number of heritage issues.

In relation to planning controls surrounding the East Epping Heritage Conservation Area,

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

the Heritage Review (refer **Appendix 1**) concluded that a consistent transition between the R4 High Density Residential development along Essex and Pembroke Streets was required in order to prevent further encroachment on the conservation area. Key recommendations of the Heritage Review include:

- Rezone the Rockleigh Park parcels from the R4 High Density Residential Zone which has a 17.5m (5 storey) height to the R3 Medium Density zone with a 12 metre (4 storey) building height, in order to provide a smooth transition from the R2 Low Density Residential of the East Epping Heritage Conservation Area and the R4 High Density Residential area of Essex and Pembroke Streets.
- That the heritage conservation area designation be removed from 1, 3 and 3A Norfolk Road and 25 Pembroke Street and together with 5, 7, and 7A Norfolk Road be rezoned to R3 Medium Density Residential. This would allow them to be potentially developed for apartment buildings (4 storeys).

The Epping Planning Review Discussion Paper was released for public comment in June 2017 and aimed to present appropriate options and recommendations based on technical studies and community feedback in relation to a number of planning matters. The Discussion Paper presented options for the properties at Rockleigh Park precinct and Norfolk Road and Pembroke Street and the strengths and weaknesses of each option were detailed. The purposes of these options was to gain feedback from the community as to what resolution was acceptable.

On 14 August 2017, Council considered a report (refer **Council report and Minutes at Appendix 2**) that summarised submissions from the Epping Planning Review Discussion Paper and technical studies. The report summarised the feedback from land owners and the community on the East Epping Heritage Conservation Area and the options presented to mitigate the interface issues from the adjoining development. It noted that the submissions were divided in opinion as to how the interface issue should be managed.

On 9 July 2018, a report was presented updating Council on the implications for the findings of the Epping Planning Review (refer **Council report and minutes at Appendix 3**), including further assessment work undertaken for Rockleigh Park and Norfolk Road and Pembroke Street properties. In summary the Council report recommended:

- That the area zoned R4 be down-zoned to R3 in the Rockleigh Park Precinct to be consistent with R3 zone boundary to north and east; and
- No changes to battle-axe blocks at 7 and 7A Norfolk Road and rezone 1, 3, 3A and 5 Norfolk Road to R3 zone to enable three storey residential flat buildings subject to amalgamation controls being put in place to create 1 super lot and that 25 Pembroke cannot develop of itself and should retain its existing zoning.

Council resolved to support the above recommendation in relation to Rockleigh Park precinct, however no changes to properties along Norfolk Road and at 25 Pembroke Street. Further Council resolved to amend height of buildings in relation to properties at 21-29 Essex Street and 23 and 23A Pembroke Street, Epping.

A summary of decision making in relation to the above matters is provided at **Appendix 4**.

1.1.2. Is the Planning Proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

The Epping Planning Review Discussion Paper (June 2017) examined the Heritage Review recommendations for Rockleigh Park Precinct and presented options for the community to consider. The purpose of these options was to gain feedback from the community as to what planning solution was acceptable.

In relation Rockleigh Park the Discussion Paper recommended down-zoning the site from the R4 High Density zone to the R3 Medium Density zone, enabling a reduction in the permissible density. It also recommended the preparation of a master plan to determine

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

the most appropriate outcome.

Following assessment and community feedback Council resolved that the current planning proposal is the best means of achieving the objectives/intended outcomes in relation to Rockleigh Park precinct. The proposed amendment to Hornsby LEP 2013 will help to satisfactorily resolve transition issues from the R4 High Density Residential land use zoning to the East Epping HCA.

1.2. Section B – Relationship to strategic planning framework

1.2.1. Is the planning proposal consistent with the objectives and actions contained within the applicable regional or sub-regional strategy?

A Metropolis of Three Cities

In March 2018, the NSW Government released the *Greater Sydney Region Plan: A Metropolis of Three Cities* (“the GSRP”) a 20 year plan which outlines a three-city vision for metropolitan Sydney for to the year 2036.

The GSRP is structured under four themes: Infrastructure and Collaboration, Liveability, Productivity and Sustainability. Within these themes are 10 directions which are each contains Potential Indicator and, generally, a suite of objective/s with each objective supported by a Strategy or Strategies. Those objectives and or strategies relevant to this planning proposal are discussed below.

Infrastructure and Collaboration

An assessment of the planning proposal’s consistency with the GSRP’s relevant Infrastructure and Collaboration objectives is provided in Table 3a, below.

Table 3a – Consistency of planning proposal with relevant GSRP Actions – Infrastructure and Collaboration

Infrastructure and Collaboration Direction	Relevant Objective	Comment
A city supported by infrastructure	O1: Infrastructure supports the three cities	The region plan highlights that the Central River City is undergoing a rebuilding program in a high-growth environment, which requires existing infrastructure to be optimised.
	O2: Infrastructure aligns with forecast growth – growth infrastructure compact	This planning proposal acknowledges Epping as a strategic centre in which the provision of housing this location promotes efficient use of the existing infrastructure while still maintaining appropriate interfaces with adjacent heritage items and conservation areas.
	O3: Infrastructure adapts to meet future need	
	O4: Infrastructure use is optimised	

Liveability

An assessment of the planning proposal’s consistency with the GSRP’s relevant Liveability objectives is provided in Table 3b, below.

Table 3b – Consistency of planning proposal with relevant GSRP Actions – Liveability

Liveability Direction	Relevant Objective	Comment
A city for people	O6: Services and infrastructure meet	The planning proposal aims to

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

	communities' changing needs	improve amenity to the community by creating a better transition in built form from a high density to an existing low density heritage conservation area.
	O7: Communities are healthy, resilient and socially connected	
	O8: Greater Sydney's communities are culturally rich with diverse neighbourhoods	
	O9: Greater Sydney celebrates the arts and supports creative industries and innovation	
Housing the city	O10: Greater housing supply	It is highly unlikely that sites within the Rockleigh Park precinct will be purchased by a developer for redevelopment for five storey residential flat buildings. The existing lots are small (between 250-300 square metres) and have established dwelling homes. Further, a total of 33 lots rely on the same narrow road network for access which falls under community title and it would be a challenge to provide adequate vehicular access and parking. Further to this, the proposed downzoning on other sites is not significant and would not undermine the capacity for Epping to deliver housing as part of the Department's rezoning in 2014.
	O11: Housing is more diverse and affordable	The R3 zones within the Hornsby LEP 2013 offers a high degree of housing diversity, with residential flat buildings still permitted in the zone. There will be no negative impacts on housing diversity and affordability as a result of this planning proposal.
A city of great places	O12: Great places that bring people together	The planning proposal will help to resolve interface issues to the East Epping heritage conservation area by providing an appropriate transition model.
	O13: Environmental heritage is identified, conserved and enhanced	

Productivity

An assessment of the planning proposal's consistency with the GSRP's relevant Productivity objectives is provided in Table 3c, below.

Table 3c – Consistency of planning proposal with relevant GSRP Actions – Productivity

Productivity Direction	Relevant Objective	Comment
A well connected city	O14: The plan integrates land use and transport creates walkable and 30 minute cities	The proposed density is appropriate given the context to existing transport infrastructure.
	O15: The Eastern, GOP and Western Economic Corridors are better connected and more competitive	

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Sustainability

An assessment of the planning proposal's consistency with the GSRP's relevant Sustainability objectives is provided in Table 3d, below.

Table 3d – Consistency of planning proposal with relevant GSRP Actions – Sustainability

Sustainability Direction	Relevant Objective	Comment
A city in its landscape	O25: The coast and waterways are protected and healthier	No specific sustainability measures are proposed at this stage of the planning process. Measures within the Hornsby DCP 2013 will be implemented at development application stage.
	O27: Biodiversity is protected, urban bushland and remnant vegetation is enhanced	
	O28: Scenic and cultural landscapes are protected	
	O29: Environmental, social and economic values in rural areas are protected and enhanced	
	O30: Urban tree canopy cover is increased	
	O31: Public open space is accessible, protected and enhanced	
	O32: The Green grid links Parks, open spaces, bushland and walking and cycling paths	
An efficient city	O33: A low-carbon city contributes to net-zero emissions by 2050 and mitigates climate change	No specific sustainability measures are proposed at this stage of the planning process. Measures within the Hornsby DCP 2013 will be implemented at development application stage.
	O34: Energy and water flows are captured, used and re-used	
	O35: More waste is re-used and recycled to support the development of a circular economy	
A resilient city	O36: People and places adapt to climate change and future shocks and stresses	Brenda Way and Rockleigh Way (5A Essex Street), is flood prone and impacted by the 1:100 year flood level. As the flood levels are contained within the roadway, and this planning proposal is a downzoning to reflect the current land use, it is considered to be a little impact. Any future development applications for properties in Rockleigh Way would be required to address stormwater runoff and flooding to ensure compliance with Council's water management controls within the Hornsby DCP 2013.
	O37: Exposure to natural and urban hazards is reduced	
	O38: Heatwaves and extreme heat are managed	

Implementation

An assessment of the planning proposal's consistency with the GSRP's relevant Implementation objectives is provided in Table 3d, below.

F2019/02038

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Table 3d – Consistency of planning proposal with relevant GSRP Actions – Implementation

Implementation Direction	Relevant Objective	Comment
Implementation	O39: A collaborative approach to city planning	This planning proposal is a key outcome of Stage 1 of the Epping Planning Review which involved in-depth consultation with the community and the consideration of the feedback from this consultation.

Central City District Plan

In March 2018, the NSW Government released *Central City District Plan* which outlines a 20 year plan for the Central City District which comprises The Hills, Blacktown, Cumberland and Parramatta local government areas.

Taking its lead from the GSRP, the *Central City District Plan* (“CCDP”) is also structured under four themes relating to Infrastructure and Collaboration, Liveability, Productivity and Sustainability. Within these themes are Planning Priorities which are each supported Action. Those Planning Priorities and Actions relevant to this planning proposal are discussed below.

Infrastructure and Collaboration

An assessment of the planning proposal's consistency with the CCDP's relevant Infrastructure and Collaboration Priorities and Actions is provided in Table 4a, below.

Table 4a – Consistency of planning proposal with relevant CCDP Actions – Infrastructure and Collaboration

Infrastructure and Collaboration Direction	Planning Priority/Action	Comment
<p>A city supported by infrastructure</p> <p>O1: Infrastructure supports the three cities</p> <p>O2: Infrastructure aligns with forecast growth – growth infrastructure compact</p> <p>O3: Infrastructure adapts to meet future need</p> <p>O4: Infrastructure use is optimised</p>	<p>PP C1: Planning for a city supported by infrastructure</p> <ul style="list-style-type: none"> A1: Prioritise infrastructure investments to support the vision of <i>A metropolis</i> A2: Sequence growth across the three cities to promote north-south and east-west connections A3: Align forecast growth with infrastructure A4: Sequence infrastructure provision using a place based approach A5: Consider the adaptability of infrastructure and its potential shared use when preparing infrastructure strategies and plans A6: Maximise the utility of existing infrastructure assets and consider strategies to influence behaviour changes to reduce the demand for new infrastructure, supporting the development of adaptive and flexible regulations to allow decentralised utilities 	<p>The planning proposal seeks to cluster appropriate density within the strategic centre of Epping while still ensuring that transitions to heritage conservation areas are appropriate.</p>

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

<p>O5: Benefits of growth realized by collaboration of governments, community and business</p>	<p>PP C2: Working through collaboration</p> <ul style="list-style-type: none"> • A7: Identify prioritise and delivery collaboration areas 	<p>This planning proposal is a key outcome of Stage 1 of the Epping Planning Review which involved in-depth consultation with the community and the consideration of the feedback from this consultation.</p>
---	--	---

Liveability

An assessment of the planning proposal's consistency with the CCDP's relevant Liveability Priorities and Actions is provided in Table 4b, below.

Table 4b – Consistency of planning proposal with relevant CCDP Actions – Liveability

Liveability Direction	Planning Priority/Action	Comment
<p>O7: Communities are healthy, resilient and socially connected</p> <p>O8: Greater Sydney's communities are culturally rich with diverse neighbourhoods</p> <p>O9: Greater Sydney celebrates the arts and supports creative industries and innovation</p>	<p>PP C4: Working through collaboration</p> <ul style="list-style-type: none"> • A10: Deliver healthy, safe and inclusive places for people of all ages and abilities that support active, resilient and socially connected communities by (a-d). • A11: Incorporate cultural and linguistic diversity in strategic planning and engagement. • A12: Consider the local infrastructure implications of areas that accommodate large migrant and refugee populations. • A13: Strengthen the economic self-determination of Aboriginal communities by engagement and consultation with Local Aboriginal Land Council's. • A14: Facilitate opportunities for creative and artistic expression and participation, wherever feasible with a minimum regulatory burden including (a-c). • A15: Strengthen social connections within and between communities through better understanding of the nature of social networks and supporting infrastructure in local places 	<p>The subject sites are within walking distance of community facilities in Epping Town Centre. Council has resolved to investigate options for Council owned land at Rawson Street and Pembroke Street for future civic space to accommodate current and future populations. Further to this, the planning proposal incorporates an appropriate transition model to the East Epping Conservation Area and allows for greater appreciation of heritage interfaces within this area.</p>
<p>Housing the city</p> <p>O10: Greater housing supply</p> <p>O11: Housing is more diverse and affordable</p>	<p>PP C5: Providing housing supply, choice and affordability, with access to jobs, services and public transport</p> <ul style="list-style-type: none"> • A16: Prepare local or district housing strategies that address housing targets [abridged version] • A17: Prepare Affordable Rental housing Target Schemes 	<p>It is highly unlikely that sites within the Rockleigh Park precinct will be purchased by a developer for redevelopment for five storey residential flat buildings. The existing lots are small (between 250-300 square metres) and have established dwelling homes. Further, a total of 33 lots rely on the same narrow road network for access which falls under community title and it would be a challenge to provide adequate vehicular access and parking. Further to this, the proposed downzoning on other sites is not</p>

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

		significant and would not undermine the capacity for Epping to be a strategic centre as envisioned by the central city district plan.
<p>A city of great places O12: Great places that bring people together O13: Environmental heritage is identified, conserved and enhanced</p>	<p>PP C6: Creating and renewing great places and local centres, and respecting the District's heritage</p> <ul style="list-style-type: none"> • A18: Using a place-based and collaborative approach throughout planning, design, development and management deliver great places by (a-e) • A19: Identify, conserve and enhance environmental heritage by (a-c) • A20: Use place-based planning to support the role of centres as a focus for connected neighbourhoods • A21: In Collaboration Areas, Planned Precincts and planning for centres (a-d) • A22: Use flexible and innovative approaches to revitalise high streets in decline. 	<p>This planning proposal proposes introduce an appropriate transition model to the East Epping conservation area. The planning proposal will help to resolve interface issues and community concerns as identified in the Epping Planning Review.</p>

Productivity

An assessment of the planning proposal's consistency with the CCDP's relevant Productivity Priorities and Actions is provided in Table 4c, below.

Table 4c – Consistency of planning proposal with relevant CCDP Actions – Productivity

Productivity Direction	Planning Priority/Action	Comment
<p>O14: The plan integrates land use and transport creates walkable and 30 minute cities</p>	<p>PP C9: Delivering integrated land use and transport planning and a 30-minute city</p> <ul style="list-style-type: none"> • A32: Integrate land use and transport plans to deliver a 30-minute city • A33: Investigate, plan and protect future transport and infrastructure corridors • A34: Support innovative approaches to the operation of business, educational and institutional establishments to improve the performance of the transport network • A35: Optimise the efficiency and effectiveness of the freight handling and logistics network by (a-d) • A36: Protect transport corridors as appropriate, including the Western Sydney Freight Line, North South 	<p>It is acknowledged that this planning proposal includes provisions which reduced the permissible residential density of land.</p> <p>However, the planning proposal has been justified through the Epping Planning Review which directly identifies the subjects sites as needing amendment. The planning proposal does not undermine the capacity of Epping being a strategic centre' as identified in the central city district plan as it still allows for medium density residential development</p> <p>The reduction in density is of minor scale and thus of minor significance.</p>

1.2.2. Is the planning proposal consistent with the local council's Community Strategic Plan or other local strategic plan?

The following local strategic planning documents are relevant to the planning proposal.

Parramatta 2038 Community Strategic Plan

Parramatta 2038 is a long term Community Strategic Plan for the City of Parramatta and it links to the long-term future of Sydney. The plan formalises several big and transformational ideas for the City and the region.

The planning proposal is considered to be consistent with Council's local strategy as it aims to maintain the heritage significance of the East Epping HCA whilst resolving interface issues and the community.

1.2.3. Is the planning proposal consistent with the applicable State Environmental Planning Policies?

The following State Environmental Planning Policies (SEPPs) are of relevance to the site (refer to Table 5 below).

Table 5 – Consistency of planning proposal with relevant SEPPs

State Environmental Planning Policies (SEPPs)	Consistency: Yes = ✓ No = x N/A = Not applicable	Comment
SEPP No 1 Development Standards	N/A	This SEPP is not applicable to the subject land under clause 1.9 of Hornsby LEP 2013
SEPP 4 – Development Without Consent and Miscellaneous Exempt and Complying Development	N/A	This SEPP is not applicable to the subject land under clause 1.9 of Hornsby LEP 2013
SEPP 6 – Number of Storeys in a Building	N/A	Standard instrument definitions apply.
SEPP 33 – Hazardous and Offensive Development	N/A	
SEPP No 55 Remediation of Land	✓	Not relevant to proposed amendment. May be relevant to future DAs.
SEPP 60 – Exempt and Complying Development	N/A	This SEPP is not applicable to the subject land under Clause 1.9 of the Hornsby LEP 2013.

F2019/02038

15

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

SEPP 64 – Advertising and Signage	N/A	Not relevant to proposed amendment. May be relevant to future DAs.
SEPP No 65 Design Quality of Residential Flat Development	✓	Detailed compliance with SEPP 65 will be demonstrated at the time of making a future development application for the site facilitated by this Planning Proposal (applies only to 21-29 Essex and 23 and 23A Pembroke Streets).
SEPP No 70 Affordable Housing (Revised Schemes)	N/A	Not relevant to proposed amendment.
SEPP (Affordable Rental Housing) 2009	N/A	Not relevant to proposed amendment.
SEPP (BASIX) 2004	N/A	Detailed compliance with SEPP (BASIX) will be demonstrated at the time of making a development application for the site facilitated by this Planning Proposal.
SEPP (Exempt and Complying Development Codes) 2008	✓	May apply to future development of the site.
SEPP (Infrastructure) 2007	✓	May apply to future development of the site.
Sydney Regional Environmental Plan No 18– Public Transport Corridors	N/A	This SEPP is not applicable to the subject land under Clause 1.9 of the <i>Hornsby LEP 2013</i> .
Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005	N/A	The proposed development is not located directly on the Sydney Harbour Catchment foreshore. Any potential impacts as a result of development on the site, such as stormwater runoff, will be considered and addressed appropriately at DA stage.
SEPP (Urban Renewal) 2010	✓	The Planning Proposal will stimulate renewal within the nominated precinct of Granville and will contribute to the employment and job targets for the area.

1.2.4. Is the planning proposal consistent with applicable Ministerial Directions (s.9.1 directions)

In accordance with Clause 9.1 of the *EP&A Act 1979* the Minister issues directions for the relevant planning authorities to follow when preparing planning proposals for new LEPs. The directions are listed under the following categories:

- Employment and resources

F2019/02038

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

- Environment and heritage
- Housing, infrastructure and urban development
- Hazard and risk
- Housing, Infrastructure and Urban Development
- Local plan making

The following directions are considered relevant to the subject Planning Proposal.

Table 6 – Consistency of planning proposal with relevant Section 9.1 Directions

Relevant Direction	Comment	Compliance
1. Employment and Resources		
Direction 1.1 – Business and Industrial Zones	This Planning Proposal will not affect land within an existing or proposed business or industrial zone.	Yes
2. Environment and Heritage		
Direction 2.3 - Heritage Conservation	<p>The subject sites are adjacent to the East Epping Conservation Area (C9). A Heritage Review (refer Appendix 1) was completed as part of Stage 1 of the Epping Planning Review. The Heritage Review assessed the heritage value and significance of properties located in the East Epping Heritage Conservation Area on the interface with the R3 Medium Density Residential and the R4 High Density Residential zones, with particular attention to Rockleigh Way and 1, 3, 3A, 5, 7 and 7A Norfolk Road and 25 Pembroke Street.</p> <p>In relation to planning controls surrounding the East Epping Heritage Conservation Area, the Heritage Review concluded that a consistent transition between the R4 High Density Residential development along Essex and Pembroke Streets was required in order to prevent further encroachment on the conservation area. Key recommendations of this study with regards to the Rockleigh Park precinct have materialised as part of this planning proposal.</p> <p>Further to this, Council resolved to amend the planning controls at 21-29 Essex and 23-23A Pembroke Streets to further ensure an adequate built form transition to the East Epping Conservation Area.</p>	Yes
3. Housing, Infrastructure and Urban Development		
Direction 3.1 - Residential Zones	<p>It is acknowledged that this planning proposal includes provisions which reduced the permissible residential density of land.</p> <p>However, the planning proposal is consistent with Clause 6 of Direction 3.1 as it:</p> <ul style="list-style-type: none"> • Has been justified through the Epping Planning Review which directly identifies the subjects sites as needing amendment • The planning proposal does not undermine the capacity of Epping being a strategic centre' as identified in the central city district plan as it still allows for medium density residential development • The reduction in density is of minor scale and thus of minor significance. 	No - justified in comments

F2019/02038

17

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Direction 3.4 - Integrating Land Use and Transport	The Planning Proposal is consistent with this direction, in that it: <ul style="list-style-type: none"> will continue to provide for an appropriate amount of density within the Epping strategic centre will enable residents to walk or cycle to work if employed in the Epping or utilise the heavy rail or metro service. 	Yes
4. Hazard and Risk		
Direction 4.1 - Acid Sulfate Soils	The site is not identified on the Acid Sulfate Soils Map in Hornsby Local Environmental Plan 2013.	Yes
Direction 4.3 - Flood Prone Land	5A Essex and 16 Rockleigh Park are identified as flood affected and affected by the 1-100 year ARI. The other sites are not flood prone and is above the 1:100 year flood level. Any potential impacts as a result of development on the site, such as stormwater runoff, will be considered and addressed appropriately at DA stage. This will also include any design detail required to ensure compliance with Council's water management controls within the Parramatta DCP 2011.	Yes
5. Local Plan Making		
Direction 6.1 - Approval and Referral Requirements	The Planning Proposal does not introduce any provisions that require any additional concurrence, consultation or referral.	Yes
Direction 6.3 - Site Specific Provisions	The Planning Proposal does not introduce any site specific provisions.	Yes
6. Metropolitan Planning		
Direction 7.1 - Implementation of A Plan for Growing Sydney	The planning proposal does not proposed substantive amendments and achieves the overall intent of the Plan for Growing Sydney. The achievements of the plan's planning principles, directions, priorities for subregions, strategic centres and transport gateways are not undermined by this planning proposal.	Yes

1.3. Section C – Environmental, social and economic impact

This section considers the potential environmental, social and economic impacts which may result from the Planning Proposal.

1.3.1. Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

Land the subject of this planning proposal does not contain any critical habitat or threatened species, populations or ecological communities, or their habitats. Therefore, this proposal does not pose any threat to the above.

1.3.2. Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?

F2019/02038

18

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

The main potential environmental impacts to be assessed for the proposal for the site are built form and heritage.

Rockleigh Park Precinct

As part of the Epping Planning Review the interface issues relating to East Epping Avenue have been assessed through landowner and community feedback, heritage study (refer **Appendix 1**) and urban design testing. Based on these assessments it concluded that western side of Rockleigh Way be rezoned to be consistent with the eastern side of Rockleigh Way.

The proposed R3 Medium Density Residential zone is consistent with the Rockleigh Park properties that form its northern and eastern boundaries. The current R4 zoning and 17.5 metre height limit (five storey residential flat buildings) would result in encroachment of inappropriate high density development adjacent to low density and the low density of the East Epping Heritage Conservation Area.

It is highly unlikely that these sites will be purchased by a developer for redevelopment for five storey residential flat buildings. The existing lots are small (between 250-300 square metres) and have established dwelling homes. Further, a total of 33 lots rely on the same narrow road network for access which falls under community title and it would be a challenge to provide adequate vehicular access and parking. The recommended down-zoning better reflects the current use of small single and two storey cottages.

The proposed R3 Medium Density Residential zone and 0.6:1 and 9 metre maximum height of buildings will ensure the current land uses are supported, as well as future potential to amalgamate two to three parcels in the future to develop multi-unit dwellings (that is townhouses) at an appropriate scale and intensity of development. It is also anticipated that these same controls would apply to the eastern side of Rockleigh Way as part of harmonisation of the planning controls.

The proposed planning controls for Rockleigh Park Precinct planning proposal are consistent with the recommendations of the Heritage Review (Epping East) (refer **Appendix 1**) and Epping Town Centre Discussion Paper. The proposed R3 Medium Density Residential zone would provide consistency with the adjacent development of the northern and eastern side of Rockleigh Way and a more appropriate transition to the adjoining East Epping Heritage Conservation Area. **Figure 3** below indicates the proximity of the subject sites to the East Epping Heritage Conservation Area.

21-29 Essex Street and 23 & 23A Pembroke Street

Council on 9 July 2018 resolved to introduce the following changes to Hornsby LEP 2013 in respect of properties at 21-29 Essex Street and 23 and 23A Pembroke Street Epping:

- 21, 23, 25, 27 and 29 Essex Street amend the zoning from R4 High Density Residential to R3 Medium Density Residential with maximum height permitted on these sites to be amended from 17.5 metre to 11 metres (to allow for apartment building development no greater than three storeys on these sites); and
- The height of building control for 23 and 23A Pembroke be reduced from 12 metres to 11 metres with the existing zoning of Residential R3 Medium Density Residential to be retained for these two sites.

Refer **Appendix 3** for full Council report and minutes of 9 July 2018.

It is noted that the Council resolved to apply a R3 Medium Density zoning to properties along Essex and Pembroke Street, however Council officers recommend a R4 High Density zoning. Although the R3 Medium Density Zone in the Hornsby LEP 2013 currently permits residential flat buildings with development consent, it is the intention of City of Parramatta Council through the harmonisation of its planning controls, to restrict residential flat buildings to the R4 High Density Zone. A R4 High Density Zone in this

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

location would ensure a straight forward translation of land use zone upon a newly consolidated Parramatta LEP whilst achieving the intended purpose of reducing the maximum height limit for residential flat buildings on these subject properties.

The Hornsby LEP 2013 does not generally apply a standard maximum floor space ratio to residential areas including properties in Essex and Pembroke Streets. As part of Council's harmonisation of planning controls, an application of a floor space ratio of 0.8:1 is recommended for the subject properties. This will ensure an appropriate scale and intensity of development. Further the proposed restriction height to 11 metres will allow for apartment development no greater than three storeys. The application of both a maximum height and FSR is consistent with City of Parramatta's intention for a newly consolidated Parramatta LEP and application of these controls would ensure a straight forward translation.

Further, the proposed planning controls would enable less dwellings than under the current planning controls.

It is noted that the sites directly adjoining the subject properties of this planning proposal, namely 7-9 Essex Street and 15-19 Essex Street are proposed to retain the current planning controls of R4 High Density Residential and a height of buildings of 17.5 metres. These sites are subject to active development applications, which means any amendment to planning controls at this current time be ineffective.

The proposed decrease in height of buildings from 17.5 metres (5 storeys) to 11 metres for the subject properties along Essex Street will allow for residential flat buildings of no greater than three storeys. Adjustment of the maximum height of buildings for both 23 and 23A Pembroke Street from 12 metres to 11 metres would ensure consistency with the adjacent Essex Street properties. The proposed reduction in height of buildings would provide a more appropriate built form transition to the directly adjoining East Epping Consideration Area. **Figure 3** below indicates the proximity of the subject sites to the East Epping Heritage Conservation Area.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Figure 3: The subject sites proximity to the East Epping Heritage Conservation Area and heritage items

1.3.3. How has the planning proposal adequately addressed any social and economic effects?

The planning proposal aims to resolve the outcome of a planning process which facilitated density which provided an inappropriate transition in built form to the East Epping heritage conservation area. The planning proposal recognises Rockleigh Way and Brenda Way will have consistent planning controls with the north and east of Rockleigh Way and that the landowners Essex and Pembroke Streets will still have the opportunity re-develop their sites and realise improved social and economic benefits.

1.4. Section D – State and Commonwealth Interests

1.4.1. Is there adequate public infrastructure for the planning proposal?

F2019/02038

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

The subject land is located approximately 400 metres from retail area of Epping Town Centre and approximately 650 metres from the Epping Railway Station and the Sydney Northwest Metro service.

Civil and utility infrastructure is suitably accessible to service the subject land and support future development. Redevelopment of the subject site and further development within the area can optimise public infrastructure investment.

1.4.2. What are the views of State and Commonwealth public authorities consulted in accordance with the gateway determination?

Consultation with the State and Commonwealth public authorities will be undertaken once the gateway determination has been issued.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 4 – MAPPING

This section contains the mapping for this planning proposal in accordance with the DP&E's guidelines on LEPs and Planning Proposals. **Existing controls**

This section illustrates the current *Hornsby LEP 2013* controls which apply to the site.

PART 5 – COMMUNITY CONSULTATION

The planning proposal (as revised to comply with the Gateway determination) is to be publicly available for community consultation.

Public exhibition is likely to include:

- Newspaper advertisement;
- Display on the Council's website;
- Written notification to landowners and adjoining landowners;
- Written notification to community groups in Epping, such as the Epping Civic Trust; and
- Written notification to Council's Heritage Advisory Committee.

The gateway determination will specify the level of public consultation that must be undertaken in relation to the planning proposal including those with government agencies.

Consistent with sections 3.34(4) and 3.34(8) of the *EP&A Act 1979*, where community consultation is required, an instrument cannot be made unless the community has been given an opportunity to make submissions and the submissions have been considered.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

PART 6 – PROJECT TIMELINE

Once the planning proposal has been referred to the Minister for review of the Gateway Determination and received a Gateway determination, the anticipated project timeline will be further refined, including at each major milestone throughout the planning proposal's process.

Table 7 below outlines the anticipated timeframe for the completion of the planning proposal.

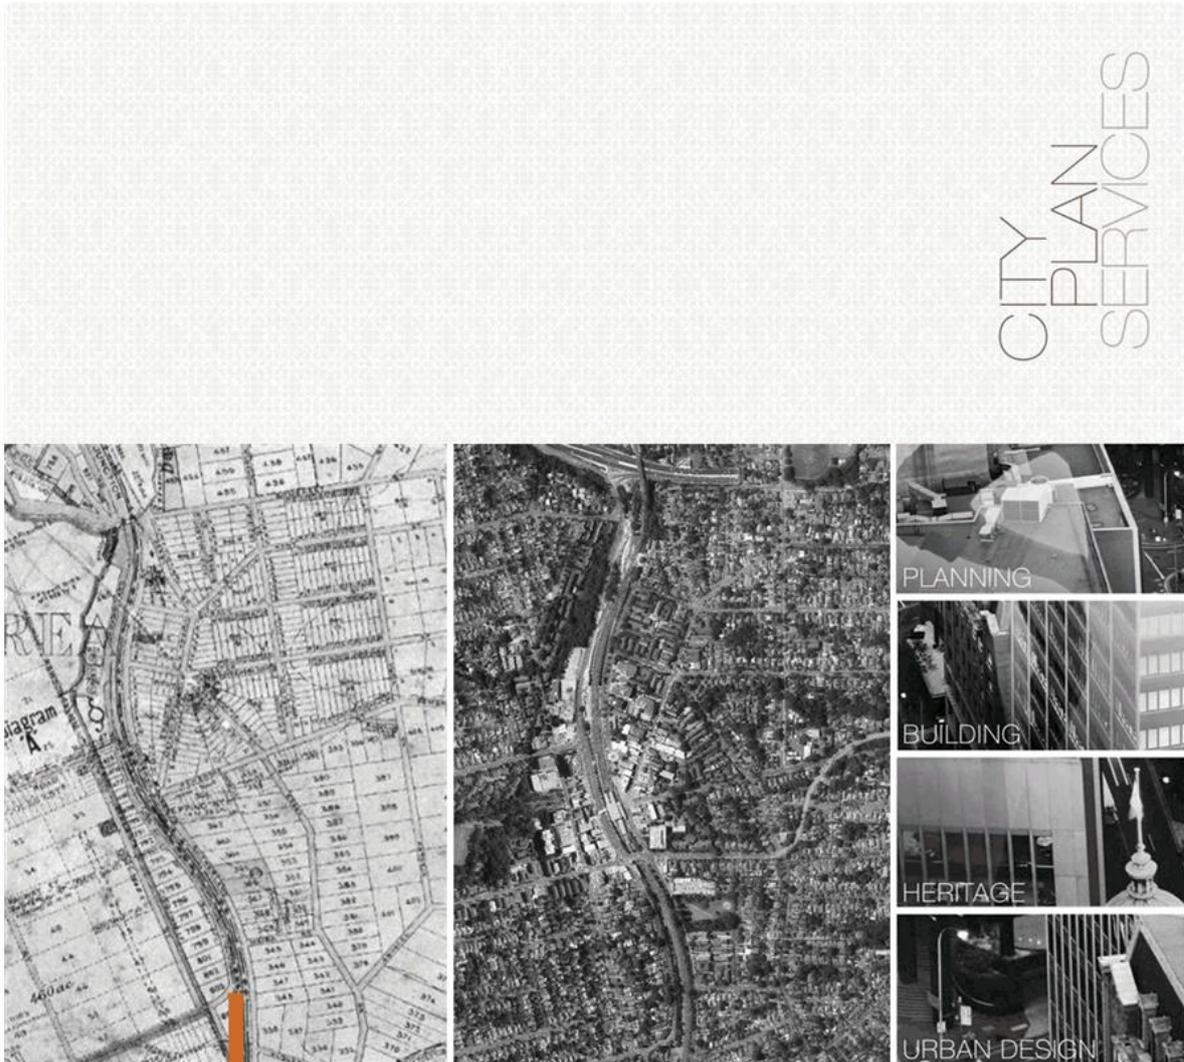

Table 7 – Anticipated timeframe to planning proposal process

MILESTONE	ANTICIPATED TIMEFRAME
Report to LPP on the assessment of the PP	17 September 2019
Report to Council on the assessment of the PP	8 October 2019
Referral to Minister for review of Gateway determination	October 2019
Date of issue of the Gateway determination	December 2019
Commencement and completion dates for public exhibition period	February 2020
Commencement and completion dates for government agency notification	February 2020
Consideration of submissions	March 2020
Consideration of planning proposal post exhibition and associated report to Council	April 2020
Submission to the Department to finalise the LEP	May 2020
Notification of instrument	July 2020

 V2.DOCX V

1. Executive Summary

1.1 Background

This study has been commissioned by the City of Parramatta Council in order to undertake a Heritage Review of the Epping Town Centre. The City of Parramatta Council recently inherited the balance of the Epping Town Centre as a result of Council amalgamations from Hornsby Shire Council on the 12 May 2016. Currently, the controls for different parts of Epping Town Centre vary as a result of previous decision making structures under the City of Parramatta Council and Hornsby Shire Council.

The City of Parramatta's City Strategy Department commissioned a heritage review to inform strategic land use decisions across part of the Epping Town Centre previously under the jurisdiction of Hornsby Shire Council and, in addition, to review related concerns of residents on a number of heritage issues. It excludes any analysis on the western side of the Town Centre, railway line, excluding Rosebank Avenue HCA and properties subject to Stage 6 of the Hornsby Council Heritage Review.

The principal aims of this heritage review are to:

- Review the three existing Heritage Conservation Areas (HCAs) of East Epping, Essex Street and Rosebank Avenue located within the Epping Town Centre area recently acquired by the City of Parramatta Council;
- Investigate concerns raised by residents on a number of heritage issues including:
 - the value and significance of each HCA; and
 - the value and significance of properties located on interface areas with R4 and R3 High Density Residential Areas;
- Review of current planning controls of interface areas around the existing HCAs; and
- Conduct Stage 6 of the Hornsby Council Heritage Review.

1.2 Summary of Findings

In general, the East Epping, Essex Street and Rosebank Avenue HCAs retain the same level of integrity and significance as described in the most recent study, *Epping Town Centre Heritage Review*, conducted in 2013, with few significant changes evident.

Subsequent to the field survey, all properties within the East Epping, Essex Street and Rosebank Avenue HCAs were reassessed for their contribution to the overall significance of their respective HCAs. The previous rankings from the 2013 study were taken in to account in the reassessment of all properties within each HCA. Generally, the ranking awarded to each property was consistent for both the Essex Street and Rosebank Avenue HCAs, however, some differences occurred for the East Epping HCA. Some properties within the East Epping HCA were listed as Neutral, due to being from the historical period of development of the area (typically Federation or Inter War) however, had been modified to a degree that has removed or obscured characteristic detailing of their respective periods.

An investigation into the impact of R3 and R4, Medium and High Density Residential Zones was undertaken, through community consultation, site visits of individual properties, and analysis of recently approved development applications at the interface zones with the East Epping, Essex Street and Rosebank Avenue HCAs. Generally, property owners whose dwellings were located adjacent to a high density residential development raised concerns with both the development and the implications of being located within a HCA. Whilst not heritage concerns, issues of privacy, safety, health and financial implications were all raised during the different phases of community consultation. Through further assessment of the impact of the high and medium density residential development at site visits, it was noted that although the new developments do impact upon the backdrop of each of the HCA's in different ways, the developments did not impact upon the setting and streetscape characteristics of the particular HCA so much that would result in the modification to the

boundaries or removal in whole or in part of any HCA. The impact of the new developments essentially was in relation to planning matters rather than heritage matters.

Notwithstanding, in order to help mitigate the issues and concerns raised by the property owners and to address impacts upon the heritage significance of the East Epping, Essex Street and Rosebank Avenue HCAs as well as individual heritage items, planning controls were reviewed and recommendations made to assist in the alleviation of future impacts.

Stage 6 of the Hornsby Council Heritage Review was also conducted, with a total of twenty-two (22) identified properties reviewed.

1.3 Conclusion and Key Recommendations

As a result of this in depth survey and assessment of the HCAs within the Epping Town Centre, the following key recommendations are made within this heritage review:

1. *Retain the current boundaries of the Essex Street and Rosebank Avenue Heritage Conservation Areas (Refer to Sections 10.2 and 10.3)*
 - Following reassessment of the Essex Street and Rosebank Avenue Heritage Conservation Areas, both areas were found to have maintained the significance and intactness established in previous studies. The impact of High and Medium Density Residential development at the interface areas with the Heritage Conservation Areas were not found to have a detrimental impact warranting removal of the Heritage Conservation Areas in part or in whole. Thus, both Heritage Conservation Areas are recommended to be retained in full.
2. *Adjust the south-west boundary of the East Epping Heritage Conservation Area (Refer to Section 10.1)*
 - It is recommended for 25 Pembroke Street, and 1, 3, and 3A Norfolk Road to be removed from the East Epping Heritage Conservation Area, and the boundaries of the HCA are adjusted accordingly.
3. *Retain individual heritage items requested for removal by property owners (Refer to Sections 10.1.1 and 10.2)*
 - 3 and 42 Essex Street have been reassessed for their heritage significance and contribution to their respective Heritage Conservation Area, East Epping and Essex Street respectively, and are recommended to retain their heritage listing under Schedule 5 of the Hornsby LEP 2013.
4. *Rezone removed properties from East Epping Heritage Conservation Area, 5, 7 and 7A Norfolk Road and identified properties within 'Rockleigh Park' to R3-Medium Density Residential with 12m height limit (Refer to Section 11.5)*
 - In order to provide a consistent transition between R4-High Density Residential development on Essex Street and Pembroke Street from further encroaching on the East Epping Heritage Conservation Area, the removed properties from the East Epping Heritage Conservation Area (25 Pembroke Street, and 1, 3, and 3A Essex Street), 5, 7 and 7A Norfolk Road (which share a driveway with 3 and 3A Norfolk Road) and the late 20th Century development known at 'Rockleigh Park' are recommended to be rezoned as R3-Medium Density Residential with a 12m height limit, in order to provide a smooth transition from the R2-Low Density Residential of the Heritage Conservation Area and the R4-High Density Residential area of Essex and Pembroke Streets.
5. *Changes to Design Interface Guidelines of the Hornsby DCP (Refer to Section 11.2.3)*
 - The current Design Interface Guidelines in Section 9.4.1 of the Hornsby DCP 2013 are considered to be a good framework for which to assess the impact of high and medium density residential developments which are located in the interface areas with Heritage Conservation Areas. However, Section 9.4.1 needs to be considered at least in relation to Sections 9.6.6 and 9.6.8. It is recommended that where R3 and R4 Zones interface with a Heritage Conservation Area or Heritage Item that a

10m setback, which is required for Chapman Avenue, should be implemented in order to aid in maintaining the context and setting of each Heritage Conservation Area and Item. In addition, sufficient deep soil planting between R3 and R4 and heritage conservation areas and items should be encouraged, as well as the retention of any mature trees which aid in screening the high or medium density development from the heritage conservation area or heritage item. Furthermore, an adequate assessment of the potential heritage impact on the Heritage Conservation Area and/or Heritage item should be addressed for any future proposed development, to aid in the mitigation of likely heritage impacts.

6. *Maintain current 17.5m and 12m height limits of R4 High Density Residential Zone and R3 Medium Density Residential Zone respectively (Refer to Section 11.3)*

- To ensure that a sufficient transition between Heritage Conservation Areas are maintained and are not further adversely impacted upon through higher density development at interface areas, it is recommended that the current height limits for R4 and R3 Zones are maintained.

7. *Extend R3-Medium Density Residential Zone to Brigg Road and Rose Street (Refer to Section 11.4)*

- Recommendation to extend R3-Medium Density Residential Zone to the northern side of Brigg Road and to Rose Street, which will have an acceptable impact upon the current setting of the Essex Street HCA, provided that adequate consideration is given in regards to sufficient setback, deep soil planting and on the impact upon the setting and curtilage of the Essex Street HCA in any further development proposals, incorporating the recommendations provided in Section 11.2 of this study report.

8. *Additional Recommended Updates to Planning Controls (Refer to Section 11.6)*

- Include an additional prescriptive measure for Essex Street and Rosebank Avenue HCA Provisions for properties located on interface with R4-High Density Residential Zone, as follows:
 - i. Additional development in the rear of properties with direct interface to High and Medium Density Residential Zones can develop up to two storey additions, provided that the addition will not reduce the contribution of the property to the HCA, will not remove mature trees or plantings, and will not reduce the streetscape character of the area.
 - ii. In addition, it is recommended that a provision or Condition be included in the consents for an archival photographic recording to be prepared for all Heritage Items and Contributory buildings and any Neutral buildings which date from the Victorian., Federation, Inter War or Post War periods within the East Epping, Essex Street and Rosebank Avenue HCA's when major alterations and additions and/or demolition is proposed for the property.

9. *Assessment of significance of southern end of Essex Street HCA in future Heritage Review*

- Recommended that future heritage reviews, possibly as part of the new Local Environmental Plan to be developed for the City of Parramatta Council, consider assessing the southern end of the Essex Street HCA, for either extending the HCA's boundary, or for an arboricultural assessment to be undertaken for the possibility of listing the street trees as a landscape items.

10. *Retention or replacement of street trees in Rosebank Avenue due to stormwater drainage for Cliff Road*

- Recommended for the seven (7) street trees located on the western side of Rosebank Avenue identified to be impacted by the proposed stormwater drainage from Cliff Road to be maintained, or if this is not possible, that appropriate replacement trees be planted in the road reserve to ensure that the consistent street tree plantings of Rosebank Avenue are maintained.

11. Hornsby Council Heritage Review - Stage 6 (Refer to Section 13.6)

In summary, the resultant recommendations and updates were made as part of Stage 6 of the Hornsby Council Heritage Review:

iii. Requests for Removal of Heritage listing

The one request for removal of a Heritage Item, 184 Ray Road, has been recommended to be retained and the Inventory Sheet for the item has been updated.

iv. Amend Anomalies in Details of Heritage Listings

One Heritage Item, 73A Oxford Street, was recommended to be changed from R3 Medium Density Residential Zone to R2 Low Density Residential Zone to reflect the East Epping HCA zoning of R2.

v. Request for Listing of New Items

Of the six (6) properties recommended for heritage listing under the Hornsby LEP 2013, three (3) properties were recommended for heritage listing and three (3) were not recommended for heritage listing. Inventory Sheets for the three recommended heritage items have been created.

vi. Review Isolated Items in Housing Strategy Zone (R4) High Density

Of the two (2) Heritage Items which were identified as isolated items in R4 High Density Residential Zones, both Heritage items were recommended to be retained and the Inventory Sheet for each item were updated to reflect their current condition.

vii. Review Details of Heritage Listing

Eight (8) Heritage Items required various details reviewed. All Inventory Sheets were updated for each of the eight (8) items. Two (2) Heritage Items will require further investigation and follow up, due to needing expert advice or access to the site. All Inventory Sheets for these Heritage Items have been updated to reflect their current condition.

viii. Missing Inventory Sheets for Existing Heritage Items

Four (4) Heritage Items were missing Inventory Sheets. All four (4) Heritage Items Inventory Sheets have been either located or created, with up to date photographs. One Heritage Item was recommended for investigation by a Heritage Consultant who specialises in garden and landscapes.

2. Introduction

2.1 Background

This study has been commissioned by the City of Parramatta Council in order to undertake a Heritage Review of Epping Town Centre. The City of Parramatta Council recently inherited the balance of Epping Town Centre as a result of Council amalgamations from Hornsby Shire Council on the 12 May 2016. Currently, the controls for different parts of Epping Town Centre vary as a result of previous decision making structures under the City of Parramatta Council and Hornsby Shire Council.

The City of Parramatta's City Strategy department identified the need of a heritage review to inform strategic land use decisions across the Epping Town Centre that was previously under the jurisdiction of Hornsby Shire Council. In addition to review related concerns of residents on a number of heritage issues. It excludes any analysis on the western side of the Town Centre, railway line, excluding Rosebank Avenue HCA and properties subject Stage 6 of the Hornsby Council Heritage Review.

The principal aims of the heritage review are to:

- Review the three existing Heritage Conservation Areas (HCAs) incorporating East Epping, Essex Street and Rosebank Avenue located within the Epping Town Centre area and are recently acquired by the City of Parramatta Council;
- Investigate concerns raised by residents on a number of heritage issues including:
 - the value and significance of each HCA; and
 - the value and significance of properties located on interface areas with R4 and R3 High Density Residential Areas
- Review of current planning controls of interface areas around the existing HCAs; and
- Conduct Stage 6 of the Hornsby Council Heritage Review.

2.2 Study Area

The study area is located within the Epping Town Centre CBD, and is limited to the land that was previously under the jurisdiction of the Hornsby Shire Council until May 2016 (Figure 1). Epping Town Centre surrounds Epping Train Station along the North Shore and Northern Line.

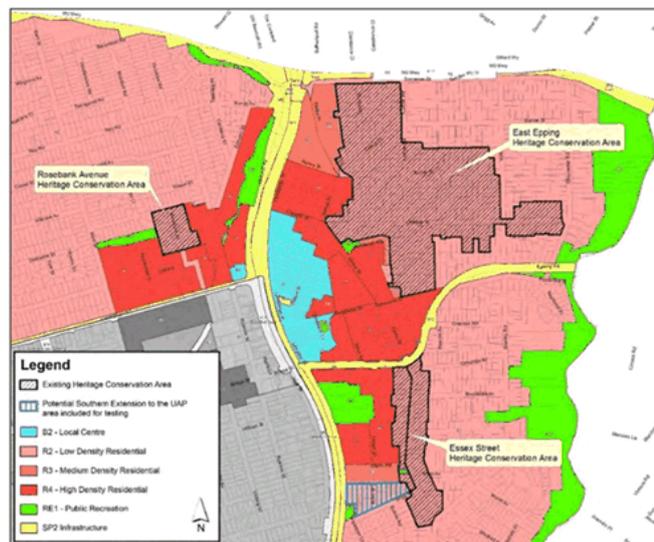

Figure 1: Epping Town Centre Study Area (Source: Amended Epping Town Centre Composite Zoning and Heritage Conservation Areas map, supplied by City of Parramatta Council)

2.3 Objectives and Components

This study is focused on five main parts, addressing the principal objectives of the heritage review:

1. Introduction to Heritage Review and overview of previous heritage studies:

- Review of all existing heritage studies relating to the study area.

2. Review of East Epping, Essex Street and Rosebank Avenue HCAs:

- Undertake a Heritage Assessment of East Epping, Essex Street and Rosebank HCAs;
- Assess the heritage value and significance of properties on the western side of Essex Street between Epping Road and Madeira Street, with the Essex Street HCA;
- Assess the heritage value and significance of properties located in the East Epping HCA on the interface with the R3 Medium Density Residential Zone and R4 High Density Residential Zone, with particular attention to 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street; and
- Provide advice on whether there are grounds for removal of any three of these HCAs in full or in part.

3. Review of Individual properties in HCAs:

- Investigate the heritage value and significance of 1 and 3 Essex Street and consider whether there are grounds for the removal of these properties from the Heritage Schedule of Hornsby LEP 2013 and the East Epping HCA; and
- Investigate the heritage value and significance of 42 Essex Street and consider whether there are grounds for the removal of this property from the Heritage Schedule of Hornsby LEP 2013 and from the Essex Street HCA.

4. Planning Controls Review

- Investigate the impact and implications of increasing the 17.5 and 12m height limits by one storey in the R4 High Density Residential Zone and R3 Medium Density Residential Zone on the integrity and conservation values of the East Epping, Essex Street and Rosebank Avenue HCAs. This investigation includes the implications of extending the R3 Medium Density Residential Zone in Briggs and Rose Streets as shown in blue hatched in Figure 1.
- Investigate the effectiveness of the current design interface guidelines (Section 9.4.1) and other relevant provisions in the Hornsby DCP 2013 in mitigating the effects of development on the character and integrity of the HCA as opposed to amenity concerns. As part of this investigation, have regard to topography and review recently approved Development Applications at the interface with HCAs.
- In addition, provide any recommendations (with clear justification) to modify or add planning and development control to address heritage related impacts in the study area.
- If any properties within the Essex Street HCA are identified for removal from the HCA, provide recommendations for the appropriate zones with FSR and height controls, and the potential implications of these changes on the character and integrity of the balance within the Essex Street HCA.
- If any properties located within the East Epping HCA are identified for removal from the HCA, provide recommendations for the appropriate zones with FSR and height controls; and
- If 1 and/or 3 Essex Street are identified for removal from the Heritage Schedule of Hornsby LEP 2013 and/or the East Epping HCA, provide recommendations on the appropriate zoning and height limits.

5. Hornsby Council Heritage Review – Stage 6:

- Investigate the list of matters identified by Hornsby Shire Council for Epping that were scheduled for review under the next Hornsby Council Heritage Review – Stage 6. This list covers requests to:
 - remove heritage items.;
 - amend anomalies in details of heritage listings;
 - review isolated heritage items in the R4 High Density Residential Zone;
 - review details of heritage listings; and
 - investigate missing inventory sheets for existing items and complete required information.

2.4 Author Identification

The following report has been prepared by Keira De Rosa (Assistant Heritage Consultant) in association with Kerime Danis (Director - Heritage) who has also reviewed and endorsed its content.

The study team included the following staff of City Plan Heritage:

- Kerime Danis (Director - Heritage), MHeritCons (Hons), BArch, AICOMOS Immediate Past President.
Field surveys, site inspections, liaison with client, report preparation and input to/ review of documentation as required.
- Keira De Rosa (Assistant Heritage Consultant) MHeritCons, MRes, BA:
Field surveys, site inspections, report preparation, mapping, graphics and preparation of State Heritage Inventory forms.
- Ziggy Potts (Assistant Heritage Consultant) MMHS, BA(Honours), BSc:
Preparation of State Heritage Inventory forms.

All photographs have been taken by CPH during the field surveys and site inspections conducted on 28 February 2017, 20 March, 21 March and 31 March 2017 unless otherwise stated.

This Heritage Review remains the intellectual property of City Plan Heritage and may not be reproduced in whole without the prior permission of the authors.

2.5 Sources

The reports and planning documents outlined in Section 3.1 have informed the historical context of this report. Additional secondary and primary source have also been sourced for the assessment of both HCAs and heritage items within this report.

A number of historical photographs and maps have been obtained from the NSW State Library online catalogue, the National Library of Australia, HLRV, Hornsby and City of Parramatta Council Local Studies and through various libraries accessed via Trove.

Current aerial photographs have been sourced from the NSW Department of Lands Spatial Information eXchange (SIX) at <http://lite.maps.nsw.gov.au/> as it has detailed aerial maps for Sydney while some street maps have been sourced from Google maps at <http://maps.google.com.au>. The NSW Department of Lands SIX website provided historical aerial photography from 1943.

2.6 Acknowledgments

City Plan Heritage wishes to acknowledge the invaluable support of the people and organisation that assisted in the preparation of this report:

- Paul Kennedy, Project Officer – Land Use Planning, City of Parramatta Council;

- Kevin Kuo, Team leader - Strategic Land Use Planning, City of Parramatta Council;
- Lily Wang, Place Manager, City of Parramatta Council;
- Laura Fraser, Heritage Planner, Hornsby Shire Council;
- Residents of East Epping, Essex Street and Rosebank Avenue Heritage Conservation Areas.

2.7 Limitations

- The land outside the area mapped in Figure 1 has not been covered in this report, however, was briefly surveyed during the site inspections in order to inform the contextual analysis;
- An assessment of the archaeological potential (Aboriginal and European) of the study area is beyond the scope of this report;
- Only heritage items which have been flagged for review as part of the Hornsby Council Heritage Review – Stage 6 have been reviewed. This means that the HCAs west of the railway line (excluding Rosebank Avenue HCA) were excluded from this study.
- A history of the Epping Town Centre and the three HCAs which are the focus of this report has been primarily adapted from previous studies conducted on the area, due to the limitations of the scope of works for this report and the restriction of time. Additional historic research has only been undertaken where it has been deemed by the author to require further research and explanation. Additional historic images and maps have been included in the history of the areas, where possible and available.
- Most review of heritage items and potential heritage items was undertaken on the basis of an external survey, with limited access to the properties themselves, or the interior of buildings; and
- A full heritage assessment of all sites recommended for listing has not been conducted as part of this review, however, heritage inventory forms have been prepared that provide sufficient justification for their recommended listing. This review recognises that further detailed analysis of the heritage assessment of the sites, if listed, can occur as part of the statement of heritage impact when a future development is proposed

3. Methodology

3.1 Previous Studies and Planning Document References

The current planning documents and maps relevant to heritage conservation in the study area of Epping Town Centre are:

- *Hornsby Local Environmental Plan (LEP) 2013*; and
- *Hornsby Development Control Plan (DCP) 2013*;
- *Epping Town Centre Public Domain Guidelines* (December 2015)

Previous Heritage Studies and Reviews relevant to Epping Town Centre include:

- Perumal Murphy Wu, *Hornsby Shire Heritage Study, Final Report* (May 1993)

This study was the first comprehensive study of the environmental heritage of the Hornsby LGA and established the current heritage listing for the Hornsby LEP. The Heritage Study was presented in three volumes, including a Thematic History, Specialist Report and Final Report. The Heritage Study's primary objectives were to: identify and analyse the environmental heritage of Hornsby Shire; make practical recommendations for its conservation and management; make recommendations on changes that may be required to the Hornsby Planning Scheme Ordinance, with regards to heritage; and promote heritage within Hornsby Shire. The first stage of the study followed a thematic study approach as it was for most of the heritage studies carried out across New South Wales at the time. This first volume delivered a basis for

the wider Heritage Study through identifying major themes of development across Hornsby Shire. The second volume described Hornsby Shire's built heritage in its historical context and explains its significance for Hornsby, the Sydney region and the State. This volume also included 50 recommended heritage items for Epping. The third volume presents a strategy for the conservation of Hornsby Shire's valuable heritage, including recommendations for development control measures and a range of other non-statutory initiatives.

- Tropman and Tropman Architects, *East Epping Conservation Evaluation and Review* (October 2001)

This report reviewed the heritage qualities of East Epping and the urban setting of the area. The heritage qualities and urban setting of the East Epping area was evaluated to identify HCA and Heritage Items within the study area. As a result, fourteen (14) new heritage items and two (2) HCAs were identified and recommended for inclusion in the Hornsby LEP. The two (2) HCAs recommended within the study area were East Epping and Essex Street HCAs.

- CPC Consulting, *Rosebank Avenue Heritage Assessment* (July 2003)

Following from a proposal to subdivide 15 Rosebank Avenue, Epping and for the demolition of the existing Inter War period dwelling, the streetscape was noted for its intact Inter War period landscape. As such, it was resolved by Council to undertake a heritage assessment of Rosebank Avenue, Epping to determine the need to implement a HCA. This report undertook a heritage assessment of Rosebank Avenue, Epping to determine the character, setting and heritage significance of the area and to determine the need to implement a HCA. The report concluded that the Rosebank Avenue streetscape is the only intact fine representative example of the residential development of Inter War housing estate within the Hornsby Shire and was recommended for listing under the Hornsby LEP.

- Tropman and Tropman Architects, *Hornsby Heritage Review Stage 3* (July 2004)

This report formed the third Hornsby Heritage Review aiming to assess the heritage significance of individual properties and to make recommendations for items inclusion or exclusion from the Hornsby LEP. The primary objectives were to: investigate and assess the heritage significance of the properties included in the review; to formulate statements of significance that address the heritage qualities of the properties; and to make recommendations for items to be included in, or removed from the Hornsby LEP. In Epping one (1) item was recommended to be retained and one (1) item was not recommended to be added.

