

Community and Crown Land Plan of Management

DRAFT

February 2022

**CITY OF
PARRAMATTA**

Recognition of the Dharug Peoples

The City of Parramatta respectfully recognises the traditional owners of the land and waters of Parramatta, the Dharug Peoples.

**Nunanglanungdyu Baramada
gulbanga mawa naa
Baramadagal Dharug ngurrawa
badura Baramada, Dharug yura.**

The Darug peoples have cared for and nurtured the habitat, and the waters in Parramatta and its surrounding areas for thousands of generations.

We seek to reflect and embrace the rich culture and heritage of the Darug people, and their deep connection to the River, in strategic directions regarding the future of the City of Parramatta.

For over 60,000 years, the area comprising present day Parramatta City has been occupied by the Burramattagal people, a clan of the Darug, who first settled along the upper reaches of the Parramatta River.

The word Burramattagal is derived from the Aboriginal word for 'place where the eels lie down' to breed within the Parramatta River.

The Burramattagal have a close connection with the Parramatta River.

Introduction

1.1 Context

The City of Parramatta is situated in the geographical heart of metropolitan Sydney and is home to the largest CBD in Western Sydney. It comprises 84km² throughout 33 suburbs that function as a complex network of infrastructure and places. Urban renewal throughout the Local Government Area (LGA) is facilitating significant population growth making Parramatta one of Australia's fastest growing areas.

This unprecedented growth and change throughout the LGA is forecast to increase the population from 235,000 residents in 2016 to 488,000 in 2041. The growing population is diverse, with approximately half born overseas and / or speaking a language other than English at home. Aboriginal and Torres Strait Islander People make up 0.7% of the population.

The growing population will predominantly be accommodated through increased density over the next two decades, with the proportion of residents in high density dwellings projected to double from 34% to 70% of all dwellings by 2041. This will place pressure on our parks and reserves, which comprise Community and Crown land. The sustainable and best-practice management of these public open spaces will be increasingly important to the health and wellbeing of the community, particularly the growing proportion that will rely upon them as their backyard.

The City of Parramatta Council (Council) manages approximately 835 hectares of Community and Crown land that comprise a network of around 375 parks and reserves throughout the LGA. This network

comprises public land that was formerly located within five different local government areas (Auburn, Holroyd, Hornsby, Parramatta and The Hills) prior to the boundary changes that created the City of Parramatta in May 2016.

Our diverse parks and reserves include sporting fields, playgrounds, courts, fitness equipment, picnic and BBQ facilities. They provide a range of recreational opportunities to meet the evolving needs of our growing and diverse community, whilst also protecting pockets of bushland and waterway corridors, which provide important habitat for our native plants and animals.

Council manages Community and Crown land in accordance with the key legislative requirements outlined below in **Figure 1**.

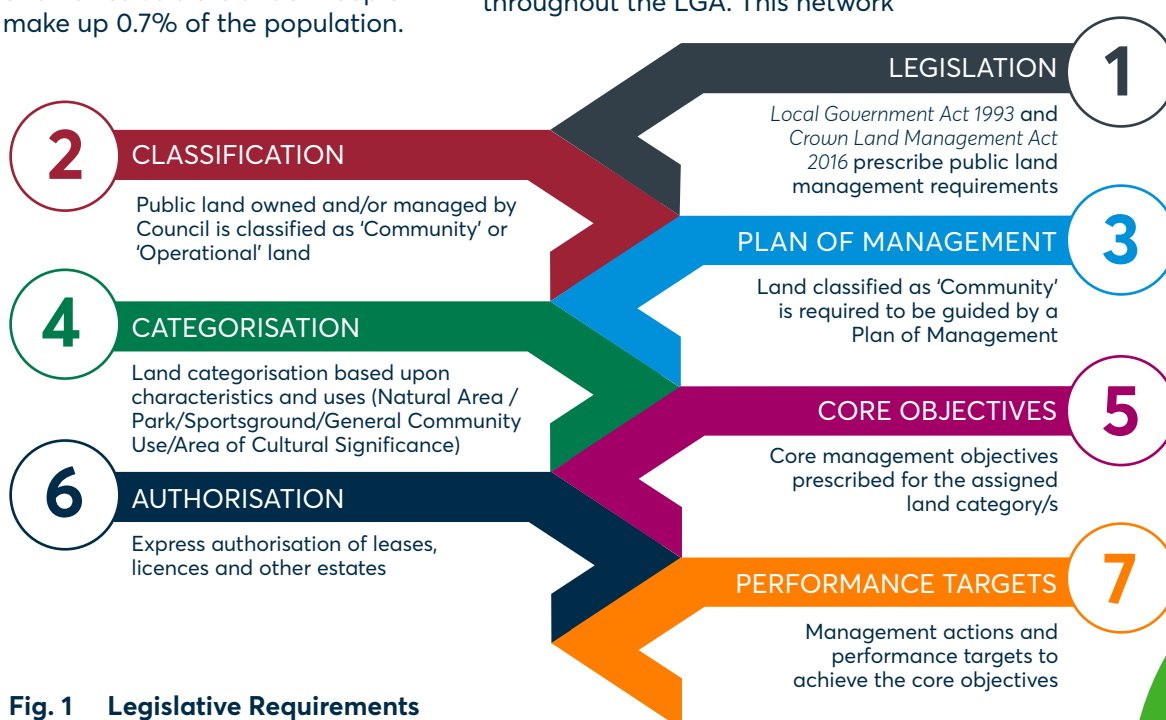

Fig. 1 Legislative Requirements

1.2 What is a Plan of Management?

The *Local Government Act 1993* (LG Act) requires that a Plan of Management be prepared and adopted for all Council owned or managed public land classified as 'community' under the Act.

A Plan of Management is based on community values and core objectives as prescribed in the LG Act. It identifies key issues and provides a framework to ensure a consistent and transparent approach to guide the management and use of public land.

The LG Act requires that a Plan of Management identifies:

- the category for the land
- objectives and performance targets for management of the land
- the means (actions) by which Council proposes to achieve the objectives and performance targets
- measures by which council proposes to assess its performance.

A Plan of Management must also 'expressly authorise' the purposes for which Council can lease, licence or grant other estates over Community land.

A Plan of Management may apply to one (specific) or more (generic) areas of Community land.

Table 1 outlines how this Plan of Management complies with LG Act requirements.

Table 1: Plan of Management Requirements

LG Act Requirement	How this plan satisfies the Act
Categorisation of Community land	Section 4.4 and Appendix D
Core objectives for management of the land	Section 4.4
Authorisation of leases, licences or other estates over community land	Section 6
Performance targets	Section 7
A means for assessing achievement of objectives and performance targets	Section 7

1.3 Crown Land Plans of Management

The commencement of the *Crown Land Management Act 2016* (CLM Act) on 1 July 2018, authorised local councils appointed as Crown Land Manager to manage dedicated or reserved Crown land as if it were public land under the LG Act. Council currently manages 65 Crown reserves as Crown Land Manager. These have been reserved or dedicated for access, cemetery, environmental protection, public recreation, public park and community purposes.

Under the CLM Act, Council must prepare a Plan of Management for all Crown land under its management. These are to be prepared and adopted in accordance with the Plan of Management provisions of the LG Act.

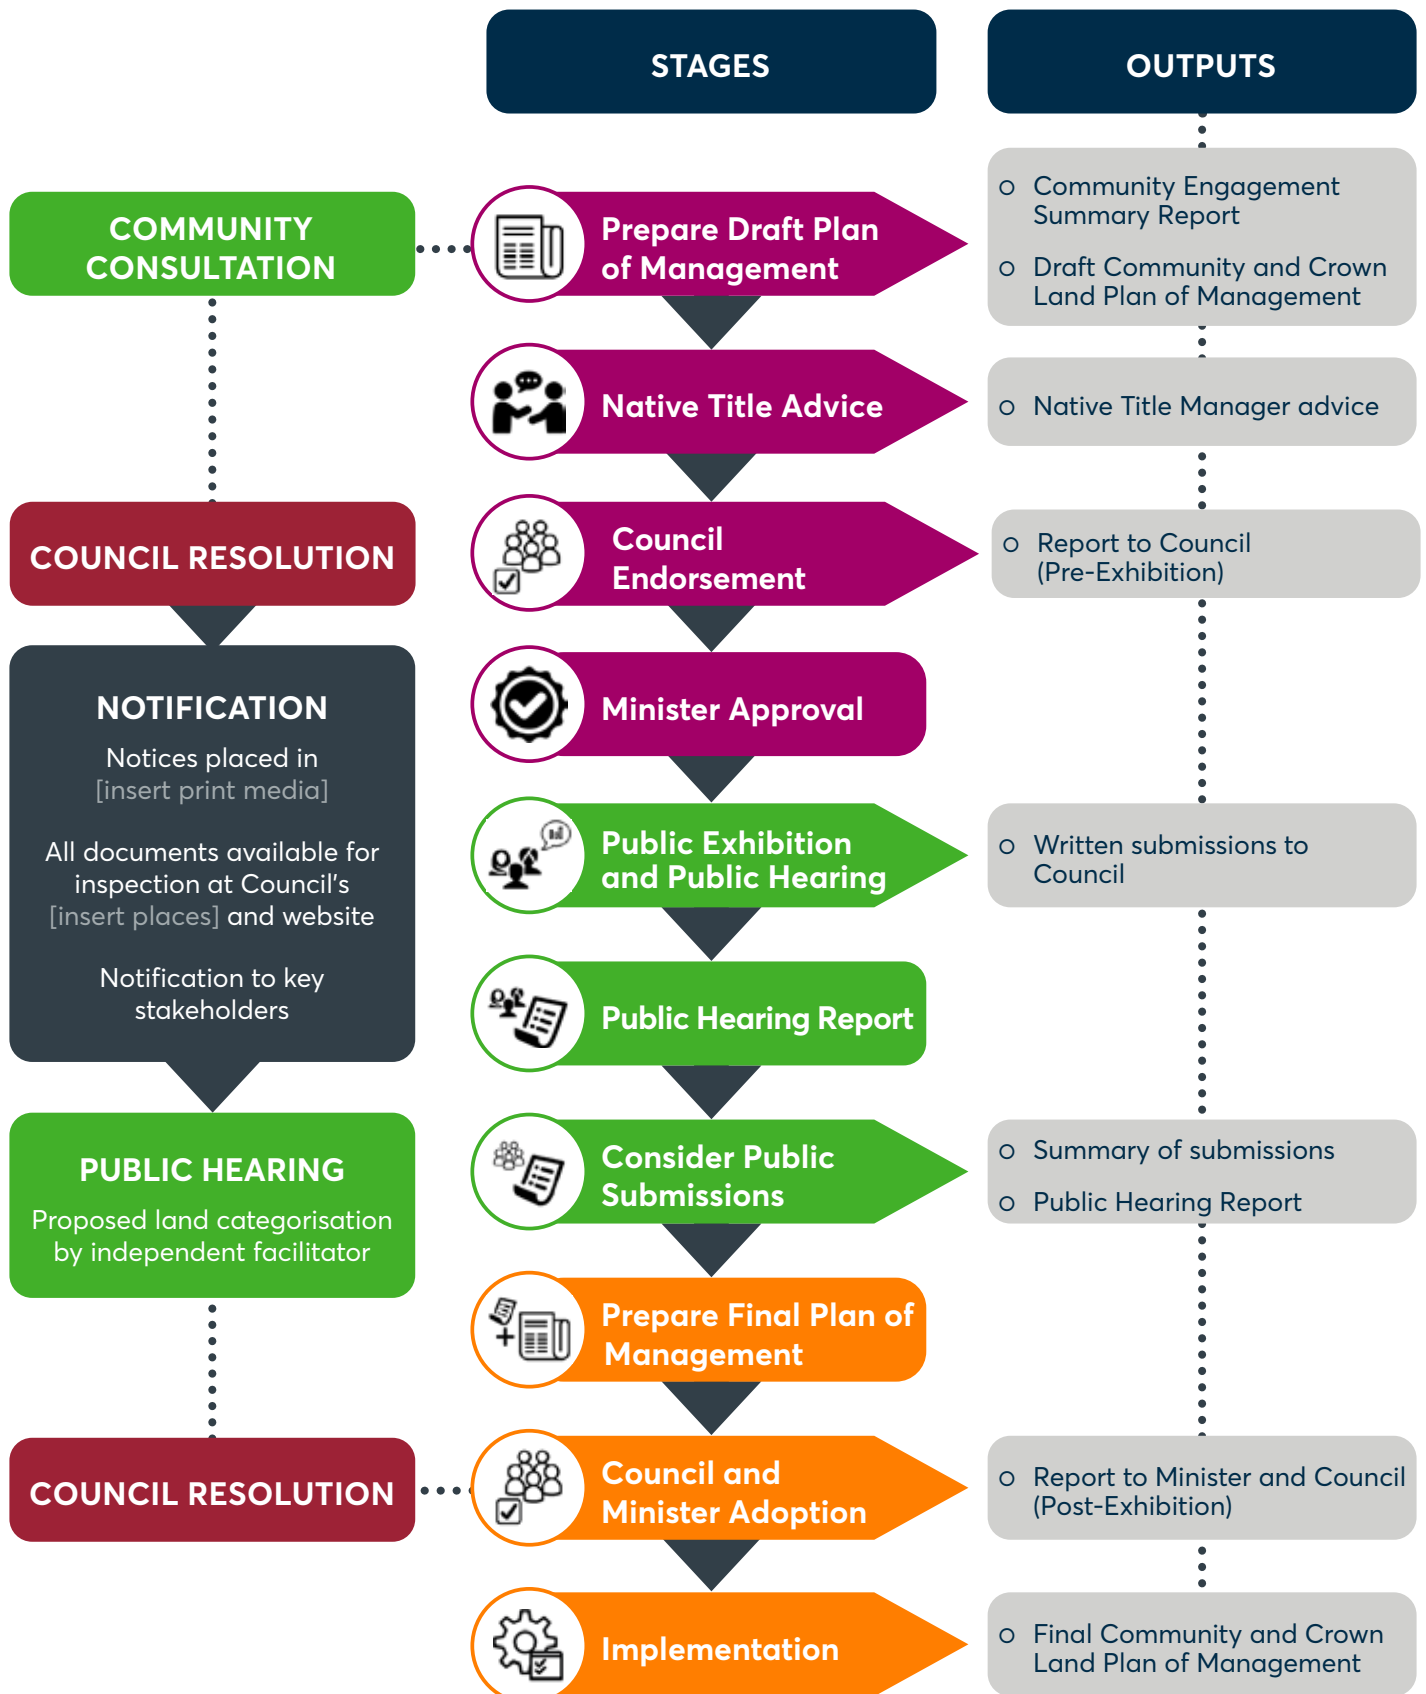

This Community and Crown land Plan of Management (CCLPoM) is a generic Plan of Management that applies to all Community and Crown land managed by the Council. It includes both land classified as 'community' under the LG Act and Crown land reserved or dedicated for a public purpose for which Council has been appointed as Crown Land Manager under the CLM Act.

To ensure a consistent approach to public land management, this CCLPoM covers all of the Community and Crown land within the City of Parramatta LGA. It includes land categorised as Park, Sportsground, General Community Use and Natural Areas (including sub-categories) under the LG Act (refer to **Section 4: Basis for Management**).

1.4 Plan of Management Process

The process of preparing this Plan of Management is illustrated in Figure 2.

Fig. 2 CCLPoM Flowchart

1.5 Superseded Plans of Management

The 2016 local government boundary changes that created the City of Parramatta resulted in the transfer of Community and Crown land formerly located within Auburn, Holroyd, Hornsby, Parramatta and The Hills LGAs.