- Landarc, *Hornsby Shire Heritage Review Stage 4* (January 2008)

Forming the fourth Heritage Review for the Hornsby Shire, this report included a review of heritage listed trees and a number of other built heritage items. Requests from property owners for the addition or removal of items were reviewed as well as nominations from individual and community groups considered within the report. The review of built heritage items included five (5) properties within Epping, with one recommended for removal and three (3) to be added to the Hornsby LEP.

- Godden Mackay Logan, *Hornsby Heritage Study Review Stage 5* (March 2013)

The fifth stage of the Hornsby Heritage Study reviewed the heritage significance of 78 items, for recommendations of inclusion or deletion of items from the Hornsby LEP. The review assessed thirty six (36) properties containing built and landscape items, as well as forty two (42) privately-owned heritage listed gardens. Of the items located in Epping, two (2) were recommended for listing, one (1) was recommended not to list, one items' details were updated, one (1) item was recommended for retention on LEP and two (2) items were recommended for removal.

- Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013)

Following from the preparation of the *Epping Town Centre Study* (2011) and the proposed intensification of the area, Hornsby Council resolved in 2012 to progress with recommendations from the 2001 and 2003 for the reassessment of three proposed HCAs, including the East Epping, Essex Street and Rosebank Avenue HCAs. In addition, the significance of twenty three (23) individual properties nominated for heritage listing within the Epping Town Centre Area were also assessed and the impact of the proposed Cliff Avenue Residential Intensification Precinct on the proposed Rosebank Avenue Heritage Conservation Area was also assessed. The review proposed for: all three HCAs to be listed, with extensions to some of the recommended boundaries of the areas; twenty two (22) of the twenty three (23) recommended items to be listed and a number of controls were recommended for the interface areas of the Rosebank Avenue HCA including minimum setback, reduced heights and massing new development in the Cliff Avenue Residential Intensification Precinct.

3.2 Study Methodology

This study employs a methodology that is consistent with the guidelines for Heritage Studies prepared by the then NSW Heritage Office and Department of Urban Affairs and Planning. It also uses the system described in the NSW Heritage Manual 'Assessing Heritage Significance' guidelines. The philosophy and process adopted is that guided by the Australia ICOMOS Burra Charter 2013.

The first stage of this study was to review the background documentation including but not limited to the existing studies detailed in Section 3.1 above and the inventory forms for the East Epping, Essex Street and Rosebank Avenue HCA's and the existing Heritage Items within the area which have been requested for review as part of this study. The review allowed for understanding of the previous rationale in the contribution/significance ranking and assessment of the boundaries of each HCAs and the Heritage Items within the area. Subsequently, determination of a methodology by which the HCAs and Heritage Items would be assessed has been established so as to maintain a consistent approach and assessment across the Epping Town Centre study area.

3.3 Heritage Conservation Area Definitions

HCAs are identified by analysing their heritage significance and the special characteristics that make up that significance; these may include subdivision and street pattern, vegetation, the consistency of building materials, form and scale, or the common age of the building stock and historical associations.

HCAs can be recognised and assessed in a number of ways. One such way is to rank and map the elements of an area to determine the cohesiveness and integrity of a place. A HCA will demonstrate a high proportion of contributory items in comparison to all other items. As well as demonstrating the proportion of significant elements topographically a HCA should also be evident in its visual experience. A HCA will become apparent when one moves into it due to the cohesive and consistent building forms, materials and scale which create a sense of place. When one can recognise that an area has a sense of place it becomes a matter of determining why that sense of place exists by articulating the physical and historical characteristics which define it, and if it then demonstrates sufficient value to be considered significant through those characteristics. Therefore, as well as having a high proportion of significant items these elements must also be visually apparent within the area. An understanding of historical patterns of subdivision and development within a locale will also aid in the identification of HCAs as one will be able to determine where such areas potentially exist only to qualify if its original elements are intact and interpretable.

Detailed Character Area Statements, Statements of Significance, Descriptions and Conservation policies were developed for East Epping, Essex Street and Rosebank Avenue HCAs in Section 6.0.

3.4 Ranking Methodology

A detailed survey of each of the HCAs, with particular focus on their interface areas with R4 High Density Residential Areas was then undertaken with methodology and system of ranking applied to the individual properties in each of the HCAs. The results of the survey were then mapped showing the following recommendations for rankings in Section 7.0.

Ranking	Definition
Heritage Item	A building that has been identified as an item of significance and has been listed on the Hornsby LEP 2013.
Contributory	A building that contributes to the character and significance of the Heritage Conservation Area for its historic or aesthetic values, or both. Building that have been adversely altered but still demonstrate historic and aesthetic values of significance to the area are also considered within this category. For example, a dwelling which may have had windows replaced but which otherwise retains its overall form and other detailing would be considered to be a contributory dwelling or dwelling with historic value. These items are of consistent period, scale, materials and form but are not individually significant enough to be included as a heritage item. They add to the cohesive and representative quality of the area.
Neutral	A building that does not contribute to the significance of the area but also does not detract from the area's overall character in terms of form, mass and small scale so that they fit without being disruptive. This may include early or new buildings. An example of a neutral building would be a modern single storey dwelling which respects the setbacks, forms and materials of the neighbouring dwellings. Retention of such neutral buildings may not be required provided that it is replaced with an appropriate infill building in a similar neutral nature.
Non-contributory	A building that detracts from the significance of the area and changes the character of the area. This may include early buildings with intrusive alterations and additions that erode their contribution to the significance of the area and which cannot easily be reversed. It also includes new buildings with detailing, scale and form that are not in line with the character of the area, for example large two storey buildings in unsympathetic 'Mediterranean' or other modern styles, such as light coloured rendered walls and black concrete roof tiles.

4. Study Area Description

4.1 Epping Town Centre Description

The study area is located in the Town Centre of Epping, a north-western suburb approximately 18km north-west of Sydney Central Business District (CBD) and 10km north-east of Parramatta CBD. The town of Epping contains a mixture of residential, commercial, education and recreation resources, which are centred around the North Shore and Northern train line around Epping Train Station. Epping Town Centre spreads in all directions outwards from Epping Train Station, with the highest density developments being located along the western side of the railway line. The whole of the Epping Town Centre study area is administered by the City of Parramatta Council. The eastern and north-western portions of the study area were formerly part of the Hornsby Council Local Government Area (LGA) until the recent local council amalgamations. The whole of the Epping Town Centre became part of the City of Parramatta LGA on 12 May 2016.

Epping Town Centre is bounded to the north by Cheltenham and North Epping, to the east by Marsfield, to the south by Eastwood and to the west by Carlingford. Further to the east is Macquarie University, ranked within the top 10 Australian Universities and among the top 2% of universities in the world and Macquarie Park, the second largest business district in NSW. In October 2012, Epping Town Centre was endorsed by the NSW Government as an Urban Activation Precinct, to develop new planning controls for the centre, allowing for additional dwellings through rezoning, a revitalised commercial and retail core, and upgrades to existing recreational facilities. In combination with the construction of the Sydney Metro Northwest and the close links to Macquarie University, Macquarie Park and Parramatta, the population of Epping is expected to exponentially increase over the coming decades.

Three HCAs exist within the Epping Town Centre study area, all of which contain a number of heritage items, totalling thirty five (35) across all three HCAs. Both the heritage conservation areas and heritage items are listed under Part 1 and 2 of Schedule 5 of the Hornsby Local Environmental Plan (LEP) 2013, of which include the following:¹

Heritage Conservation Areas

Item No.	Description	Address
C9	East Epping Conservation Area	Refer to Figure 2
C10	Essex Street Conservation Area	Refer to Figure 2
C11	Rosebank Avenue Conservation Area	Refer to Figure 2

Heritage Items

Item No.	Description	Address
367	House and garden	21 Chester Street
368	House and garden	23 Chester Street
369	Garden	27A Chester Street
370	"Snaresbrook"	45 Chester Street
371	House	57 Chester Street
372	House	70 Chester Street

¹ Heritage items located outside of the East Epping, Essex Street and Rosebank Avenue HCAs are not reviewed within this heritage review due to this report's limited scope. Only heritage items which are included within the *Hornsby Council Heritage Review – Stage 6*, which are also located outside of the Heritage Conservation Areas, are reviewed within this report in Section 13.0.

378	"Asheldom"	47 Essex Street
379	House	76 Essex Street
380	House	84 Essex Street
385	Epping Public School	2-16 Norfolk Road
386	House and garden	9 Norfolk Road
387	House	33 Norfolk Street
388	"Gwydir"	40 Norfolk Road
389	"Glenorie"	44 Norfolk Road
395	Chester Street Uniting Church and Grounds	56A Oxford Street
396	House	73A Oxford Street
397	"Folkestone"	87 Oxford Street
398	House and garden	93 Oxford Street
403	"Woodlands"	25 Ray Road
408	House	9 Rosebank Avenue
409	House	10 Rosebank Avenue
412	House	40 Surrey Street
413	House	9 Sussex Street
414	House	11 Sussex Street
415	House	15 Sussex Street
418	House	20 York Street
798	House	3 Essex Street
800	House	42 Essex Street
801	House	39 Norfolk Road
802	House	41 Norfolk Road
803	House	43 Norfolk Road
805	House	85 Oxford Street
806	House	91 Oxford Street
807	House	8 Surrey Street
808	House	18 Surrey Street

Descriptions of each of the HCAs under review as part of this study are detailed in Section 6.0. The following images provide an overview of the context of the Epping Town Centre study area.

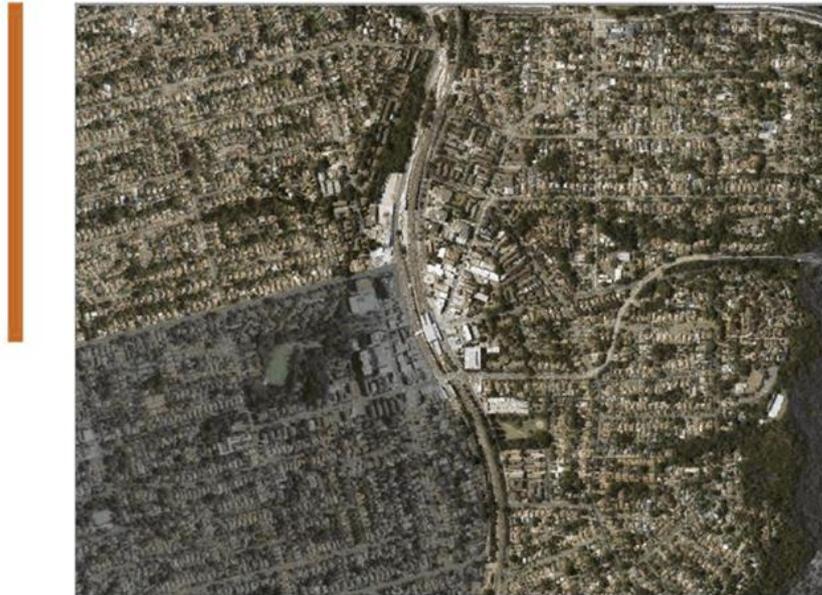

Figure 4: Aerial Map of Study Area, out of scope area darkened in grey (Source: SIX Maps, accessed on 13 March 2017)

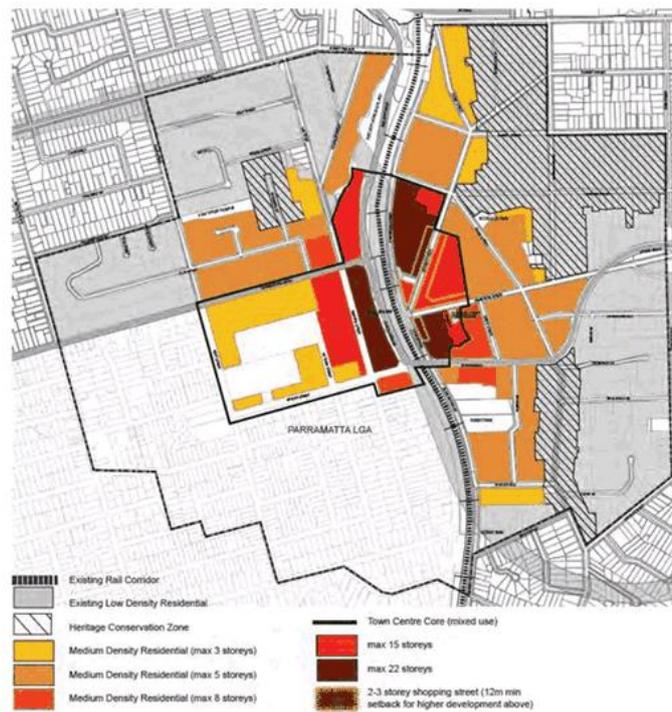

Figure 5: Built Form map of Epping Town Centre (Source: Epping Town Central Public Domain Guidelines, December 2015, Fig. 3.2)

5. Historical Summary

The following general history of the Epping Town Centre Area has been adapted from the *Epping Town Centre Heritage Review*, prepared in 2013 by Perumal Murphy Alessi in 2013, and the *East Epping Conservation Evaluation Review*, prepared in 2001 by Tropman and Tropman Architects. Historic maps and images have been included to supplement this overview. References for sources of information for the history of Epping Town Centre are scarce within both of these previous reports. Where possible, references have been added to substantiate and validate information incorporated from these reports.

5.1 General History of Epping Town Centre Area

European settlement of the Epping Town Centre was slow to develop in the early years of the nineteenth century. In 1804 the eastern side of the now existent railway line was part of the Field of Mars, an area of over 6000 acres dedicated as Common Land for the use of the personnel of the NSW Regiment, whilst areas to the west of the railway line was dedicated to naval officers. During the 1820s, part of the eastern side of the Epping Town centre Area was known as the 'Pennant Hills Sawing Establishment'. The dwellings, cooking place and burial ground of the timber sawing mill of the early 1800's was situated on the eastern side of the railway line on Oxford Street, Epping, now the present day site of the Chester Street Uniting Church. Dwellings included weatherboard and bark huts erected for the overseer and his staff and the convicts. Directly to the east of residential component of the sawing establishment was the saw pit which stretched around the present day Oxford Street from the junction of Chester Street to Pembroke Street. The sawing establishment was not long lived and closed around 1830.

Development between the years of 1830 and 1880 was very slow, with the area primarily being occupied by orchards, gardens and bushland. Very little evidence from this period of development exists today. Prior to the development of the railway line in 1882, there was no public transport to the area which hindered the development of a suburban population. The construction of the railway, which begun in 1881, motioned forward the development of the area. The first railway station for the Epping Town Centre area was situated on the western end of Surrey Street, further north than the present day platform. The original station consisted of a single platform, 264 feet long. The original name for the station was Field of Mars, which was soon changed in the following year to Carlingford. Only eight years following the development of the original station, the station was moved to the present location in 1890, prior to the duplication of the line in 1892 for the provision of improved and faster services to the Sydney region. At this same time, the bridge over the railway line was created, known as Bridge Street, and the Epping township continued to expand.

Figure 6: Field of Mars in 1882, prior to the development of the railway. The indicative location of the Epping Town Centre area is circled in red (Source: Land and Property Information, Sheet Reference 4, Edition Number 0)

Figure 7: Epping Railway Station in 1906. The bridge which now forms part of Bridge Street is visible in the background to the left and current day Beecroft Road runs along the length of the image. (Source: National Museum Australia, Josef Lebovic Gallery collection no. 1)

The opening of the railway spurred on residential development and the establishment of more orchards which had already been established in the area earlier in the nineteenth century. From the late nineteenth to the early twentieth century, Epping was known for its orchards, particularly for citrus in winter and stone fruits in summer. The railway had its advantages for the development of the orcharding industry, with easier access for local farmers to access the markets to sell their produce. One of the most prominent families of the orcharding industry in Epping during this time were the Mobbs family, who are thought to have been situated somewhere west of the West Epping Public School along present day Carlingford Road. Nurseries were also developed within the area, such as the Vollmer's Nursery which extended was located on the block bound by Epping Road to the north (formerly Laurel Avenue) Forest Park to the south (formerly Brown's Paddock), nearly as far as Essex Street to the east and Blaxland Road (formerly Sutherland Road) to the west. This nursery was established by M.F. Vollmer, a German who has arrived in Australia in the 1880s and moved into the Epping area during the 1890s. Vollmer took on a partner, C. E. Vessey, and the nursery became known as Vollmer and Vessey, Mount Tomah Nursery. Vessey took over after Vollmer's death and retired in 1919 after which his son Fred took over the business. Fred relocated the business to Eastwood and the land occupied by the nursery was subdivided in 1920 and subsequently developed. Part of the current Essex Street HCA lies on the land of the former Mount Tomah Nursery, which includes the heritage listed item at 42 Essex Street.

Figure 8: View of Mount Tomah nursery in 1902, possible looking from the crest of present day Pembroke Street, looking south. The two dwellings on the left-hand side of the picture may possibly be 42 and 46 Essex Street, both of which are dwellings which date to the Federation period, despite their current later additions. (Source: City of Ryde Library, 4969553)

Within the same decade as the development of the railway line the Epping Town Centre area begun to be closely subdivided, particularly to the east. The section of the Common Land of over 6000 acres originally granted in 1804, was subdivided not long after the railway in 1886. The first subdivision included land from Devlins Creek in the north to Pembroke Street in the south. Preparations for the sale were simultaneous with the celebration of Queen Victoria's Golden Jubilee to mark the 50th anniversary of her reign in 1887. The street names were nearly all named after English towns and counties.

In 1889, the name 'Epping' was officially adopted for the area, the name being derived due to the many trees in the area after 'Epping Forest' in England. At the same time the area surrounding the southern portion of present day Essex Street was subdivided. A survey of the land was made in 1886 and went up for sale on 30 November 1889. Initially this land was divided into country lots. The result was that, next to the growing town residences, there was a series of farmlets with both well-to-do residence and orchards. The situation of the country lots remained until the 1920s when further subdivision began.

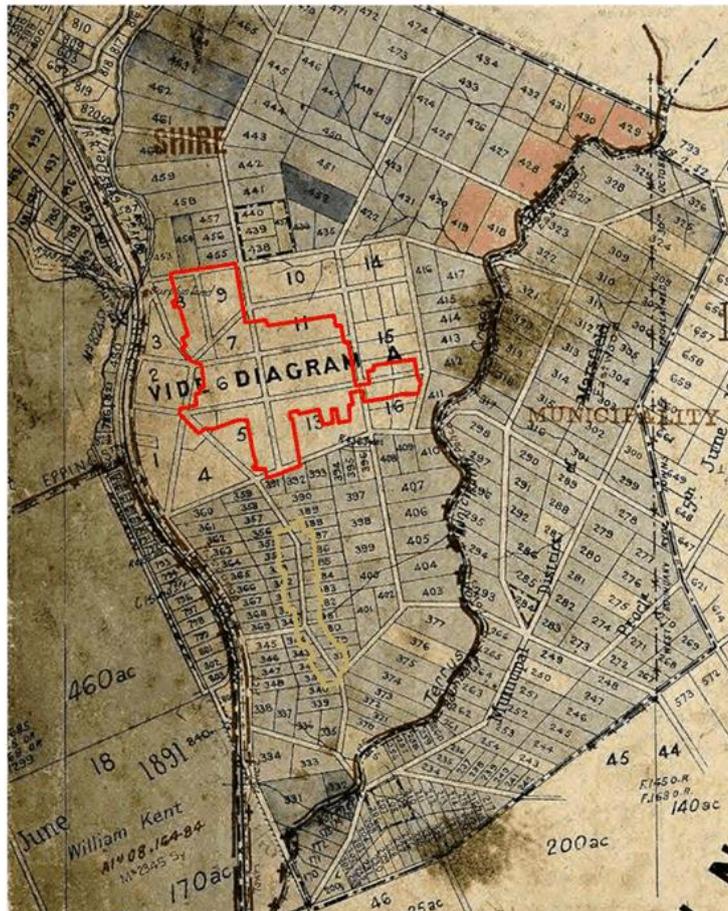

Figure 9: Extract from 1904 map of Parish of Field of Mars, County of Cumberland, Land District of Parramatta. The subdivision of the East Epping HCA and Essex Street HCA are beginning to take shape, and are outlined in red and yellow, respectively (Source: Land and Property Information, Sheet Reference 1, Edition Number 4)

As most of the early development was on the eastern side of the railway, a number of shops also emerged in the area, particularly near the station. The growing population also resulted in the Education Department's decision to construct a centralised public school in the area, now known as Epping Public School, which lies within the East Epping HCA. In January 1900, a site of over 2 acres on the corner of Norfolk Road and Pembroke Street was purchased for £350. In July, a tender was accepted for the erection of the building which was completed in June 1901. The first enrolment was for 94 pupils and by the end of the first month this number increased to 135. The School has continued to develop with more buildings added in 1911, 1913 and 1922. The early buildings largely remain in a bushland setting and school continues to be a local focus in the area.

Figure 10: Epping Public School on Empire Day, 1913 (Source: Hornsby Central Library Local Studies, <https://hornsby.spydus.com/cgi-bin/spydus.exe/ENQ/OPAC/BIBENQ?BRN=64099>)

Major works were completed at Epping Station in 1900 when new platforms and a main platform building (which remains today) were constructed. Like most of the rail network the Station continued to be developed, largely in accordance with improvements to the overall system, but also to cater for the needs of the local population. The works have continued to the present, with major cross country link and triplication of the line through Chatswood and major upgrade of the complex, including construction of new overhead bridges and lifts completed in 2009. Further upgrades to Epping Station are scheduled as part of the Sydney Metro Northwest, scheduled to be completed in the first half of 2019.²

Figure 11: Epping Railway Station in 1900. The shops which had begun to develop around the railway station are visible to the right of the image (Source: National Library of Australia, <http://nla.gov.au/nla.obj-155296106>)

Unlike the eastern side of the station, land to the west of the station remained bushland and orchards for some time, however, the area was gradually developed during the early twentieth century, particularly during the Inter War period. One such subdivision was the Rosegrove Estate, today known as the Rosebank Avenue HCA. A short history of the Rosebank Avenue Heritage Conservation Area can be found in Section 6.4.2.

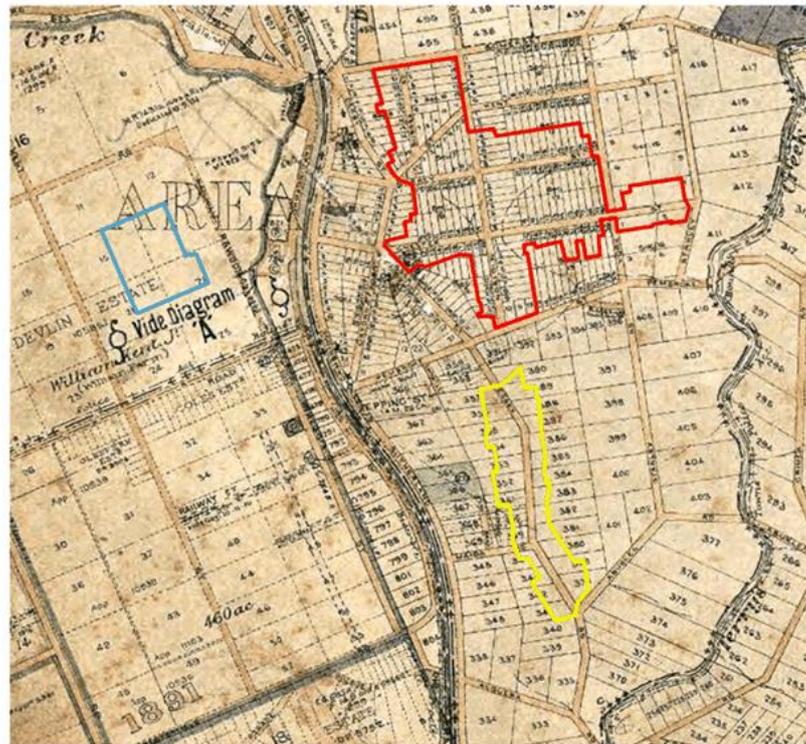

Figure 12: Extract from 1910 map of Parish of Field of Mars, County of Cumberland, Land Hornsby and Baulkham Hills Shires. The subdivision of the East Epping HCA has been divided since the 1904 map. The East Epping and Essex Street HCAs are outlined in red and yellow respectively. The Rosebank Avenue HCA is yet to be subdivided, which occurred during the Inter War period. The approximate outline of the Rosebank Avenue HCA is outlined in blue (Source: Land and Property Information, Sheet Reference 1, Edition Number 4)

The completion of Epping Road in 1940 and improvement of road networks recognised an increase in private car ownership and with this came further development and subdivision in the Epping Town Centre area. The overall improvements continued into the Post War period and building boom of the 1950s which saw a significant change in the character of the area, particularly the western side of the railway line. Aerial photographs and maps from the 1940s through to the 1950s display the development of the Epping Town Centre area.

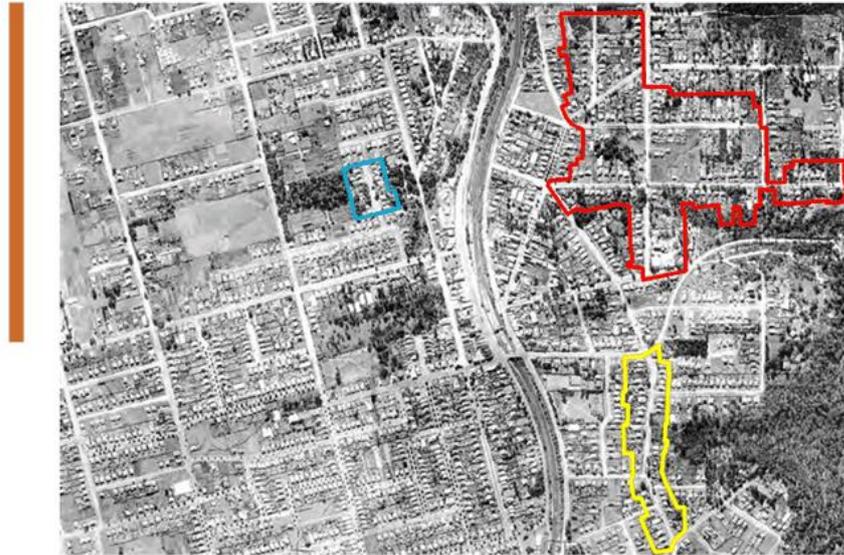

Figure 13: 1943 Aerial photographs of Epping Town Centre area. The East Epping, Essex Street and Rosebank Avenue HCA's are outlined in red, yellow and blue, respectively (Source: SIX Maps, accessed on 4 April 2017)

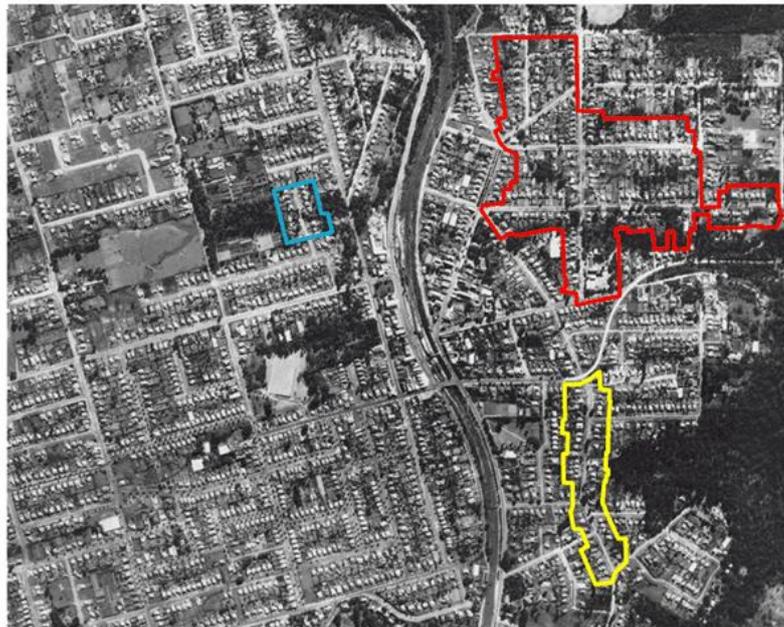

Figure 14: 1951 Aerial photograph of Epping Town Centre area. The area has been substantially developed by this point, including the western side of the railway line which saw significant development during the Inter War period. The East Epping, Essex Street and Rosebank Avenue HCA's are outlined in red, yellow and blue, respectively (Source: <https://www.flickr.com/photos/55198937@N05/9142070516>)

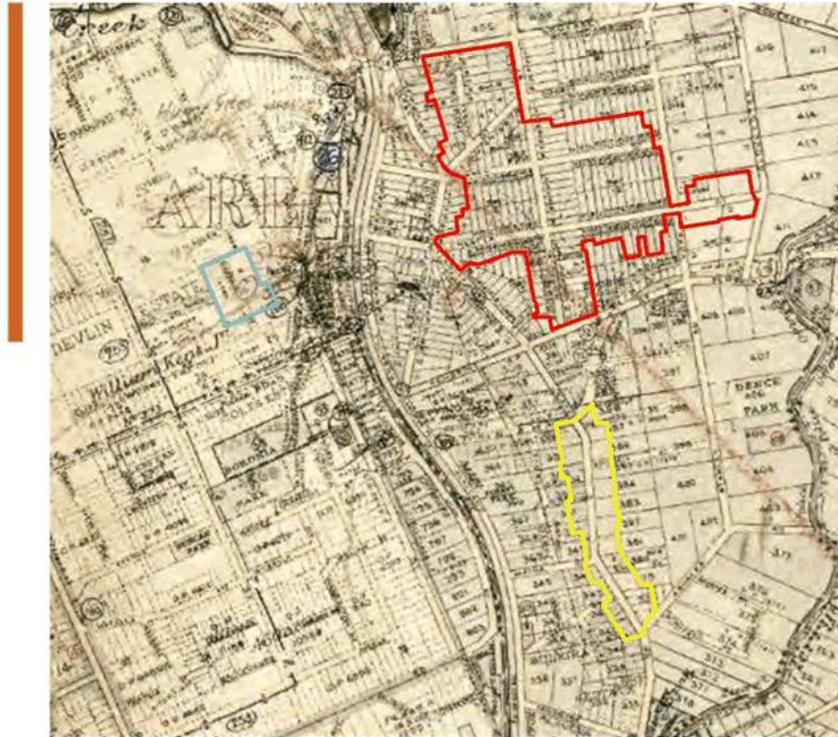

Figure 15: Extract from 1959 map of Parish of Field of Mars, County of Cumberland, Land Hornsby and Baulkham Hills Shires. The development of Epping Road is clearly reflected as well as the subdivision of the western side of the railway line. The East Epping and Essex Street HCAs are outlined in red and yellow respectively. The Rosebank Avenue HCA has by this time been subdivided, although the subdivision of the Rosegrove Estate is not clearly defined in this map. The Rosebank Avenue HCA is outlined in blue (Source: Land and Property Information, Sheet Reference 1, Edition Number 4)

Like many established areas in Sydney some medium density residential development occurred, particularly near the railway line, in the 1960s to the 1980s. Further improvements of the road networks and the addition of the M2 Motorway and improvements to the Epping Station has also resulted in a recent resurgence of larger scale residential and commercial development in the area, a trend which continues and is being explored today due to Epping's relatively easily accessible location and proximity to major business districts and universities.

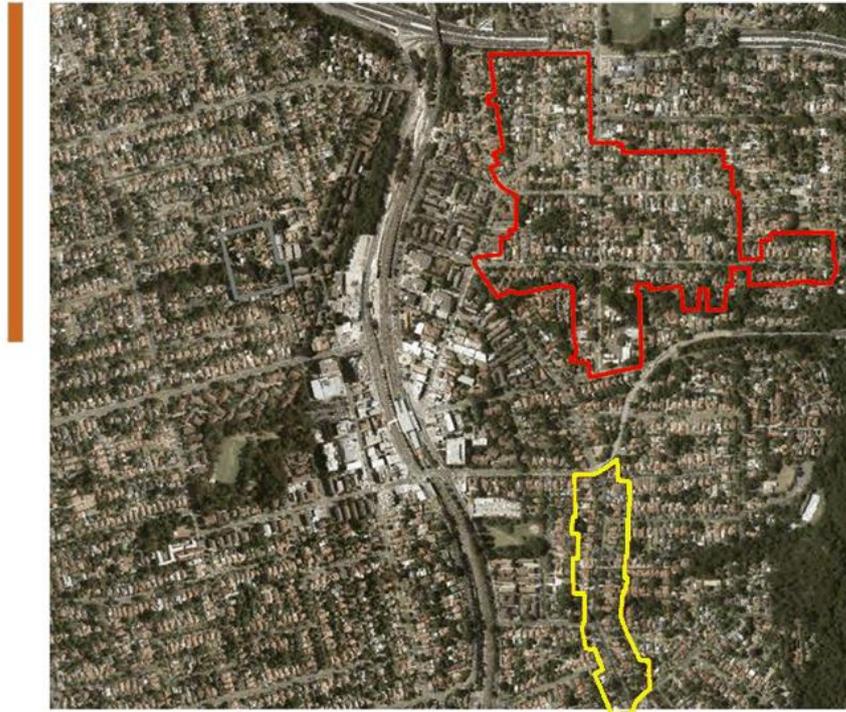

Figure 16: Aerial photograph of the Epping Town Centre area, prior to the current boom of development of the area The East Epping, Essex Street and Rosebank Avenue HCA's are outlined in red, yellow and blue, respectively (Source: SIX Maps, accessed on 4 April 2017)

6. Heritage Conservation Area Assessments

6.1 Basis of Assessment

In assessing the cultural significance of a place, it is necessary to adequately research and consider all the information relevant to an understanding of the place and its fabric. The Burra Charter (2013) defines the cultural significance as being "aesthetic, historic, scientific or social value for past, present or future generations".

The assessment of cultural significance is undertaken because it is necessary to understand the heritage values of a place before making decisions about the future of the place whether it is a heritage item or a HCA. This then leads to decisions that will retain these heritage values in the future.³ The 'Statement of Significance' indicates what heritage values of a place should be conserved, and is used as a basis for the formulation of specific guidelines for the development of conservation policies of a place. The Conservation Plan by J. S. Kerr (seventh edition, 2013, Australia ICOMOS), considers the following three criteria as a useful starting point in assessing the nature of significance:

- Ability to demonstrate a process, a custom or style;
- Associational (historic) links for which there is or is not surviving physical evidence; and
- Formal or aesthetic qualities.

All three HCAs have previously had their significance assessed as part of previous studies. The following subsections evaluate the previously established significance of each HCA in consideration of each HCAs current condition and integrity. Each assessment of significance addresses the criteria endorsed by the NSW Heritage Council, and is in accordance with the NSW Heritage Manual 'Assessing Heritage Significance' guidelines.

³ NSW Heritage Manual, *Assessing Heritage Significance*, 2000, p.2

6.2 East Epping Heritage Conservation Area

Figure 17: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting East Epping HCA (Source: Heritage Map 11, Hornsby LEP 2013)

6.2.1 Context and Description

The East Epping HCA is the largest of the three HCAs under review as part of this study, and spans a total of nine streets including: Chester Street, Essex Street, Norfolk Road, Oxford Street, Pembroke Street, Somerset Street, Surrey Street, Sussex Street and York Street. The area to the east of the railway line was one part of a large subdivision of the late nineteenth century. All the street names of the East Epping HCA are named after English towns and counties, with all names remaining the same as the 1910 subdivision plans for the area.

The East Epping HCA is characterised by a majority of Victorian, Federation and Inter War period dwellings, which reflect the early development of the East Epping Area. The area is further characterised by wide dual carriageways and grassed verges and substantial street plantings. The original subdivision pattern of the late nineteenth and early twentieth century is still understood, despite a number of properties being subdivided throughout the area. Despite this subdivision, the streetscape character of the area is still maintained by the dwellings which front onto the streetscapes, which are further enhanced through large setbacks, complementary fences and mature front garden landscaping.

Each of the nine streets of the East Epping HCA present a range of significant characteristics. Entering the HCA from the south into Norfolk Road, to the east is located Epping Public School with its Federation period classrooms and a large number of mature trees which stretch along the street and into the northern portion of the schools site. Moving further north along the street, Inter War and Federation period dwellings are regularly located, as the road slopes down slightly toward the first intersection with Chester Street. The section of Norfolk Road, bound by Chester Street and Surrey Street presents, a number of Late 20th Century

and 21st Century two storey dwellings, before the Inter War and Federation period character of the street returns closer to Surrey Street. Some Banksia trees line this section of the street, whilst mature Eucalypts rise above the street from front gardens of some of the early twentieth century properties. In the most northern section of Norfolk Road within the East Epping HCA, are clustered a number of Inter War Bungalows and Federation period dwellings, in Queen Anne, Cottage and Bungalow styles. Substantial landscaping on the street and in front gardens continue along this section of Norfolk Road, enhanced by timber picket fences and hedges on each of the individual properties.

Along both Sussex and Oxford Streets, two of the northern-most streets of the East Epping HCA, presents a mix of primarily Federation and Inter War periods dwellings. Being a narrower street than Oxford Street, Sussex Street's regular street trees, of both native and ornamental varieties, enhance the leafy aspect of the street, the street slopes down toward the west, with dwellings of the eastern side of the road sitting higher in their lots. Like Norfolk Road, the dwellings are set back onto their lots, with large front gardens, most of which have substantial mature plantings, which screen the houses from street view. Overall, the presentation of Sussex Street captures the aesthetic qualities of the East Epping HCA.

A small section of Oxford Street, between Derby Street and Norfolk Road, resides within the boundaries of the East Epping HCA. The street, like Norfolk Road, presents a dual carriageway, with wide verges. Federation, Inter War and Post War period dwellings line either side of the street, with a number of timber weatherboard Federation cottages located on the northern side of the road, whilst the southern side presents a number of Inter War Bungalows. Street tree planting is sporadic along Oxford Street, however, the landscaping of individual properties makes up for the lack of street trees, still eliciting the leafy character of the East Epping HCA.

Surrey Street and Chester Streets contain a diverse mix of buildings from Victorian, Federation, Inter War, Post War, Late 20th Century and 21st Century. Both streets have dual carriageways, but are not as wide as Norfolk Road, which acts as a main spine for the East Epping area. Mature trees, both native and exotic, are located along the length of each street, again enhanced by the large setbacks of properties and mature landscaped gardens. Surrey and Chester Street have the highest proportion of subdivided lots, mainly between their intersection with Norfolk Road and York Street. The original lot size of these properties from the late nineteenth and early twentieth century subdivisions, produced long lots, which have easily been subdivided to provide for additional dwellings. The dwellings located at the rear of the original houses on these subdivided lots are mostly not visible from the street, particularly where the front dwellings have mature trees and significant landscaping. On the very western end of Chester Street is located the only Church within the East Epping HCA. Built during the Inter War period, the presence of the church of the prominent corner of Chester, Oxford and Sussex Streets, acts as a western gateway to the East Epping HCA, typified by its brick turret and rendered detailing.

Across the East Epping HCA, there are a total of twenty-nine (29) heritage items located across all of the primary streets of the area. A majority of the heritage items of the East Epping HCA are from the Federation period, with one Victorian stone cottage and five (5) Inter War period dwellings and gardens. These properties and gardens further enhance the streetscapes of Sussex, Oxford, Surrey, Chester Streets and Norfolk Road, through their demonstration of historic, aesthetic, rare and representative significance.

The East Epping HCA presents a large unique area with a mixture of dwellings, gardens and landscapes from the late nineteenth century through to the present day. Whilst the majority of dwellings within the area date from the Federation and Inter War periods, the scattering of dwellings from the Post War, Late 20th and 21st Centuries, further add to the history of growth and development of the East Epping area.

The following images present a brief overview of the current character and streetscapes of the East Epping HCA.

Figure 18: Views looking north (left) and south (right) along Norfolk Road at the intersection with Surrey Street. The large mature trees lining Norfolk Road can be seen, as well as the wide dual carriageway, which acts as the main spine of the East Epping HCA.

Figure 19: Views looking east (left) and west (right) along Surrey Street at intersection with Norfolk Road. The mature landscaping in the front gardens of some properties can be seen, as well as established trees, particularly in the left image out the front of 40 Norfolk Road, a heritage item.

Figure 20: View looking east (left) and west (right) from the intersection of Norfolk Road and Chester Street. Substantial street tree planting can be seen in both views, particularly the large Pine trees in the right image which fall within the lot boundaries of 27A Chester Street.

Figure 21: Epping Public School, the original classrooms date from 1901 (left) and 70 Chester Street, Victorian stone cottage, the oldest dwelling in the East Epping HCA (right).

Figure 27: 42 Surrey Street, two storey Late 20th Century house (left) and 12 Sussex Street, a two storey 21st Century house (right)

6.2.2 Historical Summary

The history of the East Epping HCA is directly linked to the historical development of the development of the Epping Town Centre, thus refer to the brief history provided in Section 5.1.

6.2.3 Previous Assessment and Statement of Significance

The first assessment of significance for the East Epping HCA was undertaken as part of the *East Epping Conservation Evaluation and Review* prepared by Tropman and Tropman Architects in 2001. The assessment and statement of significance from this first study is as follows:

Criterion (a)

*The area is a good example of the development of Federation and Inter-War period housing in the Epping area.
The area was one of the first parts of Epping to be closely subdivided for residential purposes.*

Criterion (c)

The area has retained most of its original 1886 subdivision pattern.

Criterion (g)

The area is representative of the development of Federation period and Inter-War period suburban housing.

Statement of Significance

The East Epping Heritage Conservation Area is a good representative example of the development of Federation period and Inter-War period suburban housing

of the Epping area. The area retains coherent examples of Federation and Inter-War housing as well as remnants of late 1880s housing. The area has historic significance as one of the first parts of Epping to be closely subdivided for residential purposes. This area, with the exception of the eastern side which was originally divided into larger blocks, has retained most of its original 1886 subdivision pattern.

Whilst the above assessment of significance for the East Epping HCA is brief, further assessment of the area was conducted as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013. This study considered that the previous assessment of the East Epping HCA still stood and updated the assessment of significance as follows:

Criterion (a) – An item is important in the course, or pattern, of NSW's cultural or natural history (or the cultural or natural history of the area)

The area is of local historic significance as one of the first subdivisions and parts of Epping to be subdivided for residential development. Despite some site amalgamations and re-subdivisions, the area largely retains its original subdivision and streetscape pattern.

The area retains evidence of its major periods of development that reflect the growth and development and major changes in the local area and shift from a rural and farming community to centralised residential and low scale commercial area.

Criterion (c) - An item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the cultural or natural history of the area)

The area is characterised by good and largely intact examples of the Federation, Inter-war and Post-war detached housing in the Epping area. Some early buildings also remain.

The built context is also enhanced by the wide street proportions, street trees and garden settings and plantings which make a positive contribution to the area.

Criterion (d) - An item has strong or special association with a particular community or cultural group in NSW (or area) for social, cultural or spiritual reasons

Epping Public School is a major feature of the area and is of some social significance to the local community. Established in 1900 as a result of the growth and development it has continued to be a local focus and has developed in accordance with local needs and requirements.

The Uniting Church complex in Chester Street is also of some local social significance.

Criterion (e) - An item has potential to yield information that will contribute to an understanding of NSW's cultural or natural history (or the cultural or natural history of the area)

The area retains some rock forms, undulating streets, sloping sites and a number of mature native trees and plantings which indicate the early natural character and topography of the area.

Criterion (f) - An item possesses uncommon, rare or endangered aspects of NSW's cultural or natural history (or the cultural or natural history of the area)

The area retains a number of earlier timber weatherboard houses and one early stone dwelling which are relatively rare in the local area.

Criterion (g) - An item is important in demonstrating the principal characteristics of a class of NSW's (or area's)

- cultural or natural places; or
- cultural or natural environments (or a class of the local area's cultural or natural places; or
- cultural or natural environments)

The area is a good and relatively intact representative example of late 19th and early 20th century suburban residential subdivision and development.

Statement of Significance

The East Epping Heritage Conservation Area is of high local historic and aesthetic significance as a good representative example of late 19th century subdivision that retains a good and relatively intact collection of Federation, Inter-war and Post-war period residential development that represents the major period of growth and development of the Epping area.

The area significantly retains most of its original 1886 subdivision and streetscape pattern with mostly single detached houses including a number of good and highly intact examples of Federation and Inter-war period houses. The area also retains some earlier examples and overall built context is enhanced by the local topography and native plantings, wide street proportions, street trees and garden settings.

The Church and School sites located in the area are also of some historic and social significance to the local community.

6.2.4 Revised Assessment of Significance

The previous assessments of the East Epping HCA remain consistent with the existing condition of the area. The two previous assessments of significance, in terms of the evaluation of aesthetic, historical, social, rarity and representative values of the area are still considered valid and appropriate.

The previous Statements of Significance have been minorly updated in the below revised Statement of Significance, based upon the current condition and integrity of the area.

East Epping HCA Statement of Significance

The East Epping HCA is of high local historic and aesthetic significance as a good representative example of late nineteenth century subdivision that retains a good and relatively intact collection of Federation, Inter War and Post War period residential development that represents the major periods of growth and development of the Epping area.

The area significantly retains most of its original 1886 subdivision and streetscape pattern with mostly single detached houses including a number of good and highly intact examples of Victorian, Federation and Inter War period dwellings. The area has historic significance as one of the first parts of Epping to be closely subdivided for residential purposes. The original names of each of the streets, which were taken from English towns and counties, still remain. The areas overall built context is enhanced by the local topography and native plantings, wide street proportions, street trees and large garden settings. Many of the Federation and Inter War period houses retain their garden like settings, coupled with mature trees of both native and exotic varieties.

The inclusion of Epping Public School, established in 1901, and the Chester Street Uniting Church and grounds are also of some historic and social significance to the local community, further enhancing the pattern of development of not only the early subdivision of the area but the needs of the growing community of the East Epping area.

6.2.5 Individual Heritage Items Request for Removal within Essex Street HCA

3 Essex Street

A request by the property owner of 3 Essex Street for the removal of the property as an Heritage Item under the Hornsby LEP 2013 and to be removed from the East Epping HCA was lodged on 18 September 2015. This request was lodged by the property owner in response to the listing of the property at 3 Essex Street on the Hornsby LEP 2013 as part of the State Environmental Planning Policy (SEPP) Amendment (Epping Town Centre) 2013, published in March 2014.

The dwelling at 3 Essex Street is a single storey face brick Inter War Bungalow featuring a hipped roof clad in terracotta tiles and a stone base. The primary western façade features a projecting brick veranda with brick piers, flanked on either side by projecting bay windows, with detailed leadlight glazing set within timber double sash windows. The northern façade features a second verandah with brick piers, which has been enclosed by single brick and timber windows. The eastern boundary of the property is defined by a high brick fence and a wide timber gate. Some mature plantings exist on the site, including palm trees. A driveway is located on the eastern side of the house, which gives access to a lightweight carport attached to the southern façade of the dwelling. The location of the dwelling next to Rockleigh Park provides a leafy setting for the Inter War Bungalow.

A brief internal inspection was conducted as part of this heritage review. From the internal inspection, original detailing such as Art Deco cornices and plasterwork, timber doors and frames with associated hardware, timber picture rails, fireplace, floorboards and leadlight windows were observed throughout the property, excluding areas where modifications had taken place, which was primarily limited to the kitchen and bathrooms. The bungalow is overall in good condition, but does require some maintenance work. The bungalow appears to have maintained its condition and integrity since its assessment in the 2013 study.

An assessment of the significance of 3 Essex Street was undertaken as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy and Alessi in 2013.⁴ The established statement of significance has been slightly amended to reflect the current condition of the property and is provided below:

No. 3 Essex Street is of local historic and aesthetic significance as part of an early subdivision in the area, as a good and largely intact representative example of a substantial Inter War Bungalow constructed during c. 1920s. The site is associated with the Rockleigh House and grounds now remembered by the adjacent Park area. The building significantly retains its original scale, form and features including face brick façades and stone base and prominent roof scape, open verandah and bayed elements on the front facade. Internally many original elements of the Inter War Bungalow remain, including Art Deco cornices and plasterwork, timber doors and frames with associated hardware, timber picture rails, fireplace, floorboards and leadlight windows. Despite the addition of the high brick fence, the building has a wide frontage and prominent roof form enhanced by its garden setting and makes some visual contribution to the streetscape and neighbouring Rockleigh Park area. The large wide lot on which the Bungalow is established is unusual for the East Epping Area, presenting a unique element in the area.

The Inventory Sheet for the property has also been updated to reflect the above statement of significance, as well as updated images, which is provided as part of Appendix A. Recommendations in relation to the retention or removal of 3 Essex Street from the Hornsby LEP 2013 as a heritage item or from the East Epping HCA, have been provided in Section 10.1.

⁴ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 37.

6.3 Essex Street Heritage Conservation Area

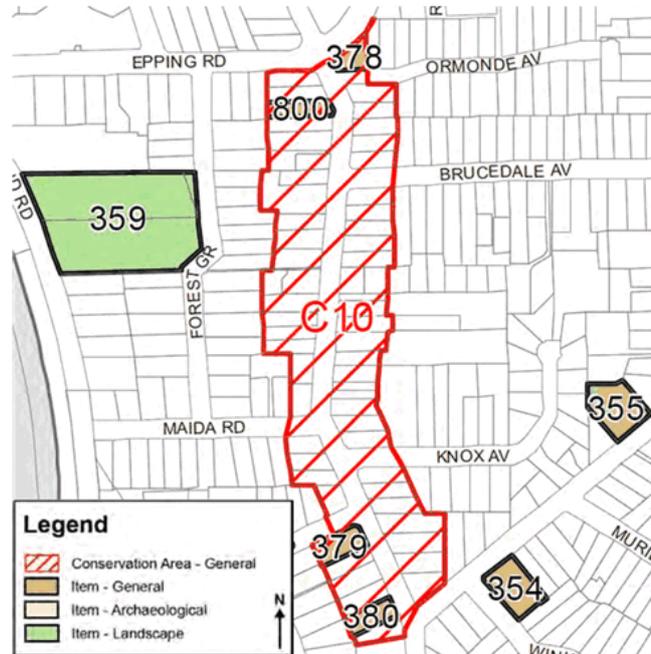

Figure 28: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting Essex Street HCA (Source: Heritage Map 11, Hornsby LEP 2013)

6.3.1 Context and Description

The Essex Street Avenue Heritage Conservation Area was last described in March 2013 in the Epping Town Centre Heritage Review as:

"The built context is characterised by a mix of Federation and Inter-war period houses including substantial timber weatherboard and distinctive Federation red brick dwellings, liver brick and Inter-War Bungalows with a number of late 20th and early 21st century period dwellings and residential complexes between. The built context is generally enhanced by the streetscape pattern reinforced by regular setbacks, wide street proportions and garden settings."⁵

During site inspections of the area in March 2017, it was observed that the Essex Street HCA continues to retain a built context characterised by a mixture of Federation and Inter War period dwellings, with some Post War, Late 20th and 21st Century development scattered throughout. The streetscape continues to be enhanced by street tree planting, coupled with the established gardens and trees of the properties which lines the edges of the street.

The Essex Street HCA is bound to the north by Epping Road and to the south by Abuklea Road. Whilst Essex Street continues both north and south from the Essex Street HCA, this particular section of Essex Street presents a unified character unlike the other sections of Essex Street, which have a higher proportion of Late 20th and 21st Century developments. This section of Essex Street presents a wide dual carriageway with wide grassed verges.

⁵ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 13.

The street slightly bends to the east following the intersection with Maida Road. This section of Essex Street gently slopes downwards from Epping Road and Abuklea Road to the lowest point around the intersection of Knox Avenue. Between Maida Road and Epping Road, the dwellings located on the western side of Essex Street rise above street level, whilst the dwellings to the east lie below street level, due to the sloping topography of the street down towards the east.

Dotted along the length of Essex Street are a number of different species of trees, including but not limited to Banksia and Eucalypt trees. The dwellings along this section of Essex Street present a regular setback from the street, incorporating a range of different fences, all predominantly of a low scale, including timber picket fences, low sandstone or brick walls, wire and timber fences and a few modern cement rendered walls. The front gardens of each property generally include mature plantings harmonising with and adding to the streetscape character the street.

The style of dwellings located within the Essex Street HCA, include a number of different styles from the Federation (Bungalow and Cottage styles), Inter War (Bungalow and Spanish Mission styles), Post War, Late 20th Century (Organic, Australian Nostalgic, and Immigrants Nostalgic styles) and 21st Century, all depicted in Figures 31 to 36.

Whilst a couple of lots within the Essex Street HCA have been subdivided, or some older buildings from the Federation or Inter War period have been replaced or modified over time, the overall character of early 20th Century and streetscape pattern and rhythm remains.

The following images the early present a brief overview of the current character and streetscape of the Essex Street HCA.

Figure 29: Views looking from intersection of Essex Street and Abuklea Road, looking north along Essex Street. The mature street trees and large front setbacks of dwellings along the street can be

Figure 30: Views looking south along Essex Street, near Epping Road (left) and intersection of Brucedale Avenue (right)

6.3.2 Historical Summary

The history of the Essex Street HCA is directly linked to the historical development of the development of the Epping Town Centre, thus refer to the brief history provided in Section 5.1.

6.3.3 Previous Assessment and Statement of Significance

The first assessment of significance for the Essex Street Heritage Conservation Area was undertaken as part of the *East Epping Conservation Evaluation and Review* prepared by Tropman and Tropman Architects in 2001. The assessment and statement of significance from this first study is as follows:

Criterion (a)

The area is a good example of the development of Federation and Inter-War period housing in the Epping area.

The area reflects the changing nature of the place from rural, through semirural to residential.

Criterion (c)

The area has retained most of its original 1886 subdivision pattern.

Criterion (g)

The area is representative of the development of Federation period and Inter- War period suburban housing.

Statement of Significance

The Essex Street Heritage Conservation Area has historic and aesthetic significance as a representative area of intact period housing, mainly from the Federation and Inter-War periods. The areas early subdivision patterns reflect the changing nature of the area from rural, into semi-rural 'farmlets' through to

residential lots in the 1920s. These subdivision patterns are still visible in the existing street layout.

Whilst the above assessment of significance for the Essex Street HCA is brief, further assessment of the area was conducted in as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013. This study considered that the previous assessment of the East Epping HCA still stood and updated the assessment of significance as follows:

Criterion (a) – An item is important in the course, or pattern, of NSW's cultural or natural history (or the cultural or natural history of the area)

The area is of local historic significance as part of an early subdivision and early 20th residential development. Despite some site amalgamations and re-subdivisions, the area largely retains a sense of its original subdivision pattern that represents the early 20th century shift from a rural to a residential and suburban area.

Criterion (c) - An item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the cultural or natural history of the area)

The area is characterised by good and largely intact examples of the Federation and Inter-war period detached housing in the Epping area. Some good examples of Post-war development are also extant.

The built context is also enhanced by the wide street proportions, street form and wide grassed verges, setbacks, garden settings and plantings which make a positive contribution to the area.

Criterion (g) - An item is important in demonstrating the principal characteristics of a class of NSW's (or area's)

- cultural or natural places; or
- cultural or natural environments.
- (or a class of the local area's
- cultural or natural places; or
- cultural or natural environments)

The area is representative of the development of the Federation and Inter-war period suburban housing in the local area.

Statement of Significance

The Essex Street Heritage Conservation Area is of local historic and aesthetic significance as part of an early subdivision in the local area and as a representative area of intact period housing mainly from the Federation and Inter-war periods which represents a major period of growth and development and shift from a rural to a suburban area.

The area significantly retains a sense of the original subdivision pattern and streetscape pattern with mostly single detached houses including a number of good and highly intact examples of Federation and Inter-war period houses. The built context is enhanced by the local topography, wide street proportions, setbacks and garden settings.

6.3.4 Revised Assessment of Significance

The previous assessments of the Essex Street HCA remain consistent with the existing condition of the area. The two previous assessments of significance, in terms the evaluation

of aesthetic, historical and representative values of the area is still considered valid and appropriate.

The previous Statements of Significance have been minorly updated in the below revised Statement of Significance, based upon the current condition and integrity of the area.

Essex Street HCA Statement of Significance

The Essex Street HCA is of local historic and aesthetic significance as part of the early subdivision of the Epping from the late 1890s, and maintains a representative area of largely intact Federation and Inter War period dwellings reflecting the major periods of growth and development of the Epping local area. Early Federation houses, some associated with the Mount Tomah Nursery of the 1890s are still extant, and further enhanced by the retention of the later 1920s subdivision upon which many Inter War period home were developed. The area represents the shift of Epping from an area of orchards and nurseries to a thriving suburban area.

The area retains many significant elements of the early twentieth century subdivision patterns, coupled with a cohesive streetscape pattern enhanced by large setbacks, wide street proportions, undulating topography, street plantings and garden settings. This section of Essex Street, maintains a large number of good and highly intact examples of Federation and Inter War period dwellings of various styles, interspersed with some good examples of residential Post War architecture.

6.3.5 Individual Heritage Items Requested for Removal within Essex Street HCA

42 Essex Street

A request by the property owner of 42 Essex Street for the removal of the property as a Heritage Item under the Hornsby LEP 2013 and to be removed from the Essex Street HCA was lodged on 17 January 2016. This request was lodged by the property owner in response to the listing of the property at 42 Essex Street on the Hornsby LEP 2013 as part of the SEPP Amendment (Epping Town Centre) 2013, published in March 2014.

The dwelling at 42 Essex Street is a substantial, single storey timber weatherboard Federation cottage, with a hipped roof and northern projecting gabled wing with corrugated steel roof. The dwelling features a veranda with returns to the sides with timber double sash windows with colour lead lighting on the primary façade facing toward Essex Street. The northern elevation features a bay window with timber double-hung sashes featuring coloured leadlight, matching the primary eastern façade. The cottage is substantially set back from the Essex Street frontage, allowing for a large front garden, which is primarily grassed with some mature plantings established along the Essex Street boundary.