Table 2 below lists the Plans of Management previously adopted by these Councils for land now within City of Parramatta LGA, which are consolidated into and repealed by this CCLPoM.

Table 2: Former Plans of Management

Plan of Management (PoM)	Former LGA	Type
Parks PoM (1997)	Holroyd	Generic
PoM for Parks (2001)	Auburn	Generic
Mays Hill Reserve PoM (2004)	Holroyd	Specific
PoM for Natural Areas (2008)	The Hills	Generic

1.6 Butbutt Yura Barra Ngurra: City of Parramatta Community Strategic Plan

The *Community Strategic Plan (CSP)* sets a future vision and identifies Councils long-term priorities and aspirations to achieve a sustainable, liveable and productive community. It is required under the local government Integrated Planning and Reporting Framework, and is developed in partnership with the community based upon the social justice principles of equity, access, participation and rights.

To achieve the identified community priorities and long-term goals, the CSP establishes social, environmental, economic and civic leadership strategies informed through community engagement. Council's CSP aligns with the State Plan and other relevant state and regional plans. Community and Crown land will need to be managed consistent with the objectives and strategies of the current Community Strategic Plan.

- B) Jones Park
- C) Baludarri Wetland
- D) Lake Parramatta Reserve
- E) West Epping Park

1.7 Community Engagement

1.7.1 Statutory requirements

Effective public participation is important in the preparation of a Plan of Management to ensure that it reflects current and future community values and expectations. Community consultation for this CCLPoM was undertaken in accordance with a Community Engagement Plan prepared, consistent with the requirements of Councils *Community Engagement Strategy* and the LG Act. This requires that a draft Plan of Management is placed on public exhibition for a minimum of 28 days and has a 42 day submission period.

The LG Act and CLM Act also prescribe that Council must hold a public hearing if any Community or Crown land is intended to be categorised or re-categorised. This public hearing must be conducted by an independent facilitator and Council must make a copy of the report outlining the hearing proceedings from the person presiding at the public hearing available for inspection at a public location within four (4) days of receiving the report.

1.7.2 Engagement Plan

Council's *Community Engagement Strategy* establishes a framework to involve the community in the decision making process of local government. A Community Engagement Plan guided community consultation activities to ensure that the CCLPoM reflects community and stakeholder needs and expectations. This utilised the 'Participate Parramatta' online engagement portal, social media, local newspaper advertising and a public hearing meeting to provide an opportunity for key stakeholders and members of the community to provide feedback on the CCLPoM.

1.7.3 Other Government Landowners

Council also manages Community and Crown land on behalf of other government landowners for the benefit of the public. In accordance with the LG Act, these landowners were provided with a copy of the CCLPoM for feedback and endorsement, prior to public exhibition.

1.7.4 Public Exhibition

The draft CCLPoM will be placed on public exhibition for a period of 42 days during which the community and other stakeholders can make submissions. Copies of the draft CCLPoM will be available for review during the public exhibition period at:

- o Customer Contact Centre
- o Libraries
- o 'Participate Parramatta' website

An independently facilitated public hearing will also be held during the public exhibition period.

1.8 Native Title Manager Advice

Native title refers to the rights and interests of Aboriginal and Strait Islanders in land and waters under their traditions, laws and customs. These traditional rights are recognised to continue to exist on Crown land where they have not been extinguished. The CLM Act requires Council, as a 'responsible person', to comply with native title requirements in managing Crown Land. Any activities or dealings on Crown land must be valid 'future acts' in accordance with the *Native Title Act 1993* (NT Act). The advice of a 'native title manager' must be obtained for the CCLPoM as it authorises dealings, such as leases, licences or public works, which may affect native title.

In accordance with CLM Act requirements, a qualified 'native title manager' has reviewed the CCLPoM and provided written advice to Council. The native title manager has advised that this CCLPoM complies with the applicable provisions of native title legislation. No 'future act' is permitted on the following Crown lands:

- Speers Road Reserve (R.1001070)
- Moxham Park (R.83745)
- Pitt Row Headmasters Cottage Reserve (R.1014228)
- Old Kings Parade Ground (R.1031748)

Excepting where:

- a. the lands become excluded land for the purposes of the CLM Act, or
- b. the act is a tenure which satisfies the requirements of Section 24HA (Management of Water and Airspace) of the NT Act
- c. the act is a public work which satisfies the requirements of Section 24KA of the NT Act
- d. the act is a low impact act and satisfies the requirements of Section 24LA of the NT Act.

Any act authorised under Section 24LA of the NT Act will terminate after an approved determination of native title is made in relation to the land or waters, if the determination is that native title exists.

No Biodiversity Conservation or Stewardship agreements under the *Biodiversity Conservation Act 2016* are permitted on dedicated or reserved Crown land unless it is 'excluded land' for the purposes of the CLM Act.

Land Description

2.1 Subject Land

This CCLPoM applies to public land that is owned, or under the management of Council, including:

- classified as 'community' under the LG Act, and;
- Crown land for which Council is Crown Land Manager under the CLM Act.

The location of this Council managed land is illustrated in **Figure 3: Council Managed Community and Crown Land Map**. A list of the subject land parcels is also included at **Appendix D: Community and Crown Land Schedule**. This schedule will require periodic review to reflect new acquisitions or dedications of land under Council ownership or where additional land is placed under the care, control and management of Council.

2.2 Land Classification

Council is required to classify all public land as either 'community' or 'operational' under the LG Act. It also specifies that 'before a council acquires land, or within 3 months after it acquires land, a council may resolve that the land be classified as community land or operational land.' Any land acquired by a council that is not classified by a Council resolution at the end of the 3 month period is 'taken to have been classified under a local environmental plan as community land.'

2.3 Community Land

Community land is that which is set aside for public purposes and community use and cannot be sold, such as parks, sporting fields, bushland and community centres. It is defined under Schedule 7 (Clause 6) of the LG Act, being land:

- comprising a public reserve
- subject to a trust for a public purpose
- dedicated as a condition of a development consent under Section 94 of the *Environmental Planning and Assessment Act 1979*
- reserved, zoned or otherwise designated for use under an environmental planning instrument as open space
- controlled by a council that is vested in the corporation constituted under the *Environmental Planning and Assessment Act 1979*.

This includes land under Council ownership as well as land owned by other government agencies under the care, control and management of Council.

The development and use of community land must be in accordance with a Plan of Management and be consistent with the core objectives prescribed for the category assigned to the land under the LG Act. It is subject to strict controls set out in the LG Act, and must also comply with the requirements of various other legislation, environmental planning instruments and policies as outlined in **Section 3: Legislative and Planning Framework**.

2.4 Operational Land

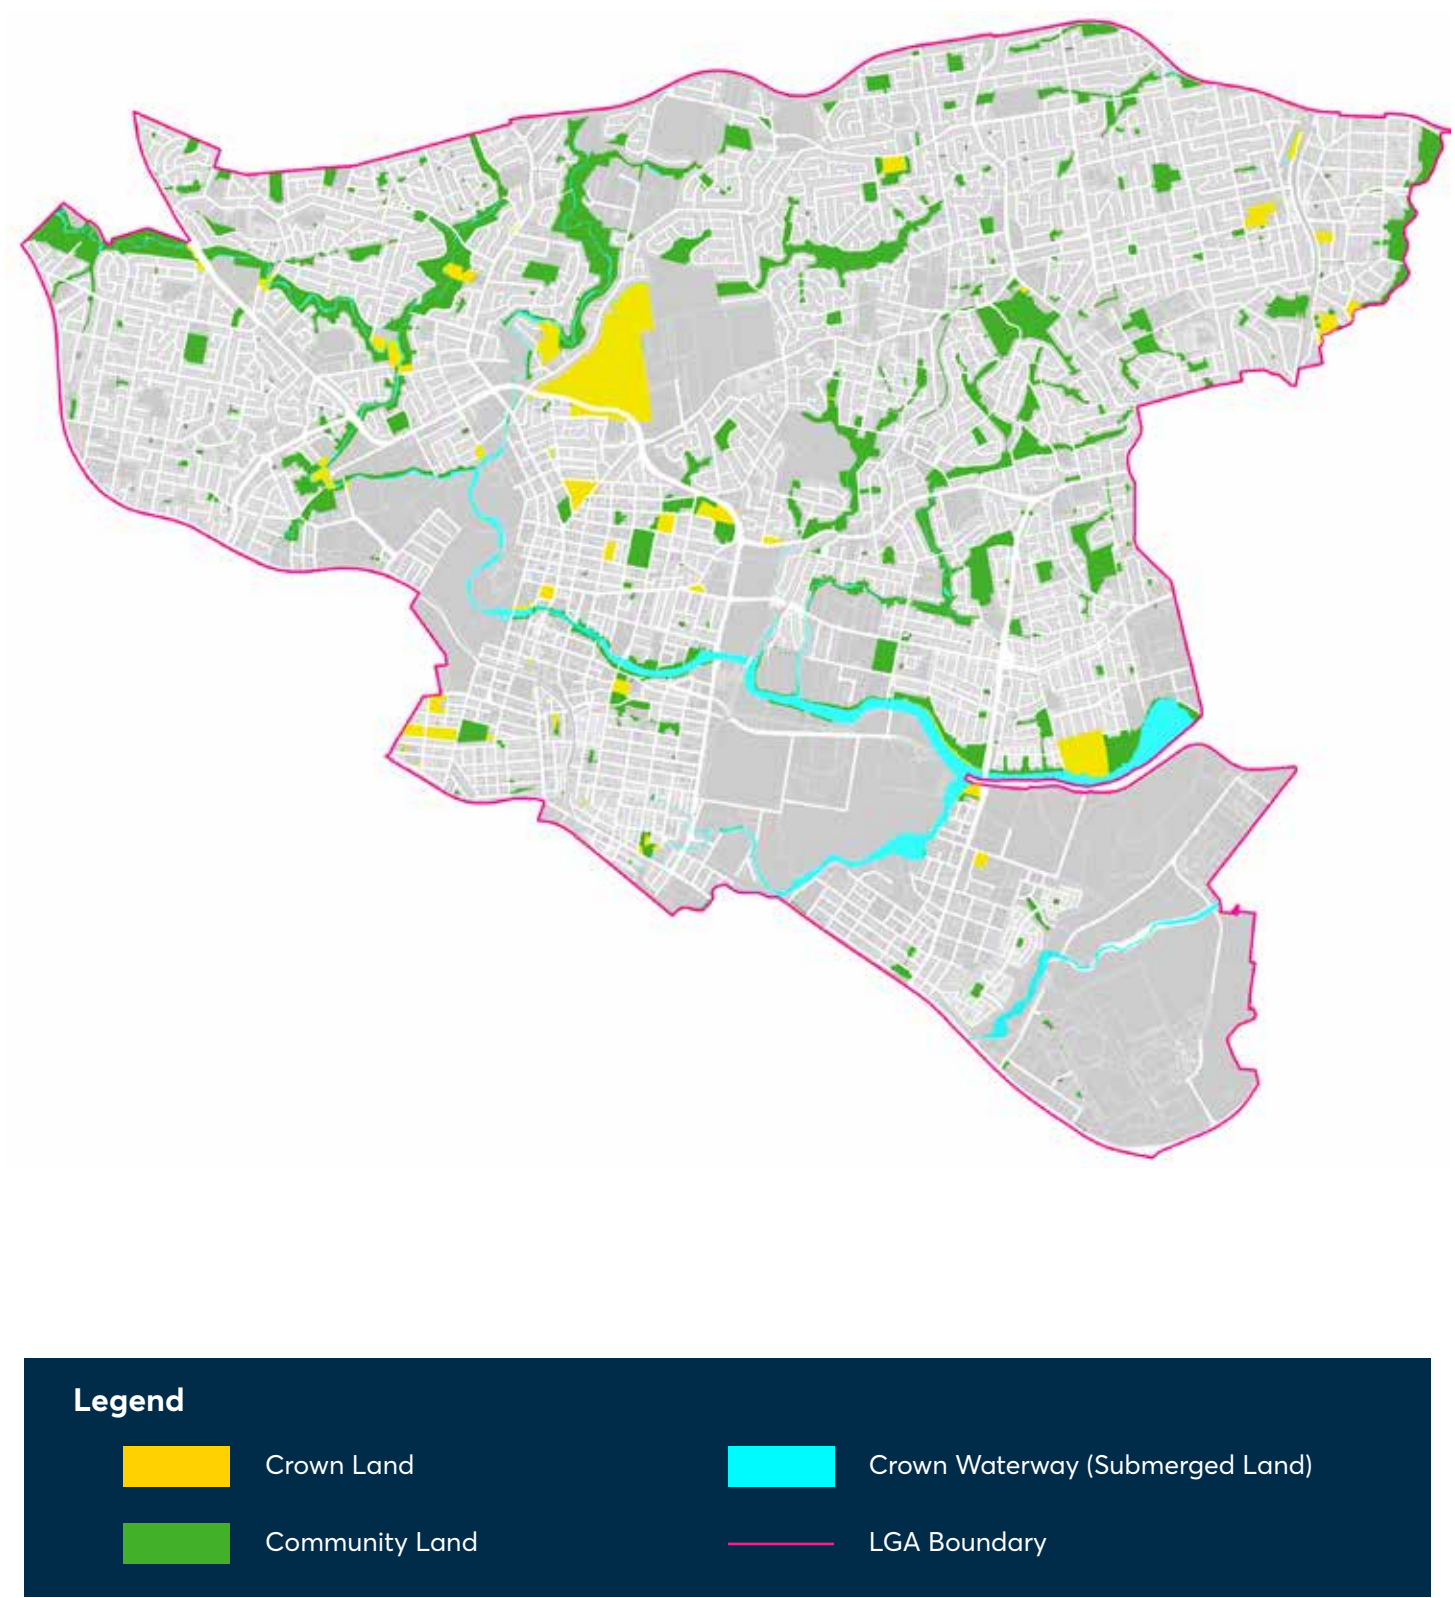

Operational land comprises of land which serves a commercial or operational function (e.g. Council depot or car park), or land which is being retained by Council for commercial or strategic reasons. The restrictive community land provisions do not apply to the use and management of operational land, which is not subject to the CCLPoM.

Note: There are a number of parks that are operational land or comprise part or entire road reserves. Whilst these portions of public land are not subject to categorisation or other legislative provisions for community land, they have been included to ensure a consistent and holistic management approach.

2.5 Crown Land

Crown Land is owned by the NSW Government ('Crown') and can be reserved or dedicated for a public purpose, such as Public Recreation or Environmental Protection, under the CLM Act. Council can be appointed as Crown Land Manager under the CLM Act to manage Crown reserves and dedications as Community land under the LG Act. As Crown Land Manager, Council has all the functions that a local council has under the LG Act for Community land, including leasing and licencing. Crown land must be managed consistent with the gazetted reserve purpose/s and in accordance with a Plan of Management.

Fig. 3 Council Managed Community and Crown Land Map

2.6 Submerged Land

Community and Crown land parcels within the City of Parramatta LGA both includes and adjoins tidal and non-tidal waterways. Over time the physical boundaries of these submerged lands may change position through natural processes of erosion and accretion and therefore affect the size and shape of adjoining public land.

The tidal sections of Duck and Parramatta Rivers are tributaries of Sydney Harbour and are vested in Transport for NSW (TfNSW) who manage the land below the Mean High Water Mark (MHWM) on behalf of the NSW Government. Any infrastructure, occupation or use of these tidal waterways requires the consent of TfNSW as landowner.

The majority of non-tidal waterways below the top of bank' within the City of Parramatta LGA comprise of Crown land. However, the non-tidal section of the Parramatta River in the Parramatta CBD between Charles and O'Connell Street weirs has been vested under Council ownership and managed as Community land under this CCLPoM.

2.7 Land Not Under This CCLPoM

Public land not subject to this CCLPoM includes:

- land classified as 'operational' under the LG Act
- Community and Crown land subject to a specific Plan of Management (**Refer to Section 2.8: Other Plans of Management**)
- public land (including Crown) owned and/or managed by other entities (**Refer to Section 2.9: Land Owned and/or Managed by Other Entities**).

2.8 Other Plans of Management

Plans of Management for Community and Crown land can comprise either of the following:

- a generic plan which covers multiple sites that share similar values to ensure consistent management
- a significant area plan which covers a particular site where management issues and values may be more complex and require a site-specific focus
- a geographic plan which covers a particular area such as a river or creek foreshore, bushland corridor, or similar.

There are currently no other plans of management applying to Council managed Community or Crown land at the time of adoption of the CCLPoM. However, it is recognised that there may be a need to develop future specific Plans of Management for land currently included due to unique characteristics or management issues. This generic CCLPoM will cease to apply to land covered by any subsequently adopted Plan of Management.

2.9 Land Owned and/or Managed by Other Entities

The City of Parramatta LGA also includes publicly accessible land that is not managed by Council. This land is managed on behalf of the NSW Government by other entities or is privately owned and is not subject to this CCLPoM, as outlined in **Table 3: Land Owned or Managed by Other Entities**.

Table 3: Land Owned or Managed by Other Entities

Land	Entity
Bidjigal Reserve	Crown Lands Ministerial Corporation
Duck and Parramatta Rivers (Tidal)	Transport for NSW
Former Rifle Range (within Darling Mills Creek Reserve)	Commonwealth of Australia
Muirfield Golf Course	Muirfield Golf Club
Oatlands Golf Course	Oatlands Golf Club
Parramatta Park	Parramatta Park Trust
Rosehill Gardens Racecourse	Australian Turf Club
Sydney Olympic Parklands	Sydney Olympic Park Authority
Western Sydney Stadium	Venues NSW

Legislative and Planning Framework

Plans of Management must comply with all relevant legislation and environmental planning instruments that apply to the use of Community and Crown land. This section describes the legislative and policy framework applying to the land covered under this CCLPOM.

3.1 Local Government Act 1993

The LG Act provides the legal framework for local government in NSW. It aims to ensure strong, healthy and prosperous local communities through the following guiding principles:

- *provide strong and effective representation, leadership, planning and decision-making.*
- *carry out functions in a way that provides the best possible value for residents and ratepayers.*
- *plan strategically, using the integrated planning and reporting framework, for the provision of effective and efficient services and regulation to meet the diverse needs of the local community.*
- *apply the integrated planning and reporting framework in carrying out their functions so as to achieve desired outcomes and continuous improvements.*
- *work co-operatively with other councils and the State government to achieve desired outcomes for the local community.*
- *manage lands and other assets so that current and future local community needs can be met in an affordable way.*
- *work with others to secure appropriate services for local community needs.*
- *act fairly, ethically and without bias in the interests of the local community.*
- *be responsible employers and provide a consultative and supportive working environment for staff.*

It also prescribes the following decision-making and community participation principles:

- *recognise diverse local community needs and interests.*
- *consider social justice principles.*
- *consider the long term and cumulative effects of actions on future generations.*
- *consider the principles of ecologically sustainable development.*
- *decision-making should be transparent and decision-makers are to be accountable for decisions and omissions.*
- *actively engage with their local communities.*

Community land must be managed according to the provisions of the LG Act and the *Local Government (General) Regulation 2021*. These prescribe specific provisions for the management and use of public land, being that which is owned by or under the control of Council. This includes classification as either 'Community' or 'Operational' land (Refer to **Section 2.2: Land Classification**).

Community land is required to be further categorised, based upon its characteristics and intended use/s. The LG Act also prescribes that all Community land is to be managed in accordance with a Plan of Management in addition to any other legislation regulating the use of the land.

A Plan of Management must also address specific requirements under the LG Act as outlined below in **Table 4: LG Act Plan of Management Requirements**.

Table 4: LG Act Plan of Management Requirements

LG Act Provision	Generic	Specific
Identify the category of the land	●	●
Identify the objectives and performance targets	●	●
Identify the means for achieving the objectives and performance targets	●	●
Identify the manner for assessing achievement of objectives and performance targets	●	●
Express authorisation for granting of leases, licences and other estates	●	●
Include a description of the current condition and use of the land and any buildings or other improvements on the land	-	●
Specify the purposes for which the land and any such buildings or improvements will be permitted to be used	-	●
Specify the purposes for which any further development of the land will be permitted, whether under lease or licence or otherwise	-	●
Describe the scale and intensity of any such permitted use or development	-	●
Identify the owner of the land (when non-Council)	●	●
Minimum 28 day public exhibition and 42 day submission periods	●	●
Non-Council landowner notification prior to public exhibition	●	●
Public hearing for land categorisation or re-categorisation of land	●	●
Re-exhibition if substantial amendments are required following public exhibition and/or the public hearing	●	●

3.2 Crown Land Management Act 2016

The CLM Act authorises the Minister to reserve or dedicate Crown land for a public purpose. It must be managed consistent with the principles of Crown land management:

(a) that environmental protection principles be observed in relation to the management and administration of Crown land, and

(b) that the natural resources of Crown land (including water, soil, flora, fauna and scenic quality) be conserved wherever possible, and

(c) that public use and enjoyment of appropriate Crown land be encouraged, and

(d) that, where appropriate, multiple use of Crown land be encouraged, and

(e) that, where appropriate, Crown land should be used and managed in such a way that both the land and its resources are sustained in perpetuity, and

(f) that Crown land be occupied, used, sold, leased, licensed or otherwise dealt with in the best interests of the State consistent with the above principles.

Council Crown land managers are empowered to manage dedicated or reserved Crown land as if it were public land under the LG Act. It must be managed as Community land unless Council has the consent of the Minister to manage as Operational land.

CLM Act Crown land manager requirements are:

- Land categorisation under the LG Act,
- Plan of Management adopted under the LG Act,
- Use/s must be consistent with or ancillary to the dedication or reservation purpose,
- Native title manager advice for plans of management or dealings (leases, licences and other estates).

3.3 Native Title Act 1993

The *Native Title Act 1993* (NT Act) recognises the rights and interests of Aboriginal and Torres Strait Islander people in land and waters according to their traditional laws and customs. It prescribes how native title rights are to be recognised and protected, making provisions for establishing or extinguishing native title, as well as dealing with land and waters where native title may not have been extinguished.

Native title rights and interests must be assumed to exist on Crown land unless they have been extinguished, surrendered or determined by a court to no longer exist. Any dealings on Crown land that potentially affect native title, through extinguishment or being inconsistent with the 'continued existence, enjoyment or exercise of native title rights and interests' are defined as 'future acts'.

Any 'future acts' undertaken by Council on Crown land must be valid under the 'future act' provisions of the NT Act, which also specifies procedures that must be followed to ensure compliance. These may include:

- leases, licences or other estates
- public buildings and other facilities
- major earthworks
- road and other public infrastructure
- vegetation clearing

The CLM Act requires the written advice of a qualified native title manager to ensure that Council complies with any applicable provisions of native title legislation. This must be obtained prior to granting a lease, licence or other estate, adopting a Plan of Management and some other specified activities on Crown land under Council management.

3.4 Environmental Planning & Assessment Act 1979

The *Environmental Planning & Assessment Act 1979* (EP&A Act) regulates the use and development of all land within NSW and aims to:

- promote the social and economic welfare of the community and a better environment by the proper management, development and conservation of the State's natural and other resources,
- facilitate ecologically sustainable development by integrating relevant economic, environmental and social considerations in decision-making about environmental planning and assessment,
- promote the orderly and economic use and development of land,
- promote the delivery and maintenance of affordable housing,
- protect the environment, including the conservation of threatened and other species of native animals and plants, ecological communities and their habitats,
- promote the sustainable management of built and cultural heritage (including Aboriginal cultural heritage),
- promote good design and amenity of the built environment,
- promote the proper construction and maintenance of buildings, including the protection of the health and safety of their occupants,
- promote the sharing of the responsibility for environmental planning and assessment between the different levels of government in the State,
- provide increased opportunity for community participation in environmental planning and assessment.

This Act prescribes environmental assessment and approval requirements for the development and use of land based upon size and scale. These are defined in environmental planning instruments, being State Environmental Planning Policies (SEPPs) and Local Environmental Plans (LEPs).

The assessment and approval pathways that generally apply to development and use of Council managed Community and Crown land are outlined in **Table 5: Planning Pathways and Requirements**.

Table 5: Planning Pathways and Requirements

Planning Pathway	Description	Requirements
Exempt Development	Low impact and / or minor works	No assessment or approval / consent requirements
Permitted Without Consent	Minor public infrastructure and / or facilities	Part 5 Environmental Assessment (Review of Environmental Factors)
Permitted With Consent	Major public infrastructure and / or facilities	Part 4 Development Consent

Further details of applicable environmental assessment requirements and planning approval pathways is provided at **Section 5: Land Uses and Development**.

3.4.1 State Environmental Planning Policy

A State Environmental Planning Policy (SEPP) is a state level instrument that prescribes planning controls for a specific area, issue or development type. They override Local Environmental Plan provisions in the event of an inconsistency and identify development approval pathways and assessment requirements. There are a number of SEPPs applicable to the management of Community and Crown land within the LGA (Refer to **Table 6: Environmental Planning Instruments and Other Legislation**).

3.4.2 Local Environmental Plan

A Local Environmental Plan (LEP) is the principle legal instrument that regulates the development and use of land within an LGA. They establish standards through the application of development controls and zoning. Specific objectives apply to each zone that indicate its principal intended use, and also prescribe the types of development / use within the zone that are permitted (with or without consent) or prohibited.

3.5 Other Legislation

Community and Crown land must also be managed in accordance with various other legislative requirements as outlined in the following **Table 6: Environmental Planning Instruments and Other Legislation**.

3.6 Local Strategies, Plans and Policies

Council has a diverse range of adopted strategies, plans and policies which relate to the management of Community and Crown land. These are regularly updated to reflect legislative requirements, community needs and the strategic direction of Council. This CCLPoM is to be implemented in conjunction with these other Council strategies, plans and policies to provide a consistent and coordinated management approach.

A summary of supporting strategies, plans and policies current at time of the CCLPoM adoption are outlined in **Appendix C: References and Supporting Documents**.

Table 6: Environmental Planning Instruments and Other Legislation

Hierarchy	Title	Community and Crown Land Application
Commonwealth Legislation	<i>Disability Discrimination Act 1992</i>	Aims to eliminate discrimination against persons with a disability, including in relation to goods, services and facilities and access to premises. It prescribes specific provisions for access to or use of public buildings or facilities and the associated path of travel. The design of public facilities and infrastructure on Community and Crown land is to maximise accessibility for persons with a disability.
	<i>Environment Protection and Biodiversity Conservation Act 1999</i>	<p>Prescribes a national approach to environment and heritage protection and biodiversity conservation. It applies to world and national heritage places, migratory species and nationally threatened species and ecological communities defined as 'Matters of National Environmental Significance' (MNES).</p> <p>Any actions on Community and Crown land that may have a significant impact on one or more MNES or on Commonwealth land require potential assessment and approval under the EPBC Act. Council must also consider and implement actions in relevant recovery and threat abatement plans.</p>
	<i>Telecommunications Act 1997</i>	<p>Establishes and regulates carriers' rights and responsibilities when inspecting, maintaining or installing telecommunications facilities such as overhead cables and mobile phone towers.</p> <p>Telecommunications infrastructure classified as 'low impact' is exempt from requiring Council development consent in accordance with the <i>Telecommunications (Low-impact) Facilities Determination 1997</i>. It also includes provision for the installation and maintenance of telecommunications infrastructure on Community and Crown land.</p>
State Legislation	<i>Aboriginal Land Rights Act 1983</i>	<p>Recognises the traditional ownership of land by Aboriginal people and seeks to compensate them for past dispossession, and to support their social and economic development. Crown land that is not being lawfully used or occupied, and is not needed for an essential public purpose or impacted by Native Title claim under the NT Act is 'claimable land'. The Act empowers Aboriginal Land Councils to lodge claims over Crown land creating an inchoate (unformed) interest.</p> <p>Any activities or tenure over Crown land should not significantly impact the physical condition of the land or prevent it being transferred should a claim be successful. Council should check for the presence of any undetermined Aboriginal land claims to ensure due diligence when undertaking development or granting leases, licences or other estates over Crown land.</p>

Table continued over page.

Hierarchy	Title	Community and Crown Land Application
State Legislation (Continued)	<i>Biodiversity Conservation Act 2016</i>	<p>Aims to maintain a healthy, productive and resilient environment to support the wellbeing of the community, now and into the future, consistent with the principles of ecologically sustainable development. It identifies threatened species, populations, ecological communities, key threatening processes and provides a framework for assessing, minimising and offsetting the impacts of development and other activities.</p> <p>This Act prescribes a 'test of significance' to determine if a development or activity is likely to significantly affect threatened species, populations, ecological communities or their habitats. Any development or activities within or adjacent to Community and Crown land require a 'test of significance' for threatened species, populations or ecological communities that are known to, or are likely to occur within the subject area, to determine whether there are likely to be significant impacts.</p>
	<i>Biosecurity Act 2015</i>	<p>Aims to protect the economy, environment and community from the impacts of pests, diseases, weeds and contaminants. It creates a shared responsibility between government, industry and the community to manage biosecurity risks.</p> <p>Council has a general biosecurity duty to minimise and prevent biosecurity risks through the management of weeds and preventing the spread of pests and diseases, particularly on Community and Crown land.</p>
	<i>Companion Animals Act 1998</i>	<p>Aims to encourage responsible pet ownership and regulates the management of cats and dogs. It requires that all dogs in any public place (including Community and Crown land) must be under the effective control of their owner by means of an adequate chain, cord or leash. The owner of a dog that defecates in a public place is also required to immediately remove the dog's faeces and properly dispose of them.</p> <p>It prohibits dogs in the following public places:</p> <ul style="list-style-type: none"> ○ Children's playgrounds and play spaces (within 10 metres) ○ Food preparation and consumption areas (within 10 metres) ○ Recreation and sport areas declared as prohibited by Council ○ Public bathing areas declared as prohibited by Council ○ Wildlife protection areas (WPA) declared as prohibited by Council <p>It also empowers Council to declare off-leash areas, and which are typically located within Community and Crown land.</p> <p>Council has declared WPAs in core bushland areas for the protection of our unique native animals and their habitats. Cats are prohibited from entering these WPAs and dogs must be on a lead and remain on established tracks.</p>

Table continued over page.