A brief internal inspection of the property was conducted as part of this heritage review. From the internal inspection, original detailing such as floor boards, cornices and timber work were observed in the main hallway and front rooms of the cottage. Additions to the rear of the original cottage currently house living spaces and a kitchen. The cottage is overall in good condition and appears to have maintained its condition and integrity since its assessment in the 2013 study.

An assessment of the significance of 42 Essex Street was undertaken as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy and Alessi in 2013.⁶ The established statement of significance has been slightly amended to reflect the current condition of the property and is provided below:

The dwelling at 42 Essex Street is of high local historic and aesthetic significance as a good and largely intact Federation period timber weatherboard cottage constructed sometime between 1893 and 1902 that is associated with MF Vollmer and the Vessey family of the Mount Tomah Nursery that operated in the immediate area in the 1890s. Despite some alterations and additions, the cottage retains its overall scale, form and details particularly weatherboard facades, roof form, open wrap-around verandah,

⁶ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 42.

gable and bay on the northern facade. Internally, original details are also maintained, including cornices, timberwork, floorboards and chimneys. The building occupies a prominent and elevated site on a bend in Essex Street, is enhanced by its garden setting and makes a positive contribution to this section of Essex Street. The cottage is one of two remaining Federation period dwellings located in the area associated with the Mount Tomah Nursery, thus being rare for the local area.

The Inventory Sheet for the property has also been updated to reflect the above statement of significance, as well as updated images provided as part of Appendix A. Recommendations in relation to the retention or removal of 42 Essex Street from the Hornsby LEP 2013 as a Heritage item of from the Essex Street HCA have been provided in Section 10.2.

6.4 Rosebank Avenue Heritage Conservation Area

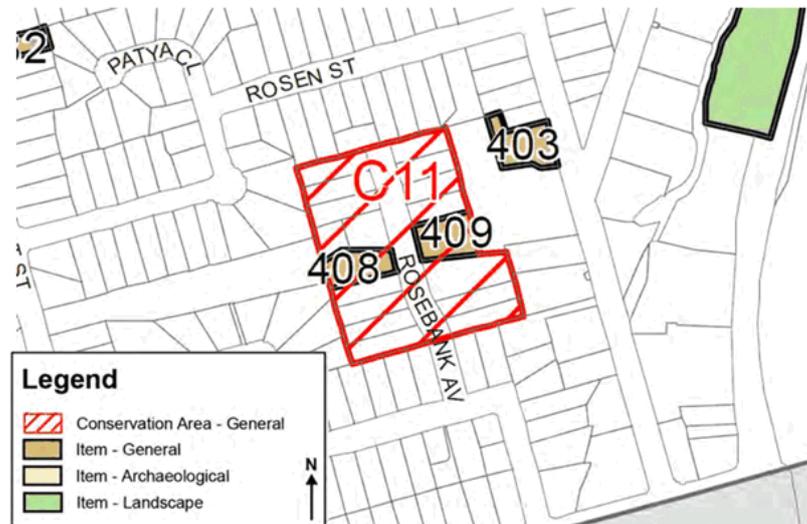

Figure 37: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting Rosebank Avenue HCA (Source: Heritage Map 11, Hornsby LEP 2013)

6.4.1 Context and Description

The Rosebank Avenue Heritage Conservation Area was last described in March 2013 in the Epping Town Centre Heritage Review as retaining:

"a good and highly intact group of Inter-War period dwellings illustrating various architectural elements enhanced by the streetscape character, reinforced by retention of the original subdivision pattern and street rhythm, consistent setbacks and also mature street and garden trees and garden plantings."

During site inspections of the area in March 2017, it was observed that the Rosebank Avenue HCA continues to remain a good and highly intact group of Inter War period dwellings however, there are some changes to the surrounding setting of the area and the streetscape which has minorly detracted from the description provided in 2013. These include the multiple high density residential developments on Cliff Road and Hazlewood Place, located to the

⁷ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 15.

east and south of the HCA. Some mature trees too have been removed from the streetscape, primarily out the front of 5 Rosebank Avenue.

Despite these changes, Rosebank Avenue HCA continues to maintain its established heritage character. The form, scale and detailing of the majority of dwellings within the area retain their original elements, and are enhanced by extensive plantings within the front gardens and nature strip planting. Whilst some minor modifications have been made to some buildings, such as the enclosure of balconies, addition of carports and garages and replacement of some original windows, the consistency of the street in terms of setbacks, and street presentation are still intact.

A range of architectural styles are presented along the length of Rosebank Avenue, including Spanish Mission, Bungalow and Tudor Revival. Whilst the style of each dwelling differs, all are linked together and complement one another through consistency in height, set back and landscaping. The original subdivision of the Rosegrove Estate is still evident in the current subdivision of the area, despite the singular subdivision of 13 and 15 Rosebank Avenue. The character of the area is further linked together through the consistent street trees which line the nature strips and the interjection of the creek line which runs between 15 and 9, and 10 and 6 Rosebank Avenue. The vegetation is denser at this point in the street and creates a lively setting for the appreciation of both the northern and southern components of the street.

The following images present a brief overview of the current character and streetscape of the Rosebank Avenue HCA.

Figure 38: View looking south along Rosebank Avenue, from northern end of street (left) and from middle of street in line with the creek (right). The consistency of street trees which line Rosebank Avenue are evident, enhancing the streetscape character, behind which an array of Inter War period dwellings are nestled.

Figure 39: View of the small bridge which runs over the creek line (left) and looking west toward 9 Rosebank Avenue visible through the trees which line the creek bed.

Figure 40: Two of the dwellings located within the Rosebank Avenue HCA are listed as local items, including 9 (right) and 10 (left) Rosebank Avenue. Whilst both dwellings date from the Inter War period, they are in two distinct styles of the period, the left being a Spanish Mission style and the right in a Tudor style.

Figure 41: 16 and 17 Rosebank Avenue, respectively, are designed in an Inter War Bungalow style. The Bungalow style is featured the most amongst the dwellings of Rosebank Avenue

Figure 42: 5 and 1 Rosebank Avenue have undergone some modifications to the original fabric. 5 Rosebank Avenue has modified the entrance path and driveway, as well as the entrance way and windows, whilst 1 Rosebank Avenue has undergone some minor changes, including enclosing the front balcony and the installation of a new gate to the driveway. Despite these changes, both dwellings continue to contribute to the character of the area.

6.4.2 Historical Summary

The following historical summary of the Rosebank Avenue Conservation Area has primarily been adapted from the 2003 Heritage Assessment of Rosebank Avenue, prepared by CPC Consulting.

The site of the present day Rosebank Avenue is located on the western side of the railway at Epping. Early Parish Maps indicated that the site was part of the land granted to William Kent Junior. Pioneer settler, David Hazlewood, purchased the land in this area (including the area that is now Rosebank Avenue) as a total of 16 acres in 1897.

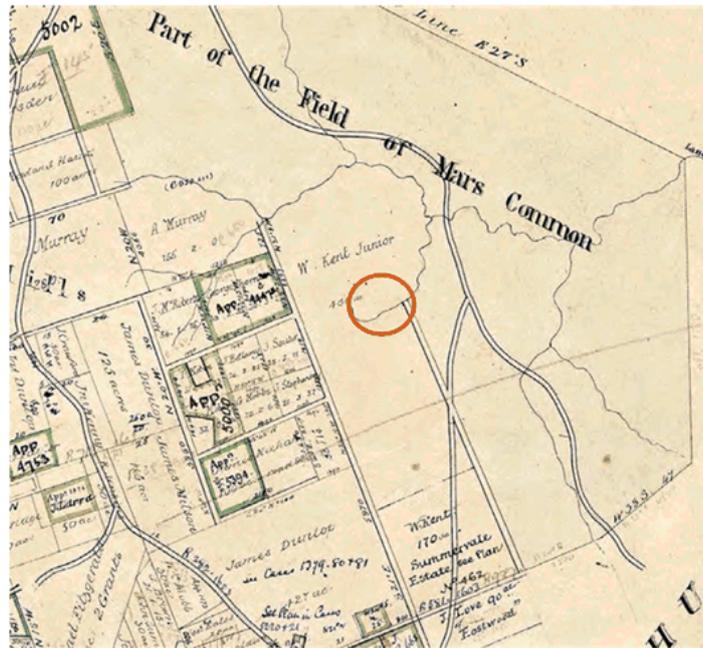

Figure 43: 1882 Field of Mars Parish Map with indicative location of Rosebank Avenue Heritage Conservation Area outlined in red (Source: Land and Property Information, Sheet Reference 4, Edition Number 0)

The Hazlewood Brothers made their reputation as rose suppliers in the early twentieth century from the Epping nursery. The Hazlewood nursery operations continued in Dural until 1965. The first subdivision of the Hazlewood Estate was placed on sale in October 1921 and included lots fronting the present Carlingford Road.

In November 1929, two years after David Hazlewood's death, the site of Rosebank Avenue went to auction sale as the Rosegrove Estate, one of the later estate subdivisions to occur in the Epping district. The Estate consisted of 18 lots fronting Rosebank Avenue and three lots fronting Ray Road. (Figure 44) A "fine old rustic bridge" was constructed over the existing creek by the Hazlewoods as part of their nursery operations and was retained as an attractive element of the Estate. The advertisements for the auction also indicate that a strict building ordinance was in place to ensure that "each home will be worthy of its setting" and that the layout and lot sizes allowed "ample space for gardens, lawns and motor car entrance".

An aerial photograph from 1943 clearly shows the earlier Federation development within the surrounding streets (Cliff Road and Carlingford Road) and the formation of Rosebank Avenue.

Figure 45: 1943 Aerial of Rosebank Avenue Conservation Area, outlined in red (Source: SIX Maps, accessed on 28 March 2017)

Hornsby Shire Council's Sands Directory and Rate Books provide information regarding the development of the Rosebank Avenue streetscape. Up until 1932, the majority of the lots within the streetscape remain in the ownership of real estate agents. The 1931 Sands Directory (Page 444) records only the road as existing. The 1932/33 Sands Directory lists only Lot 1 as being owned by a C F Abbott. The Rate Books provide additional information as follows:

- Rate Book dated 29 May, 1930 - indicates a total of six lots in private ownership (Lots 1, 7, 9, 12, 17 and 18). The occupations of these owners are described as being gentleman, clerk, joiner, builder, joiner and lawyer, respectively, representing a 'middle-class' community. The remainder of the street was in the ownership of "Thomas Dwyer Real Estate of 8A Castlereagh Street, Sydney". No infrastructure is recorded in this record.
- Rate Book dated 7 October, 1932 - indicates all lots in private ownership with the exception of Lots 4, 5 and 14 still being in the ownership of Thomas Dwyer Real Estate and Lot 10 being owned by Prudential Estates Ltd. Fences are recorded as having been constructed on Lots 8, 10 and 12. Dwellings are recorded as having been constructed on Lots 9 ("cottage") and 12 ("bungalow").
- Rate Book dated 12 May, 1938 provides the following details regarding construction:

Original Lot No.	Current Address	Recorded Construction
Lot 9	1 Rosebank Avenue	Cottage
Lot 18	2 Rosebank Avenue	Cottage and garage
Lot 8	3 Rosebank Avenue	Cottage and garage
Lot 17	4 Rosebank Avenue	Cottage
Lot 7	5 Rosebank Avenue	Cottage, garage and workshop

Lot16/15	6-8 Rosebank Avenue	Cottage
Lot 6	7 Rosebank Avenue	Fence (Notes that dwelling constructed 1938-39)
Lot B (5)	9 Rosebank Avenue	Cottage C/E
Lot 14	10 Rosebank Avenue	(Notes that dwelling constructed 14 May 1940)
Lot 13	12 Rosebank Avenue	Cottage
Lot 12	14 Rosebank Avenue	Cottage
Lot A (4)	15 Rosebank Avenue	Cottage
Lot 11	16 Rosebank Avenue	Bungalow ("Laverton")
Lot 3	17 Rosebank Avenue	Cottage
Lot 10	18 Rosebank Avenue	Cottage ("Orana") and garage
Lot 2	19 Rosebank Avenue	Cottage and garage
Lot 1	21 Rosebank Avenue	Fence (Notes that dwelling constructed 1942)

It is noted that the occupations of property owners also includes builder (Lot 1), school headmaster (Lot 2), teacher (Lot A), architect (Lot 6) and musician (Lot 10).

In summary, all dwellings in the street with the exception of three had been constructed by 1938. The remaining three dwellings had been constructed by 1942. Accordingly, the majority of dwellings in Rosebank Avenue were constructed during the Inter-war period.

6.4.3 Previous Assessment of Significance

The first assessment of significance for the Rosebank Avenue HCA was undertaken by CPC Consulting in 2003 in the *Rosebank Avenue Heritage Assessment*. The assessment and statement of significance from this first study is as follows:

Criterion (a)

Rosebank Avenue is a fine example (the best example in the Hornsby Shire) of an intact Inter-war housing development and streetscape which retains its historical original subdivision layout (with minor boundary adjustments), building stock and natural features

Criterion (b)

The development of Rosebank Avenue does not have any strong or special association with the life or works of a person, or group of persons, of importance in NSW's cultural or natural history (or the cultural or natural history of Epping or the Hornsby Shire)

Criterion (c)

Rosebank Avenue retains and displays its original subdivision layout (with minor boundary adjustments), building stock and natural features. It retains its design integrity; has distinctive aesthetic attributes in its form, composition, style and character; is the only true intact and fine example of an Inter-war development/streetscape and as such, has landmark qualities;

Criterion (d)

The Rosebank Avenue streetscape does not have associations with any particular identifiable community or cultural group.

Criterion (e)

Rosebank Avenue and its features have little archaeological or research potential.

Criterion (f)

Rosebank Avenue is a rare example of an intact area of Inter-war housing development. However, as other intact examples of Inter-war housing developments exist in NSW and other parts of Australia, it is concluded that Rosebank Avenue's intact form is only rare at a local level.

Criterion (g)

Rosebank Avenue is a fine example of an Inter-war housing estate that survives in good condition and intact. It retains its historical subdivision pattern (with only minor boundary adjustments), its natural features (gardens and creekline) and its built fabric. It has representative significance through its physical form, building stock and history.

Statement of Significance

Rosebank Avenue is a fine representative example of the residential development of an Inter-war housing estate. It remains largely intact in terms of retaining its historical subdivision pattern, its natural features, its built fabric and landscaping. Collectively, the dwellings and their associated gardens contribute to a unique precinct that captures the historical development of housing constructed during this period within the Hornsby Shire and provides an historical setting for the individual heritage items that exist in the street.

The Rosebank Avenue streetscape remains a rare example (at local level) of an intact Inter-war streetscape within the Hornsby Shire (the only intact Interwar streetscape in the Shire). This conclusion is reached given that the entire street was developed as part of the one Estate and retains its built form and subdivision pattern (that includes the unusual configuration of allotments reflecting the location of a watercourse). Given its level of intactness and integrity, it is of high local heritage significance.

The above assessment of significance for the Rosebank Avenue HCA was again assessed as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013. This study considered that the previous assessment of the Rosebank Avenue HCA still stood. An assessment of the areas significance was included in the study as follows:

Criterion (a) – An item is important in the course, or pattern, of NSW's cultural or natural history (or the cultural or natural history of the area)

The area is of local historic significance as a fine and highly intact example of an Inter-war period housing development and streetscape that retains its original subdivision pattern, building stock and natural features.

Criterion (c) - An item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the cultural or natural history of the area)

The area is characterised by good and largely intact examples of the Inter-war period detached housing that retain their original form, character and details and a range of stylistic elements relating to that era. The buildings have common setbacks which contribute to the streetscape pattern and rhythm. The built context is also enhanced by the wide street proportions, street trees and creek line, garden settings and plantings which make a positive contribution to the area.

Criterion (f) - An item possesses uncommon, rare or endangered aspects of NSW's cultural or natural history (or the cultural or natural history of the area)

Rosebank Avenue has been identified as being a rear and best example of an intact Inter-war housing development in the Hornsby LGA. Other examples exist in other parts of NSW and Australia.

Criterion (g) - An item is important in demonstrating the principal characteristics of a class of NSW's (or area's)

- cultural or natural places; or
- cultural or natural environments (or a class of the local area's cultural or natural places; or
- cultural or natural environments)

The area is a good and highly intact representative example of Inter-war period suburban subdivision and development that retains its original subdivision pattern, housing stock and associated gardens and features and natural features.

Statement of Significance

Rosebank Avenue is of high local cultural significance as a fine representative example of an Inter-war period residential subdivision and development that remains largely intact and retains its historical subdivision pattern, built context and natural features. Collectively the group form a unique precinct in the Hornsby LGA. The houses each retain their overall scale, character and varying stylistic details associated with the period and are enhanced by the wide street proportion, street trees and garden settings and remaining natural features.

6.4.4 Revised Assessment and Statement of Significance

The previous assessments of the Rosebank Avenue HCA remain consistent with the existing condition of the area. The two previous assessments of significance, in terms the evaluation of aesthetic, historical and social values of the area is still considered valid and appropriate.

The previous Statements of Significance have been minorly updated in the below revised Statement of Significance, based upon the current condition and integrity of the area.

Rosebank Avenue HCA Statement of Significance

Rosebank Avenue HCA is a fine representative example of a residential development of an Inter War housing estate. It remains largely intact in terms of retaining its historical subdivision pattern, its natural features, its built fabric and landscaping. Collectively, the dwellings and their associated gardens contribute to a unique precinct that captures the historical development of housing constructed during this period within Epping and the wider developments of the time in the Field of Mars. Collectively the area presents a unique streetscape featuring varies styles of the period, including Bungalow, Spanish Mission and Tudor Revival. Each dwelling retains their overall scale, character and varying stylistic details associated within the Inter War period which are further enhanced by the street trees, garden settings and natural creek line, providing a historical setting for the individual heritage items and contributory dwellings.

The Rosebank Avenue streetscape remains a rare example, at local level, of an intact Inter War streetscape within Epping and the Parramatta area and is one of few intact Inter War housing estates remaining. Having been developed within a short course of time between the 1930s and 1940s as part of the one Estate, Rosebank Avenue retains its built form and subdivision pattern, including the unusual configuration of allotments reflecting the location of a watercourse. Given its level of intactness and integrity, it is of high local heritage significance.

7. Field Survey of Heritage Conservation Areas

7.1 General Discussion

Site surveys of each HCA were undertaken in March 2017, in which all buildings located within East Epping, Essex Street and Rosebank Avenue HCAs were surveyed from the public domain. The historical value and character of each of the HCAs, are defined by a total of thirty-five (35) heritage items.

As part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013, the contribution ranking of each of the properties located within the East Epping and Essex Street HCAs were assessed. Whilst Rosebank Avenue HCA was also included within this study, the contribution ranking of each of the properties within the HCA were not assessed. As part of the current assessment of the relative contribution of each property toward their respective HCA, previous assessments of their contributions are taken into account within this section of the report.

7.2 Ranking and Assessment Criteria

Each property within each HCA has been assessed in accordance with its contributory values to the overall significance of the relevant HCA, as defined in the revised Statements of Significance in Section 6.0. Existing heritage items identified in the Holroyd LEP 2013 have been indicated, and the remaining properties have been ranked as contributory, neutral and non-contributory. The description of each category has been provided below:

Ranking	Definition
Heritage Item	A building that has been identified as an item of significance and has been listed on the Hornsby LEP 2013.
Contributory	A building that contributes to the character and significance of HCA for its historic or aesthetic values, or both. Building that have been adversely altered but still demonstrate historic and aesthetic values of significance to the area are also considered within this category. For example, a dwelling which may have had windows replaced but which otherwise retains its overall form and other detailing would be considered to be a contributory dwelling or dwelling with historic value. These items are of consistent period, scale, materials and form but are not individually significant enough to be included as a heritage item. They add to the cohesive and representative quality of the area.
Neutral	A building that does not contribute to the significance of the area but also does not detract from the area's overall character in terms of form, mass and small scale so that they fit without being disruptive. This may include early or new buildings. An example of a neutral building would be a modern single storey dwelling which respects the setbacks, forms and materials of the neighbouring dwellings. Retention of such neutral buildings may not be required provided that it is replaced with an appropriate infill building in a similar neutral nature.
Non-contributory	A building that detracts from the significance of the area and changes the character of the area. This may include early buildings with intrusive alterations and additions that erode their contribution to the significance of the area and which cannot easily be reversed. It also includes new buildings with detailing, scale and form that are not in line with the character of the area, for example large two storey buildings in unsympathetic 'Mediterranean' or other modern styles, such as light coloured rendered walls and black concrete roof tiles.

Careful consideration has been given to the threshold between buildings identified as contributory items and those identified as neutral or non-contributory. Some of the buildings, even though they may have been altered, are still recognisable as part of the Federation or Inter War periods as defined in the Statements of Significance have been ranked as contributory within a HCA. Alterations may include sympathetic additions and changes to the architectural elements such as painting the external walls, and replacing windows, fences or roofing material. It is considered that these alterations are reversible and in the long term the aesthetics and architectural values may be recoverable.

7.3 East Epping Heritage Conservation Area

The East Epping HCA consists of 253 properties and nine (9) streets and is located in the north-eastern portion of the Epping Town Centre Study Area. The nine streets include: Chester Street, Essex Street, Norfolk Road, Oxford Street, Pembroke Street, Somerset Street, Surrey Street, Sussex Street and York Street.

7.3.1 Previous Contributions Ranking

There are currently twenty nine (29) Heritage Items listed under part 1 of Schedule 5 of the Hornsby LEP 2013 which are located within the East Epping HCA (Figure 46). The majority of heritage items within the HCA are of local significance.

Figure 46: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting East Epping HCA (Source: Heritage Map 11, Hornsby LEP 2013)

In addition to the listed heritage items within the HCA, relative contribution ranking of each property within the East Epping HCA was also identified as part of the of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013, as outlined previously. The contributions map prepared for this previous study is reproduced in Figure 47.

Figure 47: Mark up showing contributory items and recommended extension of East Epping HCA boundary (Source: Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 81)

7.3.2 Review of Contributions Ranking

Whilst Heritage Items and Contributory items of the East Epping HCA were identified within the *Epping Town Centre Heritage Review*, the relative ranking of the remaining properties was not addressed. In order to gain a greater understanding of all properties relative contribution to the significance of the East Epping HCA, an assessment of each property's contribution has been conducted on foot as part of this study.

The revised relative contribution of individual buildings towards the significance of the East Epping HCA is depicted in Figure 48 and further detailed in the table overleaf. The distribution of rankings and development periods are further summarised in Figures 49 to 53.

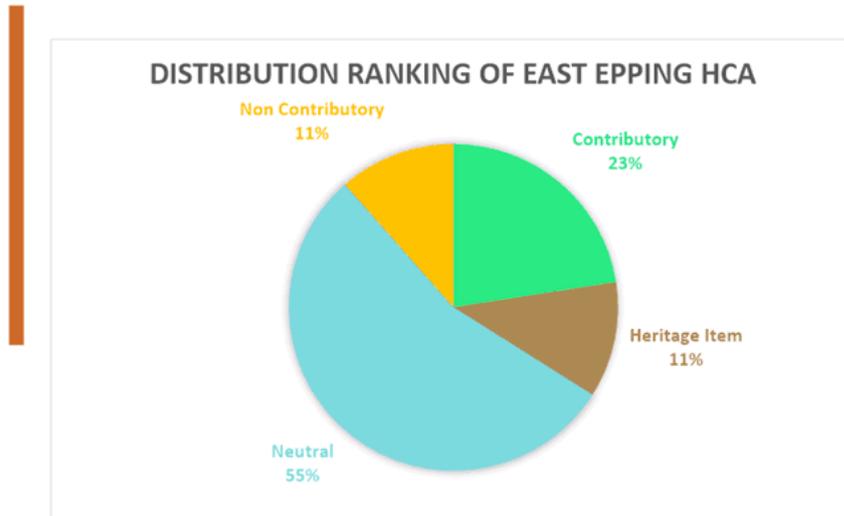

Figure 50: Distribution of Rankings of East Epping HCA.

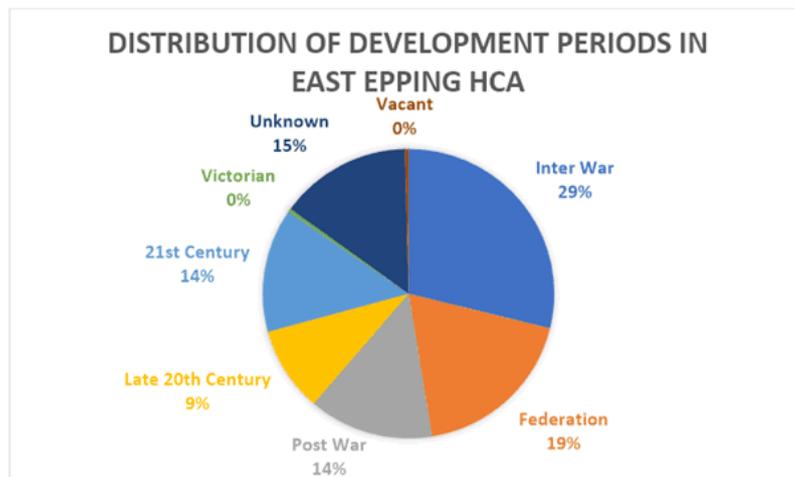

Figure 51: Distribution of Development Periods of East Epping HCA. The unknown development periods relate to properties which are located at the rear of another site and are not visible from the street fronts. Many properties within the East Epping HCA have been subdivided for dwellings to be constructed at the rear. These dwellings are not visible from the streetscape and have been ranked as being Neutral due to their presence neither enhancing or detracting from the area.

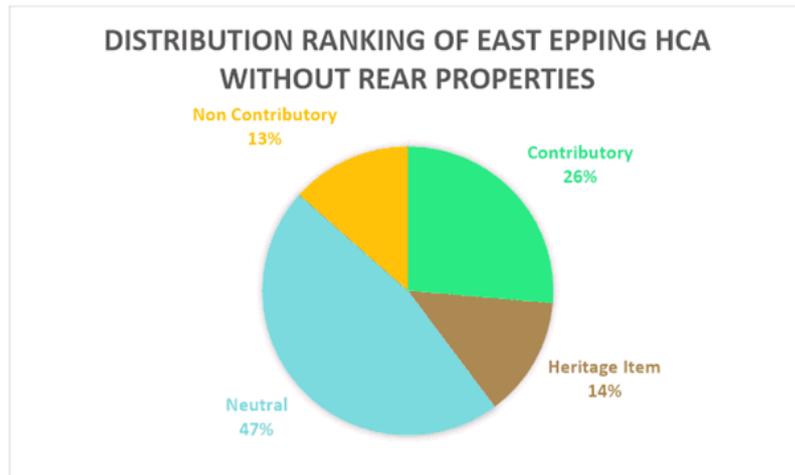

Figure 52: Distribution of ranking of East Epping HCA without rear property contribution. Due to a large number of properties within the East Epping HCA being subdivided, the properties which are not visible from the streetscape, do not contribute toward the character of the area and thus skew the distribution of rankings.

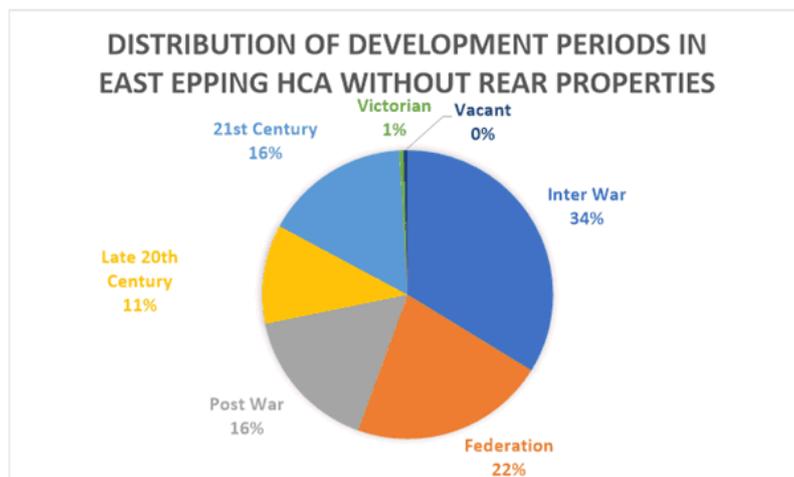

Figure 53: Distribution of developments periods of East Epping HCA without rear properties. Due to the large number of properties within the East Epping HCA being subdivided, the properties which are not visible from the streetscape do no contribute toward the character of the area. As such, their development period is unknown as depicted and have been removed from the above pie chart.

7.4 Essex Street Heritage Conservation Area

The Essex Street HCA consists of sixty (60) properties and two (2) streets and is located in the south-eastern portion of the Epping Town Centre Study Area. The two streets include Essex Street and Maida Road.

7.4.1 Previous Contributions Ranking

There are currently four (4) Heritage Items listed under Part 1 of Schedule 5 of the Hornsby LEP 2013 which are located within the Essex Street HCA (Figure 54). The majority of heritage items within the HCA are of local significance.

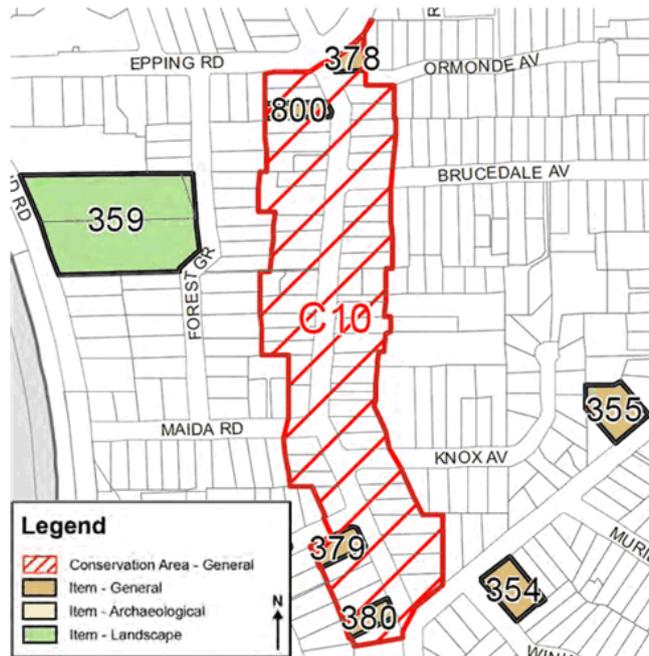

Figure 54: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting Essex Street HCA (Source: Heritage Map 11, Hornsby LEP 2013)

In addition to the listed heritage items within the HCA, relative contribution ranking of each property within the East Epping HCA Area was also identified as part of the of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013, as outlined previously. The contributions map prepared for this previous study is reproduced in Figure 52.

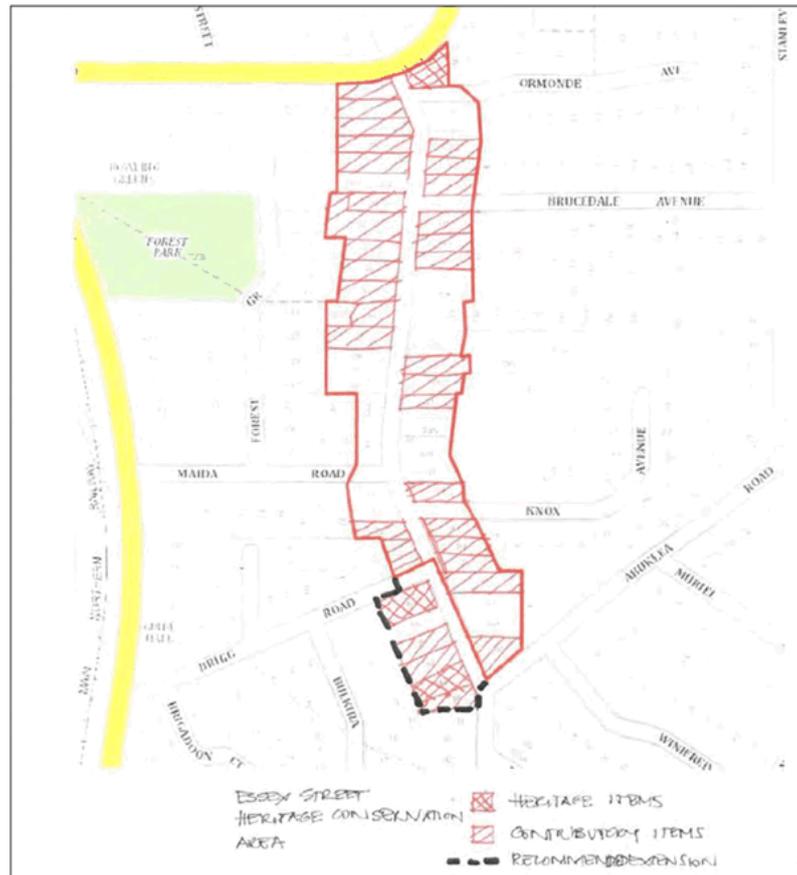

Figure 55: Mark up showing contributory items and recommended extension of Essex Street HCA (Source: Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 82)

7.4.2 Review of Contributions Ranking

Whilst Heritage Items and Contributory items of the Essex Street HCA were identified within the *Epping Town Centre Heritage Review*, the relative ranking of the remaining properties was not addressed. In order to gain a greater understanding of all properties' relative contribution to the significance of the Essex Street HCA, an assessment of each property's contribution has been conducted on foot as part of this study.

The revised relative contribution of individual buildings towards the significance of the Essex Street HCA is depicted in Figure 56 and further detailed in the table overleaf. The distribution of rankings and development periods are further summarised in Figures 57 to 59.

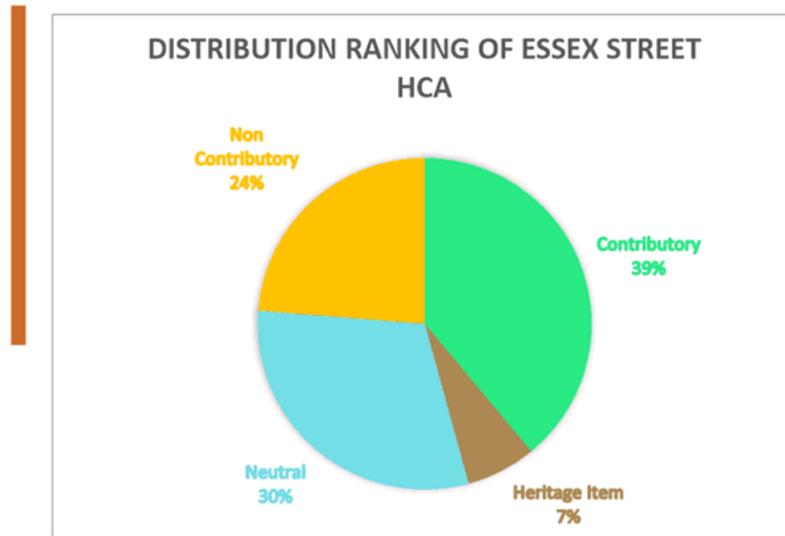

Figure 58: Distribution of Ranking of Essex Street HCA.

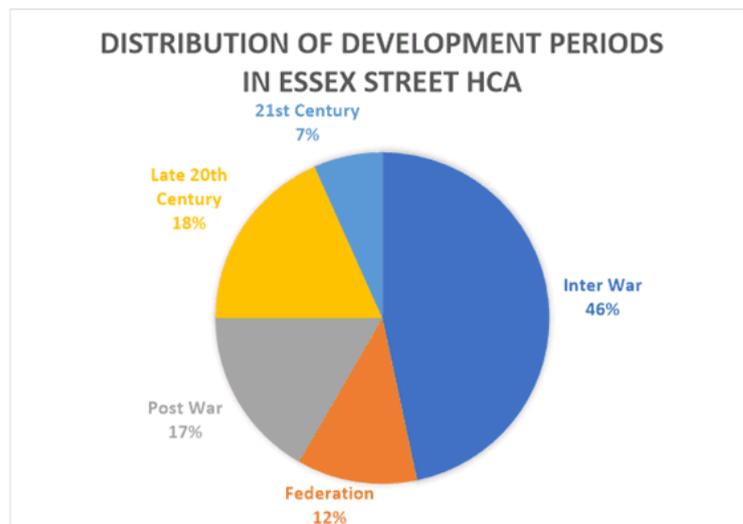

Figure 59: Distribution of Development Periods of Essex Street HCA.

7.5 Rosebank Avenue Heritage Conservation Area

The Rosebank Avenue HCA consists of approximately eighteen (18) properties and one (1) street and is located in the north-western portion of the Epping Town Centre Study Area. All properties within the HCA address Rosebank Avenue.

7.5.1 Previous Contributions Ranking

There are currently two (2) Heritage Items listed under Part 1 of Schedule 5 of the Hornsby LEP 2013 which are located within the Rosebank Avenue HCA (Figure 60). These two heritage items within the HCA are of local significance.

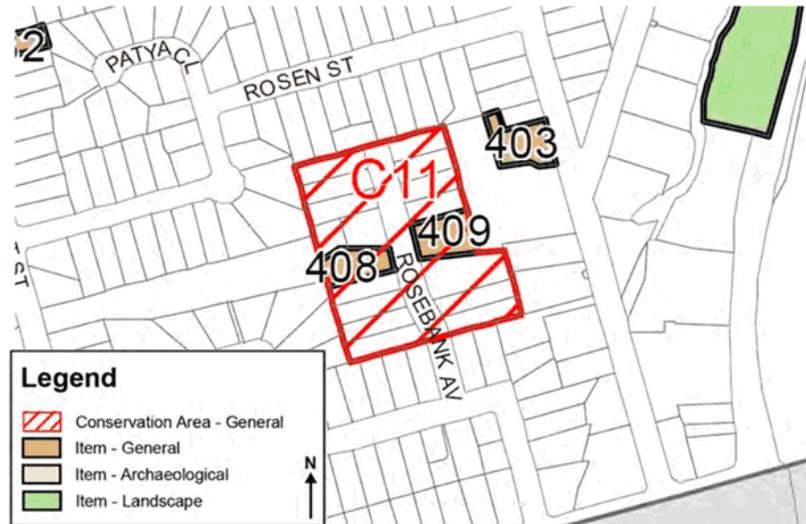

Figure 60: Extract of Heritage Map 11 from Hornsby LEP 2013, depicting Rosebank Avenue HCA (Source: Heritage Map 11, Hornsby LEP 2013)

Unlike the East Epping and Essex Street HCAs, an assessment of each property's contribution to the area was not conducted as part of the *Epping Town Centre Heritage Review* prepared by Perumal Murphy Alessi in 2013. Despite no contribution ranking being previously established for the Rosebank Avenue HCA, all except four dwellings within the area were constructed in 1938. The remaining three dwellings were constructed by 1942 and one in c.2007, which formed part of a subdivision of 15 Rosebank Avenue. As outlined in the Statement of Significance for the area in Section 6.4.4, the Rosebank Avenue HCA is a rare, fine and largely intact representative example of a residential development of an Inter War housing estate for the Hornsby Shire area. Due to the significance and intactness of the area, it can be stated that the relative contribution of each property within the Rosebank HCA is high, as determined through previous heritage assessments of the area.

7.5.2 Review of Contributions Ranking

Whilst Heritage Items within the Rosebank Avenue HCA were identified within the *Epping Town Centre Heritage Review*, the relative contribution of the properties was not addressed. In order to gain a greater understanding of all properties' relative contribution to the established significance of the Rosebank Avenue HCA, an assessment of each property's contribution has been conducted on foot as part of this study.

The relative contribution of individual building towards the significance of the Rosebank Avenue HCA is depicted in Figure 61 and further detailed in the following table. The distribution of rankings and development periods are further summarised in Figures 62 to 64.

7.6 Summary of Findings

7.6.1 East Epping Heritage Conservation Area

As established in Section 7.6.1, the East Epping HCA, retains its heritage significance as determined through previous studies of the area. Despite the previous contributory ranking of the East Epping HCA ranking more properties as being Contributory, the Neutral ranking awarded to the majority of properties within the HCA was primarily due to unsympathetic additions and alterations made to Federation and Inter War properties which rendered some of these properties a Neutral ranking rather than a Contributory ranking. Detailing of properties which are of the characteristics of the Federation and Inter War period could be altered to reflect the key characteristics of their respective development periods, restoring them to a ranking of Contributory. For example, this could include reinstating balconies which have been closed in, removal of unsympathetic carports, restoration of period detailing, such as exterior timber work, removal of uncharacteristic details and replacement with characteristic details.

Of the 253 properties located within the area, a total of 44% of the area is comprised of heritage items and contributory buildings and including all neutral buildings makes up a total of 89% of properties within the area. The area was confirmed to have a predominantly Federation and Inter War period character, with a total of 29% Inter War and 19% Federation properties, reflecting the early periods of development of the area following the subdivision of the Field of Mars. Post War, Late 20th Century and 21st Century properties total 37% all together; however, are scattered throughout the Inter War and Federation period properties of the area. Only one property was dated from the Victorian period at 70 Chester Street and another property was vacant, at 29A Chester Street. The vacant property previously had an Inter War Bungalow constructed on the site, and it appears that this building was demolished sometime after the 2013 study.

The high percentage of Neutral ranked properties was further due to a number of properties being subdivided, where it is typically seen in the area for an original Inter War or Federation period home to be sited at the front of the site, and newer dwelling being erected at the rear of the property, which would have served as the back yard of the original property. Due to

these rear properties not being visible from the streetscape, all of these properties have been ranked as Neutral, as they neither enhance nor detract from the overall characteristic detail of the HCA.

Whilst the area has retained its established heritage significance, the East Epping HCA requires adequate conservation guidelines and planning controls both within the area and in particular with interface areas of medium and high density development, which have the potential to further impact upon the visual setting and character of the area. This is of particular concern along the south-western edge of the area, where properties located along Essex Street, Norfolk Road and the very western properties of Chester Street. Recommendations on amendments to the current planning provisions for the area and interface areas are made in Section 11.2, which also take into account consultation with the residents and community members, which are also addressed in Section 8.0.

7.6.2 Essex Street Heritage Conservation Area

As established in Section 7.6.2, the Essex Street HCA, retains its heritage significance as determined through previous studies of the area. The ranking of properties as contributory has remained relatively the same as the previous rankings in 2013, with eight (8) properties being ranked as Neutral rather than Contributory, primarily due to unsympathetic alterations and additions to Inter War period dwellings, which has reduced the integrity of the buildings. One Inter War period weatherboard building, at 38 Essex Street, has sustained significant fire damage during 2016, with none of the original roof remaining. Despite being burnt out, the external façade remains, although damaged, and was awarded a Neutral ranking.

Of the sixty (60) properties located within the area, a total of 45% are comprised of heritage items and contributory buildings, and including all neutral buildings include a total of 75% of properties within the area. The area was confirmed to have predominantly Inter War period character, with a total of 46% of properties dating the period, reflecting the subdivisions of the farmlets located along the southern end of Essex Street from the 1920s. Federation period properties also still remain in the area, totalling 14%. These properties are scattered along the street, reflecting the earlier larger subdivision pattern of this area of the Epping Town Centre. The remaining properties, totalling 42% are composed of Post War, Late 20th Century and 21st Century properties. These later period properties are primarily located toward the centre of the Essex Street HCA.

Whilst the area has overall retained its integrity and character, the Essex Street HCA requires adequate conservation guidelines and planning controls both within the area and in particular with interface areas of medium and high density development, which have the potential to further impact upon the visual setting and character of the area. Particular areas of concern are the interface areas between the Essex Street properties located on the western side of the street, between Epping Road and Maida Road, where multiple high density residential developments are currently underway or have recently been approved. The recommendations on amendments to the current planning provisions for the area and interface areas are made in Section 11.2, which also take into account consultation with the residents and community members, which is also addressed in Section 8.0.

7.6.3 Rosebank Avenue Heritage Conservation Area

As established in Section 9.3, the Rosebank Avenue HCA, retains its heritage significance as determined through previous studies of the area. All properties within the area, except for 13 Rosebank Avenue, date to the original development of the Avenue as part of the Rosegrove Estate. All properties maintain their original Inter War period character; however, some modifications to two properties within the area, 5 and 21 Rosebank Avenue, have resulted in some period detailing being removed or modified, rendering in these properties being awarded a Neutral ranking. Despite this Neutral ranking, these two properties continue to contribute toward the character of the Rosebank Avenue HCA and could be returned to a Contributory ranking with reinstatement of period detailing and removal of unsympathetic modifications.

Of the 18 properties located within the area, a total of 88% of the area is comprised of heritage items and contributory buildings, and with inclusion of all neutral buildings make up a total of 100% of properties within the area. Only one property in the area dates from the 21st century, being 13 Rosebank Avenue, which lies directly behind 15 Rosebank Avenue. The new property is not visible from the street and is single storey, resulting in no impact to the significant streetscape qualities of the area.

Although the Rosebank Avenue HCA retains its integrity and established heritage significance, the area requires adequate conservation guidelines and planning controls both within the area and in particular with interface areas of medium and high density development, which have the potential to further impact upon the visual setting and character of the area. Areas of particular concern are properties within the Rosebank Avenue HCA which share a property boundary with high density residential developments on Cliff Road and Hazlewood Place. Recommendations on amendments to the current planning provisions for the area and interface areas are made in Section 11.2, which also take into account consultation with the residents and community members, which is also addressed in Section 8.0.

8. Community Consultation

8.1 Previous Community Issues and Concerns

Further to the re-assessment of the significance and integrity of the East Epping, Essex Street and Rosebank Avenue HCAs, this study sought feedback from the local community, property owners and heritage groups, on the issues which have arisen following the listing of each of the three HCAs after the 2013 study, and the current development of medium and high density residential development which are impacting upon the properties within HCAs that have the interface zone with these developments.

Prior to the beginning of this study, many community members and property owners of each of the three HCAs had made contact with Hornsby Council and the City of Parramatta Council to express their various concerns on the impact of heritage listing of HCAs, individual properties and the impact of medium and high density residential development. City of Parramatta Council provided letters from property owners and community groups over various concerns relating to heritage matters within the three HCAs. Of the material provided to City Plan Heritage, the following letters were included and are summarised as follows:

Letter Addresser	Issues and Concerns Raised
Property Owner of 42 Essex Street	Owner of 42 Essex Street request for property to be removed as a heritage item and be removed from Schedule 5 of the LEP (17 January 2016)
Epping Civic Trust	Epping Civic Trust supports the listing of the Essex Street Conservation Area, and supports the maintenance of the HCA's boundaries and the updating of the Section 9.4 of the DCP to include additional transitional measures to assist in mitigation impact from high density development (19 January 2015)
Damien Tudehope MP (Member for Epping)	Damien Tudehope MP (Member for Epping) requested for an immediate review as to the appropriateness of the continuation of the heritage conservation area in Essex Street and for Council to develop a new LEP that would act as a master plan for the redevelopment of the Essex Street precinct (provided the HCA is removed) (15 June 2015);
Property Owner of 1 Essex Street	Property owners of 1 Essex Street objection to listing of 1 and 3 Essex Street within the East Epping Heritage Conservation Area, and removal of 3 Essex Street as a heritage item. Further request for both properties to be rezoned as high density residential and equivalent building heights (18 September 2015);
Essex Street HCA Residents	Petition letter from residents of Essex Street HCA, requesting for a review of the Essex Street HCA, due to the burden the 'imposed' HCA zoning has on the properties within the zone. 38 residents of Essex Street signed the petition (16 December 2014)

The overwhelming number of the letters received from community members opposed the listing of the Essex Street and East Epping HCAs, in addition to the individual listing of 3 Essex Street and 42 Essex Street. The only letter not objecting to the removal of any HCA was from the Epping Civic Trust, who support the listing of the Essex Street HCA and encourage further planning controls to be included in the Hornsby DCP 2013.

8.2 Site Visit Consultation

In order to assess the current impact of high and medium density residential development at interface areas within the East Epping, Essex Street and Rosebank Avenue HCAs site visits with specific property owners were organised over two days, 21 and 22 March 2017. The

purpose of the site visits was two-fold, the first, to assess the impact of the high and medium density residential developments which lay adjacent to properties located within the HCAs, and the second, to gather and understand the issues and concerns of individual property owners on both the listing of each of the HCAs, and the impact that development was having upon them.

Whilst appointments were organised with individual property owners at allocated times, additional consultation was also conducted with property owners who had not secured an appointment was also undertaken. The below table outlines the property owners of whom City Plan Heritage consulted with and obtained their general issues and concerns relating to the East Epping, Essex Street and Rosebank Avenue HCAs and the impact of high and medium density. The issues and concerns raised are listed in no particular order.

HCA	Property Owners Consulted	General Issues and Concerns Raised
East Epping	3 Essex Street	<ul style="list-style-type: none"> ▪ Concerned about the impacts of high density residential development on their privacy ▪ Visual and physical impact of development on rear fence ▪ Worried about impact on financial value of property due to HCA, R2 zoning and adjacent development ▪ Some owners considering moving away from area due to impact of development ▪ Some owners experiencing health issues due to construction of developments ▪ Some owners unclear why their properties are included in the HCA ▪ Documentation from the property owners of Norfolk Road and Pembroke Streets was submitted to CPH for review as part of this phase of consultation. This documentation has been taken into consideration and is addressed in Section 11.5.

8.3 Community Workshops

Two community workshops were conducted by Parramatta City Council on 1 and 3 May 2017. Each workshop was facilitated by Straight Talk who will be composing a report for inclusion in the Discussion Paper to be prepared by the City of Parramatta Council. Each of the two community workshops were geared toward two groups, the first with property owners within the HCAs and the second with community members with general interest in the heritage review.

As part of these workshops, a short presentation by both the City of Parramatta Council and City Plan Heritage was conducted before the proceedings of the workshop activities.⁸ The City of Parramatta Council's presentation provided explanation as to the context and aims of the heritage review, as part of the Epping Planning Review which aims to:

1. Progress work undertaken by the Department of Planning & Environment, completed in March 2014;
2. Consolidate the planning controls to create one set of planning controls across the Town Centre and immediate surrounds; and
3. Provide a consistent approach to managing the high level of interest from developers within the centre.

In addition, the two stage approach of the Epping Planning Review was outlined as follows:

- **Stage 1 - December 2016 to December 2017**

1. Community consultations;
2. The preparation of 4 technical studies on: heritage conservation areas; traffic; social infrastructure; and commercial land uses;
3. The exhibition of a discussion paper in mid 2017, including getting public feedback;
4. Endorsement of key principles in late 2017

- **Stage 2 - from 2018 onwards:**

1. The preparation of new planning controls, including:
 - New Local Environmental Plan (LEP)
 - New Development Control Plan (DCP)
 - New Section 94 Plan

City Plan Heritage presented the information gathered to date (1 and 3 May) for the heritage review, to contextualise the study and provide clarification of the aims and scope of the study to the community members attending the workshops. The information presented at both workshops included the following:

- Scope of the brief;
- Methodology of heritage review;
- Brief History of the Epping Town Centre Area;
- Field Survey Ranking Criteria; and
- Overview of characteristics of East Epping, Essex Street and Rosebank Avenue HCAs.

As both of the community workshops took place before any recommendations had been made by City Plan Heritage to the City of Parramatta Council, all information presented at both of the workshops were at a preliminary stage.

⁸ A copy of the presentation from the community workshops conducted on the 1 and 3 May can be found via: <https://www.cityofparramatta.nsw.gov.au/about-parramatta/precinct-planning/epping-planning-review> (accessed on 15 May 2017)

Following City Plan Heritage's presentation, Straight Talk facilitated workshop discussions, based around three target questions as follows:

1. Values:
 - What do you value most about the Heritage Conservation Areas?
2. Experiences:
 - What is your experience around development in this area?
 - What do you see as being the key concerns when it comes to development regarding the Heritage Conservation Areas?
3. What should Council Consider?
 - What do you think Council should take into consideration when reviewing the planning controls for the Heritage Conservation Areas?

For the workshop on 1 May 2017, attendees were seated according to the street on which they lived, whilst for the workshop on 3 May 2017, attendees were seated wherever they wished. A summary of the results of these two workshops are outlined in the below tables.⁹ A detailed summary of the Community Workshops is contained within the report prepared by Straight Talk.

1 May 2017 - Directly Affected Community Members Workshop	
Key Insights	<ul style="list-style-type: none"> ▪ The current aesthetic of the area is highly valued. Greenery in general makes the area inviting and gives the streets a 'lovely' feel ▪ Low density buildings are perceived to add space and safety. This adds to the family-friendly character of the suburb ▪ There was comment that over-development raises issues regarding traffic, privacy, noise and rubbish. These things were among a number of other anxieties which relate to the 'destruction' of the overall quality of the suburb ▪ Traffic and parking was perceived to be a major issue. General congestion from increasing numbers of residents who may tenant new apartment blocks as well as commuters who travel through Epping on their commute to the city and other areas for work and during the week raise questions around how this will be managed for the future ▪ Participants believe that future planning and development should be consistent and appropriate for each section of the local area. Suggestions to apply transition zones to new developments were made ▪ A majority of the attendees supported a consideration of removing in whole or in part the HCAs which are part of the Heritage Review. This was particularly apparent in regards to Rosebank Avenue and Essex Street HCAs, as they are perceived the community members to now be compromised by new development in general.
Group Exercise 1 <i>Values: What do you value the most about your neighbourhood</i>	The most often mentioned values included: Proximity to public transport and schools, green, peaceful, community, heritage, suburban, consistency, privacy, open space, safety, gardens, pool, low-density, convenience and accessibility. Alongside listing these values, many participants expressed their concern about losing them because of new development. Some participants found this exercise difficult since they believe that the area has already changed significantly and therefore they struggled to identify any existing values.

⁹ The summary of findings of the Community Workshops have been provided by Straight Talk and are incorporated into the subject tables. Some amendments have been made to these summaries where clarification or additional information from the Community Workshops observed by CPH was deemed to be relevant for inclusion within these summaries.

<p>Group Exercise 2 <i>Experiences: What is your experience around development in this area? What do you see as being the key concerns when it comes to development regarding your street or neighbourhood?</i></p>	<p>Participants mentioned several different concerns including: Traffic issues and inadequate parking, visual and privacy issues concerning low and high-density housing immediately next to each other, increasing pollution and noise issues, lack of open and green spaces, confusion about what characterises an HCA and a wish to remove the heritage listing, lack of political transparency, safety, decrease in resident's mental health, negative economic consequences for residents, affected infrastructure and closing down of local shops and services.</p>
<p>Group Exercise 3 <i>Proposals: What do you think Council should take into consideration when reviewing the existing planning controls?</i></p>	<p>The proposals to Council were concentrated around four subjects. Firstly, numerous participants expressed a wish for Council to review the HCAs under the current Heritage Review and to consider removing the HCAs in whole or in part. On the other hand, others stated that heritage items should be protected. Appropriate planning and development was another key matter and here participants suggested height restrictions on new development, buffer zones between low and high-density housing and well-designed new development as significant matters. Participants wanted Council to focus on improving Epping's infrastructure which, it was felt, is currently not geared for the increasing population. Improving parking facilities was particularly emphasised. Finally, it was suggested that Council preserves existing greenery and community spaces as well as expand these.</p>

3 May 2017 - General Community Members

<p>Key Insights</p>	<ul style="list-style-type: none"> ▪ The aesthetic appeal of the suburb is highly valued. This incorporates the gardens, low density and heritage buildings in the area and contributes to the feeling that the area is protected and has a good sense of community ▪ Low traffic and easy access to public transport is also highly valued ▪ Many say that the HCAs in the area need to be preserved in order to retain the living history of the area ▪ Increasing building heights cause concern for participants who say this causes problems around privacy and shadowing ▪ Some participants believe that building and planning controls need to be more strictly monitored so developers follow through on their obligations ▪ There is concern that the character of the suburb will be lost and the voices of residents will be over-shadowed by developers ▪ Consistency in future planning controls is desired.
<p>Group Exercise 1 <i>Values: What do you value the most about your neighbourhood</i></p>	<p>The most often mentioned values included: Green, heritage, history, architecture, consistency, low-density, peaceful, low-traffic, consistency, gardens, size, open spaces, beauty, community, wildlife. Alongside listing values, some participants explicitly expressed that they would like to see the HCAs expanded or maintained.</p>
<p>Group Exercise 2 <i>Experiences: What is your experience around development in this area? What do you see as being</i></p>	<p>Participants mentioned several different concerns including: Visual and privacy issues concerning low and high-density housing immediately next to each other, traffic issues and inadequate parking, environmental impacts affecting vegetation and wildlife, new development undermining the value of the HCAs and a wish to extend the HCAs, violation of planning and building by developers, loss of the area's identity and architectural character.</p>

<p><i>the key concerns when it comes to development regarding your street or neighbourhood?</i></p>	
<p>Group Exercise 3 <i>Proposals: What do you think Council should take into consideration when reviewing the existing planning controls?</i></p>	<p>The proposals to Council were concentrated around four subjects. Firstly, a number of participants stated that they would like for the HCAs to be preserved and many further mentioned that they would prefer an extension of the HCAs. Some mentioned that the HCAs should be reviewed since their value has changed due to the new development and therefore consideration of the removal of the HCAs, in whole or in part, should be considered by Council. Many were concerned about protecting heritage housing and other items. Appropriate planning and development was another central matter and here participants suggested height restrictions on new development, control of floor space ratios, buffer zones between low and high-density housing and well-designed new development as significant matters. More control over developers was put forward as an important matter and finally, protecting the architectural value of Epping. Participants pointed out the need to improve Epping's infrastructure which, it was felt, is currently not geared for the increasing population. Improving parking facilities and minimising stormwater issues were mentioned. Finally, it was suggested that Council preserves existing greenery and community spaces as well as expand these.</p>

8.4 Submissions from Community Members Following Workshops

If any attendees of the Community Workshops wished to raise any additional issues, or submit documentation in regards to the heritage review, they were encouraged to do so through submitting written documentation to the City of Parramatta Council. Copies of all additional documentation from attendees was forwarded onto City Plan Heritage following recording by the City of Parramatta Council. A summary of the additional documentation received from community members from each of the workshops is summarised in the below table.

Topic/Issue	Documents received	CPH Comments
Impact of High Density Development on Rosebank Avenue HCA	<ul style="list-style-type: none"> ▪ Manuscript of Hornsby Shire Council Meeting, 12 August. ▪ Draft Zoning Map prior to UAP ▪ Images of Cliff Road development from and in Rosebank Avenue 	Consideration of the documentation provided in regards to the impact of high density residential development on the Rosebank Avenue HCA has been considered in Sections 9.3 and 10.3.
Rosebank Avenue draining disposal point and proposed tree removal	<ul style="list-style-type: none"> ▪ Request for additional information - DA/1292/2015 dated 10 March 2016 ▪ Email from Chris Fraser, Hornsby Shire Council to Richard and David (unknown surnames), no date included 	During the site visits to Rosebank Avenue on the 21 and 22 March, CPH was made aware that a proposal for the removal of some trees on the western side of Rosebank Avenue was proposed by Council in order to accommodate stormwater drainage for the recent high density residential development located on Cliff Road. The documentation supplied provides evidence for this matter. It is noted by CPH that the email from Chris Fraser (Hornsby Shire Council) does indicate that the seven (7) trees to be impacted,

		<p>including Peppermint Gum, Brush Box and 5 Scribbly Gums could possibly be retained after the proposed works.</p> <p>To date, it does not appear that any works have commenced in regards to the installation of the stormwater draining for the developments on Cliff Road, however, the loss of these trees would negatively impact upon the setting of Rosebank Avenue, which currently is a leafy street, lined by street trees and enhanced by properties front gardens and mature plantings and trees. If it is not possible to maintain all trees due to the installation of the stormwater drain, as suggested within the email supplied it is recommended to the City of Parramatta Council that appropriate replacement trees be planted in the road reserve to ensure that the consistent street tree plantings of Rosebank Avenue are maintained. This matter has also been included within Section 8.5.</p>
<p>Uncharacteristic features in Rosebank Avenue HCA</p>	<ul style="list-style-type: none"> ▪ Images of 5, 21 and 22 Rosebank Avenue with notes on recent renovations to properties 	<p>The two properties located within the Rosebank Avenue HCA, being 5 and 21 Rosebank Avenue, were noted in the field survey as being of 'Neutral' ranking, due to the alterations and additions to the properties which have removed characteristics details as noted in Sections 7.5.2 and 7.6.3.</p> <p>Both 5 and 21 Rosebank Avenue could be returned to a 'Contributory' ranking with reinstatement of period detailing and removal of unsympathetic modifications, as noted in Section 7.6.3.</p> <p>22 Rosebank Avenue is located outside of the Rosebank Avenue HCA and was not assessed for its contribution to the Rosebank Avenue HCA, however, it was noted that although the building located on the property is modern, the single storey scale and form of the building is considered to be moderately sympathetic to the HCA.</p>
<p>Request for extension of Essex Street HCA</p>	<ul style="list-style-type: none"> ▪ Email from Friends of Terry Creek requesting extension of Essex Street HCA to the south 	<p>Whilst it is acknowledged that the southern end of Essex Street, south of Abuklea Road does continue the character of the leafy streetscape of Essex Street, an assessment for the extension of the Essex Street HCA was not undertaken as part of this heritage review and laid outside of the scope of the brief.</p> <p>However, it is recommended that future heritage reviews, possibly as part of the new Local Environmental Plan to be developed for the City of Parramatta Council, consider assessing the southern end of the Essex Street HCA, for either extending the HCA's</p>

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

		boundary, or for an arboricultural assessment to be undertaken for the possibility of listing the street trees as a landscape items.
Heritage Houses and Areas	<ul style="list-style-type: none"> List of sixteen (16) 'heritage houses and areas' located in and around Epping 	No other notes than the list of 'heritage houses and areas' was provided. Unsure of purpose of list.
Heritage Houses and Non-Heritage Houses in Epping	<ul style="list-style-type: none"> Images of houses located in Rosebank Avenue Images of heritage houses located in Epping (not able to determine from which locations in Epping) Images of new apartment developments and late twentieth and early twenty-first century single and two storey residential developments 	<p>No other notes other than the photographs provided, and the labelling of images as either A, B, C or D was provided. The intention of the images provided is unknown to CPH, however, the majority of the houses contained within the photographs are located within either Rosebank Avenue, Essex Street and East Epping HCAs.</p> <p>If the intention of the photographs was to delineate between properties which contribute and which do not contribute toward the significance of each of the HCAs, reference should be made to Section 7 for the ranking of individual properties within each HCA for comparison.</p>
Chester Street Epping and Epping Town Centre Heritage Studies	<ul style="list-style-type: none"> Assessment of the cultural significance of cottages, Clive Lucas Stapleton & Partners, November 1992 Cottages: 19-21 Chester Street, Epping, Tropman & Tropman Architects, February 1993 Houses at 19 and 21 Chester Street, Epping, Robert Irving, February 1993 Objection to initial development 19 Chester Street, Rod Howard, June 1993 East Epping Conservation Evaluation and Review, Tropman & Tropman Architects, October 2001 Parramatta Council statement of HSC Epping Town Centre Study, Parramatta Council, July 2011 Epping Town Centre Study - Report on submissions. Hornsby Council, June 2012 Epping Town Centre Review, Clive Lucas, 	<p>The documentation provided covered a range of issues and concerns dating from as early as 1992. The information provided provides background to the development of 19 Chester Street and the listing of both 21 and 23 Chester Street as local items in the Hornsby LEP.</p> <p>Further documentation provided for objections and recommendations relating to previous Epping Town Centre Heritage Studies, particularly in relation to the East Epping HCA.</p> <p>No current issues are raised in the documentation provided, however, they did provide further background as to the development and listing of items on Chester Street and the listing of the East Epping HCA which included properties located on the southern side of Chester Street.</p> <p>Both 21 and 23 Chester Street are included for review in the current Hornsby Heritage Review - Stage 6. The information relating to the history, architectural features and significance of both items provided in the documentation have been integrated into the updated Inventory Forms for both items. Refer to Section 13 and Appendix A for information regarding both 21 and 23 Chester Street, Epping.</p>

--	--	--

8.5 Summary and Recommendations Arising from Community Consultation

The issues and concerns raised by property owners, community members, and local community groups of Epping have been taken into account throughout this Heritage Review. Some key issues and concerns were raised throughout the process in regards to issues outside of the scope of heritage concerns, particularly in relation to amenity, privacy, safety, traffic, green space, and a number of other issues as discussed throughout this section. Where issues and concerns raised throughout the community consultation phase were in direct relation to heritage matters, these have been addressed and incorporated throughout this report. The concerns of the community have been taken into account throughout the reassessment of the significance of each of the HCAs contained within this review (Sections 6 and 7), with particular attention to the impact of high density residential development being addressed in Section 9.

Two specific recommendations relating to heritage also arose from this Community Consultation phase, which are detailed as follows:

- It is recommended that future heritage reviews, possibly as part of the new Local Environmental Plan to be developed for the City of Parramatta Council, consider assessing the southern end of the Essex Street HCA, for either extending the HCA's boundary, or for an arboricultural assessment to be undertaken for the possibility of listing the street trees as a landscape items.
- CPH was made aware during the site visits to Rosebank Avenue that a proposal for the removal of some trees on the western side of Rosebank Avenue was proposed by Council in order accommodate stormwater drainage for the recent high density residential development located on Cliff Road. The documentation supplied indicated that seven (7) trees were to be impacted, including Peppermint Gum, Brush Box and 5 Scribbly Gums, however, could possibly be retained after the proposed works. As it does not appear that any works have commenced to date in regards to the installation of the stormwater drainage for the developments on Cliff Road, it is recommended for either the trees to be maintained, or if this is not possible, that appropriate replacement trees be planted in the road reserve to ensure that the consistent street tree plantings of Rosebank Avenue are maintained.

9. Assessment of Impact of Recently Approved Development Applications in Interface Areas

The following sub sections provide a diagrammatic and visual overview of recently approved developments, which have been either approved, are under construction, or have been completed, and which lay adjacent to the boundaries of East Epping, Essex Street and Rosebank Avenue HCAs.

As part of the Community Consultation phase, which has been documented in Section 8.0, access to the rear yards of the properties, which lie in the interface area of medium and high density residential development, was granted in order to establish and document the impact of the adjacent development has or will have on the setting, context, curtilage, character, landscape and most of all significance of each HCA.

The impact of these developments is assessed in Section 10.0 in regards to their impact on the overall significance of each of the East Epping, Essex Street and Rosebank Avenue HCA's. The significance, current integrity and intactness of each HCA, as determined in Sections 6.0. and 7.6, was factored in as part of this analysis.

9.1 East Epping HCA - Impact of Surrounding Developments

The following table and images provides an overview of the recently approved developments on the western side and southern edges of the East Epping HCA. Comments on the impact of each of these developments is provided in the captions.

Address of Development	Development Application Number

1-5A Cliff Road	DA/712/2016

Figure 73: Recently approved developments in interface area with R4 - High Density Residential Development adjacent to the Rosebank Avenue HCA (Source of Basemap: Hornsby Shire Council)

Figure 74: Views from rear yard of 1 Rosebank Avenue looking to the west (left) to the developments in Hazlewood Place and to the south to the developments on Cliff Road (right). Development is yet to begin on the adjacent properties to the south of 1 Rosebank Avenue, however development approval has been granted for high density residential development at 22-34 Cliff Road.

Figure 75: View from rear yard of 1 Rosebank Avenue looking to the north-west toward the development at 4 Hazlewood Place and the rear yard of 3 Rosebank Avenue (left) and view from 5 Rosebank Avenue looking west. The rear of 5 Rosebank Avenue does not have any mature tree plantings in order to help screen the new development (right).

Figure 76: View from 4 Rosebank Avenue looking to the west toward the Hazlewood high density residential development visible above the roof lines of 3 and 5 Rosebank Avenue (left) and view from 4 Rosebank Avenue looking south toward Cliff Road, with development visible in the background (right).

Figure 77: Entrance to Rosebank Avenue from Cliff Road. Development is underway visible to the left at 1-5A, 7-9 and 11-27 Cliff Road. Development approval has also been granted for 22-34 Cliff Road, visible to the right, however construction has not begun as yet. The entrance to Rosebank Avenue will be surrounded by high density residential developments following the completion of the approved constructions.

10. Recommendations for Amendments to Heritage Conservation Areas

The following section outlines the recommendations for amendments to the East Epping, Essex Street and Rosebank Avenue HCAs based upon the findings of the heritage assessment of each HCA, and consideration of the issues and concern raised during the community consultation phase of this study.

10.1 East Epping HCA and Individual Items Recommendations

In consideration of the reviewed assessment of the East Epping HCA, and the issues and concerns raised by the community in relation to the East Epping HCA associated with the impact of high density residential development on the western edge of the East Epping HCA boundary, it is recommended that a slight change to south-western boundary of the HCA be implemented. It is recommended that the following four (4) properties to be removed from the boundaries of the East Epping HCA and the boundaries of the HCA be adjusted accordingly as in Figures 78 and 79:

No.	Address	Development Period	Ranking
25	Pembroke Street	Federation	Contributory
1	Norfolk Road	Late 20th Century	Non Contributory
3	Norfolk Road	21st Century	Non Contributory
3A	Norfolk Road	21st Century	Neutral

Figure 78: East Epping HCA Contribution Ranking with Development Period overlay. The four properties recommended to be removed from the HCA are outlined in pink.

The recommendation of the removal of these four properties from the East Epping HCA is made due to the combination of the impact of the high density residential development at the rear of these properties and their relative contribution to the area. 1, 3, and 3A Norfolk Road are all new single and double storey dwellings, dating from the late 20th Century and early 21st Century. The style and age of these three dwellings are not in keeping with the Federation and Inter War characteristics of the East Epping HCA, thus resulting in the dwellings not contributing to the significance of the area. On the other hand, 25 Pembroke Street is a Contributory building for the East Epping HCA, however, will soon be isolated from similar properties of Federation and Inter War periods as a result of the rezoning of the southern side of Pembroke Street being an R4-High Density Residential Zone and properties to the west of 25 Pembroke also being zoned as R4-High Density Residential Zone. Whilst exhibiting characteristics of the Federation period, as a cottage with attached corner shop, the property is not considered to meet the threshold for individual heritage listing. Whilst it was noted in the *2013 Epping Town Centre Heritage Review* that this end of Norfolk Road, provided an entry way to the East Epping HCA, it is not until 9 Norfolk Road, which is a heritage item, that the characteristic streetscape features such as mature tree plantings, and built forms of the Federation and Inter War periods begin.¹⁰ Despite the heritage listed Epping Public School being located on the eastern side of this portion of Norfolk Road, the early buildings of the school are not located in the south-eastern end of the school grounds, instead, the Federation period buildings of Epping Public School begin directly opposite 9 Norfolk Road. From this start point, a true appreciation of the characteristics of the East Epping HCA can be experienced and observed.

If, as a result of 25 Pembroke Street being removed from the East Epping HCA, should in the future demolition of the property is proposed, it is recommended that a photographic archival recording be undertaken prior to the dwelling's demolition, and any significant fabric be salvaged and recycled in an appropriate manner.

In addition, it is recommended that both 1 and 3 Essex Street are retained within the East Epping HCA and for 3 Essex Street to maintain its heritage listing under the Hornsby LEP. An internal inspection of 3 Essex Street was conducted as part of the HCA review. The dwelling retains many original details both internally and externally, as detailed in Section 6.2.5. Despite the concerns of the property owner, of being surrounded by high density residential development and being located on the very edge of the HCA, 3 Essex Street along with 1 Essex Street will not be isolated sites. Another heritage item, the Scout Hall lies on the western side of Essex Street, as well as directly to the north is the Unity Church on Chester Street, also a heritage item. In addition, a recreational park lies directly to the south of 3 Essex and to the east is the East Epping HCA. Thus, 3 Essex Street will maintain its current setting and the high density residential development which is currently underway further south along Essex Street and further to the east close to the railway line will not affect the immediate context, curtilage and setting of either this section of the East Epping HCA or the Heritage Items themselves. Thus, it is recommended that both 1 and 3 Essex Street are maintained within the East Epping HCA and for 3 Essex Street to be maintained as a heritage item under the Hornsby LEP 2013. The Inventory Sheet for 3 Essex Street has been updated to reflect the current condition and setting of the property in Appendix A.

The recommended amendments to the boundary line of the East Epping HCA is depicted overleaf in Figure 79. Recommendations for the rezoning of properties recommended to be removed from the East Epping HCA are addressed in Section 11.5.

¹⁰ Perumal Murphy Alessi, *Epping Town Centre Heritage Review* (March 2013) p. 10.

Figure 79: East Epping HCA with amendment to boundary removing 25 Pembroke Street, 1, 3 and 3A Essex Street. The properties recommended to be removed are outlined in pink.

10.2 Essex Street HCA and Individual Items Recommendations

In consideration of the survey findings and reviewed assessment of the Essex Street HCA, and despite the issues and concerns raised by the community in relation to interface areas of the high density residential development on the western edge of the area, no changes to the Essex Street HCA boundary are recommended.

Following the reassessment of the Essex Street HCA it was determined that the integrity and significance of the Essex Street HCA was still intact, as determined through the two previous studies conducted on the HCA in 2013 and 2001, as discussed in Section 6.3. In addition, the properties which are located between Epping Road and Maida Road within the Essex Street HCA are predominantly Contributory properties, primarily dating from the Federation and Inter War periods. Of the twenty (20) properties located on the western side of the Essex Street between Epping Road and Maida Road of the HCA, one (5%) is a Heritage Item, nine (45%) are Contributory, five (25%) are Neutral, and five (25%) are Non-Contributory. Thus, 50% of the properties located within this section of the Essex Street HCA are Heritage Items and Contributory buildings, and with inclusion of all Neutral buildings, they make up 75% of this section of the HCA contributing to the intactness of the Essex Street HCA. Two of the current Neutral buildings located in this section of the HCA date from the Inter War period and could be ranked as Contributory, if original detailing is reinstated and/or detracting elements are removed, which could increase the number of contributory buildings to eleven (55%), totalling twelve (60%) properties being either Heritage Items or Contributory.

In addition, the impact of the high density residential developments on Forest Grove and Epping Road upon the Essex Street HCA was also assessed as part of this heritage review in Section 9.2. Whilst five and six storey developments were currently underway at the rear of properties located on the western side of Essex Street between Epping Road and Maida Road, the visual impact of these developments are not considered to have a major impact upon the significance of the Essex Street HCA. Due to the long lot size of each of the properties on the western side of Essex Street, coupled with existing mature trees and vegetation on each of the properties, the high density residential developments recede into

the background of the setting of the Essex Street HCA and do not dominate the streetscape of the HCA. The streetscape qualities of the HCA are not affected detrimentally by the interface R4-High Density development and the impact on the backdrop of the properties are not experienced along the street-long views and vistas. It is considered that the main impact of these close high density development is privacy issue and dominance at the rear boundaries, which are essentially related to planning matters rather than heritage matters.

If the removal of these twenty (20) properties from the HCA was considered, it would result in a detrimental impact to the identified and assessed heritage significance of the HCA. The removal of these properties would result in the most intact component of the HCA being lost, reducing the HCA by a third of its size and significantly impacting upon the streetscape of the northern end of the Essex Street HCA. Furthermore, properties located on the eastern side of Essex Street, which would remain in the HCA, would further be impacted upon by the removal of these twenty (20) properties, dislocating the relationship between the east and west sides of Essex Street. The intactness and significance of the Essex Street HCA would be irrevocably changed if these twenty (20) properties were to be removed, thus, it is recommended that the existing boundary of the HCA remain as is.

Whilst it is acknowledged that the high density residential developments have and will result in significant impacts for property owners adjoining these new developments in relation to privacy and individual views from properties, these impacts are not considered to be heritage issues and do not impact upon the heritage significance of the Essex Street HCA. Despite this, recommendations have been made in Section 11.0 to mitigate some of the issues, both current and future, experienced by both property owners in these interface areas and the setting of the Essex Street HCA.

In addition, it is recommended that 42 Essex Street be retained as a heritage item under the Hornsby LEP. A brief internal inspection of 42 Essex Street was conducted as part of the HCA review. The dwelling retains many original details both internally and externally, as evidenced in Section 6.3.5. Furthermore, in conducting a review of the history of the Epping Town Centre area, the association of the 42 Essex Street within the Mount Tomah Nursery that operated in the area in the 1890s was reconfirmed. The association of the timber weatherboard Federation cottage with the Vollmer and Vessey family is a significant link with the early development of the Epping Town Centre, at a time when orchards and nurseries dotted the landscape of Epping. Whilst the high density residential development occurring at 20-24 Epping Road does create some visual impact, in terms of setting of the rear yard of the property, this impact is not considered to erode the heritage significance of the property, in terms of its historic, aesthetic, associational and representative values. Thus, it is recommended that 42 Essex Street be maintained as a heritage item under the Hornsby LEP 2013.

10.3 Rosebank Avenue Conservation Area Recommendations

In consideration of the survey findings and reviewed assessment of the Rosebank Avenue HCA, and despite the issues and concerns raised by the community in relation to interface areas of the high density residential development on the western and southern edge of the HCA, no changes to the Rosebank Avenue HCA boundary are recommended.

Following the reassessment of the Rosebank Avenue HCA it was determined that the integrity and significance of the Rosebank Avenue HCA was still intact, as determined through the two previous studies conducted on the HCA in 2013 and 2003, as discussed in Section 6.4. The Rosebank Avenue HCA still remains as a rare example, at local level, of an intact Inter War streetscape within Epping and the Parramatta area and is one of few intact Inter War housing estates remaining. Despite some minor modifications to a couple of properties within the HCA, such as modified windows, enclosed balconies and uncharacteristic driveways, these modifications are only minor and do not detract from the overall heritage significance of the HCA.

The impact of the high density residential developments to the south and west of the Rosebank Avenue HCA, along Cliff Road and Hazlewood Place will result in a modified setting and curtilage to the Rosebank Avenue HCA, particularly from the entrance looking

north along Rosebank Avenue. The entrance to Rosebank Avenue will soon be flanked by a six storey development to the west and a five storey development to the east of the entrance to Rosebank Avenue; however, once reaching 1 and 2 Rosebank Avenue, the view of the HCA will be unobstructed by the high density residential development which lays to the south. The backdrop of 1, 3, 5, 7 and 7A Rosebank Avenue will be of mature trees and high density residential redevelopment; however, due to the long blocks, the separation from the rear of the dwelling and the new developments allows for enough of a buffer to prevent the encroachment of views of the high density development being seen from Rosebank Avenue. 1, 3, and 7 Rosebank Avenue currently have substantial mature trees located along the rear boundary fence, screening much of the view of the new developments. Only 5 Rosebank Avenue does not have substantial mature trees along the rear fence line, thus resulting in more views to and from the new development, both from Rosebank Avenue and from the 5 Rosebank Avenue. Whilst the new backdrop of 1, 3, 5 and 7 Rosebank Avenue, will minimise the current leafy backdrop of the Rosebank Avenue HCA, it is not considered to warrant the removal of individual properties or the whole HCA from the Hornsby LEP.

The Rosebank Avenue HCA is exceedingly rare in the area and remains largely intact. All properties have retained their original subdivision, except for 15 Rosebank Avenue, and all retain the original buildings constructed during the 1930s and 1940s. The detailing of the Inter War period, from Bungalow, Tudor and Spanish styles, is retained amongst all original properties. Coupled with the substantial street plantings, natural creek, and established gardens of each of the properties, the Rosebank Avenue HCA will still retain its significance even following the completion of development along Cliff Road and Hazlewood Place. Whilst it is regrettable that such a backdrop to some of the properties in the HCA will be affected by the new high density residential development, the area will still retain its integrity and characteristics that makes it rare Inter War period housing development.

Whilst it is acknowledged that the high density residential developments have and will result in significant impacts for property owners in relation to privacy and individual views from properties at 1, 3, 5 and 7 Rosebank Avenue, these impacts are not considered to be heritage issues and do not impact upon the heritage significance of the Rosebank Avenue HCA. Despite this, recommendations have been made in Section 11.0 to mitigate some of the issues, both current and future, experienced by both property owners in these interface areas and the setting of the Rosebank Avenue HCA.

11. Planning Review

11.1 Existing Heritage Guidelines

Changes to Heritage items and HCAs are guided by the heritage provisions contained in the two main plans known as the *Hornsby Local Environmental Plan (LEP) 2013* and the *Hornsby Development Control Plan (DCP) 2013*. The controls in these instruments seek to "assist in conserving the heritage significance of the natural and built environmental and ensure new development is sympathetic with identified heritage values. In doing this, the [Hornsby] Shire's heritage resources and the quality of the environment will be maintained or improved, resulting in attractive streetscapes and providing an appealing place to live."¹¹

Standard best practice heritage controls are currently contained in these instruments for managing the development of heritage places, including the need for Council's development consent for major changes, the requirement for statements of heritage impact to accompany development applications, and the Council's obligations to assess the impact of developments on the significance of listed places.

Planning controls specific to East Epping, Essex Street and Rosebank Avenue HCAs are contained with *Part 9.3 Heritage Conservation Areas*. This part of the DCP provides the Statements of Significance outlining the key heritage aspects of each HCA supported by explanatory information on the history and description of each HCA. In addition, prescriptive measures are also included which contain controls for demolition, streetscape character, materials and finishes, fences and gates, utilities, garages and carports, driveways, and subdivision. Furthermore, *Part 9.4.1 Development in the Vicinity of Heritage Item* provides controls for development to land that is adjoining, or across the road from a heritage item or a heritage conservation area.

In consideration of recently approved developments in line with the rezoning of the respective sites and the reassessed significance of each HCA within this study, the current planning controls relating to heritage have need to be reviewed to evaluate if the current planning controls provide adequate protection for the established heritage significance of heritage items and HCAs in the Epping Town Centre Area.

Specific matters for review were also outlined as part of the scope of works for this study by City of Parramatta Council, these included a review of Section 9.4.1 of the Hornsby DCP 2013, potential height increases for R4-High Density Residential Zone and R3-Medium Density Residential Zones, the extension of the existing R3-Medium Density Residential Zone to encompass Brigg road and Rose Street, individual property zoning changes if removed from a HCA and any other updates to the current planning controls not addressed in the aforementioned list. Each of these matters are addressed in the below subsections, with recommendations given for any changes to the existing planning controls which relate to the Epping Town Centre area.

11.2 Hornsby DCP 2013, Section 9.4.1 Review

An investigation of the effectiveness of the current design interface guidelines (Section 9.4.1) and other relevant provisions in the Hornsby DCP is necessary in order to mitigate the effects of development on the character and integrity of the East Epping, Essex Street and Rosebank Avenue HCAs. As part of this investigation, regard has been given to the topography of each of the HCAs and recently approved Development Applications at the interface with HCAs have also been reviewed in Section 9.0, in order to develop a holistic view of the impact that medium and high density residential development is having on these HCAs.

A review of the existing Hornsby LEP and DCP guidelines are investigated in the following sections, with reference to recently approved developments in the interface areas with the East Epping, Essex Street and Rosebank Avenue HCAs, as outlined in Section 9.0.

¹¹ *Hornsby Development Control Plan 2013*, 9-3.

11.2.1 Existing Guidelines

Section 9.4.1 of the Hornsby DCP 2013 provides controls for the development on land that is adjoining, or across the road from a heritage item or a heritage conservation area. The current guidelines encourage "New work that is sympathetic to the heritage significance of nearby heritage items, or adjoining heritage conservation area and their settings". The following is stated in Section 9.4.1 regarding to development in the vicinity of a Heritage item or Heritage Conservation Areas.

Heritage Items

- a. Design and siting of new work should complement the form, orientation, scale and style of the heritage item.
- b. Adequate space should be provided around the heritage item to allow for its interpretation.
- c. Development should maintain significant or historic public domain views to and from the heritage item.
- d. Original or significant landscape features that are associated with the heritage item and which contribute to its setting should be retained.
- e. For rural heritage items, the scale of new work is not to overwhelm the heritage item taking into consideration the matters within the Rural Heritage Items element.

Heritage Conservation Areas

- f. Development in the vicinity must respect the curtilage and setting of the HCA and protect views into and from the HCA.
- g. Development is to be sympathetic to the primary characteristics and heritage values of the HCA with regards to proposed:
 - context, including backdrop to places in the HCA;
 - bulk, height alignment form and roofline of new development;
 - proportions such as windows and door openings (number and location) and balconies;
 - Interface facade materials, treatments and palette;
 - Compatible fencing and screening.
- h. Development applications for multi-unit developments adjacent to HCAs must include a construction impact report demonstrating that the construction process will not detrimentally or indirectly adversely impact places in the HCA at the time of construction or over time.

The existing guidelines contained within Section 9.4.1 of the Hornsby DCP should encourage sites adjoining a heritage conservation area or heritage item to be sympathetic to the heritage significance of the area. This includes ensuring an appropriate context for the heritage conservation area, through preventing inappropriate and unsympathetic surrounding developments from detracting from the significance of the heritage conservation area and its setting.

11.2.2 Recent Development Application Response to DCP Controls

Recent developments surrounding the East Epping, Essex Street and Rosebank Avenue HCAs do not appear to have adequately addressed the provisions of Part 9.4.1 of the DCP due to their nature of built form resulting from the rezoning of the subject interface areas.

The recent approved developments within the interface areas of the East Epping, Essex Street and Rosebank Avenue HCAs are visually explored in Section 9.0. Of the developments approved surrounding the East Epping HCA, all developments are located at the very south-western corner of the HCA, where the R4 - High Density Residential Zone was implemented following the Epping Town Centre Urban Activation Precinct (UAP) Plan's new zoning. A total of five (5) development applications have been lodged since the new zoning was implemented, with a total of four (4) of the five (5) DA's being for amalgamated sites. The recent approved developments surrounding the Essex Street HCA are located along the western border of the Essex Street HCA area, between Epping and Maida Roads. As with the East Epping HCA, the properties located within this section of Epping were rezoned to R4 - High Density Residential and R3 - Medium Density Residential Zones following the Epping Town Centre UAP Plan. A total of ten (10) DA's have been lodged since 2014, with a total of nine (9) of the ten (10) developments being for amalgamated sites.

Finally, the approved developments surrounding the Rosebank Avenue HCA are located to the south, and very south-eastern and western corners of the Rosebank Avenue HCA. The Epping Town Centre UAP Plan resulted in the Rosebank Avenue HCA being surrounded on its southern side by a R4 - High Density Residential Zone. Since 2014, six (6) developments applications have been lodged, with all applications being for amalgamated lots.

Following the site inspections of multiple properties within each of the three HCAs, which were located on the interface zones with R4 and R3 developments, the majority of the developments located in these interfaces areas, particularly those located at the rear of HCA properties, were not sympathetic to the context and setting of the HCA.

The visual and physical impact of High Density Residential developments which have either been completed or are under construction at the rear of these properties in most cases did not include sufficient setback, screening or deep soil planting, to alleviate the scale and bulk of the development.

The biggest impact of these developments has been on individual properties themselves. From the streetscape, the recent high density residential developments do mostly recede into the background of the edges of the HCA, however, their impact on the HCAs is still not considered to be considerably sympathetic to the setting and context of each of the areas, as explored in Section 9.0 and analysed in Section 10.0.

Section 9.4.1 of the Hornsby DCP 2013, needs to be understood in conjunction with Sections 9.6.6 - Setbacks and 9.6.8 - Landscaping, at a minimum to be able to adequately address the current impact that recently approved high density residential developments are currently exerting on properties within the boundaries of the East Epping, Essex Street and Rosebank Avenues HCAs. In addition, consideration of the impact on the heritage significance of HCAs and/or heritage Items, need to be sufficiently addressed by development proposals. For some recently approved developments, the consideration of the impact upon the heritage significance of either a HCA, or a Heritage Item provided only a brief one paragraph explanation as to the impact on the heritage significance of the area of item. Such minimal consideration as to the impact of a large high density residential development is not considered to adequately address the impact that the development will have on an area or item of heritage significance. A discussion of each of these components are included below.

Setback

Section 9.6.6 of the Hornsby DCP provides for the following minimum setbacks in Residential Area, in Table 9.6.6(a):

Table 9.6.6(a):
Minimum Setbacks - Residential Area

Setback	Minimum building setback
Front Boundary	12m, which can be reduced to 10m for a maximum of 1/3 of the building width.
Rear Boundary	10m, which can be reduced to 8m for a maximum of 1/3 of the building width.
Side Boundary (including balconies)	6m, which can be reduced to 4m for a maximum of 1/3 of the building width.
Fifth Storey Setback	3m should be provided between exterior walls of the lowest storey and exterior walls of the fifth storey.
Fifth storey setback where mezzanine proposed	6m additional setback for exterior walls of the storey, measured from the walls of the lowest storey.
Basement Parking Setback	9m from front and rear boundaries and 4m from side boundaries to allow for deep soil landscaping.

Whilst a minimum of 10m is required at the rear boundary, this setback can be reduced to only 8m for a maximum of 1/3 of the buildings width. From a survey of some of the approved development assessments, it was evident that some of these developments have been able to encroach further than the 8m setback dictated by the above provisions, through the addition of balconies into the minimum setback.¹² The additional encroachment of the high density residential development into the minimum 8m setback results in both a physical and visual overwhelming impact on the adjacent individual property.

Whilst it is noted in Section 9.6.6 that 'development involving or adjoining heritage items should have regard to the Heritage DCP', the achievement of not even the minimum setback for the interface areas with HCAs do not appear to be in keeping with the guidelines of the Hornsby DCP.

Instead of meeting the absolute minimum requirements for setbacks for rear and side boundaries, additional setback, such as the blanket 10m setback which is required for Chapman Avenue, should be encouraged, in order to aid in maintaining the context and setting of each of the HCAs, and minimise impact on the adjoining individual properties within the HCAs.

Deep Soil Planting

Section 9.6.8 of the Hornsby DCP provides provisions for landscaping, of particular focus here is the provisions for deep soil planting, in order to aid in a sympathetic transition from HCA and/or Heritage Item to high density residential development. The following provisions are stated within Section 9.6.8 in relation the deep soil planting:

- b. Landscaped areas should adjoin property boundaries, in accordance with Table 9.6.8(a), and be designed to accommodate:
- Canopy trees that will reach mature heights of at least 10 to 12 metres in the front and rear setback, and
 - Trees that will reach a mature height of at least 6 to 7 metres in the side setbacks.

Table 9.6.8(a): Deep Soil Landscaped Areas

Setback	Property Boundary Landscaped Area (deep soil)
Front Boundary	7m wide
Secondary Boundary (on corner lots)	4m wide
Rear Boundary	7m wide
Side Boundary	4m wide

A dominant feature in each of the East Epping, Essex Street and Rosebank Avenue HCAs is their landscape settings, whether it be street planting, front or rear gardens or verge planting. Many mature trees, which are contemporary with each of the area's period of development, from the Federation, Inter-War and Post War periods are still extant, and contribute significantly to the context and setting of each of these HCAs. The landscaped settings of these HCAs should be conserved and maintained and enhanced through development which lay adjacent to each of these HCAs, not only to ensure the continuation

¹² For example, DA/327/2015 at 20-24 Epping Road, which lies to the rear of properties on the western side of the Essex Street HCA.

of their landscaped setting, but also to alleviate the physical and visual impact of the high density residential development may have on the single and two storey dwellings, which are within the HCAs.

Heritage Management Documents

In order to sufficiently assess whether a proposed development which is located in the vicinity of a HCA or a Heritage Item will result in an acceptable impact upon the context and setting of the area or item, it may be necessary for the consent authority, Parramatta City Council, to require a heritage management document to be prepared that assesses the extent to which the carrying out of the proposed development would affect the heritage significance of the heritage item or heritage conservation area concerned, as stipulated in Part 5.10(5) of the Hornsby LEP 2013. Some of the recently approved development applications did include a heritage management document, such as a Heritage Impact Statement (Statement of Heritage Impact), whilst others only included a short paragraph within a Statement of Environmental Effects which assessed the impact on the effected Heritage Conservation Area and/or Heritage Item. Such heritage management documents should be sufficiently assessed by the consent authority to determine if the proposed development will or will not result in a negative or positive impact upon nearby HCAs or Heritage Items. Through a thorough assessment of the impact of high density residential development on a HCA or Heritage Item, a more sympathetic solution to a development could be arrived at, alleviating some of the issues which are currently being experienced by property owners at the interface areas with high density residential development and further ensuring the setting and curtilage of the area for item is retained and conserved for the future.

11.2.3 Recommendations for Section 9.4.1

The existing guidelines for development in the vicinity of a HCA in Section 9.4.1 of the Hornsby DCP 2013 does currently provide a good framework from which to assess the impact of high and medium density residential developments which are located in interface areas with HCAs. However, consideration of Sections 9.6.6 and 9.6.8 of the Hornsby DCP 2013 need also to be particularly considered in the assessment of high density residential developments in the vicinity of HCAs or Heritage Items.

It is recommended that where R3 and R4 Zones interface with a HCA or a Heritage Item that a 10m setback, which is required for Chapman Avenue, be implemented in order to aid in maintaining the context and setting of each heritage conservation areas and items. In addition, sufficient deep soil planting between R3 and R4, and HCAs and Heritage Items should be encouraged, as well as the retention of any mature trees which aid in screening the high or medium density development from the heritage conservation or heritage item.

The assessment of development applications within these interface areas needs to be rigorous, in order to take into account the heritage significance of the area or item it will affect, with any potential impacts needing to be adequately addressed in order to minimise the negative impacts experienced by the heritage conservation area or the heritage item.

11.3 Potential Impacts of Height Increases to HCAs

As part of the brief for this heritage review, a request for any investigation of the impact and implications of increasing the 17.5m and 12m height limits by one storey in the R4 High Density Residential Zone and R3 Medium Density Residential Zone on the integrity and conservation values of the Essex Street, Rosebank Avenue and East Epping HCAs was made.

In consideration of the existing impacts of high and medium density residential development on the interface areas with East Epping, Essex Street and Rosebank Avenue HCAs, the possibility of increasing the current height limits of R4 High Density Residential Zones and R3 Medium Density Residential Zones by one storey, would further negatively affect the current context and setting of each of the HCAs.

Whilst it has been acknowledged in this study that the high and medium density developments which are either completed, currently under construction or to be constructed mostly recede into the backdrop of each of the HCAs, in general, they do not overwhelm or adversely impact on the setting of the HCAs. An increase in the height limits of these zones would further increase the visibility of the high and medium density residential developments in the background of the HCAs. Whilst not a heritage issue, the impact upon individual property owners which share a boundary with these high and medium density developments, would likely experience further privacy and overwhelming dominance issues. An increase to the existing height limits of these zones would exacerbate the existing negative impacts upon both the East Epping, Essex Street and Rosebank Avenue HCAs and upon individual property owners.

Thus, it is recommended that the existing height limits of 17.5m and 12m are retained for R4-High Density Residential Zones and R3-Medium Density Residential Zones, respectively.

11.4 R3 Medium Density Residential Zone in Brigg Road and Rose Street

In addition to the consideration of height increases to R4-High Density Residential Zones and R3-Medium Density Residential Zones, the investigation also included the implications of extending the R3-Medium Density Residential Zone to the northern side of Briggs Road and all of Rose Street, as indicated in Figure 80.

During the site inspections conducted in March 2017, this area was also surveyed to ascertain the current condition and setting of both Brigg Road and Rose Street. From this inspection, it was noted that the majority of buildings within both of these streets comprised of a Post War, Late 20th Century and 21st Century dwellings, of either single or double storeys. The northern side of Brigg Road slopes down toward the north, the southern side of Brigg Street sloping up. Rose Street continues on the downward trajectory of the slope from Brigg Street, with the dwellings located in the area sitting low within their sites, as seen in Figure 81.

Some medium density residential developments are already under construction or completed along Maida Road, where the existing R3-Medium Density Residential Zone exists. One complete development, located at 18-22 Maida Road, is three storeys in height and lies to the rear of 70 and 72 Essex Street. The height of this three storey development does not negatively impact upon the current setting and curtilage of the Essex Street HCA, due to the height limit of the zoning being 12m and the incorporation of sufficient setbacks, further coupled with mature trees and plantings at the rear of both 70 and 72 Essex Street, as displayed in Figure 82.

Thus, it is considered that the implementation of a R3-Medium Density Residential Zone to the northern side of Brigg Road and to Rose Street will have an acceptable impact upon the current setting and of the Essex Street HCA, provided that consideration is given to sufficient setback, deep soil planting, and the impact upon the setting and curtilage of the Essex Street HCA is adequately addressed in any future development proposals, incorporating the recommendations, already made in Section 11.2. The topography of the area will aid in reducing the perceived overall height of medium density development and coupled with sympathetic design, will ensure that the integrity, setting and character of the Essex Street HCA is retained. Implementation of the above recommendations will ensure an appropriate transition from R2 to R3 zones.

Figure 80: Extract from Epping Town Centre Composite Zoning and Heritage Conservation Area map with proposed extension of R3 Medium Residential Zone on Rose Street and Brigg Road highlighted in blue (Source: Amended Epping Town Centre Composite Zoning and Heritage Conservation Areas map, supplied by City of Parramatta Council)

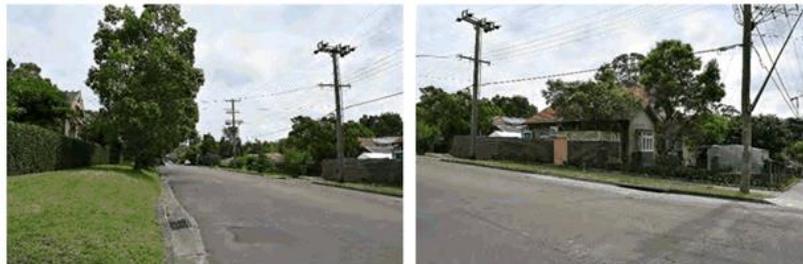

Figure 81: View looking west along Brigg Road from intersection with Essex Street. In the left image is a Heritage Item with the Essex Street HCA and in the right image is a Neutral building with the Essex Street HCA. From the left image, it can be seen that the dwelling located on the northern side of Brigg Road lay within their lots due to the topography of the area.

Figure 82: Recently constructed medium density residential development constructed at 18-22 Maida Road, view from intersection of Essex Street and Maida Road looking west (left) and view from 72 Essex Street looking west, with a small portion of the third storey of the 18-22 Maida Road development is visible in the background.

11.5 Individual Properties Changes

No recommendation has been made for the removal of any properties from either the Essex Street HCA or Rosebank Avenue HCA, thus no changes are needed to the current zoning and height limits of the existing controls. However, it has been recommended that four properties to be removed from the East Epping HCA, being 25 Pembroke Street, and 1, 3, and 3A Norfolk Road.

In order to provide a consistent transition between R4-High Density Residential Zone on Essex Street and Pembroke Street from further encroaching on the East Epping HCA, the removed properties from the East Epping HCA (25 25 Pembroke Street, and 1, 3, and 3A Norfolk Road), 5, 7 and 7A Norfolk Road (which share a driveway with 3 and 3A Norfolk Road) and the Late 20th Century development known as 'Rockleigh Park' are recommended to be rezoned as R3-Medium Density Residential Zone with a 12m height limit, in order to provide a smooth transition from the R2-Low Density Residential Zone of the HCA and the R4-High Density Residential Zone of Essex and Pembroke Streets. In addition, any new developments on these rezoned properties must sufficiently consider appropriate setbacks, deep soil planting and consideration of the impact upon the setting and curtilage of the East Epping HCA and nearby Heritage items. The recommendations already made in Section 11.2 should also be adequately addressed in any future development proposals.

The inclusion of 5, 7 and 7A Norfolk Road in the recommended R3-Medium Density Residential Zoning is suggested in order to ensure a consistent transitional zone between the boundary of the East Epping HCA and the R4-High Density Residential Zone on Essex Street. The properties located at 3, 3A, 5, 7 and 7A Norfolk Road all share the same driveway, however, currently only 3 and 3A Norfolk Road are located within the East Epping HCA. With the recommended removal of 3 and 3A Norfolk Road from the East Epping HCA, the opportunity is presented to ensure that a consistent approach to zoning and height limits is invoked over the properties which share the singular driveway from Norfolk Road, these properties being 3, 3A, 5, 7 and 7A Norfolk Road. All properties are currently within a R2-Low Density Residential Zone and are recommended to be rezoned to R3-Medium Density Residential Zoning to ease the transition between the R2-Low Density Residential Zone of the East Epping HCA and the R4-High Density Residential Zone on Essex Street.

In addition, the inclusion of all properties located within 'Rockleigh Park' in the recommended R3-Medium Density Residential Zoning is recommended due to the current R4-High Density Residential Zone not providing an adequate transition between the interface areas of the East Epping HCA and areas of R4 High Density Residential Zones. The current zoning effectively splits 'Rockleigh Park' in half, and is not considered appropriate for the current conditions of the properties which work homogeneously together as one estate of low density residential housing as displayed in Figures 84 and 85. Through the rezoning of 'Rockleigh Park' as R3, both the transition between R4 and the East Epping HCA will be minimised, whilst also maintaining the current cohesive form of 'Rockleigh Park'.

Figure 84: Views looking west (left) and east (right) along Rockleigh Way. The development is currently understood as one whole estate, wide a narrow roadway which links all properties of the estate together. The estate appears to have been developed in the mid 1990s and maintains a cohesive character, playing-off detailing from Federation period detailing of the surrounding Federation period homes within the East Epping area.

Figure 85: Entrance to 'Rockleigh Park' (left) and view looking east along Rockleigh Way (right)

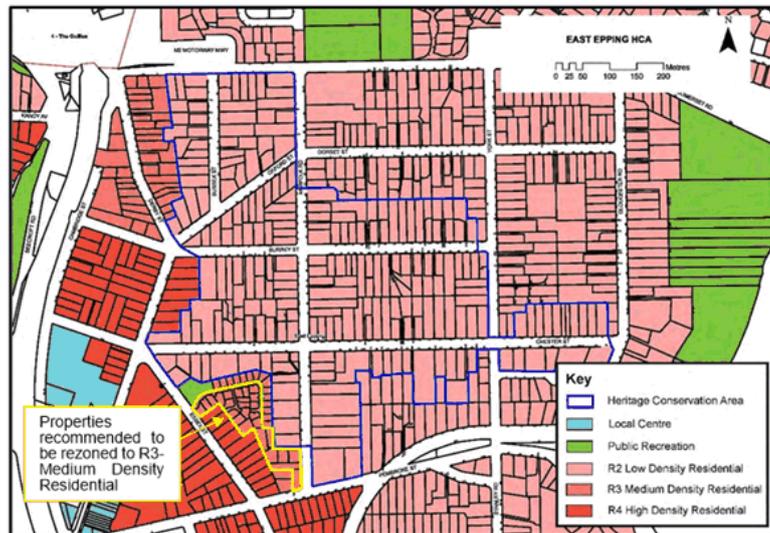

Figure 83: Recommended Land Zoning of properties removed from East Epping HCA (25 Pembroke Street, 1, 3 and 3A Norfolk Road), 5, 7 and 7A Norfolk Road and rezoning of Rockleigh Park to create a consistent transitional zone between the East Epping HCA and R4 High Density Residential Zone.

11.6 Recommended Updates to Planning Controls

Whilst a detailed review of all current planning controls relevant to heritage items and HCAs within the Epping Town Centre study area is beyond the scope of this study, this review has indicated there is some room for improvement in the current planning controls, other than those individual matters already addressed in the previous subsections. The following subsections make recommendations to the current planning controls.

11.6.1 Additional Prescriptive Measures

Specific additional prescriptive measures for each HCA are provided for in Section 9.3 of the Hornsby DCP. These provisions provide for prescriptive measures in relation to demolition, streetscape character, materials and finishes, fences and gates, utilities, garages and carports, driveways and subdivision.

As addressed in Section 10.0, the impact of high density residential development on some properties in the Essex Street and Rosebank Avenue HCAs have resulted in some properties being impacted upon through a lack of privacy from existing or future high density residential developments. For properties which are on a direct boundary line with R4 High Density

Residential Zone, additional provisions are recommended to be included in the 'Additional Prescriptive Measures' for Essex Street and Rosebank Avenue HCAs within Sections 9.3.13 and 9.3.14 respectively. The recommended provisions to be added is to allow for the construction of two storey additions to the rear of properties identified to be most affected by high density residential development as highlighted in Figures 86 and 87.

The current provisions contained within Section 9.3 of the Hornsby DCP 2013, in respect to additions to properties located within a heritage conservation area, allows for additions to properties to be made away from the street elevation and below the main ridge line. In order to assist in alleviating the impact of the high density residential developments, located behind the effected properties within the Rosebank Avenue and Essex Street HCA's, an intermediary two storey addition to the rear of properties would provide a sufficient barrier between the existing contributory dwellings in the HCAs and the high density residential development to the rear. Any addition to the rear of the properties highlighted in Figures 86 and 87, however, would still need to comply with the heritage provisions contained within the Hornsby DCP 2013, with particular attention to ensuring that the addition does not subdivide the site, does not reduce the contribution of the overall properties contribution to the respective HCA, will not remove mature trees or plantings and will not reduce the streetscape character of the area. The intervention of any addition to the rear of these properties must be sympathetic to the heritage significance of its respective HCA and any heritage item located within its vicinity.

Whilst this option may not be attainable on all sites highlighted in Figure 86 and 87, it does provide an option for some property owners to attain an increased level of amenity. Thus, it is recommended that the following 'Additional Prescriptive Measure' be added the existing Essex Street HCA Provisions and Rosebank Avenue HCA Provisions under Element - Streetscape Character, in Tables 9.3.13(a) and 9.3.14(a), respectively.

- Additional development in the rear of properties with direct interface to High and Medium Density Residential Zones can develop up to two storey additions, provided that the addition will not subdivide the site, reduce the contribution of the property to the HCA, will not remove mature trees or plantings and will not reduce the streetscape character of the area.

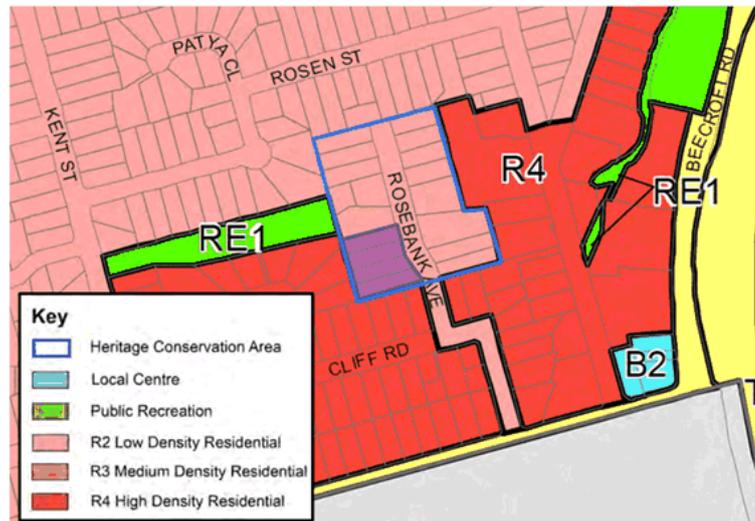

Figure 86: Rosebank Avenue HCA properties affected by high density residential development, of which the recommended provisions would apply, highlighted in purple (Source: Extract from Hornsby LEP 2013, Land Zoning Map 11)

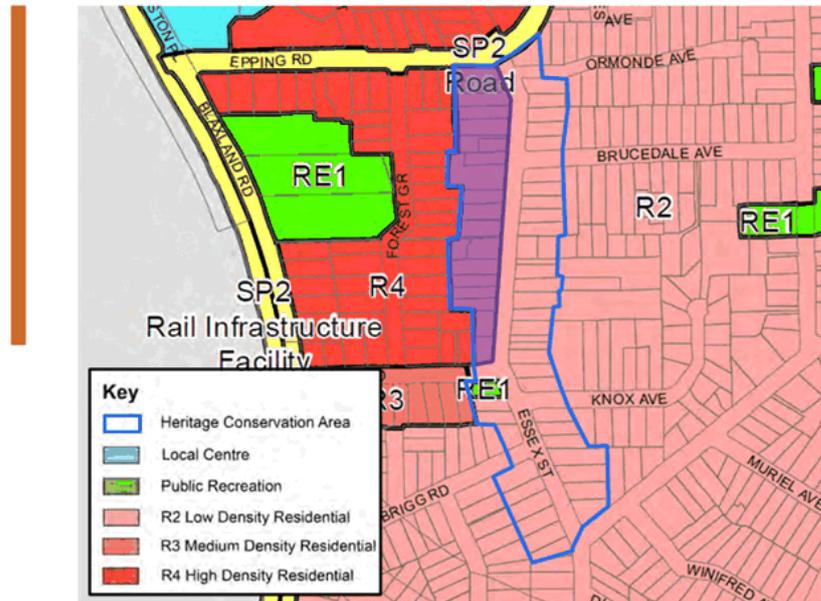

Figure 87: Essex Street HCA properties affected by high density residential development, of which the recommended provisions would apply, highlighted in purple (Source: Extract from Hornsby LEP 2013, Land Zoning Map 11)

11.6.2 Recording and Interpretation

Currently, there are no provisions within the Hornsby DCP 2013 for the preparation of an archival recording for heritage items or contributory buildings within a HCA to have an archival recording prepared prior to the major alterations and additions to a property or demolition of a property.

It is recommended that an archival photographic recording be prepared for all Heritage Items and Contributory buildings and any Neutral buildings which date from the Victorian, Federation, Inter War or Post War periods within the East Epping, Essex Street and Rosebank Avenue HCA's when major alterations and additions and/or demolition is proposed for the property. This also includes any major alterations and additions to significant gardens which significantly contribute to the streetscape character of any of the HCAs.

This recommendation is made in order to ensure that a historical record of changes to significant items and areas are collected and kept in the Council's archives for future reference and research purposes.

12. Conclusion and Key Recommendations of Heritage Conservation Area Review

As a result of in depth surveys and assessments of the HCAs within the Epping Town Centre, the following key recommendations are made as part of this heritage review study:

1. *Retain the current boundaries of the Essex Street and Rosebank Avenue Heritage Conservation Areas (Refer to Sections 10.2 and 10.3)*
 - Following reassessment of the Essex Street and Rosebank Avenue Heritage Conservation Areas, both areas were found to have maintained the significance and intactness established in previous studies. The impact of High and Medium Density Residential development at the interface areas with the Heritage Conservation Areas were not found to have a detrimental impact warranting removal of the Heritage Conservation Areas in part or in whole. Thus, both Heritage Conservation Areas are recommended to be retained in full.
2. *Adjust the south-west boundary of the East Epping Heritage Conservation Area (Refer to Section 10.1)*
 - It is recommended that 25 Pembroke Street, and 1, 3, and 3A Norfolk Road to be removed from the East Epping Heritage Conservation Area, and the boundaries of the HCA are adjusted accordingly.
3. *Retain individual heritage items requested for removal by property owners (Refer to Sections 10.1 and 10.2)*
 - 3 and 42 Essex Street have been reassessed for their heritage significance and contribution to their respective Heritage Conservation Area, East Epping and Essex Street respectively, and are recommended to retain their heritage listing under Schedule 5 of the Hornsby LEP 2013.
4. *Rezone removed properties from East Epping Heritage Conservation Area, 5, 7 and 7A Norfolk Road and identified properties within 'Rockleigh Park' to R3-Medium Density Residential with 12m height limit (Refer to Section 11.5)*
 - In order to provide a consistent transition between R4-High Density Residential development on Essex Street and Pembroke Street from further encroaching on the East Epping Heritage Conservation Area, the removed properties from the East Epping Heritage Conservation Area (25 Pembroke Street, and 1, 3, and 3A Essex Street), 5, 7 and 7A Norfolk Road (which share a driveway with 3 and 3A Norfolk Road) and the late 20th Century development known at 'Rockleigh Park' are recommended to be rezoned as R3-Medium Density Residential with a 12m height limit, in order to provide a smooth transition from the R2-Low Density Residential of the Heritage Conservation Area and the R4-High Density Residential area of Essex and Pembroke Streets.
5. *Changes to Design Interface Guidelines of the Hornsby DCP (Refer to Section 11.2.3)*
 - The current Design Interface Guidelines in Section 9.4.1 of the Hornsby DCP 2013 are considered to be a good framework for which to assess the impact of high and medium density residential developments which are located in the interface areas with Heritage Conservation Areas. However, Section 9.4.1 needs to be considered at least in relation to Sections 9.6.6 and 9.6.8. It is recommended that where R3 and R4 Zones interface with a Heritage Conservation Area or Heritage Item that a 10m setback, which is required for Chapman Avenue, should be implemented in order to aid in maintaining the context and setting of each Heritage Conservation Area and Item. In addition, sufficient deep soil planting between R3 and R4 and heritage conservation areas and items should be encouraged, as well as the retention of any mature trees which aid in screening the high or medium density development from the heritage conservation area or heritage item. Furthermore, an adequate assessment of the potential heritage impact on the Heritage

Conservation Area and/or Heritage item should be addressed for any future proposed development, to aid in the mitigation of likely heritage impacts.

6. *Maintain current 17.5m and 12m height limits of R4 High Density Residential Zone and R3 Medium Density Residential Zone respectively (Refer to Section 11.3)*

- To ensure that a sufficient transition between Heritage Conservation Areas are maintained and are not further adversely impacted upon through higher density development at interface areas, it is recommended that the current height limits for R4 and R3 Zones are maintained.

7. *Extend R3-Medium Density Residential Zone to Brigg Road and Rose Street (Refer to Section 11.4)*

- Recommendation to extend R3-Medium Density Residential Zone to the northern side of Brigg Road and to Rose Street, which will have an acceptable impact upon the current setting of the Essex Street HCA, provided that adequate consideration is given in regards to sufficient setback, deep soil planting and on the impact upon the setting and curtilage of the Essex Street HCA in any further development proposals, incorporating the recommendations provided in Section 11.2 of this study report.

8. *Additional Recommended Updates to Planning Controls (Refer to Section 11.6)*

- Include an additional prescriptive measure for Essex Street and Rosebank Avenue HCA Provisions for properties located on interface with R4-High Density Residential Zone, as follows:
 - i. Additional development in the rear of properties with direct interface to High and Medium Density Residential Zones can develop up to two storey additions, provided that the addition will not reduce the contribution of the property to the HCA, will not remove mature trees or plantings, and will not reduce the streetscape character of the area.
 - ii. In addition, it is recommended that a provision or Condition be included in the consents for an archival photographic recording to be prepared for all Heritage Items and Contributory buildings and any Neutral buildings which date from the Victorian., Federation, Inter War or Post War periods within the East Epping, Essex Street and Rosebank Avenue HCA's when major alterations and additions and/or demolition is proposed for the property.

9. *Assessment of significance of southern end of Essex Street HCA in future Heritage Review*

- Recommended that future heritage reviews, possibly as part of the new Local Environmental Plan to be developed for the City of Parramatta Council, consider assessing the southern end of the Essex Street HCA, for either extending the HCA's boundary, or for an arboricultural assessment to be undertaken for the possibility of listing the street trees as a landscape items.

10. *Retention or replacement of street trees in Rosebank Avenue due to stormwater drainage for Cliff Road*

- Recommended for the seven (7) street trees located on the western side of Rosebank Avenue identified to be impacted by the proposed stormwater drainage from Cliff Road to be maintained, or if this is not possible, that appropriate replacement trees be planted in the road reserve to ensure that the consistent street tree plantings of Rosebank Avenue are maintained.