Hierarchy	Title	Community and Crown Land Application
State Legislation (Continued)	<i>Fire and Rescue Act 1989</i>	<p>Establishes fire districts and requires the NSW Fire Commissioner to take all practicable measures to:</p> <ul style="list-style-type: none"> ○ prevent and extinguish fires, protect and save life and property in case of fire ○ protect and save life and property endangered by hazardous material incidents ○ confine or end fire and hazardous material incidents ○ render the site of such incidents safe <p>The City of Parramatta LGA is located outside the boundaries of the NSW Rural Fire Service and within the Metropolitan West Zone of Fire and Rescue NSW (except Beecroft Metro East Zone). Council liaises with Fire and Rescue NSW to undertake ecological and pile burns on Community and Crown land as well as attendance at major pollution spills affecting rivers and creeks.</p>
	<i>Fisheries Management Act 1994</i>	<p>Applies to all waterways within or adjoining Community and Crown land, and aims to:</p> <ul style="list-style-type: none"> ○ conserve, develop and share the fishery resources of the State for the benefit of present and future generations ○ conserve fish stocks and key fish habitat, protection of marine vegetation (mangrove / saltmarsh) ○ conserve threatened species, populations and ecological communities of fish and marine vegetation ○ promote ecologically sustainable development, including the conservation of biological diversity <p>Protects key fish habitat and marine vegetation (mangroves and saltmarsh). Any activities with the potential to harm (pruning or removal) of marine vegetation, obstruction of fish passage, reclamation or dredging works (defined as excavation or the removal and disturbance of woody debris, snags, gravel beds, cobbles, rocks, boulders, rock bars or aquatic vegetation) within a waterbody requires a permit.</p>
	<i>Geographical Names Act 1966</i>	<p>Regulates the naming of places and features throughout NSW. It establishes the Geographical Names Board (GNB) which is empowered to:</p> <ul style="list-style-type: none"> ○ assign names to places ○ investigate and determine the form, spelling, meaning, pronunciation, origin and history of any geographical name ○ determine the application of each name with regard to position, extent or other reference. <p>The naming of places, facilities and infrastructure on Community and Crown land must be consistent with GNB guidelines.</p>

Table continued over page.

Hierarchy	Title	Community and Crown Land Application
State Legislation (Continued)	<i>Heritage Act 1977</i>	<p>Aims to promote an understanding of and encourage the conservation of heritage in NSW. It establishes the NSW Heritage Council and State Heritage Register to regulate the protection and conservation of items of state heritage significance and archaeological relics. Items of heritage significance include places, buildings, works, relics, movable objects or precincts in relation to the historical, scientific, cultural, social, archaeological, architectural, natural or aesthetic value of the item/s.</p> <p>Any works on Community or Crown land with the potential to disturb or excavate archaeology, or with the potential to impact a state listed heritage item or its significance will require approval of the NSW Heritage Council.</p>
	<i>National Parks and Wildlife Act 1974</i>	<p>Provides a framework for the protection of Aboriginal heritage places and objects. It is an offence for Aboriginal objects and places to be knowingly harmed, even if unintentionally, unless an exempt activity under the Act. Due diligence must be undertaken prior to commencement of any works or activities to on Community or Crown land:</p> <ul style="list-style-type: none"> ○ Identify whether or not Aboriginal objects are, or are likely to be, present ○ Determine whether or not activities are likely to harm Aboriginal objects (if present) <p>An Aboriginal Heritage Impact Permit (AHIP) is required for any works or activities that are determined to be likely to impact an Aboriginal object or place.</p>
	<i>Protection of the Environment Operations Act 1997</i>	<p>Aims to reduce the impacts of pollution on the environment through the regulation of air / water / land / noise pollution and waste minimisation. It establishes environmental standards and protocols to reduce risks to human health and prevent the degradation of the environment.</p> <p>Council has a duty to notify the NSW Environment Protection Authority and other relevant authorities of any pollution incidents where there is actual or potential harm to the health and safety of humans or to natural ecosystems. Cleanup and prevention notices can also be issued to a landowner or occupier where activities have caused pollution or have been carried out in an environmentally unsatisfactory manner.</p>
	<i>Roads Act 1993</i>	<p>Regulates the use of public roads and applies to unformed road reservations that are managed as public reserve together with adjoining Community and Crown land. Whilst the use of these unclosed roads is not subject to the restrictive Community land provisions under the LG Act, the following activities on such road reserves require the approval of Council as roads authority:</p> <ul style="list-style-type: none"> ○ erect a structure or carry out a work in, on or over a public road ○ dig up or disturb the surface of a public road ○ remove or interfere with a structure, work or tree on a public road ○ pump water into a public road from any land adjoining the road ○ connect a road (whether public or private) to a classified road

Table continued over page.

Hierarchy	Title	Community and Crown Land Application
State Legislation (Continued)	<i>Rural Fires Act 1997</i>	<p>Aims to manage bushfire risk through prevention mitigation and suppression. It establishes the Rural Fire Service and Bushfire Management Committees.</p> <p>Council is required to identify and manage bushfire prone land, which is predominantly located on Community and Crown land, under a Bushfire Risk Management Plan. This identifies assets that have potential to be exposed to the impact of bushfires, and assigns specific mitigation strategies to reduce the vulnerability to those assets. Strategies include hazard reduction fuel management, community education and engagement, creation and maintenance of asset protection zones (APZ), management of public access and restrictions on the use of bushland areas during extreme bushfire danger days.</p>
	<i>Smoke-free Environment Act 2000</i>	<p>Bans smoking and the use of e-cigarettes in all enclosed public areas and certain outdoor public areas to protect the community from harmful second-hand tobacco smoke. This includes the following public areas within or adjoining Community and Crown land:</p> <ul style="list-style-type: none"> ○ Within 10 metres of children's play equipment in outdoor public places ○ Public swimming pools ○ Spectator areas at sports grounds or other recreational areas used for organised sporting events ○ Public transport stops and platforms, including ferry wharves and taxi ranks ○ Within 4 metres of a pedestrian access point to a public building ○ Commercial outdoor dining areas
State Environmental Planning Policy	<i>SEPP (Biodiversity and Conservation) 2021</i>	<p>Chapter 2 (Vegetation in Non-Rural Areas) aims to preserve trees and other vegetation to protect amenity and biodiversity values. It regulates urban vegetation clearing that is not ancillary to development, being:</p> <ul style="list-style-type: none"> ○ Native vegetation above the Biodiversity Offset Scheme (BoS) threshold (Native Vegetation Panel approval) ○ Trees and other vegetation below the BoS threshold where they are protected under a development control plan (Council permit) <p>Approval is not required for clearing of vegetation that is:</p> <ul style="list-style-type: none"> ○ a risk to human life or property ○ dying or dead and not required for native animal habitat <p>Pruning or removal of trees or vegetation on Community and Crown land is also exempt from permit requirements under the development control plan where the works are to be undertaken by on behalf of Council.</p> <p>Chapter 10 (Sydney Harbour Catchment) aims to ensure the protection and enhancement of tidal waterways and foreshores. It prescribes planning principles to protect hydrological and ecological health, views and scenic quality, improvement of water quality, public access and use. Specific wetlands protection provisions apply to mangrove and saltmarshes</p>

Table continued over page.

Hierarchy	Title	Community and Crown Land Application
State Environmental Planning Policy (Continued)	SEPP (Biodiversity and Conservation) 2021 (Continued)	<p>Chapter 6 (Bushland in Urban Areas) aims to protect and preserve urban bushland in recognition of its aesthetic, recreational, educational and scientific value to the community. It defines 'bushland' as <i>vegetation which is either a remainder of the natural vegetation of the land or, if altered, is still representative of the structure and floristics of the natural vegetation</i>.</p> <p>Consent is required to disturb bushland on land zoned or reserved for public open space, being Community and Crown land, unless it is for the purpose of:</p> <ul style="list-style-type: none"> o bushfire hazard reduction o facilitating recreational use under a plan of management o construction, operation and maintenance of public utilities infrastructure <p>Disturbance is defined as removing vegetation or causing a change in the natural ecology that results in bushland destruction or degradation. Any disturbance to bushland must be for an essential public purpose in the public interest and where there is no reasonable alternative. Development on land adjoining bushland must consider the erosion of soils, the siltation of streams and waterways and the spread of weeds and exotic plants.</p>
	SEPP (Exempt and Complying Development Codes) 2008	<p>Prescribes types of low impact development that is able to be undertaken as 'exempt' development or as 'complying' development subject to meeting specified development standards. Whilst the Transport and Infrastructure SEPP provisions prevail to the extent of any inconsistency, this SEPP includes the following exempt development codes applicable to Community and Crown land:</p> <ul style="list-style-type: none"> o Division 1 (General) o Division 2 (Advertising and Signage) o Division 3 (Temporary Uses and Structures)
	SEPP (Industry and Employment) 2021	<p>Chapter 3 prescribes planning controls for advertising and signage. It aims to ensure:</p> <ul style="list-style-type: none"> o compatibility with desired amenity and visual character of an area o provision of effective communication in suitable locations o high quality design and finish <p>All signage and advertising requires consent, unless permitted as 'exempt development' under an LEP or SEPP.</p> <p>Advertising is prohibited on environmental (C2), open space (RE1) and waterway (W1) zoned land, being Community and Crown land, with the exception of advertisements at public sporting facilities on public recreation (RE1) land that provides information about the sponsors of the teams or organisations using the sporting facility or about the product of those sponsors (unless permitted under <i>SEPP Transport and Infrastructure 2021</i>).</p>

Table continued over page.

Hierarchy	Title	Community and Crown Land Application
	<i>SEPP (Resilience and Hazards) 2021</i>	<p>Chapter 2 (Coastal Management) guides development within the coastal zone, which is restricted to tidal waterways and adjoining lands within the LGA. It aims to protect and manage sensitive coastal environments whilst managing risks from coastal hazards and specifies development controls based on a hierarchy of coastal management areas.</p> <p>Mangrove and saltmarsh vegetation communities are mapped as coastal wetlands. The provisions of this SEPP prevail over other SEPPs where works, other than for environmental protection purposes, are to be undertaken within coastal wetlands.</p> <p>Chapter 4 (Remediation of land) aims to promote the remediation of contaminated land for the purpose of reducing the risk of harm to human health or any other aspect of the environment. It prescribes that remediation work meets certain standards as well as consent and notification requirements:</p> <ul style="list-style-type: none"> o Category 1 (With Consent) o Category 2 (Without Consent) <p><i>SEPP (Transport and Infrastructure) 2021</i> permits 'environmental management works' by or on behalf of Council without consent and prevails over this SEPP for Category 1 remediation works. Council is therefore permitted to undertake remediation works on Community and Crown land without consent subject to the prescribed standards and notification requirements.</p>
	<i>SEPP (Transport and Infrastructure) 2021</i>	<p>Chapter 2 (Infrastructure) aims to facilitate the effective statewide delivery of public infrastructure. It empowers Council, as a public authority, to undertake a range of development as 'exempt' or 'permitted without consent'. Whilst 'exempt' development has no approval or assessment requirements under the EP&A Act, any development 'permitted without consent' requires an environmental assessment (Review of Environmental Factors) under Part 5.</p> <p>Any type of development not specified within this SEPP will likely require Part 4 approval and assessment under the LEP. Refer to Section 5.2 (Environmental Planning Instruments).</p>

Basis for Management

4.1 Council Vision and Objectives

The Community Strategic Plan identifies the vision for the City of Parramatta to be:

'Sydney's central city, sustainable, livable, and productive - inspired by our communities.'

This is to be achieved through six key goals developed in partnership with the community:

Fair	<i>We can all benefit from the opportunities our City offers</i>
Accessible	<i>We can all get to where we want to go</i>
Green	<i>We care for and enjoy our environment</i>
Welcoming	<i>We celebrate culture and diversity - past, present and future</i>
Thriving	<i>We benefit from having a thriving CBD and local centres</i>
Innovative	<i>We collaborate and champion new ideas to create a better future</i>

4.2 Community and Crown Land Management Goals

Council aims to achieve the following Community and Crown land management goals:

- Comply with legislative requirements for Community and Crown land under the LG Act and CLM Act
- Maximise the diversity of opportunities provided by and capacity of Community and Crown land to meet the growing needs and expectations of the community
- Provide a consistent decision-making framework to guide the sustainable and best-practice management of Community and Crown land
- Protect and conserve natural areas in recognition of their cultural, ecological, aesthetic, recreational, educational and scientific values
- Expressly authorise leases and licences over Community and Crown land for purposes consistent with community values and core objectives.

4.3 Community Values

Values are what the community feel are important about a place and are essential considerations in the management of Community and Crown land. Incorporating a values-based approach to Community and Crown land management will ensure that it meets current and future community needs and expectations. Research and ongoing community engagement and feedback have identified the following key values:

- natural settings including shade trees, bushland and habitat
- places and facilities to walk, exercise, and train/compete for sport
- free and accessible places for people of all ages and abilities
- clean waterways and good water quality
- well-maintained places free from waste, weeds and pests, anti-social behaviour and vandalism.

A Social Return on Investment (SROI) assessment of Council parks and sportsgrounds also highlighted the following values:

- Access to quality green open space is beneficial for physical and mental health and wellbeing
- Green open space improves social connections and supports the development of vibrant communities by providing a place for activity and opportunities to interact
- Accessible and safe green open spaces foster active play, which is associated with physical, cognitive and social benefits for children
- Residents in high rise dwellings benefit from the provision of accessible green space.

4.4 Land Categorisation

The management of Community and Crown land in accordance with the CLM Act and LG Act is governed by the categorisation of the land, and the core objectives of the assigned land category/s. Community and Crown land is required to be categorised as one of the following under the LG Act:

- Park
- Sportsground
- General Community Use
- Area of Cultural Significance
- Natural Area

Land categorised as Natural Area is to be further sub-categorised as:

- Bushland
- Wetland
- Escarpment
- Watercourse
- Foreshore

This categorisation is based upon land use and/or physical characteristics of the land. It must be in accordance with the guidelines prescribed in the *Local Government (General) Regulation 2021* (Refer **Table 7: Land Categorisation Guidelines and Core Objectives**).

The categorisation and sub-categorisation of Council managed land subject to this CCLPoM is detailed in **Appendix D: Community and Crown Land Schedule**.

Some Community and Crown land has diverse characteristics and/or functions, such as bushland adjacent to a sporting field. To ensure a consistent management approach, it is appropriate for separate categories to be assigned to different portions of such parks and reserves. Where multiple categories apply these are clearly delineated in **Appendix C: Multiple Category Maps**.

4.5 Core Objectives

Council must manage Community and Crown land in accordance with the core objectives for the applicable land category as prescribed under the LG Act (Refer **Table 7: Land Categorisation Guidelines and Core Objectives**). Council has identified more specific objectives to address identified management issues and achieve performance targets consistent with these core objectives. These are detailed in **Table 15: Performance Targets and Actions in Section 7: Strategy and Action Plan**.

Council has not currently categorised any Community or Crown Land as an 'Area of Cultural Significance' within this CCLPoM. Any land subsequently identified with potential Aboriginal, aesthetic, archaeological, historical, technical or research significance will be considered for future categorisation as an 'Area of Cultural Significance' and will require a specific Plan of Management.

These areas will continue to be covered by this CCLPoM until a specific Plan of Management has been adopted; no works shall take place within any declared areas (except for maintenance or public safety) pending a site specific Plan of Management.