13. Hornsby Heritage Review Stage 6 - Items for Review

13.1 Background

The Heritage Review Stage 6 - Items for Review is part of a process commenced in 1995 to review heritage listings in Schedule 5 of the Hornsby LEP 2013 (previously Schedule D of the Hornsby LEP 1994). The review process was expanded to allow a staged program to thoroughly review items, including further requests for inclusion or removal of items. Previous Heritage Reviews have been conducted since 1997, as follows:

- *Hornsby Shire Heritage Review Stage 1 - Review of heritage items and correction of anomalies within existing listings* (1997);
- *Hornsby Shire Heritage Review Stage 2 - Review of heritage items and correction of anomalies within existing listings* (1998);
- *Hornsby Shire Heritage Review Stage 3 - Review of Heritage Items* (2004) prepared by Tropman & Tropman Architects;
- *Hornsby Shire Heritage Review Stage 4 - Review of heritage items, heritage listed trees and correction of anomalies within existing listings* (2008) prepared by LandArc Pty Limited in association with Patrick O'Carrigan + Partners; and
- *Hornsby Shire Heritage Review Stage 5* - prepared by Godden Mackay and Logan.

This section of the report provides for Stage 6 of the Heritage Review, and includes heritage listed dwellings, gardens and woodlands. A number of items had been flagged by Hornsby Council, property owners and community members for either removal from Schedule 5 or for inclusion on Schedule 5. A number of other heritage items' inventory forms need to be updated or inventory forms are completely missing. In addition to these requests, further heritage items have been requested by Council to be reviewed as a result of the recent changes in zoning, where they intersect with R4-High Density Residential Zones.

13.2 Objectives

The Heritage Review Stage 6 - Items for Review, has the following objectives:

- Investigate the list of matters identified by Hornsby Shire Council for Epping that were scheduled for review under the next Hornsby Council Heritage Review – Stage 6. This includes:
 - a) removal heritage items.
 - b) amend anomalies in details of heritage listings.
 - c) review isolated heritage items in the R4 High Density Residential Zone.
 - d) review details of heritage listings.
 - e) investigate missing inventory sheets for existing items and complete required information.

13.3 Methodology

This Heritage Review has been prepared in accordance with the best practice heritage standards for the assessment of heritage significance and heritage studies established by the NSW Heritage Council, the then NSW Heritage Office and NSW Department of Urban Affairs and Planning, as set out in the NSW *Heritage Manual*.

It has also been prepared in accordance with national best practice standards for heritage assessment contained in the Burra Charter (Australia ICOMOS, 2013). The Burra Charter defines significance as the:

"Aesthetic, historic, scientific, social or spiritual value for past, present or future generations. Cultural significance is embodied in the place itself, its fabric, setting, use,

associations, meanings, records, related places and related objects. Places may have a range of values for different individuals or groups."

To determine whether sites have heritage significance and therefore warrant heritage listing, each site has been assessed against the seven NSW criteria of Assessing Heritage Significance as set out in the NSW *Heritage Manual*. The seven criteria for heritage significance include:

Criterion (a): An item is important in the course, or pattern, of NSW's cultural or natural history (or the cultural or natural history of the local area);

Criterion (b): An item has strong or special association with the life or works of a person, or group of persons, of importance in NSW's cultural or natural history (or the cultural or natural history of the local area);

Criterion (c): An item is important in demonstrating aesthetic characteristics and/or a high degree of creative or technical achievement in NSW (or the local area);

Criterion (d): An item has strong or special association with a particular community or cultural group in NSW (or the local area) for social, cultural or spiritual reasons;

Criterion (e): An item has potential to yield information that will contribute to an understanding of NSW's cultural or natural history (or the culture or natural history of the local area);

Criterion (f): An item possesses uncommon, rare or endangered aspects of NSW's cultural or natural history (or the cultural or natural history of the local area);

Criterion (g): An item is important in demonstrating the principal characteristics of a class of NSW's cultural or natural places or environments.

The NSW *Heritage Manual* guidelines establish that a site warrants heritage listing when it fulfils one or more of these seven criteria of local heritage significance. The assessment process is the same for individual items, conservation areas and archaeological sites.

All buildings recommended for heritage listing have been categorised according to their architectural style and detailing in accordance with Apperly, R. Irving, R, Reynolds, P. 1989. *A Pictorial Guide to Identifying Australian Architecture: Styles and terms from 1788 to the present*. Harper Collins Publishers; Australia.

13.4 Inventory Forms

The format for the Inventory Forms used are in Microsoft Word format, based upon the State Heritage Inventory form template. Each inventory form compiles and summarises all the information about each item, including but not limited to: heritage significance, location, description of overall site components and a brief history for each of the items to support their listing recommendations.

The Microsoft Word format Inventory Forms can be readily transferred to the SHI Microsoft Access Database format by the Council in the future. All inventory forms created or updated within this Heritage Review are provided in Appendix A.

13.5 Items for Review

The following tables summarise the outcomes of the individual property assessments and recommendations. In addition, inventory forms have been either updated or created for property either missing information or for those which have been recommended for listing. The Inventory forms are provided in Appendix A.

13.5.1 Requests for Removal of Heritage Listing

The following properties have been requested for removal and have been re-assessed to determine if removal is warranted or not.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.1A	184 Ray Road, Epping	House		+	Retain on LEP. Inventory Form has been prepared in Appendix A.

13.5.2 Amend Anomalies in Details of Heritage Listings

The following property's zoning has been requested to be investigated.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
N/A	73A Oxford Street Epping	Federation Queen Anne house		Council staff Site is in HCA which is zoned R2, however, this property is zoned R3. Appears to be an anomaly as on the corner of HCA. Potential for redevelopment on heritage grounds is nil due to significance and integrity of the item. The zoning to manage this significance should reflect HCA R2 zoning. It is not an isolated site.	Recommend to change R3 zoning to R2 to reflect the East Epping HCA zoning of R2.

13.5.3 Request for Listing of New Items

The following properties have been requested to be listed as heritage items and have been assessed to determine if they warrant listing or not.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
N/A	7 Dorset Street, East Epping	House		Tara Bennett, owner of 5 Dorset Street. D01672179 Request in May 2011 D02427814 Second request in August 2013	Not recommended for listing on LEP. Simple timber weatherboard Federation Cottage with some external detailing retained. More intact examples of similar period dwellings exist within the East Epping area, which reflect the aesthetic qualities of the style better.
13.5.3A	50 Dorset Street, Epping	House		Council Resolution D02762872. Included on Exhibition copy of proposed heritage items. Recommended for listing in the Epping Town Centre Heritage Review 2014	Recommended for listing on LEP. Inventory Form has been prepared in Appendix A.

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.3B	86 Essex Street, Epping	House		Council Resolution Included on Exhibition copy of proposed heritage items in the Epping UAP. Recommended for listing in the Epping Town Centre Review 2014	Recommended for listing on LEP. Inventory Form has been prepared in Appendix A
N/A	3 Norfolk Road, Epping	House		Council Resolution Included on Exhibition copy of proposed heritage items in the Epping UAP	Not recommended for listing on LEP. Dwelling is a modern 21st century construction and does not meet any criteria to warrant listing. An Inventory form has not been prepared for this dwelling

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.3C	83 Norfolk Road, Epping	House		Council Resolution Included on Exhibition copy of proposed heritage items in the Epping UAP	Recommended for listing on LEP. Inventory Form has been prepared in Appendix A.
N/A	3 York Street, Epping	House		Council Resolution Nomination through East Epping HCA inspections	Not recommended for listing on LEP. Single storey timber weatherboard Federation cottage. Appears to have undergone substantial modifications to original fabric. New corrugated roof, windows appear to mimic original windows. Timber balustrade all new. Internal assessment of property would need to be undertaken to determine if any original fabric remains. An Inventory form has not been prepared for this dwelling.

13.5.4 Review Isolated Items in Housing Strategy Zone (R4) High Density

The following properties were identified to be 'isolated items' and were requested to be investigated determine if they their listing should be maintained.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.4A	25 Ray Road, Epping	Woodlands		Council staff Heritage item in R4 Zone	Retain on LEP. Single storey dwelling is located on high point of street, lessening the impact of the five storey development to the south and west of the item. Heritage Item was maintained and restored as part of recent development known as 'Woodlands' at 23-27 Ray Road. Listing has been updated on Inventory Form in Appendix A
N/A	6 Essex Street, Epping	House (Scout Hall)		Council Resolution Council Resolution 19/12/12 in response to public exhibition of the draft Hornsby LEP to review potential heritage	Retain on LEP and retain R4 High Density Residential zoning. Directly to the south of the site is Arden Anglican School, whilst directly to the north is a recent three storey developments. The significance of the Scout Hall is retained despite the R4 High Density Residential Zoning. Listing was updated in 2013 as part of the UAP and is not considered to need further update.

13.5.5 Review of Details of Heritage Listings

The following properties were requested to be reviewed, in whole and in part, and for their Inventory Forms to be updated.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.5A	27A Chester Street, Epping	Garden		Heritage Review Stage 5 House identified to be investigated for heritage listing.	Retain garden on LEP. Inter War Bungalow which dated to the development of the heritage listed garden was demolished as part of DA/1226/2011. Current house on site does not warrant heritage listing. Listing has been updated on Inventory Form in Appendix A.
13.5.5B	78 Kent Street, Epping	Slab hut		Heritage Review Stage 5 House identified to be investigated for heritage listing.	Retain on LEP. Access to slab hut was not possible during site visit due to being located in the rear yard of 78 Kent Street. House at front of property blocking view of slab hut but glimpses of the hut have been observed and it appears in the recent aerial maps. Listing has been updated on Inventory Form in Appendix A.

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.5C	142-144 Ray Road, Epping	House & Garden		Council staff Australian Bottle trees to be included in listing	Retain on LEP and add garden to listing. At least two Bottle trees were identified on the site, along with many mature trees, which appear to have been planted early in the house's history, at least before 1943. It is recommended that an arboricultural assessment be undertaken on the existing mature trees on the eastern side of the property in order to determine the condition and significance of the existing trees. Listing has been updated on Inventory Form in Appendix A.
13.5.5D	35-37 Stanley Road, Epping	Tallwood Lodge		Council staff Listed in HR1 - No photo	Retain on LEP Listing has been updated on Inventory Form in Appendix A

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.5E	9 Sussex Street, Epping	House		Council staff Listed in HS – 1993. Currently 3 houses (9, 11 and 15 Sussex Street) on one inventory sheet	Retain on LEP All houses are listed separately under the LEP and their relative Inventory Forms have been updated to individually address each property. Updated Inventory Forms in Appendix A.
13.5.5F	11 Sussex Street, Epping	House		Council staff Listed in HS – 1993. Currently 3 houses (9, 11 and 15 Sussex Street) on one inventory sheet	Retain on LEP All houses are listed separately under the LEP and their relative Inventory Forms have been updated to individually address each property. Updated Inventory Forms in Appendix A.

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.5G	15 Sussex Street, Epping	House		Council staff Listed in HS – 1993. Currently 3 houses (9, 11 and 15 Sussex Street) on one inventory sheet	Retain on LEP All houses are listed separately under the LEP and their relative Inventory Forms have been updated to individually address each property. Updated Inventory Forms in Appendix A.
13.5.5H	20 York Street, Epping	House		Council staff Listed in HR1 - No photo and no description	Retain on LEP Listing has been updated on Inventory Form in Appendix A.

13.5.6 Missing Inventory Sheets for Existing Heritage Items

The following listed items were recorded as missing information or photographs from their relative inventory forms. All inventory forms have been updated and provided in Appendix A.

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.6A	Beecroft Road near southern end of Old Beecroft Road, Epping	Stone causeway over Devlins Creek		Council Staff No information on Inventory Sheet. Listed on RTA Heritage Register	Retain on LEP Listing was last updated in 2013 and has been updated with recent images. The Inventory Form in contained in Appendix A
13.5.6B	21 Chester Street, Epping	House and Garden		Council staff Listed in 1994 LEP. Inventory Sheet missing	Retain on LEP Listing has been updated on Inventory Form in Appendix A.

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Appendix A Reference	Street Address	Item	Item Image	Issue/Information	Review Recommendation
13.5.6C	23 Chester Street, Epping	House and Garden		Council staff Listed in 1994 LEP. Inventory Sheet missing.	Retain on LEP Listing has been updated on Inventory Form in Appendix A.
13.5.6D	9 Norfolk Road, Epping	House and Garden		Council staff House listed in HR2. Inventory Sheet for house missing	Retain on LEP The garden which is part of the heritage listing is currently undergoing major changes. It appears all mature trees mentioned in the description of the site have been maintained. Recommend for investigation by a Heritage Consultant who specialises in gardens and landscapes. Listing has been updated on Inventory Form in Appendix A.

13.6 Summary and Recommendations of Hornsby Heritage Review Stage 6

The significance, intactness and merit of each property has been assessed as far as possible from the available information and the availability of access to properties. Due to the time constraints of this Heritage Review, properties which needed a follow up site inspection due to limited views of heritage items from street view were not able to be conducted. Where this has occurred, a recommendation has been made for a site inspection to be undertaken at a later date. For those properties recommended to be retained or added to the Hornsby LEP, the Inventory Sheets have been updated or created for each of these properties. All inventory sheets updated or created are included in Appendix A.

In summary, the following resultant recommendations and updates were made as part of Stage 6 of the Hornsby Council Heritage Review:

13.7 Requests for Removal of Heritage Listing Summary

The one (1) request for removal of a Heritage Item, 184 Ray Road, has been recommended to be retained and the Inventory Sheet for the item has been updated. The recommendation is as follows:

Street Address	Item	Recommendations	Appendix A Reference
184 Ray Road	House	Retain heritage listing	13.5.1A

13.8 Amend Anomalies in Details of Heritage Listings Summary

One (1) Heritage Item, 73A Oxford Street, was recommended to be changed from R3-Medium Density Residential Zone to R2-Low Density Residential Zone to reflect the East Epping HCA zoning of R2. The recommendation is as follows:

Street Address	Item	Recommendations	Appendix A Reference
73A Oxford Street	Federation Queen Anne house	Recommend to change R3 zoning to R2 to reflect the East Epping HCA zoning of R2	N/A

13.9 Request for Listing of New Items Summary

Of the six (6) properties recommended for heritage listing under the Hornsby LEP 2013, three (3) properties were recommended for heritage listing and three (3) were not recommended for heritage listing. Inventory Sheets for the three recommended heritage items were created. The recommendations in summary are as follows.

Street Address	Item	Recommendations	Appendix A Reference
7 Dorset Street	House	Not recommended for listing	N/A
50 Dorset Street	House	Recommended for listing	13.5.3A
86 Essex Street, Epping	House	Recommended for listing	13.5.3B
3 Norfolk Road	House	Not recommended for listing	N/A
83 Norfolk Road	House	Recommended for listing	13.5.3C
3 York Street	House	Not recommended for listing	N/A

13.10 Review Isolated Items in Housing Strategy Zone (R4) High Density Summary

Of the two (2) Heritage Items which were identified as isolated items in R4 high Density Residential Zones, both Heritage Items were recommended to be retained and the Inventory Sheet for each item were updated to reflect their current condition. In summary, the recommendation were as follows:

Street Address	Item	Recommendations	Appendix A Reference
25 Ray Road	Woodlands	Retain heritage listing.	13.5.4A
6 Essex Street	House (Scout Hall)	Retain heritage listing and retain R4-High Density Residential Zone	N/A

13.11 Review Details of Heritage Listing Summary

Eight (8) Heritage Items required various details be reviewed. All Inventory Sheets were updated for each of the eight (8) items. Two (2) Heritage Items will require further investigation and follow up, due to needing expert advice or access to the site. All Inventory Sheets for these Heritage Items were updated to reflect their current condition. In summary, the recommendations and updates to Heritage Items were as follows:

Street Address	Item	Recommendations	Appendix A Reference
27A Chester Street	Garden	Retain the heritage listing of the Garden. House is not recommended for listing, as recently was built. Original Inter War Bungalow demolished as part of DA/1226/2011.	13.5.5A
78 Kent Street	Slab Hut	Retain heritage listing. Further investigation will be required at a later date to gain access to the site to acquire current photographs of the slab hut.	13.5.5B
142-144 Ray Road	House & Garden	Retain the House's heritage listing and add the Garden to the listing. It is recommended that an arboricultural assessment be undertaken on the existing mature trees on the eastern side of the property in order to determine the condition and significance of the existing trees.	13.5.5C
35-37 Stanley Road	"Tallwood Lodge"	Retain heritage listing	13.5.5D
9 Sussex Street	House	Retain heritage listing	13.5.5E
11 Sussex Street	House	Retain heritage listing	13.5.5F
15 Sussex Street	House	Retain heritage listing	13.5.5G
20 York Street	House	Retain heritage listing	13.5.5H

13.12 Missing Inventory Sheets for Existing Heritage Items Summary

Four (4) Heritage Items were missing Inventory Sheets. All four (4) Heritage Items Inventory Sheets were either located or created, with up to date photographs. One Heritage Item was recommended for investigation by a Heritage Consultant who specialises in garden and landscapes.

Street Address	Item	Recommendations	Appendix A Reference
Beecroft Road near southern end of Old Beecroft Road	Stone causeway over Devlins Creek	Retain heritage listing. Existing Inventory Sheet located dating to 2013. Inventory Sheet updated to reflect current condition.	13.5.6A
21 Chester Street	House and Garden	Retain heritage listing	13.5.6B
23 Chester Street	House and Garden	Retain heritage listing	13.5.6C
9 Norfolk Road	House and Garden	Retain heritage listing. Recommended for investigation by a Heritage Consultant who specialises in gardens and landscapes.	13.5.6D

Item 11.3

LEADING

ITEM NUMBER	11.3
SUBJECT	Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2
REFERENCE	F2017/00210 - D05111630
REPORT OF	Snr Project Officer

PURPOSE:

The purpose of this report is twofold: to detail the feedback received from submissions on the Epping Planning Review Discussion Paper exhibited from 21 June and 19 July 2017; and to recommend principles to guide Stage 2 of the Epping Planning Review.

RECOMMENDATION

- (a) **That** Council receive and note the submissions made on the Epping Planning Review Discussion Paper.
- (b) **That** the recommended principles, as identified within this report and contained within **Attachment 6** be endorsed for the purposes of guiding Stage 2 of the Epping Planning Review.
- (c) **That** Council Officers:
- 1 Brief the incoming Councillors on the Epping Planning Review process to date including the endorsed principles to confirm the future planning direction for Epping as part of progressing Stage 2 of the project, and
 - 2 That following the above briefing, a further report be submitted to Council recommending the commencement of Stage 2 of the Epping Planning Review which will involve preparing new planning controls including:
 - 2.1 A planning proposal to amend both the *PLEP 2011* and *HLEP 2013*
 - 2.2 A development control plan amendment to amend PDCP 2011 and HDCP 2013
 - 2.3 Amendments to relevant Contributions Plans and public domain plans where relevant.
- (d) **That** the recommendations contained within **Attachment 5** detailing the outcomes of the Stage 6 Heritage Review be endorsed.
- (e) **That** Council write to the community thanking them for their feedback and advising them on the outcome of Stage 1 Review and next steps
- (f) **Further, that** Council write to the Minister for Planning, Greater Sydney Commission, Department of Planning and Environment, Transport for NSW and the Roads and Maritime Services to provide an update on the project and outline of next steps.

BACKGROUND

- 878 -

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

1. In March 2014, new planning controls for the Epping Town Centre and surrounds came into effect as a result of the Department of Planning and Environment's (DPE) Priority Precinct process. This process resulted in increased building heights and density controls within Epping Town Centre and surrounds which at the time was split between the former Parramatta City Council (western side of the train line) and former Hornsby Shire Council (eastern side of the train line). This process also saw the creation of three new Heritage Conservation Areas (on the former Hornsby Council side) – Rosebank Avenue, East Epping and Essex Street HCA.
2. On 12 May 2016, Council amalgamations saw the Epping Town Centre and immediate surrounds fall wholly within a new jurisdiction - the City of Parramatta Council. Prior to this, the Epping Town Centre had been split between the former Parramatta City Council (PCC) to the west and the former Hornsby Shire Council to the north and east. This historic dual structure has resulted in a complex planning control framework comprising of:
 - a. two local environmental plans (*Parramatta Local Environmental Plan 2011* and *Hornsby Local Environmental Plan 2013*);
 - b. two development control plans (*Parramatta Development Control Plan 2011* and *Hornsby Development Control Plan 2013*);
 - c. three development contributions plans with different contributions rates across each development type (a Section 94A plan applying to the former PCC area, and a Section 94 plan and Section 94A Plan applying to the former Hornsby Shire area); and
 - d. one public domain plan for the former Hornsby Shire Council area and public domain guidelines for the former PCC side.
3. The amalgamation has not changed or unified the planning controls, thus an exercise of bringing all of the controls into a single framework is required to deliver consistency. The objective of unifying the controls is to have one LEP, one DCP, one development contributions plan and one public domain plan applying to the entire town centre and immediate surrounds.
4. The Epping Planning Review project is identified in Council's *Operational Plan 2016/2017* under Action 2.4 "Review of Epping Town Centre Planning Controls". The Action involves undertaking a review of the planning for the Epping Town Centre, in conjunction with the Department of Planning and Environment (DP&E). Council's *Operational Plan 2017/2018* sees Council continuing to work with stakeholders on key precincts such as Epping. The *Draft West Central District Plan* also foresees that Council will progress the delivery of the Epping Town Centre urban renewal with the Greater Sydney Commission and the DP&E to ensure that the centre is considered as an integrated whole.
5. The study area for the Epping Planning Review is based on the DP&E's Urban Activation Precinct boundary and is illustrated in **Figure 1**. However, in the case of social infrastructure, the study boundary extends beyond the boundary in **Figure 1** so as to incorporate all the social infrastructure that Epping Town Centre residents rely on, which generally, is the Epping suburb.

- 879 -

Council 14 August 2017

Item 11.3

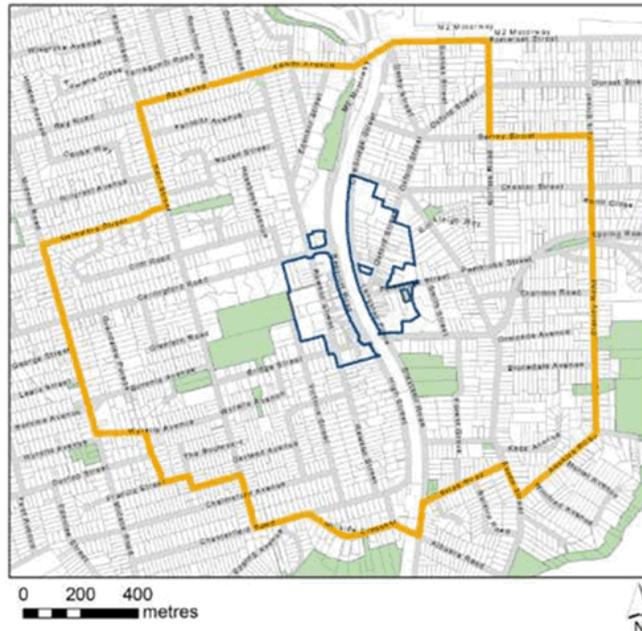

Figure 1 - Epping Planning Review Study area

6. The Epping Planning Review project involves two stages, the scope of which has been to address the unintended consequences of the planning control amendments brought into effect in March 2014 as well as allowing Council to manage current (formal and preliminary) Planning Proposals seeking growth within the Town Centre. It is also intended to allow the City of Parramatta Council to progress resolutions made by the former Hornsby Shire Council on specific heritage matters. Stage 1 of the Epping Planning Review has involved:
 - a. A public launch in mid December 2016.
 - b. Preparation of technical studies on Heritage, Social Infrastructure, Commercial Floorspace and Traffic (Interim) by consultants as well urban design and planning analysis which was undertaken by Council.
 - c. Pre-Phase 1 Community Consultation commencing in December 2016; this consultation is summarised in Chapter 5.0 Community Engagement of the Discussion Paper (**Attachment 1**) and involved Council Officer attendance at various community events such as the Australia Day and Lunar New Year to inform the community of the review being undertaken.
 - d. Phase 1 Community Consultation involved consultations that informed the technical studies and Discussion Paper and was undertaken in conjunction with Straight Talk who were engaged to facilitate the consultation events. The feedback received from the Phase 1 consultations was contained in Straight Talk's Phase 1 Community Consultation report which formed part of the supporting information to the Discussion Paper in **Attachment 1**.
 - e. The preparation of the Epping Planning Review Discussion Paper (informed by points b, c and d, above) for public exhibition.

- 880 -

Council 14 August 2017

Item 11.3

- f. Phase 2 Community Consultation carried out during the public exhibition of the Discussion Paper with a series of Community Workshop Sessions.
- 7. **Figure 2** below illustrates the major structural components of Stage 1 of the Epping Planning Review.

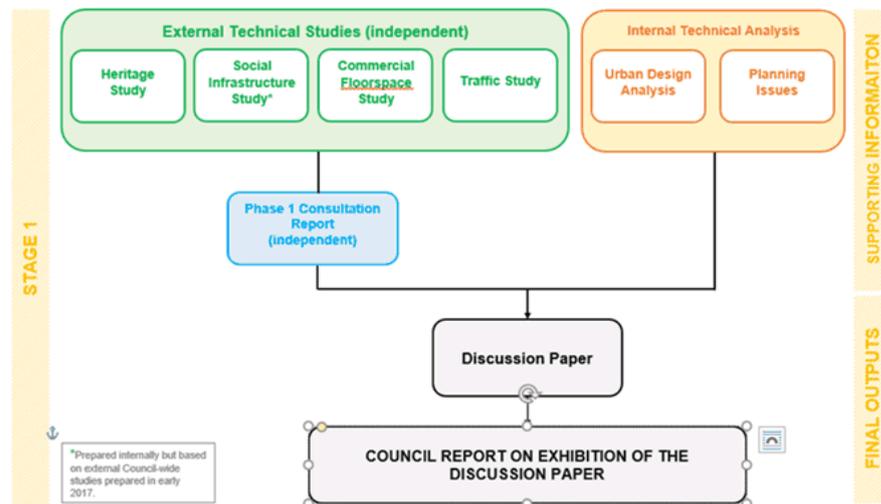

Figure 2 - Stage 1 of the Epping Planning Review

- 8. This Council report constitutes the last major milestone of Stage 1 of the Epping Planning Review and reports on the feedback received from the Phase 2 community consultations and Discussion Paper exhibition process.
- 9. Stage 2 of the Epping Planning Review will involve implementing changes to planning controls (zoning, heights, FSRs) and unifying the planning controls to create a single set of controls for the town centre. This means amending the *Parramatta LEP (PLEP) 2011* and the *Hornsby LEP (HLEP) 2013*, Parramatta DCP and Hornsby DCP, and relevant development contributions plans and public domain plans to create a single set of planning controls.
- 10. It is noted that the principles determined in Stage 1 also impact on other policy areas of Council (outside of the changes to planning controls covered in Stage 2) and that the findings and analysis carried out to date will be used to inform further work on these areas (ie. social infrastructure) as part of a separate process.

PUBLIC EXHIBITION OF DISCUSSION PAPER

- 11. The Epping Planning Review Discussion Paper (**Attachment 1**) and supporting studies were publicly exhibited from Wednesday, 21 June to Wednesday, 19 July 2016.
- 12. The Discussion Paper contained 32 questions, of which:
 - a. 4 questions addressed heritage interface issues;
 - b. 9 questions addressed commercial floorspace issues;

Council 14 August 2017

Item 11.3

- c. 11 questions addressed social infrastructure issues;
 - d. 2 questions addressed public domain issues; and
 - e. 6 questions addressed traffic and transport issues.
13. The context around the questions are detailed in the Discussion Paper.
14. Council has specifically sought responses to the questions to help guide the future direction of Stage 2 of the Epping Planning Review. As such this report focuses on the community feedback raised in relation to the questions.
15. It must also be noted that comments/feedback were also provided outside of the questions and this is also discussed in this report.

Phase 2 Community Engagement

16. Phase 2 community engagement involved a series of Community Workshop sessions which presented the findings of the technical studies and Discussion Paper. Feedback was also sought on the options and the questions.
17. Over 750 participant entries were recorded across all engagement activities, which incorporated:
- a. Three evening sessions held on:
 - i. Social Infrastructure and commercial floor space (3 July 2017),
 - ii. Heritage (5 July 2017), and
 - iii. Traffic (12 July 2017).

These were held at the St Albans Anglican Church Main Hall in the Epping Town Centre.
 - b. Two evening sessions for Epping's two largest culturally and linguistically diverse (CALD) communities:
 - i. A session for the Chinese community was held on 10 July 2017,
 - ii. A session for the Korean community was held on 17 July 2017.

These were held at the Epping Creative Centre.
18. All sessions were facilitated by Straight Talk, a consultancy commissioned to independently facilitate and record the feedback from each session.
19. These Phase 2 consultations are summarised in the *Epping Town Centre Review: Phase two – Exhibition period consultation* (provided at **Attachment 2**).

Site visits

20. Three site visits were undertaken by Council Officers and the Administrator at the request of residents who raised concerns about the impacts of current development in their areas. Site visits were undertaken at the following locations:
- a. Rosebank Avenue.
 - b. Eastern side of Essex Street, within the Essex Street HCA.
 - c. Norfolk Street in the vicinity of Pembroke Street.

Council 14 August 2017

Item 11.3

21. The purpose of the site visits was to listen to the concerns raised by residents with regard to the findings of the Discussion Paper and assist them in informing their submission.

Developer Consultation

22. On 30 June 2017, Council Officers hosted an Information Session for the applicants of the Austino Planning Proposal (adjacent to Forest Park) and the two Preliminary planning proposals at Rawson Street and Beecroft Road.
23. The purpose of this consultation was to provide an update to the applicants on the status of the Epping Planning Review project, in order to enable them to prepare a submission.

PROJECT STEERING GROUP

24. To ensure State agency engagement on the recommendations of the Epping Planning Review process, at the commencement of the project, Council established the Epping Planning Review State Agency Steering Group.
25. The Steering Group comprises representation from the Greater Sydney Commission, the Department of Planning and Environment, Transport for NSW and Roads and Maritime Services and staff of City of Parramatta.
26. To date, the Steering Group has met on three occasions to discuss issues relating to the review as well as oversee the progress of the Discussion Paper.

COMMUNITY FEEDBACK - INTRODUCTION

Submissions

27. Council received over 300 individual pieces of correspondence in response to the exhibition. Within this correspondence, there were several submitters that made multi-part submissions, as well as a few submissions made on behalf of small groups of residents. These factors meant that the total number of submitters was over 260.
28. The submissions varied broadly in scope in terms of their response to the 32 questions posed in the Discussion Paper. The majority of submissions (about 90%) directly answered questions posed in the Discussion Paper. Of these, about one third of submitters focused on one question, about one third of submitters discussed 2-5 questions, and about one third addressed 6 or more questions. About 12% of submitters addressed 20 or more questions.
29. **Figure 3** below demonstrates the frequency of response to the 32 questions.
30. As demonstrated in **Figure 3** there was a high level of response to each of the questions posed (minimum 24 responses; maximum 131 responses). The average number of responses to each question was 50, for a total of over 1,600 individual answers across all of the questions. The four questions attracting the highest frequency of responses were 9b (relating to the purchase of the former Bowling Club site), 9k (relating to future use of the Dence Park Aquatic Centre), 9a (relating to expanding parks ahead of creating new parks), and 11a (relating to delaying processing of planning proposals until the Traffic Study is complete); each of these four questions received over 100 responses.

Council 14 August 2017

Item 11.3

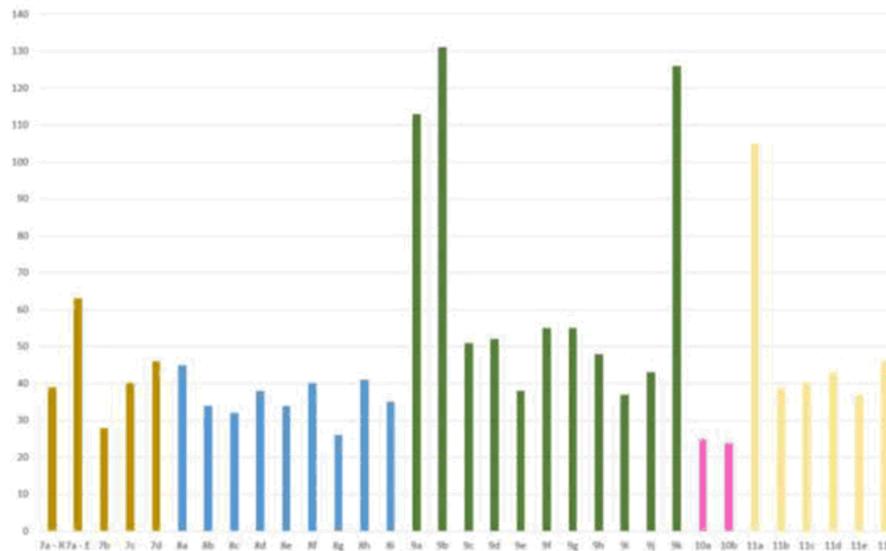

Figure 3 - Graph showing responses to the questions

- 31. **Attachment 3** provides a detailed summary of the submissions received in response to each question, and further sections of this report respond to this analysis on a question-by-question basis. Many respondents provided commentary outside of the questions posed, but which still broadly related to the five themes in the Discussion Paper (Heritage, Commercial Floor Space, Social Infrastructure, Public Domain and Traffic/Transport). This commentary is also summarised in **Attachment 3** on a thematic basis. Analysis of this feedback is also considered within this report.
- 32. Many respondents provided commentary outside of the questions and themes of the Discussion Paper. Council officers' analysis of this commentary is detailed in **Attachment 4** (General Comments). Analysis of this feedback is also considered within this report.

Community Workshop Sessions

- 33. The Community Workshop sessions (discussed above in 'Phase 2 Community Engagement') were a major element of the Phase 2 Community Engagement process and have been summarised in Straight Talk's *Epping Town Centre Review: Phase two – Exhibition period consultation* which forms **Attachment 2** to this report.
- 34. Generally, there are strong similarities with the feedback from the community submission process. However, any differences in views between submissions and feedback received directly from the community workshop sessions are explained in each of the chapter sections below.

HERITAGE CHAPTER

- 35. Chapter 7.0 of the Discussion Paper responds to the recommendations made within City Plan Services' *Epping Town Centre (East) Heritage Review* ("Heritage Review") as well as feedback received from residents during the Phase 1 consultations held in May this year.

Council 14 August 2017

Item 11.3

36. The sub-sections below summarise the responses to the Discussion Paper's four questions (ie. 7a, 7b, 7c and 7d) which pertain to Rosebank Avenue and Essex Street Heritage Conservation Areas (HCAs), Rockleigh Way, certain properties at Norfolk Road and Pembroke Street and the Rose Street Precinct.

Rosebank Avenue HCA

37. Until March 2014, the Rosebank Avenue area and surrounds were zoned R2 Low Density Residential Zone. However, new planning controls which came into effect in March 2014 by way of the Department of Planning and Environment's (DP&E's) Urban Activation Precinct process introduced the Rosebank Avenue HCA and introduced the R4 High Density Residential Zone to its south eastern, southern and eastern borders. The R4 High Density Residential Zone currently permits 5 storey residential flat buildings.
38. The Rosebank HCA and surrounding land zonings in *HLEP 2013* are illustrated in **Figure 4**, below.

Figure 4 - Rosebank Avenue HCA (hashed) and current zoning

39. Two heritage items are situated midpoint within the HCA, at No.s 9 and 10 Rosebank Avenue (refer to **Figure 5** below). These two sites mark the midpoint on either side of the HCA.
40. The street runs in a north/south direction with most properties fronting the street in an east or west direction. These lots are relatively large. However, No.23 Rosebank Avenue is the only property that fronts the street in a north/south direction. This lot is also much smaller in size and is flanked by larger lots that have frontage to Rosen Street. It therefore, has limited redevelopment opportunity on its own.
41. The Heritage Review assessed the heritage value of the HCA and has recommended the retention of the Rosebank Avenue HCA. However, this study only looks at the heritage factors and does not address the land use conflicts occurring at the interface at the rear of some of the properties within the Rosebank Avenue HCA.
42. A strong residential market has seen many of the R4 zoned sites be redeveloped for 5 storey residential flat buildings. This has created a conflict in land use that sees 5 storey residential flat buildings overlooking single and two

Council 14 August 2017

Item 11.3

storey low density residential development which is significantly impacting on the privacy and amenity of the Rosebank Avenue residents, particularly those at No.s 1-7, and 2-8 Rosebank Avenue.

43. Section 7.4.1 of the Discussion Paper presents 7 options to resolve interface issues at the Rosebank Avenue HCA (as well as the Essex Street HCA which is discussed in the section below). The options range from "Maintain the HCA" to presenting an option that would permit "3 storey residential flat building" redevelopment and involve the removal of the HCA notation in the *HLEP 2013*.
44. Council Officers recommend three options (Options 4, 5 and 6) for the Rosebank Avenue HCA all of which involve:
 - a. Removal of the HCA affectation in *HLEP 2013*; and
 - b. Planning controls that permit demolition of the existing housing and two storey redevelopment comprising: (1) Dual Occupancy (side by side); (2) Town Houses; or (3) Manor home, (with the exception of the two heritage items).
45. With the adjacent creek (zoned RE1 Public Open Space) and the two heritage items sitting midway in the precinct, the Discussion Paper noted that further analysis be undertaken to assess how *different options that might be applied to different parts of the HCA* due to the fact that the interface issues primarily affect the southern properties in Rosebank Avenue.
46. The standard question 7a. asks: *What is your preferred option and why?*

Community Feedback

47. Feedback from the community on Rosebank Avenue received via the community information sessions and via submissions was divided.
48. Some residents within Rosebank Avenue want to see the same planning controls that enable 5 storey residential development applied to their sites so they can maximise their economic benefit in the same way their neighbours have to the south and south east (refer to **Figure 5** below showing the extent of the HCA and street numbers).

Figure 5 - Rosebank Avenue HCA and heritage items with street numbers

Council 14 August 2017

Item 11.3

49. Views received via submissions and Community Workshop sessions from some residents who reside outside the HCA see the removal of the HCA and allowance for redevelopment as further degradation of local character. Many are unsympathetic to the residents experiencing the interface issues. Some view that the new R4 zone has been in place for over 3 and a half years and affected residents could have either sold up to a more tolerant resident who "knew what they were buying". Some hold the view that affected residents could have planted trees at the time the new controls came into effect to help mitigate the amenity and privacy impacts. There is also a perception from these respondents that the affected residents who see redevelopment as a resolution to the interface issues do not care about the impacts it will have on the residents who choose to stay or who are less affected by the new development.
50. With regards the heritage items at No.s 9 and 10 Rosebank Avenue, the predominant response from respondents was that the heritage items should be removed if the HCA notation is recommended for removal on the basis that the heritage items are just as affected as the properties at the southern portion of the precinct. They see that these properties also have visual proximity to the interface issues and this devalues the significance of the heritage items. There was also a contrary view – that the preference is for Options 1 ("Maintain the HCA") or Option 2 ("Landscaping at interface") across the precinct but notes that in the instance the HCA is recommended for removal, then the entire precinct should enable 5 storey residential flat buildings.

Conclusions and recommendations

51. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls introduced by the State Government in March 2014.
52. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. That Council Officers accept that there are severe interface issues occurring (or, in some cases, are yet to occur) to the southern half of the precinct; specifically, the properties at No.s 1, 3, 5 and 7 as well as 2, 4 and 6-8 are likely experience the same impacts as the remaining adjoining R4 zoned land is redeveloped over time.
 - b. That a heritage item (such as the two at No.s 9 and 10 Rosebank Avenue), as opposed to a property with just a HCA notation over it, has a much more significant role in terms of heritage conservation and protection. The importance of a heritage item relies less on the surrounding character and more so on its own individual historical attributes. As such, it is not uncommon for heritage items to sit amongst development that is of a different typology.
 - c. The RE1 zoned land to the west comprising the eastern edge of Kent Street Park – along with the two heritage items - also forms a 'break' and mid point within the Rosebank Avenue Precinct.
 - d. Council Officers see that the interface issues are less significant at the rear of No.s 12 to 18 Rosebank Avenue, despite the R4 zoning on the adjoining large site to the east at No.23 Ray Road. Constructed in early 2011, the development on this site incorporates 2.5 and 3 storey town house development which faces the properties at No.s 12 to 18 Rosebank Avenue. These townhouses shield the 4 storey residential flat building development that fronts Ray Road. Since 2011, tree

- 887 -

Council 14 August 2017

Item 11.3

plantings now shield views to this development from Rosebank Avenue.

- e. Similarly, Council Officers determine that there are no interface issues occurring (or anticipated to occur) at the rear of the sites at No.s 13 to 21 Rosebank Avenue. This also includes No.23 Rosebank Avenue. These sites do not adjoin any R4 zoned land. As noted above, the property at No.23 is isolated, smaller in size than the other Rosebank Avenue parcels and has little chance of being redeveloped and given it is surrounded by the R2 zoned properties which have frontage to Rosen Street. Therefore, the current R2 zone is not considered to be inappropriate against the R2 zoned land which has a two storey height limit.
 - f. That any change to the planning controls needs to be sensitive and sympathetic to the existing heritage items at No.s 9 and 10 Rosebank Avenue.
 - g. That the removal of the HCA notation will not have any impact on the heritage significance of the two heritage items situated at No.s 9 and 10 Rosebank Avenue (refer to **Figure 5**) as these properties are recognised for their significance as stand-alone sites.
 - h. That the basis for any changes to the planning controls is to place as little pressure as possible on local traffic.
53. Council Officers therefore, **recommend the following principles:**
- a. In the case of properties situated at No.s 1, 3, 5 and 7 as well as 2, 4 and 6-8 Rosebank Avenue:
 - i. That Option 7 – 3 storey residential flat building redevelopment be permissible; and
 - ii. That further urban design work identify appropriate building height, density (FSR) controls, building setback and amalgamation controls so as to ensure an appropriate transition from 3 storeys to 2 storeys towards the heritage item sites to the north. This analysis will inform new DCP controls.

These recommended controls:

 - enable owners to achieve economic benefit from a higher density solution.
 - represent a sound transition in density from the 5 storey residential flat building to a single storey heritage item.
 - b. That the Rosebank Avenue HCA notation in *HLEP 2013* (labelled "C11") be removed entirely.
 - c. That the existing heritage items at No.s 9 and 10 Rosebank Avenue remain listed in the LEP Heritage Schedule as heritage items.
 - d. In the case of the properties situated north of the heritage items comprising No.s 13 to 21 Rosebank Avenue (western side) and 12 to 18 Rosebank Avenue (eastern side) and of No.23 Rosebank Avenue, that there be no change to the LEP planning controls.
 - e. That in the case of the entire Rosebank Avenue area, that the relevant DCP controls be amended accordingly, including any amendments to

- 888 -

Council 14 August 2017

Item 11.3

Section 9.3.14 'Rosebank Avenue (Epping) Heritage Conservation Area' section of the Hornsby DCP'.

- f. That despite the increase in residential density proposed, that the above recommendations could proceed ahead of the completion of the Traffic study as they seek to urgently deal with the unintended impacts arising from the new planning controls implemented in 2014 relating to land use interface issues. Furthermore, the potential increase in dwelling numbers resulting from this recommendation is likely to be minimal when compared against the traffic impacts arising from proposals detailed later in this report.

Essex Street HCA

54. Until March 2014, land situated on the eastern side of Forest Grove - which directly adjoins land on the western side of Essex Street between Epping Road and Maida Road - was zoned R2 Low Density Residential. However, new planning controls which came into effect in March 2014 via the DP&E's Urban Activation Precinct process introduced the R4 zone. The R4 High Density Residential zone permits 5 storey residential flat buildings.
55. The Essex Street HCA and surrounding land zonings in *HLEP 2013* are illustrated in **Figure 6**, below.

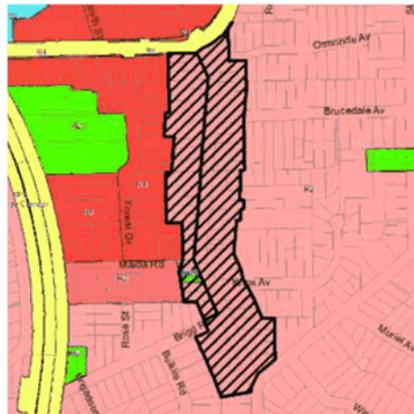

Figure 6 - Essex Street HCA (hashed) and current zoning

56. Four heritage items are situated within the Essex Street HCA - at No.s 42, 47, 76 and 84 Essex Street (refer to **Figure 7** below).
57. The Heritage Review assessed the heritage value of the HCA and has recommended retention of the Essex Street HCA. However, this study only looks at the heritage factors and does not address the land use conflicts occurring on the west side of the HCA between Epping Road and Maida Road.
58. A strong residential market has seen most of the R4 zoned sites (between Epping and Maida Roads) flanking the western side of Essex Street be redeveloped (or have existing approvals) for 5 storey residential flat buildings. This has created a conflict in land uses that sees 5 storey residential flat buildings overlooking single and two storey low density residential which is significantly impacting on the privacy and amenity of the Essex Street residents on the western side of Epping and Maida Road.

- 889 -

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

59. Section 7.4.1 of the Discussion Paper presents 7 options to resolve interface issues at the Rosebank Avenue HCA (as well as the Essex Street HCA which is discussed in the section below). The options range from "Maintain the HCA" to "3 storey residential flat building" redevelopment.
60. Council Officers recommend three options (Options 4, 5 and 6) for the Rosebank Avenue HCA all of which involve:
- a. Removal of the HCA notation in *HLEP 2013*; and
 - b. Introduction of new planning controls that permit two storey redevelopment comprising: (1) Dual Occupancy (side by side); (2) Town Houses; or (3) Manor home (with the exception of heritage items).
61. The standard question, 7a., asks: *What is your preferred option and why?*
- Community Feedback*
62. Feedback from the community on the Essex Street HCA received via the community information sessions and via submissions is divided.
63. For residents residing on the western side of Essex Street, situated within the HCA, the responses were as follows:
- a. 75% of residents either supported the Council Officer recommendation or Option 7 ("3 Storey Residential Flat Building").
 - b. 25% of residents supported Option 1 ("No Change").
64. The predominant view from residents on the eastern side of Essex Street within the HCA also support the removal of the HCA notation to enable redevelopment that enables a transition to the adjoining R4 zone. Views from the eastern side of Essex Street held the strong view that if there was any change to the building form on the western side of the street, that the same type of development should be permissible on the eastern side of the street.
65. Views of residents that reside outside the HCA see the removal of the HCA and allowance for redevelopment as further degradation of local character. Furthermore these views have strong similarities with those of the residents situated outside the Rosebank Avenue HCA, in that:
- a. Some residents are not sympathetic to the residents experiencing the interface issues:
 - i. Some view that affected residents could have addressed interface issues early by tree planting at the time the new controls came into effect to help mitigate the amenity and privacy impacts
 - ii. Some view that affected residents could have either sold up and moved out by selling to a more tolerant resident who "knew what they were buying" and appreciates what special character is left.
 - iii. Some have the perception that the affected residents who are fed up and want to sell to maximise their economic benefit do not care about the impacts it will have on the residents who choose to stay or who are less affected by the new development.

- 890 -

Council 14 August 2017

Item 11.3

Figure 7 - Essex Street HCA and heritage items in HLEP 2013

Conclusions and recommendations

66. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
67. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
 - a. That there are significant interface issues that properties are experiencing on the western side of Essex Street HCA; specifically, those situated between Epping Road and No.86 Essex Street.
 - b. That there are no interface issues being experienced on the eastern side of the Essex Street HCA despite the numerous views of the residents residing on the eastern side. The role of the Essex Street road reserve is critical in establishing a demarcation between land uses. The road reserve which is approximately 21 metres wide when measured between the front boundaries of the western and eastern side of the street acts as a clear demarcation for any change in land use and becomes the ideal "line in the sand". If Council was to enable redevelopment uplift of the eastern side of Essex, this only pushes and extends the interface issue further east.
 - c. Essex Street stretches from Oxford Street in the north to Abuklea Road in the south with the Essex Street HCA section occupying a little more than 25% of its full length. Therefore, any recommendations to change the eastern side of Essex Street within the HCA section is likely to result in the Essex Street residents situated outside of the HCA that own land zoned R2 Low Density Residential to also seek uplift because the rezoning of the eastern side will establish a precedent.
 - d. Terry's Creek forms a natural geographical boundary rather than a boundary for land use change. Relying on Terry's Creek as a land use boundary would introduce a significant number of dwellings which

- 891 -

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

- would not only have significant traffic implications but also result in significant additional land being up-zoned further away from the station.
- e. Of the 3 recommended re-development options within the Discussion Paper (which were: Option 4 Dual Occupancy (side by side), Option 5 Town house re-development and Option 6 Manor home, that Council Officers recommend Option 6 Manor home because this option:
 - i. Represents a sound transition in density from the 5 storey residential flat building to 2 a storey medium-density, to the 1 to 2 storey low density across the street. It means that no change to the existing height control is required.
 - ii. Does not require site amalgamation so that owners will be able to independently develop their sites if they wish.
 - f. That if there is a recommendation that enables redevelopment of the western side of Essex Street between Epping and Maida Roads, that there is no heritage benefit in keeping the Essex Street HCA notation.
 - g. The removal of the HCA notation will not have any impact on the heritage significance of the four heritage items situated at No.s 42, 47, 76 and 84 Essex Street (refer to **Figure 7**) as these properties are recognised for their significance as stand-alone sites.
68. Council Officers therefore, **recommend the following principles:**
- a. That the Essex Street HCA notation in *HLEP 2013* (labelled "C10") be removed in full.
 - b. That the existing heritage items at No.s 42, 47, 76 and 84 Essex Street remain listed in the LEP Heritage Schedule as heritage items.
 - c. That the planning controls for the properties on the western side of the Essex Street HCA area be amended to permit re-development that involves demolition of the existing housing (with the exception of heritage items) to enable development of two storey manor home development, between Epping Road and Maida Road.
 - d. That the planning controls for the properties on the eastern side of the Essex Street HCA area remain unchanged and not be amended.
 - e. That further urban design be undertaken to determine the appropriate density, setbacks and other building envelope and controls to guide the development of new manor home development. This analysis will inform new development control plan (DCP) controls including any amendments to Section 9.3.13 'Essex Street (Epping) Heritage Conservation Area of the Hornsby DCP'.
 - f. That despite the increase in residential density proposed, that the above recommendations could proceed ahead of the completion of the Traffic study as they seek to urgently deal with the unintended impacts arising from the new planning controls implemented in 2014 relating to land use interface issues. Furthermore, the potential increase in dwelling numbers resulting from this recommendation is likely to be minimal when compared against the traffic impacts arising from proposals detailed later in this report.

Rockleigh Park

- 892 -

Council 14 August 2017

Item 11.3

69. The Rockleigh Park precinct comprises 33 small subdivided lots that come off a small, narrow laneway system. The area is predominantly zoned R4 high Density Residential (shown edged yellow in **Figure 8** below) with an R3 Medium Density Residential zoned strip edging the north and eastern boundaries. The subject site currently contains medium density housing.
70. Until March 2014, the 36 parcels that make up Rockleigh Park were zoned R2 Low Density Residential Zone. However, new planning controls which came into effect in March 2014 via the DP&E's Urban Activation Precinct process introduced the R4 zone to the 18 parcels central within Rockleigh Park. The R4 High Density Residential zone permits 5 storey residential flat buildings. No sites have been redeveloped in accordance with the new zone on account of constraints around community title and the small street network.
71. The precinct's proximity to the R4 zoned land at Essex Street to the south and the East Epping HCA to the north (shown hashed red) are illustrated in **Figure 8**.
72. The Heritage Review commissioned by Council recommends down-zoning the parcels zoned R4 (which has a 17.5 metre or 5 storey building height) to R3 Medium Density Residential zone (which has a 12 metre or 4 storey building height) to better reflect existing development.

Figure 8 - Rockleigh Way (area edged in yellow and with a R3 zoned strip)

73. The Discussion Paper recommends supporting the R3 zone and that further urban design analysis to identify the appropriate amalgamation, height and density controls be carried out.
74. The proposed downzoning to the R3 zone better reflects the current use – small single and two storey cottages, some of which are attached, on a small, narrow laneway system.
75. The standard question at the end of this section (Question 7b) asks: *Do you agree with the recommendation for Rockleigh Park?*

Community Feedback

76. Community feedback from residents on this issue showed strong support for the down zoning of the site from the R4 zone to the R3 zone.
77. Respondents also said that the proposed R3 zone:
- a. Would more appropriately deal with the transition between higher and lower density areas; and

Council 14 August 2017

Item 11.3

- b. Should be supported by a master planning process so that appropriate heights and density controls can be put in place.

Conclusions and recommendations

78. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.

79. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. With 18 lots zoned R4 and 15 lots zoned R3 all of which rely on the same small road network for access which falls under a community title, it is highly unlikely that these sites will be purchased by a developer for redevelopment.
- b. The recommended downzoning better reflects the current use – small single and two storey cottages, some of which are attached, on a small, narrow laneway system.
- c. The proposed R3 Medium Density Residential zone is consistent with the Rockleigh Park properties that form its northern and eastern boundaries.
- d. That redevelopment of Rockleigh Park for 5 storey residential flat building development would reflect further and unnecessary encroachment of inappropriate high density development up against low density development.
- e. That the recommendation within the Discussion Paper to down-zone the R4 zone to the R3 zone still stands.

80. Council Officers therefore, **recommend the following principles**:

- a. That the component of Rockleigh Park currently zoned R4 be rezoned to the R3 zone so that the entire 33 parcels fall under a single (R3) zone consistent with the recommendations with the Heritage Review and Discussion Paper.
- b. That further urban design analysis be undertaken across all of Rockleigh Park to determine the best building height and density (FSR) controls including amalgamation patterns should the site be amalgamated in the future. This analysis will also inform DCP controls.

1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street

81. The parcels at 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street are all currently zoned R2 Low Density Residential with the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street located within the most southern section of the East Epping HCA (refer to **Figures 9 and 10**, below)

Council 14 August 2017

Item 11.3

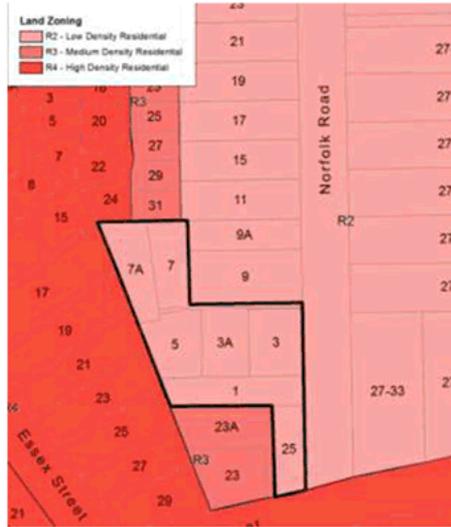

Figure 9 - Norfolk Road and Pembroke Street properties – land zonings as per HLEP 2013

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

84. Until March 2014, the R4 zone to the west of this area did not exist. However, new planning controls which came into effect in March 2014 via the DP&E's Urban Activation Precinct process rezoned the R2 Low Density Residential land to the R4 High Density Residential zone which permits 5 storey residential flat buildings.
85. The Heritage Review commissioned by Council recommends:
- a. The removal of the East Epping HCA notation (labelled "C9" in *HLEP 2013*) over the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street; and
 - b. Rezone No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street as well as No. 5, 7 and 7A to the R3 zone so all parcels share the same zoning and also, match the zoning to the south.
86. Since 2014, when the adjacent R4 zone came into effect, there has been no redevelopment of land in this vicinity however, it is noted that a strong residential market could drive redevelopment in the future.
87. To resolve any forthcoming interface issues at No.s 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street, Section 7.4.2 of the Discussion Paper presented three options and sought feedback. The three options are as follows:
- a. Option 1 is as per the Heritage Review's recommendation (described above).
 - b. Option 2 is to both:
 - i. Remove the East Epping HCA notation (labelled "C9" in *HLEP 2013*) over the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street, and
 - ii. Rezone all of the seven parcels to the R3 zone, but restrict development on No.s 3, 3A, 5, 7 and 7A Norfolk Road to a 2 storey manor home and encouraging No.s 1 Norfolk Road and 25 Pembroke Street to amalgamate with No.s 23 and 23A Pembroke Street to redevelopment into a town house scheme.
 - c. Option 3 is to:
 - i. Remove the East Epping HCA notation (labelled "C9" in *HLEP 2013*) over the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street, and
 - ii. Retain the R2 zone on No.s 3, 3A, 5, 7 and 7A Norfolk Road, and
 - iii. Allow No.1 Norfolk Road and 25 Pembroke Street to be rezoned to the R3 zone.
88. The standard question at the end of this section (Question 7c) asks: *...what is your preferred option and why?*

Community Feedback

89. Feedback from the community via the community information sessions and submissions is divided.
90. Responses from the owners of No.s 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street, included a coordinated group response which was included in some of the households' submissions. These indicated unanimous support

Council 14 August 2017

Item 11.3

for Option 1 (remove HCA and rezone to R3). Key reasons for supporting this option were:

- a. That there is a desire to resolve future interface issues with the anticipated R4 development yet to occur on the adjoining R4 land.
 - b. That the option could encourage amalgamated development sites large enough to support "high-quality integrated development" with adequate transition to adjacent low-rise areas and the Heritage Item at 9 Norfolk Road.
 - c. To encourage housing within walkable access to the school and town centre.
 - d. That Option 2 (manor home) was not preferred as it was seen as an undesirable and less integrated approach than larger site amalgamation along with the potential problems with strata-titled developments sharing one driveway (i.e. access, construction, utilities) was also raised although it should be noted that the manor home recommendation involves amalgamated sites.
 - e. That Option 3 was considered as an uncoordinated approach to zoning that could result in small, piecemeal development. An alternative for R4 zoning was also raised by some.
91. Feedback from two adjoining owners, including the owner of the adjoining heritage property at No. 9 Norfolk Road have preference for Option 3 as this is seen as a more appropriate building form response since the sites at No.s 3A, 5, 7 and 7A Norfolk Street have no street address.
92. Feedback from other residents were varied:
- a. some seeing Option 2 as preferable,
 - b. others as Option 3 as preferable, with
 - c. others feeling that only limited redevelopment was acceptable (low density to be replaced with low density).
93. Other residents cited the local neighbourhood shop building which is attached to the dwelling at No. 25 Pembroke Street as a valued and historically important building in this area. However, despite the Heritage Study's identification of the site as a 'contributory item', it also recommends removal of the East Epping HCA notation over the site.

Conclusions and recommendations

94. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
95. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. That any response needs to be sensitive to the heritage item at No.9 Norfolk Road.
 - b. The narrowness of the lots at No.25 Pembroke Street and No.1 Norfolk Street lend themselves to amalgamating with No.s 23 and 23A given their location.

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

- c. That the R4 High Density Residential zone to the west and R3 Medium Density Residential zone to the south have the strong potential to result in interface issues which need to be managed.
96. Council Officers therefore, **recommend the following principles:**
- a. That option 2 from the Discussion Paper be applied, which involves:
- i. Removing the East Epping HCA notation (labelled "C9" in *HLEP 2013*) over the properties at No.s 1, 3 and 3A Norfolk Road and 25 Pembroke Street, and
 - ii. Rezoning all of the seven parcels to the R3 zone*, but:
 1. Limit re-development on No.s 7 and 7A Norfolk Road to a 2 storey manor home.
 2. Enable re-development on No.s 1, 3 and 3A, 5 Norfolk Road and 25 Pembroke Street to realise residential flat building (no more than 3 storeys in height) however, undertake urban design analysis to determine:
 - appropriate height, density and amalgamation controls including the controls affecting No.s 23 and 23A Pembroke Street; and
 - appropriate setback controls from the heritage item at No. 9 Norfolk Street; and
 - that this analysis informs DCP controls including any amendments to section 9.3.12 'East Epping Heritage Conservation Area'.
- Note:** this may result in a different zone depending on the methodology utilized in the harmonization of the planning controls.
- b. That despite the increase in residential density proposed, that the above recommendations could proceed ahead of the completion of the Traffic study as they seek to urgently deal with the unintended impacts arising from the new planning controls implemented in 2014 relating to land use interface issues. Furthermore, the potential increase in dwelling numbers resulting from this recommendation is likely to be minimal when compared against the traffic impacts arising from proposals detailed later in this report.

Rose Street precinct

97. The Rose Street Precinct is flanked by properties zoned R3 Medium Density Residential (which front Maida Road), Blaxland Road to the west, the Essex Street HCA properties to the east and Brigg Road to the south. It excludes the Essex Street properties and a pocket park in the north east corner with Maida Road and Essex Street. Refer to **Figure 11** below.
98. Until March 2014, land situated on the southern side Maida Road was zoned R2 Low Density Residential Zone. However, new planning controls which came into effect in March 2014 via the DP&E's Urban Activation Precinct process introduced the R3 zone to Maida Road. The R3 zone permits 4 storey residential flat buildings.

Council 14 August 2017

Item 11.3

Figure 11 - Rose Street Precinct (area hashed blue)

99. The land that is zoned R3 is being redeveloped into 4 storey residential flat buildings. Also the topography slopes (downwards) to the south increasing the impact of the height of new development.
100. The Heritage Review assessed the appropriateness of the R2 zone with regards to the adjoining Essex Street HCA and concluded that the Rose Street precinct be upzoned to the R3 zone on a land use basis.
101. With regards to land outside the precinct (as per **Figure 11**, above) it should be noted that as per the recommendations for Essex Street, the HCA notation to the east of the precinct is recommended for removal.
102. As at mid July 2017, over two-thirds of the strip of R3 zoned land fronting Maida Road has either been developed as 4 storey residential flat buildings or is under construction for the same.
103. There is potentially an opportunity for Council to pursue an acquisition process to purchase sites for community/public open space in the vicinity of Rotary Park given the findings from the *Epping Social Infrastructure Study* which supported the Discussion Paper.
104. The Discussion Paper supports the recommendation within the Heritage Study - which is to zone the precinct R3 zone - but also recommends that further master planning work be undertaken to determine the appropriate height and density controls so as to ensure a clear transition to the R2 zoned land on the southern side of Brigg Road.
105. The Discussion Paper seeks feedback on the recommendation (Question 7d) which asks: *Do you agree with the recommendation for the Rose Street Precinct?*

Community Feedback

106. Council received a total of 45 submissions on this issue. Feedback from the community is divided. Responses from 19 respondents support the Discussion Paper's recommendation to up-zone the precinct. This is largely because those residing within the Rose Street precinct feel they have lost significant amenity with the introduction of the 4 storey residential flat building development occurring to the north. The views of residents outside the precinct (26 respondents) do not support the recommendation for up-zoning as they feel

- 899 -

Council 14 August 2017

Item 11.3

that it will only extend pressure to upzone land further south. Some respondents have the view that the four storey interface is insignificant. (Refer to a summary of the submissions at **Attachment 3**).

107. The above views were also reflected at the Community Information Sessions (refer to Straight Talk's *Epping Town Centre Review - Phase Two - Exhibition period consultation* at **Attachment 2**).

Conclusions/Recommendations

108. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.

109. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. That the interface issues that are occurring to the north of the precinct require a land use planning response to manage these interface issues.
- b. That the recommended R3 Medium Density zone in the Heritage Review and the Discussion Paper generally represents a sound transition to the R2 zone on the southern side of Briggs Road providing that master planning is undertaken for this precinct.

110. Council Officers therefore, **recommend the following principles**:

- a. That the land be rezoned to the R3 zone*; and
- b. That further urban design analysis/master planning process is needed to:
 - i. Determine how development from the north needs to step down to a building height of 2 storeys at the Brigg Road frontage to transition to development across the road. Transition should also be considered towards the eastern end of the site to ensure future massing appropriately responds to the low density residential development fronting Essex Street.
 - ii. Determine an appropriate amalgamation pattern, building height, density and setback controls as well as provision of communal and public open space
 - iii. That this analysis inform DCP controls.

Note: this may result in a different zone depending on the methodology utilized in the harmonization of the planning controls. But the intended built form outcome will remain the same.

- c. That despite the increase in residential density proposed, that the above recommendations could proceed ahead of the completion of the Traffic study as they seek to urgently deal with the unintended impacts arising from the new planning controls implemented in 2014 relating to land use interface issues. Furthermore, the potential increase in dwelling numbers resulting from this recommendation is likely to be minimal when compared against the traffic impacts arising from proposals detailed later in this report.

Hornsby Heritage Review Stage 6

Council 14 August 2017

Item 11.3

111. Section 7.1 within the Heritage Chapter of the Discussion Paper responds to a previous Hornsby Shire Council resolution pertaining to certain heritage matters in Epping.
112. Identified as part of 'Stage 6' of the Hornsby Shire Council Heritage Study Review, the Heritage Study prepared by City Plan Services reviewed these matters and made a number of recommendations. These matters and recommendations are detailed in **Attachment 5** and are also detailed in the consolidated list of recommendations contained in **Attachment 6**.

COMMERCIAL FLOORSPACE CHAPTER

113. As noted in the Discussion Paper, in 2011 the Epping Town Centre had 4,512 jobs with 55,000sqm of office floor space and 13,000sqm of retail floor space. However, since 2014, new development within the B2 Local Centre zone has reduced the amount of office floor space. Developers are replacing existing large scale office towers and small scale (2 and 3 storey) office development with shop top housing.
114. This trend is occurring despite the Hornsby DCP controls requiring non-residential uses on the first two to three floors of development in the B2 Local Centre zone. Parramatta's DCP controls require applicant's to provide "up to" 4 storeys of commercial development, but only for development on Beecroft Road.

Note: Commercial floorspace is floorspace utilised for retail, office or business premises.

115. The Department's position on the reduction of commercial floor space is that, based on market analysis, demand for commercial floor space is expected to reduce as other centres such as Macquarie Park and Norwest Business Park become more attractive. City of Parramatta commenced a review and in response commissioned SGS Economics and Planning to understand whether the loss of floor space is a positive trend, and to understand other commercial land use elements that may create a more successful town centre.
116. Chapter 8.0 of the Discussion Paper responds to the recommendations made within SGS Economics and Planning *Epping Town Centre Commercial Floorspace Study* ("Floorspace Study") as well as feedback received from residents during the Phase 1 consultations held in May this year.
117. The sub-sections below summarise the responses to the Discussion Paper's nine questions which pertain to:
- a. Epping Town Centre's role as a Sub-District Centre;
 - b. The role of Government owned sites; and
 - c. The mix of retail uses.

Epping as a Sub District Town Centre in 2036

118. One of the concepts considered in the Floorspace Study is the State Government's **30-minute city** where people can access a wide range of job, services and other opportunities within 30 minutes from their place of residence.
119. Sections 8.5.1 and 8.5.2 within the Discussion Paper comprises three questions (8a to 8c) which seek feedback on the future role of the Epping Town Centre to the year 2036.

- 901 -

Council 14 August 2017

Item 11.3

Community Feedback

120. With regards to question 8a: *Should Epping evolve as a Sub District Centre with a target of achieving the commercial floor space targets without any increase in Net Floor Space on Business B2 zoned sites?* The community's responses are highly supportive of the role of the centre having a significant component of commercial floorspace. The most common view is that there needs to be more variety in retail and more night time activity.
121. With regards to questions 8b and 8c, these ask if Epping should evolve as a Sub District Centre:
- a. Without any increase in net floorspace (8b) noting that additional commercial floorspace provision would be provided at the expense of residential development; or
 - b. By allowing an increase in net floorspace (8c) to recognise the need for increased provision of commercial floorspace.
122. Responses were as follows:
- a. Despite residents generally recognising the need for additional commercial floorspace, residents generally consider that this additional floorspace should be contained within the current height and density controls.
 - b. Developers believe that an incentive – such as mandating a minimum commercial floorspace - needs to ensure that there is no net loss of potential residential floorspace and is an essential mechanism to ensure the delivery of the amount of commercial floorspace to deliver a sub-district centre.

Conclusions and recommendations

123. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
124. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude** the following:
- a. That Epping Town Centre should aim to be a Sub-District Centre in 2036 (ie. 13,000sqm of retail floorspace and 55,000sqm of other commercial floorspace) as per the *Epping Commercial Floorspace Study* prepared by SGS Economics and Planning.
 - b. The urban design analysis demonstrates that a 3 storey podium is required on remaining developable sites within the town centre to achieve the target identified in the Study.
 - c. In order for the Epping Town Centre to become a vibrant commercial centre, additional floorspace which enables higher rates of office and retail floor space is needed.
 - d. Such controls need to be mandated and therefore, should be in the LEP not the just the DCP.
 - e. That the traffic implications of increased commercial floorspace provision and associated increase in residential floorspace (should this be supported) be tested as part of the traffic study.

125. Council Officers **recommend the following principles:**

- 902 -

Council 14 August 2017

Item 11.3

- a. That further analysis be undertaken to determine the best LEP mechanism that mandates for a minimum amount of commercial floorspace within suitable locations that delivers a minimum 3 storey podium of commercial floorspace in the LEP and that this apply to all land zoned B2 without having the need to expand the B2 zone (except in the case of the site at 240-244 Beecroft Road – see below).
- b. That any additional residential floorspace and height be investigated and analysed through the Traffic Study to partially recognise the proposed requirement to provide increased commercial floorspace.
- c. That the SGS Economics and Planning's *Epping Commercial Floorspace Study* and Section 8.5.2 of the Epping Planning Review Discussion Paper which demonstrates that there is demand for additional retail and commercial floor space in Epping be used to inform the assessment of future development applications until more formal planning controls are in place.

Role of Government owned Sites

126. As noted in the Discussion Paper, the *Epping Commercial Floorspace Study* has identified a role where Government-owned sites could be used as part of a deliberate strategy to support the Government's 30-minute city strategy by:
 - a. Providing commercial floor space to offset the loss when other sites are developed; and
 - b. Providing floor space to allow businesses that are displaced when their existing building is being redeveloped to relocate within the centre.
127. The section below discusses the Government-owned sites that have been identified as opportunities to contribute to the 30-minute city strategy.

State Government owned sites

128. Part of Section 8.5.3 of the Discussion Paper proposes two State Government owned sites within the town centre at the following addresses to provide commercial floorspace:
 - a. 240-244 Beecroft Road, Epping (see **Figure 12** below); and
 - b. Epping Railway Station Site (see **Figure 13** below).

Council 14 August 2017

Item 11.3

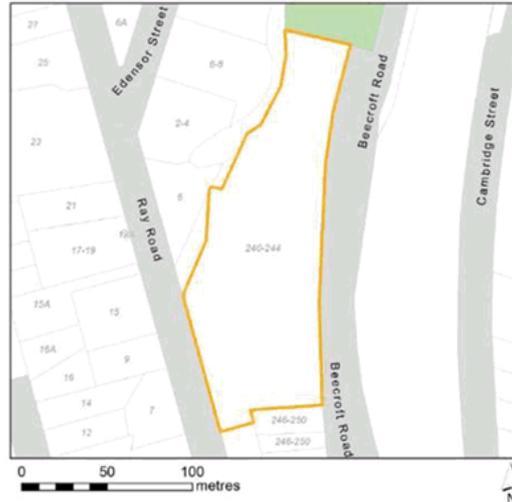

Figure 12 - UrbanGrowth NSW site – 240-244 Beecroft Road, Epping

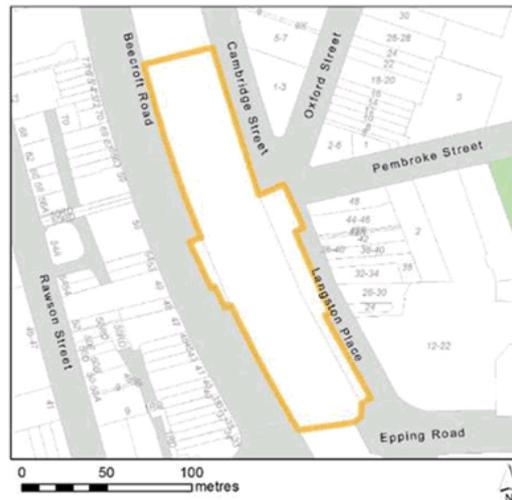

Figure 13 - Epping Railway Station site

129. The questions for each site (8e, 8f and 8g) asks the community *what contribution should each site make to the provision of commercial floor space in Epping?*

Community Feedback

130. A total of 40 responses were received on this question.

131. Community feedback received on the UrbanGrowth site at 240-244 Beecroft Road, Epping was:

- a. 19 submissions supported commercial and/or retail uses at the site, though some of these preferred commercial only, while more preferred a mix of non-residential uses.

Council 14 August 2017

Item 11.3

- b. Some respondents saw the site as having potential to provide commuter parking or a bus interchange.
 - c. Some respondents, including the land owner were of the view that the R4 High Density Residential zone was appropriate; reasons offered in support of this view included its proximity to the station and that there are other more suitable and feasible large commercial sites nearby. The landowner, a State Government agency, also questioned the need for large-scale floorplates in the town centre and at this site specifically.
132. Community feedback received on the Railway Station Site was as follows:
- a. There was a high level of agreement that it could make a strong contribution to connectivity and civic space. The existing pedestrian connections through the station site were generally seen as inadequate, unattractive and inaccessible, and viewed redevelopment as a potential way to address some of these issues.
 - b. While there was a high level of support for use of this site for public open space and to improve public connectivity, there was less support for associated development due to concerns such as perceived overdevelopment and potential impacts on views and overshadowing.
 - c. While some submissions acknowledged that partnering with a developer might be necessary to realise development at this site, in general, only a low level of development was seen as acceptable – with many not accepting any level of development at all.
 - d. Many submissions acknowledged the technical complexity of such an undertaking, due to interface with the rail line.

Refer to a summary of the submissions at **Attachment 3**.

133. The above views were also reflected in the Community Workshop Sessions (refer to the *Epping Town Centre Review: Phase two – Exhibition period consultation Attachment 2*).

Conclusions and recommendations

134. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
135. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. The State Government site situated at 240-244 Beecroft Road had previously been zoned B2 zone up to March 2014 when the State Government rezoned the land to residential. The amount of commercial floorspace that the site could deliver under the current controls would be tokenistic given its current R4 zone which only permits shop top housing and neighbourhood shops.
 - b. Large floorplate commercial is an important part of making a town centre commercially vibrant and diverse. The centre's poor offering of large floorplate commercial is identified as a disadvantage in the SGS Economics and Planning *Commercial Floorspace Study*.
 - c. There is limited opportunity for large floorplate commercial floorspace within the town centre.
 - d. The State Government sites:

- 905 -

Council 14 August 2017

Item 11.3

- i. Are large in scale (particularly the Beecroft Road site) and can make a unique offering by providing large floorplate commercial as found by the *Floorspace Study*.
- ii. Can make a contribution to commercial floorspace as per the urban design analysis which recommends three storey podium of commercial development.

Each State Government site could be individually assessed for an appropriate level and type of commercial floorspace.

136. Council Officers therefore, **recommend the following principles:**

- a. With regards to the site at 240-244 Beecroft Road, that:
 - i. That Council amends the planning controls (as discussed above) to rezone the site back to the B2 zone to ensure an appropriate contribution is made towards commercial floorspace whilst retaining current residential floorspace capacity. This may include concentrating these uses at the southern end of the site.
 - ii. That Council meet with UrbanGrowth NSW to discuss this proposed amendment.
- b. With regards to the Epping Railway Station site, that Council Officers meet with Transport for NSW to discuss the opportunities for the site to deliver commercial development.
- c. That the traffic impacts of both options need to be properly understood before finalising any changes to the planning controls.

Local Government owned sites

137. Part of Section 8.5.3 of the Discussion Paper considers two Council owned sites within the town centre at:

- a. Council Car Park site at Rawson Street (see **Figure 14**); and
- b. Epping Library Site (see **Figure 15**).

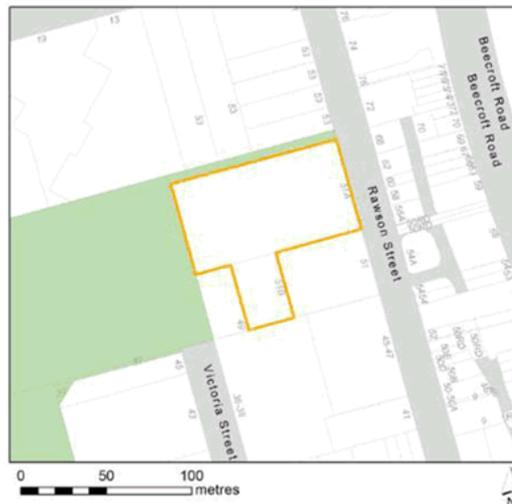

Figure 14 - Council Car Park landholding – 51A and 51B Rawson Street, Epping

Council 14 August 2017

Item 11.3

Figure 15 - Epping Library Site

138. Council has been approached by two developers to enter into an agreement to redevelop the Rawson Street car park.
139. The Epping Library site was previously identified by Hornsby Shire Council as a potential redevelopment site. Through an EOI process initiated by Hornsby Shire Council, it sought to redevelop the site with a view to being redeveloped with residential uses and a new library facility located on the lower storeys.
140. With regards to the Rawson Street car park site, the Discussion Paper recommended that the site not be identified as a site where significant commercial or retail floor space should be contemplated. If redeveloped, this site will more likely play a role ensuring that there is sufficient social infrastructure provided in the town centre.
141. The two questions – one for each site – asked:
- a. 8f. Should the Epping Library and Council car park sites play a role in providing for commercial floor space in the centre?
 - b. 8g. Should the floor space allocated to community uses and commercial floor spaces be equivalent to or greater than the levels required on adjoining equivalent sites?

Community Feedback

142. A total of 38 responses were received on this question.
143. Community feedback received on the Rawson Street Car Park site was as follows:
- a. The predominant view was that respondents felt that the car park site should not be redeveloped to include commercial floor space. Instead an open space/plaza was preferred, in conjunction with linkages to nearby Boronia Park and underground parking.
 - b. There were strong views that this site should be retained for public use only.

Council 14 August 2017

Item 11.3

- c. Some respondents (9) were positive about or at least willing to consider some commercial development here, some with provisos such that community facilities were maintained/increased, that height was limited, that access to Boronia Park was maintained, that such development might not be feasible given demand for commercial floor space, and that any such decision would require additional community consultation and careful consideration.
 - d. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.
144. Community feedback received on the Epping Library Site was as follows:
- a. Views on the library site were more evenly-mixed. While 13 respondents were supportive or at least willing to consider such a proposal, 16 submissions were not supportive.
 - b. As with the car park, there was a frequent view that maintaining an exclusive public use on this site was important. Amongst those willing to consider a possible redevelopment, there were again provisos, such as prioritisation of community space over commercial, making space for NGOs, only with limited height potential, only with a master planning exercise, and only if community facilities were maintained or expanded.

Refer to a summary of the submissions at **Attachment 3**.

145. The above views were also reflected in the Community Workshop Sessions (refer to the *Epping Town Centre Review: Phase two – Exhibition period consultation* **Attachment 2**).

Conclusions and recommendations

146. These two Council assets are explored in more detail in the Social Infrastructure section of this Council report
147. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude** in the Social Infrastructure section of this Council report:
- a. Council Officers note and support the community's preference for Council to use its current assets at Rawson St and Chambers Court (Epping Library) for community uses.
 - b. Refer also to the Social Infrastructure section of this Council report where this asset is discussed in more detail including recommended principles.
148. Council Officers therefore, **recommend the principles**:
- a. From the 'Local of Potential Civic Focal Point' section in the Social Infrastructure Chapter session of this report be applied here; and
 - b. That investigation take place on the potential for commercial uses on both sites and that occur in conjunction with the analysis on these sites' social/community role.

Delivering a supermarket on the eastern side of the Town Centre

149. As noted in Section 8.5.4 of the Discussion Paper, one of the issues that will impact on the future liveability of Epping Town Centre will be future residents' and workers' ability to access their daily food retail needs in a convenient manner.

Council 14 August 2017

Item 11.3

150. The Discussion Paper explains that ideally there should be a supermarket provided on both sides of the rail line as supermarkets tend to be an anchor use that encourage other smaller and medium enterprises to locate nearby, providing a wider range of local uses for daily needs. A supermarket (Coles) already operates on the west side of the centre but there is no supermarket on the eastern side.
151. As the Discussion Paper explains, the planning system cannot mandate the location and operation of any business. The planning controls allocate floor space ratios and set in place planning controls that seek to create an environment for the business community to operate these types of businesses. Council cannot guarantee a supermarket would be provided, but it can put in place planning controls that promote or incentivise desirable outcomes and apply economic development initiatives to attract a supermarket tenant.
152. Supermarkets require large floorplates. On the eastern side of the Epping Town Centre, the existing lot pattern with multiple small shops requires significant lot amalgamation to occur to achieve an appropriate site. Having considered the pattern of Development Applications already in place and the possible locations for a supermarket, the Discussion Paper presents one site as ideal for a supermarket to service the eastern side of the Town Centre. The landholding (see **Figure 16**) consists of 7 sites – 38-48 Langston Place and 2 Pembroke Street – which together have a site area of approximately 2,900sqm.

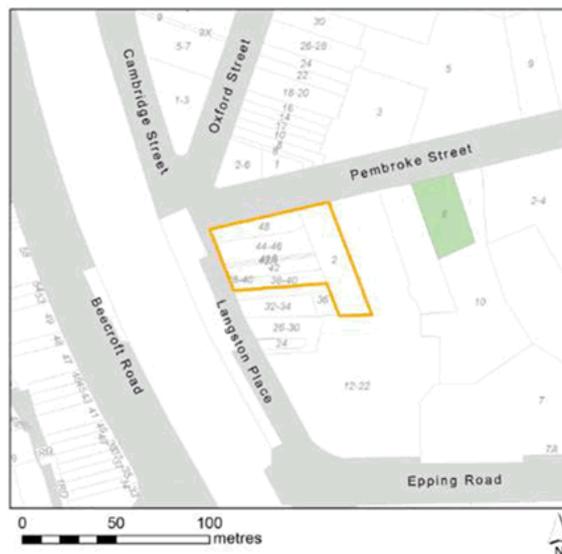

Figure 16 - Site identified within the Discussion Paper as a potential supermarket site on eastern side of Epping Town Centre

153. The question in the Discussion Paper, standard question 8h, asked *Should Council seek to actively encourage a supermarket site on the eastern side of the Epping Town Centre by providing floor space and height bonuses to incentivise the site amalgamation necessary to achieve a supermarket?*

Community Feedback

154. Specific feedback with regards to the eastern side was as follows:

Council 14 August 2017

Item 11.3

- a. Most respondents were positive about a supermarket on the eastern side of the rail line. There was a perception that additional residential development on the eastern side would necessitate this. As noted above, many submissions did not wish to accept height increases to incentivise this use.
 - b. Some alternative locations were suggested besides the one raised in the Discussion Paper, such as church and library sites on the eastern side, or at the end of Chester Street where traffic is less of an issue.
 - c. Few felt that supermarket options on the western side and/or nearby centres was sufficient, and that an additional supermarket was not needed on the eastern side.
155. Specific feedback with regards to the western side was as follows:
- a. There were more mixed views about additional or new supermarkets, and this seemed to be affected by the fact that there is already a supermarket on the western side.
 - b. Most respondents did not support planning incentives to deliver a supermarket.
 - c. Some respondents saw supermarkets as a secondary consideration on the western side, instead considering smaller shops, services and other commercial floor space as more important.
 - d. Some respondents suggested that DCP controls be drafted to support delivery of a supermarket, rather than incentives.

Conclusions and recommendations

156. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude and recommend the following principle**:
- a. That the requirement for 3 storey commercial podium (as discussed, above) would provide additional floorspace for commercial and retail uses that could assist in potentially delivering a supermarket on the eastern side.

Other Large Floorplate Retail Options

157. As noted in Section 8.5.4 of the Discussion Paper, Council has two Preliminary Planning Proposals seeking to increase FSR and height on sites on the western side of the Epping Town Centre. In both the proposals submitted there are large floorplate shops provided for in the lower levels. (Refer to **Figures 17 and 18**).
158. In order to achieve a role for Epping as a sub district centre, it is critical that these sites provide commercial levels in a podium and that larger floorplate shops are retained within it. The DCP currently requires up to a 4 storey podium be provided for the Beecroft Road Site (see **Figure 18**). However, the current planning controls do not contain any provisions that require the applicants to retain large floorplate outlets. There are also no controls that require a supermarket site be retained for the site on the western corner of Rawson Road and Carlingford Road
159. This type of landuse/planning control has traditionally not been specified in a DCP and instead it has been left to the market to determine the mix of retail shop sites in a development. However, it is recommended that Council

Council 14 August 2017

Item 11.3

strengthen its DCP controls to specify that large floorplate retail should be provided.

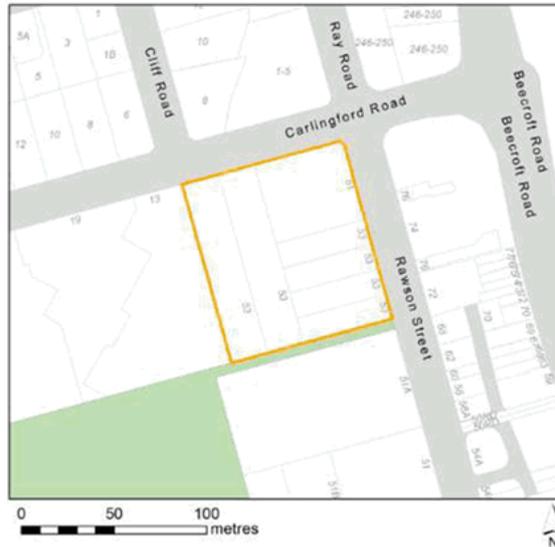

Figure 17 - Oakstand land holding

Figure 18 - Beecroft Road land holding

- 160. The circumstances for these sites are different to those discussed above in relation to providing a supermarket in the east. These sites have effectively already been amalgamated so there is no incentive required to promote amalgamation.
- 161. However, in both cases the applicants via their Preliminary Planning Proposals are seeking additional density on these sites over and above what is permitted

Council 14 August 2017

Item 11.3

under the current controls. There are various other issues, particularly traffic management and urban design, that need to be considered before any decision about whether these sites will be able to be developed at higher densities.

162. However, a position Council could take is that any additional density on these sites (subject to Council being satisfied it is satisfactory from a traffic and urban design point of view) would be conditional upon large floorplate shops being provided.

163. The Discussion Paper question (8i) asked: *Should Council consider floor space incentives to seek to ensure larger floorplate retail shops on these sites?*

Community Feedback

164. There was a common, though not unanimous, view that more retail options are required across Epping. However, amongst the respondents who discussed incentives, most did not want Council to consider incentives to encourage amalgamation of large floorplates.

Conclusions and recommendations

165. These two sites are subject to another standard question (11a) in the report that asks if further consideration of the Planning Proposals (including the Austino planning Proposal) be deferred until the Traffic Study is complete so the traffic implications are fully understood (see on Traffic Chapter, below).

166. Council Officers therefore, **recommend the following principle:**

- a. That the consideration of large floorplate controls be deferred until the preliminary planning proposals can be progressed. See also recommendations in Traffic Chapter, below.

SOCIAL INFRASTRUCTURE CHAPTER

167. Chapter 9.0 Social Infrastructure comes from technical work initially prepared for Council by Suter Planners and Elton Consulting on Council's social infrastructure across the City of Parramatta local government area. The analysis relevant to the Epping suburb was extracted and presented in the *Epping Social Infrastructure Study* prepared by Council which supported the exhibition of the Discussion Paper.

168. The role of the Chapter 9.0 Social Infrastructure is to identify principles that will guide future decision making on the provision of social infrastructure. The outcomes are via feedback received on the questions.

169. The Discussion Paper recognises that the process will also need to be informed by project feasibility and financial analysis prior to Council making any decisions on exactly how and where social infrastructure changes are pursued in the future.

170. The Discussion Paper looks at the areas requiring attention in Epping:

- a. Improving access to open space
- b. Location of potential future Civic Focal Point
- c. Methods for funding and delivering a potential future Civic Focal Point
- d. Dence Park - Epping Aquatic and Leisure Centre.

These are summarised below.

Improving open space provision in Epping to 2036

- 912 -

Item 18.6 - Attachment 1Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

171. Section 9.5.1 of the Discussion Paper discusses three issues that seek to improve open space provision to meet the Epping community's needs by 2036. These are outlined and addressed below.

Assessing where new land should be acquired for open space

172. The Discussion Paper's recommended principle is that Council look at opportunities to expand the size of existing parks over and above creating new parks. The Discussion Paper's standard question (9a.) asks: *Do you support an approach of expanding existing parks in and around Epping ahead of the creation of a new park in the area around the Epping Town Centre?*

Community Feedback

173. Feedback from both the submissions and Phase 2 Community Workshops shows very strong community support for expanding open space opportunities in Epping, though it is noted that not all submissions appeared to view this question as a choice between expanding existing parks versus creating a new park. (A more detailed summary of feedback to this question is contained in **Attachments 2 and 3**).

Conclusions and recommendations

174. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. The community's strong support for expanding access to open space is noted.
- b. Community sentiment reflects the directions outlined for open space (parks) in Council's draft Social Infrastructure Strategy (SIS), which is to be publicly exhibited between August – September 2017, and is expected to be finalised by the end of 2017. In relation to parks, the draft Strategy suggests no net loss of current parks and outdoor recreation space provision in the City of Parramatta LGA, to increase the utilisation and hours of use of Council's existing parks through improvements to quality and design, diversity of offer, enhanced pedestrian, cycle, public transport connections and or parking facilities, and further to seek to increase provision of open space for parks and outdoor recreation.

175. Council Officers therefore, **recommend the following principles**:

- a. That Council should investigate a series of detailed options to ensure that all its open space needs are met for the growing Epping population.
- b. That community feedback on expanding access to open space parks in Epping be considered as an information input to inform finalisation of Council's Social Infrastructure Strategy and the preparation of an Organised Sporting Asset Assessment Report (OSAAR) which is currently being drafted.

Acquisition of former bowling club site (725 Blaxland Road)

176. The Discussion Paper explains that a Planning Proposal by Austino Property Group applies (in part) to the former Epping Bowling Club site situated at 725 Blaxland Road (refer to **Figure 19** below). The site is currently zoned RE1 Public Recreation zone and identified for acquisition on the Land Reservation Map in *HLEP 2013*.

Council 14 August 2017

Item 11.3

Figure 19 - Former bowling club site – 725 Blaxland Road, Epping

177. Despite this, the Hornsby Council concluded in April 2016 that the purchase of the site for the purpose of expanding Forest Park *is unlikely to represent value for money when compared with alternative open space options within the locality.*
178. The applicant's planning proposal is currently proceeding through the Department of Planning and Environment's Pre-Gateway Review process. In November 2016, Council nominated to be the relevant planning authority (RPA) in order to have influence over the outcome. It did so on the condition that the Gateway Determination is issued after the exhibition of the Discussion Paper and technical studies. However, because the Traffic Study is not yet complete, Council is reluctant to determine the planning proposal until the proponent's proposed density has been tested within the traffic model. Regardless, at any point, the Minister for Planning can withdraw Council's status as the RPA and take full control of the planning proposal process and progress it in a way that may not fully address Council's or the community's concerns.
179. The Discussion Paper's standard question (9b.) asks: *Should Council purchase the former Bowling Club site separate from the current Planning Proposal process or continue to consider the Planning Proposal option that it be provided to Council subject to additional density being permitted on the existing landowners site?*

Community Feedback

180. Feedback from both the submissions and Phase 2 Community Workshops shows very strong community support in favour of purchasing the Bowling Club and for Council to not progress the Planning Proposal. (A more detailed summary of feedback to this question is contained in **Attachments 2 and 3**).

Conclusions and recommendations

181. Having considered the feedback from the Phase 2 consultations along with Council's analysis, Council Officers **conclude**:

Item 18.6 - Attachment 1Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

- a. Council's Property officers have since undertaken an indicative assessment of the valuation of the site and determine that its value is cost prohibitive. The analysis further finds that Council would achieve better value for money by purchasing individual residential R2 zoned properties elsewhere near the town centre for a new park. Indicative costing of this alternate approach is provided within the *Draft Former Hornsby Council/Epping Town Centre Development Contributions Plans* which are scheduled to be exhibited from August to September 2017.
- b. That should the planning proposal progress, that Council negotiate with the developer for the provision of public open space appropriately located and sized on the site.

182. Council Officers **recommend the following principle:**

- a. That Council should seek to progress the planning proposal with Council as the RPA subject to the Traffic Study being completed before FSRs for the site can be finalised. That Council also negotiate with the developer for the provision of public open space in a way that ensures there is a suitable area of open space which is appropriately sized and located.

Note: Refer also to the response to question 11a pertaining to *Consideration of Planning Proposals/Preliminary Planning Proposals*.

Process for acquiring open space

183. As noted within the Discussion Paper, Council will, as part of future phases of the planning process (initiated via the Discussion Paper) commence the feasibility analysis for identifying potential residential sites that could be acquired to expand existing parks. Consultation with land owners will precede any rezoning because in most instances they will be single detached homes. It will be necessary to explain to the occupants/owners the impacts on their property value, their ability to sell their site and the ability to stay on the site.
184. The Discussion Paper's question (9c.) asks: *Do you support Council pursuing a process where acquisition of land for open space is done on the basis of negotiated acquisition rather than compulsory acquisition?*

Community Feedback

185. With regards to the submissions received, there were mixed responses. Whilst respondents generally supported negotiated acquisition over compulsory acquisition, many other respondents expressed:
 - a. support for compulsory acquisition in limited circumstances only;
 - b. negotiated acquisition for private homes but compulsory at development sites;
 - c. support for any option which would increase open space; and
 - d. strict opposition to compulsory acquisition.

A more detailed summary of feedback to this question is contained in **Attachment 3**.

186. With regards to the Phase 2 Community Workshop, the predominant response supported negotiated acquisition with a few respondents not supporting the idea. (A more detailed summary of feedback to this question is contained in

Item 18.6 - Attachment 1Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

Straight Talk's *Epping Town Centre Review: Phase two – Exhibition period consultation report at Attachment 2*).

Conclusions and recommendations

187. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. Council has prepared a Council wide draft *Social Infrastructure Strategy* (SIS) which is scheduled for exhibition from August to September 2017. The draft SIS: *identifies and assesses existing social infrastructure provision in City of Parramatta LGA. It identifies contemporary challenges we have for realising quality social infrastructure, and finally key opportunities and directions by asset type (including open space) and for City of Parramatta's 13 high growth areas (which includes Epping). This draft Strategy applies to our unique and diverse neighbourhoods as well as our CBD.*
- b. Council is also preparing an *Organised Sporting Asset Assessment Report* (OSAAR). The OSAAR will further assist Council to understand the specific challenges and opportunities that existing with each of our sports fields and determine the priority actions to take to increase provision and utilisation of our sports field open space. This will include sports fields in the suburb of Epping.
- c. The Discussion Paper process which constitutes Stage 1 of the Epping Planning Review aligns with the approaches being undertaken for the draft SIS and OSAAR, both of which are about increasing access to green open space.

188. Council Officers therefore, **recommend the following principle**:

- a. That the findings, analysis and feedback from Stage 1 of the Epping Planning Review process relating to the process for acquiring open space be considered as part of the preparation of the final SIS and OSAAR projects

Utilising existing land more effectively

189. The Discussion Paper explains that there are a number of factors that determine the level of intensity of use of a local park or sports field, to ensure it can be used by the community without being degraded. Two key factors are the amount (or type) of landscaping on the site, and the level of maintenance required. The Discussion Paper provides two examples:

- a. re-configuring landscaping in existing parks could enable more active uses (including both unstructured play and organised sporting activities) while also accommodating for the needs of residents who want to use parks to passively enjoy the outdoors.
- b. provide a different surface treatment to playgrounds and sporting fields to accommodate a higher level of use, such as the use of synthetic sporting surfaces.

190. The Discussion Paper's question (9d.) asks: *Are you supportive of Council investing in improved landscaping and equipment in parks and sporting fields, including investigating synthetic surfaces for sporting fields to cater for more intensive use?*

Community Feedback

- 916 -

Item 18.6 - Attachment 1Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

191. Feedback from both the submissions and Phase 2 Community Workshops revealed there was unanimous community support for improving landscaping, equipment and parks in Epping. There were mixed views on synthetic surfaces, with some accepting and some against their use. The community urged a site-by-site consideration of parks with additional consultation to make future decisions about improvements to parks and sports fields. (A more detailed summary of feedback to this question is contained in **Attachments 2 and 3**).

Conclusions and recommendations

192. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- a. Council Officers recognise that the community of Epping support the upgrade and increased utilisation of parks and sports fields. Council Officers also acknowledge that there is mixed opinion for synthetic sports fields.
- b. The sports fields in the suburb of Epping must be analysed and planned within the context of the overall sports field network in the CoP LGA.
- c. Council has prepared a draft SIS which is scheduled for exhibition from August to September 2017. Work has also commenced on an LGA wide detailed organised sporting asset assessment (ie. the OSAAR).
- d. As part of the above documents Council will consider the use of synthetics and other options to increase utilisation and access to sports fields, as well as upgrades to parks within Epping.

193. Having considered the feedback from the Phase 2 consultations, Council Officers **recommend the following principle**:

- a. That the responses provided as part of the Phase 2 consultation process for the Epping Planning review relating to landscaping and synthetic surfaces for parks will inform the finalisation of the Social Infrastructure Strategy and Organised Sporting Asset Assessment Report. The intention is to finalise the SIS by the end of 2017.

Establishing partnerships to make better use of existing facilities

194. Large institutional landowners, including government and non-government schools, provide opportunities for Council to facilitate partnerships with local community organisations (such as amateur sports clubs) to make better use of existing facilities for the local community. In the case of schools, many children within the Epping community use their schools' open space areas during the week, but are unable to use the same fields on the weekend in organised sporting activities by non-school groups. The way in which schools are fenced off, and the way landscaping is used to prevent access is important to ensure the safety and supervision of students during school days, however there is an opportunity to consider further community use of schools' sporting fields.

195. Council considered a report on 13 June 2017 where it resolved to enter into a Memorandum of Understanding (MOU) with the NSW Department of Education (DOE). The associated Investigation Program identifies seven action areas that together form the basis of Council's initial work with DOE:

- a. Increase community access to sports fields.
- b. Establish formal arrangements between DOE and Council to continue use of Carlingford High School sports fields.

- 917 -

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

- c. Increase community access to school halls and related facilities.
 - d. Increase community access to library facilities.
 - e. Proactive joint planning for the growth of Telopea and the shared use of school facilities and community assets.
 - f. Proactive joint planning and preparation to support the opening of Wentworth Point Public School.
 - g. Proactive joint planning of a primary school in the Carter Street Precinct.
196. The Discussion Paper sought feedback on how this MOU should be pursued in the Epping area through question 9e. *Which schools should Council pursue in the Epping area to progress the MOU between Council and the Department of Education to improve the availability of sporting fields?*

Community Feedback

197. The community's views from both submissions and the Phase 2 Community Workshops were as follows:
- a. There is broad support for use of school facilities.
 - b. Some respondents query some of the detail about which schools and which facilities.
- A more detailed summary of feedback to this question is contained in **Attachment 3**.

Conclusions and recommendations

198. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. That there is broad support for Council to work with schools to increase community use of school assets.
 - b. Council is commencing implementation and this includes investigating the suitability of individual schools and assets for community use.
 - c. Initial actions will focus on analysing the suitability of sports fields on specific school sites.
199. Council Officers therefore, **recommend the following principle**:
- a. That the detailed community feedback provided as part of the Phase 2 community engagement process for the Epping Planning Review inform the implementation of the MOU with the DOE.

Location of potential future Civic Focal Point

200. Section 9.5.2 of the Discussion Paper defines a **Civic Focal Point** as comprising:
- a. A library and community facility floor space; and
 - b. A public urban plaza.
201. The Discussion Paper (and *Epping Social Infrastructure Study* which supports the Discussion Paper) identifies:
- a. That to meet the needs of a larger population living in a higher density environment by 2036, the Study recommends the provision of a 3,500sqm multi-purpose facility based on the Community Hub model

Council 14 August 2017

Item 11.3

(involving library and community facility floor space). This could include the co-location of an expanded library offering, as well as community meeting rooms, study areas, community programming facilities and the like.

- b. That the 550sqm Epping library facility requires an additional minimum 1,000sqm to meet current population needs.
202. The Discussion Paper subsequently proposes three options for a civic focal point within the Epping Town Centre:
- a. Rawson Street car park site (refer to **Figure 14**);
 - b. Epping Library site (refer to **Figure 15**); or
 - c. Two civic focal points each with a range of services.
203. The Discussion Paper then presents the Council Officer recommendation which is for Option 1 – Rawson Street Car Park site as *the site is better able to accommodate a Community Facility Hub and Civic Space in a way that can be integrated into the broader pedestrian network and town centre. ...[it] does not result in the loss of any existing community facility given that the public car park can be located underground below the new Community Facility Hub whereas the Epping Library Site and Pembroke Park would result in the loss of local open space if Pembroke Park was converted into a more formalised Civic Space.*
204. The city-wide Draft Social Infrastructure Strategy which is scheduled to be exhibited from August to September 2017, identifies the need to locate and plan for a civic focal point within the Epping Town Centre.
205. The Discussion Paper asked three questions relating to a Civic Focal Point:
- a. Questions 9f. and 9g. asked: *Where is your preferred location for a Civic Focal Point incorporating a Community Facilities Hub and some form of Civic Space? and Why is this your preferred location?*
 - b. Question 9h. asked: *Would you support existing community facilities sites being sold to assist with funding a new consolidated single community hub to provide a higher quality community facility somewhere else within the Epping Town Centre?*
 - c. Question 9i. asked: *Should Council seek to develop Council-owned sites to maximise the funding available to deliver a new Civic Focal Point?*

The responses to the above questions pertaining to a Civic Focal Point are consolidated below.

Options for funding and delivering a potential future Civic Focal Point

206. Section 9.5.3 of the Discussion Paper proposes three options for funding and delivering a potential future Civic Focal Point:
- a. Selling land that becomes surplus to requirements if a single Civic Focal Point is built;
 - b. Maximise the development potential of sites to assist with funding a Civic Focal Point; or
 - c. Allowing additional density to secure a new Civic Focal Point.

These are discussed below.

Item 18.6 - Attachment 1Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

Selling land that becomes surplus to requirements if a single Civic Focal Point is built

207. As noted within the Discussion Paper, all Council-owned sites located within the town centre have some development potential for which Council could realise value by selling the site for redevelopment. Council could seek to sell any number of sites it currently owns to provide funding for delivery of the community infrastructure discussed in this section.

208. The purpose of selling sites would not be to reduce the level of services. Instead, the strategy would be to provide improved services in a more efficient way on a consolidated site.

Maximise the development potential of sites to assist with funding a Civic Focal Point

209. As noted within the Discussion Paper, one option for funding the provision of Community Infrastructure is for Council to realise the value of land holdings in a way that provides the community with a financial return that can be used to assist with funding the new Civic Focal Point (the EOI process that Hornsby Shire Council undertook before the Local Government boundary changes that saw Epping included in the City of Parramatta is an example which involved the Council finding a partner to develop a site). Another avenue can be through a planning proposal process involving Council owned land. Two Preliminary Planning Proposal examples were provided in the Discussion Paper.

210. The redevelopment of Council owned land in partnership with other partners can deliver significant community benefits that will allow the delivery of community infrastructure in a more financially sustainable manner. The Discussion Paper seeks feedback on whether the community is comfortable with this approach.

211. The Discussion Paper's question (9i.) asks: *Should Council seek to develop Council-owned sites to maximise the funding available to deliver a new Civic Focal Point?*

Allowing additional density to secure a new Civic Focal Point

212. The Discussion Paper notes two Preliminary Planning Proposals, for sites adjoining the Rawson Street Carpark Site. Both propose an increase in the overall density permitted on their site and both proposals seek to underground the carpark, and provide community facilities and a civic space.

213. The Discussion Paper's question 9j. which asks the community to consider a trade-off between timely provision of community facilities against additional density being permitted in the town centre, was: *Are you willing to accept further increases in density in the town centre if it would assist with funding a new Civic Focal Point?*

Community Feedback

214. Community feedback received from the submission process and Phase 2 Community Workshops on questions 9f, 9g and 9h pertaining to a Civic Focal Point indicated mixed views:

- a. The most common response was a preference for two sites (and of these, most expressed support for the Rawson Street Car Park and Library sites). The key reasons for this included a preference for having different sites for different uses and a perception of "fairness" across both sides of the rail line.
- b. Of those who preferred a single site, the most common response was the Rawson Street Car Park site. The main advantages for this site

- 920 -

Council 14 August 2017

Item 11.3

were seen to be access, site size, parking and proximity to Boronia Park.

- c. There was proportionately more support for Council seeking to develop Council-owned sites, than for selling existing community facilities or accepting further increases in density from the Phase 2 Community Workshops. This feedback was more supportive of such redevelopment models of Council-owned sites.

215. Refer to Straight Talk's *Epping Town Centre Review: Phase two – Exhibition period consultation* report at **Attachment 2.a** more detailed summary of feedback at **Attachment 3**.

Conclusions and recommendations

216. Having considered the feedback from the Phase 2 consultations and submissions, Council Officers **conclude**:

- a. Council Officers note and support the community's preference for community facilities on both sides of the railway line.
- b. Council Officers note and support the community's preference for Council to use its current assets at Rawson St and Chambers Court (Epping Library) for community uses.
- c. Council officers note that there was no clear preference over the three options. However most support was given to the "developing council owned sites" option.

217. Council Officers therefore, **recommend the following principles**:

- a. That Council utilise its assets at Rawson Street car park and Chambers Court to provide community infrastructure and civic focal points on both sides of the town centre.
- b. That Council seek to develop a community hub (defined above) but on one of the sites and other adjunct uses for the other site.
- c. That there be no net loss of community facility floor space overall in Epping.
- d. That Council seek to increase the utilisation of all of Council's current assets in Epping for the broader community.
- e. That further feasibility testing of Council owned land assets should be undertaken (including additional community consultation) to develop options - including a Community Hub (defined in the Discussion Paper as a *facility incorporating a library and community facility floor space*) and public urban plaza - and potential funding mechanisms for community facilities in Epping.

Dence Park – Epping Aquatic and Leisure Centre

218. Council's *Social Infrastructure Study* identifies that the Dence Park – Epping Aquatic and Leisure Centre is aging and has accessibility issues which means it does not meet current standards for this type of facility. Hornsby Shire Council considered the option of closing the centre at the time the pool was its responsibility.

219. Section 9.5.4 of the Discussion Paper acknowledges that as part of the development of a community facilities strategy, Council will need to determine what role the Epping Aquatic and Leisure Centre might play. For instance,

Council 14 August 2017

Item 11.3

should the centre be redeveloped or modernised as an aquatic centre, or put to an alternate community use.

220. Through the Phase 1 community consultation process, it was clear the facility is a beloved community asset to sections of the Epping community. However, despite this impassioned position, usage levels of this facility have been in decline over the longer term, except in the last year where usage levels had actually increased since City of Parramatta took ownership.
221. The Discussion Paper noted the strengths and the weakness of the site. The strengths are that Council owns the land and that Council will open the pool for the October 2017 summer season. The weaknesses of the site are that:
- a. The Centre is aging, needs significant upgrading, and is at risk of significant infrastructure failure
 - b. It lacks visual prominence,
 - c. It is in a bushfire-prone site,
 - d. Is underutilized, and
 - e. The topography of the site makes modernising the site a relatively expensive exercise and impacts on its accessibility.
222. Adjoining bushland along Terrys Creek is a key wildlife corridor (confirmed in recent bushland fauna surveys).
223. The Discussion Paper's question (9k) asks: *What should be the future use of the Dence Park Aquatic Site?*

Community Feedback

224. The feedback from both the submissions and Phase 2 Community Workshops showed there was very strong community support to retain Dence Park for public and recreational uses. There was also strong community support to retain the swimming pool, and perhaps increase/improve it in some capacity with an expanded indoor fitness centre or similar uses. Furthermore, many respondents highlighted the environmental conservation value of the bushland and the need for its retention along with carefully selected passive recreational uses.

Conclusions and recommendations

225. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. Council's Draft SIS which is being exhibited from August to September 2017 draws attention to the LGA-wide issues pertaining to the overall aquatic infrastructure/network.
 - b. Adjoining bushland along Terrys Creek requires protection and there needs to be a restriction on the expansion of Dence Park aquatic facility.
226. Council Officers therefore, **recommend the following principles**:
- a. The feedback obtained from the Phase 2 consultation process be considered and integrated into the exhibition process for the Draft SIS.
 - b. A master plan process be undertaken for the entire Dence Park site, giving consideration to the future options for aquatic and other water related activities for the Epping Aquatic and Leisure Centre, as well as

Council 14 August 2017

Item 11.3

increasing the overall recreation uses of the site and adjoining sensitive bushland.

PUBLIC DOMAIN CHAPTER

227. The intense growth within the Epping Town Centre has presented Council with the opportunity to review aspects of the centre's public domain, identify opportunities for improvements and present these to the community for discussion. The feedback and direction will also assist Council in advising Development Application and Planning Proposal applicants until new planning controls can be formulated. The areas requiring immediate attention are pedestrian connections and footpath widths.

228. Numerous urban design themes have been consistently raised throughout the consultation process on:

- a. Pedestrian connections - That pedestrian connections should be:
 - i. created or improved either between or through blocks;
 - ii. improved between different land uses and attractors (i.e. the centre and open space areas);
 - iii. created at mid-block where block lengths were long; and
 - iv. improved to form linkages from one side of the centre to the other.
- b. A vibrant centre – The community are enthusiastic about the possible future of Epping. They want their town centre to reflect the vibrant, friendly, community which they are familiar with.
- c. Enable liveability - The community see that future infrastructure planning needs to "enable liveable town centres" as an overarching principle.

229. The Discussion Paper subsequently presented two public domain issues:

- a. Through-block connections, streets, laneways and arcades and shareways; and
- b. Wider footpaths (which pertain to building setbacks).

230. The Discussion Paper asked two questions each were supported by a diagram:

- a. 10a. *Are there any other through site links outside of those that are already proposed in Figure 30 that should be considered by Council?* and
- b. 10b. *Do you think the new ground floor setbacks proposed in Figure 31 for Epping Town Centre are appropriate?*

Community Feedback

231. Community feedback (from 23 submissions) received on the through-block connections indicated the following:

- a. Some submissions broadly reflected that any and all links should be encouraged, in order to improve safe and pleasant access across the town centre.
- b. Many submissions also identified specific existing links that they wished to see reflected in the map.

Council 14 August 2017

Item 11.3

- c. Some submissions proposed:
- extensions to existing links, and/or
 - where a new link could be created.
232. Community feedback (from 21 submissions) received on wider footpaths said the following:
- a. The majority of submissions were supportive of the new ground floor setbacks proposed in the discussion paper.
 - b. Some submissions noted that having setbacks which are consistent are important, and noted that the desired setbacks are not being achieved consistently through current controls (particular concern about current redevelopment at 35 Oxford Street).
 - c. Some respondents felt that setbacks should be further increased (for example, on Oxford Street, Epping Road and Beecroft Road); justifications included that increased setbacks might provide space for larger trees, and that footpaths will continue to get busier in the town centre as Epping grows and that this could present safety and accessibility risks – particularly to those with limited mobility. Trees were seen in some submissions as being important to Epping's character, as well as having shading, cooling and aesthetics benefits.
 - d. Some respondents also asked Council to consider cycling movement through Epping, as increasing bicycle trips could improve traffic issues.
 - e. A couple of respondents were not supportive, as it was felt that the current setback situation is adequate.
 - f. One developer was also not supportive of the proposed setbacks and instead proposed that setbacks be flexible in order to accommodate large retail/commercial floorplates at podium levels, should be determined at a master planning stage, and that having tightly controlled setbacks might not achieve the best outcome in all cases.
233. Refer to **Attachment 3** for a summary of the submission responses. Also, Public Domain matters were not covered by the Community Workshop Sessions.

Conclusions and recommendations

234. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. There are a number of opportunities to improve the public domain in terms of delivering through-block links and wider footpaths.
 - b. The best mechanism for delivering public domain initiatives is via new DCP controls (where appropriate) and a revised public domain plan.
235. Council Officers therefore, **recommend the following principles**:
- a. That as part of Stage 2 of the Epping Planning Review, that Council prepare appropriate DCP controls and a public domain plan that deliver through-block links and wider footpaths.

TRAFFIC CHAPTER

Council 14 August 2017

Item 11.3

236. As noted on the Discussion Paper, Council has commissioned EMM Consulting to prepare a Traffic and Land Use Options Study (Traffic Study) to provide an evidence-based approach to the assessment of existing and future traffic conditions with different development scenarios for the Epping Town Centre and surrounds, including potential infrastructure improvements.
237. The Traffic Study builds on traffic study work which was carried out previously by Halcrow in 2011 on behalf of Hornsby Shire Council, the former Parramatta City Council and the Department of Planning and Environment as part of the proposed new planning controls implemented by the Department of Planning and Environment in 2014.
238. There are significant concerns from the community around the impacts of the additional residential densities permitted under the 2014 planning controls given the additional population envisaged and the subsequent impacts on an already congested and constrained road network. There is also increasing developer pressure to increase residential densities (through Planning Proposals) beyond that permitted under the existing planning framework.
239. EMM prepared an *Interim Traffic Modelling Report* which was exhibited as supporting information to the Discussion Paper. It included preliminary analysis to provide an indicator of the issues and options available to allow discussion of these issues as part of the exhibition process.
240. The preliminary advice concludes that regardless of what land use density options or road work improvements are put in place there is little scope for significant improvements to the way the road network operates in the Epping Town Centre without new and additional policies to reduce car usage and shift more trips that currently come through the centre by car onto public transport modes.
241. This chapter of the Discussion Paper presented six questions that play a role in developing the scenarios for the purposes of the traffic model exercise.

Consideration of Planning Proposals/Preliminary Planning Proposals

242. The Discussion Paper explains the level of developer interest in the Epping Town Centre with three planning proposal under assessment and other land owners also expressing a desire to seek uplift.
243. The standard question (11a) asks: *Should Council delay the processing of current and future Planning Proposals within the Epping Town Centre and surrounds until the Traffic Study is completed?*

Community Feedback

244. This matter received a total of 103 submissions - the most received for any standard question.
245. The predominant view (94 submissions) is overwhelmingly in favour of delaying the progression of any planning proposal including existing planning proposal, preliminary planning proposals and future planning proposals.
246. The majority of submissions to this question also raised concerns about existing traffic congestion in Epping (particularly around the Town Centre). Specific matters raised included:
- a. Residential growth has already outpaced the original traffic review carried out by Hornsby Council.