Table 7: Land Categorisation Guidelines and Core Objectives

Category	Guidelines (1) <i>Local Government (General Regulation) 2021</i>	Core objectives (2) <i>Local Government Act 1993</i>
Natural Areas	<p><i>Regulation 102</i></p> <p>Land whether or not in an undisturbed state, possesses a significant geological feature, geomorphological feature, landform, representative system or other natural feature or attribute that would be sufficient to further categorise the land as bushland, wetland, escarpment, watercourse or foreshore.</p>	<p><i>Section 36E:</i></p> <ul style="list-style-type: none"> ○ conserve biodiversity and maintain ecosystem function in respect of the land, or the feature or habitat in respect of which the land is categorised as a natural area, and ○ maintain the land, or that feature or habitat, in its natural state and setting, and ○ provide for the restoration and regeneration of the land, and ○ provide for community use of and access to the land in such a manner as will minimise and mitigate any disturbance caused by human intrusion, and ○ assist in and facilitate the implementation of any provisions restricting the use and management of the land that are set out in a recovery plan or threat abatement plan.
Sportsground	<p><i>Regulation 103</i></p> <p>Land is used or proposed to be used primarily for active recreation involving organised sports or the playing of outdoor games.</p>	<p><i>Section 36F:</i></p> <ul style="list-style-type: none"> ○ encourage, promote and facilitate recreational pursuits in the community involving active recreation involving organised sports and informal sporting activities and games. ○ ensure that such activities are managed having regard to any adverse impact on nearby residences.
Park	<p><i>Regulation 104</i></p> <p>Land which is, or proposed to be, improved by landscaping, gardens or the provision of non sporting equipment and facilities, and for uses which are mainly passive or active recreational, social, educational and cultural pursuits that not unduly intrude on the peaceful enjoyment of the land by others.</p>	<p><i>Section 36G:</i></p> <ul style="list-style-type: none"> ○ encourage, promote and facilitate recreational, cultural, social and educational pastimes and activities ○ provide for passive recreational activities or pastimes and for the casual playing of games ○ improve the land in such a way as to promote and facilitate its use to achieve the other core objectives for its management.
General Community Use	<p><i>Regulation 106</i></p> <p>Land that may be made available for use for any purpose for which community land may be used, whether by the public at large or by specific sections of the public.</p>	<p><i>Section 36I:</i></p> <ul style="list-style-type: none"> ○ promote, encourage and provide for the use of the land, and to provide facilities on the land, to meet the current and future needs of the local community and of the wider public: ○ provide facilities on the land, to meet the current and future needs of the local community and of the wider public: <ul style="list-style-type: none"> » in relation to public recreation and the physical, cultural, social and intellectual welfare or development of individual members of the public, and » in relation to purposes for which a lease, licence or other estate may be granted in respect of the land (other than the provision of public utilities and works associated with or ancillary to public utilities).

Table continued over page.

Category	Guidelines (1) <i>Local Government (General Regulation) 2021</i>	Core objectives (2) <i>Local Government Act 1993</i>
Natural Areas:	<i>Regulation 107</i>	<i>Section 36J:</i>
Bushland	<p>Land contains primarily native vegetation that is the natural vegetation or a remainder of the natural vegetation of the land, or although not the natural vegetation, is still representative of the structure or floristics of the natural vegetation in the locality. Such land includes:</p> <p>(a) bushland that is mostly undisturbed with a good mix of tree ages, and natural regeneration, where the understorey is comprised of native grasses and herbs or native shrubs, and that contains a range of habitats for native fauna (such as logs, shrubs, tree hollows and leaf litter), or</p> <p>(b) moderately disturbed bushland with some regeneration of trees and shrubs, where there may be a regrowth area with trees of even age, where native shrubs and grasses are present in the understorey even though there may be some weed invasion, or</p> <p>(c) highly disturbed bushland where the native understorey has been removed, where there may be significant weed invasion and where dead and dying trees are present, where there is no natural regeneration of trees or shrubs, but where the land is still capable of being rehabilitated.</p>	<ul style="list-style-type: none"> ○ ensure the ongoing ecological viability of the land by protecting the ecological biodiversity and habitat values of the land, the flora and fauna of the land and other ecological values, and ○ protect the aesthetic, heritage, recreational, educational and scientific values of the land, and ○ manage the land in a manner that protects and enhances the values and quality of the land and facilitates public enjoyment of the land, and to implement measures to minimise or mitigate disturbance caused by human intrusion, and ○ restore degraded bushland, and ○ protect existing landforms such as natural drainage lines, watercourses and foreshores, and ○ retain bushland in parcels of a size and configuration that will enable the existing plant and animal communities to survive in the long term, and ○ protect bushland as a natural stabiliser of the soil surface

Table continued over page.

Category	Guidelines (1) <i>Local Government (General Regulation) 2021</i>	Core objectives (2) <i>Local Government Act 1993</i>
Natural Areas: Wetland	<i>Regulation 108</i> Land includes marshes, mangroves, backwaters, billabongs, swamps, sedgeland, wet meadows or wet heathlands that form a waterbody that is inundated cyclically, intermittently or permanently with fresh, brackish or salt water, whether slow moving or stationary.	<i>Section 36K:</i> <ul style="list-style-type: none"> ○ protect the biodiversity and ecological values of wetlands, particularly their hydrological environment (including water quality and water flow), flora, fauna and habitat value, and ○ restore and regenerate degraded wetlands, and ○ facilitate community education in relation to wetlands, and community use of wetlands, without compromising the ecological values of wetlands
Natural Areas: Escarpment	<i>Regulation 109</i> Land that includes such features as a long cliff-like ridge or rock, and significant or unusual geological, geomorphological or scenic qualities	<i>Section 36L:</i> <ul style="list-style-type: none"> ○ protect any important geological, geomorphological or scenic features of the escarpment, and ○ facilitate safe community use and enjoyment of the escarpment
Natural Area: Watercourse	<i>Regulation 110</i> Land includes any stream of water, perennial or intermittent, in a natural or artificial channel, and associated riparian land or vegetation	<i>Section 36M:</i> <ul style="list-style-type: none"> ○ manage watercourses so as to protect the biodiversity and ecological values of the instream environment, particularly in relation to water quality and water flows, and ○ manage watercourses so as to protect the riparian environment, particularly in relation to riparian vegetation and habitats and bank stability, and ○ restore degraded watercourses, and ○ promote community education, and community access to and use of the watercourse, without compromising the other core objectives of the category.
Natural Area: Foreshore	<i>Regulation 111</i> Land situated on the water's edge forming a transition zone between the aquatic and terrestrial environment	<i>Section 36N:</i> <ul style="list-style-type: none"> ○ maintain the foreshore as a transition area between the aquatic and the terrestrial environment, and ○ protect and enhance all functions associated with the foreshore's role as a transition area, and ○ facilitate the ecologically sustainable use of the foreshore, and to mitigate impact on the foreshore by community use.

Council must manage Community and Crown land in accordance with these core objectives. Any activities or uses of the land should be consistent with the core objectives for that category of land. **Table 15: Performance Targets and Actions** details additional objectives to address management issues and achieve performance targets to support these core objectives.

Land Uses and Infrastructure

5.1 Activities and Infrastructure

Significant population growth and increasing urban densities will require Council to maximise the capacity of Community and Crown land to meet the growing needs of our diverse community. This will require the provision of high quality infrastructure and facilities that can accommodate multiple uses and have the flexibility to adapt to changing community needs and participation trends.

Council aims to support and encourage a diversity of infrastructure and uses to maximise the activation and enjoyment of Community and Crown land. This CCLPoM permits a broad range of activities and facilities as outlined in **Table 11: Authorised Infrastructure and Use Purposes**.

Any infrastructure or use of Community and Crown land must be in the public interest and compatible with the carrying capacity and intended function of the subject land as well as the wider surrounding community and environmental context. It will be assessed on a case-by-case basis to ensure consistency with the following requirements (where applicable):

- **Land category core objectives** (Refer Table 7)
- **Environmental planning instruments** (Refer Tables 8-10)
- **Authorised purposes** (Refer Tables 11 and 14)
- **Performance targets and actions** (Refer Table 15)
- **Council strategies, plans and policies** (Refer Appendix C)

Community and Crown land infrastructure and use will also be subject to environmental assessment requirements prescribed in the applicable environmental planning instruments under the EP&A Act as illustrated in **Figure 4: Environmental Assessment Pathways**.

Exempt development or development permitted without consent will still be subject to other legislative approvals or permits where applicable.

	Exempt Development	Permitted WITHOUT Consent	Permitted WITH Consent
Level of Approval and Assessment	None	Part 5 (REF)	Part 4 (DA)
Potential Impact	Low	Moderate	High

Fig. 4 Environmental Assessment Pathways

5.2 Crown Land Public Purposes

The CLM Act also requires that any activities or infrastructure on Crown land must be:

- consistent with the dedication or reservation purpose/s
- incidental or ancillary to the dedication or reservation purpose/s
- purpose/s authorised by the CLM Act or other legislation

Additional purposes can also be authorised for Crown land where it is in the 'public interest' and not likely to 'materially harm' its use for the existing purpose/s. This includes the following considerations:

- proportion of the area of the land that may be affected
- frequency and duration of the impacts of those activities (if the activities will be intermittent)
- degree of permanence of likely harm and in particular whether that harm is irreversible
- current condition of the land
- geographical, environmental and social context of the land

5.3 Environmental Planning Instruments

Environmental planning instruments guide the development and use of Community and Crown land in addition to the CLM Act and LG Act. These include both State Environmental Planning Policies (SEPPs) and Local Environmental Plans (LEPs). SEPPs relate to specific planning matters and generally apply at a state or regional level versus a LEP that guides land use within an LGA. In the event of an inconsistency, the provisions of a SEPP will prevail over an LEP.

Activities and infrastructure on Community and Crown land which satisfies the 'exempt development' or 'permitted without consent' provisions under a SEPP or LEP will not require consent under Part 4 of the EP&A Act. However, development 'permitted without consent' will require an environmental assessment to be undertaken in accordance with Part 5 of the EP&A Act.

5.3.1 SEPP Transport and Infrastructure 2021 (TISEPP)

TISEPP prevails over Council's LEP and empowers Council, as a public authority, to undertake a range of activities and infrastructure 'without consent' or as 'exempt development'. The types of development prescribed by the TISEPP are outlined in **Table 8: TISEPP Permissible Development Purposes**. Development for purposes authorised under the TISEPP must meet the specified development standards.

Any activities or infrastructure on Community and Crown land that is not prescribed under the TISEPP will generally require assessment under the LEP. It will also be subject to any other applicable legislative requirements and approvals (Refer **Section 3: Legislative and Planning Framework**).

Table 8: TISEPP Permissible Development Purposes

Division	Permitted WITHOUT Consent	EXEMPT Development
Emergency Services Facilities and Bushfire Hazard Reduction	<ul style="list-style-type: none"> o emergency services facility o bushfire hazard reduction 	<ul style="list-style-type: none"> o fire trails o asset protection zones
Flood Mitigation	<ul style="list-style-type: none"> o levees o causeways o embankments o floodgates o detention basins 	
Parks and Reserves	<ul style="list-style-type: none"> o roads o cycleways and pedestrian pathways o single storey car parks o ticketing facilities o viewing platforms (>100m²) o pedestrian bridges o recreation areas and recreation facilities (outdoor), but not including grandstands o visitor information centres, information boards and other information facilities o lighting o landscaping (including landscape structures or features such as art work) o irrigation systems o amenities (including toilets and change rooms) o food preparation and related facilities o maintenance depots o portable lifeguard towers o environmental management works (bush regeneration works, wetland and erosion protection works, contamination remediation) o demolition of buildings (other than heritage items) 	<ul style="list-style-type: none"> o walking tracks o raised walking paths (including boardwalks) o ramps o stairways or gates o bicycle-related storage facilities (including bicycle racks and other bicycle parking facilities) o handrail barriers or vehicle barriers o ticketing machines, park entry booths o viewing platforms (<100m²) o sporting facilities (including goal posts sight screens, fences) o play equipment (including softfall) o seats and picnic tables o barbecues and bins o shelters or shade structures o portable lifeguard towers (<20m²) o routine maintenance of: <ul style="list-style-type: none"> » playing fields and other infrastructure » landscaping » access roads

Division	Permitted WITHOUT Consent	EXEMPT Development
Wharf or Boating Facilities	<ul style="list-style-type: none"> ○ wharves ○ jetties ○ seawalls ○ boating navigation ○ emergency response facilities 	
Soil Conservation Works	<ul style="list-style-type: none"> ○ salinity ○ acid sulfate ○ erosion management 	
Stormwater Management Systems	<ul style="list-style-type: none"> ○ stormwater channels ○ aqueducts ○ pipes ○ drainage works ○ embankments ○ detention basins ○ pumping stations ○ artificial wetlands ○ sediment ponds ○ riparian management ○ stormwater reuse schemes 	<ul style="list-style-type: none"> ○ routine or emergency maintenance (including removal of litter, silt or debris) ○ pipeline repairs ○ flushing or relining ○ macrophyte harvesting ○ cathodic protection systems
Waterway or Foreshore Management Activities	<ul style="list-style-type: none"> ○ riparian corridor and bank management (including erosion control, bank stabilisation, resnagging, weed management re-vegetation) ○ foreshore access ways ○ instream management or dredging to rehabilitate aquatic habitat or to maintain or restore environmental flows or tidal flows for ecological purposes 	
General Exempt Development		<ul style="list-style-type: none"> ○ access ramps ○ awnings, canopies, pergolas ○ internal / external building alterations ○ car parks (at-grade) ○ decks ○ demolition of buildings / structures (<250m²) ○ fences ○ flagpoles ○ hoardings and scaffolding ○ investigations (geotechnical and other testing) ○ landscaping (paving, turfing, access tracks) ○ lighting ○ portable offices and sheds ○ retaining walls ○ security cameras ○ signs (identification, directional, community information, safety) ○ survey marks ○ temporary signs (event advertising / sponsorship) ○ water tanks

5.3.2 Parramatta Local Environmental Plan

The Parramatta Local Environmental Plan (PLEP) regulates the development and use of land within the LGA. It prescribes development controls and zoning to reflect land characteristics and principal intended use/s. Any use or development of land must be consistent with the objectives for the zone, and permissible with or without consent, or is otherwise prohibited (unless otherwise permitted under a SEPP). The relevant PLEP land zones and associated objectives for Community and Crown land are outlined below.

Table 9: LEP Landuse Zones and Objectives

Zone	Objectives of zone
RE1 - Public Recreation	<ul style="list-style-type: none"> ○ to enable land to be used for public open space or recreational purposes ○ to provide a range of recreational settings and activities and compatible land uses ○ to protect and enhance the natural environment for recreational purposes ○ to conserve, enhance and promote the natural assets and cultural heritage significance of parks and open spaces ○ to create a riverfront recreational opportunity that enables a high quality relationship between the built and natural environment
C2 - Environmental Conservation	<ul style="list-style-type: none"> ○ to protect, manage and restore areas of high ecological, scientific, cultural or aesthetic values ○ to prevent development that could destroy, damage or otherwise have an adverse effect on those values
W1 - Natural Waterways	<ul style="list-style-type: none"> ○ to protect the ecological and scenic values of natural waterways. ○ to prevent development that would have an adverse effect on the natural values of waterways in this zone ○ to provide for sustainable fishing industries and recreational fishing ○ to provide for cultural and scientific study of natural waterways ○ to enable works associated with the rehabilitation of land towards its natural state
W2 - Recreational Waterways	<ul style="list-style-type: none"> ○ to protect the ecological, scenic and recreation values of recreational waterways ○ to allow for water-based recreation and related uses ○ to provide for sustainable fishing industries and recreational fishing ○ to enable works associated with the rehabilitation of land towards its natural state

Any activities or infrastructure permitted under a SEPP 'without consent' or as 'exempt development' will not be subject to the consent provisions of the PLEP. However, Community and Crown land infrastructure or use should be consistent with the objectives and permissible purposes for the applicable land zone as outlined in **Table 10: PLEP Permissible Development Purposes**.