Council 14 August 2017

Item 11.3

- b. There is a need to address traffic flows in and out of North Epping before further major developments are started.
 - c. The volume of traffic has already increased markedly over the past decade and this is significantly detracting from the amenity of the Town Centre, with current levels of congestion only likely to worsen.
 - d. A workable traffic solution for existing problems needs to be developed by Council and the RMS before any future Planning Proposals should be considered.
247. There was a broad view that further traffic analysis is required, and commentary on the Traffic Study was offered. Many submissions suggested that any additional impact from Planning Proposals (both current and future) needs to be carefully studied and understood, and that Council should not delay pending traffic studies.
248. A few submissions mentioned that the quality of the recommendations in the Traffic Study will depend on the quality of the assumptions made during the modelling performed. It was suggested that the Traffic Study should be peer reviewed and made available for public comment prior to finalisation. One submission recommended that the Traffic Study should assess usage and movement patterns in areas such as Cliff Road.
249. A total of 16 respondents specifically recommended that the Austino Planning Proposal be placed on hold until the Traffic Study is finalised, citing concerns about the level of density and the impact on local area traffic. In contrast, a developer submission from Austino strongly disagreed that current planning proposals be delayed until the traffic study is completed; this submission stated that this is currently the only major site in Epping that has been determined to have strategic merit by the NSW Department of Planning and Environment, the JRPP, and has been supported on traffic grounds by the RMS.
250. Some community responses sought to also delay development applications. However, under the *Environmental Planning and Assessment Act 1979* this is not legally possible. This position has been reinforced by Council's Administrator at the public launch of the Epping Planning Review in December 2016 as well as at subsequent community consultation sessions.
251. The above views were also expressed at the Community Workshop Sessions. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

Conclusions and recommendations

252. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
253. The Epping Town Centre currently experiences significant traffic delays during morning and afternoon peaks as a result of the significant amount through traffic as well as increased residential densities resulting from the new planning controls implemented in 2014. Until the traffic impacts of allowing increased development above and beyond current planning controls are properly understood (including the cumulative impact of current and potential planning proposals), any planning proposal should not be finalised.
254. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:

- 926 -

Council 14 August 2017

Item 11.3

- a. Council has deferred consideration of a Planning Proposal and two Preliminary Planning Proposal processes on account of the work being undertaken by the Epping Planning Review:
 - i. The Austino Planning Proposal seeking to deliver an additional **272 dwellings**.
 - ii. The Oakstand Preliminary Planning Proposal seeking to deliver an additional **922 dwellings***.
 - iii. The Winten/Lyon Group Preliminary Planning Proposal seeking to deliver an additional **584 dwellings***.

Note: with regards to the two preliminary planning proposals, it is accepted that the dwelling numbers as currently proposed cannot be delivered simultaneously as both proposal seek to develop Council's car park.

- b. In addition to the above, Council is aware of at least two other land holders potentially looking to pursue a planning proposal process. Therefore, there is an urgent need to understand the traffic issues prior to advancing proposals that seek development growth above the March 2014 planning controls.
 - c. The Epping Town Centre has been doing a lot of the "heavy lifting" for the residential growth in this vicinity of Sydney. With the number of planning proposals and precinct planning projects across the LGA before Council, Council does not require any further uplift in Epping for the purpose of meeting its housing targets as expressed in the Greater Sydney Commission's *Draft West Central District Plan*. Also, as has been made clear, the scope of the Epping Planning Review has been to address the failings of the planning system that came into effect in March 2014. As such, additional requests for rezoning (received through the submission process) will not be considered as part of the Epping Planning Review.
 - d. The pace of change is having a significant impact on the Epping residents. Council should therefore continue to manage any further formal requests for uplift (eg. planning proposal applications) outside of the Epping Planning Review process and be subject to the Epping Traffic Study which is still being completed.
 - e. The scope of the traffic analysis has been undertaken to better understand the traffic impacts of any growth, not necessarily to enable any further growth within the Town Centre. Therefore, there is no urgency or need for Council to consider individual requests for uplift as part of the Epping Planning Review process. Instead, that applicant's seeking uplift should do this via a formal planning proposal process.
 - f. There is some urgency in bringing about the planning control changes to address the unintended impacts associated with the new planning controls that came into effect in March 2014 as soon as possible. The inclusion of other landowner sites within the Stage 2 process will only cause further delay to this process.
255. Council Officers therefore, **recommend the following principles:**
- a. That Council continue to manage and progress the current planning proposal (Austino) given the potential risk of not being the Relevant Planning Authority (ie. the State Government becoming the Relevant

Council 14 August 2017

Item 11.3

Planning Authority). As mentioned previously, this is to ensure that Council's and the community's concerns and issues are addressed (eg. open space – refer to 'Acquisition of former bowling club site (725 Blaxland Road)' in Social Infrastructure section (ie. Response to question 9b). However, should the proposal proceed to Gateway Determination, that Council request that a condition be placed on the Gateway to ensure that the proposed FSRs for the site cannot be finalised until the Traffic Study is completed.

- b. That following the Local Government elections in September 2017, the new Councillors be consulted and briefed on the progress of the Epping Planning Review and the community feedback received with regards to the future of the Rawson Street Car Park. This will enable Council officers to engage with the applicants of the 2 Preliminary Planning Proposals (Winten Lyon and Oakstand) to allow these proposals to be further considered.
- c. That other landowners seeking to pursue development uplift will need to pursue this via a formal planning proposal process and not through the Epping Planning Review process.
- d. That the Traffic Study must be completed to ensure that the traffic impacts of proposals seeking development uplift (with the exception of those changes proposed to deal with the unintended impacts of the previous UAP planning process) within Epping can be properly understood prior to any proposal being finalised. Furthermore, unless innovative solutions or initiatives that significantly curb or restrict car ownership/movements are incorporated as part of the development, that proposals seeking uplift will not be able to progress or be further considered given current traffic issues in Epping. Notwithstanding the above, any proposed parking/vehicle management solutions need to be assessed via the Traffic Study in order to determine its impact on the wider road network.

Car Parking Rates

256. Section 11.7.2 of the Discussion Paper explains the inconsistency between the parking rates between the Hornsby and Parramatta DCPs and the need to make them consistent. The Discussion Paper notes that parking rates should be reviewed and potentially further reduced to encourage residents to use public transport and other active transport modes.
257. The objectives around reducing car parking rates in DCPs is to minimise local car ownership and decrease private motor vehicle use.
258. The Discussion Paper's question (11b.) asks: *Should Council consider further reducing car parking rates as a means to reducing traffic within the Epping Town Centre and encourage public transport usage?*

Community Feedback

259. Community views (from a total of 38 respondents) were mixed with just over half of submissions not supporting this approach to reducing traffic.
260. Respondents that were not supportive (22) were of the view that reduced availability of car parking spaces will result in more on-street parking. Several believed that the current parking rates were reasonable and should not be changed. Some were sceptical on whether this would actually work in terms of

Council 14 August 2017

Item 11.3

reducing car ownership, and felt a more effective approach to reducing congestion would be to limit development instead.

261. Respondents that were supportive (11) generally took the view that the number of cars on the roads need to be reduced, with some supporting any measure to reduce the traffic load on Epping. Some submissions which were broadly supportive did note that reduced rates would be more appropriate for residential uses than for retail and service providers.
262. Many submissions were of the opinion that owning a car is necessary and that people cannot rely on public transport. These submissions mentioned that the new residents will need cars to move families around to libraries, school, after school activities, pick up from the station etc.

Conclusions and recommendations

263. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
264. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. That given the results of the interim traffic findings, reducing car parking rates is an important planning and traffic mechanism that can contribute towards the reduction of local car ownership and alternatively promote active and public transport options through and within Epping.
265. Council Officers therefore, **recommend the following principles**:
- a. The car parking rates across the Hornsby and Parramatta DCPs be reviewed to determine appropriate lower parking rates.
 - b. That any proposed lower parking rate be tested as part of the traffic modelling in the Epping Traffic Study before changes are finalised.
 - c. That further to points a. and b. above, an interim step towards reducing parking rates could be to amend Hornsby DCP parking controls (which have minimum parking rates) to be in line with Parramatta DCP parking controls (which have maximum parking rates).

Commuter Parking Station

266. Section 11.7.3 of the Discussion Paper explains that a number of stakeholders suggested that Council should either provide or lobby the State Government to provide commuter parking near the Epping Station. The argument put forward by proponents is that this would clear surrounding streets of commuter parking and improve access to local shops for local people.
267. Commuter parking at train stations is a complex issue that depends very much on local context. It is acknowledged that allowing people to drive to stations to use public transport is decreasing the length of cross-city vehicle trips and increasing the length of public transport trips which is to be encouraged. However, the provision of commuter car parks can have other unintended impacts unless it is implemented sensitively and in appropriate locations.
268. Again, the objectives around the car parking policy for the Epping Town Centre is to minimise local car ownership and decrease private motor vehicle use.

Council 14 August 2017

Item 11.3

269. The Discussion Paper's question (11c.) asks: *Is there a suitable site for which Council should lobby the State Government to have a commuter parking station provided near Epping Station?*

Community Feedback

270. A total of 38 submissions were received with opinions split on this issue.

271. Across submissions supportive of commuter car parking, there was a view that the current situation where commuters park in local streets was not acceptable, as it affected locals, visitors, and businesses. Providing commuter car parking was seen as potentially increasing residents' usage of the rail line; current bus service was generally seen as poor, with commuter car parking as a better alternative. However, it was also noted that elderly residents who were unable to drive might still struggle to use transport.

272. The needs of neighbouring suburbs were also considered in some submissions, with the view expressed that North Epping residents need commuter parking as well; Transport for NSW's current investigations of a similar solution at Eastwood was also raised.

273. As noted above, several ideas about commuter car park sites were suggested:

- a. 240-244 Beecroft Road, mainly due to good station access,
- b. Above Epping Train Station,
- c. Above Rawson Street Car Park,
- d. Under current library site,
- e. Older apartment complex near Epping Station, through an acquisition process, and
- f. Inside newly constructed residential towers.

274. Many submissions took a broader view that any site considered should be within walking distance of the town centre and train station, while others were willing to consider sites outside the town centre in combination with shuttle buses to the station.

275. Amongst submissions not supporting commuter car parking, there was a common view that commuter parking would only increase traffic and local car use. Some felt that this would incentivise commuters from other suburbs coming into Epping to park, thereby impacting the road network and taking away parking from local residents. Others felt there was no suitable space in Epping for a commuter parking station, while others felt that a commuter parking station was a lower priority than valuable commercial, retail and residential space. Some felt that a low-cost shuttle bus would be a better alternative.

276. The above views were also expressed at the Community Workshop Sessions. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

Conclusions and recommendations

277. Having considered the feedback from the Phase 2 consultations on a commuter car parking station in the Epping Town Centre, Council Officers maintain the views expressed in the Discussion Paper and therefore **conclude** the following:

Council 14 August 2017

Item 11.3

- a. It will attract additional trips into the Epping Town Centre for the sole purpose of utilising the car park which will have a further detrimental impact on local traffic conditions and increase traffic congestion.
- b. It will encourage local employees to drive to the centre rather than arrive via public transport due to the increased access to day long parking options.
- c. Experience in other centres suggests that the availability of day long parking encourages more commuters to make the choice to drive to the station because of the increased likelihood they can find a park. If all spaces within the commuter car park are occupied, drivers will park on the street. So parking availability on local streets is not improved.
- d. An integrated transport system would see people take the bus from close to their home to the station to continue their public transport journey. This is most efficient and effective if regular bus services are feasible. The more commuter parking is provided the greater the negative impact on the feasibility of running regular bus services especially given the number of buses that provide access to Epping.
- e. Commuter parking stations do play an important role in promoting public transport but do not consider that Epping is an appropriate location for a commuter parking station.

278. Council Officers therefore, **recommend the following principles:**

- a. That Council Officers not pursue a policy of providing a commuter car parking facility within the Town Centre.

Policies to manage local parking and access to private motor vehicles

279. Section 11.7.4 of the Discussion Paper proposes two options to discourage residents that purchase into new high density development from parking in local residential streets:

- a. Resident or controlled parking schemes; and
- b. Car sharing scheme.

280. As Section 11.7.4 of the Discussion Paper noted, a commonly expressed concern when any proposal is put forward to decrease parking rates on site is that residents will still own a car and will park it on local streets. Should Council consider introducing maximum rates or reducing car parking rates below the "maximum rates" identified in the PDCP 2011 in order to influence mode shift, it is considered that additional measures could also be investigated to discourage residents purchasing into new high density development do not end up parking in local residential streets.

Resident or controlled car parking schemes

281. The Discussion Paper notes that a rollout of restricted/time limited parking zones within residential streets adjacent to higher density development could be investigated along with a resident parking scheme to enable existing residents within lower density residential zones up to a 3 storey apartment building to have the opportunity to apply for a permit to enable residents and their visitors to continue to have on-street parking albeit in a limited and controlled manner. Such initiatives also discourage commuters from parking within local streets close to Epping Station and depending on the nature of the restricted parking roll out, can encourage commuters to catch a bus to the Epping Station.

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

282. The fundamental objectives around introducing a resident or controlled parking scheme is to minimise local car ownership and decrease private motor vehicle use.
283. The Discussion Paper's question (11d.) asks: *Would you support the introduction of a Resident Parking Scheme where owners of new units would not be permitted to park on local streets as a way to discourage car ownership and manage parking on local streets?*

Community Feedback

284. Community views (from a total of 41 respondents) were mixed with more than half of submissions supporting this approach to reducing traffic.
285. Respondents that were supportive generally supported introducing restricted/time parking zones within residential streets adjacent to high density residential development. Others suggested delineating a radius around the station to which the scheme would apply. Others suggested that Council remove "full day" parking in favour of different timed parking options which radiated out from the centre. There was also a specific request for extension of 2-hour parking farther along Oxford Street.
286. Respondents that were not supportive had the following opinions:
- a. Many respondents felt that people would want to own cars, regardless of efforts made by Council to encourage behaviour change.
 - b. Some were concerned about how the value of units might be affected with the introduction of a scheme. One was unsure about how this approach could help with reducing car ownership.
287. The above views were also expressed at the Community Workshop Sessions. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

Conclusions and recommendations

288. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
289. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. There is strong community support for a residential or controlled parking scheme
290. Council Officers therefore, **recommend the following principle**:
- a. That Council officers carry out further investigation around the potential implementation of a resident parking scheme in Epping in order to minimise local car ownership and decrease private motor vehicle use.

Car sharing scheme

291. As noted within the Discussion Paper, car sharing enables more sustainable travel habits by making more efficient use of a parking space either on street or within a private development. A single car share vehicle can replace up to 12 private vehicles that would otherwise compete for local parking (source: www.cityofsydney.nsw.gov.au/live/residents/car-sharing). Car share schemes provide flexibility to residents or businesses who either do not own a car, cannot justify car ownership given close proximity to public transport or lack of

- 932 -

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

a parking space. Resident and businesses can book a car online when they need one and pick it up from a car share space.

292. Furthermore, car share users are charged by time and distance, at a rate set by each operator (e.g. GoGET, Hertz24/7). Costs associated with fuel, vehicle maintenance and insurance are usually included in the operator's hire fees. Car share spaces can be located on street with the agreement of Council or within larger scale developments.
293. The objectives around introducing a car sharing scheme is to minimise local car ownership and decrease private motor vehicle use.
294. The Discussion Paper's question (11e.) asks: *Do you support car sharing schemes as measures to decrease vehicle ownership and the potential impacts of decreasing parking rates for sites within walking distance of Epping Station?* This question sought feedback on reducing the rates of car parking provision in new development in the town centre.

Community Feedback

295. Community views were mixed on this question, with the majority of respondents supporting this approach to reducing traffic. Of those supporting the scheme:
- a. Many respondents offered feedback about providing and locating potential spaces:
 - i. Some suggested dedicated spaces be created on both sides of the railway to reduce walking distance for all residents.
 - ii. Some proposed a collaborative approach with neighbouring councils as was the idea of working in a network (along with existing car share facilities at Macquarie Park).
 - b. Other views saw that car share spaces need to be dedicated for car share only, and that spaces should be included in new developments. One developer noted that they would be willing to include car share spaces in their basement parking allowance.
 - c. Some views expressed uncertainty about the effectiveness of car share schemes (even across some of those who were supportive). Some were unsure if it would work effectively in the suburbs, while others were unsure if it would actually reduce car ownership rates.
 - d. Some submissions suggested that Council would need to actively promote and make the community aware of alternative transport options like car sharing in order for this approach to have a positive impact.

Conclusions and recommendations

296. The scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
297. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude**:
- a. On 13 June 2017, the Parramatta Traffic Committee (PTC) and Traffic Engineering Advisory Group (TEAG) approved a number of car share spaces across the city (Item 1705 A3). However, it excluded a 6 car share parking spaces in Epping because whilst: *Council notes that car share may be an important element of creating a less private car*

- 933 -

Council 14 August 2017

Item 11.3

dependent town centre, that car share arrangements be considered as part of the current traffic and land use study for Epping. No further action be taken on car share spaces in Epping until this study is complete.

- b. The community feedback received on this issue reveals there is overwhelming support by Epping residents.

298. Council Officers therefore, **recommend the following principles:**

- a. That Council introduce a car share scheme in the Epping Town Centre as per the recommendations within the PTC report of 13 June 2017.
- b. That the potential for car share schemes to be provided within a development be further explored and if technically supported, be introduced as new DCP controls as part of Stage 2 of the Epping Planning Review.

Policies to manage local traffic congestion

299. Section 11.7.5 of the Discussion Paper proposes a "Stop/Go" traffic controller to manage pedestrian activity at the pedestrian crossing on Rawson Street adjacent to the Rawson Street car park.

300. The Discussion Paper's standard question (11f.) asks: *Do you think Council should employ crossing attendants during peak conflict periods at the Rawson Street pedestrian crossing to manage the flow of pedestrians and vehicles to best manage congestion in Rawson Street?*

Community Feedback

301. With 44 submissions, the community was divided on this issue, with an equal number of submissions supporting/not supporting this approach and a small number undecided. The reasons for supporting the proposal were around improving pedestrian safety and managing congestion. The reasons for not supporting the proposal were around skepticism of its success.

302. The above views were also expressed at the Community Workshop Sessions. Refer to **Attachments 2 and 3** for a summary of the Community Workshop Session and submissions feedback.

Conclusions and recommendations

303. Having considered the feedback from the Phase 2 consultations, Council Officers **conclude:**

- a. Council should consider funding a "Stop/Go" traffic controller on the crossing during peak times to control pedestrians, it would cost of up to \$10,000 per month inclusive of all on costs.
- b. There are technical legal questions over the enforceability of a "Stop/Go" traffic controller.
- c. The effectiveness of a "Stop/Go" traffic controller is also limited, having to be positioned on one side of the street.

304. Council Officers therefore, **recommend the following principles:**

- a. That Council trial a "Stop/Go" traffic controller at the pedestrian crossing on Rawson Street adjacent to the Rawson Street car park for a period of 2 months and report on the effectiveness of the trial to Council's PTC and TEAG by the middle of 2018.

Council 14 August 2017

Item 11.3

COMMUNITY FEEDBACK – GENERAL COMMENTS

305. As has been noted within this report, the scope of the Stage 1 analysis and recommendations has been to address the unintended impacts resulting from the new planning controls that came into effect by the State Government in March 2014.
306. Whilst the purpose of the exhibition was to seek the wider community's opinion on the Discussion Paper's questions, other matters were raised that are outside the scope of this phase of the study. A broad summary of the issues raised is provided below:
- a. The predominant theme from submitters are concerns around:
 - i. Overdevelopment of the Epping Town Centre in terms of what has been built since March 2014, and
 - ii. Further developer interest in the area by way of planning proposals (either existing, preliminary or future planning proposals).

These concerns largely relate to the associated traffic impacts, construction impacts, tree loss, character loss, heritage loss, parking concerns, visual impacts (regarding inappropriate building heights) and environmental impacts.
307. Some submitters situated outside the town centre core have requested upzonings. Council's response is that the Epping Town Centre has been doing a lot of the "heavy lifting" for the residential growth in this vicinity of Sydney. With the number of planning proposals and precinct planning projects across the LGA before Council, Council does not require any further uplift in Epping for the purpose of meeting its housing targets as expressed in the Greater Sydney Commission's *Draft West Central District Plan*. As has been made clear, the scope of the Epping Planning Review has been to address the failings of the planning system that came into effect in March 2014. As such, additional requests for rezoning (received through the submission process) will not be considered as part of the Epping Planning Review process.
308. A submission table details Council Officers response to general issues raised, is detailed in **Attachment 4**.

RECOMMENDATIONS

309. The recommendations detailed in this report are consolidated and contained in **Attachment 6**.

NEXT STEPS

310. As has been noted, the scope of the Epping Planning Review is limited to better managing the impacts of new development generated from planning controls that came into effect in March 2014 and allowing Council to manage current (formal and preliminary) planning proposals seeking growth in the town centre. It is also intended to allow Council to progress decisions made by Hornsby Shire Council on specific heritage matters when it governed part of the Epping suburb.

- 935 -

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 14 August 2017

Item 11.3

311. The recommended principles from Stage 1 also impact on other policy areas of Council which are outside the changes to planning controls to be covered in Stage 2. The findings and analysis carried out to date will be used to inform further work in these areas (ie. social infrastructure) as part of separate processes.
312. Once the new Councillors have been elected, a briefing will be undertaken on the Epping Planning Review process to date, including the endorsed principles, to confirm the future planning direction for Epping as part of progressing Stage 2 of the project.
313. Further discussion with the DP&E will be carried out to determine the appropriate mechanism for which to implement Stage 2 of the Epping Planning Review. For instance whether this can be carried out via a new State Environmental Planning Policy (similar to the previous mechanism which implemented the March 2014 planning controls) or alternatively, via a Planning Proposal process.
314. The community that have given their time in such a generous way to contribute to this stage of the Review will be thanked and advised of the outcomes. Council will continue to engage with the community through future stages of the review.

FINANCIAL IMPLICATIONS

The only recommended principle that would have an immediate and direct financial implication for Council is the trial of a Stop/Go Controller for 2 months (see **point 304**), which would cost Council \$20,000. This would be funded from an existing operational budget.

MINUTES OF THE MEETING OF CITY OF PARRAMATTA COUNCIL HELD IN THE JUBILEE ROOM, PARRAMATTA TOWN HALL, CENTENARY SQUARE, PARRAMATTA ON MONDAY, 14 AUGUST 2017 AT 6:08PM

PRESENT

Amanda Chadwick – Administrator

ACKNOWLEDGEMENT TO TRADITIONAL LAND OWNERS

The Administrator, Amanda Chadwick, acknowledged the Burramattagal people of The Darug Nation as the traditional custodians of this land and paid respect to their ancient culture and their elders past and present.

WEBCASTING COUNCIL MEETING

The Administrator, Amanda Chadwick, advised that this public meeting is being recorded and streamed live on the internet. The recording will also be archived and made available on Council's website.

The Administrator further advised that all care will be taken to maintain privacy, however as a visitor in the public gallery, the public should be aware that their presence may be recorded.

MINUTES

	SUBJECT	Minutes of the Council Meeting held on 27 July 2017
720	RESOLVED	(Chadwick)
		That the minutes be taken as read and be accepted as a true record of the Meeting.

APOLOGIES

An apology was received and accepted for the absence of the Chief Executive Officer, Mr Greg Dyer.

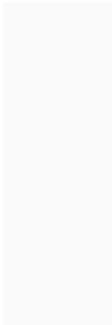

DECLARATIONS OF INTEREST

The Administrator, Amanda Chadwick, advised that she does not own any property in the City of Parramatta Council local government area nor have a direct or non-direct conflict of interest in any matter on the current agenda but noted that in relation to Item 11.3 regarding the Epping Planning Review – Completion of Stage 1 and commencement of Stage 2, she is a member of car share group GoGet.

MINUTES OF THE ADMINISTRATOR

5.1	SUBJECT	Update on the Formation of City of Parramatta Council
-----	---------	---

- 1 -

SUSPENSION OF STANDING ORDERS

737 RESOLVED (Chadwick)
That Standing Orders be suspended to enable consideration of item 11.3 regarding the Epping Planning Review – Completion of Stage 1 and Commencement of Stage 2.

LEADING

11.3 SUBJECT Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2
 REFERENCE F2017/00210 - D05111630
 REPORT OF Snr Project Officer. Also Administrator Briefing Note from Senior Project Officer dated 14 August 2017. Also correspondence from Frances and Richard Lyons, Wai Ling Chan and Save Epping's Forest Park.

738 RESOLVED (Chadwick)

(a) **That** Council receive and note the submissions made on the Epping Planning Review Discussion Paper.

(b) **That** the recommended principles, as identified within the report and contained within **Attachment 6** be endorsed for the purposes of guiding Stage 2 of the Epping Planning review subject to the following amendments:

Traffic Chapter – Consideration of Planning Proposals/Preliminary Planning Proposals
 Clause 255, recommended principle a. be replaced with the following:

a1. That Council write to the Department of Planning and Environment (DPE) advising that significant progress has been made on the Traffic Study to date, however further work still needs to be carried out and land use scenarios tested before this Study can be completed. Council will also confirm that it seeks to retain Relevant Planning Authority status relating to the Austino Planning on the basis that the planning proposal cannot be finalised until the traffic study is completed and to ensure that the community's concerns and issues are addressed (e.g open space – refer to 'Acquisition of former of former bowling club site (725 Blaxland Road)' in Social Infrastructure section (ie Response to questions 9b).

a2. That given the status of the traffic study detailed above, current Preliminary Planning Proposals (Winten Lyon and Oakstand) and any future planning proposals should not be finalised until the Traffic Study is completed.

Traffic Chapter – Car Parking Rates

Clause 265, include the additional principle below:

d. That Council receive a report at the next Council meeting for the purpose of amending the Hornsby DCP parking rates to ensure consistency with the CoP DCP parking rates

Social Infrastructure Chapter – Dence Park – Epping Aquatic and Leisure Centre

Clause 226, include the additional principle below:

c. That the Master Plan for Dence Park be prepared 2018/2019 and include the base assumption of an aquatic facility of 50m.

Heritage Chapter – Rosebank Avenue

Clause 53, recommended principle a. be replaced with the following principle and delete principle d.:

Refer to Alternate Principle - Heritage below.

Heritage Chapter – 1, 3, 3A, 5, 7 and 7A Norfolk Road and 25 Pembroke Street

Clause 96, recommended principle a.ii. be replaced with the following principle:

Refer to Alternate Principle – Heritage below.

Heritage Chapter – Rose Street Precinct

Clause 110, recommended principle a. and b. be replaced with the following principle:

Refer to Alternate Principle - Heritage below.

Alternate Principle - Heritage

That the development of 2 storey 'manor houses' within the following precincts be pursued in response to the current interface issues being experienced by residents. However, as part of this process further work should also be carried out to test the benefits of 3 storey residential flat buildings with all the appropriate DCP controls, for example setbacks, amalgamation patterns to determine whether an alternative approach may be more appropriate.

- Rosebank Avenue (full length of Rosebank Avenue excluding existing heritage listed items)
- 1, 3, 3A, 5, 7 and 7A Norfolk road and 25 Pembroke Street
- Rose Street Precinct (with the inclusion of 70,72 and 74 Essex Street forming part of this Precinct)

(c) **That** Council Officers:

- 1 Brief the incoming Councillors on the Epping Planning Review process to date including the endorsed principles to confirm the future planning direction for Epping as part of progressing to Stage 2 of the project, and
- 2 That following the above briefing, a further report be submitted to Council recommending the commencement of Stage 2 of the Epping Planning Review which will involve preparing new planning controls including:
 - 2.1 A planning proposal to amend both the *PLEP 2011* and *HLEP 2013*
 - 2.2 A development control plan amendment to amend *PDCP 2011* and *HDCP 2013*
 - 2.3 Amendments to relevant Contributions Plans and public domain plans where relevant.

(d) **That** the recommendations contained within **Attachment 5** detailing the outcomes of the Stage 6 Heritage Review be endorsed.

(e) **That** Council write to the community thanking them for their feedback and advising them on the outcome of Stage 1 Review and next steps

(f) **That** Council write to the Minister for Planning, Greater Sydney Commission, Department of Planning and Environment, Transport for NSW and the Roads and Maritime Services to provide an update on the project and an outline of the next steps.

(g) **Further, that** the finalisation of LEP amendments proposing changes to zoning, height and FSR controls come into effect at the same time as relevant DCP controls relating to this

development (excluding Draft Section 94 Plan and DCP amendments relating to tree protection and parking rates).

NOTE:

Amanda Chadwick declared an interest in this matter, as she is a member of car share group GoGet.

RESUMPTION OF STANDING ORDERS

739 RESOLVED (Chadwick)
That Standing Orders be resumed.

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Council 9 July 2018

Item 14.5

LEADING

ITEM NUMBER	14.5
SUBJECT	Epping Town Centre Traffic Study and other Epping Planning Review Matters
REFERENCE	F2017/00210 - D06202874
REPORT OF	Snr Project Officer
PREVIOUS ITEMS	11.3 - Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2 - Council - 14 Aug 2017 6:00pm 12.5 - Update on Epping Planning Review and Related Matters - Council - 12 Feb 2018 6.30pm 13.4 - Outcomes of Public Exhibition - Draft Amendments to Hornsby Development Control Plan 2013 - Tree and Vegetation Preservation - Council - 26 Feb 2018 6.30pm

Note: This report was deferred from the 28 May 2018 and 25 June Council Meetings.

PURPOSE:

This report details the progress of the Epping Town Centre Traffic Study and updates Council on the implications for the findings of the Epping Planning Review, as well as several related planning matters relevant to the Epping Town Centre.

RECOMMENDATION

- (a) **That** Council note this update on the Epping Planning Review and related matters.
- (b) **That** Council exhibits the Epping Town Centre Traffic Study and supporting documentation to enable comment from major stakeholders in accordance with the consultation plan described in the body of this report.
- (c) **That** despite recommendation (b) above, that Council adopts the position that it does not support any:
 - i. Planning proposal or preliminary planning proposal that applies to sites situated within the Epping Planning Review Study Area which seek to deliver extra housing in addition to what can be achieved under the current planning controls, unless the planning proposal is seeking to address a planning issue identified in Council's Epping Planning Review process related to heritage interface controls, commercial floor space or resolving open space issues at Forest Park.
 - ii. Development applications seeking an increase in residential density via clause 4.6 of the *PLEP 2011*
 and that Council write to the Department of Planning and Environment (DP&E) advising them of this position.
- (d) **That** in relation to the Austino Planning Proposal that Council write to the DP&E to:-
 - i. Object to the Planning Proposal in its current form and density

- 392 -

Council 9 July 2018

Item 14.5

- proceeding; and
- ii. Request that Council be re-instated as the RPA so that Council can pursue a Planning Proposal that would retain the current controls that apply to the site with the exception of the former Bowling Club portion of the site which would be rezoned from RE1 Public Recreation to R4 High Density Residential with a maximum Height of Building control of 17.5m and FSR of 1.5:1.
- (e) That should Council be re-instated as the RPA (on the basis that it will pursue a Planning Proposal as per (d)(ii) above) Council officers be authorized to commence discussions with the Austino PP applicant about the form of the Planning Proposal and whether there are any opportunities for some contribution to additional open space as part of the Planning Proposal. The outcome of these discussions should be reported to Council.
 - (f) **That** Council write to the Minister for Planning and the Greater Sydney Commission and request the State Significant Development currently being progressed for 240-244 Beecroft Road be placed on hold until:
 - i. the supplementary work on a new road link has been completed; and
 - ii. that the relevant approval authority agrees to the provision of commercial floor space equivalent to a 1:1 FSR.
 - (g) **That** a further report is brought to Council on the options for the Rawson Street carpark site as a site for future civic space and community facilities and analysis on whether any EOI process should be commenced to seek partners to redevelop the site and realise the FSR available on the site.
 - (h) **That** a further report is brought to Council on the outcome of the consultation on the Epping Town Centre Traffic Study and the results of the supplementary traffic analysis discussed in this report on:-
 - i. Reopening of the former M2 bus tunnel link; and
 - ii. A new east west road link through 240-244 Beecroft Road
 - (i) **That** a Planning Proposal including all necessary background studies and analysis be prepared to progress the recommended LEP amendments detailed in this report relating to:-
 - i. Rosebank Avenue HCA, Precinct;
 - ii. 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street;
 - iii. Essex Street HCA Precinct;
 - iv. Rose Street Precinct; and
 - v. Rockleigh Park Precinct;

and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.
 - (j) **Further, that** a Planning Proposal including all necessary background studies and analysis be prepared to progress the recommended LEP amendments detailed in this report relating to new controls to require the provision of commercial floor space in the centre and that the Planning Proposal and associated material be reported to Council for endorsement

- 393 -

Council 9 July 2018

Item 14.5

before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.

BACKGROUND

1. This report is a progression of a Council report deferred from the 12 February 2018 Council meeting (Item 12.5) provided at **Attachment 1**. This report also relates to a Council assessment of the Austino planning proposal.
2. As noted above, Item 12.5 from the 12 February 2018 Council meeting which sought to provide an update on the status of the Epping Planning Review and associated matters was deferred. It resolved as follows:

That consideration of this matter be deferred for the following reasons:

1. *Consultation with Ward Councillors.*
 2. *That Council write to the Department of Planning seeking clarification around the decision of 1 December 2017 to appoint the Sydney Central Planning Panel as the relevant Planning Authority, meaning that Council no longer has relevant planning Authority Status for this proposal. Council is seeking this clarification particularly around the fact that the Department of Planning and Environment will be referring the outcome of the Traffic Study to make their determination which is the reason for our Council delaying a recommendation to the Council.*
 3. *Upon receipt of the valuation for the former Epping Bowling Club site, the formal valuation be the subject of a Briefing to Ward Councillors and any other interested Councillors prior to the Austino Planning Proposal or any update on the Epping Planning Review being reported back to Council.*
3. In response to the resolution of 12 February 2018:
 - a. A Workshop was held with Councillors on 16 February 2018 so that the applicants of two preliminary planning proposals – Oakstand consortium and Lyon Group – could present their respective preliminary planning proposals. These preliminary planning proposals are detailed later in this report.
 - b. A Councillor briefing session was held with Ward Councillors on Wednesday, 28th March 2018 which provided an update on the Epping Planning review including the draft findings on the Epping Town Centre Traffic Study and valuation report on 725 Blaxland Road.
 - c. A meeting was held with the Member for Epping, Damien Tudehope on Thursday, 29th March 2018 which also provided an update on the Epping Planning review and included a discussion on the draft findings on the Epping Town Centre Traffic Study and valuation report on 725 Blaxland Road.
 4. Consistent with resolution 2 above, on 1 March 2018, Council Officers wrote to the Department of Planning and Environment (DP&E) seeking clarification on the removal of the relevant planning authority role from City of Parramatta council. The DP&E's response is attached to this report at **Attachment 2**.

Council 9 July 2018

Item 14.5

OVERVIEW OF EPPING PLANNING REVIEW AND STRUCTURE OF THIS REPORT

5. The Epping Planning Review (EPR) was initiated as a review of planning controls for the Epping Town Centre and immediate surrounds (refer to the area delineated orange in the figure below) to address the issues of land use conflicts. These conflicts were raised by the Epping Community following from the DP&E's Priority Precinct process which increased the density controls in March 2014. The EPR Study Area is shown in Figure 1.

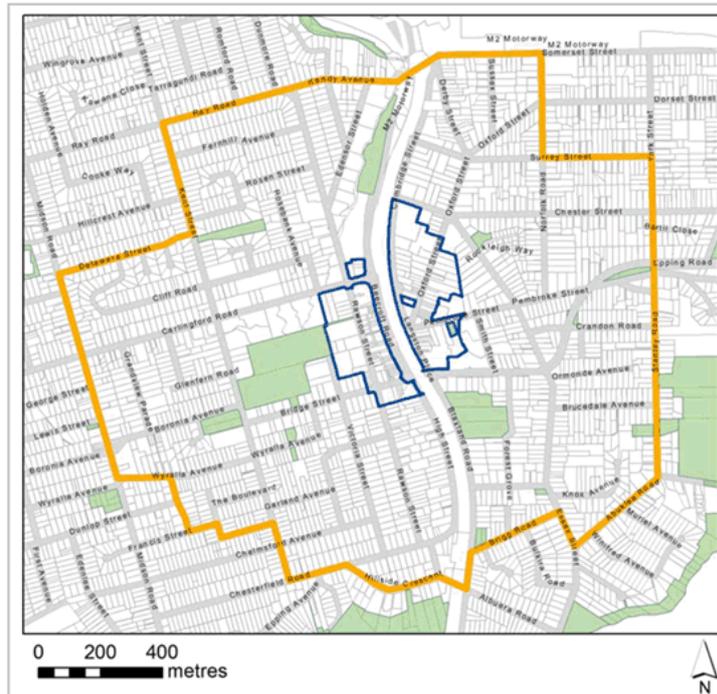

Figure 1 - Epping Planning Review study area showing the town centre and immediate surrounds

6. The EPR has also followed the Council boundary changes occurring in May 2016 under which the Epping Town Centre came to be entirely contained within the City of Parramatta (having previously been split between Parramatta City and Hornsby Shire Councils).
7. One objective of the EPR has been to create a unified planning framework for the Epping Town Centre and its immediate surrounds, including one set of LEP and DCP controls, a unified development contributions framework and one public domain plan. Council has already developed a single development contributions framework for the Epping Town Centre and Council's formal LGA-wide Harmonization Process will have a role in bringing some further consistency to the planning controls.
8. The EPR has two stages. The first stage has involved undertaking technical studies and community consultation to inform planning control amendments to resolve land use conflicts or issues. The last remaining element of this stage is

Council 9 July 2018

Item 14.5

the completion of traffic analysis and the major element of this is the Epping Town Centre Traffic Study.

9. The **Epping Town Centre Traffic Study (ETCTS)** is the key component of this report, as its findings have major implications for the Epping Town Centre in the short to mid-term. The implications of the ETCTS are also discussed with regards to:
 - a. Updates on the status of **LEP and DCP amendments** affecting land within the Town Centre with a small section of the report discussing the release of the final **Central City District Plan** in March 2018 and relationship with the EPR.
 - b. the State Significant Development proposal affecting NSW Government owned land at **240-244 Beecroft Road, Epping**.
 - c. The **Austino Planning Proposal and Preliminary planning proposals** affecting land within the Town Centre.
10. This report makes recommendations on:
 - a. the **interface areas** at Rosebank Avenue, Rockleigh Park, Pembroke Street/Norfolk Rd, Essex Street and the Rose Street Precinct;
 - b. **commercial floorspace** within the centre; and
 - c. potential **social infrastructure** provision on the Rawson Street Car Parking site.

RELATED PLANNING POLICY MATTERS

11. A series of recent policy amendments (LEP, DCP and development contributions plans) are complete which apply to land within the EPR study area and relate to:
 - a. Housekeeping Amendment to Hornsby LEP 2013 recently coming into effect.
 - b. Fast Tracked Amendments to Parramatta DCP 2011 involving footpath widening recently coming into effect.
 - c. Amendment to Hornsby DCP 2013 - Tree Preservation and associated matters raised by Council in its resolution from the 26 February 2018 Council meeting pertaining to tree removal in Forest Park and the potential impact of Austino planning proposal on trees in the north of Forest Park are detailed in **Attachment 3** to this report.
 - d. Section 94 and 94A Developer Contributions Plans applying to the EPR area recently coming into effect.
12. These matters are further detailed in **Attachment 3**.

Greater Sydney Region Plan and Central City District Plan

13. In March 2018, the Greater Sydney Commission (GSC) released the final *Central City District Plan (CCDP)* and its metro-wide level plan *Greater Sydney Region Plan - A Metropolis of Three Cities*.
14. In both plans, Epping is identified as a 'Strategic Centre' for 2036. However, in the earlier iterations of the District Plan and Metro Plan, Epping was identified as a "Town Centre" or "Local Centre". Thus the role of the Epping Town Centre has been elevated to a higher-order centre without any corresponding dialogue or justification. Also, the 'Strategic Centre' category is still not clearly defined in

Council 9 July 2018

Item 14.5

the Final Plans. The change has also occurred ahead of completion of the Epping Town Centre Traffic Study.

15. The CCDP establishes dwelling targets for the five year period from 2016 to 2021 for the Parramatta LGA and jobs targets for lower and higher scenarios for 2036 for Epping, specifically. In the context of the Epping Planning Review and recent development forecast, these are discussed below:
 - a. With regards to **dwelling targets** for that period, the CCDP sees 21,650 additional dwellings for the 2016-2021 period for the Parramatta LGA. Analysis contained in this report on recent dwelling growth within the Epping Town Centre demonstrates that recent growth patterns mean this centre can meet a substantial proportion of this target.
 - b. With regards to the **jobs targets**, the Epping Town Centre is identified as a Strategic Centre for 2036 with a jobs target of 1,900 additional jobs (2036 baseline) to 2,400 additional job (2036 higher target). These are on top of the 5,100 jobs that the CCDP sees as the baseline for 2016. Further discussion about the provision of commercial floorspace is provided further in this report.
16. Furthermore, a series of actions (both direct or indirect) across a number of the CCDP's Planning Priorities apply to the Epping Town Centre and largely involve collaboration with the DP&E and GSC.

EPPING PLANNING REVIEW - STAGE 1

17. The major elements of Stage 1 of the EPR were spelled out in the 12 February 2018 report (Item 12.5) which noted that Stage 1 of the Epping Planning Review was largely completed with the exception of a Final Traffic Study. This was precluded by a report of Council at its meeting on 14 August 2017 which reported the Discussion Paper and its supporting technical studies.
18. An **Interim Traffic Modelling Report** (dated June 2017) was prepared by EMM for the purposes of the Epping Planning Review Discussion Paper which was exhibited in June/July 2017. The Interim Report formed preliminary analysis in order to consult the Epping community on traffic and access in and around the Town Centre.
19. At the 14 August 2017 Council meeting, Council endorsed a suite of principles to guide Stage 2 of the Epping Planning Review. The issues discussed in this report directly affect many of the principles.

Epping Planning Review Steering Group

20. To ensure delivery of the Epping Planning Review, in February 2017, Council established the Epping Planning Review State Agency Steering Group which has representation from the Greater Sydney Commission, the Department of Planning and Environment, Transport for NSW and Roads and Maritime Services.
21. The Steering Group is also consistent with the Central City District Plan where:

Parramatta City Council is leading the review of planning controls and the Commission is collaborating with Council and other State agencies to address social infrastructure, traffic, heritage and commercial land issues (p.21).
22. Given the recommendations within this report, the role of the Steering Group in providing further direction on the Epping Planning Review process is paramount.

- 397 -

Council 9 July 2018

Item 14.5

BACKGROUND TO EPPING TOWN CENTRE TRAFFIC STUDY

23. The principal traffic study underpinning the existing planning controls which is now outdated is the **Halcrow Study** of 2011 commissioned by Hornsby Council, the then Parramatta City Council and the DP&E prior to the Priority Precinct process formally commencing. The Epping Town Centre Traffic Study (ETCTS) replaces this analysis.
24. The Halcrow Study tested the short term and long term land use scenarios:
- a. The short term (2016) land use scenario was based on a forecast of additional 900 dwellings and additional 3,000sqm of retail uses; and
 - b. The long term (2026) land use forecast a further 2,100 dwellings and another 3,000sqm of retail uses.
25. In total, this tested the impact of 3,000 additional dwellings and 6,000sqm of additional retail within the Town Centre by 2026. As is discussed further in this report, the Halcrow assumptions on residential land use have substantially underestimated the development trends.

EMM's Interim Traffic Study (2017)

26. The preliminary analysis carried out by EMM in 2017 as part of the Interim Traffic Modelling report for the purposes of the EPR Discussion Paper allowed discussion of the issues as part of the Discussion Paper process. Specifically, the preliminary study identified the following key issues:
- a. The east west Carlingford Road/Epping Road and north south Beecroft Road/Blaxland Road are sub-regional routes that converge at the Town Centre mixing with local traffic.
 - b. Approximately 89% of trips that cross the bridge are through traffic trips where the origin and destination of the trip is outside the Epping Town Centre.
 - c. The through trips are a significant barrier to improving the traffic flow around the Epping Town Centre. (Note: Centres are usually structured in a way that separates local traffic from through-traffic, but the Epping Town Centre is not).
 - d. The widening of the rail bridge will not be a "game changer" given the time it will take motorists to cross the bridge. In other words, the expansion of the bridge will be an improvement, but will not be a *significant* improvement in providing relief to congestion.
 - e. Traffic routes and intersections are currently operating at over-saturated traffic levels for both the morning and afternoon peak hour, and the increased intersection traffic delays are already displacing some of the previous regional through traffic movements away from the Epping Town centre to other parallel traffic routes such as the M2 Motorway for east-west traffic and Midson Road for north-south traffic.

Local road upgrades

27. The Roads and Maritime Services' (RMS) program of main road improvements within the town centre have been factored into the ETCTS. They are:
- a. Widening of Epping Road from two lanes to three lanes involving:
 - i. Removal of the right turn movement from Langston Place into Epping Road,

Item 18.6 - Attachment 1

Planning Proposal various properties Epping

Council 9 July 2018

Item 14.5

- ii. Removal of the right turn movement from Epping Road into Smith Street and Forest Gove;
 - iii. New dedicated right turn lanes from Essex Street into Epping Road; and
 - iv. New traffic light controlled pedestrian crossing for Epping Road and Essex Street.
- b. Upgrading the Beecroft Road and Carlingford Road intersection in Epping involving:
- i. New traffic light controlled pedestrian crossing for Carlingford and Beecroft Roads;
 - ii. Additional right-turn lane from Beecroft Road into Carlingford Road; and
 - iii. New pedestrian path to link with the exiting path to Epping Station.
28. A critical factor is that the traffic modelling undertaken since 2011 all factor in a widening of the rail bridge carriageway on Epping Road to accommodate an additional westbound lane. In a letter from the DP&E to Council dated 7 November 2017, it notes that "Transport for NSW is investigating several options for widening this overpass and the Council would be informed of the results when the investigation concludes" but the letter did not provide a timeframe. Since the receipt of the letter, Council Officers have not been provided with an update.

Dwelling forecasts since 2011 and actual dwelling growth

29. In order to understand the significance of the findings from the ETCTS (covered in the next section), it is important to understand recent (actual) and anticipated dwelling growth in the context of the growth predicted by the DP&E as part of the former Epping Priority Precinct process completed in March 2014. This must be understood so that infrastructure providers (Council and the State government) can ensure the delivery of appropriate infrastructure at the right time.

Dwelling forecasts

30. During the progression of the DP&E's Priority Precinct process, dwelling growth forecasts were reviewed from **3,000 additional dwellings** for 2026 in the Halcrow Study to **3,750 additional dwellings** for the year 2036 as per the Department of Planning and Environment's (DP&E's) *Finalisation Report* (November 2013). However, shortly after the City of Parramatta commenced the EPR process, in early 2017, the DP&E revised its forecast figure of 3,750 additional dwellings to **5,500 additional dwellings** by 2036 and set a maximum dwelling yield of **10,000 additional dwellings** at a 100% take up rate.

Actual dwelling growth

31. The Epping Planning Review Discussion Paper (June 2017) noted that Council Officers had reviewed recent development applications and approvals to track actual growth against the dwelling forecasts undertaken by the DP&E and/or during the Priority Precinct process. This reviewed all of the pre-lodgments, DAs under assessment and determined (both under construction and not yet under construction) that have occurred since March 2014 when the new Priority Precinct controls came into effect and found that **4,735 additional dwellings** could be delivered in the short to mid term (assumed to be as early as 2023), if

Council 9 July 2018

Item 14.5

all DAs are constructed and fully occupied in that time. This equates to an additional **10,890 people** within the centre assuming a household size of 2.3 persons per household (Source: Council's Social Outcomes Unit).

32. Then again, for the purpose of this Council report, on 19 April 2018, Council Officers tracked this figure to **5,553 additional dwellings** by 2023. This is made up of 3,940 approved dwellings and 1,613 dwellings under assessment. Again, applying an occupancy rate of 2.3 persons per household, this means an additional **12,771 people** in the town centre by 2023. With no signs of the Town Centre's residential market slowing down, Council Officers conclude that within 4 years of the new planning framework being in place, the DP&E's revised 5,550 additional dwelling target for 2036 is well on its way to being met well before 2036.

What does this growth mean?

33. The tracked growth is well above what was forecast and planned for by the DP&E during the Priority Precinct process. In effect, the 2036 revised forecast of last year by the DP&E (of 5,500 dwellings) will already effectively be met within 4 years of the new planning controls if the development detailed in existing approvals and applications are realised.
34. The rate of this growth has significant implications for the amenity and function of the centre including infrastructure provision in the short and mid-terms. For example:
- a. The widening of the rail bridge carriageway on Epping Road to accommodate an additional westbound lane is yet to be delivered by the State Government.
 - b. Education infrastructure such as schools managed by the Department of Education (public schools) as well as private schools will be under more pressure.
 - c. The significant loss of commercial floorspace spelled out in the SGS *Commercial Floorspace Study* and the *Epping Planning Review Discussion Paper* exhibited in mid 2017 means the future amenity and function of Epping as a centre is at stake.
 - d. The provision of local infrastructure (libraries, community facilities, open space and recreational facilities) is under pressure to be enhanced and improved.

Conclusions

35. Comparing the Town Centre's growth with the CCDP's dwelling targets for the Parramatta local government area (LGA) for the 2016-2021 period which is (21,650 dwellings), the 5,553 additional dwellings represents a substantial proportion of the dwelling target although some of that growth has occurred post March 2014.
36. In addition to the tracked dwelling growth since March 2014, there is substantial interest from developers and land owners within and around the town centre seeking an increase in residential yield above what the current controls allow via a planning proposal process.
37. Council must ensure that the amenity of the centre as well as the long term social, environmental and economic aspirations of the Epping community are not undermined. Both the Greater Sydney Commission and the DP&E have a critical role in this.

Council 9 July 2018

Item 14.5

EPPING TOWN CENTRE TRAFFIC STUDY

38. Council Officers commissioned EMM Planning and Environmental Consultancy in March 2017 to revise the traffic analysis work done as part of the DP&E's Precinct Planning process.
39. The Epping Town Centre Traffic Study (ETCTS) effectively replaces the 2011 Halcrow Study which formed the basis for the current planning controls within the Town Centre. It also replaces other applicant-prepared traffic analysis from 2015. A copy of the ETCTS is provided at **Attachments 4 and 5** (Attachment 4 comprises the Traffic Report and Attachment 5 comprises the Appendices).

The EMM Epping Town Centre model

40. The traffic model was developed by Transport Modelling for EMM. The base model report was completed in December 2017 and forwarded to the RMS for authorisation which was received in February 2018. In its response, RMS stated that the consultant's 2017 base model is suitable for traffic assignment analysis (traffic distribution) for the assessment of any future proposals within the study area.
41. The ETCTS models the co-ordinated operation of a chain of linked intersections. It does this for four existing and future traffic network model and land use scenarios which are:
- a. Existing actual peak hour intersection traffic volumes which were surveyed in March 2017;
 - b. Modelled base case 2017 intersection traffic volumes from the EMME model;
 - c. Modelled +5,000 dwellings growth scenario intersection traffic volumes from 2026; and
 - d. Modelled +10,000 dwellings growth scenario intersection traffic volumes from 2026.
42. To develop a base year for the network traffic model, in March 2017 the following peak hour surveys, travel time surveys and traffic queue length observations were undertaken:
- a. Peak hourly intersection turning movements at 17 intersections;
 - b. Morning/afternoon peak hour travel time surveys across the full study area;
 - c. Morning/afternoon peak hour maximum traffic queues for traffic signal operations on Beecroft Road, Carlingford, Epping and Blaxland Roads.
43. The model then tests two future residential growth scenarios in the study area as follows:
- a. A 2026 land use scenario tests 5,000 additional dwellings
 - b. A 2036 land use scenario tests 10,000 additional dwellings.
- These scenarios are additional dwellings realized after the new DP&E planning controls came into effect in March 2014.
44. The ETCTS also includes preliminary analysis of two local road network options:
- a. The reopening of the former M2 bus tunnel link to Epping Station as a one way westbound link with left turn egress only at Beecroft Road and

- 401 -

Council 9 July 2018

Item 14.5

- b. A new east west road link connecting between Ray Road and Beecroft Road, through the NSW Government site at 240-244 Beecroft Road on the western side of Beecroft Road.
45. These two road network options are only explored in a preliminary sense for the 2026 and 2036 future traffic network models. This seeks to determine the potential future extent of the likely road network traffic delay benefits for locally based traffic accessing the major road network at Epping. Refer to Sections 7.3 and 7.4 of the ETCTS provided at **Attachment 4**.

ETCTS Findings

46. The broad findings from the ETCTS are summarized below.

Findings from Survey Counts

47. For the **March 2017** surveyed morning and afternoon peak hour traffic conditions the findings are as follows:
- a. Up to four of the six key intersections on the four major traffic routes (via Beecroft Road, Blaxland Road, Carlingford Road and Epping Road) are operating at over saturated (level of service F) traffic conditions respectively with an average 5 minute waiting time.
 - b. During the morning peak period the combined eastbound and southbound traffic queues on Carlingford Road and Beecroft Road can reach a combined total length of approximate 1.5 km.
 - c. The most widespread traffic queuing effects on all areas of the road network are considered to occur at approximately 8:40 am and 5:40pm, consistent with the Sydney regional major road traffic conditions.
 - d. The increasing road traffic congestion occurring in the Town Centre area, is adversely affecting both the regional through traffic movements and local traffic accessibility to the major road network.

Future years of 2026 and 2036

48. The findings of the +5,000 and +10,000 dwellings growth scenario intersection traffic volumes for the 2026 and 2036 are as follows:
- a. Future peak hour traffic conditions continue to worsen even when the full programs of the identified RMS and Council road improvements have been implemented.
 - b. In the road networks, five to six of the assessed intersections will have traffic conditions operating at oversaturated (level of service F) during both the morning and afternoon traffic peak periods. As an example, in 2026, the Carlingford Road/Beecroft Road intersection has an average delay which equates to 70.5 minutes (morning peak) and 23.5 minutes (afternoon peak). In 2036, this increases to 77 minutes (morning peak) and improves to 10.5 mins in the afternoon peak.
 - c. In 2036, over 3,300 vehicles cannot enter the network.
49. The average intersection delays are predicted to improve by 2036 from the 2026 base scenario as a result of Council proposed road improvements which are anticipated to be implemented during this period. However, the most crucial intersection – Beecroft Road – actually experiences a higher average delay in 2036 than for the 2026 case (p.41).

Council 9 July 2018

Item 14.5

50. The ETCTS also finds that *the afternoon performance of the network for the base 2036 is such that it is unlikely that there will be any spare capacity for additional vehicles* (p.41).

Additional westbound lane on Epping Bridge

51. The additional westbound lane on Epping Bridge would primarily benefit the afternoon peak hour westbound regional traffic movements travelling through the Town Centre. However, if the bridge were to operate with future tidal flow traffic conditions such as four lanes eastbound during the morning peak periods with two lanes westbound and three lanes in each direction during the afternoon peak periods, this future improvement could provide significant travel flow benefits during both these peak periods.

Additional road network options

52. The findings from preliminary testing of two additional road network options, are as follows:
- a. **Reopening of the former M2 bus tunnel link:** the envisaged number of vehicles that would use the tunnel would result in equivalent peak hourly traffic reductions for certain southbound right turning traffic and westbound traffic movements. These *"would probably have significant network traffic benefits in terms of reducing the future peak hourly intersection traffic delays at these intersections"* (ETCTS, p.45).
 - b. **A new east west road link through 240-244 Beecroft Road:** the envisaged number of vehicles that would use the through link would result in equivalent peak hourly traffic reductions for the other traffic movements using the Carlingford Road intersections with Beecroft Road or Ray Road and Rawson Street which *"could have significant network traffic benefits in terms of reducing the future peak hourly intersection traffic delays at these intersections"* (ETCTS, p.45).
53. However, further SIDRA intersection analysis is required of the above two road network options, this analysis is currently underway.

Implications

54. The findings from the ETCTS has major land use and infrastructure implications for town centre and surrounds. Therefore, Council Officers see that the role of the ETCTS is to:
- a. Inform planning policy affecting the Study Area particularly in relation to:
 - i. Certain proposals seeking an increase in residential yield; and
 - ii. State Significant Development applications.
 - b. Provide a basis for Council to take to the DP&E, GSC and the Minister for Planning seeking support for:
 - i. a position on residential development that indicates that any growth in residential development should only be permitted to resolve planning issues in Epping rather than just to permit additional residential development above what can be achieved under the current controls; and
 - ii. a coordinated approach to infrastructure delivery consistent with actions within the CCDP.

Council 9 July 2018

Item 14.5

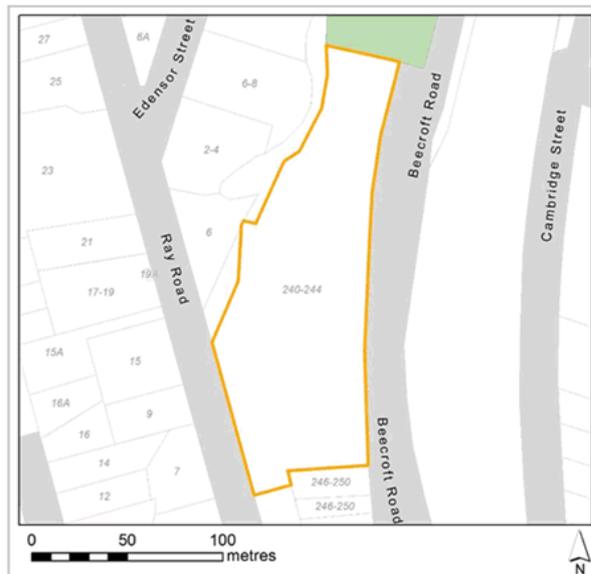

- c. Inform changes to the principles adopted by Council on 14 August 2017 that relate to:
 - i. Heritage interface;
 - ii. Commercial floorspace; and
 - iii. Open space and community infrastructure.