Picnic and barbeque facilities, seats, tables, shade structures, bins, drinking fountains	✓	✓	✓	✓
Play equipment	✓	✓	✓	✓
Public security lighting (e.g. carparks, pathways)	✓	✓	✓	✓ (wildlife friendly)
Public toilets	✓	✓	✓	
Safety and security devices (e.g. CCTV cameras)	✓	✓	✓	✓
Sculptures, monuments, park entrance and water features	✓	✓	✓	✓
Signage (interpretive, security, traffic, name, regulatory, sponsorship, temporary event)	✓	✓	✓	✓
Sportsfields (e.g. cricket, football, track and field athletics, baseball, softball) and courts (e.g. basketball, volleyball, badminton, tennis, hockey, netball)		✓		
Storage sheds or similar (including sport, community events, bush regeneration, maintenance purposes)	✓	✓	✓	✓
Temporary shipping containers (community and sporting group equipment storage) and site sheds or works compounds (equipment and plant storage)	✓	✓	✓	
Water quality and stormwater management structures	✓	✓	✓	✓
Water quality control ponds, silt traps, drainage structures, artificial wetlands	✓	✓	✓	✓
Water sensitive urban design initiatives (e.g. stormwater harvesting, rain gardens, swales, bio-retention basins)	✓	✓	✓	✓

It is important to note that some authorised uses require a permit from Council under the LG Act (Refer Section 5.6: Activity Approvals).

5.4 Aboriginal Land Rights and Native Title

Native title rights and interests must be assumed to exist when carrying out activities or infrastructure on Crown land, unless they have been extinguished, surrendered or determined by a court to no longer exist. Where it is proposed to construct or establish a public work on reserved or dedicated Crown land (where native title is not extinguished), Council is required to notify representative Aboriginal and Torres Strait Islander bodies, registered native title bodies corporate and registered native title claimants in relation to the land in accordance with the NT Act.

A '**public work**' is defined as any of the following that are constructed or established by or on behalf of the Crown, or a local government body or other statutory authority of the Crown, in any of its capacities:

- » *a building, or other structure (including a memorial), that is a fixture; or*
- » *a road, railway or bridge; or*
- » *a well, or bore, for obtaining water; or*
- » *any major earthworks (being earthworks whose construction causes major disturbance to the land or to the bed or subsoil under waters).*

Crown land may also be subject to undetermined Aboriginal land claims, which create inchoate (unformed) interest. Any activities or infrastructure on Crown land that will significantly impact the physical condition of the land (or prevent it being transferred should a claim be successful), will potentially need consent from the claimant Land Council. A check for the presence of any undetermined Aboriginal land claims should be carried to ensure due diligence when carrying out activities or infrastructure on Crown land.

5.5 Maintenance and Minor Works

Council undertakes regular ongoing maintenance activities and minor improvements within Community and Crown land. This includes natural assets, such as trees and vegetation, as well as built assets ranging from buildings to minor infrastructure. It involves routine maintenance, such as mowing and weed removal, as well as asset renewal, such as fencing or playground replacement. The carrying out of these low impact activities and minor infrastructure provision is generally permitted to be undertaken as 'exempt development' under the TISEPP, and are valid as 'low impact' future acts under the NT Act or do not impact native title.

5.6 Activity Approvals

Section 68 of the LG Act requires that approval must be obtained from Council to undertake the following activities on Community and Crown land:

- engage in a trade or business
- direct or procure a theatrical, musical or other entertainment for the public
- construct a temporary enclosure for the purpose of entertainment
- for fee or reward, play a musical instrument or sing
- set up, operate or use a loudspeaker or sound amplifying device
- deliver a public address or hold a religious service or public meeting

Approvals for the use of Community and Crown land for short-term and temporary events are undertaken by Councils booking office. Any use is subject to compliance with Council policies and is individually merit assessed to ensure it is **in the public interest and compatible with the carrying capacity and intended function of subject land as well as the wider surrounding community and environmental context.**

5.7 Short-term and Temporary Use

Council supports and encourages the use of Community and Crown land for temporary and short-term activities and events of various sizes and scale. The PLEP permits the temporary use of Community and Crown land **WITH CONSENT** 'if the use does not compromise future development of the land, or have detrimental economic, social, amenity or environmental effects on the land'.

This applies to 'any temporary purpose for a maximum period of 52 days (whether or not consecutive days) in any period of 12 months.' Development consent must not be granted unless Council is satisfied that the temporary use (including any associated structures):

- is necessary and reasonable for the economic use of the land pending its subsequent development
- will not prejudice the subsequent carrying out of development on the land
- does not adversely impact on any adjoining land or the amenity of the neighbourhood
- will not adversely impact on environmental attributes or features of the land, or increase the risk of natural hazards that may affect the land
- will be removed and the site be appropriately restored at the end of the use period

5.8 Temporary Events

The PLEP also permits temporary community events (such as ceremonies, cultural celebrations, exhibitions, fetes, fairs, gatherings, markets or sporting events), commercial events and festivals on Council Community and Crown land as **EXEMPT development** for a period of **up to 28 days** and **up to 52 days within Parramatta City Centre** (whether or not consecutive days) in any 12 month period. This is subject to the following requirements:

- be carried out with prior written consent of Council
- operate only between 7.00 am and midnight
- not include permanent physical change to the fabric of the location where the use occurs (land must be restored to the previous condition prior to use)
- maintain emergency vehicle access to and around the premises
- not restrict or prevent pedestrian access to existing footpaths, shops, public facilities or the foreshore (unless alternative access is provided)
- alternative pedestrian pathways are to have physical barriers erected between the pathway and any adjoining road
- risk assessment and emergency management plan addressing, to the satisfaction of Council, issues relevant to the site such as flood and bushfire hazard, and provide notifications to appropriate emergency services
- no clearing or disturbance of vegetation on the road or land

5.9 Drones or Remotely Piloted Aircraft

The Civil Aviation Safety Authority (CASA) regulates flying of drones and other Remotely Piloted Aircraft (RPA) in Australia. These regulations apply when drones and other RPA are within airspace, with Council regulating the launching and landing of these aircraft from Council land. Council is able to control and enforce the use of drones and other RPAs within land under its management. Any use of drones or RPAs on Community and Crown land will be subject to Council approval (Refer **Section 5.6: Activity Approvals**). Any approved use will be required to comply with all applicable CASA regulations and requirements.

5.10 Advertising & Signage

Signage and advertising has the potential to significantly impact visual amenity and public enjoyment of Community and Crown land. The provision of temporary and permanent advertising and signage on public land is therefore restricted subject to the provisions of the following environmental planning instruments.

Table 12: Signage Planning Controls

Environmental Planning Instrument	Section	Purpose
SEPP (Exempt and Complying Development Codes) 2008	Division 2	Advertising and Signage Exempt Development Code
	Subdivision 10	Community Notice and Public Information Signs
	Subdivision 11	Temporary Event Signs
SEPP (Industry and Employment) 2021	Division 3.3.1	Where not exempt under SEPP Exempt and Complying Codes
SEPP (Transport and Infrastructure) 2021	Schedule 1	Temporary Event and Community Information Signs

Notwithstanding any exempt development provisions, all advertising and signage on Community and Crown land will require Council approval as landowner or manager. It will only be permitted where there are no significant impacts on the amenity, visual quality, environmental sensitivity or heritage significance. Advertising signage will generally not be permitted on land categorised as Natural Area (Bushland, Escarpment, Foreshore, and Watercourse).

Leases, Licences and Other Estates

6.1 What are Leases, Licences & Other Estates

Leases, licences and other estates (such as easements) formalise the use of Community and Crown land by individuals, groups and organisations. The LG Act prescribes strict provisions under which Council has the authority to grant tenure over Community and Crown land to ensure reasonable ongoing availability for public use.

The maximum allowable period for Council to grant leases and licences on Community (and Crown) land under the LG Act is 30 years (requires ministerial approval if exceeds 21 years). These must be for purposes expressly authorised in a plan of management and consistent with the applicable land category core objectives. Community (and Crown) land may only be leased or licensed by Council if public notice is given, unless exempted under the LG Act.

6.2 Leases

A lease is a contract between Council as a land owner / manager, and another entity, granting that entity a right to occupy a defined area for a specified period of time. Leases they have the potential to restrict public access to and use of Community and Crown land as they generally facilitate exclusive occupation and use.

Council will only consider the lease of land covered by this CCLPoM consistent with the following criteria:

- there is a clear reason for granting a lease, and the lease purpose is consistent with the intended use of the land (e.g. a community services provider may need exclusive occupation and use of a community facility);
- the lessee has made (or intends to make) a significant financial contribution to the land and/or facility (e.g. a cafe operator may propose to fund a new fit-out of the cafe facilities);
- there is a strong link between the land and/or facility and the proposed lessee (e.g. lease of a childcare centre to a childcare provider).

In addition to the above, the LG Act and accompanying regulation specify some additional permitted uses, such as public infrastructure which are subject to authorisation under a lease or licence.

6.3 Licences

A licence is a formal non-exclusive agreement between Council, as land owner / manager, and another entity. They do not permit the exclusive use and facilitate a clear and transparent approach to authorising ongoing regular use of Community and Crown land, such as by seasonal sporting groups. Licences are a preferable arrangement as they facilitate multi-use to maximise the capacity of Community and Crown Land to accommodate diverse needs and increasing community demand.

6.4 Public Notice and Minister Consent

All proposed leases, licences or other estates (including any option renewal periods) must be publicly notified in accordance with the LG Act. Council must consider all submissions made during the notification period before granting a lease, licence or other estate. Where there has been an objection lodged against a proposed lease or licence greater than 5 years during the notification period, it will also require the consent of the Minister. Any lease or licence exceeding 21 years (including any option renewal periods) will also require the consent of the Minister.

6.5 Crown Land Tenures

Any leases or licences on Crown land must be for uses consistent with or ancillary to the dedication or reservation purpose. Any dealings on Crown land have the potential to impact native title where it has not been extinguished or excluded land. Council is required to obtain the advice of a qualified native title manager prior to the granting of any leases, licences, easements or rights-of-way on dedicated or reserved Crown land. (Refer **Section 1.8: Native Title Manager Advice**).

6.6 Express Authorisation of Leases, Licences & Other Estates

The LG Act requires that any lease, licence or other estate (other than filming or public and private utilities), must be expressly authorised by the applicable Plan of Management. They must also be for purposes consistent with the applicable core objectives and, where applicable, the Crown reserve or dedication purpose.

*This CCLPoM expressly authorises Council to grant leases, licences or any other estates over all subject Community and Crown land (Refer Appendix D: Community and Crown Land Schedule) for purposes and uses specified or consistent with those prescribed in **Table 14: Authorised, Lease, Licence and Other Estate Purposes**.*

All proposed leases, licences and other estates for authorised purposes on Community and Crown land will be individually merit assessed in accordance with the following criteria:

- Council Lease and Licence Policy
- Level of community benefit
- Consistency with relevant core objectives and reservation / dedication purpose (Crown land)
- Capacity of the land to support the activity
- Valid 'future act' under the NT Act (Crown land)
- Compatibility with CCLPoM performance targets and actions

Activities proposed under a lease or licence may also require development consent, permits or approvals under other legislation.

Council may only grant a lease or licence for a term exceeding 5 years subject to a tender unless it is for a non-profit organisation.

6.7 Existing Leases and Licences

All existing leases, licences and other estates on Community and Crown land will remain valid. Any renewals will be assessed in accordance with the CCLPoM.

6.8 Subleasing

Any subleasing of Community or Crown land must be for a purpose consistent with the existing lease or for purposes authorised under the LG Regulation.

Lease Purpose	Authorised sublease
Sporting club	Refreshment kiosks
	Dances
	Private parties
Bowling club	Croquet

Table 13: Authorised Sublease Purposes

6.9 Easements

The LG Act authorises Council to grant 'other estates' over Community and Crown Land for the purposes outlined in **Table 14: Authorised, Lease, Licence and Other Estate Purposes**. These typically include infrastructure and access easements for both public and private benefit. Council will only consider private easements over Community and Crown land subject to the following criteria:

- no feasible alternatives
- no impact on threatened species, ecological communities, populations or their habitats
- no impact on public infrastructure or native vegetation
- no impact on public access to and enjoyment of public land
- market based fees and charges

6.10 Casual and Short-Term Licences

The LG Act permits Council to grant licences for short-term or casual purposes, including:

- public performances
- playing of a musical instrument, or singing, for fee or reward
- engaging in a trade or business
- playing of a lawful game or sport
- delivery of a public address
- commercial photographic sessions
- picnics and private celebrations e.g. weddings and family gatherings
- filming sessions
- transport of waste, building materials and equipment for adjoining building works (existing road or fire trail only).

The CLM Act also empowers Council as Crown land manager to grant temporary licences for up to one year.

*This CCLPoM expressly authorises the short-term or casual use of all subject Community and Crown land for a period of up to 12 months for purposes specified or consistent with those listed in **Table 15: Authorised Casual and Short-Term Uses**.*

Short term or casual use is subject to no likely significant:

- physical damage to public land or infrastructure
- adverse impact on nearby residents, wildlife or native vegetation

Short-term or casual licences are exempt from public notification requirements only if the use or occupation involves:

- no erection of any permanent building or structure
- no more than 3 consecutive days for one-off events and activities
- no more than 3 consecutive days (excluding weekends) for a duration of up to 12 months for reoccurring events and activities.

Strategy and Action Plan

7.1 Performance Targets and Actions

The LG Act prescribes core objectives for each land category (Refer **Table 7: Land Categorisation Guidelines and Core Objectives**) to guide the sustainable management and use of Community and Crown land. It also requires that a Plan of Management includes:

- objectives and performance targets
- means by which Council proposes to achieve the objectives and performance targets
- manner in which Council proposes to assess performance with respect to objectives and performance targets

Council will aim to achieve the core objectives for each land category through managing Community and Crown land in accordance with performance targets to address identified management and use issues. These performance targets will be implemented and monitored as reasonably required through the actions and indicators outlined in **Table 16: Performance Targets and Actions**.

Table 16: Performance Targets and Actions

Performance Target	Means to Achieve (Actions)	Performance Assessment
ACCESS & CONNECTIVITY		
Encourage and facilitate sustainable access to Community and Crown land	<ul style="list-style-type: none"> o Ensure all Community and Crown land has clear information and regulatory signage o Promote access to Community and Crown land and facilities for all groups and individuals within the community o Identify, maintain and enhance links between areas of Community and Crown land through tree planting, signage, tracks, pedestrian / cycle pathways o Liaise with adjoining councils and government agencies to ensure links with regional trails and cycleway networks o Provide opportunities for all members of the community to participate in events and activities conducted on Community and Crown land o Ensure all pathways in Community and Crown land are easily accessible to all members of the community (except natural area tracks) 	<ul style="list-style-type: none"> o Number of visitors o Number of community activity and event participants o Number of facility user groups
Provide adequate opportunities for people with disabilities to access Community and Crown land	<ul style="list-style-type: none"> o Identify and implement suitable opportunities to provide access for wheelchairs and those with reduced mobility to and within Community and Crown land o Incorporate <i>Disability Discrimination Act 1992</i> (DDA) requirements into facilities and infrastructure on Community and Crown land 	<ul style="list-style-type: none"> o Number of DDA compliant facilities upgraded
Improve opportunities for community members that traditionally face difficulties in accessing Community and Crown land	<ul style="list-style-type: none"> o Provide resources translated into different languages to promote access to Community and Crown land by culturally and linguistically diverse (CALD) groups o Support and encourage emerging and non-traditional groups to participate in social, cultural and recreational activities on Community and Crown land 	<ul style="list-style-type: none"> o Number of translated resources developed
Public access to and use of Community and Crown land is provided on a fair and equitable basis	<ul style="list-style-type: none"> o Ensure all approved activities and events comply with relevant policies and legislation o Permit leases, licenses and other estates on Community and Crown land in accordance with the applicable community land category and provisions of the LG Act o Ensure leases, licences and other estates are granted only where there is demonstrated community benefit and/or significant infrastructure improvements o Regularly monitor leases and licences to ensure compliance with terms and conditions o Ensure all advertising and signage complies with legislation and Council regulations o Ensure fencing and signage minimises community perception of inappropriate alienation of Community and Crown land o Maintain a fair and equitable booking system for Community and Crown land 	<ul style="list-style-type: none"> o Number of non-compliance incidents reported o Number of complaints or service requests received

Performance Target	Means to Achieve (Actions)	Performance Assessment
Restrict access to areas of sensitive vegetation and threatened species habitat to ensure their protection and conservation	<ul style="list-style-type: none"> ○ Rationalise existing unmarked tracks and provide clear signposted walking trails to encourage visitors to keep to the defined routes ○ Restrict vehicular access to designated car-parking areas (except for maintenance, fire control and emergency purposes) ○ Ensure the location and use of tracks and pathways do not have an adverse impact on areas of sensitive vegetation and threatened species habitat 	<ul style="list-style-type: none"> ○ Number of signposted track routes maintained ○ Number of incidents of abandoned vehicles or damage to natural areas reported
BIODIVERSITY & ECOLOGY		
Protect native flora and fauna and their habitats	<ul style="list-style-type: none"> ○ Ground-truth remnant native vegetation and threatened species habitat on Community and Crown land ○ Protect all native vegetation and wildlife on Community and Crown land ○ Implement relevant provisions of the EPBC Act and BC Act in managing Community and Crown land ○ Maintain and restore remnant native vegetation using appropriately qualified contractors in accordance with legislative requirements and best practice techniques ○ Implement 'Saving our Species' strategy actions for threatened ecological communities, species and populations ○ Maintain an indigenous seedbank through local seed collection and propagation ○ Utilise locally indigenous species when undertaking planting or re-vegetation in or adjacent to natural areas ○ Ensure involvement in regional environmental and biodiversity committees and assist with the development of conservation actions ○ Actively control identified soil and other pathogens to minimise their spread e.g. Myrtle rust 	<ul style="list-style-type: none"> ○ Area of native vegetation protected ○ Percentage of bushland actively managed ○ Number of locally indigenous species planted
Reduce edge effects on Community and Crown land from adjoining private properties	<ul style="list-style-type: none"> ○ Facilitate provision of community weed education and awareness, particularly for residents adjoining Community and Crown land ○ Liaise with adjoining properties to undertake coordinated weed control and mitigation ○ Undertake regular weed inspections and enforce biosecurity duty requirements of the <i>Biosecurity Act 2015</i> 	<ul style="list-style-type: none"> ○ Number of weed complaints received ○ Number of weed inspections undertaken
Improve terrestrial and aquatic habitat value and connectivity	<ul style="list-style-type: none"> ○ Maintain and expand locally indigenous vegetation plantings in riparian corridors to provide a buffer zone to improve stream health and increase fauna habitat and movement ○ Enhance natural linkages such as creeklines and riparian corridors ○ Ensure re-vegetation projects incorporate the retention of logs and tree hollows for fauna habitat ○ Undertake regular fauna surveys to monitor the effectiveness of re-vegetation corridors ○ Remove obstacles to aquatic fauna movement, retain large woody debris and investigate fish ladders to provide breeding opportunities and increase waterway biodiversity ○ Record native flora and fauna sightings on Community and Crown land 	<ul style="list-style-type: none"> ○ Number of locally indigenous species planted ○ Number and diversity of native fauna recorded (species richness)

Performance Target	Means to Achieve (Actions)	Performance Assessment
Maintain and enhance biodiversity on Community and Crown land	<ul style="list-style-type: none"> ○ Ensure development and use of Community and Crown land is undertaken in an ecologically sensitive manner to minimise potential adverse impacts ○ Maximise the retention and protection of existing mature trees (particularly hollow-bearing) on Community and Crown land ○ Plant additional trees utilising locally indigenous species to increase habitat and shade ○ Maximise opportunities to provide additional native fauna habitat on Community and Crown land e.g. artificial hollows ○ Regularly monitor weed density and native species richness throughout core bushland reserves 	<ul style="list-style-type: none"> ○ Number of trees planted ○ Number of nest boxes installed ○ Number and diversity of native fauna recorded (species richness)
Reduce aquatic and terrestrial weed populations on Community and Crown land	<ul style="list-style-type: none"> ○ Conduct regular targeted weeding of high priority aquatic and terrestrial weeds utilising external contractors and volunteer Bushcare groups ○ Undertake regular weed removal along track edges, riparian corridors and priority ecological communities to prevent the further spread of weeds ○ Encourage community participation in Community and Crown land weed control through involvement in volunteer Bushcare groups 	<ul style="list-style-type: none"> ○ Area of bushland actively managed ○ Number of Bushcare volunteer activities
COMMUNITY EDUCATION AND INVOLVEMENT		
Increase community participation in the care and custodianship of Community and Crown land	<ul style="list-style-type: none"> ○ Promote and expand community involvement in Council's volunteer Bushcare program ○ Support volunteer Bushcare groups through training and resources ○ Encourage and support community and corporate events and workdays to assist in the care and maintenance of Community and Crown land ○ Assist Bushcare and other community groups apply for grant funding for projects on Community and Crown land ○ Encourage schools and local community groups to care for Community and Crown land adjoining their properties through re-vegetation, weed and litter reduction activities ○ Regularly liaise with local community groups regarding the maintenance and management of Community and Crown land ○ Ensure engagement with the community, particularly adjoining properties and volunteer groups, regarding significant Community and Crown land improvement works 	<ul style="list-style-type: none"> ○ Number of bushcare volunteers ○ Number of activities / events / workdays undertaken ○ Number of successful grants approved
Strengthen community appreciation of Community and Crown land	<ul style="list-style-type: none"> ○ Encourage community custodianship through education regarding the values of Community and Crown land and negative impacts on these values, such as dumping, litter, weeds, etc. ○ Develop culturally appropriate education material to increase appreciation and understanding of the benefits of Community and Crown land by people of culturally and linguistically diverse (CALD) backgrounds ○ Promote bushland and wildlife awareness and appreciation to local schools, residents, workers and visitors through interpretive materials and programs 	<ul style="list-style-type: none"> ○ Number of dumping incidents reported ○ Number of educational resources developed

Performance Target	Means to Achieve (Actions)	Performance Assessment
Increase community awareness of the range of recreational opportunities available in Community and Crown land	<ul style="list-style-type: none"> ○ Promote the diversity of active and passive recreational opportunities available on Community and Crown land e.g. brochures, website, etc. ○ Encourage the use of Community and Crown land for Councils school holiday activities program 	<ul style="list-style-type: none"> ○ Number of visitors recorded ○ Number of school holiday activities conducted
CONTAMINATION		
Minimise Council liability from land contamination	<ul style="list-style-type: none"> ○ Undertake due diligence to assess for potential land contamination prior to accepting the dedication of Community land to Council ○ Ensure that site audit statements confirm land to be dedicated to Council is free of contamination or suitably remediated and 'fit for purpose' ○ Undertake assessment of all development adjoining Community and Crown land in accordance with environmental planning instruments and Council Contaminated Land Policy requirements ○ Protect waterways from Community and Crown land contamination 	<ul style="list-style-type: none"> ○ Number of land dedication site investigation reports or audit statements received ○ Number of pollution incidents reported
Mitigate contamination impacts on Community and Crown land	<ul style="list-style-type: none"> ○ Ensure that a risk assessment is conducted of all known contaminated sites on Community and Crown land ○ Maintain and regularly update GIS mapping of all identified Community and Crown land contaminated sites ○ Undertake investigations and remediation of contaminated Community and Crown land identified as moderate to high risk ○ Ensure remediation works are carried out in a manner which will not result in an unacceptable level of risk to human health or the environment ○ Undertake ongoing monitoring of Community and Crown land with identified contamination 	<ul style="list-style-type: none"> ○ Number of sites investigated / verified / remediated ○ Number of Environmental Management or Remediation Action Plans implemented
Minimise the impact of asbestos contamination on Community and Crown land	<ul style="list-style-type: none"> ○ Ensure prompt investigation of all reports of asbestos dumping ○ Implement appropriate asbestos control measures and protocols where asbestos is discovered on Community and Crown land ○ Ensure timely removal of all recently dumped asbestos on Community and Crown land ○ Undertake appropriate assessment of Community and Crown land where evidence indicates the presence of legacy asbestos materials within soils 	<ul style="list-style-type: none"> ○ Number of asbestos redmediated sites implemented ○ Number of asbestos complaints or service requests investigated

Performance Target	Means to Achieve (Actions)	Performance Assessment
CULTURAL HERITAGE		
Ensure protection and best practice management of potential and known Aboriginal cultural heritage places and relics	<ul style="list-style-type: none"> ○ Consult and actively involve Aboriginal organisations, Local Aboriginal Land Councils (LALCs) and traditional custodians in the management of potential and known Aboriginal sites and relics ○ Protect Aboriginal heritage sites and relics from disturbance by human activities in conjunction with relevant Aboriginal organisations to ensure their ongoing conservation and preservation ○ Manage heritage sites and items of Aboriginal cultural significance in accordance with the <i>National Parks & Wildlife Act 1974</i>, <i>Heritage Act 1977</i> and the 'Burra Charter' ○ Educate the community on Aboriginal cultural heritage through interpretation on Community and Crown land where appropriate. Location of potential and known Aboriginal sites are not to be publicised, except where there is: <ul style="list-style-type: none"> » agreement from relevant Aboriginal community members, LALCs and traditional custodians » interpretation to promote public knowledge and respect for Aboriginal culture » implementation of measures to protect the place from damage ○ Undertake a due diligence assessment for all activities with the potential to impact on potential or known Aboriginal heritage: <ul style="list-style-type: none"> » Identify whether or not Aboriginal objects are, or are likely to be, present in an area » Determine whether or not activities are likely to harm Aboriginal objects (if present) » Determine whether an Aboriginal Heritage Impact Permit (AHIP) is required 	<ul style="list-style-type: none"> ○ Number of consultations undertaken ○ Number of protection and/or interpretation measures implemented
Ensure protection and best practice management of known and potential Non-Aboriginal cultural heritage	<ul style="list-style-type: none"> ○ Conserve and protect heritage elements and structures within Community and Crown land ○ Incorporate interpretation of heritage elements and structures within Community and Crown land ○ Manage places and items of non-Aboriginal cultural significance in accordance with the <i>Heritage Act 1977</i> and the 'Burra Charter' ○ Encourage non-destructive research of heritage elements and structures on Community and Crown land ○ Ensure assessments are undertaken prior to commencing works on a heritage item (other than regular maintenance and/or urgent safety activities) ○ Undertake archaeological assessments for all works identified with the potential to disturb, damage or destroy relics as defined under the <i>Heritage Act 1977</i> 	<ul style="list-style-type: none"> ○ Number of protection and/or interpretation measures implemented ○ Number of heritage and/or archaeological assessments undertaken

Performance Target	Means to Achieve (Actions)	Performance Assessment
DOMESTIC AND PEST ANIMALS		
Encourage responsible use of Community and Crown land by pet owners	<ul style="list-style-type: none"> ○ Provide and promote designated dog off-leash areas on Community and Crown land ○ Install signage to educate owners of their responsibility to remove faeces and keep their dogs under on-leash under adequate control ○ Undertake regular patrols of WPAs to monitor and enforce dog and cat owner compliance ○ Permit dogs on-leash in Community and Crown land (except inside amenities or near playground, BBQ and environmentally sensitive areas) ○ Encourage reporting of off-leash dogs on Community and Crown land (except in designated off-leash areas) ○ Restrict dogs to defined tracks in land categorised as Natural Area ○ Educate cat and dog owners as to their <i>Companion Animals Act 1998</i> responsibilities ○ Encourage reporting and removal of cats found roaming in WPAs 	<ul style="list-style-type: none"> ○ Number of off-leash dog areas declared ○ Number of incidents reported
Reduce impacts of pest animals on native wildlife and their habitat in Community and Crown land	<ul style="list-style-type: none"> ○ Control pest animals that significantly impact on native wildlife (such as foxes and rabbits) ○ Liaise with neighbouring Councils and relevant government agencies to ensure coordinated pest animal control programs ○ Encourage research into and implementation of alternative pest animal control programs as new technology becomes available ○ Implement threat abatement plan and pest management strategy actions for pest animals listed as key threatening processes ○ Identify and undertake the removal of exotic bee nests 	<ul style="list-style-type: none"> ○ Number of feral animal control programs conducted
EROSION AND STORMWATER		
Decrease impacts of stormwater on terrestrial and aquatic environments in Community and Crown land	<ul style="list-style-type: none"> ○ Provide control systems at stormwater pipe outlets as per best-practice guidelines to reduce erosion, nutrient, sediment and pollution loads into Community and Crown land ○ Implement appropriate stormwater controls prior to undertaking bushland restoration to minimise future impacts ○ Monitor water quality of creeks in accordance with ANZEC guidelines ○ Encourage community reporting of spills or pollution discharges into Community and Crown land to facilitate prompt clean-up and prosecution opportunities ○ Educate the community on the impacts of and actions to prevent erosion and stormwater pollution in Community and Crown land ○ Facilitate creek rehabilitation and improved bank stability by expanding riparian corridors through re-vegetation, reinstatement and restoration ○ Investigate and implement water reuse and recycling systems on Community and Crown land to minimise excess water use 	<ul style="list-style-type: none"> ○ Number of gross pollutant traps and litter booms maintained ○ Number of pollution incidents reported ○ Number of creek projects undertaken ○ Number of water reuse systems installed

Performance Target	Means to Achieve (Actions)	Performance Assessment
Minimise the environmental impacts of development adjoining Community and Crown land	<ul style="list-style-type: none"> ○ Ensure implementation of best-practice environmental controls for all developments adjoining Community and Crown land ○ Encourage use of Water Sensitive Urban Design (WSUD) in developments to reduce the quantity and improve the quality of stormwater draining into Community and Crown land ○ Minimise the number of new stormwater outlets into land categorised as Natural Area 	<ul style="list-style-type: none"> ○ Number of pollution incidents reported ○ Number of new stormwater outlets in Natural Areas
FIRE MANAGEMENT		
Minimise bushfire threat and associated risks to life and property adjacent to Community and Crown land	<ul style="list-style-type: none"> ○ Undertake all hazard reduction burns in partnership with the NSW Fire Brigades and Rural Fire Service ○ Maintain appropriate asset protection zones for Community and Crown land identified as fire prone ○ Conduct controlled fire burns to reduce fuel loads and stimulate natural regeneration at a frequency consistent with best practice for individual ecological communities ○ Encourage community reporting of suspicious behaviour ○ Maintain and regularly update mapping of fire history to maintain appropriate fire regimes for the various native vegetation communities 	<ul style="list-style-type: none"> ○ Number of fire management activities undertaken ○ Number of asset protection zones maintained
Minimise negative bushfire impacts on Community and Crown land	<ul style="list-style-type: none"> ○ Ensure fire management activities avoid damage to any known heritage relics, structures or sites ○ Manage controlled burns to minimise impacts on native wildlife, particularly threatened species, ecological communities and populations ○ Undertake pre-burn surveys to identify and relocate sensitive fauna 	<ul style="list-style-type: none"> ○ Number of fire damage incidents reported ○ Number of controlled burns undertaken
Recognise the importance of fire in the maintenance and conservation of native vegetation	<ul style="list-style-type: none"> ○ Identify and conduct fire management at intervals appropriate for each identified ecological community to maximise health and species diversity ○ Ensure planned burns will not significantly impact on the survival of known rare or endangered plants, plant communities or threatened fauna species ○ Establish reference locations in core bushland reserves to regularly monitor and assess changes and trends in vegetation health and fuel loads 	<ul style="list-style-type: none"> ○ Number of fire management activities undertaken ○ Vegetation condition data