Consultation

- 55. The ETCTS and any associated traffic analysis as part of the overall ETCTS brief should be placed on exhibition so that the major stakeholders (such as RMS, Transport for NSW (TfNSW), DP&E, GSC, landowners and the wider community) have an opportunity to comment on the documentation. Consultation will occur via:
 - a. Formal invitation to State agencies represented on the EPR Steering Group which are RMS, TfNSW, DP&E and GSC.
 - b. Formal invitation to major land owners formally seeking density residential density uplift such as Austino, Oakstand and Lyon Group.
 - c. Notification e-newsletter to the 440 residents and businesses registered on the EPR project mailout database. This will include local residents and business as well as planning consultants acting for Epping landowners.
 - d. A public notice in the *Northern District Times*.
- 56. The ETCTS and associated supporting material will be made available on the EPR project website.

IMPACT OF ETCTS ON STATE SIGNIFICANT DEVELOPMENT AT 240-244 BEECROFT ROAD

- 57. The State government owned site at 240-244 Beecroft Road (refer to Figure 2) once used for the Sydney Metro Northwest project is subject of a State Significant Development (SSD) application.

- 404 -

Council 9 July 2018

Item 14.5

Figure 2 - State government owned land at 240-244 Beecroft Road, Epping

58. The background to his SSD application up to January 2018 is contained within the deferred Council report of 12 February 2018 (**Attachment 1**). However, the role of the site in the future development of the Town Centre is key in two ways: from both land use and traffic/access perspectives.

Land Use issue

59. The SSD application applies to 10,120sqm of the 13,342sqm total site area and proposes 39,000sqm of GFA (450 residential units) and 15 storeys which equates to a 3.8:1 FSR. Of that, the SSC proposes 2,000sqm of commercial FSR which equates to 0.2:1 *to be located at ground level on Road (could be general store, childcare, gymnasium, café, small offices)*.
60. The Commercial Floorspace Study by SGS prepared for the purposes of the EPR Discussion Paper saw that there has been a loss of commercial floorspace estimated at about 63%. Further internal analysis undertaken by Council Officers in early February 2018 has identified that that approximately **8,200sqm retail** and **35,200sqm office** floorspace needs to be "replaced" within the Town Centre. Given its scale, this site plays an important role.
61. From a planning perspective, the SSD process presents Council with an opportunity to negotiate an outcome because:
- The site's current zoning (R4 High Density Residential) does not require any commercial floorspace however, a **neighbourhood shop** use (max. 100sqm) is permissible within the zone.
 - The site's previous zone (B4 Mixed Use) would still have allowed the commercial office building on that site to be demolished and replaced with a building that had retail and commercial at lower levels and residential on higher levels. Returning the site to its previous zoning would not require the owner to replace the previous commercial floor space that historically existed on that site.
 - The timeframe around the SSD process is much faster, than a rezoning process; in the latter, Council can seek a higher amount of commercial floorspace on the site, but this would take some time. The SSD can approve commercial floorspace even if it is not permitted in the zone so there is a mechanism for addressing the floorspace in a timely manner if agreement can be reached.
62. Therefore, a 1:1 FSR (10,120sqm) for commercial uses is a balanced negotiating position that maximises the chances that commercial can be achieved on the site and contribute to Epping's role as a Strategic Centre as identified in the CCDP.

Local Traffic/Access issue

63. Also, as already noted in this report, a road link through the SSD site is being tested to determine whether it can alleviate some of the traffic pressure at the intersections of Carlingford Road with Ray Road and Beecroft Road. Preliminary testing shows it can take of some pressure of peak hour traffic. However, more detailed analysis is progressing with a supplementary report due shortly which will form supplementary analysis to the ETCTS.

Recommendations

64. Council Officers therefore recommend:

Council 9 July 2018

Item 14.5

- a. That Council not support the application until:
 - i. A 1:1 FSR of commercial land uses can be delivered on the site; and
 - ii. A supplementary report on an east west through link is completed.
- b. That Council write to the Minister seeking that he not support the proposal until the two criteria listed in a. immediately above are achieved.

IMPACT OF ETCTS ON AUSTINO PLANNING PROPOSAL

Introduction

65. Council Officers were intending to undertake a detailed assessment of the Austino PP. However, on account of:
 - a. The Town Centre having effectively reached the DP&E's revised 2036 dwelling target; and
 - b. the findings from the ETCTS;

Council Officers consider that a detailed assessment of this proposal is no longer required. Instead the assessment method emphasises the significance of the findings of the ETCTS and recognises the critical importance of the RMS and JRPP's comments on traffic matters at the earlier stages of the planning proposal (discussed in the "Traffic" sub-section, below). In short, the traffic impacts associated with the faster than anticipated dwelling growth is the guiding principle informing the outcome of this proposal.

Background

66. The Austino Property Group are the applicant for a Planning Proposal affecting land at 2-18 Epping Road, 2-4 Forest Grove and 725 Blaxland Road (the latter site being the former bowling club site – refer to Figure 3).

Figure 3 - Land affected by the Austino Planning Proposal denoted in solid red line (from applicant's Urban Design Report)

67. The planning proposal – resubmitted to the DP&E in January 2018 seeks to:
 - a. Reconfigure the existing R4 and RE1 zones resulting in no net loss of open space;

Council 9 July 2018

Item 14.5

- b. Increase the building heights over the reconfigured R4 zone from 26.5 metres to a maximum of 65.5 metres along with 5 other building heights; and
 - c. Increase the density on the site from an equivalent 2.1:1 to a combination of 7.5:1, 4.6:1, and 1.75:1.
68. The above proposed changes seek to deliver a predominantly residential development comprising two towers on Blaxland Road with smaller towers on Epping Road accommodating estimated 794* units. (Note this calculation relies on Council's standard practice of applying an efficiency unit rate of 85sqm per unit whereby the applicant relies on a rate of 100sqm). Under the current controls (ie R4 zoning, maximum height of 26.5 metres) on the sites fronting Epping Road), the Austino landholdings would realise a total of approximately 308 units according to Council Officer analysis.
69. A VPA dated 4 December 2015 accompanies the planning proposal which proposes a public urban plaza through the proposed development providing a pedestrian connection between Epping Road and Forest Park, with an area equivalent to the area of land currently zoned RE1 Public Recreation (6,665sqm), so there will be no net loss in open space. However, much of the area proposed to be zoned public open space contains underground car parking below it which is generally not acceptable to Council.
70. This PP has a complex history. Details of the process and the proposal are provided at **Attachment 6**.

Petition

71. Between February and March 2017, Council Officers received a petition which containing nearly 600 signatures. The petition requested a number of actions including that Council purchase the site at 725 Blaxland Road. Other actions related to concerns on the impacts of the planning proposal on Forest Park in terms of traffic and urban design.
72. The petitions were tabled at the Council meeting held on 13 February 2017 where Council resolved:
- That the petition be received and referred to the appropriate Council officer for report.*
73. In response to the resolution, the appropriate time for the consideration of the petition was always intended to be undertaken as part of the assessment of the Austino planning proposal. This section in this report forms that assessment.

Traffic Analysis

74. The applicant's Traffic Impact Study prepared by GTA in 2015 tested the traffic impacts of the proposal based on the Halcrow Study's 3,000 additional dwellings for 2026. However, as identified in the Halcrow Study, the 3,000 dwellings for 2026 falls well short of the likely growth of 2025 (5,553 dwellings) based on current and expected development activity.
75. In March 2016 having reviewed the applicant's traffic analysis the RMS wrote to Hornsby Shire Council when it was the RPA noting the following:

Should Council support a recommendation for gateway determination, the exhibited proposal must also ensure that the Transport Impact Assessment traffic includes detailed Network modelling results (ie. phasing, queue lengths/delays for all movements, intersection details) for [six] key intersections for all modelled scenarios.

- 407 -

Council 9 July 2018

Item 14.5

76. At that time, RMS also noted that *the total Residential Parking requirements being restricted to no greater than the minimum parking rates applicable for a total of 327 apartments* on the entire site (ie. Limited to approximately half the amount being sought under this proposal)*. (Note: it is not clear what assumptions the RMS has relied to determine this number of units. Council's assessment suggests the figure is closer to 308 units).
77. In February 2018, the brief for the Epping Traffic Study was extended so that an impact assessment of the Austino planning proposal on traffic and access around the site could be undertaken. This was decided given the findings from the modelled base case 2017 intersection traffic volumes from EMME software based counts.
78. The Traffic Impact Assessment (TIA) prepared by EMM (provided at **Attachment 6**) concludes that the proposal would generate an additional 768 daily vehicle movements on Forest Grove. It also sees that because the impacts of the 2026 and 2036 additional dwellings on the network are so severe, that the actual intersection performance deterioration due to the Austino development either with or without the planning proposal is relatively small.
79. The ETCTS and recent TIA by EMM updates the Austino TIA because the TIA findings were based on a slightly lower future baseline year 2026 additional dwelling forecast than the forecast which has been used in the ETCTS. That said, the general findings within the EMM TIA are still valid. All the same, with regards to the Austino planning proposal impacts, the ETCTS concludes the:
- ...significant intersection performance deterioration from the 2017 base to the 2026 future base traffic situation renders any further traffic generating development in this location unacceptable without further capacity improvements to the locality major road and local road network capacity, in particular at the Epping Road/Blaxland Road intersection, and to a lesser extent at the Epping Road/Essex Street intersection. (p.42)*
80. When the (then) Sydney East Joint Regional Planning Panel (JRPP) assessed the planning proposal as part of its initial review, it stated, as one of the seven (7) actions, that:
- The proposal on this site should be part of the current Council traffic review of the whole of Epping Town Centre and the outcomes that review shall inform the final decision on Floor Space Ratio for the site.*
81. Because of this, a detailed assessment of the planning proposal is considered unnecessary as the fundamental determinant for deciding whether the Epping Planning Review Study Area can take any more residential development is the ETCTS.
82. It is also worth noting that in March 2014, the zoning and density controls for the parcels fronting Epping Road and Forest Grove were amended enabling higher residential yields as part of the DP&E's Priority Precinct process. With the controls having only been in place for 18 months, the applicant seeks further uplift through this planning proposal process. As noted elsewhere in this report, this planning proposal for additional residential development represents housing development simply to increase housing.

Purchase of 725 Blaxland Road (former bowling club) site

83. Part of the site (the former Bowling Club site) is zoned RE1 Public Recreation. The City of Parramatta became responsible for the Planning Controls that apply

Council 9 July 2018

Item 14.5

to the subject site when the amalgamation occurred in May 2016. Therefore, the City of Parramatta became the acquisition authority for this public recreation land.

84. However, Hornsby Council did not have a funding strategy to acquire the site at 725 Blaxland Road. When the bowling club site became available for sale (ie the transaction that resulted in the current land owner acquiring it). The then Hornsby Council, had the opportunity to purchase it but made a decision not to yet still retained both the RE1 Public Open Space zoning on the Land Zoning Map, and the "Local Open Space Reservation" on the Land Reservation Acquisition Map, over the site.
85. Currently, there is no City of Parramatta Council funding strategy for its acquisition. The revised Section 7.11 and 7.12 (formerly 94/94A) Contributions Plans for Epping which came into effect in November 2017 does include collection for some open space provision. However, the advice in the Epping Planning Review was that Council would be better served by acquiring open space in different parts of Epping where growth is occurring rather than spending a substantial proportion of any funding available (via Section 94 or from other sources) on this portion of land which adjoins an existing substantial piece of open space. This recognises that spending funds to acquire this site would reduce Council's capacity to invest in other open space to meet the needs of growth in other parts of Epping as well as other community needs.
86. An initial internal valuation of the site was undertaken in mid 2017. The ERP Discussion Paper concluded that for the reasons described above the purchase of the site did not represent value for money and this position informed the subsequent adopted principle which was that Council not purchase the site and instead:
- That Council should seek to progress the planning proposal with Council as the RPA subject to the Traffic Study being completed before FSRs for the site can be finalised. That Council also negotiate with the developer for the provision of public open space in a way that ensures there is a suitable area of open space which is appropriately sized and located.*
87. Council Officers have subsequently commissioned an independent valuation for peer review purposes. The valuations remain Commercial in Confidence and confirms that the purchase of the site by Council is not a viable financial option.
88. With regards to the adopted principle above, Council Officers suggest that the opportunity to negotiate with the landowner to have them provide an equivalent amount of open space has changed because of the result of the ETCTS and is in part depended upon the decision made by the current RPA for the Austino Planning Proposal.
89. As already detailed above in this report the DP&E has chosen to remove the Council as the Relevant Planning Authority (RPA) for the Austino Planning Proposal and so it will need to make the next key decision. If despite the ETCTS the RPA now in place for the Austino PP (ie the Central Sydney Planning Panel) decide to proceed with the Planning Proposal then the Council should seek to enter into further discussions with the applicant and the RPA to seek to achieve some dedication of an equivalent amount of open space at no cost to Council as part of the Planning Proposal. If the DP&E allows the further growth despite the problems with the road network they should also be seeking to broker appropriate open space outcomes to help deal with the growth proposed.

Council 9 July 2018

Item 14.5

90. However, if the RPA decides not to proceed with the Planning Proposal then Council and the applicant will still need to resolve what will happen to the former bowling club site as it will remain zoned RE1 Public Recreation. Whilst this zoning is retained Council remains the acquisition authority.
91. Council options for the former bowling club site in this case will be:-
- a. To commit to the acquisition by retaining the RE1 zoning. As detailed above this option is not recommended by Council Officers as is not considered to be an efficient use of Council funds.
 - b. Alternatively, rezone the site so Council is no longer the acquisition authority. In this case the appropriate zoning would be R4 High Density Residential with a maximum height of 17.5m (which permits 5-6 storeys) (Note the *Hornsby LEP* does not include FSR controls for sites zoned R4 High Density Residential but Council's Urban Designers indicate that this would allow approximately 162 units to be built on this site under the controls that would apply under the Hornsby DCP with an FSR equivalent to 1.5:1).
92. It is acknowledged that allowing the site to be rezoned to allow more residential development will be inconsistent with the ETCTS conclusions but Council has two conflicting issues that need to be managed. Council will need to balance two potential negative impacts:-
- a. the traffic impact
versus
 - b. the sub-optimal financial and open space outcomes if it commits to remaining as the acquisition authority for the former bowling club site.
93. Council Officer consider that rezoning the former bowling club site to R4 High Density Residential with a height of 17.5m and FSR of 1.5:1 is the preferred approach because:-
- a. The density that would be permitted is much less than that proposed in the applicants PP so the traffic impact would be mitigated by comparison.
 - b. Council will not be forced to expend resources acquiring the former bowling club site in a location Council Officers consider is not optimal use of available funds.
 - c. The building height is consistent with the height applied by the DP&E to transition areas when it put in place the existing planning controls in Epping. It will see a stepping down of permitted height as you move away from Epping Road and down to Forrest Park.
94. It is acknowledged that the density permitted on the former bowling club site is the most significant factor driving its valuation and as the density decreases so will the cost of acquiring the site. If Council and the DP&E accept that a R4 High Density Residential Zoning with a height of 17.5m and FSR of 1.5:1 are the appropriate alternate controls to the current RE1 zoning then it maybe possible to have further discussions with the owner about the implications of this for the redevelopment of the site and the delivery of open space outcomes.

Recommendation

95. That Council object to the Planning Proposal in its current form and density proceeding and request that Council be re-instated as the RPA so that Council

Council 9 July 2018

Item 14.5

can pursue a Planning Proposal that would retain the current controls that apply to the site with the exception of the Bowling Club portion of the site which would be rezoned from RE1 Public Recreation to R4 High Density Residential with a maximum Height of Building control of 17.5m and FSR of 1.5:1.

IMPACT OF ETCTS ON PRELIMINARY PLANNING PROPOSALS

96. As has been noted during Stage 1 of the Epping Planning Review process, two preliminary planning proposals were lodged with Council in late 2014 which affect land within the town centre (western side). Refer to Figure 4. Both proposals have been on hold on account of the ETCTS being completed as per adopted principles of 14 August 2017. When combined, the preliminary planning proposals seek more than **2,000 dwellings**. This equates to an additional 1,000 dwellings above what can currently be achieved across both sites.
97. Each proposal seeks a partnership with Council to develop their sites in conjunction with the Council car park. Figure 4 below shows both the Oakstand and Lyon Group land holdings as well as Council's land holdings. The details of each proposal are provided in **Attachment 7**.

Figure 4 – Applicant owned land for preliminary planning proposals as well as Council's Rawson Car Park sites

Recommendations

98. Given the current growth rate from tracked DAs and the findings from the ETCTS, Council Officers conclude that in the short to mid term, there is no justification for further residential development simply to increase housing. That said, there is an opportunity for an expression of interest (EOI) process with landowners within the Town Centre to transfer some of the floorspace on Council's car park sites to another land owner/s site/s. The EOI process would, at the minimum, stipulate public benefits around a community hub facility, underground car parking, an east-west connection between community hub and the Epping Rail Station, and the like.
99. The outcome of this approach would mean that there is there no net increase in residential floorspace above what can currently be achieved. Effectively Council would be "trading" off the FSR from the carpark site to other sites to generate

Council 9 July 2018

Item 14.5

funding to provide community facilities on the site of the current car park. It should be noted that any redevelopment would also include retention of carparking on site as it is recognised that this is critical to the operation of western part of the Epping Town Centre.

100. This process would be the subject of a further Council report before any further action is taken explaining the process and potential outcomes. The alternative is to retain the current carpark site and seek to redevelop it independent of other landowners sites. In this case Council would find it difficult to realise the full FSR that currently applies on the site and at the same time provide a significant piece of civic space within current height limits. The viability of achieving the FSR of 4:1 and community facilities and a civic space on the site as a stand alone redevelopment would also be covered in the report should Council request a further report be provided.

IMPACT OF ETCTS ON AREAS WITH INTERFACE ISSUES

101. With regards to the heritage interface areas at Rosebank Avenue HCA, part of the Essex Street HCA, land parcels and Pembroke Road and Norfolk Street and the Rose Street Precinct, the principles adopted at the 14 August 2017 Council meeting recommend further planning analysis that tests higher residential densities such as *manor homes* or 3 storey *residential flat buildings* which would replace existing detached dwelling development.
102. The interface issues are a result of land use conflicts occurring as a result of the DP&E's Priority Precinct process and require resolution where possible. It is acknowledged that the ETCTS identifies significant traffic impacts on the EPR study area and increasing densities at interface areas will have an increase on the traffic impacts. However, the interfaces put in place where 5-6 storey building look onto the backyards of sites zoned for single dwelling development and covered by a Heritage Conservation Area designation are unacceptable and need to be addressed in some format. This issue was discussed in detail in the Epping Planning Review documents.
103. A copy of the EPR Discussion Paper and the report considered by the Council on 14 August 2017 have been attached (refer to **Attachments 8 and 9**). The details on each HCA and background on the recommendations for these areas is available in this background material. The report below details just the recommendations made previously and options discussed with Councillors at Ward Councillor Briefings to allow Council to determine whether it should proceed with the previous recommendations.
104. Council officers are of the opinion that if growth is to be permitted which will impact on the road network that it should be to resolve these types of planning problems rather than to just increase density on a site for the sake of additional housing numbers. It is for these reasons that Council Officers recommend that changes to the planning controls proceed despite the findings of the ETCTS.
105. Furthermore, in March this year, the DP&E released its *Low Rise Medium Density Housing Code* which comes into effect in July 2018. This establishes planning controls on some forms of medium density housing and provide further guidance on the recommended outcomes in this section.

Rosebank Avenue HCA

106. With regards to Rosebank Avenue HCA, in the 14 August 2018 Council report, Council Officers recommended:
- a. Removing the HCA notation but keeping heritage items.

Council 9 July 2018

Item 14.5

- b. For the area south of the heritage items: allow 3 storey **residential flat buildings (RFBs)**.
 - c. For the area north of the heritage items: no change.
 - d. That the changes occur ahead of completion of ETCTS.
107. Council subsequently resolved that it pursue 2 storey **manor homes** along full length of Rosebank Ave but test benefits of 3 storey **RFBs**.

Recommendation

108. Council Officers recommend proceeding with the original recommendations to remove the HCA notation, enable 3 storey **RFBs** south of the heritage items with no change north of the heritage items. Refer to Figure 5.

Figure 5 – Council Officer recommendation for Rosebank Avenue HCA

1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street

109. With regards to properties at 1, 3, 3A, 5, 7, and 7A Norfolk Road and 25 Pembroke Street, in the 14 August 2018 Council report, Council Officers recommended:
- a. Remove HCA notation but keep heritage items.
 - b. R3 zone of area edged black but limit No.s 7 & 7A Norfolk Rd to **manor homes** (current zoning is shown in Figure 6).
 - c. Enable 3 storey **RFB** on No.s 1, 3, 3A and 5 Norfolk Rd and 25 Pembroke St.
 - d. Changes occur ahead of completion of ETCTS.

Council 9 July 2018

Item 14.5

Figure 6 – Current zoning of 1, 3, 3A, 5, 7, and 7A Norfolk Road and 23, 23A and 25 Pembroke Street

110. Council subsequently resolved that it pursue 2 storey **manor homes** but test benefits of 3 storey **residential flat buildings**.
111. At the Ward Councillor Briefings discussed above the option of making no change to the controls in this area was discussed. Should Councillors wish to proceed with this option then Council should resolve to take no further action to change the planning controls for this precinct.

Recommendation

112. To ensure consistency with new Complying Code and subsequent analysis as part of the LEP Harmonisation process, Council Officers propose a new recommendation - **Part 'no change', part RFB**:
- No changes to battle-axe blocks at No.s 7 & 7A (ie. maintain controls for **detached dwellings**) because this conflicts with the DP&E's Complying Code on battle-axe blocks.
 - Rezone No.s 1, 3, 3A & 5 to R3 zone to enable 3 storey **RFB** subject to amalgamation controls being put in place to create 1 super lot.
 - No.25 Pembroke cannot develop of itself and should retain its existing zoning.
- Refer to the Figure 7.

Council 9 July 2018

Item 14.5

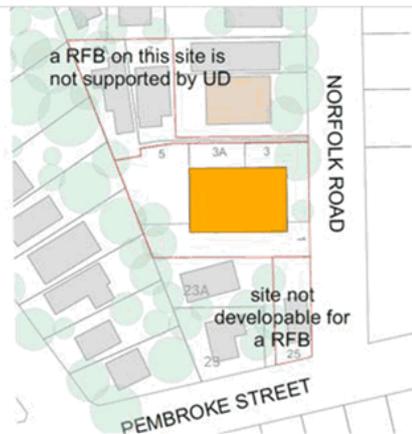

Figure 7 – Council Officer recommendation for 1, 3, 3A, 5, 7, and 7A Norfolk Road and 23, 23A and 25 Pembroke Street

Essex Street HCA

113. With regards to the Essex Street HCA, in the 14 August 2018 Council report, Council Officers recommended:

- a. Remove HCA notation but keep heritage items.
- b. Allow **manor homes** on western side between Epping Road and Maida Road only with no change on eastern side.
- c. That the changes occur ahead of completion of ETCTS.

114. The above recommendations were supported by the Council in August 2017.

Recommendation

115. Council Officers recommend maintaining the above recommendations and develop DCP controls that protect larger setbacks to ensure the protection of the tree canopy at rear setbacks.

Rose Street Precinct

116. With regards to the Rose Street Precinct, in the 14 August 2018 Council report, Council Officers recommended:

- a. Allow **residential flat buildings** development (R3 zone) with urban design analysis to step down height to Brigg Rd to 2 storeys.
- b. That the changes occur ahead of completion of ETCTS.

117. Council subsequently resolved that it pursue 2 storey **manor homes** but test benefits of 3 storey **residential flat buildings**.

118. At the Ward Councillor Briefing Councillors the issue of the topography of this area and the drainage implications of allowing more density were raised. Council Officers consider that this issue could be investigated as part of the redevelopment options but if Councillors are of the opinion that this should be investigated upfront the recommendation should be amended accordingly.

Recommendation

119. Council Officers recommend allowing **residential flat buildings** with associated urban design analysis and DCP controls that enable the stepping down of the building height to 2 storeys at the Brigg Road/Rose Street

Council 9 July 2018

Item 14.5

frontages and that the four (4) sites fronting Blaxland Road also be included in the precinct. Refer to Figure 8.

Figure 8 – Council Officer recommendation for Rose Street Precinct but include the 4 properties fronting Blaxland Road

Rockleigh Park

120. With regards to the Rockleigh Park, in the 14 August 2018 Council report, Council Officers recommended:

- a. The area zoned R4 (edged with yellow line) be down-zoned to R3 to be consistent with R3 zone boundary to north and east.
- b. That further urban design analysis to determine best height and FSR controls.

121. The above recommendations were supported by the Council.

Recommendation

122. Council Officers recommend reinstate original recommendations. But ensure that **residential flat buildings** are prohibited from this area (R3 zone in HLEP permits 4 storey RFBs). Refer to Figure 9.

Figure 9 – Council Officer recommendation for Rockleigh Park

IMPACTS OF ETCTS ON COMMERCIAL FLOORSPACE

123. Recent pre-lodgments and development applications within the centre continue to erode the volume of commercial floorspace within the centre as developers

Council 9 July 2018

Item 14.5

are 'opting out' of applying the existing DCP provisions that require delivery of 2, 3 and 4 storey podiums of commercial floorspace in mixed use proposals. This is because of the weak 'statutory weight' that DCP controls have over an environmental planning instrument such as a LEP.

124. As discussed in the section entitled "Impact of ETCTS on State Significant Development at 240-244 Beecroft Road", Council Officers have identified that approximately **8,200sqm of retail floorspace** and **35,200sqm of office floorspace** needs to be "replaced". To deliver this, Council's Urban Designers determine that three storey commercial podiums (comprising one floor of retail and two floors of office premises) on remaining sites can deliver the required floorspace.
125. With regards to traffic, the associated traffic impacts from commercial land uses (retail and office premises) may well be greater than those associated with residential development. This is because commercial uses tend to generate a greater number of trips per square metre of floor area. This is another area where Council Officers consider that it may be necessary to allow additional development to resolve a planning issue not related solely to housing delivery. In this case allowing additional density that may detrimentally impact on traffic outcomes should be considered.
126. Given this conflict around the need for more commercial floorspace within the centre to protect its economic viability and amenity, with its associated traffic impacts, a delicate balancing exercise is required that meets the of commercial floorspace needs of the centre whilst acknowledging the potential traffic impacts.
127. In light of the above, Council Officers have identified the following potential options:
- a. **Option 1 – No change:** This option involves no change to the current controls. Because the market favours residential development and the pace of that development recently, this option is highly likely to encourage DAs that deliver only ground floor commercial that will undermine centre's amenity and economic viability. This has no traffic impact compared to current controls.
 - b. **Option 2 – Require minimum level of commercial FSR provision to be provided without amending the maximum FSR or Building Heights:** This option involves increasing the commercial FSR requirements but this occurs at the cost of residential FSR. It means that the heights or densities of buildings will not change, but there will be a higher proportion of commercial floorspace within any development and less residential than would currently be permitted. In other words, it equates to a net decrease in residential FSR but will improve centre's amenity and economic viability. This will potentially result in a detrimental impact on the local traffic network.
 - c. **Option 3 – Require minimum level of commercial FSR provision to be provided but amend the maximum FSR or Building Heights to seek to retain where possible an FSR for residential equivalent to existing levels** This will mean increases in overall density and building heights but it makes delivery of more commercial (retail/office) uses more viable which will improve the centre's amenity and economic viability. The detrimental impact on the local traffic network will be greatest with this option.

Council 9 July 2018

Item 14.5

Recommendation

128. Of the above options, Council Officers recommend **Option 3 - Increase Commercial FSR and density/building heights** because of the strong residential market and the way the planning system operates, if Option 2 was pursued, Council would receive a flood of DAs seeking mixed use development with only the ground floor allocated to commercial uses. These would all have to be considered and potentially approved under the current planning rules and the opportunity to provide the commercial floorspace Epping needs will be lost forever. Without sufficient commercial/retail floorspace the future function and amenity of the Town Centre is significantly impacted.
129. Whilst Option 3 is the Council Officer preference at this point in time this scenario needs to be run through the traffic modelling and if the outcome is unacceptable it may be necessary to fall back to Option 2. A further analysis and report to Council will allow Council to determine which option it will ultimately pursue via a Planning Proposal.

CONCLUSION

130. The reported rate of growth compared to the growth envisaged by the DP&E in 2013 demonstrates the Epping Town Centre has been doing a lot of the "heavy lifting" for dwelling growth and that the impact on infrastructure means that further housing growth for the sake of increasing house supply in Epping is not necessary.
131. This report provides a basis for Council to take to the DP&E, the Minister for Planning and the GSC seeking support for a strategic approach to future planning in Epping where any growth seeks to solve existing planning problems rather than just increasing density for the sole purpose of providing additional housing supply.

NEXT STEPS

132. The next steps are:
- a. Progressing supplementary traffic analysis on new through link through 240-244 Beecroft Rd; and re-opening of former M2 bus tunnel link.
 - b. Exhibiting the ETCTS documentation for major stakeholder comment.
 - c. Council Officers to arrange EPR Steering Group meeting with State agencies about proposed policy change and revisiting infrastructure delivery.
 - d. Council Officers prepare further Council reports that seek to:
 - i. Provide advice on provision of community facilities on the Councils Rawson Street Car park land and whether an EOI process should be pursued to enter into partnerships with other landowners.
 - ii. Report on the outcome of the consultation on the Epping Town Centre Traffic Study and the results of the supplementary traffic analysis discussed in this report on:-
 1. Reopening of the former M2 bus tunnel link; and
 2. A new east west road link through 240-244 Beecroft Road.

Item 18.6 - Attachment 1Planning Proposal various properties Epping

Council 9 July 2018

Item 14.5

- e. Planning Proposal processes inclusive of background and technical study preparation commence on:
- i. The heritage interface areas; and
 - ii. The provision of commercial floor space in the centre.

REFERENCE MATERIAL

MINUTES OF THE MEETING OF CITY OF PARRAMATTA COUNCIL HELD IN THE DUNDAS COMMUNITY CENTRE, 21 STURT STREET, TELOPEA ON MONDAY, 9 JULY 2018 AT 6.33PM

PRESENT

The Lord Mayor, Councillor Andrew Wilson and Councillors Benjamin Barrak, Phil Bradley, Donna Davis, Robert Dwyer, Pierre Esber, Michelle Garrard (Deputy Lord Mayor), Paul Han, Steven Issa, Andrew Jefferies, Sameer Pandey, Dr Patricia Prociw, Bill Tyrrell, Lorraine Wearne and Martin Zaiter.

ACKNOWLEDGEMENT TO TRADITIONAL LAND OWNERS

The Lord Mayor, Councillor Andrew Wilson, acknowledged the people of The Darug Nation as the traditional custodians of this land, and paid respect to their ancient culture and their elders past and present.

WEBCASTING COUNCIL MEETING

The Lord Mayor, Councillor Andrew Wilson, advised that this public meeting is being recorded and streamed live on the internet. The recording will also be archived and made available on Council's website.

The Lord Mayor further advised that all care will be taken to maintain privacy, however as a visitor in the public gallery, the public should be aware that their presence may be recorded.

OTHER RECORDING OF MEETING

As per Council's Code of Meeting Practice, the recording of the Council Meeting by the public using any device, audio or video, is only permitted with Council permission. Recording a Council Meeting without permission may result in the individual being expelled from the Meeting.

PROCEDURAL MOTION

1449	RESOLVED (Wilson)	That Item 14.5 relating to Epping Town Centre Traffic Study and other Epping Planning Review Matters and Item 14.7 Delegations to the Chief Executive Officer be brought forward in the meeting for consideration.
14.5	SUBJECT	Epping Town Centre Traffic Study and other Epping Planning Review Matters
	REFERENCE	F2017/00210 - D06202874
	REPORT OF	Snr Project Officer
1450	RESOLVED (Tyrrell/Wearne)	<p>(a) That Council note this update on the Epping Planning Review and related matters.</p> <p>(b1) That Council exhibits the Epping Town Centre Traffic Study and supporting documentation (including the further supplementary reports) to enable comment from major stakeholders in accordance with the consultation plan described in the body of this report with a Community Briefing Session to be organised to inform the community about the content of the Traffic Study and allow them to ask questions about its preliminary findings to inform any submissions stakeholders may wish make on the study.</p>

- (b2) **That** the exhibition material placed on public exhibition state that Council does not support any extension of Rosebank Avenue to connect with Rosen Street as described in the traffic study and advise the affected landowners of this decision.
- (c1) **That** despite recommendation (b1) above, that Council adopts the position that it does not support any:
- (i) Planning proposal or preliminary planning proposal that applies to sites situated within the Epping Planning Review Study Area which seek to deliver extra housing in addition to what can be achieved under the current planning controls, unless the planning proposal is seeking to address a planning issue identified in Council's Epping Planning Review process related to:-
 - commercial floor space in the Epping Town Centre; or
 - the Planning Controls that should apply to Heritage Conservation Areas or areas that interface with High Density Residential zones surrounding Epping Town Centre.
 - (ii) Development applications seeking an increase in residential density via clause 4.6 of the *PLEP 2011*;
and that Council write to both the Department of Planning and Environment (DP&E) and the Greater Sydney Commission advising them this will remain Council's position until the State Government has provided infrastructure to resolve the through traffic issues with the Epping Town Centre.
- (c2) **That** a Planning Proposal including all necessary background studies and analysis be prepared to amend Clause 4.6 of PLEP 2011 so that it cannot be used to seek a FSR greater than that permitted on the Floor Space Ratio Map for sites within the Epping Town Centre.
- (d) **That** in relation to the Austino Planning Proposal that Council write to the DP&E to:-
- (i) Object to the Planning Proposal proceeding in its current form and density and request that no Planning Proposal proceed for this site. Instead the existing planning controls should be retained with the portion currently zoned RE1 Public Recreation remaining in place along with retaining no Floor Space Ratio or Height of Buildings control notations applying to that portion.
 - (ii) **That** the Council write to the Minister for Planning seeking that the Minister amends the legislative provisions related to the acquisition of open space land applying the principle that where a developer has purchased land which at the time of purchase is already zoned public open space, they should not benefit from any changes to the value derived from the existing zoning of adjoining land or changes to zoning of adjoining land. And write to the Local Members requesting funding out of the Open Spaces and Greater Sydney Package. To avoid any doubt Council considers that the owner should be entitled to the price they paid (adjusted for

- CPI) but no increases in value as a result of changes to the planning controls surrounding the site.
- (e) **That** Council write to the Minister for Planning, Landcom and the Greater Sydney Commission and request the State Significant Development currently being progressed for 240-244 Beecroft Road be placed on hold until a workshop can be organised involving Council and Landcom to discuss and seek to resolve the following:-
- (i) to establish whether a new road link can be provided through this site linking Beecroft Road and Ray Road; and
 - (ii) the provision of commercial floor space on the site being provided at a level no less than 1:1 FSR on this site.
- (f) **That** a further report is brought to Council on the options for future civic space and community facilities on the following sites:-
- (i) the Rawson Street carpark site; and
 - (ii) the Chalmers Street site (containing the existing Epping Library site and adjoining open space);
- including analysis on whether any process should be commenced to realise the FSR available on either of these sites.
- (g) **That** in addition to correspondence Council resolved to forward to the State Government regarding the investigation of M2 tolling at the 12 June 2018 Council Meeting (i.e. Item 15.5) the further supplementary reports on:-
- (i) Reopening of the former M2 bus tunnel link; and
 - (ii) A new east west road link through 240-244 Beecroft Road
- be forwarded to the relevant transport agencies that manage the former M2 bus link, the RMS and Urban Growth and circulated to Councillors upon receipt and then be placed on public exhibition with the Epping Town Centre Traffic Study with any feedback received on this issues during the consultation to be reported back to Council.
- (h) **That** a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments as follows:-
- (i) Rockleigh Park Precinct; controls consistent with the recommendations in the body of this report
 - (ii) In the Norfolk, Pembroke, Essex Street area the planning controls be retained (including the Heritage Conservation Area notation) for 1, 3, 3A, 5, 7, and 7A Norfolk Road 25 Pembroke (ie retain the existing R2 Low Density Residential zoning and the existing Height of Building controls of 8.5m) and instead amend the controls for the following sites as follows:-
 - 21, 23, 25, 27 and 29 Essex Street amend the zoning from R4 High Density Residential to R3 Medium Density Residential with maximum height permitted on these sites to be amended from 17.5m to 11m (to allow for apartment building development no greater than 3

storeys on these sites); and

- The height of building control for 23, 23A Pembroke be reduced from 12m to 11m with the existing zoning of Residential R3 Medium Density Residential to be retained for these two sites;

and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.

(i) **That** a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments for 2 - 8 Rosebank Ave and 1 - 7 Rosebank Ave as follows:

- (i) Remove the Heritage Conservation Area notation from these sites;
- (ii) Rezone the sites from Residential R2 Low Density Residential to R3 Medium Density Residential; and
- (iii) Amend the permitted height of building for these sites from 8.5m to 11m (to allow for apartment building development no greater than 3 storeys on these sites).

All other sites in Rosebank Avenue should retain their existing planning controls including the Heritage Conservation Area notation and that the Planning Proposal and associated material shall be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.

(j) **That** a Planning Proposal and Draft DCP amendments including all necessary background studies and analysis be prepared to progress amendments to these plans for the Essex Street HCA Precinct with the planning controls to be consistent with the following:-

- (i) Retention of the existing Heritage Conservation Area for both sides of Essex Street
- (ii) Amend the planning controls to allow for detached dual occupancies on the western side of Essex Street between Epping Road and Maida Road (which are the sites that are impacted by proximity to the adjoining 5 storey apartment buildings) in the form where the second dwelling shall be permitted behind the existing dwelling but not in a Duplex form.
- (iii) That the Draft DCP that applies to this HCA and surrounding land be reviewed with a view to including: -
 - a detailed analysis of significant trees located on the sites on the western side of Essex Street and supporting DCP controls that seek protect those trees; and
 - Draft DCP planning controls that require provision to be made for the widening and improvement of the pedestrian link currently located between 58-60 Essex Street linking through to Forest Grove;

and that the Planning Proposal and associated material be

- 22 -

reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.

- (k) **That** no further action be taken to amend the Planning Controls that apply to the Rose Street Precinct until a drainage analysis detailing the implications of re-development of the Rose Street Precinct Sites is completed and reported to Council.
- (l) **That** a Planning Proposal including all necessary background studies and analysis be prepared to progress the recommended LEP amendments detailed in this report relating to new controls to require the provision of commercial floor space in the Town Centre and that the Planning Proposal and associated material be reported to Council for endorsement before it is forwarded to the Department of Planning and Environment seeking any Gateway Determination for the planning proposal.
- (m) **That** Council Officers identify potential sites for acquisition for open space purposes in the areas to the north east of the Epping Town Centre. This process should include obtaining valuations for acquisition and the construction of the parks and should also involve discussions with potentially affected landowners. A further report to Council on the outcome of this analysis be reported to Council to allow Council to determine whether it wishes to commence a rezoning process to rezone any sites in this area for open space.
- (n) **That** Council write to the Member for Epping seeking their support for funding for the acquisition of open space in the area north east of the Epping town centre as part of the Open Spaces and Greener Sydney package announced in April 2018. The Local Member also be requested to make representations to the relevant Minister to ensure the criteria that needs to be met to obtain grant funding provides flexibility (in terms of timeframe for delivery and the identification of the land to be acquired) so that Council can secure the funding prior to finalizing the rezoning and consultation/ acquisition processes
- (o) **Further, that** this motion carries the unanimous support of the Ward Councillors being Councillors Tyrrell, Wearne and Davis.

DIVISION The result being:-

PLANNING PROPOSAL – Various properties along Pembroke and Essex Streets, and Rockleigh Park Precinct, Epping

Appendix 4 – Summary of decision making in relation to the subject properties

F2019/02038

Summary of assessment and decision making in relation to properties in East Epping as part of the Epping Planning Review

The following provides a summary of assessment and decision making in relation the following properties within or adjoining the East Epping Heritage Conservation Area:

1. Rockleigh Park Precinct
2. 1, 3, 3A, 5, 7 and 7A Norfolk Road and 25 Pembroke Street
3. 23 and 23A Pembroke Street and 21-29 Essex Street

Rockleigh Park (2-24 Rockleigh Way, 3-7 & 4-8 Brenda Way and 5A Essex Street)		
Report & Date	Assessment	Decision (if relevant)
Epping Town Centre (East) Heritage Review – June 2017	<p>In relation to planning controls surrounding the East Epping Heritage Conservation Area, the Heritage Review concluded that a consistent transition between the R4 High Density Residential development along Essex and Pembroke Streets was required in order to prevent further encroachment on the conservation area. Key recommendations include:</p> <ul style="list-style-type: none"> • Rezone the Rockleigh Park parcels from the R4 High Density Residential Zone which has a 17.5m (5 storey) height to the R3 Medium Density zone with a 12 metre (4 storey) building height, in order to provide a smooth transition from the R2 Low Density Residential of the East Epping Heritage Conservation Area and the R4 High Density Residential area of Essex and Pembroke Streets. 	N/A
Epping Planning Review Discussion Paper – June 2017	<p>Section 7 of the Discussion Paper examined the Heritage Review recommendations for both Rockleigh Park Precinct and presented options for the community to consider. The purpose of these options was to gain feedback from the community as to what planning solution was acceptable.</p> <p>In relation Rockleigh Park the Discussion Paper recommended down-zoning the site from the R4 High Density zone to the R3 Medium Density zone, enabling a reduction in the permissible density. It also recommended the preparation of a master plan to determine the most appropriate outcome.</p>	N/A
Council Report - 14 August 2017	Council considered a report that summarised landowner and residents submissions in relation to the Epping Planning	At its meeting on 14 August 2017, Council resolved (in part):

Rockleigh Park (2-24 Rockleigh Way, 3-7 & 4-8 Brenda Way and 5A Essex Street)		
Report & Date	Assessment	Decision (if relevant)
	<p>Review Discussion Paper and technical studies exhibited from 21 June to 19 July 2017.</p> <p>In relation to Rockleigh Park, (refer Sections 69 to 80 of the Council report) community feedback showed strong support for the down-zoning of the site from the R4 to the R3 zone as it would more appropriately deal with the transition between higher and lower densities and, further, should be supported by a master planning process so that appropriate height and density controls can be put in place. Based on feedback and the Heritage Review (2017) Council Officers recommended:</p> <ol style="list-style-type: none"> 1. The component of Rockleigh Park currently zoned R4 be rezoned to R3 so that the entire Rockleigh Park precinct fall under a consistent R3 zone; and 2. That further urban design analysis be undertaken across all of Rockleigh Park to determine the best building height and density controls, including amalgamation patterns in the future. This analysis will also inform DCP controls. 	<p><i>"That the recommended principles, as identified within the report and contained within Attachment 6 be endorsed for the purposes of guiding Stage 2 of the Epping Planning review..."</i></p>
Council Report – 9 July 2018	<p>On 9 July 2018, a Council report was presented updating Council on the implications for the findings of the Epping Planning Review, including further assessment work undertaken for the sites in Rockleigh Park Precinct. In summary the Council report recommended:</p> <ul style="list-style-type: none"> • That the area zoned R4 be down-zoned to R3 in the Rockleigh Park Precinct to be consistent with R3 zone boundary to north and east; • That further urban design analysis to determine best height and FSR controls; and • Residential flat buildings are prohibited from this area. 	<p>At its meeting on 9 July 2018 in relation to East Epping, Council resolved (in part):</p> <p>(h) <i>That a Planning Proposal including all necessary background studies and analysis be prepared to progress LEP amendments as follows:-</i></p> <p><u>(i) Rockleigh Park Precinct; controls consistent with the recommendations in the body of this report</u></p>

1, 3, 3A, 5, 7 and 7A Norfolk Road		
Report & Date	Assessment	Decision Made
Epping Town Centre (East) Heritage Review – June 2017	In relation to planning controls surrounding the East Epping Heritage Conservation Area, the Heritage Review concluded that a consistent transition between the R4 High Density Residential development along Essex and Pembroke Streets was required in order to prevent further encroachment on the conservation area. Key recommendations include: <ul style="list-style-type: none"> That the heritage conservation area designation be removed from 1, 3 and 3A Norfolk Road and 25 Pembroke Street and together with 5, 7, and 7A Norfolk Road be rezoned to R3 Medium Density Residential. This would allow them to be potentially developed for apartment buildings (4 storeys). 	N/A
Epping Planning Review Discussion Paper – June 2017	Section 7 of the Discussion Paper presented three options to address the transition issues to the HCA in relation to 1-7A Norfolk Road and 25 Pembroke Street. The strengths and weaknesses of the following options were presented: <ol style="list-style-type: none"> recommendation of the Heritage Review – to remove the HCA designation from 1-3A Norfolk Road and 25 Pembroke Street and together with 5-7A Norfolk Road be rezoned to R3. rezone 1-7A Norfolk Road and 25 Pembroke Street to R3 Medium Density Residential to allow 2 storey manor homes allow 1 Norfolk Road and 25 Pembroke Street to be rezoned to R3 Medium Density Residential and retain R2 Low Density Residential zoning on 3-7A Norfolk Road. 	N/A
Council Report 14 August 2017	Council considered a report that summarised the feedback from land owners and the community in relation to the East Epping Heritage Conservation Area, specifically options presented in relation to the properties in Norfolk Road and	At its meeting on 14 August 2017, Council resolved (in part):

1, 3, 3A, 5, 7 and 7A Norfolk Road		
Report & Date	Assessment	Decision Made
	<p>Pembroke Street (refer Sections 81-96 of the Council report).</p> <p>Community feedback was divided in relation to the properties. Responses from landowners included unanimous support for removal of the HCA and rezoning to R3 (Option 1). To permit apartment development feedback from adjoining owners had a preference for Option 2 and other residents supported Options 2 or 3 which proposed lower density development than Option 1.</p> <p>Based on feedback and the Heritage Review (2017) Council Officers recommended:</p> <ul style="list-style-type: none"> • that Option 2 of the Discussions Paper be applied, which involves removing the HCA notation over properties 1, 3, 3A Norfolk Road and 25 Pembroke Street and rezoning at seven parcels to the R3 zone to allow: <ul style="list-style-type: none"> ○ 2 storey manor homes on 7 and 7A Norfolk Road; and ○ Enable redevelopment of 1, 3, 3A and 5 Norfolk Road and 25 Pembroke Street to realise residential flat buildings (no more than three storeys) and undertake appropriate urban design analysis to determine built form controls. 	<p><i>That the recommended principles, as identified within the report and contained within Attachment 6 be endorsed for the purposes of guiding Stage 2 of the Epping Planning review subject to the following amendments:</i></p> <p><i>Heritage Chapter – 1, 3, 3A, 5, 7 and 7A Norfolk Road Clause 96, recommended principle a.ii be replaced with the following principle:</i></p> <p><i>Refer to Alternate Principle - Heritage below.</i></p> <p>Alternate Principle - Heritage</p> <p><i>That the development of 2 storey 'manor houses' within the following precincts be pursued in response to the current interface issues being experienced by residents. However, as part of this process further work should also be carried out to test the benefits of 3 storey residential flat buildings with all the appropriate DCP controls, for example setbacks, amalgamation patterns to determine whether an alternative approach may be more appropriate.</i></p> <p style="text-align: center;">- 1, 3, 3A, 5, 7 and 7A Norfolk Road and 25 Pembroke Street</p>
Council Report – 9 July 2018	<p>On 9 July 2018, a Council report was presented updating Council on the implications for the findings of the Epping Planning Review, including further assessment work undertaken for the sites in Pembroke Street, Norfolk Road</p>	<p>At its meeting on 9 July 2018 in relation to East Epping, Council resolved (in part):</p>

Item 18.6 - Attachment 2

Local Planning Panel Meeting Report and Minutes Epping

Local Planning Panel 17 September 2019

Item 6.6

INNOVATIVE

ITEM NUMBER	6.6
SUBJECT	Gateway Request: Planning Proposal - various properties in Rockleigh Way, Pembroke and Essex Streets, Epping
REFERENCE	F2019/02038 - D06984544
REPORT OF	Senior Project Officer - Land Use
PREVIOUS ITEMS	14.5 - Epping Town Centre Traffic Study and other Epping Planning Review Matters - Council - 09 Jul 2018 6.30pm 11.3 - Epping Planning Review - Completion of Stage 1 and Commencement of Stage 2 - Council - 14 Aug 2017 6:00pm

PURPOSE:

To seek the Local Planning Panel's (LPP) advice on a Planning Proposal for various sites in the Rockleigh Park Precinct, Essex Street and Pembroke Street, Epping for the purposes of seeking a Gateway Determination from the Department of Planning, Industry and Environment to amend the land use zoning, floor space ratio and height controls to manage the impact of high density land use zoning on the adjoining East Epping Heritage Conservation Area.

RECOMMENDATION

That the Local Planning Panel consider the following Council staff recommendation in its advice to Council:

- (a) **That** Council endorse the Planning Proposal at **Attachment 1** which seeks the following amendments to Hornsby Local Environmental Plan (LEP) 2013 in relation to the following sites:
- (i) Land at 5A Essex Street, 2-24 Rockleigh Park, 3-7 and 4-8 Brenda Way:
 - Rezone the land from R4 High Density Residential to R3 Medium Density Residential;
 - Amend the maximum height of buildings from 17.5 metres to 9 metres; and
 - Apply a floor space ratio (FSR) of 0.6:1, noting there is no existing FSR control for the sites.
 - (ii) Land at 21-29 Essex Street
 - Amend the maximum height of buildings from 17.5 metres to 11 metres (to allow for residential flat buildings no greater than 3 storeys); and
 - Apply a floor space ratio (FSR) of 0.8:1, noting there is no existing FSR control for the sites.
 - (iii) Land at 23 and 23A Pembroke Street, Epping
 - Rezone the sites from R3 Medium Density Residential to R4 High Density Residential;
 - Amend the maximum height of buildings from 12 metres to

- 1 -

Local Planning Panel 17 September 2019

Item 6.6

- 11 metres; and
- Apply a floor space ratio (FSR) of 0.8:1, noting there is no existing FSR control for the sites.
- (b) **That** Council not prepare a masterplan for the Rockleigh Park Precinct sites. Instead any redevelopment under the proposed R3 Medium Density Residential be assessed against the relevant Hornsby Development Control Plan (DCP) 2013.
- (c) **That** the Planning Proposal be forwarded to the Department of Planning, Industry and Environment to request the issuing of a Gateway Determination.
- (d) **That** Council advises the Department of Planning, Industry and Environment that the Chief Executive Officer will be exercising the plan-making delegations for this Planning Proposal as authorised by Council on 26 November 2012.
- (e) **Further, that** Council authorise the Chief Executive Officer to correct any minor anomalies of a non-policy and administrative nature that may arise during the amendment process.

BACKGROUND

SITE DESCRIPTION

1. This planning proposal relates to the following twenty-six land parcels (refer **Figure 1 and 2**):
 - a. 23-23A Pembroke Street;
 - b. 21, 23, 25, 27 and 29 Essex Street;
 - c. 5A Essex Street;
 - d. 3, 4, 5, 6, 7 and 8 Brenda Way; and
 - e. 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22 and 24 Rockleigh Park.

Figure 1 – 7 Properties along Essex and Pembroke Streets, Epping subject to this planning proposal (as outlined in yellow)

- 2 -

Local Planning Panel 17 September 2019

Item 6.6

2. The properties in Essex and Pembroke Street are large blocks (ranging between 680 and 950 square metres). Each lot contains a one or two storey dwelling house. 23A Pembroke Street is a battle-axe block at the rear of 23 Pembroke Street.

Figure 2 - 19 properties in Rockleigh Park precinct are subject to the planning proposal (shaded in blue)

3. A total of eighteen properties in Rockleigh Park Precinct are small single and two storey cottages, some of which are attached, and located on relatively small lots (between 250 and 350 square metres). 5A Essex Street is a roadway (known as Brenda Way and Rockleigh Park) and provides access to properties in the Rockleigh Park precinct and falls under community title.

CURRENT PLANNING CONTROLS

4. The provisions of the Hornsby Local Environmental Plan (LEP) 2013 apply to the subject properties, a summary of the relevant planning controls are provided in **Table 1** and shown in **Figures 3 to 5** below.

Local Planning Panel 17 September 2019

Item 6.6

Table 1: Summary of current Hornsby LEP 2013 controls relating to the subject properties.

Subject sites	Hornsby LEP 2013 controls
Rockleigh Park precinct	<ul style="list-style-type: none"> • Zoned R4 Low Density Residential; • maximum building height of 17.5 metres; and • No maximum floor space ratio (FSR).
21-29 Essex Street	<ul style="list-style-type: none"> • Zoned R4 High Density Residential; • Maximum height of buildings of 17.5 metres; and • No maximum floor space ratio (FSR).
23-23A Pembroke Street	<ul style="list-style-type: none"> • Zoned R3 Medium Density Residential; • Maximum building height of 17.5 metres; and • No maximum floor space ratio (FSR).

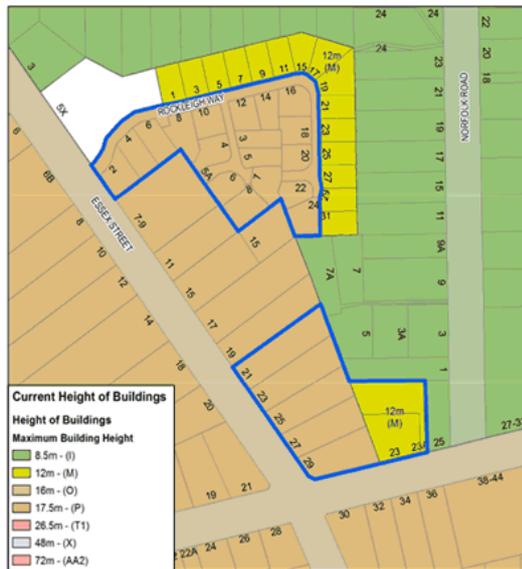

Figure 5: Subject properties and proximity to East Epping Heritage Conservation Area

Local Planning Panel 17 September 2019

Item 6.6

Epping Town Centre Urban Activation Process

5. On 14 March 2014, the (then) Department of Planning and Environment (Department) finalised the Epping Urban Activation Precinct amendments to the Hornsby and Parramatta Local Environmental Plans via State Environmental Planning Policy (Epping Town Centre) 2013 ("the SEPP Amendment"). The SEPP Amendment provides capacity for approximately 10,000 additional dwellings and a revitalised commercial and retail core adjacent to a major transport hub.
6. The new planning controls established four new Heritage Conservation Areas, including the East Epping Heritage Conservation Area. It also up-zoned the properties subject to this planning proposal on the south and west side of Rockleigh Park and Pembroke and Essex Street from R2 Low Density Residential to R4 High Density Residential, permitting 5 storey residential flat buildings.
7. As part of the UAP Program, Perumal, Murphy Alessi Heritage Consultants were engaged by the Department to review the significance of the proposed East Epping and Essex Street Heritage Conservation boundaries, the significance of individual properties nominated for heritage listing and the impact of the proposed Cliff Avenue Residential intensification precinct on the proposed Rosebank Avenue HCA.
8. The heritage report, named the Epping Town Centre Heritage Review (March 2013), recommended that adjoining residential intensification precincts be limited to three storeys, which was supported by Hornsby Shire Council. Notwithstanding this recommendation, the Department finalised the UAP to permit five storey development on land adjoining the Essex Street and Rosebank Avenue Heritage Conservation Areas. The Department justified this amendment based on submissions received from land owners concerned about the feasibility of redevelopment and that the impact on adjoining Heritage Conservation Areas could be addressed by providing sufficient setbacks and deep soil planting as required by Hornsby DCP 2013.
9. Subsequently, Hornsby Shire Council amended the Heritage Section of the Hornsby DCP 2013 (section 9.4.1) to provide additional design guidance at the interface between five storey development and Heritage Conservation Areas.
10. When considering the aforementioned DCP amendments, Hornsby Shire Council at their meeting of 8 October 2014, considered the submissions, including concerns in relation to the perceived amenity, noise and traffic impacts of the R4 zoning of Rockleigh Way on residents in the R3 zone part of Rockleigh Way. Submissions from residents called for a consistent R4 High Density Residential zoning on both sides of Rockleigh Way to ensure development impacts were fairly distributed. Hornsby Council Officers recommended that no change to the planning controls in relation to Rockleigh Way as the lots are narrow and shallow and would require amalgamation to achieve lots of developable size. In addition Hornsby Council Officers noted that the R3 zoning on the northern and eastern side of the street provides a "more sensitive transition to the adjoining East Epping HCA." No changes to the planning controls Rockleigh Way were resolved as part of this Hornsby Shire Council meeting.

Local Planning Panel 17 September 2019

Item 6.6

Epping Planning Review Project – Stage 1

11. In December 2016, the Epping Planning Review was commenced by the City of Parramatta Council. The scope of the review was to address the unintended consequences of the planning control amendments brought into effect in March 2014 as well as allowing Council to manage current (formal and preliminary) Planning Proposals seeking additional growth within the Town Centre. It also allowed the City of Parramatta Council to progress matters considered by the former Hornsby Shire Council, including heritage matters.
12. The study area for the Epping Planning Review was based on the Department's Urban Activation Precinct boundary and is illustrated in **Figure 6**.

Figure 6 - Epping Planning Review Study area (in orange)

13. The Epping Planning Review project involves the following stages:-

- Stage 1 – the preparation of technical studies, community consultation and the release of a Discussion Paper for public comment.
- Stage 2 – involves the statutory phase, including the preparation of planning proposals that seek to amend the current planning controls to resolve the land use issues identified during the first phase. Council are currently in this phase of the project and this planning proposal forms part of this stage.