Performance Target	Means to Achieve (Actions)	Performance Assessment
LITTER AND DUMPING		
Minimise litter and rubbish dumping in Community and Crown land	<ul style="list-style-type: none"> ○ Regularly review rubbish collection frequency and procedures on Community and Crown land in conjunction with user groups ○ Ensure all litter and dumping reports are investigated promptly to maximise opportunities for offender education and prosecution ○ Reduce litter in Community and Crown land, particularly natural areas, to reduce impacts on water quality, wildlife and visual amenity ○ Encourage visitors to keep Community and Crown land clean and tidy by providing waste bins ○ Actively reduce occurrences of dangerous waste materials that have been dumped within and along edges of Community and Crown land ○ Discourage illegal dumping through best-practice design and installation of vehicle barriers ○ Minimise litter and pollutants from Community and Crown land entering waterways 	<ul style="list-style-type: none"> ○ Number of complaints or service requests ○ Volume of gross pollutant trap and litter boom rubbish removed ○ Number of bins maintained ○ Number of gross pollutant traps and litter booms maintained
Increase community awareness of dumping impacts on Community and Crown land	<ul style="list-style-type: none"> ○ Undertake community education to increase awareness of the negative impacts of dumping and littering on Community and Crown land ○ Encourage community reporting of littering and rubbish dumping incidents ○ Install clear signage outlining penalties imposed for littering and dumping in Community and Crown land 	<ul style="list-style-type: none"> ○ Number of incidents reported
MAINTENANCE		
Community and Crown land is well maintained to standards appropriate for its function and level of use	<ul style="list-style-type: none"> ○ Implement a coordinated maintenance program including a schedule of regular inspections on all Community and Crown land ○ Identify maintenance performance targets that reflect levels of use and land category ○ Schedule major maintenance works to occur in 'off-season' to minimise disruption to user groups ○ Ensure all maintenance on Community and Crown land complies with applicable Australian Standards, legislation and best practice techniques 	<ul style="list-style-type: none"> ○ Number of complaints or service requests ○ Community satisfaction surveys
Ensure all amenities, playgrounds and other facilities on Community and Crown land are adequately maintained	<ul style="list-style-type: none"> ○ Conduct regular inspections and ensure that repairs, renovations and other maintenance is undertaken promptly and in accordance with relevant standards ○ Undertake regular playground inspections and ensure repairs are undertaken promptly ○ Conduct regular inspections of all recreational facilities, including tracks, and ensure required repairs are undertaken promptly to minimise risk and liability ○ Regularly review inspection timeframes for Community and Crown land amenities and infrastructure to ensure the impacts of climate change are minimised 	<ul style="list-style-type: none"> ○ Number of complaints or service requests ○ Frequency of inspections

Performance Target	Means to Achieve (Actions)	Performance Assessment
PLANNING		
Maintain consistency between land categorisation and landuse planning	<ul style="list-style-type: none"> o Ensure environmental planning instrument zoning and land categorisation of Community and Crown land is consistent to adequately reflect its intended purpose and characteristics o Ensure all land to be dedicated to Council for open space under Voluntary Planning Agreements (VPAs) or other contributions mechanisms is appropriately zoned and identified as 'public reserve' 	<ul style="list-style-type: none"> o Area of new public reserves
Ensure Community and Crown land parcels reflect actual landuse	<ul style="list-style-type: none"> o Investigate and where appropriate undertake closure of unformed roads within Community and Crown land o Consolidate multiple small land parcels in Community and Crown land to facilitate more efficient management 	<ul style="list-style-type: none"> o Number of roads closed o Number of parcels consolidated
Implement ecologically sustainable development principles in developing of Community and Crown land	<ul style="list-style-type: none"> o Ensure compliance with environmental assessment requirements under the EP&A Act for proposed development or activities on Community and Crown land o Develop and implement best-practice mitigation measures to minimise the potential environmental impacts of development on Community and Crown land 	<ul style="list-style-type: none"> o Number of REFs completed
Maximise community and environmental benefits of Community and Crown land	<ul style="list-style-type: none"> o Identify and acquire additional land parcels to improve Community and Crown land size and configuration, enhance access and passive surveillance opportunities o Identify and rationalise surplus Community land that provides minimal benefit and could be used to fund improvements to nearby Community and Crown land o Undertake and implement masterplans to guide the development and upgrade of significant Community and Crown land o Facilitate active and healthy communities through open space and recreation planning based on best practice and evolving trends to adequately meet growing community needs o Undertake regular research on the current and future recreational needs of the community to inform the development and upgrade of Community and Crown land facilities 	<ul style="list-style-type: none"> o Area of land acquired o Number of masterplans developed o Number of plans / policies / strategies developed

Performance Target	Means to Achieve (Actions)	Performance Assessment
RECREATIONAL FACILITIES AND USE		
Ensure facilities maximise the capacity of Community and Crown land to meet increasing community needs	<ul style="list-style-type: none"> ○ Ensure facilities and infrastructure on Community and Crown land are high quality and multi-functional to meet a high level of demand, and to adequately accommodate a diversity of uses and evolving trends ○ Permit the development of new facilities and improvements on Community and Crown land to meet identified and evolving community needs subject to consistency with the core objectives of the applicable land category ○ Design sporting infrastructure (fields, amenities, lighting and other facilities) to support shared use by multiple sporting codes and user groups ○ Manage Community and Crown land facilities to maximise use whilst minimising potential conflicts between users and neighbouring properties ○ Incorporate off-road shared pedestrian / bicycle pathway connections and associated facilities within Community and Crown land (except land categorised as Natural Area) ○ Maintain and regularly update the spatially linked asset register of facilities and infrastructure on Community and Crown land 	<ul style="list-style-type: none"> ○ Value of new facilities or improvements completed ○ Number of visitors recorded ○ Number of complaints or service requests received ○ Number of bicycle trips recorded
Ensure facilities and improvements on Community and Crown land facilitate and encourage physical activity	<ul style="list-style-type: none"> ○ Provide recreational facilities and landscaping that encourages community use and supports physical activity ○ Incorporate the 'Healthy by Design' principles into the design of facilities and infrastructure on Community and Crown land ○ Promote the range of recreational opportunities available on Community and Crown land ○ Deliver multi-purpose recreational facilities that provide for participation and access by all ages and abilities within the community 	<ul style="list-style-type: none"> ○ Value of new facilities or improvements completed ○ Number of program and activity participants recorded
Maximise external funding opportunities to facilitate improvements to Community and Crown land	<ul style="list-style-type: none"> ○ Identify potential additional sources of funding through government grant programs, VPAs and other funding mechanisms ○ Prioritise and prepare grant applications based on the level of community benefit and identified needs 	<ul style="list-style-type: none"> ○ Number of grant applications or VPAs ○ Value of grant or VPA improvements completed
Provide adequate car parking for Community and Crown land users to minimise impact on local residents	<ul style="list-style-type: none"> ○ Provide car parks in or adjacent to Community and Crown land based upon demand levels ○ Ensure car parking in Community and Crown land has adequate signage and restrictions to facilitate availability for visitors and discourage all-day parking by non-users ○ Ensure car parks incorporate WSUD, landscaping and lighting to maximise safety and minimise environmental impacts ○ Ensure adequate carparking spaces are provided and signposted for persons with a disability 	<ul style="list-style-type: none"> ○ Number of complaints or service requests received ○ Number of disabled parking spaces maintained

Performance Target	Means to Achieve (Actions)	Performance Assessment
Minimise the impacts of recreational facilities and activities on the cultural and environmental values of Community and Crown land	<ul style="list-style-type: none"> ○ Ensure recreational facilities do not adversely impact on environmentally or culturally significant areas within Community and Crown land ○ Utilise best-practice design, materials and construction techniques for recreational facilities and infrastructure to minimise visual and environmental impacts (particularly Natural Areas) ○ Exclude active sporting and recreational facilities from Community and Crown land categorised as Natural Area ○ Implement mound and landscape buffer zones to minimise inappropriate light spill into adjoining properties and wildlife habitat ○ Ensure floodlighting does not unreasonably interfere with the use and enjoyment of adjoining land ○ Actively monitor floodlighting to ensure only on when sporting facilities are in use and ensure all floodlighting is extinguished immediately following conclusion of organised activities 	<ul style="list-style-type: none"> ○ Number of complaints or service requests received
Provide high quality and best-practice amenities and recreational facilities on Community and Crown land	<ul style="list-style-type: none"> ○ Deliver new and upgraded recreational facilities and infrastructure in accordance with relevant Australian Standards, industry and sustainability best-practice, to reflect increasing community expectations ○ New and upgraded amenities buildings, sporting and recreational infrastructure are to adequately incorporate multi-use, security, financial sustainability, storage, aesthetics and resource consumption (energy/water) considerations ○ Provide adequate softfall, shade and seating for parents and carers at playgrounds on Community and Crown land 	<ul style="list-style-type: none"> ○ Value of new facilities and infrastructure completed ○ Number of amenities upgraded ○ Number of playgrounds upgraded
SAFETY AND RISK MANAGEMENT		
Facilitate a safe community perception of Community and Crown land	<ul style="list-style-type: none"> ○ Ensure prompt reporting of anti-social behaviour and illegal activities on Community and Crown land to local police ○ Encourage community reporting of inappropriate activities on Community and Crown land to facilitate legitimate use ○ Maximise opportunities for passive surveillance of Community and Crown land through low density plantings along pathway entrances, street and track edges ○ Prohibit the use of glass bottles and discourage consumption of alcohol at sporting events ○ Ensure all hirers and lessees comply with the permit and licence requirements for selling alcohol on Community and Crown land 	<ul style="list-style-type: none"> ○ Number of antisocial activities or incidents reported

Performance Target	Means to Achieve (Actions)	Performance Assessment
Minimise Council exposure to compensation and litigation	<ul style="list-style-type: none"> ○ Implement proactive risk management of Community and Crown land through regular inspections of buildings, infrastructure, natural features and surfaces ○ Encourage Council staff to identify potential hazards and quantify the associated level of risk and potential liability ○ Eliminate or minimise safety risks identified on Community and Crown land ○ Ensure tracks are classified and maintained in accordance with relevant Australian Standards ○ Maintain tree canopy in a healthy condition through regular inspections and appropriate remedial action 	<ul style="list-style-type: none"> ○ Frequency of asset inspections undertaken ○ Number of complaints or incidents reported ○ Number of remedial actions undertaken
Provide a safe environment and facilities for recreational activities	<ul style="list-style-type: none"> ○ Ensure that recreational water bodies are free of physical hazards to minimise the risk of injury to swimmers ○ Undertake regular testing of aquatic playgrounds and swimming areas to monitor water quality and ensure suitability for recreational use ○ Ensure that all new and upgraded playgrounds comply with current safety standards ○ Maintain and regularly update an asset register for buildings and other significant infrastructure on Community and Crown land ○ Ensure all floodlighting at sporting facilities complies with the relevant Australian Standards for lux levels 	<ul style="list-style-type: none"> ○ Frequency of water testing undertaken ○ Number of injuries reported ○ Frequency of asset inspections undertaken
UNAUTHORISED USE, ENCROACHMENTS AND ADJOINING LAND		
Ensure development on adjoining land does not impact on Community and Crown land	<ul style="list-style-type: none"> ○ Ensure adjoining property development applications adequately assess and mitigate potential impacts on Community and Crown land ○ All development adjoining Community and Crown land is to incorporate the use of non-invasive species (native or indigenous species adjoining Natural Areas) in landscaping ○ Ensure compliance with and enforcement of development consent conditions imposed to minimise impacts on Community and Crown land ○ Development adjoining waterways is to incorporate minimum best practice Vegetated Riparian Zone (VRZ) widths to provide an adequate buffer zone ○ Ensure development adjoining natural areas incorporate adequate environmental controls consistent with Councils environmental planning instruments 	<ul style="list-style-type: none"> ○ Number of development application referrals received ○ Number of complaints or non-compliance incidents reported

Performance Target	Means to Achieve (Actions)	Performance Assessment
Ensure surrounding private properties are not encroaching on Community and Crown land	<ul style="list-style-type: none"> ○ Identify and remove unauthorised uses and encroachments from adjoining private properties on Community and Crown land ○ Encourage volunteer and user groups, residents and visitors to report unauthorised uses and encroachments within Community and Crown land ○ Notify owners of adjoining properties to request removal of unauthorised structures, objects and materials 	<ul style="list-style-type: none"> ○ Number of encroachments or unauthorised uses reported ○ Number of encroachments or unauthorised uses removed
Minimise adverse impacts of Community and Crown land infrastructure and use on surrounding residents (including fauna in adjoining bushland)	<ul style="list-style-type: none"> ○ Monitor the impacts of traffic and parking on residential streets surrounding Community and Crown land ○ Encourage good relations between neighbouring properties and user groups ○ Investigate and implement measures to minimise disturbance to adjoining land e.g. restricted hours of use ○ Ensure that all maintenance, construction and improvement works incorporate provisions to minimise adverse impacts and disturbance to neighbouring properties and wildlife habitat ○ Investigate and implement noise and light spill minimisation measures e.g. buffer zones ○ Ensure groups and other users of Community and Crown land comply with approved hours of use 	<ul style="list-style-type: none"> ○ Number of complaints or service requests received ○ Number of development compliance issues reported
Ensure natural areas are not impacted by maintenance of other Community and Crown land categories	<ul style="list-style-type: none"> ○ Identify boundaries between natural areas and other Community and Crown land categories to delineate differing maintenance requirements ○ Facilitate communication between Council maintenance and natural resource staff to minimise potential Community and Crown land management conflicts ○ Educate Council maintenance staff regarding areas of sensitive vegetation and threatened species habitat to minimise impacts ○ Minimise run-off and use of chemical fertilisers, pesticides and herbicides in the maintenance of turf cover 	<ul style="list-style-type: none"> ○ Number of complaints or incidents reported

8

Review

This CCLPoM will require regular review to reflect changing community needs, Council priorities, legislation and policy updates. Council will aim to undertake a review of this CCLPoM at five-year intervals consistent with best practice, to ensure Community and Crown land is well managed to provide a safe and engaging environment for community well-being whilst protecting and sustaining the local environment. The community will be provided with an opportunity to participate in any reviews of the CCLPoM in accordance with the requirements of the LG Act and Council's Community Engagement Strategy.

Council aims to acquire additional land to meet the increasing needs of our diverse community and to ensure the protection of the natural environment subject to future opportunities and resources. This will generally be achieved through dedication to Council as public reserve via VPAs or other development contribution mechanisms.

Council may also be appointed to manage additional Crown land dedicated or reserved for public purposes.

Appendix D: Community and Crown Land Schedule will require periodic updates to reflect new acquisitions or dedications of land into Council's ownership and/or land vested under the care, control and management of Council.

Appendix D: Community and Crown Land Schedule

This schedule identifies the Community and Crown land under Council ownership and / or management and subject to this CCLPoM. It identifies the applicable LG Act land categories and land ownership For consistency of management, operational land and unclosed roads managed as public reserves have also been included. Where multiple categories apply to a park or reserve, reference should be made to the relevant categorisation map for further detail. Where specific plans of management are subsequently adopted by Council for Community and Crown land, they will take precedence over the CCLPoM. Maps have been created for land with multiple categories.

Table 17: Community and Crown Land Schedule

MAP ID	NAME	PARCEL	LANDOWNER	CROWN RESERVE	CROWN PURPOSE	SUBURB	LOCAL GOVERNMENT ACT CATEGORY							HERITAGE	THREATENED ECOLOGICAL COMMUNITIES
